FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended September 30, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 000-23593

VERISIGN, INC.

(Exact name of registrant as specified in its charter)

Delaware

94-3221585

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer
Identification No.)

12061 Bluemont Way, Reston, Virginia

20190

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code: (703) 948-3200

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.): YES NO

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Class

Shares Outstanding October 19, 2012

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Basis of Presentation

Interim Financial Statements

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared by VeriSign, Inc. (“Verisign” or the “Company”) in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) and, therefore, do not include all information and notes normally provided in audited financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and other adjustments) considered necessary for a fair presentation have been included. The results of operations for any interim period are not necessarily indicative of, nor comparable to, the results of operations for any other interim period or for a full fiscal year. These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and related notes contained in Verisign's fiscal 2011 Annual Report on Form 10-K (the “2011 Form 10-K”) filed with the SEC on February 24, 2012.

Reclassifications

Certain reclassifications have been made to prior period amounts to conform to current period presentation. Such reclassifications have no effect on net income as previously reported.

Note 2. Cash, Cash Equivalents, and Marketable Securities

The following table summarizes the Company's cash, cash equivalents, and marketable securities:

	September 30, 2012	December 31, 2011
	(In thousands)	
Cash	\$83,924	\$1,127,196
Money market funds	37,389	132,145
Time deposits	3,705	57,930
Debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies	1,368,755	32,860
Equity securities of a public company	3,039	—
Total	\$1,496,812	\$1,350,131
Included in Cash and cash equivalents	\$270,455	\$1,313,349
Included in Marketable securities	\$1,221,797	\$32,860
Included in Other assets (Restricted cash)	\$4,560	\$3,922

The following table presents the contractual maturities of the debt securities held as of September 30, 2012:

	September 30, 2012		
	Amortized Cost	Unrealized Gains	Fair Value
	(In thousands)		
Due within one year	\$1,335,654	\$83	\$1,335,737
Due after one year through three years	32,806	212	33,018
Total	\$1,368,460	\$295	\$1,368,755

The Company's investment in the equity securities of a public company has a cost basis of zero and a fair value of \$3.0 million as of September 30, 2012. Upon shares of the entity becoming publicly traded during the three months ended September 30, 2012, the Company reclassified the investment to available-for-sale securities and recorded an unrealized gain of \$3.0 million in Other comprehensive income.

Total	\$12,069	\$—	\$ 444	\$11,625

(1)Included in Prepaid expenses and other current assets

(2)Included in Accounts payable and accrued liabilities

The fair value of the Company's investments in money market funds approximates their face value. Such instruments are classified as Level 1 and are included in Cash and cash equivalents.

The fair value of the Company's investments in fixed income securities consisting of U.S. Treasury bills is based on their quoted market prices and are classified as Level 1. The fair value of the Company's investments in other fixed

income securities are obtained using the weighted average price of available market prices for the underlying securities from various industry standard data providers, large financial institutions and other third-party sources and are classified as Level 2. The Company's investments in fixed income securities are included in Marketable securities.

Table of Contents

The equity securities of a public company held by the Company at September 30, 2012 relate to a former cost method investment that the Company had previously written off. Beginning in September 2012, the equity securities held by the Company became publicly traded but are subject to a six month holding period which will expire in March 2013. The fair value of the investment is based on the quoted market price at the end of the period, adjusted for an estimate of the value of the six month restriction. As most of the significant inputs in the fair value are observable, the investment is classified as Level 2.

The fair value of the Company's foreign currency forward contracts is based on foreign currency rates quoted by banks or foreign currency dealers and other public data sources.

The Company utilizes a valuation model to estimate the fair value of the contingent interest derivative on the Convertible Debentures. The inputs to the model include stock price, bond price, risk adjusted interest rates, volatility, and credit spread observations. As several significant inputs are not observable, the overall fair value measurement of the derivative is classified as Level 3. The volatility and credit spread assumptions used in the calculation are the most significant unobservable inputs. As of September 30, 2012, the valuation of the contingent interest derivative assumed a volatility rate of approximately 31%. A hypothetical 5% increase or decrease in the volatility rate would not significantly change the fair value of the contingent interest derivative. The credit spread assumed in the valuation was approximately 4% at September 30, 2012. A hypothetical 1% increase or decrease in the credit spread would not significantly change the fair value of the contingent interest derivative.

The following table summarizes the change in the fair value of the Company's contingent interest derivative on Convertible Debentures during the three and nine months ended September 30, 2012 and 2011:

	Three Months Ended September 30, 2012		Nine Months Ended September 30, 2011	
	2011	2012	2011	2012
	(In thousands)			
Beginning balance	\$10,250	\$15,585	\$10,500	\$11,625
Unrealized loss (gain) on contingent interest derivative on Convertible Debentures	(250)	3,167	(500)	7,127
Ending balance	\$10,000	\$18,752	\$10,000	\$18,752

Other

The Company's other financial instruments include cash, accounts receivable, restricted cash, accounts payable, and long-term debt. As of September 30, 2012, the carrying value of these financial instruments approximated their fair value. The fair value of the Company's Convertible Debentures as of September 30, 2012, is \$1.9 billion, and is based on available market information from public data sources. The fair value measurement of the Company's Convertible Debentures is classified as Level 2.

Note 4. Other Balance Sheet Items**Prepaid Expenses and Other Current Assets**

Prepaid expenses and other current assets consist of the following:

	September 30, 2012	December 31, 2011
	(In thousands)	
Prepaid expenses	\$13,029	\$12,016
Non-trade receivables	2,454	9,452
Debt issuance costs	10,857	—
Other	627	379
Total prepaid expenses and other current assets	\$26,967	\$21,847

Table of Contents

Other Long-Term Assets

Other long-term assets consist of the following:

	September 30, 2012	December 31, 2011
	(In thousands)	
Other tax receivable	\$5,811	\$5,811
Long-term investments	413	413
Debt issuance costs	732	11,830
Long-term restricted cash	4,560	3,922
Security deposit and other	3,646	2,680
Total other long-term assets	\$15,162	\$24,656

Non-trade receivables as of December 31, 2011 consisted primarily of income tax receivables which were subsequently collected during the nine months ended September 30, 2012. Debt issuance costs related to the Company's Convertible Debentures have been reclassified to Prepaid expenses and other current assets from Other long-term assets as the related Convertible Debentures were reclassified from long-term liabilities to current liabilities as of September 30, 2012 due to the fact that they are convertible at the option of each holder through December 31, 2012. Refer to Note 8 "Debt and interest expense" for further discussion of the Convertible Debentures.

Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities consist of the following:

	September 30, 2012	December 31, 2011
	(In thousands)	
Accounts payable	\$11,135	\$19,283
Accrued employee compensation	36,288	40,251
Customer deposits, net	16,435	18,558
Taxes payable and other tax liabilities	15,733	28,441
Accrued restructuring costs	3,599	8,685
Other accrued liabilities	22,947	41,167
Total accounts payable and accrued liabilities	\$106,137	\$156,385

Accrued employee compensation primarily consists of liabilities for employee leave, salaries, payroll taxes, employee contributions to the employee stock purchase plan, and incentive compensation. Taxes payable and other tax liabilities as of September 30, 2012 reflects a decrease in current taxes payable from December 31, 2011 as the result of income tax payments made during the nine months ended September 30, 2012. As of September 30, 2012, Accrued restructuring costs represents the remaining lease payments to be made related to excess facilities that were abandoned as part of the relocation of the Company's headquarters during 2011. Other accrued liabilities include miscellaneous vendor payables and interest on the Convertible Debentures which is paid semi-annually in arrears on August 15 and February 15. Other accrued liabilities as of December 31, 2011 included certain retained liabilities related to divested businesses that were reversed or paid during the nine months ended September 30, 2012.

Note 5. Stockholders' Deficit

On July 27, 2010, the Company's Board of Directors ("Board") authorized the repurchase of up to approximately \$1.1 billion of common stock, in addition to the \$393.6 million of its common stock remaining available for repurchase under the previous 2008 Share Buyback Program, for a total repurchase authorization of up to \$1.5 billion of its common stock (collectively, the "2010 Share Buyback Program"). The 2010 Share Buyback Program has no expiration date. During the three and nine months ended September 30, 2012 the Company repurchased 1.7 million and 5.4 million shares of its common stock, respectively, at an average stock price of \$46.16 and \$40.95, respectively. The aggregate cost of the repurchases under the 2010 Share Buyback Program in the three and nine months ended September 30, 2012 was \$76.5 million and \$221.0 million, respectively. As of September 30, 2012, \$610.3 million remained available for further repurchases under the 2010 Share Buyback Program.

Table of Contents

During the nine months ended September 30, 2012, the Company placed 0.3 million shares, at an average stock price of \$39.55 and for an aggregate cost of \$10.4 million, into treasury stock for purposes related to tax withholdings upon vesting of Restricted Stock Units ("RSUs"). The Company placed less than 0.1 million shares into treasury for purposes related to tax withholdings during the three months ended September 30, 2012.

Since inception the Company has repurchased 163.0 million shares of its common stock for an aggregate cost of \$4.8 billion, which is presented as a reduction of Additional paid-in capital.

Note 6. Calculation of Net Income per Share

The Company computes basic net income per share by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted net income per share gives effect to dilutive potential common shares, including outstanding stock options, unvested RSUs, conversion spread relating to the Convertible Debentures, and employee stock purchases, using the treasury stock method. The following table presents the computation of weighted-average shares used in the calculation of basic and diluted net income per share:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2012	2011	2012	2011
	(In thousands)			
Weighted-average number of common shares outstanding	156,261	163,046	157,729	167,492
Weighted-average potential shares of common stock outstanding:				
Stock options	182	186	191	353
Unvested RSUs	806	667	744	756
Conversion spread related to Convertible Debentures	9,232	—	5,803	555
Employee stock purchase plan	94	3	73	20
Shares used to compute diluted net income per share	166,575	163,902	164,540	169,176

The following table presents the weighted-average potential shares of common stock that were excluded from the above calculation because their effect was anti-dilutive, and the respective weighted-average exercise prices of the weighted-average stock options outstanding:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2012	2011	2012	2011
	(In thousands, except per share data)			
Weighted-average stock options outstanding	—	645	39	395

Note 7. Stock-based Compensation

Stock-based compensation is classified in the Condensed Consolidated Statements of Operations and Comprehensive Income in the same expense line items as cash compensation. The following table presents the classification of stock-based compensation:

	Three Months Ended September 30, 2012		2011		Nine Months Ended September 30, 2012		2011	
	(In thousands)							
Cost of revenues	\$1,491	\$1,443	\$4,479	\$5,279				
Sales and marketing	1,697	1,305	5,046	4,856				
Research and development	1,622	1,094	4,191	3,965				
General and administrative	4,997	2,528	12,675	16,306				
Restructuring charges	—	723	—	5,701				
Total stock-based compensation expense	\$9,807	\$7,093	\$26,391	\$36,107				

The following table presents the nature of the Company's total stock-based compensation:

	Three Months Ended September 30, 2012		2011		Nine Months Ended September 30, 2012		2011	
	(In thousands)							
Stock options	\$193	\$628	\$829	\$3,122				
Employee stock purchase plan	1,253	941	3,361	2,919				
RSUs	9,062	5,448	24,297	26,804				
RSUs/Stock options acceleration	—	723	—	5,701				
Capitalization (Included in Property and equipment, net)	(701) (647) (2,096) (2,439				
Total stock-based compensation expense	\$9,807	\$7,093	\$26,391	\$36,107				

Note 8. Debt and Interest Expense

In August 2007, Verisign issued \$1.25 billion principal amount of 3.25% convertible debentures due August 15, 2037, in a private offering. The Convertible Debentures are initially convertible, subject to certain conditions, into shares of the Company's common stock at a conversion rate of 29.0968 shares of common stock per \$1,000 principal amount of Convertible Debentures, representing an initial effective conversion price of approximately \$34.37 per share of common stock.

Holders of the debentures may convert their Convertible Debentures at the applicable conversion rate, in multiples of \$1,000 principal amount, only under the following circumstances:

during any fiscal quarter beginning after December 31, 2007, if the last reported sale price of the Company's common stock for at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the immediately preceding fiscal quarter is greater than or equal to 130% of the applicable conversion price in effect on the last trading day of such preceding fiscal quarter (the "Conversion Price Threshold Trigger");

- during the five business-day period after any 10 consecutive trading-day period in which the trading price per \$1,000 principal amount of Convertible Debentures for each day of that 10 consecutive trading-day period was less than 98% of the product of the last reported sale price of the Company's common stock and the conversion rate on such day;

• if the Company calls any or all of the Convertible Debentures for redemption pursuant to the terms of the Indenture, at any time prior to the close of business on the trading day immediately preceding the redemption date;

upon the occurrence of any of several specified corporate transactions as specified in the Indenture governing the Convertible Debentures; or

at any time on or after May 15, 2037, and prior to the maturity date.

