PUMATECH, INC.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Basis of Presentation

The accompanying condensed consolidated financial statements of Pumatech, Inc. (Pumatech or the "Company") for the three months ended October 31, 2001 and 2000 are unaudited and reflect all normal recurring adjustments which are, in

Edgar Filing: PUMATECH INC - Form 10-Q

the opinion of management, necessary for their fair presentation. These condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended July 31, 2001. The condensed consolidated balance sheet as of July 31, 2001 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. Certain prior period amounts have been reclassified to conform to the current period's presentation. The results of operations for the interim period ended October 31, 2001 are not necessarily indicative of results to be expected for the full year.

Note 2 Recently Issued Accounting Pronouncements

Accounting for Consideration Given to a Customer or a Reseller of the Vendor's Products

In June 2001, the Emerging Issues Task Force (EITF) of the Financial Accounting Standards Board (FASB) issued EITF Issue No. 00-25, "Vendor Income Statement Characterization of Consideration Paid to a Reseller of the Vendor's Products." In addition in November 2001, the EITF reached a consensus on Issue No. 01-09, "Accounting for Consideration Given by a Vendor to a Customer or a Reseller of the Vendor's Products," which codified all the issues in EITF No. 00-25, among others. EITF No. 01-09 addresses whether consideration from a vendor to a reseller of the vendor's products is an adjustment to the selling prices of the vendor's products and, therefore, should be deducted from revenue when recognized in the vendor's results of operations, or, a cost incurred by the vendor for assets or services received from the reseller and, therefore, should be included as a cost of expense when recognized in the vendor's results of operations. EITF No. 01-09 is effective for the Company's fiscal quarters beginning on February 1, 2002. Upon adoption of EITF No. 01-09, financial statements for prior periods presented for comparative purposes should be reclassified to comply with EITF No. 01-09. The Company currently estimates that sales and marketing expenses in the accompanying condensed consolidated statements of operations include approximately \$96,000 and \$105,000 for the three months ended October 31, 2001 and 2000, respectively, of consideration paid to its resellers (i.e. considered as an adjustment to the selling prices of the Company's products). Such consideration will be classified as a reduction of revenue when provisions of EITF 01-09 are applied. The Company's adoption of EITF No. 01-09 is not expected to have a material impact on its revenues and gross margins or any effect on its operating margins, net loss and net loss per share.

Accounting for Business Combinations, Goodwill and Other Intangible Assets

In July 2001, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 141, "Business Combinations," and SFAS No. 142, "Goodwill and Other Intangible Assets." SFAS No. 141 provides new guidance on the accounting for a business combination at the date a business combination is completed. Specifically, it requires use of the purchase method of accounting for all business combinations initiated after June 30, 2001, thereby eliminating use of the pooling-of-interests method. SFAS No. 142 establishes new guidance on how to account for goodwill and intangible assets after a business combination is completed. Among other things, it requires that goodwill and certain other intangible assets will no longer be amortized and will be tested for impairment at least annually and written down only when impaired. The Company will continue to amortize its goodwill, which it anticipates will be approximately \$2,700,000 for fiscal 2002, until its expected adoption of the goodwill non-amortization provisions, among others, of this statement at the beginning of fiscal 2003. The

Edgar Filing: PUMATECH INC - Form 10-Q

Company is currently assessing the impact of adopting SFAS No. 141 and SFAS No. 142 on its future financial position and results of operations.

Accounting for the Impairment or Disposal of Long-Lived Assets

In August 2001, the FASB issued SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS No. 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets to be held and used, to be disposed of other than by sale and to be disposed of by sale. Although the Statement retains certain of the requirements of SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of", it supersedes SFAS No. 121 and Accounting Principles Board (APB) Opinion No. 30, "Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions for the disposal of a segment of a business." SFAS No. 144 also amends Accounting Research Bulletin No. 51, "Consolidated Financial Statements," to eliminate the exception to consolidation for a subsidiary for which control is likely to be temporary. The Statement is effective for the Company's financial statements issued for fiscal quarters beginning on August 1, 2002. The Company is currently assessing the impact of adopting SFAS No. 144 but does not expect the adoption to have a material impact on its financial position and results of operations.

Note 3 Balance Sheet Components

Inventories, net, consist of the following:

	October 31, 2001	Jul 2001
(In thousand)		
Raw materials	\$ 95	\$
Finished goods and work-in-process	150	
	245

Less: Accumulated amortization	(13,050)	

Edgar Filing: PUMATECH INC - Form 10-Q

Intangible assets, net	\$ 11,357	\$
	=====	=====

Note 4 Acquisition

In October 2000, the Company signed and closed an asset purchase agreement with Vanteon Corporation (Vanteon), of Rochester, New York to acquire certain assets and assume certain liabilities of The Windward Group (Windward), a wholly owned subsidiary of Vanteon headquartered in Los Gatos, California. Windward is a professional services company specializing in creating consumer and enterprise solutions that combine mobile, wireless, desktop, Internet and database technology. Under the terms of the asset purchase agreement, the Company paid \$12,250,000 in cash and placed 171,026 shares of Pumatech common stock in escrow. These shares were valued upon release from escrow based on the fair value of the common stock on the release date and as a result, the amount of goodwill arising from the transaction would increase upon release of these shares. The shares were to be released in equal installments to Vanteon based on the achievement of quarterly performance milestones through the first quarter of fiscal 2002. The performance milestones set for the second quarter of fiscal year 2001 were met and therefore 42,757 shares, valued at approximately \$204,000, were released for the quarter ended January 31, 2001. As of the date of this Report on Form 10-Q, no additional shares were released for the quarters ended April 30, 2001, July 31, 2001 and October 31, 2001 as the Company has determined that the performance milestones set for the said quarters had not been met.

Pro Forma Results (Unaudited)

The following unaudited pro-forma consolidated financial information reflects the results of operations for the three months ended October 31, 2000, as if the acquisition of Windward had occurred on August 1, 2000 and after giving effect to purchase accounting adjustments. These pro forma results have been prepared for comparative purposes only and do not purport to be indicative of what operating results would have been had the acquisitions actually taken place on August 1, 2000. In addition, these results are not intended to be a projection of future results and do not reflect any synergies that might be achieved from the combined operations.

Three Months Ended
October 31, 2000

(In thousands, except per share data)

Pro-forma revenue	\$	11,536
Pro-forma net loss	\$	(6,333)
Pro-forma basic and diluted loss per share	\$	(0.15)

Note 5 Restructuring and Cost Reduction Plans

During fiscal 1999 and 2001, the Company implemented restructuring and cost reduction plans aimed at reducing costs that were not integral to the Company's

Edgar Filing: PUMATECH INC - Form 10-Q

overall strategy and to better align its expense levels with current revenue levels and ensure conservative spending during periods of economic uncertainty. Included in the cost reduction initiatives were reductions in workforce and facilities consolidations. Of the resulting restructuring charges of \$768,000 and \$1,417,000 in fiscal 1999 and 2001, respectively, \$167,000 and \$461,000, respectively, remained unused as of October 31, 2001.

A summary of the severance and facilities costs and assets held for disposal relating to the cost reduction plans implemented in fiscal 2001 is outlined as follows (in thousands):

	Workforce Reduction	Consolidation of Excess Facilities	Total
	-----	-----	-----
Total charge.....	\$ 581	\$ 836	\$1,417
Non-cash charges.....	-	(165)	(165)
Cash Payments.....	(561)	(103)	(664)
	-----	-----	-----
Balance at July 31, 2001.....	\$ 20	\$ 568	\$ 588
Non-cash charges.....	-	(54)	(54)
Cash payments.....	(20)	(53)	(73)
	-----	-----	-----
Balance at October 31, 2001..	\$ -	\$ 461	\$ 461
	=====	=====	=====

6

Note 6 Notes Payable

The Company's notes payable includes the following:

	October 31, 2001

	(In thou
Revolving credit line, 5.1% rate, payable in March 2002	\$ 2,000
Equipment line, 9.3% average rate, paid in September 2001	-

Notes payable	\$ 2,000
	=====

In September 2001, the Company borrowed \$2 million under its loan and security agreement entered into on March 29, 2001, which remained outstanding at October 31, 2001. As of October 31, 2001, the Company was in compliance with the loan covenants.

The outstanding balance at July 31, 2001 on a \$750,000 equipment line of credit was paid off in September 2001 with a portion of the new borrowings described above. The \$750,000 equipment line and the \$1,000,000 revolving line of credit from the same bank were not renewed.

Note 7 Commitments

Edgar Filing: PUMATECH INC - Form 10-Q

The Company is committed to invest an additional \$2,500,000 in Azure Venture Partners.

Note 8 Stock Option Cancellation/Regrant and Stock Compensation

On September 6, 2001, the Company's Board of Directors approved a proposal to offer its employees, officers and directors the opportunity to cancel stock options granted to them between September 1999 and June 2001 in exchange for an equal number of new options to be granted in the future, on a date more than six months after the date of cancellation of the original options. The Company's Board of Directors determined that existing options eligible under the terms of the proposal no longer had sufficient value to motivate and retain the optionholders.

On September 24, 2001, the Company filed a tender offer document with the Securities and Exchange Commission (SEC) that provides detailed information concerning the stock option exchange and supplemental option grant program.

The new options will be granted on April 24, 2002, six months and two days following the close of the tender offer on October 22, 2001, and will be priced at the closing market price on the grant date. Additionally, the replacement grants will have the same terms, vesting start date and vesting schedule as those cancelled. In order to receive the new options, the employees must still be employed by the Company on the new grant date. Holders of options exercisable for approximately 1,315,000 shares with exercise prices of \$3.01 or greater and a weighted average price of \$10.01 were given the opportunity to cancel their options. Holders of options exercisable for approximately 967,000 shares, net of the effect of recent terminations, elected to cancel their options.

