THE COMPANY

Citigroup Inc. (Citigroup and, together with its subsidiaries, the Company) is a global diversified financial services holding company whose businesses provide a broad range of financial services to consumer and corporate customers. Citigroup has more than 200 million customer accounts and does business in more than 100 countries. Citigroup was incorporated in 1988 under the laws of the State of Delaware.

The Company is a bank holding company within the meaning of the U.S. Bank Holding Company Act of 1956 registered with, and subject to examination by, the Board of Governors of the Federal Reserve System (FRB). Some of the Company's subsidiaries are subject to supervision and examination by their respective federal and state authorities.

This quarterly report on Form 10-Q should be read in conjunction with Citigroup's 2007 Annual Report on Form 10-K and Citigroup's Quarterly Report on Form 10-Q for the quarter ended March 31, 2008. Additional financial, statistical, and business-related information, as well as business and segment trends, is included in a Financial Supplement that was filed as Exhibit 99.2 to the Company's Current Report on Form 8-K, filed with the Securities and Exchange Commission (SEC) on July 18, 2008.

The principal executive offices of the Company are located at 399 Park Avenue, New York, New York 10043, telephone number 212 559 1000. Additional information about Citigroup is available on the Company's Web site at www.citigroup.com. Citigroup's annual report on Form 10-K, its quarterly reports on Form 10-Q, its current reports on Form 8-K, and all amendments to these reports, are available free of charge through the Company's Web site by clicking on the "Investor Relations" page and selecting "All SEC Filings." The SEC Web site contains reports, proxy and information statements, and other information regarding the Company at www.sec.gov.

Citigroup is managed along the following segment and regional lines:

The following are the four regions in which Citigroup operates. The regional results are fully reflected in the segment results.

(1) *Asia* includes Japan, *Latin America* includes Mexico, and *North America* includes U.S., Canada and Puerto Rico.

- (1) Discontinued operations include the operations and associated loss on the sale of CitiCapital's equipment finance unit to General Electric. See Note 2 to the consolidated financial statements on page 80.
- (2) Due to the net loss in the 2008 periods, basic shares were used to calculate diluted earnings per share. Adding diluted securities to the denominator would result in anti-dilution.
- (3) The return on average common stockholders' equity is calculated using net income (loss) minus preferred stock dividends.
- (4) Tier 1 Capital divided by adjusted average assets.
- (5) Dividends declared per common share as a percentage of net income per diluted share. For the first half of 2008, the dividend payout ratio was not calculable due to the net loss.

NM Not meaningful.

Edgar Filing: CITIGROUP INC - Form 10-Q

Certain reclassifications have been made to the prior-period's financial statements to conform to the current period's presentation.

Certain statements in this Form 10-Q, including, but not limited to, statements made in "Management's Discussion and Analysis," are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on management's current expectations and are subject to uncertainty and changes in circumstances. Actual results may differ materially from those included in these statements due to a variety of factors including, but not limited to, those described in Citigroup's 2007 Annual Report on Form 10-K under "Risk Factors" beginning on page 38.

MANAGEMENT'S DISCUSSION AND ANALYSIS

SECOND QUARTER OF 2008 MANAGEMENT SUMMARY

Citigroup reported a \$2.2 billion loss from continuing operations (\$0.49 per share) for the second quarter of 2008. The second quarter results showed solid underlying revenue and expense performance but were more than offset by write-downs and losses related to the continued disruption in the fixed income markets and higher consumer credit costs. The net loss of \$2.5 billion in the second quarter includes the results of CitiCapital (which is now reflected as discontinued operations, including the \$309 million estimated after-tax loss on sale).

Revenues were \$18.7 billion, down 29% from a year ago, primarily as a result of a \$7.3 billion decrease in Securities & Banking revenues, including \$3.4 billion in write-downs on subprime-related direct exposures, a downward credit value adjustment of \$2.4 billion related to exposure to monoline insurers, \$545 million write-downs related to commercial real estate positions, and write-downs of \$428 million (net of underwriting fees) on funded and unfunded highly leveraged financing commitments and \$325 million impairment on Alt-A mortgage securities.

Global Cards revenues were up 3% on double-digit growth in *EMEA*, *Latin America* and *Asia*, partially offset by lower securitization results in *North America*. Consumer Banking revenues were up 1%, where loan and deposit growth were partially offset by a \$745 million net loss from the mark-to-market on our mortgage servicing right (MSR) asset and related hedge. GWM revenues grew 4% on strength in banking and lending revenues which were partially offset by a slowdown in capital markets, particularly in *Asia*. Transaction Services revenues were up 30%. Total revenues improved \$5.6 billion from the first quarter of 2008.

Customer volume growth was strong, with average loans up 9%, average deposits up 6%, and average interest-earning assets down 5%, reflecting our focus on balance sheet management. Global Cards purchase sales were up 6%. Transaction Services customer liability balances were up 15% and assets under custody grew 13%. In GWM, client assets under fee-based management were down 8%.

Net interest revenue increased 26% from last year, reflecting volume increases across most products. Net interest margin (NIM) in the second quarter of 2008 was 3.18%, up 77 basis points from the second quarter of 2007, reflecting significantly lower cost of funding, partially offset by a decrease in asset yields related to the decrease in the fed funds rate. (See discussion of NIM on page 39).

Operating expenses increased 9% from the second quarter of 2007. The major components of the change are the \$446 million in repositioning charges and the absence of a \$300 million litigation reserve release recorded in the prior-year period. Expense growth also reflected the impact of recent acquisitions. Expenses were down 1% from the first quarter of 2008 and headcount was down 6,000 from March 31, 2008, and approximately 11,000 year-to-date reflecting the continued benefits from our re-engineering efforts.

Total credit costs of \$6.9 billion included NCL's of \$4.4 billion up from \$2.0 billion in the second quarter of 2007 and a net build of \$2.5 billion to its credit reserves. The build consisted of \$2.3 billion in Consumer (\$1.9 billion in *North America* and \$409 million in regions outside of *North America*) and \$224 million in ICG. The incremental net charge to increase loan loss reserves of \$2.0 billion was mainly due to residential real estate in *North America*. The Consumer loans loss rate was 2.82%, a 122 basis-point increase from the second quarter of 2007. Corporate cash-basis loans were \$2.3 billion at June 30, 2008, an increase of \$1.7 billion from year-ago levels. The total allowance for loan losses and unfunded lending commitments totaled \$21.9 billion at June 30, 2008.

The effective tax rate of 52% in the second quarter of 2008 primarily resulted from the pretax losses in the Company's S&B business taxed in the U.S. (the U.S. is a higher tax rate jurisdiction). In addition, the tax benefits of permanent differences, including the tax benefit for not providing U.S. income taxes on the earnings of certain foreign subsidiaries that are indefinitely invested, favorably affected the Company's effective tax rate.

Stockholders' equity and trust preferred securities were \$160.1 billion at June 30, 2008, reflecting common and preferred stock issuances of \$13.0 billion during the second quarter of 2008. We distributed \$2.1 billion in dividends to shareholders during the quarter. Citigroup maintained its "well-capitalized" position with a Tier 1 Capital Ratio of 8.74% at June 30, 2008.

On July 11, 2008, we announced the agreement to sell our German retail banking operation, which is expected to result in an estimated after-tax gain of approximately \$4 billion in the fourth quarter of 2008. This is expected to result in a pro forma increase to the June 30, 2008 Tier 1 Capital ratio of approximately 60 basis points.

EVENTS IN 2008

Additional Write-Downs on Subprime-Related Direct Exposures

During the second quarter of 2008, the Company's S&B business recorded losses of \$3.4 billion pretax, net of hedges, on its subprime-related direct exposures, bringing the total losses year-to-date to \$9.3 billion. The Company's remaining \$22.5 billion in U.S. subprime net direct exposure in S&B at June 30, 2008 consisted of (a) approximately \$18.1 billion of net exposures to the super senior tranches of collateralized debt obligations, which are collateralized by asset-backed securities, derivatives on asset-backed securities or both and (b) approximately \$4.3 billion of subprime-related exposures in its lending and structuring business. See "Exposure to U.S. Residential Real Estate" on page 30 for a further discussion of such exposures and the associated losses recorded during the second quarter of 2008.

Incremental Write-Downs on Highly Leveraged Loans and Financing Commitments

Due to the continued dislocation of the credit markets and the reduced market interest in higher risk/higher yield instruments that began during the second half of 2007, liquidity in the market for highly leveraged financings has yet to return. This has resulted in the Company recording additional pretax write-downs of \$428 million on funded and unfunded highly leveraged finance exposures, bringing year-to-date pretax losses to \$3.5 billion.

Citigroup's exposure to highly leveraged financings totaled \$24 billion at June 30, 2008 (\$11 billion in funded and \$13 billion in unfunded commitments), compared to \$38 billion at March 31, 2008 (\$21 billion in funded and \$17 billion in unfunded commitments). During the second quarter of 2008, the Company transferred approximately \$12 billion of loans to third parties, of which \$8.5 billion relates to the highly leveraged loans and commitments. This allows Citigroup to lock in the sales proceeds and significantly reduces further downside price risk associated with these commitments. See "Highly Leveraged Financing Commitments" on page 66 for further discussion.

Write-Downs on Monoline Insurers

During the second quarter of 2008, Citigroup recorded pretax write-downs on credit value adjustments (CVA) of \$2.4 billion on its exposure to monoline insurers, bringing the year-to-date write-downs to \$3.9 billion. CVA is calculated by applying the counterparty's current credit spread to the expected exposure on the trade. The majority of the exposure relates to hedges on super senior positions that were executed with various monoline insurance companies. During the second quarter of 2008, credit spreads on monoline insurers continued to widen and expected exposures increased. See "Direct Exposure to Monolines" on page 31 for a further discussion.

Gains on Auction Rate Securities (ARS)

As of June 30, 2008, auction rate securities (ARS) classified as Trading assets totaled \$5.6 billion compared to \$6.5 billion as of March 31, 2008. Of the total balance, a significant majority is ARS where the underlying assets are student loans, while the remainder is ARS where the underlying assets are U.S. municipal securities as well as various other assets.

During the second quarter of 2008, S&B recorded \$197 million pretax gains in Principal transactions as some liquidity returned to the market with a number of auctions being completed and certain ARS being re-financed by the issuer. This reduced the total year to date losses on ARS to \$1.3 billion, a significant majority of which relates to ARS where student loans are the underlying assets.

Incremental Write-downs on Alt-A Mortgage Securities in S&B

During the second quarter of 2008, Citigroup recorded additional pretax losses of approximately \$325 million, net of hedges, on Alt-A mortgage securities held in S&B, bringing the year-to-date net loss to \$1.3 billion. For these purposes, Alt-A mortgage securities are non-agency residential mortgage-backed securities (RMBS) where: (1) the underlying collateral has weighted average FICO scores between 680 and 720 or, (2) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans.

The Company had \$16.4 billion in Alt-A mortgage securities carried at fair value at June 30, 2008 in S&B, which decreased from \$19.5 billion at March 31, 2008. Of the \$16.4 billion, \$4.3 billion were classified as Trading assets, of which \$193 million of fair value write-downs, net of hedging, were recorded in earnings, and \$12.1 billion were classified as available-for-sale investments, on which \$132 million of write-downs were recorded in earnings due to other-than-temporary impairments. In addition, \$237 million of pretax fair value unrealized losses were recorded in Accumulated Other Comprehensive Income (OCI).