12

Table of Contents

The Company's common stock price exceeded the Conversion Price Threshold Trigger in the three months ended September 30, 2012. Accordingly, the Convertible Debentures are convertible at the option of each holder through December 31, 2012. Further, in the event of conversion, the Company intends, and has the ability, to settle the principal amount of the Convertible Debentures in cash, and therefore, has classified the debt component of the Convertible Debentures and the embedded contingent interest derivative as current liabilities as of September 30, 2012. The determination of whether or not the Convertible Debentures are convertible must continue to be performed quarterly. Consequently, the Convertible Debentures may not be convertible in future quarters, and therefore may be reclassified to long-term debt, if none of the conversion criteria are met in such quarters.

The following table presents the components of the Company's interest expense:

	Three Months Ended		Nine Months Ended	
	September 30, 2012	2011	September 30, 2012	2011
	(In thousands)			
Contractual interest on Convertible Debentures	\$10,156	\$10,156	\$30,469	\$30,469
Amortization of debt discount on the Convertible Debentures	2,017	1,858	5,927	5,460
Contingent interest to holders of Convertible Debentures	—	—	—	100,020
Interest capitalized to Property and equipment, net	(191)	(242)	(755)	(552)
Credit facility and other interest expense	637	25	1,898	76
Total interest expense	\$12,619	\$11,797	\$37,539	\$135,473

Interest expense in the three and nine months ended September 30, 2011 includes \$100.0 million of interest paid to holders of the Convertible Debentures as a result of the May 2011 Dividend. The Indenture governing the Convertible Debentures requires the payment of contingent interest to the holders of the Convertible Debentures if the Board declares a dividend to its stockholders that is designated by the Board as an extraordinary dividend. The contingent interest is calculated as the amount derived by multiplying the per share declared dividend with the if-converted number of shares applicable to the Convertible Debentures.

Note 9. Non-operating (Loss) Income, Net

The following table presents the components of Non-operating (loss) income, net:

	Three Months Ended		Nine Months Ended	
	September 30, 2012	2011	September 30, 2012	2011
	(In thousands)			
Interest and dividend income	\$643	\$763	\$1,548	\$4,433
Unrealized (loss) gain on contingent interest derivative on Convertible Debentures	(3,167)	250	(7,127)	500
Income from transition services agreements	362	1,255	2,541	6,988
Realized net gain on investments	34	1,892	68	4,246
Other, net	386	(569)	(62)	(949)
Total non-operating (loss) income, net	\$(1,742)	\$3,591	\$(3,032)	\$15,218

Interest and dividend income is earned principally from the Company's surplus cash balances and marketable securities. Unrealized losses on the contingent interest derivative on the Convertible Debentures in the three and nine months ended September 30, 2012, reflect the change in value of the derivative that resulted primarily from an increase in the Company's stock price. Income from transition services agreements includes fees generated from services provided to the purchasers of divested businesses for a certain period of time to facilitate the transfer of business operations. As of September 30, 2012, all transition services have been completed.

Table of Contents

Note 10. Income Taxes

The following table presents income tax expense from continuing operations and the effective tax rate:

	Three Months Ended		Nine Months Ended		
	September 30,		September 30,		
	2012	2011	2012	2011	
	(Dollars in thousands)				
Income tax expense from continuing operations	\$24,882	\$22,126	\$70,005	\$23,034	
Effective tax rate	24	% 27	% 25	% 20	%

The effective tax rate for the three and nine months ended September 30, 2012 and 2011 is lower than the statutory federal rate of 35% primarily due to tax benefits from foreign income taxed at lower rates and the effect of non-US operations, partially offset by state income taxes and non-deductible stock based compensation. The effective tax rate for the nine months ended September 30, 2012 was also reduced due to the release of a \$3.1 million of valuation allowance which related to investments with differing book and tax bases. The effective tax rate for the nine months ended September 30, 2011 was also impacted by a \$39.7 million discrete tax benefit, which was recognized in the second quarter of 2011, related to the contingent interest paid to the holders of the Company's Convertible Debentures. As a result of the reclassification of the Company's Convertible Debentures to current liabilities, the Company also reclassified the related deferred tax liability to current liabilities as of September 30, 2012. This change resulted in a shift from a net current deferred tax asset position to a net current deferred tax liability position as of September 30, 2012. Additionally, the effect of the reclassification resulted in a shift from a net long-term deferred tax liability position to a net long-term deferred tax asset position.

Note 11. Contingencies

Legal Proceedings

On May 31, 2007, plaintiffs Karen Herbert, et al., on behalf of themselves and a nationwide class of consumers, filed a complaint against Verisign, m-Qube, Inc., and other defendants alleging that defendants collectively operated an illegal lottery under the laws of multiple states by allowing viewers of the NBC television show "Deal or No Deal" to incur premium text message charges in order to participate in an interactive television promotion called "Lucky Case Game." The lawsuit is pending in the U.S. District Court for the Central District of California, Western Division. The defendants' motion to dismiss the Herbert matter was denied by the district court on December 3, 2007 and that ruling was appealed. On July 8, 2010, the Court of Appeals for the Ninth Circuit dismissed the appeal for lack of jurisdiction and remanded the case to the district court. Certain defendants had asserted indemnity claims against Verisign in connection with these matters.

On July 13, 2011, the parties reached an agreement in principle to settle this matter and the defendants, including Verisign, previously reached an agreement in principle to resolve the indemnity claims noted above. The parties have entered into fully documented settlement agreements. Under the agreement to resolve the Herbert case, class members were able to claim a full refund for premium text message charges incurred entering the Lucky Case Game. Verisign paid sixty percent of the settlement costs and received an approximately \$0.5 million contribution towards those costs from a co-defendant as part of the indemnity claim settlement. In 2011, the Company accrued for the expected settlement costs, which were not material to its financial condition or results of operations. See Note 4, "Discontinued Operations," of Notes to Consolidated Financial Statements in the 2011 Form 10-K.

The court granted preliminary approval of the Herbert settlement on September 19, 2011 and final approval on December 19, 2011. The settlement claims period expired on August 10, 2012. The Company has discharged all of its obligations under the settlement. The Company reversed the remaining accrual as a credit to income from discontinued operations in the three months ended September 30, 2012.

On March 5, 2012, a complaint entitled Warhanek v. Bidzos, et al. was filed in the United States District Court for the District of Delaware. The complaint asserts derivative claims on behalf of Verisign against current directors D. James Bidzos, William L. Chenevich, Roger H. Moore, Kathleen A. Cote, John D. Roach, Louis A. Simpson, Timothy Tomlinson and a former director, President and Chief Executive Officer Mark D. McLaughlin (the "Director Defendants"). The complaint also asserts one derivative claim against officers and certain former officers Richard H.

Goshorn, Christine C. Brennan, and Kevin A. Werner (the “Executive Defendants,” and together with the Director Defendants and nominal defendant Verisign, the “Defendants”).

Table of Contents

The complaint alleges that the Director Defendants fraudulently obtained shareholder approval of certain incentive-based compensation plans by misrepresenting the tax deductibility of certain compensation paid to Verisign's executive officers, including the Executive Defendants. Verisign adopted and obtained shareholder approval of several incentive-based compensation plans, including a 2010 Annual Incentive Compensation Plan ("AICP"), and an Amended and Restated VeriSign, Inc. 2006 Equity Incentive Plan ("2006 Plan") and these plans were submitted to shareholders for approval in the 2010 and 2011 Proxy Statements (the "Proxy Statements"), respectively. The complaint alleges that the Proxy Statements falsely disclosed, or failed to adequately disclose, the material terms under which performance-based compensation would be paid under the AICP and the 2006 Plan. The complaint further alleges that the Proxy Statements falsely represented that certain compensation paid to certain employees in excess of \$1 million would be tax deductible.

The complaint asserts derivative claims against the Director Defendants for (1) violations of Section 14(a) of the Exchange Act for making false statements in and omitting material facts from the Proxy Statements; (2) breach of fiduciary duty; and (3) waste of corporate assets. The complaint asserts an additional derivative claim against the Director Defendants and Executive Defendants for unjust enrichment based on compensation payments they received under the AICP or the 2006 Plan, as disclosed in the Proxy Statements. No demand was made on the Board to institute this action, and the complaint alleges that any such demand would be futile because each director is either interested or lacks independence with respect to the challenges to the AICP and 2006 Plan. The relief sought by the complaint includes, among other things, an order nullifying the shareholder approval of the AICP and the 2006 Plan, an injunction requiring correction of the alleged misrepresentations in the Company's Proxy Statements, and an order requiring equitable accounting, with disgorgement, in favor of the Company for the purported losses it has and will sustain. On May 25, 2012, the defendants filed motions to dismiss this action in its entirety. Oral argument on the motions to dismiss is scheduled for October 29, 2012.

The Defendants intend to defend this action vigorously.

Indemnifications

In connection with the sale of the Authentication Services business to Symantec in August 2010, the Company has agreed to indemnify Symantec for certain potential legal claims arising from the operation of the Authentication Services business for a period of sixty months after the closing of the sale transaction. The Company's indemnification obligations in this regard are triggered only when indemnifiable claims exceed in the aggregate \$4.0 million.

Thereafter, the Company is obligated to indemnify Symantec for 50% of all indemnifiable claims. The Company's maximum indemnification obligation with respect to these claims is capped at \$50.0 million.

While certain legal proceedings and related indemnification obligations to which the Company is a party specify the amounts claimed, such claims may not represent reasonably possible losses. Given the inherent uncertainties of the litigation, the ultimate outcome of these matters cannot be predicted at this time, nor can the amount of possible loss or range of loss, if any, be reasonably estimated, except in circumstances where an aggregate litigation accrual has been recorded for probable and reasonably estimable loss contingencies. A determination of the amount of accrual required, if any, for these contingencies is made after careful analysis of each matter. The required accrual may change in the future due to new developments in each matter or changes in approach such as a change in settlement strategy in dealing with these matters. The Company does not believe that any such matter currently being reviewed will have a material adverse effect on its financial condition or results of operations.

Verisign is involved in various other investigations, claims and lawsuits arising in the normal conduct of its business, none of which, in its opinion, will have a material adverse effect on its financial condition or results of operations. The Company cannot assure you that it will prevail in any litigation. Regardless of the outcome, any litigation may require the Company to incur significant litigation expense and may result in significant diversion of management attention.

Table of Contents

Note 12. Subsequent Event

On June 16, 2012, the Board approved the renewal of the Company's agreement with Internet Corporation of Assigned Names and Numbers ("ICANN") to serve as the authoritative registry operator for the .com registry (the ".com Registry Agreement") for the term commencing on December 1, 2012 and ending on November 30, 2018. On June 23, 2012, the board of directors of ICANN approved the renewal of the .com Registry Agreement. The Cooperative Agreement between the Department of Commerce (the "DOC") and the Company (the "Cooperative Agreement") requires the Company to submit the .com Registry Agreement to the DOC for its approval at least 90 days prior to the expiration of the .com Registry Agreement on November 30, 2012 and the Company submitted the .com Registry Agreement to the DOC for its review on June 26, 2012. In accordance with the provisions of the Cooperative Agreement, the Company has had an expectation that the .com Registry Agreement would be renewed prior to its expiration on the terms proposed and approved by ICANN and the Board.

As a result of communications beginning in October 2012 with the DOC, the Company has concluded that the DOC may not complete its review and approve the renewal of the .com Registry Agreement prior to its expiration on November 30, 2012, and that the DOC, together with the Department of Justice (the "DOJ"), is reviewing the .com Registry Agreement's pricing terms. Pursuant to the terms of the Cooperative Agreement, if the .com Registry Agreement is not approved by the DOC prior to its expiration, the DOC is required to agree to the extension of the .com Registry Agreement for six months, or such other reasonable period of time as the DOC and the Company may mutually agree.

At this time, the Company cannot estimate the financial effect, if any, that this may have on the Company's financial position, results of operations or cash flows.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion in conjunction with the interim unaudited Condensed Consolidated Financial Statements and related notes.

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These forward-looking statements involve risks and uncertainties, including, among other things, statements regarding our anticipated costs and expenses and revenue mix. Forward-looking statements include, among others, those statements including the words "expects," "anticipates," "intends," "believes" and similar language. Our actual results may differ significantly from those projected in the forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in the section titled "Risk Factors" in Part II, Item 1A of this Quarterly Report on Form 10-Q. You should also carefully review the risks described in other documents we file from time to time with the Securities and Exchange Commission, including the Quarterly Reports on Form 10-Q or Current Reports on Form 8-K that we file in 2012 and our 2011 Form 10-K, which was filed on February 24, 2012, which discuss our business in greater detail. You are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to publicly release any revisions to the forward-looking statements or reflect events or circumstances after the date of this document.

Overview

We are a provider of Internet infrastructure services. By leveraging our global infrastructure, we provide network confidence and availability for mission-critical Internet services, such as domain name registry services and infrastructure assurance services. Our service capabilities enable domain name registration through registrars and provide network availability for registrars and Internet users alike.