As a result of the above offer to cancel options in exchange for new options and in accordance with FASB Interpretation (FIN) No. 44, "Accounting for Certain Transactions Involving Stock Compensation," an interpretation of APB Opinion No. 25, options to purchase 41,500 shares that were granted in July 2001 became subject to variable plan accounting. FIN No. 44 holds that if a lower-priced option is granted within a six-month period before or after a higher priced option held by the same person is cancelled, the combined transactions are considered a repricing and result in variable-plan accounting. Accordingly, the Company recorded additional deferred stock compensation costs of approximately \$23,000 and incurred an amortization expense of approximately \$6,000 relating to such options in the first quarter of fiscal 2002. The variable accounting cost is

7

based on any excess of the common stock closing price at the end of the reporting period or date of exercise, forfeiture, cancellation without replacements, if earlier, over the exercise price (i.e. intrinsic value). This cost is amortized on an accelerated basis over the remaining vesting period consistent with the method described in FIN No. 28. The Company remeasures and records the intrinsic value of the aforementioned repriced employee options every quarter until they are exercised, forfeited, cancelled, or expire.

In addition, the remeasurement at October 31, 2001 of the intrinsic value of the repriced options granted to employees in July 2001 in conjunction with the cancellation and regrant program implemented in January 2001, resulted in additional deferred stock compensation costs of approximately \$444,000. Approximately \$262,000 of the aggregate costs relating to such options was recorded to expense in the first quarter of fiscal 2002.

Edgar Filing: PUMATECH INC - Form 10-Q

Including the expenses described above and a stock compensation expense of approximately \$96,000 related to certain options granted to former employees by NetMind Technologies, Inc. (NetMind) prior to the Company's acquisition of NetMind, the total stock compensation expense recorded for the three months ended October 31, 2001 was approximately \$364,000. The total stock compensation expense, all of which were related to options granted by NetMind, was \$221,000 for the three months ended October 31, 2000.

Note 9 Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted net income (loss) per share is computed by dividing net income (loss) by the weighted average number of dilutive potential common shares that were outstanding during the period. Diluted weighted average shares reflect the dilutive effect, if any, of potential common shares based on the treasury stock method.

Basic and diluted net loss per share were calculated as follows during the three months ended October 31, 2001 and 2000, respectively:

	Three Months Ended October 31,	
(In thousands, except per share amounts)	2001	2000
Numerator:		
Net loss	\$ (6,683) =====	\$ (4,982) =====
Denominator:		
Weighted average shares outstanding used to compute basic and diluted net loss per common share	44,629 =====	42,666 =====
Basic and diluted net loss per share	\$ (0.15) =====	\$ (0.12) =====

All common shares that were held in escrow, totaling approximately 140,000 as of October 31, 2001, were excluded from basic and diluted net loss per share calculations.

Potential common shares attributable to stock options, warrants and shares held in escrow of 5,817,706 and 8,459,416 were outstanding at October 31, 2001 and 2000, respectively. However, as a result of a net loss incurred by the Company in the three months ended October 31, 2001 and 2000, the shares were excluded from the weighted average outstanding shares (using the treasury stock method) used to calculate net loss per share because the effect would have been antidilutive.

Note 10 Comprehensive Income

Accumulated other comprehensive income on the condensed consolidated balance sheets consists of net unrealized gains on available for sale investments and foreign currency translation adjustments. Total comprehensive

Edgar Filing: PUMATECH INC - Form 10-Q

income for the three months ended October 31, 2001 and 2000, respectively, is presented in the following table:

(In thousands)	Three Months Ended October 31,	
	2001	2000
Net loss	\$ (6,683)	\$ (4,982)
Other comprehensive income:		
Change in net unrealized gain on investments ..	117	6
Change in currency translation adjustments	18	4
	135	10
Total other comprehensive income		
Total comprehensive loss	\$ (6,548)	\$ (4,972)

The balance of unrealized gain on investments at October 31, 2001 consisted of net unrealized gain from our holdings of Amazon.com common stock and government bonds. The balance of unrealized gain on investments at October 31, 2000 consisted entirely of net unrealized gain from our holdings of Amazon.com common stock.

Note 11 Business Segments

Operating segments are identified as components of an enterprise about which separate discrete financial information is available that is evaluated by the chief operating decision maker or decision-making group to make decisions about how to allocate resources and assess performance. The Company's chief operating decision maker is the Chief Executive Officer. To date, the Company has reviewed its operations principally in a single segment. The chief operating decision maker assesses performance based on the gross profit generated by this segment.

The Company operates in a single industry segment encompassing the development, marketing and support of mobile data exchange software. The Company markets its products to customers primarily in North America, Asia and Europe. The Company's customer base consists primarily of corporate organizations, business development organizations, industry associations, resellers, international system integrators, large original equipment manufacturers (OEMs) in the personal computer (PC) market and selected distributors in North America, Africa, Asia, Australia, Europe, New Zealand and South America which primarily market to the retail channel.

9

Revenue information by geographic region is as follows (revenue is attributed to regions based on the location of customers):

Three Months Ended October 31,	
2001	2000

Edgar Filing: PUMATECH INC - Form 10-Q

	=====	=====

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following information should be read in conjunction with the condensed consolidated financial statements and the notes thereto contained elsewhere in this Form 10-Q and in conjunction with the consolidated financial statements and management's discussion and analysis of financial condition and results of operations in our Form 10-K. This quarterly report on Form 10-Q, and in particular management's discussion and analysis of financial condition and results of operations, contains forward-looking statements regarding future events or our future performance that involve certain risks and uncertainties including those discussed in "Factors That May Affect Future Operating Results" below. In this Form 10-Q, the words "anticipates", "believes", "expects", "intends", "future" and similar expressions identify forward-looking statements. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future, including statements relating to planned product releases and composition of revenue, both in terms of segment and geographical source, are forward-looking statements. Such forward-looking statements are based on management's current views and assumptions regarding future events and operating performance, and speak only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statements whether as a result of new information, future events or otherwise. Actual events or our actual future results may differ materially from any forward looking statements due to the risks and uncertainties outlined below.

Edgar Filing: PUMATECH INC - Form 10-Q

Management's discussion and analysis includes:

- . Business overview.
- . A comparison of our results of operations in the three months ended October 31, 2001 with the results in the corresponding period in fiscal 2001.
- . Recently issued accounting pronouncements.
- . A discussion of our operating liquidity and capital resources.
- . A discussion of factors that may affect our future operating results.

Business Overview

Pumatech, Inc. (Pumatech) develops, markets and supports synchronization, change detection/notification, and Web rendering/browsing software that enables consumers, mobile professionals and information technology (IT) officers to harness the full capabilities of handheld organizers/computers, Web-enabled cellular phones, pagers and other wireless/wireline personal communications platforms. We provide a mobile solution that provides several alternative implementations for synchronization, complete customization of device-based applications, centralized backup, security, information flow control, notification, e-commerce and browsing of intranet and Internet-based information. Our software is designed to improve the productivity of business professionals and corporations who are increasingly relying on mobile computing devices to address their growing needs for accessible, up-to-date information, whether in or out of the office. Our product families, which include Intellisync(R), Enterprise Intellisync(TM), Intellisync Anywhere(R) and Satellite Forms(R) software, along with our technology licensing components - Browse-it(TM), Mind-it(TM), Sync-it and Intellisync Software Development Kit (Intellisync SDK) software - are designed to connect mobile devices to essential information anytime, anywhere. The Intellisync platform lets users synchronize the critical connection between both wired and wireless handheld devices and the vast stores of information found in corporate databases, the Internet and individuals' personal computer (PC) applications. Intellisync Anywhere keeps users current with remote and local area network-based (LAN-based) data synchronization between groupware servers and handheld devices. Enterprise Intellisync gives IT administrators complete control over the configuration, deployment and management of Intellisync desktop client

11

software. Satellite Forms provides the tools needed to create custom applications for Palm OS(R) handheld devices and the ability to integrate those applications with desktop or network databases. Browse-it enables users to view Web pages online or offline on their handhelds in a secure, conventional and quick manner. Mind-it technology provides user-driven personalization, enabling users to track specific Web information and be notified when that information changes. Based on our Intellisync synchronization software, Sync-it allows users to perform true, multi-point, Web-based synchronization of calendar, e-mail, contacts, and tasks between their Palm OS handheld and their home PC, work PC, and Internet PIM (Personal Information Management), using a network, dial-up, or wireless connection to the Internet. Intellisync SDK enables independent software vendors (ISVs), device original equipment manufacturers (OEMs) and Internet-based services to develop translator software for both applications and devices, which can be incorporated into Intellisync product offerings and

Edgar Filing: PUMATECH INC - Form 10-Q

provides a solution for adding intelligent synchronization to enterprise applications, mobile devices and Web-based services. With intelligent synchronization, users can keep their critical information up-to-date and "in sync" across multiple applications and mobile devices.

We license our software products directly to corporations, OEMs and business development organizations worldwide. In addition, we sell our retail products through several distribution channels both domestically and internationally, including major distributors, resellers, computer dealers, retailers and mail-order companies. Internationally, we are represented by over 30 distributors and resellers in Africa, Asia, Australia, Canada, Europe, New Zealand, and South America.

Many of our customers have been successful in implementing our various technology initiatives without further provision of technical service. However, we believe that building up a strong relationship with our customers, as well as future growth in our product and license sales, depends on our ability to provide customers with adequate support, training and consulting when necessary. We therefore remain committed to continuously improving the various services we offer to our customers, which include providing contract support services upon the purchase or use of our products and performing non-recurring engineering service projects for software development. To implement this commitment, we have established an in-house professional services organization. Created in July 2000 with the acquisition of Dry Creek Software (Dry Creek) and renamed The Windward Group (Windward) following the October 2000 acquisition of the company of the same name, our professional services organization provides business application experience, technical expertise and product knowledge to complement our various mobile technologies and to provide solutions to customers' business requirements. Windward specializes in creating consumer and enterprise solutions that combine handheld, mobile, wireless, desktop, Internet, synchronization, back-office applications and database technologies. The group works across multiple phases of development projects: business analysis and strategic technology consulting, project management, design, engineering, quality assurance, software testing, localization and technical writing.