Additional Write-Downs on Commercial Real Estate Exposures

Edgar Filing: CITIGROUP INC - Form 10-Q

S&B's commercial real estate exposure can be split into three categories: assets held at fair value, loans and commitments, and equity and other investments. For assets that are held at fair value, Citigroup recorded an additional \$545 million of fair value write-downs, net of hedges, during the second quarter of 2008, bringing the year-to-date fair value write-downs to \$1.1 billion. See "Exposure to Commercial Real Estate" on page 30 for a further discussion.

Credit Reserves

During the second quarter of 2008, the Company recorded a net build of \$2.5 billion to its credit reserves. The build consisted of \$2.3 billion in Consumer (\$1.9 billion in *North America* and \$409 million in regions outside of *North America*) and \$224 million in ICG.

The \$1.9 billion build in *North America Consumer* primarily reflected a weakening of leading credit indicators, including higher delinquencies on first and second mortgages, unsecured personal loans and credit cards. Reserves also increased due to trends in the U.S. macro-economic environment, including the housing market downturn and rising unemployment rates.

The \$409 million build in regions outside of *North America* was primarily driven by portfolio growth and by deterioration in Mexico, Brazil and *EMEA* cards.

Edgar Filing: CITIGROUP INC - Form 10-Q

The build of \$224 million in ICG primarily reflected a slight deterioration in leading indicators of losses in the corporate loan portfolio.

Loss on Mortgage Servicing Right (MSR) Asset and Related Hedge (MSR-related MTM)

The U.S. mortgage business recorded a net pretax loss of approximately \$745 million in the second quarter of 2008, resulting from a gain of approximately \$1.4 billion on the mark-to-market on the MSR, offset by a decrease of \$2.1 billion in the value of the related hedge (collectively, the "MSR-related MTM"). During the second quarter of 2008, the net MSR position was impacted by: (i) high volatility in the markets causing divergence between the hedge and the related asset and continuous rebalancing of the hedge and (ii) constraint on further upward valuation of the MSR.

Repositioning Charges

In the second quarter of 2008, Citigroup recorded repositioning charges of \$446 million related to Citigroup's ongoing reengineering plans, which will result in certain branch closings and headcount reductions of approximately 2,900 employees. Including the first quarter of 2008 repositioning charges, the year-to-date charges equal \$1.1 billion and a headcount reduction of approximately 12,600 employees.

Issuance of Preferred and Common Stock

In the second quarter of 2008, Citigroup raised \$8.0 billion of capital through public offerings of preferred stock and sold approximately \$4.9 billion of common stock. The Company has raised \$32.3 billion in equity capital during 2008. See Note 13 on page 93 for further information.

Sale of CitiCapital

On April 17, 2008, Citigroup signed an agreement to sell CitiCapital, the equipment finance unit in *North America*. The sale consists of net assets of approximately \$12.5 billion. A pretax loss of \$517 million, was recorded during the quarter in Discontinued Operations on the Company's Consolidated Statement of Income. In addition, the results of all of CitiCapital businesses have been reported as Discontinued Operations for all periods presented. Furthermore, the assets and liabilities as of June 30, 2008 of the CitiCapital businesses to be sold are included within Assets of discontinued operations held for sale, and Liabilities of discontinued operations held for sale, respectively, on the Company's Consolidated Balance Sheet. The sale closed on July 31, 2008.

Sale of CitiStreet

In the second quarter of 2008, Citigroup and State Street Corporation entered into a definitive agreement to sell CitiStreet, a benefits servicing business, to ING Group in an all-cash transaction valued at \$900 million. CitiStreet is a joint venture formed in 2000, which is owned 50 percent each by Citigroup and State Street. The transaction closed on July 1, 2008 and is estimated to generate an after-tax gain of \$225 million (\$347 million pretax) in the third quarter of 2008.

Sale of Upromise Cards Portfolio

During the second quarter, Global Cards sold substantially all of the Upromise Cards portfolio to Bank of America, resulting in an after-tax gain of \$107 million. The portfolio sold had balances of approximately \$1 billion of credit card receivables.

Divestiture of Diners Club International

On June 30, 2008, Citigroup completed the sale of Diners Club International (DCI) to Discover Financial Services, resulting in a pretax gain of approximately \$111 million for the second quarter of 2008.

Citigroup will continue to issue Diners Club cards and support its brand and products through ownership of its many Diners Club card issuers around the world.

Sale of Citigroup's German Retail Banking Operation

On July 11, 2008, Citigroup announced the agreement to sell its German retail banking operations to Credit Mutuel for Euro 4.9 billion (\$7.7 billion) in cash plus earnings accrued in 2008 through the closing. The transaction is expected to result in an after-tax gain of approximately \$4 billion upon closing. After giving effect to the proposed sale, Citigroup's Tier 1 capital ratio as of June 30 would have a pro forma increase of approximately 60 basis points. The sale does not include the corporate and investment banking business or the Germany-based European data center. The sale is expected to close in the fourth quarter of 2008 pending regulatory approvals.

Edgar Filing: CITIGROUP INC - Form 10-Q

The German retail banking operations generated post-tax earnings for the six months of 2008 of approximately \$262 million, and for the full year 2007 of approximately \$500 million, and had a net asset value of approximately \$2.1 billion at June 30, 2008.

SEGMENT AND REGIONAL NET INCOME (LOSS) AND REVENUE

The following tables present net income (loss) and revenues for Citigroup's businesses on a segment view and on a regional view:

Open accounts (<i>in millions</i>)	185.1	184.9				
Loans 90+ days past due as a % of EOP loans	2.32%	1.92%				

Global Cards revenue increased 3%. *Net Interest Revenue* was 13% higher than the prior year primarily driven by growth in average loans of 15%. *Non-Interest Revenue* decreased 7% primarily due to lower securitization results in *North America* and the absence of a prior-year \$51 million pretax gain on sale of MasterCard shares. This decrease was partially offset by growth in purchase sales of 6%, a \$170 million pretax gain on the Upromise Cards Portfolio sale, and a \$111 million pretax gain on the sale of DCI.

In *North America*, an 11% revenue decline was mainly driven by lower securitization revenues, which reflected the impact of higher funding costs and higher credit costs flowing through the securitization trusts. This decrease was partially offset by a \$170 million pretax gain on the Upromise sale and a \$29 million pretax gain on sale of DCI. Purchase sales were even with the prior-year period.

Edgar Filing: CITIGROUP INC - Form 10-Q

Outside of *North America*, revenues increased by 29%, 24%, and 24% in *EMEA*, *Latin America*, and *Asia*, respectively. These increases were driven by double-digit growth in purchase sales and average loans in all regions. The pretax gain on sale of DCI affected *EMEA*, *Latin America*, and *Asia* by \$34 million, \$17 million, and \$31 million, respectively. Results include the impact of the acquisitions of Egg, Grupo Cuscatlán, and Bank of Overseas Chinese (BOOC). Revenues also increased from the foreign currency translation related to the strengthening of local currencies (generally referred to hereinafter as "fx translation").

Operating expenses increased 9%, primarily due to business volumes, higher credit management costs, the impact of acquisitions, and a repositioning charge. Expenses increased by 2% in *North America*, 31% in *EMEA*, 17% in *Latin America*, and 17% in *Asia*. Outside of *North America*, fx translation and acquisitions also contributed to the increase in expenses.

Provision for credit losses and for benefits and claims increased \$735 million, reflecting increases of \$567 million in net credit losses and \$157 million in loan loss reserve builds. In *North America* credit costs increased \$345 million, driven by higher net credit losses, up \$234 million or 52%, and a higher loan loss reserve build, up \$111 million or 50%. Higher credit costs reflected higher business volumes, as well as a weakening of leading credit indicators, trends in the macro-economic environment, including the housing market downturn, higher fuel costs, rising unemployment trends, and higher bankruptcy filings. The net credit loss ratio increased by 2.15 basis points to 6.46%.

Edgar Filing: CITIGROUP INC - Form 10-Q

Outside of *North America*, credit costs increased by \$93 million, \$205 million, and \$81 million in *EMEA*, *Latin America*, and *Asia*, respectively. These increases were driven by higher business volumes, as well as higher net credit losses, which were up \$84 million, \$217 million, and \$32 million in *EMEA*, *Latin America*, and *Asia*, respectively. Higher net credit losses were driven by Mexico, Brazil, India, and the Egg acquisition. Also contributing to the increase were higher loan loss reserve builds, which were up \$46 million.

2008 YTD vs. 2007 YTD

Total Global Cards revenue increased 13%. *Net Interest Revenue* was 15% higher than the prior year primarily driven by growth in average loans of 20%. *Non-Interest Revenue* increased by 11% primarily due to growth in purchase sales of 9%, a \$663 million gain on sale of Redecard shares in the first quarter of 2008, a \$439 million pretax gain on the IPO of Visa shares in the first quarter of 2008, a \$170 million pretax gain on the Upromise sale in the second quarter of 2008, and a \$111 million pretax gain on sale of DCI in the second quarter of 2008. These increases were partially offset by lower securitization results in *North America* and the absence of a prior-year \$278 million pretax gain on sale of MasterCard shares.

In *North America*, a 6% revenue decline was driven by lower securitization revenues, which reflected the impact of higher funding costs and higher credit losses in the securitization trusts, as well as by the absence of a prior-year \$212 million gain on sale of MasterCard shares. This decrease was partially offset by a \$349 million pretax gain on Visa shares in the first quarter of 2008, a \$170 million pretax gain on the Upromise sale in the second quarter of 2008, and a \$29 million pretax gain on sale of DCI in the second quarter of 2008. Purchase sales and average loans were up 2% and 3%, respectively.

Outside of *North America*, revenues increased by 44%, 62%, and 28% in *EMEA*, *Latin America*, and *Asia*, respectively. These increases were driven by double-digit growth in purchase sales and average loans in all regions. The pretax gain on sale of DCI impacted *EMEA*, *Latin America*, and *Asia* by \$34 million, \$17 million, and \$31 million, respectively. Current-year revenues were favorably impacted by a \$663 million pretax gain on sale of Redecard shares and a \$90 million pretax gain on the IPO of Visa shares in the first quarter of 2008. These increases were partially offset by the absence of the prior-year \$66 million gain on sale of MasterCard shares. Results include the impact of fx translation, as well as the acquisitions of Egg, Grupo Financiero Uno, Grupo Cuscatlán, and BOOC.

Operating expenses increased 9%, primarily due to business volumes, higher credit management costs, the impact of acquisitions, and repositioning charges. Expenses were flat in *North America*. Expenses increased by 39% in *EMEA*, 21% in *Latin America*, and 20% in *Asia*. Outside of *North America*, the impact of fx translation also contributed to the increase in expenses.

Provision for credit losses and for benefits and claims increased \$1.7 billion reflecting an increase of \$949 million in net credit losses and \$789 million in loan loss reserve builds. In *North America*, credit costs increased \$818 million, driven by higher net credit losses, up \$363 million or 39%, and a higher loan loss reserve build, up \$455 million. Higher credit costs reflected higher business volumes, as well as a weakening of leading credit indicators, trends in the macro-economic environment, including the housing market downturn, higher fuel costs, rising unemployment trends, and higher bankruptcy filings, as well as the continued acceleration in the rate at which delinquent customers advanced to write-off.