Our business consists of one reportable segment, Naming Services, which consists of Registry Services and Network Intelligence and Availability ("NIA") Services. Registry Services is the registry operator for all .com, .net, .cc, .tv, and .name domain names and also operates the back-end systems for all .gov, .jobs and .edu domain names. As of September 30, 2012, we had approximately 119.9 million domain names registered under the .com and .net registries, our principal registries. The number of domain names registered is largely driven by continued growth in online advertising, e-commerce, and the number of Internet users, which is partially driven by greater availability of broadband, as well as advertising and promotional activities carried out by us and third-party registrars. Recently, growth in the number of domain names has been hindered by certain factors, including the overall economic conditions in Europe and changes to search algorithms used by Google that negatively affect the profitability of certain types of websites, and as a result, reduce demand for new domain name registrations and renewals. Although growth in absolute number of registrations remains greatest in the U.S., growth on an annual percentage basis is expected to be greatest in markets outside of the U.S. over the long-term. NIA Services provides infrastructure assurance services to organizations and is comprised of Verisign iDefense Security Intelligence Services, Managed Domain Name System Services, and Distributed Denial of Service Protection Services. Revenues from NIA Services are not significant in relation to our consolidated revenue.

.com Registry Agreement Renewal Update

As previously disclosed in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2012, on June 16, 2012, the Board approved the renewal of our agreement with ICANN to serve as the authoritative registry operator for the .com Registry Agreement for the term commencing on December 1, 2012 and ending on November 30, 2018. On June 23, 2012, the board of directors of ICANN approved the renewal of the .com Registry Agreement. The Cooperative Agreement requires Verisign to submit the .com Registry Agreement to the DOC for its approval at least 90 days prior

to the expiration of the .com Registry Agreement on November 30, 2012 and Verisign submitted the .com Registry Agreement to the DOC for its review on June 26, 2012. In accordance with the provisions of the Cooperative Agreement, Verisign has had an expectation that the .com Registry Agreement would be renewed prior to its expiration on the terms proposed and approved by ICANN and the Board.

As a result of communications beginning in October 2012 with the DOC, we have concluded that the DOC may not complete its review and approve the renewal of the .com Registry Agreement prior to its expiration on November 30, 2012, and that the DOC, together with the DOJ, is reviewing the .com Registry Agreement's pricing terms. Pursuant to the terms of the Cooperative Agreement, if the .com Registry Agreement is not approved by the DOC prior to its expiration, the DOC is required to agree to the extension of the .com Registry Agreement for six months, or such other reasonable period of time as the

Table of Contents

DOC and Verisign may mutually agree. See “Item 1A. Risk Factors -- Substantially all of our revenue is derived from our Registry Services business. Any refusal of the DOC to approve the renewal of the .com Registry Agreement would, and any limitations on our ability to raise prices or any reduction of the pricing terms previously proposed and approved by ICANN and the Board could, materially and adversely affect our business and results of operations.”

Business Highlights and Trends

We recorded revenues of \$223.5 million and \$643.4 million during the three and nine months ended September 30, 2012, respectively. This represents an increase of 13% in both the three and nine months ended September 30, 2012, as compared to the same periods in 2011. The increase was primarily due to a 7% year-over-year increase in active domain names ending in .com and .net and increases in our .com and .net registry fees in July 2010 and January 2012. We recorded operating income of \$116.1 million and \$322.0 million during the three and nine months ended September 30, 2012, respectively, an increase of 30% and 36%, respectively, as compared to the same periods last year. The increase was primarily due to an increase in our revenues as well as a reduction in restructuring expenses. General and administrative expenses decreased in the nine months ended September 30, 2012 as we realize the effect of post-divestiture cost savings.

We repurchased 1.7 million and 5.4 million shares, respectively, of our common stock under the 2010 Share Buyback Program for an aggregate cost of \$76.5 million and \$221.0 million, respectively, during the three and nine months ended September 30, 2012.

We generated cash flows from operating activities of \$366.9 million during the nine months ended September 30, 2012, an increase of 73% as compared to the same period last year. The increase was primarily due to the payment of \$100.0 million of contingent interest to the holders of our Convertible Debentures during 2011 and an increase in cash received from customers resulting from revenue growth in 2012, partially offset by an increase in income taxes paid. The price of our common stock exceeded the Conversion Price Threshold Trigger during the third quarter of 2012, and therefore, the Convertible Debentures are convertible into common stock during the fourth quarter of 2012 at the option of each holder. The debt component of the Convertible Debentures, the related embedded derivative, and deferred tax liability were reclassified from long-term liabilities to current liabilities, while the associated unamortized debt issuance costs were reclassified from long-term assets to current assets, as of September 30, 2012.

We purchased \$1.6 billion of marketable securities during the nine months ended September 30, 2012. Sales and maturities of marketable securities were \$393.7 million during the nine months ended September 30, 2012. Substantially all of the purchases, sales and maturities of marketable securities in 2012 consisted of U.S. Treasury bills with maturities of less than one year.

Pursuant to our agreements with ICANN, Verisign makes available on its website at www.verisigninc.com/zone files containing all active domain names registered in the .com and .net registries. At the same website address, Verisign makes available a summary of the number of active domain names registered in the .com and .net registries and the number of .com and .net domain names that are registered but are not configured for use. These files and the related summary data are updated at least once per day. The update times may vary each day. The summary data provided on the website includes domain names that, at the time of publication, were recently purchased and subject to a five day grace period during which the domain names may be deleted and a credit may be issued to a registrar (the “add grace period”). The number of active domain names subject to the add grace period is typically immaterial. The numbers provided in this Form 10-Q are the numbers as of midnight of the date reported, include domain names registered but not configured for use, and do not include domain names subject to the add grace period and therefore cannot be compared to the summary posted on our website. Information available on, or accessible through, this website is not incorporated herein by reference.

Revenues

Revenues related to our Registry Services are primarily derived from registrations for domain names in the .com, .net, .cc, .tv, .name, .gov, and .jobs domain name registries. Revenues from .cc, .tv, .name, .gov, and .jobs are not significant in relation to our consolidated revenue. For domain names registered with the .com and .net registries, we receive a fee from third-party registrars per annual registration that is fixed pursuant to our agreements with ICANN. Individual customers, called registrants, contract directly with third-party registrars or their resellers, and the third-party registrars in turn register the .com, .net, .cc, .tv, .name and .jobs domain names with Verisign. Changes in revenues are driven largely by increases in the number of new domain name registrations and the renewal rate for existing registrations, in each case as impacted by continued growth in online advertising, e-commerce, and the number of Internet users, which is partially driven by greater availability of broadband, as well as advertising and promotional activities carried out by us and third-party registrars. On January 15, 2012, we increased our .com domain name registration fees by 7% from \$7.34 to \$7.85 and .net domain name registration fees by 10% from \$4.65 to \$5.11. We have the contractual right to increase the fees for .net domain name registrations by up to 10% each year during the term of our .net agreement with ICANN through June 30, 2017. We offer promotional marketing programs for our registrars based upon market conditions and the business environment in which the registrars operate. All revenues paid to us for .com and .net registrations are in U.S. dollars. Revenues from NIA Services are not significant in relation to our total consolidated revenue.

A comparison of revenues is presented below:

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	% Change	2011	2012	% Change	2011
	(Dollars in thousands)					
Revenues	\$223,528	13 %	\$196,965	\$643,396	13 %	\$568,332

Table of Contents

The following table compares domain names ending in .com and .net managed by our Registry Services business:

	September 30, 2012	% Change	September 30, 2011
Active domain names ending in .com and .net	119.9 million	7	% 111.9 million

Our revenues increased by \$26.6 million and \$75.1 million during the three and nine months ended September 30, 2012, as compared to the same periods last year, primarily due to a 7% year-over-year increase in the number of domain names ending in .com and .net and increases in our .com and .net registry fees in July 2010 and January 2012 as per our agreements with ICANN.

The growth in the number of active domain names was primarily driven by continued Internet growth and new domain name promotional programs. We expect to see continued growth in the number of active domain names in 2012 as a result of further Internet growth. In addition, while we expect to see continued growth internationally in both .com and .net domain name bases, especially in markets that we have targeted through our marketing programs, recently the ongoing economic instability in Europe has limited the rate of growth of the domain name base and may continue to do so in the future. Further, according to published reports, Google recently made, and may continue to make changes to its search algorithm and pay-per-click advertising policies to provide less compensation for certain types of websites. This could make such websites less profitable and result in fewer domain registrations and renewals. We believe that some first time renewing websites affected by this change did not renew during the nine months ended September 30, 2012. Although growth in the domain name base may be limited by these factors, we expect revenues will continue to increase in fiscal 2012 as compared to fiscal 2011 as a result of continued growth in the number of active domain names ending in .com and .net and implementation of the price increase which became effective in January 2012 as domain names are renewed at the increased price.

During the first half of 2012, ICANN began the application process for new gTLDs, including new IDN gTLDs. The application period closed in May 2012, and new domain name registration opportunities for a portion of the approved new gTLDs are expected to be available in 2013. We applied directly for 14 new gTLDs including 12 transliterations of .com and .net. In addition, applicants for approximately 220 new gTLDs selected us to provide back-end registry services directly or through resellers. We cannot predict whether we will be successful in becoming the registry for all or any of these gTLDs or whether any of the 220 applications for which we would serve as the back-end service provider will be successful, and whether there will be any delays in ICANN's approval process. Furthermore, ICANN has stated that it will need to limit the maximum number of new gTLDs that may be delegated in a year to 1,000. ICANN has proposed a random drawing method, which is currently in a comment period prior to approval, to order and meter applicants through the process. Accordingly, based on the drawing and other factors of the application process, availability of domain name registrations for approved new gTLDs applied for by Verisign or Verisign's customers, both direct and indirect, and the timing of revenue generation, if any, from these gTLDs is uncertain. We cannot assess the impact, if any, the introduction of these new gTLDs will have on our revenues and results of operations. See Item 1A. "Risk Factors—We may face additional competition, operational and other risks from the introduction of new TLDs by ICANN, which could have a material adverse effect on our business and results of operations," of this Form 10-Q.

Geographic revenues

We generate revenue in the U.S.; Australia, China, India and other Asia Pacific countries ("APAC"); Europe, the Middle East and Africa ("EMEA"); and certain other countries including Canada and Latin American countries.

The following table presents a comparison of our geographic revenues:

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	% Change	2011	2012	% Change	2011
	(Dollars in thousands)					
U.S.	\$135,627	13	% \$120,319	\$390,734	12	% \$347,502

Edgar Filing: VERISIGN INC/CA - Form 10-Q

EMEA	33,109	13	%	29,402	96,954	13	%	86,173
APAC	34,453	21	%	28,455	97,867	22	%	80,139
Other	20,339	8	%	18,789	57,841	6	%	54,518
Total revenues	\$223,528			\$196,965	\$643,396			\$568,332

20

Table of Contents

Revenues are generally attributed to the country of domicile and the respective regions in which our registrars are located. Revenues from each of the respective regions increased during the three and nine months ended September 30, 2012, as compared to the same period last year, primarily driven by an increase in the number of domain names ending in .com and .net and increases in our .com and .net registry fees in July 2010 and January 2012. The increase in the number of domain names ending in .com and .net was driven by continued Internet growth and domain name promotional programs. Mature markets such as the U.S., where broadband and e-commerce have seen strong market penetration, are expected to see decreasing incremental growth rates reflecting the maturing of the markets. Future revenue growth in EMEA may be hindered due to the unfavorable economic conditions in Europe. We expect to see larger increases in certain international regions, resulting from greater broadband and Internet penetration and expanding e-commerce as electronic means of payments are increasingly adopted.

Cost of revenues

Cost of revenues consist primarily of salaries and employee benefits expenses for our personnel who manage the operational systems, depreciation expenses, operational costs associated with the delivery of our services, fees paid to ICANN, customer support and training, consulting and development services, costs of facilities and computer equipment used in these activities, telecommunications expense and allocations of indirect costs such as corporate overhead.

A comparison of cost of revenues is presented below:

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	% Change	2011	2012	% Change	2011
	(Dollars in thousands)					
Cost of revenues	\$41,460	(1)%	\$41,694	\$125,560	2 %	\$123,230

Cost of revenues did not materially change during the three months ended September 30, 2012, as compared to the same period last year.

Cost of revenues increased during the nine months ended September 30, 2012, as compared to the same period last year, primarily due to increases in salary and employee benefits expenses and direct cost of revenues, partially offset by a decrease in depreciation expenses. Salary and employee benefits expenses increased by \$2.1 million due to an increase in the average headcount to support our Registry Services business and continued growth of our NIA Services business, partially offset by a decrease in stock-based compensation due to additional vested RSUs granted to option holders during the nine months ended September 30, 2011 as they did not participate in the May 2011 and December 2010 special cash dividends. Direct cost of revenues increased by \$2.0 million, primarily due to an increase in the .tv registry fees required to be paid in the renewed .tv registry agreement, which took effect beginning in 2012. Depreciation expenses decreased by \$3.0 million due to the acceleration of depreciation on an abandoned software project in the nine months ended September 30, 2011 and a change in the estimated useful lives of computer hardware and equipment assets from three years to four years beginning in 2012.