Currently we continue to face the impact of the recent unfavorable general economic conditions, which have resulted in a general decrease in consumer spending and delayed or postponed corporate IT spending. Consequently, we experienced declines in revenue in the last three fiscal quarters. However, despite the market fluctuations, our financial position has remained strong and we continue to have no long-term debt. In response to the economic slowdown, we implemented initiatives in the last fiscal year to reduce costs and control spending, and we remain committed to driving our top-line business growth and improving our financial results.

12

Results of Operations

The following table sets forth certain consolidated statement of operations data as a percentage of revenue for the periods indicated:

Three Months Ended October 31,	
2001	2000
-----	-----

Edgar Filing: PUMATECH INC - Form 10-Q

Revenue		
License	82.6%	88.6%
Services	17.4	11.4
	-----	-----
Total revenue	100.0	100.0
	-----	-----
 Cost and operating expenses:		
Cost of revenue	33.2	15.7
Research and development	60.2	61.4
Sales and marketing	70.2	54.5
General and administrative	18.4	14.3
Amortization of intangibles	21.6	13.9
	-----	-----
Total cost and operating expenses	203.6	159.8
	-----	-----
Operating loss	(103.6)	(59.8)
Other income and expense, net	6.5	11.0
	-----	-----
Loss before income taxes	(97.1)	(48.8)
Provision for income taxes	(1.6)	(1.4)
	-----	-----
Net loss	(98.7)%	(50.2)%
	=====	=====

Revenue. We derive revenue from two primary sources: software licenses and fees for service. Revenue for the three months ended October 31, 2001 decreased by 32% to \$6,772,000 as compared to \$9,923,000 for the same period in 2000, mainly due to the general economic slowdown and its impact on our customers, many of which have reduced their IT spending or ceased their investment in products, services and technologies such as those we provide. The decline in our revenue also resulted from general slowdown in sales of Palm-based and other handheld devices.

- . License Revenue. License revenue is earned from the sale and use of software products, including our technology licensing components, and royalty agreements with OEMs. License revenue was \$5,593,000 in the three months ended October 31, 2001 as compared to \$8,790,000 for the same period in 2000. The 36% decrease in license revenues reflected a decrease in revenues of our Enterprise products, which include both personal and server based Intellisync, Enterprise Intellisync and Satellite Forms products, from our technology licensing components, and from our legacy PC or notebook business - Intellisync for Notebook royalty revenue.
- . Service Revenue. Service revenue is derived from fees for services, including time and materials for professional services, non-recurring engineering service projects for software development, amortization of maintenance contract programs, hosting and advertising fees. The overall decline in our revenue was slightly offset by revenue from a few major one-time professional service contracts executed during the first quarter of fiscal 2002. As a result, service revenue remained relatively flat at \$1,179,000 in the three months ended October 31, 2001 as compared to \$1,133,000 for the same period in 2000.

Edgar Filing: PUMATECH INC - Form 10-Q

a significant portion of our revenue. OEM revenue of \$2,438,000 and \$2,795,000 represented 36% and 28% of our revenue, in the three months ended October 31, 2001 and 2000, respectively. OEM revenue decreased in absolute terms primarily due to a decline in revenue from Intellisync for Notebook royalties. The increase in OEM revenue as a percentage of total revenue was primarily due to a greater decline in revenue from other Enterprise products. We believe that the percentage of revenue derived from OEMs may fluctuate in future periods since the revenue associated with the distribution channels we use both domestically and internationally for our existing and future products is subject to change. Further, we expect the notebook and PC OEM portion of this revenue to continue to decrease or remain relatively constant in absolute terms and as a percentage of our overall revenue throughout fiscal 2002.

International revenue continues to represent a significant portion of our revenue. International revenue in the three months ended October 31, 2001 was \$2,298,000, or 34% of total revenue, compared to \$2,345,000 or 24% of total revenue for the same period in 2000. In fiscal 2001, we expanded our international direct sales force, particularly in Europe, however, as a result of an overall global slowdown in technology spending, our international revenue remained relatively constant in absolute terms. The increase as a percentage of total revenue was due to a decline in our overall revenue. International revenue may be subject to certain risks not normally encountered in domestic operations, including exposure to tariffs, various trade regulations and fluctuations in currency exchange rates. Also, refer to other relevant risks and uncertainties associated with international revenue set forth below under the caption "Factors That May Affect Future Operating Results."

No customer accounted for more than 10% of total revenue in either of the three-month periods ended October 31, 2001 and 2000.

Deferred revenue was \$2,817,000 and \$3,260,000 at October 31, 2001 and July 31, 2001, respectively. The 14% decrease in deferred revenue was attributable to a number of factors, including an increase in royalty based technology licensing deal structures that do not generate as much deferred revenue as contracts negotiated to include larger up front payments. Further, there has been some decline in the number of technology licensing customers, many of whom were forced to close their operations or were unable to meet their contractual obligations as a result of the economic downturn. The decrease in deferred revenue was also due to continued amortization of existing deferred revenue exceeding deferred revenue generated from new transactions during the first quarter of fiscal 2002.

Cost of Revenue. Cost of revenue consists of license costs and service costs. License costs include product packaging costs including product media and duplication, manuals, packing supplies, shipping expenses and post-sales customer support costs. Fluctuations in license costs are generally the result of varying changes in product mix and the timing of large license sales. Service costs include personnel related costs, including non-cash stock compensation, associated with work performed under professional service contracts, non-recurring engineering agreements and hosting costs for online services associated with the hosting of technology licensing components to both partners and end users. Hosting costs include expenses related to bandwidth for hosting, tape backup, security and storage, third-party fees and internal personnel costs associated with logistics and operational support of the hosting services and depreciation of computer equipment associated with the hosting service. Service costs can be expected to vary significantly from period to period depending on the mix of services we provide.

In general, license costs are a far smaller percentage of license revenue than service costs, which have a much higher cost structure as a percentage of service revenue. Additionally, license costs tend to be variable based on license revenue volumes where service costs tend to be fixed within certain

Edgar Filing: PUMATECH INC - Form 10-Q

service revenue volume ranges. We would expect that an increase in service revenue as a percentage of our total revenue would generate lower overall gross margins as a percentage of total revenue. Also, given the high level of fixed costs associated with the professional services and online services groups, our inability to generate revenue sufficient to absorb these fixed costs could lead to negative gross service margins.

Cost of revenue in the three months ended October 31, 2001 was \$2,250,000, or 33% of revenue, compared to \$1,559,000, or 16% of revenue, for the same period in 2000. The increase in cost of revenue in absolute dollars and as a percentage of revenue was primarily due to an increase in service costs due to higher

14

level of fixed costs associated with our professional services organization and increased hosting costs associated with our online service offerings.

Research and Development. Research and development expenses consist primarily of salaries and other related expenses, including non-cash stock compensation, for research and development personnel, quality assurance personnel, product localization, fees to outside contractors and the cost of facilities and depreciation of capital equipment. We invest in research and development both for new products and to provide continuing enhancements to existing products. Research and development expenses decreased by 33% to \$4,075,000 in the three months ended October 31, 2001 from \$6,088,000 for the same period in 2000. Research and development represented approximately 60% and 61% of total revenue in the three months ended October 31, 2001 and 2000, respectively. The decrease in absolute research and development spending was primarily due to the elimination of efforts related to the Intellisync.com online service and re-emphasis on core product development. Personnel-related and contractor-related costs decreased as a result of workforce reductions we implemented in the third and fourth quarters of fiscal 2001.

Sales and Marketing. Sales and marketing expenses consist primarily of salaries, commissions, promotional expenses and other related expenses, including non-cash stock compensation, of sales and marketing employees, as well as technical support personnel associated with pre-sales activities such as building brand awareness, performing product and technical presentations and answering customers' product and service inquiries. Sales and marketing expenses decreased by 12% to \$4,752,000 in the three months ended October 31, 2001 from \$5,410,000 for the same period in 2000. Sales and marketing expenses represented approximately 70% and 55% of total revenues in the three months ended October 31, 2001 and 2000, respectively. Sales and marketing expenses decreased in absolute terms primarily due to reduced bonus and commissions as a result of lower revenue, and reduced corporate marketing resources and corporate branding as a result of lower planned spending. Sales and marketing expenses, however, increased as a percentage of total revenue due to overall revenue decline for the quarter.

General and Administrative. General and administrative expenses consist primarily of salaries and other related expenses, including non-cash stock compensation, of administrative, executive and financial personnel and other outside professional fees. General and administrative expenses decreased by 12% to \$1,248,000 in the three months ended October 31, 2001 from \$1,418,000 for the same period in 2000. General and administrative expenses represented approximately 18% and 14% of total revenues in the three months ended October 31, 2001 and 2000, respectively. The decrease in absolute general and administrative spending was primarily due to reduced bonus rates and other personnel-related costs as a result of lower revenue, as well as to reduced

Edgar Filing: PUMATECH INC - Form 10-Q

provision for bad debts allowance. General and administrative expenses, however, increased as a percentage of total revenue due to overall revenue decline for the quarter.

Amortization of Intangibles. Amortization of acquired intangibles increased to \$1,460,000 in the three months ended October 31, 2001 from \$1,382,000 for the same period in 2000. The slight increase in amortization of intangibles resulted from our acquisition of Windward in the first quarter of fiscal 2001, offset by the effect of the impairment charge recorded in the fourth quarter of fiscal 2001 which significantly reduced the carrying value of our existing goodwill and other intangibles. We will continue to amortize our goodwill, which we anticipate will be approximately \$2,700,000 for fiscal 2002, until our adoption in fiscal 2003 of Statement of Financial Accounting Standards (SFAS) No. 142 which requires the discontinuance of goodwill amortization and will amortize approximately \$2,400,000 and \$800,000 for other intangibles in fiscal 2002 and 2003, respectively, based on acquisitions completed as of October 31, 2001. Refer to the caption "Recently Issued Accounting Pronouncements" set forth below for more information on the new accounting for goodwill.