Outside of *North America*, credit costs increased by \$199 million, \$591 million, and \$130 million in *EMEA*, *Latin America*, and *Asia*, respectively. These increases were driven by higher business volumes, as well as higher net credit losses, which were up \$166 million, \$357 million, and \$63 million in *EMEA*, *Latin America*, and *Asia*, respectively. Higher net credit losses were driven by Mexico, Brazil, India, and the Grupo Financiero Uno and Egg acquisitions. Also contributing to the increase were higher loan loss reserve builds, which were up \$33 million, \$234 million, and \$67 million in *EMEA*, *Latin America*, and *Asia*, respectively.

2Q08 vs. 2Q07

Consumer Banking revenue increased 1%. *Net interest revenue* was 11% higher than the prior year, as growth in average loans and deposits of 9% and 8%, respectively, and margin expansion, were partially offset by a 50% net interest revenue decline in CFJ. The impact of fx translation also contributed to the increase in revenues. *Non-Interest Revenue* declined 22%, primarily due to a 20% decline in investment sales and a \$745 million net loss from the MSR-related MTM in *North America*.

In *North America*, revenues declined 2%, primarily due to a \$745 million net loss from the MSR-related MTM, partially offset by growth in average loans and deposits of 7% and 3%, respectively. Excluding the impact from the MSR-related MTM, revenues increased 14%. Revenues in *EMEA* increased 16%, driven by increased average loans and deposits, up 18% and 19%, respectively. Revenues in *Latin America* were up 4%, driven by 19% growth in average loans and 8% growth in deposits, partially offset by the absence of a gain on asset sales recorded in the prior-year period. Revenue in *Asia* declined 3%, primarily driven by a 49% decline in CFJ, reflecting the difficult operating environment and ongoing impact of consumer lending laws passed in the fourth quarter of 2006. Excluding CFJ, *Asia's* revenues increased

Edgar Filing: CITIGROUP INC - Form 10-Q

11%, as a 14% growth in average loans and a 10% growth in deposits were offset by a 30% decline in investment sales due to a decline in equity markets and related trading activities across *Asia*.

Operating expenses growth of 12% was primarily driven by higher business volumes, increased credit management costs, a \$130 million repositioning charge, and acquisitions.

Expenses were up 10% in *North America*, primarily driven by a \$92 million repositioning charge, higher credit management expenses, and acquisitions. Higher expenses of 16% in *EMEA* were mainly due to a repositioning charge of \$24 million and volume growth. Higher business volumes also contributed most of the expense growth in *Latin America*. The 14% expense growth in *Asia* was primarily driven by the acquisition of Bank of Overseas Chinese (BOOC) and business volumes. The impact of fx translation also contributed to the increase in expenses in *EMEA*, *Latin America* and *Asia*.

Provisions for credit losses and for benefits and claims increased \$3.1 billion, reflecting significantly higher net credit losses in *North America* and *Latin America*, as well as a \$1.6 billion incremental pretax charge to increase loan loss reserves, primarily in *North America*. The impact of portfolio growth and acquisitions also contributed to the increase in credit costs.

Credit costs in *North America* increased by \$2.6 billion, due to higher net credit losses, up \$1.1 billion, and a \$1.5 billion incremental pretax charge to increase loan loss reserves. Higher credit costs reflected a weakening of leading credit indicators, including higher delinquencies in first and second mortgages, and unsecured personal loans, as well as trends in the macro economic environment, including the housing market downturn. The net credit loss ratio increased 146 basis points to 2.33%. Credit costs increased 44% in *EMEA*, reflecting a 29% increase in net credit losses, and a \$31 million incremental pretax charge to increase loan loss reserves. In *Latin America*, credit costs increased \$150 million, primarily due to higher losses in the current quarter and the absence of recoveries in the prior-year period in Mexico. In *Asia*, credit costs increased by \$166 million, driven by a \$79 million increase in net credit losses, and an \$87 million incremental pretax charge to increase loan loss reserves. Higher credit costs were primarily driven by higher losses and delinquencies in India.

2008 YTD vs. 2007 YTD

Consumer Banking revenue increased 6%. *Net interest revenue* was 12% higher than the prior year, as growth of 11% in average loans and deposits, and margin expansion, was partially offset by a 42% net interest revenue decline in CFJ. The impact of acquisitions and fx translation also contributed to the increase in revenues. *Non-Interest Revenue* declined 8%, primarily due to a 17% decline in investment sales and a loss from the MSR-related MTM in *North America*, and the absence of a \$41 million gain on the sale of MasterCard shares in the prior-year.

In *North America*, revenues increased 4%, primarily due to increases in average loans and deposits of 9% and 4%, respectively, and margin expansion, partially offset by a loss from the MSR-related MTM. Excluding the impact from the MSR-related MTM, revenues increased 13%. Revenues in *EMEA* increased 16%, mainly driven by 24% growth in average loans and 32% growth in deposits (including the impact of Egg acquisition). Revenues in *Latin America* were up 7%, driven by 24% growth in average loans and 14% growth in deposits (including the impact of acquisitions of Grupo Financiero Uno and Grupo Cuscatlan), partially offset by spread compression and the absence of a gain on the sale of MasterCard shares in the prior-year period. *Asia's* revenues increased 2%, as growth in average loans and deposits of 14% and 12%, respectively, was partially offset by a 41% revenue decline in CFJ. Excluding CFJ, revenues increased 17%. Volume growth in *EMEA*, *Latin America* and *Asia* was partially offset by a double-digit decline in investment sales due to a decline in equity markets across the regions.

Operating expenses growth of 13% was primarily driven by higher business volumes, increased credit management costs, a \$342 million repositioning charge, and acquisitions, partially offset by a \$221 million benefit related to a legal vehicle repositioning in Mexico.

Expenses were up 14% in *North America*, primarily driven by a \$217 million repositioning charge, higher credit management expenses, and acquisitions. Higher expenses of 23% in *EMEA* were mainly due to a repositioning charge of \$95 million, volume growth and the acquisition of Egg. Expenses declined 4% in *Latin America*, mainly due to a \$221 million benefit related to a legal vehicle repositioning in Mexico, partially offset by higher business volume. The 14% expense growth in *Asia* was primarily driven by the acquisition of BOOC and higher volumes. The impact of fx translation also contributed to the increase in expenses in *EMEA*, *Latin America* and *Asia*.

Provisions for credit losses and for benefits and claims increased \$5.1 billion, reflecting significantly higher net credit losses in *North America*, Mexico and India, as well as a \$2.4 billion incremental pretax charge to increase loan loss reserves, primarily in *North America*. The impact of portfolio growth and acquisitions and portfolio growth also contributed to the increase in credit costs.

Edgar Filing: CITIGROUP INC - Form 10-Q

Credit costs in *North America* increased by \$4.4 billion, due to higher net credit losses, up \$2.1 billion, and a \$2.3 billion incremental pretax charge to increase loan loss reserves. Higher credit costs reflected a weakening of leading credit indicators, including higher delinquencies in first and second mortgages, and unsecured personal loans, as well as trends in the macro economic environment, including the housing market downturn. The net credit loss ratio increased 131 basis points to 2.17%. Credit costs increased \$90 million in *EMEA*, primarily driven by a 21% increase in net credit losses including the impact of Egg acquisition. In *Latin America*, credit costs increased \$243 million, primarily due to higher net credit losses and the absence of recoveries in the prior-year period in Mexico. In *Asia*, credit costs increased by \$305 million, driven by a \$150 million increase in net credit losses, and a \$155 million incremental pretax charge to increase loan loss reserves. Higher credit costs were primarily driven by higher losses and delinquencies in India.

2Q08 vs. 2Q07

Revenues, net of interest expense, were down 94% in Securities and Banking due to substantial write-downs and losses related to the credit markets. These included write-downs of \$3.4 billion on subprime-related direct exposures, downward credit value adjustments of \$2.4 billion related to exposure to monoline insurers, write-downs of \$545 million on commercial real estate positions, write-downs of \$428 million, net of underwriting fees, on funded and unfunded highly leveraged finance commitments and write-downs on Alt-A mortgage securities of \$325 million, net of hedges. Negative revenues were partially offset by record revenues in interest rate and currency trading, and commodities. Revenues also included a \$197 million gain on auction rate securities inventory. Equity markets revenues decreased 12%. Record revenue growth in the prime broker and cash businesses in North America was offset by weakness in global derivatives and convertibles. Transaction Services revenues net, of interest expense were up 30%

Edgar Filing: CITIGROUP INC - Form 10-Q

to a record \$2.4 billion reflecting double-digit revenue growth across all regions. Customer volumes continued to be strong, with liability balances up 15% and assets under custody up 13%. Treasury and Trade Solutions (TTS) revenues were up 29%, driven by growth in liabilities and increased yields on trade loans. Securities Services improved by 31%, driven by higher volumes and the impact of the Bisys acquisition.

North America revenue growth was primarily driven by the Bisys acquisition. In EMEA, revenues increased 28%, as liability balances grew 25% to a record \$110 billion. Latin America revenue growth of 41% reflected growth in TTS liabilities and spreads. In Asia, revenues were up 25%, reflecting double-digit growth in TTS and Securities Services.

Operating expenses increased 6% in Securities and Banking, due to a \$257 million repositioning charge and the absence of a \$300 million release of litigation reserves recorded in the prior-year period. Expense growth also reflected the impact of recent acquisitions, partially offset by a decline in compensation costs. Transaction Services expenses grew 22%, primarily driven by increased investment spending, higher business volumes, and the Bisys acquisition.

The *provision for credit losses* in Securities and Banking increased, reflecting a \$386 million increase in net credit losses mainly associated with loan sales. Credit costs were also driven by an incremental net charge of \$227 million to increase loan reserves, reflecting a deterioration in leading indicators of losses in the corporate loan portfolio. Transaction Services credit costs increased \$24 million, mainly due to higher net credit losses, and a \$16 million incremental charge to increase loan loss reserves.

On June 12, 2008, Citigroup announced the restructuring of Old Lane and its multi-strategy hedge fund (the "Fund") in anticipation of redemptions by all unaffiliated, non-Citigroup employee investors. Old Lane may establish single-strategy funds with future offerings designed to meet client demand as part of the ICG client platform or take other actions related to Old Lane assets. To accomplish this restructuring, Citigroup purchased substantially all of the assets of the Fund at fair value on June 30, 2008. The fair value of assets purchased from the Fund was approximately \$6 billion at June 30, 2008.

2008 YTD vs. 2007 YTD

Revenues, net of interest expense, were negative in Securities and Banking due to substantial write-downs and losses related to the fixed income and credit markets. Included in this decrease were \$9.3 billion of write-downs on subprime-related direct exposure, \$3.5 billion of write-downs (net of underwriting fees) on funded and unfunded highly leveraged finance commitments, \$3.9 billion of downward credit market value adjustments related to exposure to monoline insurers, \$1.3 billion write-downs on Alt-A mortgage securities, net of hedges, \$1.1 billion write-downs on commercial real estate exposures, and \$1.3 billion of write-downs on auction rate securities inventory, due to failed auctions predominantly in the first quarter of 2008 and deterioration in the credit markets. Transaction Services revenues grew 36%, with double-digit growth in Treasury & Trade Solutions and Securities Services driven by strong growth in customer liability balances and assets under custody.