We expect cost of revenues as a percentage of revenues to remain consistent during the remainder of 2012 compared to the nine months ended September 30, 2012.

Sales and marketing

Sales and marketing expenses consist primarily of salaries, sales commissions, sales operations and other personnel-related expenses, travel and related expenses, gTLD application costs, trade shows, costs of lead generation, costs of computer and communications equipment and support services, facilities costs, consulting fees, costs of marketing programs, such as online, television, radio, print and direct mail advertising costs, and allocations of indirect costs such as corporate overhead.

A comparison of sales and marketing expenses is presented below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011

Edgar Filing: VERISIGN INC/CA - Form 10-Q

	% Change				% Change	
	(Dollars in thousands)					
Sales and marketing	\$22,928	(9)%	\$25,090	\$77,056	11	% \$69,660

Sales and marketing expenses decreased during the three months ended September 30, 2012, as compared to the same period last year, primarily due to decreases in advertising and marketing expenses. Advertising and marketing expenses decreased by \$1.6 million due to decreases in product marketing initiatives promoting our Registry Services business.

Sales and marketing expenses increased during the nine months ended September 30, 2012, as compared to the same period last year, primarily due to increases in salary and employee benefits expenses, advertising expenses, and fees paid to

Table of Contents

ICANN for gTLD applications. Salary and employee benefits expenses increased by \$4.8 million due to an increase in the average headcount related to the expansion of the international marketing team for our Registry Services business and growth of our NIA sales team. Contractor and professional services expenses decreased by \$2.3 million due to costs related to the new gTLD program and the promotion of other Registry products during the nine months ended September 30, 2011. During the nine months ended September 30, 2012, we incurred fees of \$2.6 million related to applications for new gTLDs.

We expect sales and marketing expenses as a percentage of revenues to decrease during the remainder of 2012 compared to the nine months ended September 30, 2012 due to revenue growth resulting from the increase in .com and .net registry fees in January 2012 and our continued focus on effectively managing our expenses.

Research and development

Research and development expenses consist primarily of costs related to research and development personnel, including salaries and other personnel-related expenses, consulting fees, facilities costs, computer and communications equipment, support services used in our service and technology development, and allocations of indirect costs such as corporate overhead.

A comparison of research and development expenses is presented below:

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	% Change	2011	2012	% Change	2011
	(Dollars in thousands)					
Research and development	\$15,409	14	% \$13,488	\$45,635	14	% \$40,156

Research and development expenses increased during the three months ended September 30, 2012, as compared to the same period last year, primarily due to an increase in salary and employee benefits expenses. Salary and employee benefits expenses increased by \$2.0 million due to an increase in average headcount to support the development of our DNS infrastructure and other new services.

Research and development expenses increased during the nine months ended September 30, 2012, compared to the same period last year, primarily due to increases in salary and employee benefits expenses and contract and professional services expenses, partially offset by an increase in capitalized labor. Salary and employee benefits expenses increased by \$4.9 million due to an increase in average headcount to support the development of our DNS infrastructure and new services. Contract and professional services expenses increased by \$2.5 million primarily to support projects in our NIA Services business. Capitalized labor increased by \$2.4 million due to an increase in the volume of work performed on internally developed software projects.

We expect research and development expenses as a percentage of revenues to remain consistent during the remainder of 2012 compared to the nine months ended September 30, 2012.

General and administrative

General and administrative expenses consist primarily of salaries and other personnel-related expenses for our executive, administrative, legal, finance, information technology and human resources personnel, costs of facilities, computer and communications equipment, management information systems, support services, professional services fees, certain tax and license fees, and bad debt expense, offset by allocations of indirect costs such as facilities and shared services expenses to other cost types.

A comparison of general and administrative expenses is presented below:

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	% Change	2011	2012	% Change	2011
	(Dollars in thousands)					
General and administrative	\$27,669	12	% \$24,775	\$73,903	(15)	% \$86,610

General and administrative expenses increased during the three months ended September 30, 2012, as compared to the same period last year primarily due to increases in salary and employee benefits expenses and legal expenses, partially

offset by decreases in occupancy expenses. Salary and employee benefits expenses increased marginally due to a \$2.5 million increase in stock-based compensation expense due to the grant of \$1.4 million of fully vested RSUs to members of the Board of Directors in July 2012, partially offset by a \$1.9 million decrease in salary and employee benefits expenses as a result of reduced corporate support functions needed subsequent to the divestiture of the Authentication Services business. Legal expenses increased by \$3.9 million due to legal and other support related to the DOC's review of the renewal of our .com Registry Agreement with ICANN and legal advice related to ICANN's new gTLD program. Occupancy expenses decreased by \$2.6 million as we exited certain facilities in Mountain View, California and Dulles, Virginia and purchased our corporate

Table of Contents

headquarters facility in Reston, Virginia during 2011.

General and administrative expenses decreased during the nine months ended September 30, 2012, as compared to the same period last year primarily due to decreases in salary and employee benefits expenses including stock-based compensation, contract and professional services expenses, occupancy expenses and an increase in overhead costs allocated to other cost types. These decreases were partially offset by an increase in legal expenses, miscellaneous expenses, and depreciation. Salary and employee benefits expenses decreased by \$13.5 million, including a \$3.6 million decrease in stock-based compensation, as a result of reduced headcount in corporate support functions subsequent to the divestiture of the Authentication Services business. Stock-based compensation expenses decreased due to additional vested RSUs granted to option holders during the nine months ended September 30, 2011 as they did not participate in the May 2011 and December 2010 special cash dividends, Contract and professional services expenses decreased by \$3.8 million due to reductions in consulting services expenses. Occupancy expenses decreased by \$4.8 million as we exited certain facilities in Mountain View, California and Dulles, Virginia and purchased our corporate headquarters facility in Reston, Virginia during 2011. Overhead expenses allocated to other cost types increased by \$1.5 million due to a decrease in the relative headcount of the general and administrative function compared to other functions subsequent to the divestiture of the Authentication Services business. Legal expenses increased by \$5.6 million due to an insurance recovery in 2011 related to a certain legal matter as well as legal and other support related to the DOC's review of the renewal of our .com Registry Agreement with ICANN and legal advice related to ICANN's new gTLD program. Miscellaneous expenses increased due to the release of \$5.9 million of liabilities related to non-income tax expenses as a result of the lapse of the statutes of limitations during the nine months ended September 30, 2011. Depreciation expenses increased by \$2.0 million due to the additional depreciation related to our new corporate headquarters which was purchased in November 2011.

We expect general and administrative expenses as a percentage of revenue to decrease during the remainder of 2012 compared to the nine months ended September 30, 2012 due to revenue growth resulting from the increase in .com and .net registry fees in January 2012 and our continued focus on effectively managing our expenses.

Restructuring charges

Restructuring charges in the three and nine months ended September 30, 2012 decreased from the same periods of the prior year as we substantially completed our 2010 Restructuring Plan during the fourth quarter of 2011.

Interest expense

See Note 8, "Debt and interest expense" of our Notes to Condensed Consolidated Financial Statements in Item 1 of this Form 10-Q.

Non-operating (loss) income, net

See Note 9, "Non-operating (loss) income, net" of our Notes to Condensed Consolidated Financial Statements in Item 1 of this Form 10-Q.

Income tax expense

See Note 10, "Income Taxes" of our Notes to Condensed Consolidated Financial Statements in Item 1 of this Form 10-Q.

Income (Loss) from discontinued operations, net of tax

Income from discontinued operations before income taxes for the three and nine months ended September 30, 2012 primarily represents the reversal of certain retained liabilities and the reversal of certain accruals for retained litigation related to the prior operations of a divested business. Losses from discontinued operations before income taxes for the three and nine months ended September 30, 2011 primarily represent the effects of certain retained litigation of the divested businesses. Income tax expense for discontinued operations for the nine months ended September 30, 2011 includes a \$2.9 million discrete charge attributable to a change in the purchase price allocation prepared for income tax purposes related to the divestiture of the Authentication Services business.

Table of Contents

Liquidity and Capital Resources

In summary, our cash flows for the nine months ended September 30, 2012 and 2011 are as follows:

	Nine Months Ended September 30,	
	2012	2011
	(In thousands)	
Net cash provided by operating activities	\$366,871	\$211,687
Net cash (used in) provided by investing activities	(1,226,063)	403,175
Net cash used in financing activities	(183,864)	(970,057)
Effect of exchange rate changes on cash and cash equivalents	162	(1,645)
Net decrease in cash and cash equivalents	\$(1,042,894)	\$(356,840)

Cash flows from operating activities

Our largest source of operating cash flows is cash collections from our customers. Our primary uses of cash from operating activities are for personnel related expenditures, and other general operating expenses, as well as payments related to taxes and facilities.

Net cash provided by operating activities in the nine months ended September 30, 2012 increased due to an increase in cash received from customers which resulted from revenue growth compared to the same period last year, a reduction in interest paid as a result of the \$100.0 million of contingent interest paid to holders of our Convertible Debentures in May 2011 and a marginal reduction in cash paid to vendors and employees as operating expenses decreased in the nine months ended September 30, 2012 compared to the same period last year. This increase was partially offset by an increase in payments for income taxes and excess tax benefits from exercises of stock options and other employee stock purchases during the nine months ended September 30, 2012 compared to the same period of last year.

Cash flows from investing activities

The changes in cash flows from investing activities primarily relate to purchases, maturities and sales of marketable securities, and purchases of property and equipment.

The changes in cash (used in) provided by investing activities in the nine months ended September 30, 2012 compared to the same period last year was due to an increase in purchases of marketable securities and a decrease in the proceeds from sales of marketable securities, partially offset by a decrease in purchases of property and equipment.

Cash flows from financing activities

The changes in cash flows from financing activities primarily relate to borrowings from our credit facility, stock repurchases, stock option exercises, our employee stock purchase plan ("ESPP"), excess tax benefits from stock-based compensation, and dividend payments.

Net cash used in financing activities decreased primarily due to the payment of a special cash dividend in May 2011 and a decrease in the amount of share repurchases made during the nine months ended September 30, 2012 compared to the same period of the prior year and an increase in realized excess tax benefits from exercises of stock options and vesting of RSUs, partially offset by a decrease in proceeds from stock option exercises and our ESPP.

Other Liquidity and Capital Resources Information

	September 30, 2012	December 31, 2011
	(In thousands)	
Cash and cash equivalents	\$270,455	\$1,313,349
Marketable securities	1,221,797	32,860
Total	\$1,492,252	\$1,346,209

As of September 30, 2012, our principal source of liquidity was \$270.5 million of cash and cash equivalents and \$1.2 billion of marketable securities. The marketable securities consist primarily of debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies meeting the criteria of our investment policy, which is focused on the preservation of our capital through investment in investment grade securities. The cash equivalents consist mainly of amounts invested in money market funds and U.S. Treasury bills with original or purchased maturities of less than 90 days.

Table of Contents

The \$1.2 billion of marketable securities held as of September 30, 2012 consist primarily of U.S. Treasury bills that were purchased during the nine months ended September 30, 2012 using funds held by foreign subsidiaries. All of the U.S. Treasury bills purchased have contractual maturities of less than one year. Approximately \$33.0 million of marketable securities held as of September 30, 2012 have contractual maturities between one year and three years. Our cash and cash equivalents are readily accessible. For additional information on our investment portfolio, see Note 2, "Cash, Cash Equivalents, and Marketable Securities," of our Notes to Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q.

As of September 30, 2012, the amount of cash and cash equivalents and marketable securities held by foreign subsidiaries was \$1.2 billion. Our intent is to permanently reinvest outside of the U.S. those funds held by foreign subsidiaries that have not been previously taxed in the U.S. Currently, we do not anticipate that we will need funds that were generated from foreign operations to fund our domestic operations. In the event funds from foreign operations are needed to fund operations in the U.S. and if U.S. tax has not already been previously provided, we would be required to accrue and pay additional U.S. taxes in order to repatriate these funds.

As of September 30, 2012, we had \$1.25 billion principal amount outstanding of 3.25% Convertible Debentures due 2037 (See Note 8 "Debt and Interest Expense" of the accompanying condensed consolidated financial statements). The Convertible Debentures will mature in August 2037, unless earlier repurchased, redeemed or converted.

Our common stock price exceeded the Conversion Price Threshold Trigger in the three months ended September 30, 2012. Accordingly, the Convertible Debentures are convertible at the option of the holder for the fourth quarter of 2012. We do not expect a material amount of the Convertible Debentures to be converted in the near term as the trading price of the debentures exceeds the value that is likely to be received upon conversion. However, we cannot provide any assurance that the trading price of the debentures will continue to exceed the value that would be derived upon conversion or that the holders will not elect to convert the Convertible Debentures.