Non-Cash Stock Compensation. Non-cash stock compensation, included in each appropriate operating expense category of our condensed consolidated statements of operations, relates to stock options that were deemed to have been granted at a price below market value, as well as certain options that are subject to variable plan accounting. These charges are amortized over the vesting period of the options. The aggregate non-cash stock compensation expense, net of the effect of terminations, was \$364,000 and \$221,000 in the three months ended October 31, 2001 and 2000, respectively. The non-cash compensation expense in the three

15

months ended October 31, 2001 relates to options granted in July 2001, as described below, that are subject to variable plan accounting and options granted by NetMind Technologies, Inc. (NetMind) prior to our acquisition of NetMind. The non-cash compensation expense in the three months ended October 31, 2000 relates to options granted by NetMind prior to our acquisition of NetMind.

In January 2001, we offered our employees, officers and directors the opportunity to cancel stock options granted to them between December 1999 and October 2000 in exchange for an equal number of new options to be granted on July 30, 2001, six months and a day after the date of cancellation of the original options. Holders of approximately 2,676,000 shares received the new options. The re-grants for executive officers and directors were priced at the closing market price on the date of the new grant or \$2.10. The executive re-grants are accounted for as fixed awards, for which no stock compensation cost was recorded, with the exception of certain options belonging to an employee who elected to cancel other higher-priced options in October 2001 (see below for more details). The re-grants for other employees were priced at 85% of the underlying market price or \$1.78. As they were priced below the then current market price, the new options granted to our employees are accounted for using variable accounting under the guidance in Financial Accounting Standards Board (FASB) Interpretation (FIN) No. 44, "Accounting for Certain Transactions Involving Stock Compensation," an interpretation of Accounting Principles Board (APB) Opinion No. 25. According to FIN No. 44, the variable accounting cost is based on any excess of the common stock closing price at the end of the reporting period or date of exercise, forfeiture, cancellation without replacements, if earlier, over the exercise price (i.e. intrinsic value). This cost is amortized on an accelerated basis over the remaining vesting period consistent with the method described in FIN No. 28. We remeasure and record the intrinsic value of the repriced employee options every quarter until they are

Edgar Filing: PUMATECH INC - Form 10-Q

exercised, forfeited, cancelled, or expire.

In addition, our Board of Directors recently approved a new proposal to offer our employees, officers and directors the opportunity to cancel stock options granted to them between September 1999 and June 2001 in exchange for an equal number of new options to be granted six months and two days following the close of the related tender offer on October 22, 2001 and priced at the closing market price on the grant date. Holders of options exercisable for approximately 1,315,000 shares with exercise prices of \$3.01 or greater and a weighted average price of \$10.01 were given the opportunity to cancel their options. Holders of options exercisable for approximately 967,000 shares, net of the effect of recent terminations, elected to cancel their options.

As a result of the October 2001 offer to cancel options in exchange for new options and in accordance with FIN No. 44, options to purchase 41,500 shares that were granted in July 2001 became subject to variable plan accounting. FIN No. 44 holds that if a lower-priced option is granted within a six-month period before or after a higher priced option held by the same person is cancelled, the combined transactions are considered a repricing and result in variable-plan accounting. Accordingly, we recorded additional deferred stock compensation costs of approximately \$23,000 and incurred an additional amortization expense of approximately \$6,000 relating to such options in the first quarter of fiscal 2002.

As of October 31, 2001, we have remeasured the intrinsic value of the repriced options and recorded additional deferred stock compensation costs relating to the above regrants and cancellations of approximately \$652,000 to deferred stock compensation of which a total of approximately \$268,000 was recorded to expense in the first quarter of fiscal 2002.

Other Income and Expense, Net. Other income and expense, net, represents interest earned on cash and short-term investments and realized gains on miscellaneous investments, offset by interest expense on notes payable and miscellaneous bank fees and charges. Other income and expense, net, was \$441,000 and \$1,088,000 in the three months ended October 31, 2001 and 2000, respectively. The decrease in other income and expense, net, was primarily due to a decrease in rate of interest on reduced balances of cash and investments. We expect this trend to continue in the next few quarters as higher yielding longer-term investments mature and are reinvested at reduced interest rates.

16

Provision for Income Taxes. The provision for income taxes primarily represents foreign withholding taxes on royalties earned from certain foreign customers and, to a lesser extent, estimated taxes for foreign subsidiaries. Provision for income taxes was \$111,000 and \$136,000 in the three months ended October 31, 2001 and 2000, respectively.

Recently Issued Accounting Pronouncements

Accounting for Consideration Given to a Customer or a Reseller of the Vendor's Products

In June 2001, the Emerging Issues Task Force (EITF) of the Financial Accounting Standards Board (FASB) issued EITF Issue No. 00-25, "Vendor Income Statement Characterization of Consideration Paid to a Reseller of the Vendor's Products." In addition in November 2001, the EITF reached a consensus on Issue No. 01-09, "Accounting for Consideration Given by a Vendor to a Customer or a Reseller of the Vendor's Products," which codified all the issues in EITF No.

Edgar Filing: PUMATECH INC - Form 10-Q

00-25, among others. EITF No. 01-09 addresses whether consideration from a vendor to a reseller of the vendor's products is an adjustment to the selling prices of the vendor's products and, therefore, should be deducted from revenue when recognized in the vendor's results of operations, or, a cost incurred by the vendor for assets or services received from the reseller and, therefore, should be included as a cost of expense when recognized in the vendor's results of operations. EITF No. 01-09 is effective for our fiscal quarters beginning on February 1, 2002. Upon adoption of EITF No. 01-09, financial statements for prior periods presented for comparative purposes will be reclassified to comply with EITF No. 01-09. We currently estimate that sales and marketing expenses in the condensed consolidated statements of operations set forth in Item 1 above include approximately \$96,000 and \$105,000 for the three months ended October 31, 2001 and 2000, respectively, of consideration paid to our resellers (i.e. considered as an adjustment to the selling prices of our products). Such consideration will be classified as a reduction of revenue when provisions of EITF 01-09 are applied. Adoption of EITF No. 01-09 is not expected to have a material impact on our revenues and gross margins or any effect on our operating margins, net loss and net loss per share.

Accounting for Business Combinations, Goodwill and Other Intangible Assets

In July 2001, the FASB issued SFAS No. 141, "Business Combinations," and SFAS No. 142, "Goodwill and Other Intangible Assets." SFAS No. 141 provides new guidance on the accounting for a business combination at the date a business combination is completed. Specifically, it requires use of the purchase method of accounting for all business combinations initiated after June 30, 2001, thereby eliminating use of the pooling-of-interests method. SFAS No. 142 establishes new guidance on how to account for goodwill and intangible assets after a business combination is completed. Among other things, it requires that goodwill and certain other intangible assets will no longer be amortized and will be tested for impairment at least annually and written down only when impaired. We will continue to amortize our goodwill, which we anticipate will be approximately \$2,700,000 for fiscal 2002, until we adopt the goodwill non-amortization provisions, among others, of this statement at the beginning of fiscal 2003. We are currently assessing the impact of adopting SFAS No. 141 and SFAS No. 142 on our future financial position and results of operations.

Accounting for the Impairment or Disposal of Long-Lived Assets

In August 2001, the FASB issued SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS No. 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets to be held and used, to be disposed of other than by sale and to be disposed of by sale. Although the Statement retains certain of the requirements of SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of", it supersedes SFAS No. 121 and APB Opinion No. 30, "Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions for the disposal of a segment of a business." SFAS No. 144 also amends Accounting Research Bulletin No. 51, "Consolidated Financial Statements," to eliminate the exception to consolidation for a subsidiary for which control is likely to be temporary. The Statement is effective for our financial statements issued for fiscal quarters beginning on August 1, 2002. We

are currently assessing the impact of adopting SFAS No. 144 but do not expect the adoption to have a material impact on our financial position and results of operations.

Edgar Filing: PUMATECH INC - Form 10-Q

Liquidity and Capital Resources

We ended the first quarter of fiscal 2002 with \$46.5 million in cash, cash equivalents and short-term investments. Cash and cash equivalents decreased by \$3.9 million during the first quarter of fiscal 2002 to \$14.9 million at October 31, 2001. Short-term investments increased by \$1.5 million to \$31.6 million during the same period.

Net cash used in operations was \$4.5 million during the three months ended October 31, 2001, compared with \$3.2 during the same period in fiscal 2001. Operating cash flow in the first quarter of fiscal 2002 was comprised of \$3.9 million of net loss as adjusted for non-cash items and \$0.6 million of net change in working capital items, compared with \$2.7 million of net loss adjusted for non-cash items and \$0.5 million of net change in working capital items in the first quarter of fiscal 2001.

Net cash used in investing activities of \$1.6 million during the first fiscal quarter of fiscal 2002, resulted from \$1.4 million of net purchases of short-term investments and \$0.2 million for capital expenditures. Net cash used in investing activities of \$21.3 million during the first quarter of fiscal 2001 was primarily for \$12.2 million of cash paid for the asset purchase of Windward, \$6.3 million for net purchase of short term investments, \$1.8 million for capital expenditures and \$1.0 million for other long-term investments.

Net cash provided by financing activities of \$2.1 million during the first quarter of fiscal 2002 resulted primarily from \$2.0 million drawn from a line of credit and \$0.4 million of proceeds from issuance of common stock, partially offset by a \$0.3 million of principal repayments of notes payable. Net cash provided by financing activities of \$0.5 million during the first quarter of fiscal 2001 primarily resulted from issuance of common stock.

We have restricted cash held by a financial institution as collateral on a letter of credit in connection with our lease of office space. The restricted cash amounted to \$686,000 at October 31, 2001.

In September 2001, we borrowed \$2 million under our loan and security agreement entered into on March 29, 2001, which remained outstanding at October 31, 2001. As of October 31, 2001, we were in compliance with the loan covenants.

The outstanding balance at July 31, 2001 on a \$750,000 equipment line of credit was paid off in September 2001 with a portion of the new borrowings described above. The \$750,000 equipment line and the \$1,000,000 revolving line of credit from the same bank were not renewed.

We believe that our current cash, cash equivalents and short-term investment balances, including the credit line and cash generated from operations, if any, will be sufficient to meet our working capital and other cash requirements for at least the next 12 months.

In the future, we may seek to raise cash through the issuance of debt or equity securities. There can be no assurance that such financing would be available to us at all or on terms favorable to us.