Operating expenses grew 23% in Transaction Services due to increased investment spending, business volumes, and the acquisition of The Bisys Group. Expenses increased by 7% in Securities and Banking due to \$563 million of repositioning charges and the absence of a litigation reserve release recorded in the prior year offset partially by a decrease in compensation costs.

The *provision for credit losses* in Securities and Banking increased, primarily from a \$512 million increase in net credit losses partially due to loan sales. Transaction Services credit costs increased, mainly due to a charge to increase loan loss reserves.

2Q08 vs. 2Q07

Revenues, net of interest expense, increased 4% primarily due to the impact of the Nikko Cordial acquisition, an increase in *EMEA* Banking revenues and an increase in *Latin America* Capital Markets, partially offset by a slowdown in *Asia* Capital Markets, lower discretionary investment revenue and lower Capital Markets in *North America*.

Edgar Filing: CITIGROUP INC - Form 10-Q

Total client assets, including assets under fee-based management, decreased \$126 billion, or 7%, mainly reflecting the impact of *North America* market declines in June. Net flows declined compared to the prior year, to (\$11) billion. GWM had 14,983 financial advisors/bankers as of June 30, 2008, compared with 15,595 as of June 30, 2007, driven by attrition in *North America* and *Asia*, as well as the elimination of low performing bankers and advisors.

Operating expenses increased 7% primarily due to the impact of Nikko Cordial and repositioning charges, which were partly offset by expense discipline and the impact of reengineering projects.

The *provision for credit losses* increased by \$28 million, which represents building of loan loss reserves, primarily for mortgages and for lending to address client liquidity needs related to their auction rate securities holdings in *North America*.

Income taxes increased reflecting the absence of a \$65 million tax benefit due to the initial application of APB23 to certain foreign subsidiaries in the prior year.

2008 YTD vs. 2007 YTD

Revenues, net of interest expense, increased 10% primarily due to the impact of the Nikko Cordial acquisition, an increase in *EMEA* Banking and Capital Markets revenues, and an increase in *Latin America* Capital Markets, partially offset by lower Capital Markets revenue in *Asia* and *North America*.

Operating expenses increased 19% primarily due to the impact of acquisitions, a reserve of \$250 million in the first quarter of 2008 related to an offer to facilitate the liquidation

of investments in a Citi-managed fund for its clients, and repositioning charges.

The *provision for credit losses* increased by \$32 million, reflecting reserve builds and \$9 million of write-offs in Asia. The reserve builds were for mortgages and for lending to address client liquidity needs related to their auction rate securities holdings in *North America*.

Net loss	\$ (623)	\$ (200)	\$ (1,048)	\$ (1,068)

2Q08 vs. 2Q07

Revenues, net of interest expense, decreased primarily due to inter-company transaction costs related to recent capital raises and the sale of CitiCapital. Additionally, higher funding costs primarily related to an increase in non-earning assets, as well as enhancements in Citigroup's liquidity position.

Operating expenses, decreased primarily due to lower repositioning charges and SFAS 123R related expenses.

Income taxes (benefits) increased due to lower taxes held at Corporate.

2008 YTD vs. 2007 YTD

Revenues, net of interest expense, decreased primarily due to higher funding costs primarily related to an increase in the deferred tax asset and the enhancement of the liquidity position. Additionally, inter-company transaction costs related to recent capital raises and the sale of CitiCapital, mark-to-market losses on Nikko Cordial equity holdings, as well as the absence of a prior-year gain on the sale of certain corporate-owned assets, contributed to the decline in revenues.

Operating expenses, excluding the 2007 first quarter repositioning charge of \$1,377 million, decreased primarily due to lower SFAS 123R related expenses.

Income taxes (benefits) decreased due to higher taxes held at Corporate.

NM Not meaningful

2Q08 vs. 2Q07

Total revenues decreased 45%. *Net Interest Revenue* was 26% higher than the prior year primarily driven by growth in average loans of 9% and average deposits of 3%. In addition, lower funding costs resulted in higher spreads during the quarter. *Non-Interest Revenue* decreased 93% primarily due to Securities and Banking's substantial write-downs and losses related to the credit markets. These included write-downs on subprime-related direct exposures, downward credit value adjustments related to exposure to Monoline insurers, and write-downs on commercial real estate positions. Negative revenues were partially offset by strong revenues in interest rate and currency trading, and commodities, as well as a \$197 million gain on auction rate securities inventory. Consumer Banking's \$745 million net loss from the MSR-related MTM and lower securitization results in Global Cards also impacted revenues in the quarter. Global Cards results also include a \$170 million pretax gain on the Upromise Cards Portfolio sale and \$29 million pretax gain on the sale of DCI during the second quarter of 2008.

Operating expenses increased 11% primarily due to repositioning charges, acquisitions and the absence of a \$300 million release of litigation reserves recorded in the prior-year period.

Provisions for credit losses and for benefits and claims increased \$3.4 billion, driven predominantly by Global Cards and Consumer Banking. Global Cards credit costs increased \$345 million, driven by higher net credit losses, up \$234 million or 52%, and a higher loan loss reserve build, up \$111 million or 50%. Higher credit costs reflected higher business volumes, as well as a weakening of leading credit indicators, trends in the macro-economic environment, including the housing market downturn, higher fuel costs, rising unemployment trends, and higher bankruptcy filings. The net credit loss ratio increased by 215 basis points to 6.46%. Consumer banking credit costs increased by \$2.6 billion, due to higher net credit losses, up \$1.1 billion, and a \$1.5 billion incremental pretax charge to increase loan loss reserves. Higher credit costs reflected a weakening of leading credit indicators, including higher delinquencies in first and second mortgages, and unsecured personal loans,

Edgar Filing: CITIGROUP INC - Form 10-Q

as well as trends in the macro-economic environment, including the housing market downturn. The net credit loss ratio increased 146 basis points to 2.33%. In the ICG, Securities and Banking increased, reflecting higher net credit losses mainly associated with loan sales and increases to loan reserves, reflecting a slight deterioration in leading indicators of losses in the corporate loan portfolio.

2008 YTD vs. 2007 YTD

Total revenues decreased 64%. *Net Interest Revenue* was 27% higher than the prior year primarily driven by growth in average loans of 12% and average deposits of 7%. In addition, lower funding costs resulted in higher spreads during the first half of 2008. *Non-Interest Revenue* decreased \$20.9 billion driven by substantial write-downs and losses related to the fixed income and credit markets in Securities and Banking. In Global Cards a 6% revenue decline was driven by lower securitization revenues as well as by the absence of a prior-year \$212 million gain on sale of MasterCard shares. This decrease was partially offset by a \$349 million pretax gain on the IPO of Visa shares in 1Q08, and pretax gains in 2Q08 of \$170 million on the Upromise Cards Portfolio sale and \$29 million on the sale of DCI. In Consumer Banking, revenue was negatively impacted by the loss from the MSR-related MTM.

Operating expenses increased 9%, reflecting repositioning charges, the impact of acquisitions, and the absence of a prior year litigation reserve release in Securities and Banking, offset by a partial release of the Visa-related litigation reserve in the first quarter 2008.

Provisions for credit losses and for benefits and claims increased \$5.8 billion. Global Cards credit costs increased \$818 million, driven by higher net credit losses, up \$363 million or 39%, and a higher loan loss reserve build, up \$455 million. Higher credit costs reflected higher business volumes, as well as a weakening of leading credit indicators, trends in the macro-economic environment, including the housing market downturn, higher fuel costs, rising unemployment trends, and higher bankruptcy filings, as well as the continued acceleration in the rate at which delinquent customers advanced to write-off. Consumer banking credit costs increased by \$4.4 billion, due to higher net credit losses, up \$2.1 billion, and a \$2.3 billion incremental pretax charge to increase loan loss reserves. Higher credit costs reflected a weakening of leading credit indicators, including higher delinquencies in first and second mortgages, and unsecured personal loans, as well as trends in the macro-economic environment, including the housing market downturn. In the ICG, Securities and Banking increased, reflecting higher net credit losses mainly associated with loan sales and increases to loan reserves, reflecting a slight deterioration in leading indicators of losses in the corporate loan portfolio.

2Q08 vs. 2Q07

Total Revenues decreased 19% largely driven by continued write-downs in Securities and Banking. Excluding Securities and Banking, revenues were up 22%.

In Global Cards, revenues increased by 29% to \$652 million, driven by higher purchase sales and average loans, up 27% and 42%, respectively, together with a portion of the gain on the sale of DCI. Consumer Banking revenues increased by 16% to \$1.3 billion, driven by strong growth in average loans and deposit growth of 18% and 19%, respectively, and improved net interest margin. In the ICG, Securities and Banking revenues were down 62% from the 2007 second quarter to \$871 million, due to write-downs on highly leveraged finance commitments and lower revenue in equity markets and underwriting as well as advisory services. Revenues also reflected strong results in local markets sales and trading, primarily driven by high client revenue and strong trading performance. Transaction Services revenues increased 28% to \$869 million reflecting increased customer volumes with liability balances up 25%. Revenues in GWM grew by 12% to \$153 million primarily driven by an increase in banking revenues. GWM average loans grew 37% while client assets, including assets under fee-based management, decreased by 9% primarily due to market actions as well as net flows. The impact of fx translation also contributed to revenue growth for EMEA.

Operating Expenses were up 4%, primarily due to repositioning charges in the current quarter and the impact of acquisitions and fx translations. Sequentially expenses declined by 5%, due to a decline in incentive compensation, the benefits from reengineering efforts and expense management.

Provisions for credit losses and for benefits and claims increased 98%. The increase was primarily driven by losses associated with loan sales in Securities and Banking, higher Card customer volumes, some deterioration in western European countries, the impact of the Egg acquisition and higher loan loss reserve builds.

Edgar Filing: CITIGROUP INC - Form 10-Q

Taxes increased reflecting the absence of a \$96 million tax benefit due to the initial application of APB23 to certain foreign subsidiaries recorded in the prior year. The impact of fx translation contributed to expense growth for the region

2008 YTD vs. 2007 YTD

Revenues were down 34% due to write-downs in Securities and Banking, partially offset by double-digit growth across all other businesses, the impact of recent acquisitions and fx translation.

Global Cards revenues increased by 44% to \$1.3 billion, driven by double-digit growth in purchase sales and average loans, and the impact of the Egg acquisition. Revenues in Consumer Banking increased by 16% to \$2.5 billion, driven by strong growth in average loans, deposit growth, improved net interest margin and the impact of the Egg acquisition. In ICG, Securities and Banking revenue of \$191 million was down from a record first half last year, due to write downs on subprime-related direct exposures in the first quarter of 2008 and highly leveraged finance commitments. Revenues in Securities and Banking also included a strong performance in fixed income emerging markets.

Edgar Filing: CITIGROUP INC - Form 10-Q

Transaction Services revenues increased by 32% to a record \$1,682 million driven by customer volumes and deposit growth. Revenues in GWM grew by 32% to \$323 million primarily driven by an increase in banking revenues and the impact of the recent acquisition of Quilter and fx translation.