If a holder elects to convert its Convertible Debentures, we are permitted under the Indenture to pursue an exchange in lieu of conversion or to settle the conversion value (as defined in the Indenture) in cash, stock, or a combination thereof. We currently have the intent and the ability (based on current facts and circumstances) to settle the principal amount of the Convertible Debentures in cash. However, if the principal amount of the Convertible Debentures that holders actually elect to convert exceeds our cash on hand and cash from operations, we will need to draw cash from existing financing or pursue additional sources of financing to settle the Convertible Debentures in cash. We cannot provide any assurances that we will be able to obtain new sources of financing on terms acceptable to us or at all, nor can we assure that we will be able to obtain such financing in time to settle the Convertible Debentures that holders elect to convert.

We believe existing cash, cash equivalents and marketable securities, and funds generated from operations, together with our ability to arrange for additional financing should be sufficient to meet our working capital, capital expenditure requirements, and to service our debt for the next 12 months. We regularly assess our cash management approach and activities in view of our current and potential future needs.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

During the nine months ended September 30, 2012, our marketable securities increased by \$1.2 billion due to the purchase of U.S. Treasury bills, substantially all of which, have maturities of less than one year. Due to the short maturity and credit quality of these investments, we do not believe there has been a significant change in our market risk exposure since December 31, 2011.

ITEM 4. CONTROLS AND PROCEDURES

Based on our management's evaluation, with the participation of our Chief Executive Officer (our principal executive officer) and our Chief Financial Officer (our principal financial officer), as of September 30, 2012, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended September 30, 2012 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Inherent Limitations of Disclosure Controls and Internal Control over Financial Reporting

Because of their inherent limitations, our disclosure controls and procedures and our internal control over financial reporting may not prevent material errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. The effectiveness of our disclosure controls and procedures and our internal control over financial reporting is subject to risks, including that the control may become inadequate because of changes in conditions or that the degree of compliance with our policies or procedures may deteriorate.

Table of Contents

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information set forth under “Legal Proceedings” in Note 11, “Contingencies,” of our Notes to Condensed Consolidated Financial Statements in Part I, Item 1, of this Quarterly Report on Form 10-Q is incorporated herein by reference.

ITEM 1A. RISK FACTORS

In addition to other information in this Form 10-Q, the following risk factors should be carefully considered in evaluating us and our business because these factors currently have a significant impact or may have a significant impact on our business, operating results or financial condition. Actual results could differ materially from those projected in the forward-looking statements contained in this Form 10-Q as a result of the risk factors discussed below and elsewhere in this Form 10-Q and in other filings we make with the SEC.

Risks relating to our business

Our operating results may fluctuate and our future revenues and profitability are uncertain.

Our operating results have varied in the past and may fluctuate significantly in the future as a result of a variety of factors, many of which are outside our control. These factors include the following:

- current global economic and financial conditions as well as their impact on e-commerce, financial services, and the communications and Internet industries;
- volume of new domain name registrations and renewals;
- the long sales and implementation cycles for, and potentially large order sizes of, some of our services and the timing and execution of individual customer contracts;
- our success in direct marketing and promotional campaigns and the impact of such campaigns on renewal rates;
 - in the case of our Registry Services business, any changes to the scope and success of marketing efforts by third-party registrars or their resellers;
- market acceptance of our services by our existing customers and by new customers;
 - customer renewal rates and turnover of customers of our services, and in the case of our Registry Services business, the customers of the distributors of our services;
- continued development of our distribution channels for our products and services, both in the U.S. and abroad;
- the impact of price changes in our products and services or our competitors' products and services;
- the impact of decisions by distributors to offer competing or replacement products or modify or cease their marketing practices;
- the availability of alternatives to our products;
- seasonal fluctuations in business activity;
- changes in marketing expenses related to promoting and distributing our services or services provided by third-party registrars or their resellers;
- potential attacks, including hacktivism, by nefarious actors, which could threaten the perceived reliability of our products and services;
- potential attacks on the service offerings of our distributors, such as distributed denial-of-service (“DDoS”) attacks, which could limit the availability of their service offerings and their ability to offer our products and services;
- changes in policies regarding Internet administration imposed by governments or governmental authorities outside the U.S.;
- potential disruptions in regional registration behaviors due to catastrophic natural events or armed conflict;
- changes in the level of spending for information technology-related products and services by our customers; and
- the uncertainties, costs and risks as a result of the sale of our Authentication Services business, including costs related to any retained liability related to existing and future claims or retained litigation.

Our operating expenses may increase. If an increase in our expenses is not accompanied by a corresponding increase in our revenues, our operating results will suffer, particularly as revenues from some of our services are recognized ratably over the term of the service, rather than immediately when the customer pays for them, unlike our sales and marketing expenditures, which are expensed in full when incurred.

Table of Contents

Due to all of the above factors, our revenues and operating results are difficult to forecast. Therefore, we believe that period-to-period comparisons of our operating results will not necessarily be meaningful and should not be relied upon as an indication of future performance. Also, operating results may fall below our expectations and the expectations of securities analysts or investors in one or more future periods. If this were to occur, the market price of our common stock would likely decline.

Our operating results may continue to be adversely affected as a result of unfavorable market, economic, social and political conditions.

An unstable global economic, social and political environment may have a negative impact on demand for our services, our business and our foreign operations, including the ongoing hostilities in the Middle East, natural disasters, the eurozone crisis and the U.S. economic environment. For example, recently the ongoing economic instability in Europe has limited the rate of growth of the domain name base and may continue to do so in the future.

In addition, the economic, social and political environment has or may negatively impact, among other things:

- our customers' continued growth and development of their businesses and our customers' ability to continue as going concerns or maintain their businesses, which could affect demand for our products and services;

- current and future demand for our services, including decreases as a result of reduced spending on information technology and communications by our customers;

- price competition for our products and services;

- the price of our common stock;

- our liquidity;

- our ability to service our debt, to obtain financing or assume new debt obligations;

- our ability to obtain payment for outstanding debts owed to us by our customers or other parties with whom we do business; and

- our ability to execute on any share repurchase plans.

In addition, to the extent that the economic, social and political environment impacts specific industry and geographic sectors in which many of our customers are concentrated, that may further negatively impact our business. If the market, economic, social and political conditions in the U.S. and globally do not improve, or if they further deteriorate, we may experience material adverse impacts on our business, operating results and financial position as a consequence of the above factors or otherwise.

Substantially all of our revenue is derived from our Registry Services business. Any refusal of the DOC to approve the renewal of the .com Registry Agreement would, and any limitations on our ability to raise prices or any reduction of the pricing terms previously proposed and approved by ICANN and the Board could, materially and adversely affect our business and results of operations.

Our Registry Services business, which derives most of its revenues from registration fees for domain names, generates substantially all of our revenue. If there is a disruption in the Registry Services business, including any disruption from changes in the domain name industry, changes in or challenges to our agreements with ICANN, including any changes resulting from legal challenges to these agreements, changes in our customers' or Internet users' preferences, a downturn in the economy or changes in technology related to the use of domain names, there may be a material adverse effect on our business and results of operations. In addition, a failure of the DOC to approve the renewal of the .com Registry Agreement prior to the expiration of its current term on November 30, 2012 could have a material adverse effect on our business.

As a result of communications beginning in October 2012 with the DOC, we have concluded that the DOC may not complete its review and approve the renewal of the .com Registry Agreement prior to its expiration on November 30, 2012, and that the DOC, together with the DOJ, is reviewing the .com Registry Agreement's pricing terms. Pursuant to the terms of the Cooperative Agreement, if the .com Registry Agreement is not approved by the DOC prior to its expiration, the DOC is required to agree to the extension of the .com Registry Agreement for six months, or such other reasonable period of time as the DOC and Verisign may mutually agree. In light of the foregoing, the .com Registry Agreement may not be renewed prior to its expiration, and we cannot predict the length of any extension. In addition, we cannot predict whether the .com Registry Agreement will be renewed or, if renewed, whether the renewal will be

on the terms previously proposed and approved by ICANN and the Board. Any refusal of the DOC to approve the renewal of the .com Registry Agreement would, and any limitations on our ability to raise prices or any reduction of the pricing terms previously proposed and approved by ICANN and the Board could, materially and adversely affect our business and results of operations. For additional information on the status of the renewal of the .com Registry Agreement and the DOC's review, see "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations-Overview-.com Registry Agreement Renewal Update."

Table of Contents

The operation of our business depends on numerous factors.

The successful operation of our business depends on numerous factors, many of which are not entirely under our control, including, but not limited to, the following:

- the use of the Internet and other IP networks, and the extent to which domain names and the DNS are used for e-commerce and communications;
- changes in Internet user behavior, Internet platforms, mobile devices and web-browsing patterns;
- growth in demand for our services;
- the competition for any of our services;
- the perceived security of e-commerce and communications over the Internet;
 - the perceived security of our services, technology, infrastructure and practices;
- the loss of customers through industry consolidation or customer decisions to deploy in-house or competitor technology and services;
- our continued ability to maintain our current, and enter into additional, strategic relationships;
- our ability to successfully market our services to new and existing distributors and customers;
- our success in attracting, integrating, training, retaining and motivating qualified personnel;
- our response to competitive developments;
- the successful introduction, and acceptance by our current or new customers, of new products and services, including our NIA Services;
- potential disruptions in regional registration behaviors due to catastrophic natural events and armed conflict;
- seasonal fluctuations in business activity;
- our ability to implement remedial actions in response to any attacks by nefarious actors; and
- the successful introduction of enhancements to our services to address new technologies and standards, alternatives to our products and services and changing market conditions.

Issues arising from our agreements with ICANN, the DOC and the GSA could harm our Registry Services business.

We are parties to agreements (i) with the DOC with respect to certain aspects of the DNS, (ii) with ICANN and the DOC as the exclusive registry of domain names within the .com gTLD and (iii) with ICANN with respect to being the exclusive registry for the .net and .name gTLDs.

We face risks arising from our agreements with ICANN and the DOC, including the following:

- the .com Registry Agreement may not renew when it expires in 2012, which could have a material adverse effect on our business. See “Item 1A. Risk Factors -- Substantially all of our revenue is derived from our Registry Services business. Any refusal of the DOC to approve the renewal of the .com Registry Agreement would, and any limitations on our ability to raise prices or any reduction of the pricing terms previously proposed and approved by ICANN and the Board could, materially and adversely affect our business and results of operations.”;
- ICANN could adopt or promote policies, procedures or programs that are unfavorable to us as the registry operator of the .com, .net and .name gTLDs, that are inconsistent with our current or future plans, or that affect our competitive position;
- under certain circumstances, ICANN could terminate one or more of our agreements to be the registry for the .com, .net or .name gTLDs and the DOC could refuse to grant its approval to the renewal of the .com Registry Agreement, which, in the case of the .com and .net Registry Agreements, could have a material adverse impact on our business;
- the DOC's or ICANN's interpretation of provisions of our agreements with either of them could differ from ours;
- under certain circumstances, the GSA could terminate our agreement to be the registry for the .gov gTLD, which could have a material adverse impact on how the Registry Services business is perceived; and
- our Registry Services business faces, and could continue to face, legal or other challenges resulting from our activities or the activities of registrars and registrants, and any adverse outcome from such matters could have a material adverse effect on our business.

In addition, under the .com, .net and .name Registry Agreements, as well as the Cooperative Agreement with the DOC, we are prohibited from holding a greater than 15% ownership interest in any ICANN accredited registrar. This prohibition on cross-ownership currently applies to all eighteen ICANN gTLDs, but does not apply to ccTLDs.

ICANN has adopted a proposal to allow the operators of new gTLDs to also own, be owned 100% by, or otherwise be affiliated with, a registrar. The impact of these changes to the distribution channel is uncertain but could have a material adverse effect on our business. In addition, ICANN has also adopted a procedure pursuant to which an operator of one of the existing eighteen ICANN gTLDs can apply to remove the cross-ownership restrictions with respect to new, but not existing gTLDs. If Verisign were to seek removal of the cross-ownership restriction with respect to new gTLDs, it is uncertain whether ICANN and/or the DOC approval would be obtained.

Table of Contents

Challenges to Internet administration could harm our Registry Services business.

Risks we face from challenges by third parties, including governmental authorities in the U.S. and other countries, to our role in the ongoing operation of the Internet include:

legal, regulatory or other challenges could be brought, including challenges to the agreements governing our relationship with the DOC or ICANN, or to the legal authority underlying the roles and actions of the DOC, ICANN or us;

the U.S. Congress could take action that is unfavorable to us;

ICANN could fail to maintain its role, potentially resulting in instability in DNS administration; and

some governments and governmental authorities outside the U.S. have in the past disagreed, and may in the future disagree, with the actions, policies or programs of ICANN, the U.S. Government and us relating to the DNS. The

Affirmation of Commitments established several multi-party review panels and contemplates a greater involvement by foreign governments and governmental authorities in the oversight and review of ICANN. These periodic review panels may take positions that are unfavorable to Verisign.