Factors That May Affect Future Operating Results

There are many factors that affect our business and the results of our operations, some of which are beyond our control. The following is a description

Edgar Filing: PUMATECH INC - Form 10-Q

of some of the important factors that may cause the actual results of our operations in future periods to differ materially from those currently expected or desired.

Recent terrorist activities and resulting military and other actions could adversely affect our business.

The recent terrorist attacks in the United States, which have brought devastation to many people and shaken consumer confidence, have disrupted commerce throughout the world. The continued threat of terrorism within the United States and other countries and heightened security measures, as well as the current military action, in response to such threat may cause significant disruption to the global economy, including widespread recession. To the extent that such disruptions result in a general decrease in consumer spending and demand for our products and services, our inability to effectively market our products, or financial or operational difficulties for various vendors on which we rely for certain integral services used to support our operations, our business and results of operations could be materially and adversely affected. We are unable to predict whether the threat of terrorism or the responses thereto will result in any long-term commercial disruptions or if such activities or responses will have any long-term material adverse effect on our business, results of operations or financial condition.

We are exposed to recent unfavorable economic conditions that have resulted in lower revenue, suspension of our online service offering and actions to reduce operating expenses, and continued or worsened conditions may result in additional actions to reduce operating expenses.

Our revenue has declined sequentially in the last few quarters largely as a result of recent unfavorable economic conditions which have delayed or postponed corporate IT spending. In addition, due to slow adoption of Web-based service offerings as well as the delay of wireless handheld device deployment in United States corporations, in fiscal 2001 we suspended indefinitely the release to the general public of our Intellisync.comSM online service offering. We also incurred adjustments and other charges associated with actions we recently implemented aimed at reducing operating expenses. While we expect the current economic conditions to continue well into the remainder of fiscal 2002, there can be no certainty as to the severity or duration of the economic slowdown. We also cannot predict the extent and timing, if any, of the impact of economic slowdown in the United States on economies in other countries and geographic regions in which we conduct business.

The recent unfavorable economic conditions may severely affect a number of our customers as well as vendors, which may subsequently harm our business and results of operations.

Economic slowdowns could cause many of our customers to reduce their IT spending or cease their investment in products, services and technologies such as those we provide. Any decrease in the demand for our products and services could adversely affect our operating results and financial condition. Our operating results and financial condition may also be adversely affected by difficulties we may encounter in collecting our accounts receivable and maintaining our profit margins during economic uncertainties.

Economic slowdowns may also affect the various vendors on whom we rely for certain integral services used to support our operations. Our operating results and financial condition may be adversely affected in the event that a vendor were to experience financial or operational difficulties that resulted in a reduction or interruption in services it provides us.

We derive a portion of our revenue from a number of thinly capitalized and early-stage customers such as dot-com companies.

Edgar Filing: PUMATECH INC - Form 10-Q

Historically, we have derived a portion of our revenues from small and early-stage companies including dot-coms. Recently, many of these dot-com and other small companies have been closing down their operations. As a result of such failures, many similarly situated customers and potential customers continue to experience difficulty in their capital-raising activities and may not be able to continue operations. The composition of our customer base exposes us to additional risks, including longer payment cycles and collection problems. We have implemented policies and procedures to identify and mitigate our exposure to such risks, but the failure of these thinly

19

capitalized companies to be successful in their operations could have a material adverse effect on our business, results of operations and financial condition.

Our business and prospects depend on demand for and market acceptance of the wireless devices and mobile computing devices.

The use of wireless devices and mobile computing devices for retrieving, sharing and transferring information among businesses, consumers, suppliers and partners has begun to develop only in recent years. Our success will depend in large part on continued growth in the use of wireless devices and mobile computing devices including personal digital assistants, handheld computers, smart phones, pagers and other mobile devices. The recent economic slowdown may adversely affect the growth of the wireless device and mobile computing device markets. In addition, critical issues concerning the commercial use of wireless devices and mobile computing devices, including security, reliability, cost, ease of access and use, quality of service, regulatory initiatives and necessary increases in bandwidth availability, remain unresolved and are likely to affect the development of the market for our services. The adoption of wireless devices and mobile computing devices for information retrieval and exchange, commerce and communications generally will require the acceptance of a new medium of conducting business and exchanging information. Demand for and market acceptance of wireless devices and mobile computing devices are subject to a high level of uncertainty and are dependent on a number of factors, including:

- . the growth in access to, and market acceptance of, new interactive technologies;
- . emergence of a viable and sustainable market for wireless and mobile computing services;
- . the development of technologies that facilitate interactive communication between organizations; and
- . increases in bandwidth for data transmission.

If the market for wireless devices and mobile computing devices as a commercial or business medium does not develop, or develops more slowly than expected, our business, results of operations and financial condition will be seriously harmed.

Specifically, even if the wireless and mobile computing services market does develop, services that we currently offer or may offer in the future may not achieve widespread market acceptance. Failure of our current and planned services to operate as expected could delay or prevent their adoption. If our target customers do not adopt, purchase and successfully deploy our other current and planned services, our revenue will not grow significantly and our business, results of operations and financial condition will be seriously

Edgar Filing: PUMATECH INC - Form 10-Q

harmed.

The size of the mobile computing market cannot be accurately predicted, and if our market does not grow as we expect, our revenue will be below our expectations and our business and financial results will suffer.

We are focusing on expanding into the mobile computing market, a new and an unproven market. The size of this market cannot be accurately estimated and therefore we are unable to accurately determine the potential demand for our products and services. If our customer base does not expand or if there is not widespread acceptance of our products and services, our business and prospects will be harmed. We believe that our potential to grow and increase the market acceptance of our products depends principally on the following factors, some of which are beyond our control:

- . the effectiveness of our marketing strategy and efforts;
- . our product and service differentiation and quality;
- . our ability to provide timely, effective customer support;
- . our distribution and pricing strategies as compared to our competitors;

20

- . growth in the sales of handheld devices supported by our software and growth in wireless network capabilities to match end user demand and requirements;
- . our industry reputation; and
- . general economic conditions such as slowdowns in the computer or software markets or the economy in general.

Our market changes rapidly due to changing technology and evolving industry standards. If we do not adapt to meet the sophisticated needs of our customers, our business and prospects will suffer.

The market for our services is characterized by rapidly changing technology, evolving industry standards and frequent new service introductions. Our future success will depend to a substantial degree on our ability to offer services that incorporate leading technology, address the increasingly sophisticated and varied needs of our current and prospective customers and respond to technological advances and emerging industry standards and practices on a timely and cost-effective basis. You should be aware that:

- . our technology or systems may become obsolete upon the introduction of alternative technologies;
- . we may not have sufficient resources to develop or acquire new technologies or to introduce new services capable of competing with future technologies or service offerings; and
- . the price of the services we provide is expected to decline as rapidly as the cost of any competitive alternatives.

We may not be able to effectively respond to the technological requirements

Edgar Filing: PUMATECH INC - Form 10-Q

of the changing market. To the extent we determine that new technologies and equipment are required to remain competitive, the development, acquisition and implementation of such technologies and equipment are likely to continue to require significant capital investment by us. Sufficient capital may not be available for this purpose in the future, and even if it is available, investments in new technologies may not result in commercially viable technological processes and there may not be commercial applications for such technologies. If we do not develop and introduce new products and services and achieve market acceptance in a timely manner, our business and prospects may suffer.

Increasing government regulation could cause demand for our products and services to grow more slowly or to decline.

We are subject not only to regulations applicable to businesses generally, but also to laws and regulations directly applicable to wireless and mobile computing devices. Demand for our products in certain countries, and our ability to meet this demand, is subject to export controls on hardware and on the encryption software incorporated into our products. In addition, state, federal and foreign governments may adopt laws and regulations governing any of the following issues:

- . taxation of electronic commerce;
- . the wireless distribution of specific material or content; and
- . the characteristics and quality of mobile products and services.

One or more states or the federal government could enact regulations aimed at companies like us, which provide software that facilitates e-commerce and wireless communications. The likelihood of the enactment of regulation in these areas will increase as the wireless and mobile devices become more pervasive and extend to more people's daily lives. Any legislation, regulation or taxation of or concerning electronic commerce could dampen the growth of wireless and mobile computing devices and decrease its acceptance as a communications

21

and commercial medium. If a reduction in growth occurs as a result of these events, demand for our services, technologies and other products could decline significantly.

We have experienced losses and may not achieved sustained profitability in the future.

We have experienced losses of \$6.7 million for the three months ended October 31, 2001, and \$41.8 million and \$26.1 million for fiscal 2001 and 2000, respectively. We may not be able to attain or sustain consistent future revenue growth on a quarterly or annual basis, or achieve and maintain consistent profitability on a quarterly or annual basis. An investor in our common stock should accordingly consider the risks, expenses and difficulties that young companies frequently encounter in the new and rapidly evolving market for wireless and mobile computing products and services. These risks to us include:

- . our evolving business model;
- . our need and ability to manage growth; and
- . rapid evolution of technology.

Edgar Filing: PUMATECH INC - Form 10-Q

To address these risks and uncertainties, we must take several steps, including:

- . creating and maintaining strategic relationships;
- . expanding sales and marketing activities;
- . integrating existing and acquired technologies;
- . expanding our customer base and retaining key clients;
- . introducing and expanding new services, including our professional services organization;
- . managing rapidly growing operations, including new facilities and information technology infrastructure;
- . competing in a highly competitive market; and
- . attracting, retaining and motivating key employees.

We may not be successful in implementing any of our strategies or in addressing these risks and uncertainties. Despite cost reduction measures we implemented in the third and fourth quarters of fiscal 2001, we expect that we will continue to incur reasonable costs, primarily as a result of our investment in various initiatives to enhance our existing products, develop and introduce, on a timely and cost-effective basis, new products and technologies that meet changing customer requirements, and develop our professional services organization. Moreover, even if we accomplish our objectives, we still may not achieve sustainable profitability in the future.