Operating Expenses were up 11% primarily due to the impact of recent organizational and repositioning charges included in the first six months of 2008, the impact of acquisitions, partially offset by a decline in incentive compensation and the benefits from reengineering efforts and fx translation.

Provisions for credit losses and for benefits and claims increased 40% primarily due to an increase in net credit losses as well as the Egg acquisition.

2Q08 vs. 2Q07

Total Revenues were 12% higher than the prior year, driven by 13% growth in average loans, 29% growth in cards purchase sales, 19% growth in total deposits. The increases were partially offset by a 2% decrease in Securities and Banking due to write-downs and losses related to fixed income and credit markets and a \$40 million reduction in revenues from a Chile divestiture. The impact of fx translation also contributed to the increase in revenues.

Operating expenses grew 10% primarily driven by volume growth, higher expenses in collection and legal costs, and acquisitions completed later in 2007. The impact of fx translation also contributed to the increase in expenses.

Provisions for credit losses and for benefits and claims increased \$433 million, primarily reflecting asset deterioration, volume growth, and \$124 million of net recoveries in the prior-year period.

2008 YTD vs. 2007 YTD

Total Revenue was 24% higher than the prior year, reflecting 2008 first quarter figures which included a \$663 million gain from the Redecard sale, growth of 21% in average loans, 35% in cards purchase sales, and 25% in total deposits. The increases were partially offset by a 5% decrease in Securities and Banking due to write-downs and losses related to fixed income and credit markets. The impact of fx translation also contributed to the increase in revenues.

Operating expense growth of 6% was primarily driven by acquisitions, volume growth and higher collection and legal costs, partially offset by a \$282 million benefit related to a legal vehicle repositioning in Mexico. The impact of fx translation also contributed to the increase in expenses.

Provisions for credit losses and for benefits and claims increased \$899 million primarily reflecting a legacy portfolio sale in 2007, asset deterioration, and volume growth.

2Q08 vs. 2Q07

Asia revenues decreased 4%. *Net Interest Revenue* increased 29%. Cards growth of 18% was driven by 21% growth in purchase sales and 27% growth in average loans. Consumer Banking grew by 16%, driven by 14% growth in average loans and 10% growth in deposits. Transaction Services exhibited strong growth across all products resulting in 25% growth. Securities and Banking grew \$473 million, reflecting higher dividends, fx translation, and acquisitions. *Non-Interest Revenue* decreased 26%, as Securities and Banking suffered from continued market volatility and declining valuations. Outside of Securities and Banking, non-interest revenue increased 18% with strong growth in Cards, Transaction Services and Wealth Management, partially offset by lower Investment Sales in Banking and Wealth Management. Results included a \$31 million gain on the sale of DCI.

Operating Expenses increased 13% primarily driven by the impact of acquisitions and fx translation and repositioning charges.

Edgar Filing: CITIGROUP INC - Form 10-Q

Provisions for credit losses and for benefits and claims increased 54% primarily driven by a \$147 million pretax charge to increase loan loss reserves. Higher credit costs were due to a combination of portfolio growth and some deterioration in the macroeconomic environment, including India Consumer Banking.

Asia Excluding CFJ

As disclosed in the table above, NIR excluding CFJ increased 47% and 37% in the 2008 second quarter and year-to-date periods, respectively. *Operating Expense* excluding CFJ increased 14% and 31%, and Net income excluding CFJ decreased 28% and 25%, respectively.

2008 YTD vs. 2007 YTD

Asia revenues increased 7%. *Net Interest Revenue* increased 22%. Cards growth of 23% was driven by 24% growth in purchase sales and 28% growth in average loans. Consumer Banking grew by 21%, driven by growth of 17% in average loans and 12% growth in deposits. Transaction Services exhibited strong growth across all products resulting in 34% growth. Securities and Banking grew \$513 million, reflecting higher dividend revenue, fx translation, and acquisitions. *Non-Interest Revenue* decreased 7% as Securities and Banking suffered from continued market volatility and declining valuations. Outside of Securities and Banking, non-interest revenue increased 39% with strong growth in Cards, Transaction Services and Wealth Management, partially offset by lower Investment Sales in Banking and Wealth Management. Results included a \$31 million gain on the sale of DCI and an \$81 million gain on the IPO of Visa shares, partially offset by a \$21 million gain on the sale of MasterCard shares in the prior-year period.

Operating Expense increased 29% primarily driven by the impact of acquisitions, fx translation and repositioning charges.

Provisions for credit losses and for benefits and claims increased 43% primarily driven by a \$214 million incremental pretax charge to increase loan loss reserves, increased credit costs in India Consumer Banking, acquisitions and portfolio growth.

MANAGING GLOBAL RISK

Citigroup's risk management framework balances strong corporate oversight with well-defined independent risk management functions for each business and region, as well as cross-business product expertise. The Citigroup risk management policies and practices are described in Citigroup's 2007 Annual Report on Form 10-K.

Credit card receivables held-for-sale(3)		0.9	2.9	1.0	1.0	3.3
Total managed(4)	\$ 678.3	\$ 688.9	\$ 633.6	\$ 688.9	\$ 688.0	\$ 622.0

(1) Reclassified to conform to current period's presentation.

(2) Total loans and total average loans exclude certain interest and fees on credit cards of approximately \$3 billion and \$2 billion for the second quarter of 2008, approximately \$2 billion and \$2 billion for the first quarter of 2008 and approximately \$2 billion and \$2 billion for the second quarter of 2007, respectively, which are included in Consumer Loans on the Consolidated Balance Sheet.

(3) Included in Other Assets on the Consolidated Balance Sheet.

(4) This table presents loan information on a held basis and shows the impact of securitizations to reconcile to a managed basis. Although a managed basis presentation is not in conformity with GAAP, the Company believes managed credit statistics provide a representation of performance and key indicators of the credit card business that are consistent with the way management reviews operating performance and allocates resources. Held-basis reporting is the related GAAP measure.

Citigroup's total allowance for loans, leases and unfunded lending commitments of \$21.9 billion is available to absorb probable credit losses inherent in the entire portfolio. For analytical purposes only, the portion of Citigroup's allowance for loan losses attributed to the Consumer portfolio was \$16.5 billion at June 30, 2008, \$14.4 billion at March 31, 2008 and \$7.2 billion at June 30, 2007. The increase in the allowance for loan losses from June 30, 2007 of \$9.3 billion included net builds of \$9.6 billion.

The builds consisted of \$9.5 billion in Consumer (\$7.8 billion in *North America* and \$1.7 billion in regions outside of *North America*) and \$123 million in Global Wealth Management.

The build of \$7.8 billion in *North America* Consumer primarily reflects an increase in the losses embedded in the portfolio as a result of weakening leading credit indicators, including increased delinquencies on first and second mortgages, unsecured personal loans, credit cards, and auto loans. Also, the build reflected trends in the U.S. macro-economic environment, including the housing market downturn rising, unemployment rates and portfolio growth. The build of \$1.7 billion in regions outside of *North America* Consumer primarily reflects portfolio growth and the impact of recent acquisitions and credit deterioration in certain countries.

On-balance-sheet consumer loans of \$567.3 billion increased \$37.7 billion, or 7%, from June 30, 2007, primarily driven by *EMEA, Latin America and Asia Cards, Consumer Banking* and *Global Wealth Management*. Net credit losses, delinquencies and the related ratios are affected by the credit performance of the portfolios, including bankruptcies, unemployment, global economic conditions, portfolio growth and seasonal factors, as well as macroeconomic and regulatory policies.

EXPOSURE TO U.S. RESIDENTIAL REAL ESTATE IN SECURITIES AND BANKING

Subprime-Related Direct Exposure in Securities and Banking

The following table summarizes Citigroup's U.S. subprime-related direct exposures in Securities and Banking (S&B) at June 30, 2008 and March 31, 2008:

<i>In billions of dollars</i>	March 31, 2008 exposures	Second quarter 2008 write-downs	Second quarter 2008 sales/transfers(1)	June 30, 2008 exposures

Note: Table may not foot or cross-foot due to roundings

- (1) Reflects sales, transfers, repayment of principal and liquidations.
- (2) Includes \$80 million recorded in credit costs.
- (3) Includes losses associated with liquidations and decline in value from March 31, 2008 to dates of liquidation.
- (4) A portion of the underlying securities were repurchased in liquidations of two CDOs and are reported as Trading Account Assets. Some of these repurchased securities have already been resold, and as of June 30, 2008, the remaining balance was \$319 million.
- (5) Composed of net CDO super senior exposures and gross Lending and Structuring exposures.
- (6)

SFAS 157 adjustment related to counterparty credit risk.

Subprime-Related Direct Exposure in Securities and Banking

The Company had approximately \$22.5 billion in net U.S. subprime-related direct exposures in its Securities and Banking business at June 30, 2008.

The exposure consisted of (a) approximately \$18.1 billion of net exposures in the super senior tranches (i.e., most senior tranches) of collateralized debt obligations which are collateralized by asset-backed securities, derivatives on asset-backed securities or both (ABS CDOs), and (b) approximately \$4.4 billion of subprime-related exposures in its lending and structuring business.

Direct ABS CDO Super Senior Exposures

The net \$18.1 billion in ABS CDO super senior exposures as of June 30, 2008 is collateralized primarily by subprime residential mortgage-backed securities (RMBS), derivatives on RMBS or both. These exposures include \$14.4 billion in commercial paper (ABCP) issued as the super senior tranches of ABS CDOs and approximately \$3.7 billion of other super senior tranches of ABS CDOs.

Citigroup's CDO super senior subprime direct exposures, \$18.1 billion at June 30, 2008, are Level 3 assets and are subject to valuation based on significant unobservable inputs. Accordingly, fair value of these exposures is based on estimates of future cash flows from the mortgage loans underlying the assets of the ABS CDOs. To determine the performance of the underlying mortgage loan portfolios, the Company estimates the prepayments, defaults and loss severities based on a number of macro-economic factors, including housing price changes, unemployment rates and interest rates and borrower and loan attributes, such as age, credit scores, documentation status, loan-to-value (LTV) ratios and debt-to-income (DTI) ratios. The model is calibrated using available mortgage loan information including historical loan performance. In addition, the methodology estimates the impact of geographic concentration of mortgages, and the impact of reported fraud in the origination of subprime mortgages. An appropriate discount rate is then applied to the cash flows generated for each super senior ABS CDO tranche, in order to estimate its current fair value.

When necessary, the valuation methodology used by Citigroup is refined and the inputs used for the purposes of estimation are modified, in part, to reflect ongoing market developments. More specifically, the inputs of home price appreciation (HPA) assumptions and delinquency data were updated during the quarter along with discount rates that are based upon a weighted average combination of implied spreads from single name ABS bond prices and ABX indices, as well as CLO spreads.

Consistent with the first quarter of 2008, the second quarter housing-price changes were estimated using a forward-

Edgar Filing: CITIGROUP INC - Form 10-Q

looking projection which incorporates the S&P Case-Shiller Home Price Index. The valuation of the Company's direct ABS CDO super senior exposures as of June 30, 2008 assumes a cumulative decline in U.S. housing prices from peak to trough of 23%. This rate assumes declines of 12% and 3% in 2008 and 2009, respectively, the remainder of the 23% decline having already occurred before the end of 2007. The valuation of the Company's direct ABS CDO super senior exposures as of March 31, 2008 assumed a cumulative decline in U.S. housing prices from peak to trough of 20%, with assumed declines of 8% and 3% in 2008 and 2009, respectively.