As a result of these and other risks, it may be difficult for us to introduce new services in our Registry Services business and we could also be subject to additional restrictions on how this business is conducted, which may not also apply to our competitors.

Our international operations subject our business to additional economic risks that could have an adverse impact on our revenues and business.

As of September 30, 2012, we had 143, or 13%, of our employees outside the U.S. Expansion into international markets has required and will continue to require significant management attention and resources. We may also need to tailor some of our services for a particular market and to enter into international distribution and operating relationships. We have limited experience in localizing our services and in developing international distribution or operating relationships. We may not succeed in expanding our services into new international markets or expand our presence in existing markets. Failure to do so could harm our business. Moreover, local laws and customs in many countries differ significantly from those in the U.S. In many foreign countries, particularly in those with developing economies, it is common for others to engage in business practices that are prohibited by our internal policies and procedures or U.S. law or regulations applicable to us. There can be no assurance that all of our employees, contractors and agents will not take actions in violation of such policies, procedures, laws and/or regulations.

Violations of laws, regulations or internal policies and procedures by our employees, contractors or agents could result in financial reporting problems, fines, penalties, or prohibition on the importation or exportation of our products and services and could have a material adverse effect on our business. In addition, we face risks inherent in doing business on an international basis, including, among others:

competition with foreign companies or other domestic companies entering the foreign markets in which we operate;

differing and uncertain regulatory requirements;

legal uncertainty regarding liability, enforcing our contracts and compliance with foreign laws;

tariffs and other trade barriers and restrictions;

difficulties in staffing and managing foreign operations;

longer sales and payment cycles;

problems in collecting accounts receivable;

currency fluctuations, as a small portion of our international revenues are not always denominated in U.S. dollars and

some of our costs are denominated in foreign currencies;

high costs associated with repatriating profits to the U.S.;

potential problems associated with adapting our services to technical conditions existing in different countries;

difficulty of verifying customer information;

political instability;

failure of foreign laws to protect our U.S. proprietary rights adequately;

more stringent privacy policies in some foreign countries;

additional vulnerability from terrorist groups targeting U.S. interests abroad;

seasonal reductions in business activity;

potentially conflicting or adverse tax consequences; and
reliance on third parties in foreign markets in which we only recently started doing business.
We are exposed to risks faced by financial institutions.

The hedging transactions we have entered into expose us to credit risk in the event of default by one of our counterparties. Despite the risk control measures we have in place, a default by one of our counterparties, or liquidity problems in the financial services industry in general, could have a material adverse effect on our business, financial condition

Table of Contents

and results of operations.

Our marketable securities portfolio could experience a decline in market value, which could materially and adversely affect our financial results.

As of September 30, 2012, we had \$1.5 billion in cash, cash equivalents, marketable securities and restricted cash, of which \$1.2 billion was invested in marketable securities. The marketable securities consist primarily of debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies meeting the criteria of our investment policy, which is focused on the preservation of our capital through the investment in investment grade securities. We currently do not use derivative financial instruments to adjust our investment portfolio risk or income profile.

These investments, as well as any cash deposited in bank accounts, are subject to general credit, liquidity, market and interest rate risks, which may be exacerbated by unusual events, such as the eurozone crisis and the U.S. debt ceiling crisis, which have affected various sectors of the financial markets and led to global credit and liquidity issues. Over the past several years, the volatility and disruption in the global credit market reached unprecedented levels. If the global credit market deteriorates further, our investment portfolio may be impacted and we could determine that some of our investments have experienced an other-than-temporary decline in fair value, requiring an impairment charge which could adversely impact our financial results.

Governmental regulation and the application of new and existing laws may slow business growth, increase our costs of doing business, create potential liability and have an adverse effect on our business.

Application of new and existing laws and regulations to the Internet and communications industry can be unclear. The costs of complying or failing to comply with these laws and regulations could limit our ability to operate in our current markets, expose us to compliance costs and substantial liability and result in costly and time-consuming litigation.

Foreign, federal or state laws could have an adverse impact on our business, financial condition, results of operations, and our ability to conduct business in certain foreign countries. For example, laws designed to restrict who can register domain names, the on-line distribution of certain materials deemed harmful to children, on-line gambling (especially as we consider providing NIA Services and Registry Services to this sector), counterfeit goods, and cybersquatting; laws designed to require registrants to provide additional documentation or information in connection with domain name registrations; and laws designed to promote cyber security may impose significant additional costs on our business or subject us to additional liabilities. We have contracts pursuant to which we provide services to the U.S. government and even though these contracts are immaterial, they impose compliance costs, including compliance with the Federal Acquisition Regulation, which could be significant to the Company.

Due to the nature of the Internet, it is possible that state or foreign governments might attempt to regulate Internet transmissions or prosecute us for violations of their laws. We might unintentionally violate such laws, such laws may be modified and new laws may be enacted in the future. Any such developments could increase the costs of regulatory compliance for us, affect our reputation, force us to change our business practices or otherwise materially harm our business. In addition, any such new laws could impede growth of or result in a decline in domain name registrations, as well as impact the demand for our services.

We rely on third parties who maintain and control root zone servers and route Internet communications.

We currently administer and operate only two of the thirteen root zone servers. The others are administered and operated by independent operators on a non-regulated basis. Root zone servers are name servers that contain authoritative data for the very top of the DNS hierarchy. These servers have the software and data needed to locate name servers that contain authoritative data for the top-level domains. These root zone servers are critical to the functioning of the Internet. Consequently, our Registry Services business could be harmed if these independent operators fail to maintain these servers properly or abandon these servers, which would place additional capacity demands on the two root zone servers we operate.

Further, our Registry Services business could be harmed if any of the independent operators fails to include or provide accessibility to the data that it maintains in the root zone servers that it controls, or presents inconsistent data for the top-level domains.

Changes in Internet user behavior, either as a result of evolving technologies or user practices, may impact the demand for domain names.

Currently, Internet users navigate to a website either by directly typing its domain name into a web browser or through the use of a search engine. If (i) web browser or Internet search technologies were to change significantly; (ii) Internet search engines changed the value of their algorithms on the use of a domain for finding a website; (iii) Internet users' preferences or

31

Table of Contents

practices were to shift away from direct navigation; (iv) Internet users were to increase the use of web and phone applications to locate and access content; or (v) Internet users were to increase the use of second or third level domains or alternate identifiers, such as social networking and microblogging sites, in each case the demand for domain names could decrease.

Changes in the level of spending on on-line advertising and/or the way that on-line networks compensate owners of websites could impact the demand for domain names.

Some domain name registrars and registrants seek to generate revenue through advertising on their websites; changes in the way these registrars and registrants are compensated (including changes in methodologies and metrics) by advertisers and advertisement placement networks, such as Google and Yahoo!, have, and may continue to, adversely affect the market for those domain names favored by such registrars and registrants which has resulted in, and may continue to result in, a decrease in demand and/or the renewal rate for those domain names. For example, according to published reports, Google has in the past (and may in the future) changed its search algorithm and pay-per-click advertising policies to provide less compensation for certain types of websites. This has made such websites less profitable which has resulted in, and may continue to result in, fewer domain registrations and renewals. In addition, as a result of the general economic environment, spending on on-line advertising and marketing may not increase as projected or may be reduced, which in turn, may result in a further decline in the demand for those domain names. Changes in state taxation laws and regulations may discourage the registration or renewal of domain names for e-commerce.

Many Internet merchants are not currently required to pay sales or other similar taxes in respect of shipments of goods into most states. However, state taxation laws and regulations may change in the future and one or more states may seek to impose sales tax collection obligations on out-of-state companies that engage in online commerce. The enactment of any such law in any state may impair the growth of e-commerce and discourage the registration or renewal of domain names for e-commerce.

Reduced marketing efforts or other operational changes among third party registrars or their resellers as a result of consolidation or changes in ownership, management, or strategy could harm our Registry Services business. Third-party registrars and their resellers utilize substantial marketing efforts to increase the demand and/or renewal rates for domain names. Consolidation in the registrar or reseller industry or changes in ownership, management, or strategy among individual registrars or resellers could result in significant changes to their business, operating model and cost structure. Such changes could include reduced marketing efforts or other operational changes that could adversely impact the demand and/or the renewal rates for domain names. Our Registry Services business, which generates substantially all of our revenue, derives most of its revenues from registrations and renewals of domain names, and decreased demand for and/or renewals of domain names could cause a material adverse effect on our business and results of operations.

Undetected or unknown defects in our services could harm our business and future operating results.

Services as complex as those we offer or develop could contain undetected defects or errors. Despite testing, defects or errors may occur in our existing or new services, which could result in compromised customer data, loss of or delay in revenues, loss of market share, failure to achieve market acceptance, diversion of development resources, injury to our reputation, tort or warranty claims, increased insurance costs or increased service and warranty costs, any of which could harm our business. The performance of our services could have unforeseen or unknown adverse effects on the networks over which they are delivered as well as on third-party applications and services that utilize our services, which could result in legal claims against us, harming our business. Furthermore, we often provide implementation, customization, consulting and other technical services in connection with the implementation and ongoing maintenance of our services, which typically involves working with sophisticated software, computing and communications systems. Our failure or inability to meet customer expectations in a timely manner could also result in loss of or delay in revenues, loss of market share, failure to achieve market acceptance, injury to our reputation and increased costs.

If we encounter system interruptions or failures, we could be exposed to liability and our reputation and business could suffer.

We depend on the uninterrupted operation of our various systems, secure data centers and other computer and communication networks. Our systems and operations are vulnerable to damage or interruption from:

- power loss, transmission cable cuts and other telecommunications failures;
- damage or interruption caused by fire, earthquake, and other natural disasters;
- attacks, including hacktivism, by hackers or nefarious actors;
- computer viruses or software defects;
- physical or electronic break-ins, sabotage, intentional acts of vandalism, terrorist attacks and other events beyond

Table of Contents

our control;

State suppression of Internet operations; and

any failure to implement effective and timely remedial actions in response to any damage or interruption.

Most of our systems are located at, and most of our customer information is stored in, our facilities in New Castle, Delaware; Dulles, Virginia; and Fribourg, Switzerland. To the extent we are unable to partially or completely switch over to primary alternate or tertiary sites, any damage or failure that causes interruptions in any of these facilities or our other computer and communications systems could materially harm our business. Although we carry insurance for property damage, we do not carry insurance or financial reserves for interruptions or potential losses arising from terrorism.

In addition, our Registry Services business and certain of our other services depend on the efficient operation of the Internet connections from customers to our secure data centers and from our customers to the Shared Registration System. These connections depend upon the efficient operation of Internet service providers and Internet backbone service providers, all of which have had periodic operational problems or experienced outages in the past beyond our scope of control.

A failure in the operation of our top-level domain name zone servers, the domain name root zone servers, or other events could result in the deletion of one or more domain names from the Internet for a period of time or a misdirection of a domain name to a different server. In the event that a registrar has not implemented back up services recommended by us in conformance with industry best practices, a failure in the operation of our Shared Registration System could result in the inability of one or more other registrars to register and maintain domain names for a period of time. A failure in the operation or update of the master database that we maintain could also result in the deletion of one or more top-level domains from the Internet and the discontinuation of second-level domain names in those top-level domains for a period of time or a misdirection of a domain name to a different server. Any of these problems or outages could decrease customer satisfaction, harming our business or resulting in adverse publicity that could adversely affect the market's perception of the security of e-commerce and communications over the Internet as well as of the security or reliability of our services.

In addition, a failure in our NIA Services could have a negative impact on our reputation and our business could suffer.

If we experience security breaches, we could be exposed to liability and our reputation and business could suffer.

We retain certain customer and employee information in our secure data centers and various registration systems. It is critical to our business strategy that our facilities and infrastructure remain secure and are perceived by the marketplace to be secure. The Company, as an operator of critical infrastructure, is frequently targeted and experiences a high rate of attacks. These include the most sophisticated form of attacks, such as advanced persistent threat ("APT") attacks and zero-hour threats, which means that the threat is not compiled or has been previously unobserved within our observation and threat indicators space until the moment it is launched, making these attacks virtually impossible to anticipate and difficult to defend against. The Shared Registration System, the domain name root zone servers and top-level domain name zone servers that we operate are critical hardware and software to our Registry Services operations. We expend significant time and money on the security of our facilities and infrastructure. Despite our security measures, our infrastructure may be vulnerable to physical break-ins, computer viruses, attacks by hackers or nefarious actors or similar disruptive problems, including hacktivism. It is possible that we may have to expend additional financial and other resources to address such problems. Any physical or electronic break-in or other security breach or compromise of the information stored at our secure data centers and domain name registration systems may jeopardize the security of information stored on our premises or in the computer systems and networks of our customers. In such an event, we could face significant liability, customers could be reluctant to use our services and we could be at risk for loss of various security and standards-based compliance certifications needed for certain of our businesses, all or any of which could adversely affect our reputation and harm our business. Such an occurrence could also result in adverse publicity and therefore adversely affect the market's perception of the security of e-commerce and communications over the Internet as well as of the security or reliability of our services.