There can be no assurance that we will generate sufficient revenues to meet expenses or to operate profitably in the future. These losses present a significant risk to our stockholders. If we cannot achieve profitability or positive cash flows from operating activities, we may be unable to meet our working capital and other payment obligations, which would have a material adverse effect on our business, financial condition and results of operation and the price of our common stock.

Operating results may fluctuate significantly and may be difficult to predict.

Our operating results have fluctuated in the past, and with the integration of the ProxiNet, Inc. (ProxiNet), NetMind and Dry Creek acquisitions and the Windward and SwiftTouch Corporation (SwiftTouch) asset

22

purchases, our operating results are likely to continue to fluctuate significantly. A number of factors, many of which are outside of our control, are likely to cause fluctuations in operating results, including, but not limited to:

- . the demand for our products and services;
- . our success in developing new products and integrating acquired technologies;
- . the timing of new product introductions by us and our competitors;
- . market acceptance of our new and enhanced products and services;

Edgar Filing: PUMATECH INC - Form 10-Q

- . market acceptance of handheld devices generally, and those supported by our products and services;
- . the emergence of new industry standards;
- . the timing of customer orders;
- . the mix of products and services sold;
- . product life cycles;
- . competition;
- . the mix of distribution channels employed;
- . seasonal trends;
- . the timing and magnitude of our capital expenditures, including costs relating to the expansion of operations;
- . the evolving and unpredictable nature of the markets for our products and mobile computing devices generally;
- . the rate of growth of the market for personal computer, wireless devices and mobile computing devices in general; and
- . general economic conditions.

In addition, we typically operate with a relatively small order backlog. As a result, quarterly sales and operating results depend in part on the volume and timing of orders received and fulfilled within the quarter, which are difficult to forecast. A significant portion of our expense levels are fixed in advance, based in large part on our resource requirements to meet planned product and customer requirements. If revenue is below expectations in any given quarter, the adverse impact of the shortfall on operating results may be magnified by our inability to adjust spending to compensate for the shortfall. Therefore, a shortfall in actual revenue as compared to estimated revenue would have an immediate adverse effect on our business, operating results and financial condition that could be material.

Due to our ongoing efforts to expand into retail and reseller channels, we are focusing our efforts on licensing our server and personal applications, as well as out technology licensing components - Browse-it, Mind-it, Sync-it and the Intellisync SDK - to corporations, software developers and mobile computing device manufacturers. As a result, we expect that our notebook and PC OEM revenue will continue to decrease as a percentage of our overall revenue. This new sales strategy has the following risks:

23

- . sales into these channels are harder to predict and may have lower margins than sales in other channels;
- . we have a very limited history in penetration and support for these channels;
- . the average transaction size and sales cycle vary significantly, making forecasting difficult;

Edgar Filing: PUMATECH INC - Form 10-Q

- . smaller transactions may have relatively higher administrative costs;
- . any significant deferral of purchases of our products by customers could jeopardize our operating results in any particular quarter;
- . to the extent that significant sales occur earlier than expected, operating results for subsequent quarters may be adversely affected;
- . products that are accepted in the OEM market may not be readily accepted by corporations;
- . we may incur increased costs related to new infrastructure requirements; and
- . planned marketing strategy may require significant expenditures but may not have immediate or future beneficial effect on sales.

Our gross margin on service revenue, particularly non-recurring engineering service and professional service revenue, is substantially lower than gross margin on license revenue. We acquired Dry Creek in fiscal 2000 and, in connection with the acquisition of assets of Windward in fiscal 2001, we hired a number of employees of Windward to form the basis of our professional services group. Consequently, professional service revenue increased relatively in the first three quarters of fiscal 2001. Such increase in non-recurring engineering service and professional service revenue would have a corresponding increase in cost of revenue and would have an adverse effect on gross margins as a percent of total revenue. On the other hand, any decrease in utilization of employees in the professional services group brought about by a decrease in demand for implementation services may also result in gross margin on service revenue remaining low. Other factors that may affect gross margins include price changes or increased spending in response to competition or to pursue new market opportunities.

The operating results of many software companies reflect seasonal fluctuations. For example, sales in Europe and certain other countries typically are adversely affected in the summer months when business activity is reduced. Our revenue and operating results may be adversely affected by diminished demand for products on a seasonal basis.

Period-to-period comparisons of operating results are not a good indication of future performance. It is likely that operating results in some quarters will be below market expectations. In this event, the price of our common stock is likely to decline.

If we fail to maintain our existing relationships or enter into new key relationships with OEMs and business development organizations, our brand awareness and the use of our products and services would suffer.

The success of our product and service offerings depends, in large part, on our ability to develop and maintain relationships with OEMs and business development organizations that help distribute our products and promote our services. We depend on these relationships to:

- . distribute our products to purchasers of mobile devices;
- . increase usage of our technology licensing components;
- . build brand awareness through product marketing; and

- . cooperatively market our products and services.

Also, because we depend on equipment manufacturers and business development organizations to help distribute our products and promote our services, the growth of our operations is dependent in part upon their success. If the products that these companies sell, or the operating systems upon which these products are based, were to lose popularity, or if any of these equipment manufacturers or business development organizations cease to utilize our product and service offerings in significant volumes, our business would suffer.

If we are unable to provide satisfactory and quality services through our professional services organization, customer satisfaction and demand for our products will suffer.

Many of our customers have been successful in implementing our various technology initiatives without further provision of technical service. However, we believe that building up a strong relationship with our customers, as well as future growth in our product sales, depends on our ability to provide our customers with professional services, including customer support, training, consulting and initial implementation and deployment of our products when necessary. We have developed an in-house professional services organization with employees who can perform these tasks and who also educate third-party systems integrators in the use of our products so that they can provide these services to our customers. If we are unable to develop sufficient relationships with third-party systems integrators and other customers, unable to complete product implementations in a timely manner, and unable to provide customers with satisfactory and quality support, consulting, maintenance and other services, we could face customer dissatisfaction, damage to our reputation, decreased overall demand for our products and loss of revenue.

Our common stock will likely be subject to substantial price and volume fluctuations due to a number of factors, some of which are beyond our control.

The trading price of our common stock has been and is likely to continue to be highly volatile. Our stock price is subject to wide fluctuations in response to a variety of factors including:

- . quarterly variations in operating results;
- . announcements of technological innovations;
- . announcements of new software or services by us or our competitors;
- . changes in financial estimates by securities analysts; or
- . other events beyond our control, including general market conditions.

The stock market has experienced significant price and volume fluctuations that have particularly affected the trading prices of equity securities of many high technology companies. These fluctuations have often been unrelated or disproportionate to the operating performance of these companies. Furthermore, our operating results and prospects from time to time may be below the expectations of public market analysts and investors. Any negative change in the public's perception of companies in the wireless communications market could depress our stock price regardless of our operating results.

Recently, when the market price of a stock has been volatile, holders of

Edgar Filing: PUMATECH INC - Form 10-Q

that stock have often instituted securities class action litigation against the company that issued the stock when such stock declines. If any of our stockholders brought such a lawsuit against us, we could incur substantial costs defending the lawsuit. The lawsuit could also divert the time and attention of our management.

25

There are many companies providing competing products and services.

There are few substantial barriers to entry and we expect that we will face additional competition from existing competitors and new market entrants in the future.

We currently face direct competition with respect to our Intellisync, Intellisync Anywhere and Enterprise Intellisync, Satellite Forms, Sync-it, Browse-it and Mind-it products. Intellisync retail and Enterprise products face competition from AvantGo Inc.'s Pylon Conduit, Chapura, Inc.'s Pocket Mirror, Duke Communications' (Group Computing) EasySync Pro, Extended Systems, Inc., IBM Corporation's Lotus Software, Laplink, Inc.'s PDASync, and Palm Desktop from Palm, Inc. Satellite Forms faces competition from Aether Systems' ScoutBuilder, AppForge, Inc., iConverse, Inc., Metrowerks Code Warrior, mPortal, Inc., Pencil Corporation, Pendragon Software Corporation, and Salsa Software. Our server-based software and Sync-it product's synchronization features face competition from Aether, AvantGo, Chapura, Extended Systems, FusionOne, Inc., Infowave Software, Motorola, Inc., Synchrologic, Inc. and Wireless Knowledge, Inc. Browse-it's transformation and mobile content distribution features face competition from AlterEgo Networks, AU-Systems, AvantGo, Everypath, Inc., 4thpass LLC, Handspring's Bluelark Systems, Neomar, Inc., Qualcomm, Inc., ThinkersGroup, Inc. and Wireless Knowledge. In the area of alerts, change detection and analytics, Mind-it faces competition from Adeptra, Inc., Alerts.com, Inc., BroadVision, Inc., Categorical Software Corporation, Connotate Technologies, Inc., MicroStrategy, Inc., and 724 Solutions Inc. In addition to direct competition noted, we face indirect competition from existing and potential customers that may provide internally developed solutions to each of our technology licensing components.

Many of our competitors have substantially greater financial, technical and marketing resources, larger customer bases, longer operating histories, greater name recognition and more established relationships in the industry than we do. Our larger competitors may be able to provide customers with additional benefits in connection with their Internet systems and network solutions, including reduced communications costs. As a result, these companies may be able to price their products and services more competitively than we can and respond more quickly to new or emerging technologies and changes in customer requirements. If we are unable to compete successfully against our current or future competitors, we may lose market share, and our business and prospects would suffer.

Increased competition could result in:

- . price and revenue reductions and lower profit margins;
- . loss of customers or failure to obtain additional customers; and
- . loss of market share.

Any one of these could materially and adversely affect our business, financial condition and results of operations.

We are dependent on our international operations for a significant portion of

Edgar Filing: PUMATECH INC - Form 10-Q

our revenues.