In addition, during the first and second quarters of 2008, the discount rates were based on a weighted average combination of the implied spreads from single named ABS bond prices, ABX indices and CLO spreads depending on vintage and asset types.

The primary drivers that currently impact the super senior valuations are the discount rates used to calculate the present value of projected cash flows and projected mortgage loan performance. In valuing its direct ABS CDO super senior exposures, the Company has made its best estimate of the key inputs that should be used in its valuation methodology. However, the size and nature of these positions as well as current market conditions are such that changes in inputs such as the discount rates used to calculate the present value of the cash flows can have a significant impact on the reported value of these exposures. For instance, each 10 basis point change in the discount rate used generally results in an approximate \$58 million change in the fair value of the Company's direct ABS CDO super senior exposures as at June 30, 2008. This applies to both decreases in the discount rate (which would increase the value of these assets and reduce write-downs) and increases in the discount rate (which would decrease the value of these assets and increase reported write-downs).

Estimates of the fair value of the CDO super senior exposures depend on market conditions and are subject to further change over time. In addition, while Citigroup believes that the methodology used to value these exposures is reasonable, the methodology is subject to continuing refinement, including those made as a result of market developments. Further, any observable transactions in respect of some or all of these exposures could be employed in the fair valuation process in accordance with and in the manner called for by SFAS 157.

Lending and Structuring Exposures

The \$4.4 billion of subprime-related exposures includes approximately \$0.1 billion of CDO warehouse inventory and unsold tranches of ABS CDOs, approximately \$2.8 billion of actively managed subprime loans purchased for resale or securitization, at a discount to par, during 2007, and approximately \$1.5 billion of financing transactions with customers secured by subprime collateral. These amounts represent the fair value as determined using observable inputs and other market data. The majority of the change from the March 31, 2008 balances reflects sales, transfers and liquidations.

Securities and Banking also has trading positions, both long and short, in U.S. subprime RMBS and related products, including ABS CDOs, which are not included in the figures above. The exposure from these positions is actively managed and hedged, although the effectiveness of the hedging products used may vary with material changes in market conditions.

Direct Exposure to Monolines

In its Securities and Banking business, the Company has exposure to various monoline bond insurers listed in the table below ("Monolines") from hedges on certain investments and from trading positions. The hedges are composed of credit default swaps and other hedge instruments. The Company recorded an additional \$2.4 billion in credit market value adjustments during the second quarter of 2008 on the market value exposures to the Monolines as a result of widening credit spreads and decline in the value of that hedged exposure.

The following table summarizes the market value of the Company's direct exposures to and the corresponding notional amounts of transactions with the various Monolines as well as the aggregate credit market value adjustment associated with these exposures as of June 30, 2008 and March 31, 2008 in Securities and Banking:

<i>In millions of dollars</i>	June 30, 2008		Net Market Value Exposure March 31, 2008

As of June 30, 2008 and March 31, 2008, the Company had \$9.8 billion notional amount of hedges against its Direct Subprime ABS CDO Super Senior positions. Of that \$9.8 billion, \$7.6 billion was purchased from Monolines and is included in the notional amount of transactions in the table above. The market value of the hedges provided by the

Edgar Filing: CITIGROUP INC - Form 10-Q

Monolines against our Direct Subprime ABS CDO Super Senior positions was \$5.4 billion as of June 30, 2008 and \$4.5 billion as of March 31, 2008.

In addition, there was \$2.6 billion and \$2.8 billion of market value exposure to Monolines related to our trading assets as of June 30, 2008 and March 31, 2008, respectively. Trading assets include trading positions, both long and short, in U.S. subprime residential mortgage-backed securities (RMBS) and related products, including ABS CDOs. There was \$1.4 billion in notional amount of transactions related to subprime trading positions with a market value exposure of \$1.2 billion as of June 30, 2008 and March 31, 2008. The notional amount of transactions related to the remaining non-subprime trading assets as of June 30, 2008 was \$10.0 billion with a corresponding market value exposure of \$1.4 billion. The \$10.0 billion notional amount of transactions comprised \$2.8 billion primarily in interest rate swaps with a corresponding market value exposure of \$14 million. The remaining notional amount of \$7.3 billion was in the form of credit default swaps and total return swaps with a market value exposure of \$1.4 billion.

The corresponding notional amount of transactions related to the remaining non-subprime trading assets at March 31, 2008 was \$14.3 billion with a net market value exposure of \$1.6 billion. The \$14.3 billion notional amount of transactions comprised \$6.1 billion primarily in interest rate swaps with a market value exposure of \$40 million. The remaining notional amount of \$8.2 billion was in the form of credit default swaps and total return swaps with a market value of \$1.5 billion.

The market value exposure, net of payable and receivable positions, represents the market value of the contract as of June 30, 2008 excluding the credit market value adjustment. The notional amount of the transactions, including both long and short positions, is used as a reference value to calculate payments. The credit market value adjustment is a downward adjustment to the market value exposure to a counterparty to reflect the counterparty's creditworthiness in respect of the obligations in question.

Credit market value adjustments are based on credit spreads and on estimates of the terms and timing of the payment obligations of the Monolines. Timing in turn depends on estimates of the performance of the transactions to which the Company's exposure relates, estimates of whether and when liquidation of such transactions may occur and other factors, each considered in the context of the terms of the monolines' obligations. For a further discussion of the use of estimates by the Company, see the Company's 2007 Annual Report on Form 10-K.

The Company has purchased mortgage insurance from various monoline mortgage insurers on first mortgage loans. The notional amount of this insurance protection was approximately \$400 million as of June 30, 2008 and approximately \$600 million as of March 31, 2008 with nominal pending claims against this notional amount.

In addition, Citigroup has indirect exposure to Monolines in various other parts of its businesses. For example, corporate or municipal bonds in the trading business may be insured by the Monolines. In this case, Citigroup is not a party to the insurance contract. The previous table does not capture this type of indirect exposure to the Monolines.

Subsequent to June 30, 2008, the Company settled a portion of its exposure to A. The settlement reduced the notional amount of A subprime trading asset exposure by \$1.4 billion and the associated market value exposure, which excludes the credit market value adjustment, by \$1.2 billion. The transaction was settled for a gain relative to the June 30, 2008 net market value exposure, which includes the credit market value adjustment related to this position.

Exposure to Commercial Real Estate

The Company, through its business activities and as a capital markets participant, incurs exposures that are directly or indirectly tied to the global commercial real estate market. These exposures are represented primarily by the following three categories:

(1) Assets held at fair value: approximately \$12.1 billion of securities, loans and other items linked to commercial real estate that are carried at fair value as Trading assets, approximately \$4.7 billion of commercial real estate loans and loan commitments classified as held-for-sale and measured at the lower of cost or market (LOCOM) and approximately \$2.3 billion of securities backed by commercial real estate carried at fair value as available-for-sale Investments. Changes in fair value for these Trading assets and held-for-sale loans and loan commitments are reported in current earnings, while changes in fair value for these available-for-sale Investments are reported in OCI with other-than-temporary impairments reported in current earnings.

The majority of these exposures are classified as Level 3 in the fair value hierarchy. In recent months, weakening activity in the trading markets for some of these instruments resulted in reduced liquidity, thereby decreasing the observable inputs for such valuations and could have an adverse impact on how these instruments are valued in the future if such conditions persist.

(2) Loans and commitments: approximately \$20.7 billion of commercial real estate loan exposures, all of which are recorded at cost, less loan loss reserves. The impact from changes in credit is reflected in the calculation of the allowance for credit losses and in net credit losses.

(3) Equity and other investments: Approximately \$5.3 billion of equity and other investments such as limited partner fund investments.

Exposure to Alt-A Mortgage Securities. See "Events in 2008" on page 7 for a description of incremental write-downs on Alt-A mortgage securities in Securities and Banking.

- (1) Includes the notional amounts for long and short derivative positions.
- (2) Trading derivatives include proprietary positions, as well as certain hedging derivatives instruments that qualify for hedge accounting in accordance with SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS 133).
- (3) Asset/Liability Management Hedges include only those end-user derivative instruments where the changes in market value are recorded to other assets or other liabilities.
- (4) Credit Derivatives are arrangements designed to allow one party (the "protection buyer") to transfer the credit risk of a "reference borrower" or "reference asset" to another party (the "protection seller"). These arrangements allow a protection seller to assume the credit risk associated with a reference borrower or reference asset. The Company has entered into credit derivatives positions for purposes such as risk management, yield enhancement, reduction of credit concentrations, and diversification of overall risk.

The market value adjustments applied by the Company consist of the following items:

Counterparty credit-risk adjustments are applied to derivatives such as over-the-counter instruments, where the base valuation uses market parameters based on the LIBOR interest rate curves. Not all counterparties have the same credit rating as that implied by the relevant LIBOR curve and so it is necessary to take into account the actual credit rating of a counterparty in order to arrive at the true fair value of such an item. Furthermore, the counterparty credit-risk adjustment takes into account the effect of credit-risk mitigants such as pledged collateral and to what extent there is a legal right of offset with a counterparty.

Bilateral or "own" credit risk adjustments are applied to reflect the Company's own credit risk when valuing derivative instruments measured at fair value, in accordance with the requirements of SFAS 157. The methodology is consistent with that applied in generating counterparty credit risk adjustments, but incorporates the Company's own credit risk as observed in the credit default swap market. As for counterparty credit risk, own credit-risk adjustments include the impact of credit-risk mitigants.

Liquidity adjustments are applied to items in Level 2 or Level 3 of the fair-value hierarchy (see note 17 on page 110 for more details) to ensure that the fair value reflects the price at which the entire position could be liquidated. The liquidity reserve is based on the bid/offer spread for an instrument, amended to the extent that the size and nature of the position would result in its being liquidated outside that bid/offer spread.

Credit Derivatives

The Company makes markets in and trades a range of credit derivatives, both on behalf of clients as well as for its own account. Through these contracts, the Company either purchases or writes protection on either a single-name or portfolio basis. The Company uses credit derivatives to help mitigate credit risk in its corporate loan portfolio and other cash positions, to take proprietary trading positions, and to facilitate client transactions.

Credit derivatives generally require that the seller of credit protection make payments to the buyer upon the occurrence of predefined events (settlement triggers). These settlement triggers are defined by the form of the derivative and the referenced credit and are generally limited to the market standard of failure to pay on indebtedness and bankruptcy of the reference credit and, in a more limited range of transactions, debt restructuring. Credit derivative transactions referring to emerging market reference credits will also typically include additional settlement triggers to cover the acceleration of indebtedness and the risk of repudiation or a payment moratorium. In certain transactions on a portfolio of referenced credits or asset-backed securities, the seller of protection may not be required to make payment until a specified amount of losses has occurred with respect to the portfolio and/or may only be required to pay for losses up to a specified amount.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following tables summarize the key characteristics of the Company's credit derivative portfolio by activity, counterparty and derivative form as of June 30, 2008 and December 31, 2007:

Reclassified to conform to current period's presentation.

Edgar Filing: CITIGROUP INC - Form 10-Q

The market values shown are prior to the application of any netting agreements, cash collateral, and market or credit value adjustments.