Table of Contents

We rely on our intellectual property, and any failure by us to protect, or any misappropriation of, our intellectual property could harm our business.

Our success depends in part on our internally developed technologies and intellectual property. Despite our precautions, it may be possible for a third party to copy or otherwise obtain and use our trade secrets or other forms of our intellectual property without authorization. Furthermore, the laws of foreign countries may not protect our proprietary rights in those countries to the same extent U.S. law protects these rights in the U.S. In addition, it is possible that others may independently develop substantially equivalent intellectual property. If we do not effectively protect our intellectual property, our business could suffer. Additionally, we have filed patent applications with respect to certain of our technology in the U.S. Patent and Trademark Office and patent offices outside the U.S. Patents may not be awarded with respect to these applications and even if such patents are awarded, such patents may not provide us with sufficient protection of our intellectual property. In the future, we may have to resort to litigation to enforce our intellectual property rights, to protect our trade secrets or to determine the validity and scope of the proprietary rights of others. This type of litigation, regardless of its outcome, could result in substantial costs and diversion of management attention and technical resources.

We also license third-party technology that is used in our products and services to perform key functions. These third-party technology licenses may not continue to be available to us on commercially reasonable terms or at all. The loss of or our inability to obtain or maintain any of these technology licenses could harm our business.

We rely on the strength of our Verisign brand to help differentiate ourselves in the marketing of our products. Dilution of the strength of our brand could harm our business. We are at risk that we will be unable to register, build equity in, or enforce the new logo for the Company.

We could become subject to claims of infringement of intellectual property of others, which could be costly to defend and could harm our business.

Claims relating to infringement of intellectual property of others or other similar claims have been made against us in the past and could be made against us in the future. It is possible that we could become subject to additional claims for infringement of the intellectual property of third parties. The international use of the Company's logo could present additional potential risks for third party claims of infringement. Any claims, with or without merit, could be time consuming, result in costly litigation and diversion of technical and management personnel attention, cause delays in our business activities generally, or require us to develop a non-infringing logo or technology or enter into royalty or licensing agreements. Royalty or licensing agreements, if required, may not be available on acceptable terms or at all. If a successful claim of infringement was made against us, we could be required to pay damages or have portions of our business enjoined. If we could not identify and adopt an alternative non-infringing logo, develop non-infringing technology or license the infringed or similar technology on a timely and cost-effective basis, our business could be harmed.

A third party could claim that the technology we license from other parties infringes a patent or other proprietary right. Litigation between the licensor and a third-party or between us and a third-party could lead to royalty obligations for which we are not indemnified or for which indemnification is insufficient, or we may not be able to obtain any additional license on commercially reasonable terms or at all.

In addition, legal standards relating to the validity, enforceability, and scope of protection of intellectual property rights in Internet-related businesses are uncertain and still evolving. Because of the growth of the Internet and Internet-related businesses, patent applications are continuously being filed in connection with Internet-related technology. There are a significant number of U.S. and foreign patents and patent applications in our areas of interest, and we believe that there has been, and is likely to continue to be, significant litigation in the industry regarding patent and other intellectual property rights.

We could become involved in claims, lawsuits or investigations that may result in adverse outcomes.

In addition to possible intellectual property litigation and infringement claims, we may become involved in other claims, lawsuits and investigations. Such proceedings may initially be viewed as immaterial but could prove to be material. Litigation is inherently unpredictable, and excessive verdicts do occur. Adverse outcomes in lawsuits and investigations could result in significant monetary damages, including indemnification payments, or injunctive relief

that could adversely affect our ability to conduct our business and may have a material adverse effect on our financial condition and results of operations. Given the inherent uncertainties in litigation, even when we are able to reasonably estimate the amount of possible loss or range of loss and therefore record an aggregate litigation accrual for probable and reasonably estimable loss contingencies, the accrual may change in the future due to new developments or changes in approach. In addition, such investigations, claims and lawsuits could involve significant expense and diversion of management's attention and resources from other matters.

Table of Contents

We must establish and maintain strategic, channel and other relationships.

One of our significant business strategies has been to enter into strategic or other similar collaborative relationships in order to reach a larger customer base than we could reach through our direct sales and marketing efforts, including in international markets. We may need to enter into additional relationships to execute our business plan. We may not be able to enter into additional, or maintain our existing, strategic relationships on commercially reasonable terms. If we fail to enter into additional relationships, we would have to devote substantially more resources to the distribution, sale and marketing of our services than we would otherwise.

Our success in obtaining results from these relationships will depend both on the ultimate success of the other parties to these relationships and on the ability of these parties to market our services successfully.

Furthermore, any changes by our distributors to their existing marketing strategies could have a material adverse effect on our business. Similarly, if one or more of our distributors were to encounter financial difficulties, or if there were a significant reduction in marketing expenditures by our distributors (including registrars or their resellers), as a result of industry consolidation or otherwise, it could have a material adverse effect on our business, including a decrease in domain name registrations and renewals. Failure of one or more of our strategic, channel or other relationships to result in the development and maintenance of a market for our services could harm our business. If we are unable to maintain our existing relationships or to enter into additional relationships, this could harm our business.

The success of our NIA Services depends in part on the acceptance of our services.

We are investing in our NIA Services, and the future growth of these services depends, in part, on the commercial success, acceptance, and reliability of our NIA Services. These services will suffer if our target customers do not adopt or use these services. We are not certain that our target customers will choose our NIA Services or continue to use these services even after adoption.

We rely on third parties to provide products which are incorporated in our NIA Services.

The NIA Services incorporate and rely on third party hardware and software products, many of which have unique capabilities. If Verisign was unable to procure these third party products, the NIA Services may malfunction, not perform as well as they should perform, not perform as well as they have been performing or not perform as planned, and our business could suffer.

Many of our target markets are evolving, and if these markets fail to develop or if our products and services are not widely accepted in these markets, our business could be harmed.

Our Registry Services and NIA Services businesses are developing services in emerging markets, including services that involve naming and directory services other than registry and related infrastructure services. These emerging markets are rapidly evolving, may never gain wide acceptance and may not grow. Even if these markets grow, our services may not be widely accepted. Accordingly, the demand for our services in these markets is very uncertain. The factors that may affect market acceptance of our services in these markets include the following:

- market acceptance of products and services based upon technologies other than those we use;
- public perception of the security of our technologies and of IP and other networks;
- the introduction and consumer acceptance of new generations of mobile devices;
- the ability of the Internet infrastructure to accommodate increased levels of usage; and
- government regulations affecting Internet access and availability, e-commerce and telecommunications over the Internet.

If the market for e-commerce and communications over IP and other networks does not grow or these services are not widely accepted in the market, our business could be materially harmed.

We have anti-takeover protections that may discourage, delay or prevent a change in control that could benefit our stockholders.

Our amended and restated Certificate of Incorporation and Bylaws contain provisions that could make it more difficult for a third party to acquire us without the consent of our Board of Directors (“Board”). These provisions include:

- our stockholders may take action only at a duly called meeting and not by written consent;

-

special meetings of our stockholders may be called only by the chief executive officer, the president or our Board, and cannot be called by our stockholders;

- our Board must be given advance notice regarding stockholder-sponsored proposals for consideration at annual meetings and for stockholder nominations for the election of directors;
- vacancies on our Board can be filled until the next annual meeting of stockholders by majority vote of the members of the Corporate Governance and Nominating Committee, or a majority of directors then in office if no such

Table of Contents

committee exists, or a sole remaining director; and

our Board has the ability to designate the terms of and issue new series of preferred stock without stockholder approval.

In addition, Section 203 of the General Corporation Law of Delaware prohibits a publicly held Delaware corporation from engaging in a business combination with an interested stockholder, generally a person which together with its affiliates owns or within the last three years has owned 15% or more of our voting stock, for a period of three years after the date of the transaction in which the person became an interested stockholder, unless in the same transaction the interested stockholder acquired 85% ownership of our voting stock (excluding certain shares) or the business combination is approved in a prescribed manner. Section 203 therefore may impact the ability of an acquirer to complete an acquisition of us after a successful tender offer and accordingly could discourage, delay or prevent an acquirer from making an unsolicited offer without the approval of our Board.

Changes in, or interpretations of, tax rules and regulations may adversely affect our effective tax rates.

We are subject to income taxes in both the U.S. and numerous foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. We are subject to audit by various tax authorities. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different than that which is reflected in historical income tax provisions and accruals. Should additional taxes be assessed as a result of an audit or litigation, an adverse effect on our income tax provision and net income in the period or periods for which that determination is made could result.

A significant portion of our foreign earnings for the current fiscal year were earned by our Swiss subsidiaries. Our effective tax rate could fluctuate significantly on a quarterly basis and could be adversely affected to the extent earnings are lower than anticipated in countries where we have lower statutory rates and higher than anticipated in countries where we have higher statutory rates.

Various legislative proposals that would reform U.S. corporate tax laws have been proposed by the Obama administration as well as members of Congress, including proposals that would significantly impact how U.S. multinational corporations are taxed on foreign earnings. We are unable to predict whether these or other proposals will be implemented. Although we cannot predict whether or in what form any proposed legislation may pass, if enacted, such legislation could have a material adverse impact on our tax expense or cash flow.

Our inability to indefinitely reinvest our foreign earnings could materially adversely affect our results of operations. Deferred income taxes are not provided on most of the undistributed earnings of our foreign subsidiaries because these earnings are intended to be indefinitely reinvested and we do not plan to initiate any action that would precipitate the payment of income taxes thereon. We consider the following matters, among others, in evaluating our plans for indefinite reinvestment: the forecasts, budgets and financial requirements of the parent and subsidiaries for both the long and short term; the tax consequences of a decision to reinvest; and any U.S. and foreign government programs designed to influence remittances. If factors change and as a result we are unable to indefinitely reinvest the foreign earnings, the income tax expense and payments may differ significantly from the current period and could materially adversely affect our results of operations.

We are subject to the risks of owning real property.

We own the land and building in Reston, Virginia, which constitutes our headquarters facility. Ownership of this property, as well as our data centers in Sterling, Virginia and New Castle, Delaware, may subject us to risks, including:

- adverse changes in the value of the properties, due to interest rate changes, changes in the commercial property markets, or other factors;

- ongoing maintenance expenses and costs of improvements;

- the possible need for structural improvements in order to comply with zoning, seismic, disability law, or other requirements;

- the possibility of environmental contamination and the costs associated with fixing any environmental problems; and
- possible disputes with neighboring owners, service providers or others.

Table of Contents

Risks relating to the competitive environment in which we operate

The business environment is highly competitive and, if we do not compete effectively, we may suffer price reductions, reduced gross margins and loss of market share.

General: New technologies and the expansion of existing technologies may increase competitive pressure. We cannot assure that competing technologies developed by others or the emergence of new industry standards will not adversely affect our competitive position or render our services or technologies noncompetitive or obsolete. In addition, our markets are characterized by announcements of collaborative relationships involving our competitors. The existence or announcement of any such relationships could adversely affect our ability to attract and retain customers. As a result of the foregoing and other factors, we may not be able to compete effectively with current or future competitors, and competitive pressures that we face could materially harm our business.

Competition in Registry Services: We face competition in the domain name registry space from other gTLD and ccTLD registries that are competing for the business of entities and individuals that are seeking to establish a Web presence, including registries offering services related to the .info, .org, .mobi, .biz, .pro, .aero, .museum, .coop and .xxx gTLDs and registries offering services related to ccTLDs. ICANN currently has registry agreements with 16 registries for the operation of 18 gTLDs. In addition, there are over 250 Latin script ccTLD registries and 38 IDN ccTLD registries. Furthermore, under our agreements with ICANN, we are subject to certain restrictions in the operation of .com, .net and .name on pricing, bundling, methods of distribution and use of registrars that do not apply to ccTLDs and therefore may create a competitive disadvantage. If other registries launch marketing campaigns for new or existing TLDs, including forms of marketing campaigns that we are prohibited from running under the terms of our agreements with ICANN, which result in registrars or their resellers giving other TLDs greater prominence on their websites, advertising or marketing materials, we could be at a competitive disadvantage and our business could suffer.

We also face competition from service providers that offer outsourced domain name registration, resolution and other DNS services to organizations that require a reliable and scalable infrastructure. Among the competitors are Neustar Inc., Afiliat Limited, ARI Registry Services and Nominet UK, Inc. In addition, to the extent end-users navigate using search engines or social media, as opposed to direct navigation, we may face competition from search engine operators such as Google Inc., Microsoft Corporation, and Yahoo! Inc., operators of social networks such as Facebook, and operators of microblogging tools such as Twitter. Furthermore, to the extent end-users increase the use of web and phone applications to locate and access content, we may face competition from providers of such web and mobile applications.