International revenue, primarily from customers based in Japan, accounted for 34% and 24% of our revenue in the first quarter of fiscal 2002 and 2001, respectively. In the future, we may further expand our international presence. As we continue to expand internationally, we are increasingly subject to risks of doing business internationally, including:

- . unexpected changes in regulatory requirements and tariffs;
- . export controls relating to encryption technology and other export restrictions;
- . political and economic instability;

26

- . difficulties in staffing and managing foreign operations;
- . reduced protection for intellectual property rights in some countries;
- . longer payment cycles;
- . problems in collecting accounts receivable;
- . potentially adverse tax consequences;
- . seasonal reductions in business activity during the summer months in Europe and certain other parts of the world;
- . fluctuations in currency exchange rates that may make our products more expensive to international customers;
- . gains and losses on the conversion to United States dollars of accounts receivable and accounts payable arising from international operations due to foreign currency denominated sales;
- . nonrefundable withholding taxes on royalty income from customers in certain countries, such as Japan and Taiwan; and
- . an adverse effect on our provision for income taxes based on the amount and mix of income from foreign customers; and
- . exposure to risk of non-payment by customers in foreign countries with highly inflationary economies.

Any of these risks could harm our international operations. For example, some European countries already have laws and regulations related to content distributed on the technologies used on the Internet that are stricter than those currently in force in the United States. The European Parliament has recently adopted a directive relating to the reform of copyright in the European Community that will, if made into law, restrict caching and mirroring. Any or all of these factors could cause our business and prospects to suffer.

Our international sales growth will be limited if we are unable to establish additional foreign operations, expand international sales channel management and support, hire additional personnel, customize products for local markets and develop relationships with international service providers,

Edgar Filing: PUMATECH INC - Form 10-Q

distributors and device manufacturers. Even if we are able to successfully expand international operations, we cannot be certain that we will succeed in maintaining or expanding international market demand for our products.

Foreign exchange fluctuations could decrease our revenues or cause us to lose money, especially since we do not hedge against currency fluctuations.

To date, the majority of our customers have paid for our services in United States dollars. For the first quarter of fiscal year 2002 and fiscal year 2001, costs denominated in foreign currencies were nominal and we had minimal foreign currency losses during those periods. However, we believe that in the future an increasing portion of our costs will be denominated in foreign currencies as we ramp up our offices in Europe and open offices in other countries. Fluctuations in the value of the Yen, Euro or other foreign currencies may cause our business and prospects to suffer. We will also be exposed to increased risk of non-payment by our customers in foreign countries, especially those with highly inflationary economies. We currently do not engage in foreign exchange hedging activities and, although we have not yet experienced any material losses due to foreign currency fluctuation, our international revenues are currently subject to the risks of foreign currency fluctuations and such risks will increase as our international revenues increase.

27

We may incur significant stock-based compensation charges related to our stock option cancellation/regrant programs in future periods.

Under the guidance in FIN No. 44, "Accounting for Certain Transactions Involving Stock Compensation," an interpretation of APB Opinion No. 25, we have incurred and will continue to incur variable accounting costs related to certain stock options under our cancellation/regrant programs. These costs have been and will be based on the amount by which the common stock closing price at the end of the reporting period or date of exercise, forfeiture, cancellation without replacements, if earlier, exceeds the exercise price. The costs are amortized on an accelerated basis over the remaining vesting period consistent with the method described by FIN No. 28. Depending upon movements in the market value of our common stock, the variable accounting treatment of certain stock options we granted may result in significant additional non-cash compensation costs in future periods. Refer to the caption "Non-Cash Stock Compensation" set forth under Business Overview and Note 8 of the Notes to Unaudited Condensed Consolidated Financial Statements above for more information on our recent cancellations/regrant programs.

Our investment in goodwill and intangibles resulting from our acquisitions could become impaired.

As of October 31, 2001, our goodwill and other intangibles, which are currently being amortized over a period of 18 months to five years, amounted to \$11.4 million, net of accumulated amortization. We will continue to amortize our goodwill, \$2.7 million for fiscal 2002, until our adoption in fiscal 2003 of SFAS No. 142, which requires the discontinuance of goodwill amortization. We will amortize approximately \$2.4 million and \$0.8 million for other intangibles in fiscal 2002 and 2003, respectively. However, to the extent we do not generate sufficient cash flows to recover the net amount of any investment in goodwill and intangibles recorded, the investment could be considered impaired and could be subject to earlier write-off. In such events, our results of operations in any given period could be negatively impacted.

There are risks associated with our long-term investments that may adversely affect our results of operations.

Edgar Filing: PUMATECH INC - Form 10-Q

Historically, we have made direct or indirect investments in privately held companies. Currently, we have a commitment with a venture capital firm that invests in companies that we believe have the potential to grow, and we may continue to make strategic investments in the future. There can be no assurance that these investments will bring us a return on investment. In addition, because the strategic investments tend to be in small, start-up technology companies, which are at risk for financial failure especially during an economic slowdown, there is a greater risk that the investments might be impaired. Any impairment of such investments in the future could have a material adverse effect on our results of operations and financial condition.

Acquisitions we have made and may make in the future could disrupt our business or not be successful and harm our financial condition.

We have in the past acquired or made investments in, and intend in the future to acquire or make investments in other complementary companies, products and technologies. We have acquired certain assets of Windward and SwiftTouch and acquired Dry Creek, NetMind, ProxiNet, SoftMagic Corporation, RealWorld Solutions, Inc. and IntelliLink Corporation. In the event of any future acquisitions or investments, we could:

- . issue stock that would dilute the ownership of our then existing stockholders;
- . incur debt;
- . assume liabilities;
- . face the Securities and Exchange Commission (SEC) challenges to the accounting treatment of these acquisitions which may result in changes to our financial statements and cause us to incur charges to earnings over time that we did not expect;

28

- . incur amortization expenses related to intangible assets (other than goodwill); or
- . incur large and immediate write-offs.

These acquisitions and investments also involve numerous risks, including:

- . problems integrating the operations, technologies or products purchased with those we already have;
- . unanticipated costs and liabilities;
- . diversion of management's attention from our core business;
- . adverse effects on existing business relationships with suppliers and customers;
- . risks associated with entering markets in which we have no or limited prior experience; and
- . potential loss of key employees, particularly those of the acquired organizations.

We have anti-takeover defenses that could delay or prevent a takeover that

Edgar Filing: PUMATECH INC - Form 10-Q

stockholders may consider favorable.

Certain provisions of our certificate of incorporation and bylaws and provisions of Delaware law could have the effect of delaying, deferring or preventing an acquisition of Pumatech. These provisions include a classified board of directors and limitations on actions by our stockholders by written consent. In addition, our board of directors has the right to issue up to 2,000,000 shares of "blank check" preferred stock without stockholder approval, which could be used to dilute the stock ownership of a potential hostile acquirer. The preferred stock we issue could have mandatory redemption features, liquidation preference and other rights that are senior to the rights of common stockholders. Delaware law also imposes some restrictions on mergers and other business combinations between us and any holder of 15% or more of our outstanding common stock. Although we believe these provisions provide for an opportunity to receive a higher bid by requiring potential acquirers to negotiate with our board of directors, these provisions apply even if the offer may be considered beneficial by some stockholders.

In addition, our stockholders may not take actions by written consent and our stockholders are limited in their ability to make proposals at stockholder meetings.

We may require additional capital, which we may not be able to obtain.

The expansion and development of our business may require additional capital in the future to fund our operating losses, working capital needs and capital expenditures. Historically we have relied on the capital markets, including a private placement in March 2000 to raise money for our working capital and capital expenditure needs. The capital markets are very volatile and we may not be able to obtain future equity or debt financing in the future on satisfactory terms or at all. Our failure to generate sufficient cash flows from sales of products and services or to raise sufficient funds may require us to delay or abandon some or all of our development and expansion plans or otherwise forego market opportunities. Our inability to obtain additional capital on satisfactory terms may delay or prevent the expansion of our business, which could cause our business, operating results and financial condition to suffer.

Our working capital is primarily comprised of cash, short-term investments, accounts receivable, inventory, other current assets, accounts payable, accrued expenses, deferred revenue and current portion of notes payable. The timing and amount of our future capital requirements may vary significantly depending on numerous factors, including our financial performance, and technological and competitive developments in our industry. These factors may cause our actual revenue and costs to vary from expected amounts, possibly to a material degree, and such variations are likely to affect our future capital requirements.

29

Our failure to adequately protect our proprietary rights may harm our competitive position.

We rely on a combination of patents, copyrights, trademark, service mark and trade secret laws and contractual restrictions to establish and protect proprietary rights in our products and services. However, we will not be able to protect our intellectual property if we are unable to enforce our rights or we do not detect unauthorized use of our intellectual property.

Although we currently have 17 issued United States patents and have an additional 17 patent applications pending, we cannot be certain that such patents and patent applications will provide an adequate level of intellectual

Edgar Filing: PUMATECH INC - Form 10-Q

property protection. In addition, we have corresponding international patent applications pending under the Patent Cooperation Treaty in countries to be designated at a later date. We cannot be certain that any pending or future patent applications will be granted, that any pending or future patents will not be challenged, invalidated or circumvented, or that rights granted under any patent that may be issued will provide competitive advantages to us.

We have also provided our source code under escrow agreements and to foreign translators, which may increase the likelihood of misappropriation by third parties.

We have applied for trademarks and service marks on certain terms and symbols that we believe are important for our business. However, the steps we have taken to protect our technology or intellectual property may be inadequate. Our competitors may independently develop technologies that are substantially equivalent or superior to ours. Moreover, in other regions where we do business, such as in Africa, Asia-Pacific and Europe, there may not be effective legal protection of patents and other proprietary rights that we believe are important to our business.

As a matter of company policy, we enter into confidentiality and assignment agreements with our employees, consultants and vendors. We also control access to and distribution of our software, documents and other proprietary information. Notwithstanding these precautions, it may be possible for an unauthorized third party to copy or otherwise obtain and use our software or other proprietary information or to develop similar software independently. Policing unauthorized use of our products is difficult, particularly because the global nature of the Internet makes it difficult to control the ultimate destination or security of software and other transmitted data. The laws of other countries may afford us little or no effective protection of our intellectual property. The steps we have taken to prevent misappropriation of our technology, including entering into agreements for that purpose may be insufficient. In addition, litigation may be necessary in the future to enforce our intellectual property rights, to protect our trade secrets, to determine the validity and scope of the proprietary rights of others or to defend against claims of infringement or invalidity. Such litigation, whether successful or unsuccessful, could result in substantial costs and diversions of our management resources, either of which could harm our business.