The Company actively participates in trading a variety of credit derivatives products as both an active two-way market-maker for clients and to manage credit risk. During 2007, Citigroup and the industry experienced a material increase in trading volumes. The volatility and liquidity challenges in the credit markets during the third and fourth quarters drove derivatives trading volumes as credit derivatives became the instrument of choice for managing credit risk. The majority of this activity was transacted with other financial intermediaries, including both banks and broker-dealers. During the full year 2007, the total notional amount of protection purchased and sold increased \$906 billion and \$824 billion, respectively, and by various market participants. The total market value increase of \$69 billion for each protection purchased and sold was primarily due to an increase in volume growth of \$63 billion and \$62 billion, and market spread changes of \$6 billion and \$7 billion for protection purchased and sold, respectively.

During the first six months of 2008, the total notional amount of protection purchased and sold decreased \$32 billion and \$42 billion, respectively as volume continued to grow. The corresponding market value increased \$60 billion for protection purchased and \$44 billion for protection sold. These market value increases were primarily due to changes in market spreads.

The Company generally has a mismatch between the total notional amounts of protection purchased and sold, and it may hold the reference assets directly rather than entering into offsetting credit derivative contracts as and when desired. The open risk exposures from credit derivative contracts are largely matched after certain cash positions in reference assets are considered and after notional amounts are adjusted, either to a duration-based equivalent basis, or to reflect the level of subordination in tranching structures.

The Company actively monitors its counterparty credit risk in credit derivative contracts. Approximately 83% and 77% of the receivables as of June 30, 2008 and December 31, 2007, respectively, are from counterparties with which the Company maintains collateral agreements. A majority of the Company's top 15 counterparties (by receivable balance owed to the

Edgar Filing: CITIGROUP INC - Form 10-Q

Company) are banks, financial institutions or other dealers. Contracts with these counterparties do not include ratings-based termination events. However, counterparty rating downgrades may have an incremental effect by lowering the threshold at which the Company may call for additional collateral. A number of the remaining significant counterparties are Monolines. See page 31 for a discussion of the Company's exposure to monolines. The master agreements with these Monolines are generally unsecured. As with all derivative contracts, the Company considers counterparty credit risk in the valuation of its positions and recognizes credit valuation adjustments as appropriate. During the second quarter of 2008, the Company recorded an additional \$2.430 billion in credit market value adjustments on market value exposures to the Monolines as a result of widening credit spreads and an increase in the expected exposure to the Monolines.

MARKET RISK MANAGEMENT PROCESS

Market risk encompasses liquidity risk and price risk, both of which arise in the normal course of business of a global financial intermediary. Liquidity risk is the risk that an entity may be unable to meet a financial commitment to a customer, creditor, or investor when due. Liquidity risk is discussed in the "Capital Resources and Liquidity" section beginning on page 47. Price risk is the earnings risk from changes in interest rates, foreign exchange rates, equity and commodity prices, and in their implied volatilities. Price risk arises in non-trading portfolios, as well as in trading portfolios.

Interest Rate Exposure (IRE)

The exposures in the following table represent the approximate annualized risk to Net Interest Revenue (NIR) assuming an unanticipated parallel instantaneous 100bp change, as well as a more gradual 100bp (25bps per quarter) parallel change in rates as compared with the market forward interest rates in selected currencies.

<i>In millions of dollars</i>	June 30, 2008		March 31, 2008		June 30, 2007	
	Increase	Decrease	Increase	Decrease	Increase	Decrease
U.S. dollar						
Instantaneous change	\$ (1,236)	\$ 1,170	\$ (1,423)	\$ 1,162	\$ (572)	\$ 553

Pound sterling						
Instantaneous change	\$ 13	\$ (13)	\$ (17)	\$ 17	\$ (19)	\$ 19
Gradual change	\$ 15	\$ (15)	\$ (4)	\$ 4	\$ 3	\$ (3)

NM

Not meaningful. A 100 basis point decrease in interest rates would imply negative rates for the Japanese yen yield curve.

The changes in the U.S. dollar interest rate exposures from March 31, 2008 primarily reflect movements in customer-related asset and liability mix, the expected impact of market rates on customer behavior, as well as Citigroup's view of prevailing interest rates.

The following table shows the risk to NIR from six different changes in the implied forward rates. Each scenario assumes that the rate change will occur on a gradual basis every three months over the course of one year.

Edgar Filing: CITIGROUP INC - Form 10-Q

	<u>Scenario 1</u>	<u>Scenario 2</u>	<u>Scenario 3</u>	<u>Scenario 4</u>	<u>Scenario 5</u>	<u>Scenario 6</u>
Overnight rate change (bp)		100	200	(200)	(100)

(1)

The Sub-Prime Group (SPG) exposures became fully integrated into VAR during the first quarter of 2008. As a result, June 30, 2008 and second quarter 2008 average VAR increased by approximately \$95 million and \$135 million, respectively. March 31, 2008 and first quarter 2008 average VAR increased by approximately \$108 million and \$166 million, respectively.

The specific risk only component represents the level of equity and debt issuer-specific risk embedded in VAR. Citigroup's specific risk model conforms to the 4x-multiplier treatment and is subject to extensive annual hypothetical back-testing.

The table below provides the range of VAR in each type of trading portfolio that was experienced during the quarters ended:

<i>In millions of dollars</i>	<u>June 30, 2008</u>		<u>March 31, 2008</u>		<u>June 30, 2007</u>

June 30, 2007

OPERATIONAL RISK MANAGEMENT PROCESS

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people or systems, or from external events. It includes the reputation and franchise risk associated with business practices or market conduct that the Company undertakes. Operational risk is inherent in Citigroup's global business activities and, as with other risk types, is managed through an overall framework with checks and balances that include:

Recognized ownership of the risk by the businesses;

Oversight by independent risk management; and

Independent review by Audit and Risk Review (ARR).

Framework

Citigroup's approach to operational risk is defined in the Citigroup Risk and Control Self-Assessment (RCSA)/Operational Risk Policy.

The objective of the Policy is to establish a consistent, value-added framework for assessing and communicating operational risk and the overall effectiveness of the internal control environment across Citigroup. Each major business segment must implement an operational risk process consistent with the requirements of this Policy.

The RCSA standards establish a formal governance structure to provide direction, oversight, and monitoring of Citigroup's RCSA programs. The RCSA standards for risk and control assessment are applicable to all businesses and staff functions. They establish RCSA as the process whereby important risks inherent in the activities of a business are identified and the effectiveness of the key controls over those

Edgar Filing: CITIGROUP INC - Form 10-Q

risks are evaluated and monitored. RCSA processes facilitate Citigroup's adherence to internal control over financial reporting, regulatory requirements (including Sarbanes-Oxley) FDICIA, the International Convergence of Capital Measurement and Capital Standards (Basel II), and other corporate initiatives, including Operational Risk Management and alignment of capital assessments with risk management objectives. The entire process is subject to audit by Citigroup's ARR, and the results of RCSA are included in periodic management reporting, including reporting to senior management and the Audit and Risk Management Committee.

The operational risk standards facilitate the effective communication of operational risk both within and across businesses. Information about the businesses' operational risk, historical losses, and the control environment is reported by each major business segment and functional area, and summarized for senior management and the Citigroup Board of Directors.

Measurement and Basel II

To support advanced capital modeling and management, the businesses are required to capture relevant operational risk information. The risk capital calculation is designed to qualify as an "Advanced Measurement Approach" (AMA) under Basel II. It uses a combination of internal and external loss data to support statistical modeling of capital requirement estimates, which are then adjusted to reflect qualitative data regarding the operational risk and control environment.

Information Security and Continuity of Business

Information security and the protection of confidential and sensitive customer data are a priority of Citigroup. The Company has implemented an Information Security Program that complies with the Gramm-Leach-Bliley Act and other regulatory guidance. The Information Security Program is reviewed and enhanced periodically to address emerging threats to customers' information.

The Corporate Office of Business Continuity, with the support of senior management, continues to coordinate global preparedness and mitigate business continuity risks by reviewing and testing recovery procedures.

FFIEC CROSS-BORDER RISK

The table below shows all countries where total Federal Financial Institutions Examination Council (FFIEC) cross-border outstandings exceed 0.75% of total Citigroup assets:

	June 30, 2008					December 31, 2007

INTEREST REVENUE/EXPENSE AND YIELDS

Average Rates Interest Revenue, Interest Expense, and Net Interest Margin

<i>In millions of dollars</i>	2nd Qtr. 2008	1st Qtr. 2008	2nd Qtr. 2007	Change 2Q08 vs. 2Q07
Interest Revenue(1)	\$ 27,902	\$ 29,702	\$ 30,369	(8)%
Interest Expense(2)	13,597	16,303	18,971	(28)
Net Interest Revenue(1)(2)	\$ 14,305	\$ 13,399	\$ 11,398	26%
Interest Revenue Average Rate	6.21%	6.29%	6.43%	(22) bps
Interest Expense Average Rate	3.30%	3.76%	4.42%	(112) bps
Net Interest Margin (NIM)	3.18%	2.84%	2.41%	77 bps
Interest Rate Benchmarks:				
Federal Funds Rate End of Period	2.00%	2.25%	5.25%	(325) bps
2 Year U.S. Treasury Note Average Rate	2.42%	2.03%	4.80%	(238) bps
10 Year U.S. Treasury Note Average Rate	3.88%	3.67%	4.85%	(97) bps
10 Year vs. 2 Year Spread	146 bps	164 bps	5 bps	

(1) Excludes taxable equivalent adjustment (based on the U.S. Federal statutory tax rate of 35%) of \$65 million, \$48 million, and \$45 million for the second quarter of 2008, the first quarter of 2008, and the second quarter of 2007, respectively.

(2) Excludes expenses associated with hybrid financial instruments and beneficial interest in consolidated VIEs. These obligations are classified as Long-Term Debt and accounted for at fair value with changes recorded in Principal Transactions. In addition, the majority of the funding provided by Treasury to CitiCapital operations is excluded from this line.

A significant portion of the Company's business activities are based upon gathering deposits and borrowing money and then lending or investing those funds, including market-making activities in tradable securities. Net interest margin (NIM) is calculated by dividing annualized gross interest revenue less gross interest expense by average interest earning assets.

Edgar Filing: CITIGROUP INC - Form 10-Q

During the second quarter of 2008, the significantly lower cost of funding more than offset the lower asset yields, resulting in higher NIM. On the assets side, the average yield was negatively impacted by the decline in the rates for Fed Funds Sold as well as lower yields of the Consumer loan credit card receivables portfolio.

Edgar Filing: CITIGROUP INC - Form 10-Q

	Average Volume	Interest Revenue	% Average Rate
Total assets	\$ 2,260,618	\$ 2,051,939	

- (1) Interest revenue excludes the taxable equivalent adjustments (based on the U.S. federal statutory tax rate of 35%) of \$113 million and \$60 million for the first six months of 2008 and 2007, respectively.
- (2) Interest rates and amounts include the effects of risk management activities associated with the respective asset and liability categories. See Note 16 on page 106.
- (3) Monthly or quarterly averages have been used by certain subsidiaries where daily averages are unavailable.
- (4) Detailed average volume, interest revenue and interest expense exclude discontinued operations. See Note 2 on page 80.
- (5) Average rates reflect prevailing local interest rates, including inflationary effects and monetary correction in certain countries.
- (6) Average volumes of securities borrowed or purchased under agreements to resell are reported net pursuant to FIN 41 and interest revenue excludes the impact of FIN 41.
- (7) The fair value carrying amounts of derivative and foreign exchange contracts are reported in non-interest-earning assets and other non-interest bearing liabilities.
- (8) Interest expense on Trading account liabilities of the Institutional Clients Group is reported as a reduction of interest revenue. Interest revenue and interest expense on cash collateral positions are reported in Trading account assets and Trading account liabilities, respectively.
- (9) Includes cash basis loans.