Competition in Network Intelligence and Availability Services: Several of our current and potential competitors have longer operating histories and/or significantly greater financial, technical, marketing and other resources than we do and therefore may be able to respond more quickly than we can to new or changing opportunities, technologies, standards and customer requirements. Many of these competitors also have broader and more established distribution channels that may be used to deliver competing products or services directly to customers through bundling or other means. If such competitors were to bundle competing products or services for their customers, we may experience difficulty establishing or increasing demand for our products and services or distributing our products successfully. We face competition in the network intelligence and availability services industry from companies or services such as iSight Partners, Security Services X-Force Threat Analysis Service, Secunia ApS, Dell SecureWorks, McAfee, Inc., Prolexic Technologies, Inc., AT&T Inc., Verizon Communications, Inc., Dyn, Inc.'s Dynect Platform, NeuStar Ultra Services, OpenDNS, BlueCat Networks, Inc., Infoblox Inc., Nominum, Inc. and Afiliat Limited.

We may face additional competition, operational and other risks from the introduction of new TLDs by ICANN, which could have a material adverse effect on our business and results of operations.

Additional competition to our business may arise from the introduction of new TLDs by ICANN. ICANN announced the introduction of new gTLDs, which include IDN gTLDs. On October 30, 2009, ICANN approved a fast track process for the awarding of new IDN ccTLDs and such new IDN ccTLDs have started to be introduced into the root. On June 13, 2012, ICANN announced it received 1930 applications to operate over 1400 new gTLDs, with new registration opportunities expected to be available beginning in 2013. We do not yet know the impact, if any, that these new domain extensions may have on our business, including if or how the introduction of these new gTLDs will

affect registrations for .com and .net and therefore have a material adverse effect on our business and results of operations.

Applicants for new gTLDs include companies which may have greater financial, marketing and other resources than we do, including companies that are existing competitors as well as domain name registrars and new entrants into the domain name industry. Furthermore, ICANN will allow the operators of new gTLDs to also own, be owned 100% by or otherwise affiliated with a registrar, whereas we are currently prohibited by our agreements with ICANN and the DOC from owning

Table of Contents

more than 15% of a registrar. As a result, operators of new gTLDs may be able to obtain competitive advantages through such vertical integration. ICANN has also approved a process pursuant to which an operator of an existing gTLD could apply to become a registrar with respect to a new gTLD; however, it is uncertain whether ICANN and/or the DOC would approve the necessary changes to Verisign's existing agreements to allow us to vertically integrate with respect to new gTLDs, in which case, we may be at a competitive disadvantage.

We have applied for 14 gTLDs, including 12 IDN gTLDs. There is no certainty that we will ultimately be successful, and even if we are successful in obtaining one or more of these new domain extensions, there is no guarantee that such extensions will be any more successful than the domain name extensions obtained by our competitors. Similarly, while we have entered into agreements to provide back-end registry services to other applicants for approximately 220 new gTLDs, there is no guarantee that such applicants with which we have entered into agreements will be successful in obtaining one or more of these new domain extensions or that such domain extensions will be successful.

Furthermore, ICANN has stated that it will need to limit the maximum number of new gTLDs that may be delegated in a year to 1,000. ICANN has proposed a random drawing method, which is currently in a comment period prior to approval, to order and meter applicants through the process. Accordingly, based on the drawing and other factors of the application process, availability of domain name registrations for approved new gTLDs applied for by Verisign or Verisign's customers, both direct and indirect, and the timing of revenue generation, if any, from these gTLDs is uncertain.

In addition, our agreements to provide back-end registry services directly to other applicants and indirectly through reseller relationships expose us to operational and other risks. For, example, the increase in the number of gTLDs for which we provide registry services on a standalone basis or as a back-end service provider could further increase costs or increase the frequency or scope of targeted attacks from nefarious actors. Finally, IDN TLDs face additional challenges in that current desktop software does not ubiquitously recognize IDN TLDs and may be slow to adopt standards even if demand for such products is strong.

Our inability to react to changes in our industry and successfully introduce new products and services could harm our business.

The Internet and communications network services industries are characterized by rapid technological change and frequent new product and service announcements which require us continually to improve the performance, features and reliability of our services, particularly in response to competitive offerings or alternatives to our products and services. In order to remain competitive and retain our market share, we must continually improve our access technology and software, support the latest transmission technologies, and adapt our products and services to changing market conditions and our customers' and Internet users' preferences and practices, or launch entirely new products and services in anticipation of, or in response to, market trends. We cannot assure that we will be able to adapt to these challenges or anticipate or respond successfully or in a cost effective way to adequately meet them. Our failure to do so would adversely affect our ability to compete and retain customers or market share.

Risks related to the sale of our Authentication Services business and the completion of our divestitures

We face risks related to the terms of the sale of the Authentication Services business.

Under the agreement reached with Symantec for the sale of our Authentication Services business (the "Symantec Agreement"), we agreed to several terms that may pose risks to us, including the potential for confusion by the public with respect to Symantec's right to use certain of our trademarks, brands and domain names, as well as the risk that current or potential investors in or customers of the Company may incorrectly attribute to the Company problems with Symantec products or services that currently use the VERISIGN brand pursuant to a license granted by the Company to Symantec. Any such confusion may have a negative impact on our reputation, our brand and the market for our products and services. In addition, we may determine that certain assets transferred to Symantec could have been useful in our Naming Services businesses or in other future endeavors, requiring us to forego future opportunities or design or purchase alternatives which could be costly and less effective than the transferred assets. Further, we may not be able to achieve the full strategic and financial benefits we expect from the sale of our Authentication Services business.

Under the terms of the Symantec Agreement, we have licensed rights to certain of our domain name registrations to Symantec. We are at risk that our customers will go to a URL for a licensed domain name and be unable to locate our

Registry or NIA Services. In addition, we will continue to maintain the registration rights for the domain names licensed to Symantec for which Symantec has sole control over the displayed content, and we may be subject to claims of infringement if Symantec posts content that is alleged to infringe the rights of a third party.

Table of Contents

We continue to be responsible for certain liabilities following the divestiture of certain businesses.

Under the agreements reached with the buyers of certain divested businesses, including the Authentication Services business, we remain liable for certain liabilities related to the divested businesses. There is a possibility that we will incur unanticipated costs and expenses associated with management of liabilities relating to the businesses we have divested, including requests for indemnification by the buyers of the divested businesses. These liabilities could potentially relate to (i) breaches of contractual representations and warranties we gave to the buyers of the divested businesses, or (ii) certain liabilities relating to the divested businesses that we retained under the agreements reached with the buyers of the divested businesses. Such liabilities could include certain litigation matters, including actions brought by third parties. Where responsibility for such liabilities is to be contractually allocated to the buyer or shared with the buyer or another party, it is possible that the buyer or the other party may be in default for payments for which they are responsible, obligating us to pay amounts in excess of our agreed-upon share of those obligations.

Following the divestiture of certain businesses, our ability to compete in certain market sectors is restricted.

Under the agreements reached with buyers for certain businesses we divested, including the Authentication Services business, we are restricted from competing, either directly or indirectly, with those businesses or from entering certain market sectors for a defined period of time pursuant to negotiated non-compete arrangements.

Risks related to our securities

We have a considerable number of common shares subject to future issuance.

As of September 30, 2012, we had one billion authorized common shares, of which 155.5 million shares were outstanding. In addition, of our authorized common shares, 18.1 million common shares were reserved for issuance pursuant to outstanding equity and employee stock purchase plans (“Equity Plans”), and 36.4 million shares were reserved for issuance upon conversion of the 3.25% junior subordinated convertible debentures due 2037 (the “Convertible Debentures”). As a result, we keep substantial amounts of our common stock available for issuance upon exercise or settlement of equity awards outstanding under our Equity Plans and/or the conversion of Convertible Debentures into our common stock. Issuance of all or a large portion of such shares would be dilutive to existing security holders, could adversely affect the prevailing market price of our common stock and could impair our ability to raise additional capital through the sale of equity securities.

Our financial condition and results of operations could be adversely affected if we do not effectively manage our liabilities.

As a result of the sale of the Convertible Debentures, we have a substantial amount of long-term debt outstanding. In addition to the Convertible Debentures, we have a Facility with a borrowing capacity of \$200.0 million. As of September 30, 2012, we had borrowed \$100.0 million under the Facility. The availability of borrowing capacity under the Facility allows us immediate access to working capital if we identify opportunities for the use of this cash. Our maintenance of substantial levels of debt could adversely affect our flexibility to take advantage of corporate opportunities. The Facility is described in Note 7, “Debt and Interest Expense,” of the Notes to Consolidated Financial Statements of our 2011 Form 10-K.

We may not have the ability to repurchase the Convertible Debentures in cash upon the occurrence of a fundamental change, or to pay cash upon the conversion of Convertible Debentures.

As a result of the sale of the Convertible Debentures, we have a substantial amount of debt outstanding. Holders of our outstanding Convertible Debentures will have the right to require us to repurchase the Convertible Debentures upon the occurrence of a fundamental change as defined in the Indenture dated as of August 20, 2007 (the “Indenture”) between the Company and U.S. Bank National Association, as Trustee. Although, in certain situations, the indenture requires us to pay this repurchase price in cash, we may not have sufficient funds to repurchase the Convertible Debentures in cash or have the ability to arrange necessary financing on acceptable terms or at all.

Our Convertible Debentures are convertible at the option of each holder during the three months ending December 31, 2012, as our common stock price exceeded the Conversion Price Threshold Trigger during the three months ended September 30, 2012. Accordingly we reclassified the carrying value of the debt component of the Convertible Debentures, the related embedded derivative, and deferred tax liabilities from long-term liabilities to current liabilities, and the associated unamortized debt issuance costs from long-term assets to current assets. If the Convertible Debentures become non-convertible at the end of any future fiscal period, the carrying value of the debt component of

the Convertible Debentures, the related embedded derivative, and deferred tax liabilities will have to be reclassified back to long-term liabilities, and the associated unamortized debt issuance costs will have to be reclassified back to long-term assets.

Table of Contents

If holders elect to convert their Convertible Debentures, we are permitted under the Indenture to pursue an exchange in lieu of conversion or to settle the conversion value (as defined in the Indenture) in cash, stock, or a combination thereof. We currently have the intent and the ability (based on current facts and circumstances) to settle the principal amount of the Convertible Debentures in cash. However, if the principal amount of the Convertible Debentures that holders actually elect to convert exceeds our cash on hand and cash from operations, we will need to draw cash from existing financing or pursue additional sources of financing to settle the Convertible Debentures in cash. We cannot provide any assurances that we will be able to obtain new sources of financing on terms acceptable to us or at all, nor can we assure that we will be able to obtain such financing in time to settle the Convertible Debentures that holders elect to convert.

If we do not have adequate cash available, either from cash on hand, funds generated from operations or existing financing arrangements, or cannot obtain additional financing arrangements, we will not be able to settle the principal amount of the Convertible Debentures in cash and will be required to settle the principal amount of the Convertible Debentures in stock. If any portion of the Convertible Debentures is settled in stock, it will result in immediate dilution to the interests of existing security holders and the dilution could be material to such security holders.

If our intent to settle the principal amount in cash changes, or if we conclude that we no longer have the ability, in the future, we will be required to change our accounting policy for earnings per share from the treasury stock method to the if-converted method. Earnings per share will most likely be lower under the if converted method as compared to the treasury stock method.

If the amount paid (in cash or stock) to settle the Convertible Debentures is less than the adjusted issue price, under the Internal Revenue Code and the regulations thereunder, the difference is included in taxable income as recapture of previous interest deductions. The adjusted issue price grows over the term of the Convertible Debentures due to the difference between the interest deduction for tax, using a comparable yield rate of 8.5%, and the coupon rate of 3.25%, compounded annually. The settlement amount will vary based on the stock price at settlement date. Depending on the conversion value of the Convertible Debentures at the settlement date, the amount included in taxable income as a result of this recapture could be substantial, which could adversely impact our cash flow.

A fundamental change may constitute an event of default or prepayment under, or result in the acceleration of the maturity of, our then-existing indebtedness. Our ability to repurchase the Convertible Debentures in cash or make any other required payments may be limited by law or the terms of other agreements relating to our indebtedness outstanding at the time. Our failure to repurchase the Convertible Debentures when required would result in an event of default with respect to the Convertible Debentures.

Table of Contents

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table presents the share repurchase activity during the three months ended September 30, 2012:

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (1)
	(Shares in thousands)			
July 1 – 31, 2012	464	\$43.12	464	\$666.9 million
August 1 – 31, 2012	615	46.99	615	638.0 million
September 1 – 30, 2012	580	\$47.72	580	\$610.3 million
	1,659		1,659	

On July 27, 2010, the Board of Directors authorized the repurchase of up to approximately \$1.1 billion of Verisign's common stock, in addition to the \$393.6 million of its common stock remaining available for repurchase under the previous 2008 Share Buyback Program, for a total repurchase of up to \$1.5 billion of its common stock (collectively, the "2010 Share Buyback Program"). The 2010 Share Buyback Program has no expiration date. Purchases made under the 2010 Share Buyback Program could be effected through open market transactions, block purchases, accelerated share repurchase agreements or other negotiated transactions.