We may be unable to license necessary technology and it may be subject to infringement claims by third parties.

Our commercial success will also depend in part on not infringing the proprietary rights of others and not breaching technology licenses that cover technology used in our products. It is uncertain whether any third party patents will require us to develop alternative technology or to alter our products or processes, obtain licenses or cease activities that infringe on third party's intellectual property rights. If any such licenses are required, we may not be able to obtain such licenses on commercially favorable terms, if at all. Our failure to obtain a license to any technology that we may require to commercialize our products and services could cause our business and prospects to suffer. Litigation may also be necessary to enforce any patents issued or licensed to us or to determine the scope and validity of third party proprietary rights.

We are dependent on non-exclusive licenses for certain technology included in our products.

We depend on development tools provided by a limited number of third party vendors. Together with application developers, we rely primarily upon software development tools provided by companies in the PC and

mobile computing device industries. If any of these companies fail to support or maintain these development tools, we will have to support the tools ourselves or transition to another vendor. Any maintenance or our support of the tools or transition could be time consuming, could delay product release and upgrade schedule and could delay the development and availability of third party applications used on our products. Failure to procure the needed software development tools or any delay in availability of third party applications could negatively impact our ability and the ability of third party application developers to release and support our products or they could negatively and materially affect the acceptance and demand for our products, business and prospects.

The risks associated with such non-exclusive third party licenses:

- . If we are unable to continue to license the technology or to license other necessary technologies for use with our products or if there are substantial increases in royalty payments under third-party licenses, it could jeopardize our operating results.
- . The effective implementation of our products depends upon the successful operation of these licenses in conjunction with our products, and therefore any undetected errors in products resulting from such licenses may prevent the implementation or impair the functionality of our products, delay new product introductions and injure our reputation. Such problems could have a material adverse effect on our business, operating results and financial condition.
- . Although we are generally indemnified against claims that the third party technology we license infringes the proprietary rights of others, this indemnification is not always available for all types of intellectual property rights (for example, patents may be excluded) and, in some cases, the scope of such indemnification is limited. Even if we receive broad indemnification, third party indemnitors are not always well-capitalized and may not be able to indemnify us in the event of infringement, resulting in substantial exposure to us. There can be no assurance that infringement or invalidity claims arising from the incorporation of third party technology in our products, and claims for indemnification from our customers resulting from these claims, will not be asserted or prosecuted against us. These claims, even if not meritorious, could result in the expenditure of significant financial and managerial resources in addition to potential product redevelopment costs and delays, all of which could materially adversely affect our business, operating results and financial condition.

Our products may contain product errors that could subject us to product liability claims.

Our products may contain undetected errors or failures when first introduced or as new versions are released, which can result in loss of or delay in market acceptance and could adversely impact future operating results. We do not currently maintain product liability insurance. Although our license agreements contain provisions limiting our liability in the case of damages resulting from use of the software, in the event of such damages, we may be found liable, and in such event such damages could materially affect our business, operating results and financial condition.

System failures or accidental or intentional security breaches could disrupt our

Edgar Filing: PUMATECH INC - Form 10-Q

operations, cause us to incur significant expenses, expose us to liability and harm our reputation.

Our operations depend upon our ability to maintain and protect our computer systems and core business applications, which are located at our offices, as well as hosted by a third party vendor. Our systems are vulnerable to damage from break-ins, unauthorized access, vandalism, fire, floods, earthquakes, power loss, telecommunications failures and similar events. Although we maintain insurance against break-in, unauthorized access, vandalism, fires, floods, earthquakes and general business interruptions, the amount of coverage may not be adequate in any particular case, and will not likely compensate us for all the damages caused by these or similar events. In addition, while we put various security measures in place to detect any unauthorized access to our computers and computer networks, we may be unable to prevent computer programmers or hackers from penetrating our network security or creating viruses to sabotage or otherwise attack our computer networks from time to time. A breach of our security could seriously damage our reputation, which would harm our business. In

31

addition, because a hacker who penetrates our network security could misappropriate proprietary information or cause interruptions in our services, we might be required to expend significant resources to protect against, or to alleviate, problems caused by hackers. We might also face liability to persons harmed by misappropriation of secure information if it is determined that we did not exercise sufficient care to protect our systems.

Nasdaq could delist Pumatech common stock if we do not maintain compliance with Nasdaq's minimum bid price or continue to comply with financial, corporate governance, and other standards for continued listing.

Our common stock is listed on the Nasdaq National Market. In order to maintain our listing on the Nasdaq National Market we must meet minimum financial and other requirements. If our stock price fails to close at \$1.00 or higher for 30 consecutive days, Nasdaq may determine that we are not in compliance with its listing requirements and commence proceedings to have our stock delisted from the National Market. Although Nasdaq has declared a temporary moratorium on delisting for failure to meet the \$1 minimum bid price requirement, if the minimum bid price of our common stock is below \$1 for 30 consecutive trading days after the moratorium is lifted, our common stock may be delisted. In such case, while we intend to request an appeal of any potential delisting notice and undertake measures intended to maintain our listing, such as proposing reverse split, there can be no assurance that our common stock will remain listed on the Nasdaq National Market. Additional reasons for delisting include failure to maintain a minimum amount of stockholders' equity, and failure to timely file various reports with the SEC, as well as other requirements. There are also circumstances where Nasdaq may exercise broad discretionary authority for continued inclusion. If our common stock were delisted from Nasdaq for any reason, it could materially reduce the value of our common stock and its liquidity.

The integration of key new employees and officers into our management team may interfere with our operations.

Depending on future business conditions and requirements, we may hire a number of key employees to our professional services organization, research and development, administrative and sales and marketing groups. To integrate into our company, new employees must spend a significant amount of time learning our business model and management system, in addition to performing their regular

Edgar Filing: PUMATECH INC - Form 10-Q

duties. Accordingly, the integration of new personnel may result in some disruption to our ongoing operations. If we fail to complete this integration in an efficient manner, our business and financial results will suffer.

We must retain and attract key employees or else we may not grow or be successful.

We are highly dependent on key members of our management and engineering staff. The loss of one or more of these officers or key employees might impede the achievement of our business objectives. Furthermore, recruiting and retaining qualified technical personnel to perform research, development and technical support is critical to our success. From time to time, depending on our business requirements, we may need to recruit a significant number of management, technical and other personnel for our business. Competition for employees in our industry and geographic location could be intense. We may not be able to continue to attract and retain skilled and experienced personnel on acceptable terms.

Rapid growth in our business could strain our resources and harm our business and financial results.

Any plan to expand and develop our existing enterprise and professional services business will place a significant strain on our management, financial controls, operations systems, personnel and other resources. If we are successful in implementing our marketing strategy, we also expect the demands on our technical support resources to grow rapidly, and we may experience difficulties responding to customer demand for our services and providing technical support in accordance with our customers' expectations. We expect that these demands will require not only the addition of new management personnel, but also the development of additional expertise by existing management personnel and the establishment of long-term relationships with third-party service vendors. In addition, we recently opened additional offices in Europe and other international locations and may require opening more offices in United States and international locations in the future. In such cases, we may encounter difficulties in integrating information and communications systems in multiple locations. We may not be able to keep pace with growth, successfully implement and maintain our operational and financial systems or successfully obtain, integrate and utilize the employees, facilities, third-party vendors and equipment, or management,

32

operational and financial resources necessary to manage a developing and expanding business in our evolving and increasingly competitive industry. If we are unable to manage growth effectively, we may lose customers or fail to attract new customers and our business and financial results will suffer.

33

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to a variety of risks, including changes in interest rates, foreign currency fluctuations, and market values of our investments which could impact our results of operations and financial condition. We currently do not utilize derivative financial instruments to hedge such risks.

At October 31, 2001, we had an investment portfolio of fixed income securities excluding those classified as cash and cash equivalents and

Edgar Filing: PUMATECH INC - Form 10-Q

securities available for sale of \$31,520,000. These securities, like all fixed income instruments, are subject to interest rate risk and will fall in value if market interest rates increase. If market interest rates were to increase immediately and uniformly by 10% from levels as of October 31, 2001, the decline of the fair value of the portfolio would be immaterial. Other than certain government securities, our fixed income investments have maturities of less than one year. While we intend to hold such fixed income investments until maturity to avoid recognizing an adverse impact in income or cash flows in the event of an increase in market interest rates, there can be no assurance that we will be able to do so.

To date, majority of our recognized revenue has been denominated in United States dollars, and our exposure to foreign currency exchange rates has been immaterial. We expect, however, that more product and service revenue may be derived from international markets and may be denominated in the currency of the applicable market in the future. As a result, our operating results may become subject to significant fluctuations based upon changes in exchange rates of certain currencies in relation to the United States dollar. We will also be exposed to increased risk of non-payment by our customers in foreign countries, especially those of highly inflationary economies. Furthermore, to the extent that we engage in international sales denominated in United States dollars, an increase in the value of the United States dollar relative to foreign currencies could make our products and services less competitive in international markets. Although we will continue to monitor our exposure to currency fluctuations, and, when appropriate, may use financial hedging techniques in the future to minimize the effect of these fluctuations, we cannot be assured that exchange rate fluctuations will not adversely affect our financial results in the future.

We are a limited partner in a venture capital fund, through which we invest in equity instruments of privately-held companies for business and strategic purposes. Our investment in this venture capital fund is included in other assets and is accounted for under the cost method as ownership is less than 3% and we do not have the ability to exercise significant influence over operations. At October 31, 2001, this investment amounted to \$2,500,000. For such investments, we regularly review the assumptions underlying the operating performance and cash flow forecasts in assessing the carrying values. We identify and record impairment losses when events and circumstances indicate that such assets might be impaired.

Although we will continue to assess the carrying values of our investments, we cannot be assured that a decline in value of our current and future investments will not adversely affect our financial results in the future. Furthermore, given the recent unfavorable economic conditions and the effect of economic slowdown on the capital markets, we cannot be assured that any other investments we have can be fully recouped if at all.
