PALAL MINING CORPORATION  
(An Exploration Stage Company)  
December 31, 2001

**NOTES TO INTERIM FINANCIAL STATEMENTS**
**1. BASIS OF PRESENTATION**

The foregoing unaudited interim financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB and Regulation S-B as promulgated by the Securities and Exchange Commission. Accordingly, these financial statements do not include all of the disclosures required by generally accepted accounting principles for complete financial statements. These unaudited interim financial statements should be read in conjunction with the audited financial statements for the year ended June 30, 2001. In the opinion of management, the unaudited interim financial statements furnished herein include all adjustments, all of which are of a normal recurring nature, necessary for a fair statement of the results for the interim period presented.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of the Company's financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions that could have a material effect on the reported amounts of the Company's financial position and results of operations.

Operating results for the three and six month periods ended December 31, 2001 are not necessarily indicative of the results that may be expected for the year ending June 30, 2002.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR OPERATIONS

### Financial Condition, Liquidity and Capital Resources

Since inception on September 2, 1999, our Company has been engaged in exploration and acquisition of mineral properties. Our Company's principal capital resources have been acquired through issuance of common stock and from shareholder loans.

At December 31, 2001, there was positive working capital of \$349 compared to \$9,461 at June 30, 2001. This change is primarily the result of payment of professional expenses.

At December 31, 2001, our Company's total assets of \$3,690 consisted of mainly cash and office equipment. This compares with our Company's total assets at June 30 of \$12,041, also mainly cash.

At December 31, 2001, our Company's total liabilities rose to \$1,695 from \$770 at June 30, 2001, primarily reflecting a build-up of accounts payable.

Our Company has not had revenues from inception. Although there is insufficient capital to fully explore and develop its mineral properties, our Company expects to survive and exploit its resources primarily with funding from sales of its securities and, as necessary, from shareholder loans.

Our Company has no long-term debt and does not regard long-term borrowing as a good, prospective source of financing.

### Results of Operations

Our Company posted a loss of \$9,276 for the six months ended December 31, 2001. The principal component of the loss was professional expenses.

Operating expenses for the six months ending December 31, 2001 were also \$9,276 down from \$47,416 in the comparable half year ending December 31, 2000, due to sharp reductions in all categories of expense.