Reclassified to conform to the current period's presentation.

CAPITAL RESOURCES AND LIQUIDITY**CAPITAL RESOURCES**

Citigroup is subject to risk-based capital ratio guidelines issued by the FRB. Capital adequacy is measured via two risk-based ratios, Tier 1 and Total Capital (Tier 1 + Tier 2 Capital). Tier 1 Capital is considered core capital while Total Capital also includes other items such as subordinated debt and loan loss reserves. Both measures of capital are stated as a percent of risk-adjusted assets. Risk-adjusted assets are measured primarily on their perceived credit risk and include certain off-balance-sheet exposures, such as unfunded loan commitments and letters of credit and the notional amounts of derivative and foreign exchange contracts. Citigroup is also subject to the Leverage Ratio requirement, a non-risk-based asset ratio, which is defined as Tier 1 Capital as a percentage of adjusted average assets.

To be "well capitalized" under federal bank regulatory agency definitions, a bank holding company must have a Tier 1 Capital Ratio of at least 6%, a Total Capital Ratio of at least 10%, and a Leverage Ratio of at least 3%, and not be subject to an FRB directive to maintain higher capital levels.

As noted in the following table, Citigroup maintained a "well capitalized" position at June 30, 2008 and December 31, 2007.

Citigroup Regulatory Capital Ratios(1)(2)

	June 30, 2008(3)	December 31, 2007
Tier 1 Capital	8.74%	7.12%
Total Capital (Tier 1 and Tier 2)	12.29	10.70
Leverage(4)	5.04	4.03

- (1) The FRB granted industry-wide interim capital relief for the impact of adopting SFAS 158.
- (2) The impact of including Citigroup's own credit rating in valuing liabilities for which the fair value option has been selected is excluded from Tier 1 Capital.
- (3) Includes net deferred tax assets that did not qualify for inclusion in Tier 1 Capital based on the capital guidelines of \$6.2 billion at June 30, 2008.
- (4) Tier 1 Capital divided by adjusted average assets.

Components of Capital Under Regulatory Guidelines

<i>In millions of dollars</i>	Jun. 30, 2008	Dec. 31,(1) 2007
Tier 1 Capital		
Common stockholders' equity(2)	\$ 108,981	\$ 113,447
Qualifying perpetual preferred stock	27,424	
Qualifying mandatorily redeemable securities of subsidiary trusts	23,658	23,594
Minority interest	1,656	4,077
Less: Net unrealized gains/(losses) on securities available-for-sale(3)	(3,244)	471
Less: Accumulated net losses on cash flow hedges, net of tax	(3,923)	(3,163)
Less: Pension liability adjustment, net of tax(4)	(1,221)	(1,057)
Less: Cumulative effect included in fair value of financial liabilities attributable to credit worthiness, net of tax(5)	1,233	1,352
Less: Restricted Core Capital Elements(6)		1,364
Less: Disallowed Deferred Tax Assets(7)	6,208	
Less: Intangible assets:		
Goodwill	42,386	41,053
Other disallowed intangible assets	11,910	10,511
Other	(1,455)	(1,361)
Total Tier 1 Capital	\$ 106,915	\$ 89,226
Tier 2 Capital		
Allowance for credit losses(8)	\$ 15,457	\$ 15,778
Qualifying debt(9)	27,253	26,690
Unrealized marketable equity securities gains(3)	716	1,063
Restricted Core Capital Elements(6)		1,364
Total Tier 2 Capital	\$ 43,426	\$ 44,895
Total Capital (Tier 1 and Tier 2)	\$ 150,341	\$ 134,121
Risk-Adjusted Assets(10)	\$ 1,223,313	\$ 1,253,321

- (1) Reclassified to conform to the current period's presentation.
- (2) Reflects prior period adjustment to opening retained earnings as presented in the consolidated statement of changes in stockholders' equity on page 73.
- (3) Tier 1 Capital excludes unrealized gains and losses on debt securities available-for-sale in accordance with regulatory risk-based capital guidelines. Institutions are required to deduct from Tier 1 Capital net unrealized holding gains on available-for-sale equity securities with readily determinable fair values, net of tax. The federal bank regulatory agencies permit institutions to include in Tier 2 Capital up to 45% of pretax net unrealized holding gains on available-for-sale equity securities with readily determinable fair values, net of tax.
- (4) The FRB granted industry-wide interim capital relief for the impact of adopting SFAS 158.
- (5) The impact of including Citigroup's own credit rating in valuing liabilities for which the fair value option has been selected is excluded from Tier 1 Capital.
- (6)

Edgar Filing: CITIGROUP INC - Form 10-Q

Represents the excess of allowable restricted core capital in Tier 1 Capital. Restricted core capital is limited to 25% of all core capital elements, net of goodwill.

- (7) Represents net deferred tax assets that did not qualify for inclusion in Tier 1 capital based on the capital guidelines at June 30, 2008.
- (8) Can include up to 1.25% of risk-adjusted assets. Any excess allowance is deducted from risk-adjusted assets.
- (9) Includes qualifying subordinated debt in an amount not exceeding 50% of Tier 1 Capital.
- (10) Includes risk-weighted credit equivalent amounts, net of applicable bilateral netting agreements, of \$109.0 billion for interest rate, commodity and equity derivative contracts and foreign-exchange contracts as of June 30, 2008, compared with \$91.3 billion as of December 31, 2007. Market-risk-equivalent assets included in risk-adjusted assets amounted to \$102.6 billion at June 30, 2008 and \$109.0 billion at December 31, 2007, respectively. Risk-adjusted assets also include the effect of other off-balance-sheet exposures, such as unused loan commitments and letters of credit, and reflect deductions for certain intangible assets and any excess allowance for credit losses.

Common stockholders' equity decreased approximately \$4.4 billion to \$109.0 billion, representing 5.2% of total assets as of June 30, 2008 from \$113.4 billion and 5.2% at December 31, 2007.

During the first six months of 2008, the Company completed the following common stock and preferred stock issuances:

\$12.5 billion of Convertible Preferred Stock in a Private Offering

Approximately \$3.2 billion of Convertible Preferred Stock in a Public Offering

Approximately \$11.7 billion of Straight Preferred Stock in Public Offerings

Approximately \$4.9 billion of Common Stock in a Public Offering

Common Equity

The table below summarizes the change in common stockholders' equity:

In billions of dollars

Common Equity, December 31, 2007	\$ 113.4
Net income (loss)	(7.6)
Employee benefit plans and other activities	1.2
Dividends	(3.9)
Issuance of common stock	4.9
Issuance of shares for Nikko Cordial acquisition	4.4
Net change in Accumulated other comprehensive income (loss), net of tax	(3.4)
Common Equity, June 30, 2008	\$ 109.0

As of June 30, 2008, \$6.7 billion remained under authorized repurchase programs after the repurchase of \$0.7 billion in shares during 2007. As a result of developments in the latter half of 2007 and the first half of 2008, including write-downs, it is anticipated that the Company will not resume its share repurchase program in the near future.

Capital Resources of Citigroup's Depository Institutions

Citigroup's subsidiary depository institutions in the United States are subject to risk-based capital guidelines issued by their respective primary federal bank regulatory agencies, which are similar to the FRB's guidelines. To be "well capitalized" under federal bank regulatory agency definitions, Citigroup's depository institutions must have a Tier 1 Capital Ratio of at least 6%, a Total Capital (Tier 1 + Tier 2 Capital) Ratio of at least 10% and a Leverage Ratio of at least 5%, and not be subject to a regulatory directive to meet and maintain higher capital levels.

At June 30, 2008, all of Citigroup's subsidiary depository institutions were "well capitalized" under the federal regulatory agencies' definitions, including Citigroup's primary depository institution, Citibank, N.A., as noted in the following table:

Citibank, N.A. Components of Capital and Ratios Under Regulatory Guidelines(1)(2)

<i>In billions of dollars</i>	June 30, 2008(3)	December 31, 2007
Tier 1 Capital	\$ 79.9	\$ 82.0
Total Capital (Tier 1 and Tier 2)	119.7	121.6
Tier 1 Capital Ratio	8.92%	8.98%
Total Capital (Tier 1 and Tier 2) Ratio	13.36	13.33
Leverage Ratio(4)	6.42	6.65

- (1) The U.S. Banking Agencies granted industry-wide interim capital relief for the impact of adopting SFAS 158.
- (2) The impact of including Citigroup's own credit rating in valuing liabilities for which the fair value option has been selected is excluded from Tier 1 Capital.
- (3) Includes net deferred tax assets that did not qualify for inclusion in Tier 1 Capital based on the capital guidelines of \$1.4 billion at June 30, 2008.
- (4) Tier 1 Capital divided by adjusted average assets.

Citibank, N.A. had a net loss of \$1.8 billion for the first six months of 2008.

Edgar Filing: CITIGROUP INC - Form 10-Q

Citibank, N.A. did not issue any additional subordinated notes during the first six months of 2008. For the full year 2007, Citibank, N.A. issued an additional \$5.2 billion of subordinated notes to Citicorp Holdings Inc. that qualify for inclusion in Citibank, N.A.'s Tier 2 Capital. Total subordinated notes issued to Citicorp Holdings Inc. that were outstanding at June 30, 2008 and December 31, 2007, and included in Citibank, N.A.'s Tier 2 Capital, amounted to \$28.2 billion.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following table presents the estimated sensitivity of Citigroup's and Citibank, N.A.'s Capital Ratios to changes of \$100 million of Tier 1 or Total Capital (numerator) or changes of \$1 billion in risk-adjusted assets or adjusted average assets (denominator). This information is provided solely for the purpose of analyzing the impact that a change in the Company's financial position or results of operations has on these ratios. These sensitivities only consider a single change to either a component of Capital, risk-adjusted assets or adjusted average assets. Accordingly, an event that affects more than one factor may have a larger basis point impact than what is reflected in this table.

	Tier 1 Capital Ratio		Total Capital Ratio		Leverage Ratio	
	Impact of \$100 million change in Tier 1 Capital	Impact of \$1 billion change in risk-adjusted assets	Impact of \$100 million change in Total Capital	Impact of \$1 billion change in risk-adjusted assets	Impact of \$100 million change in Tier 1 Capital	Impact of \$1 billion change in adjusted average assets
Citigroup	0.8 bps	0.7 bps	0.8 bps	1.0 bps	0.5 bps	0.2 bps
Citibank, N.A.	1.1 bps	1.0 bps	1.1 bps	1.5 bps	0.8 bps	0.5 bps
Broker-Dealer Subsidiaries						

At June 30, 2008, Citigroup Global Markets Inc., an indirect wholly owned subsidiary of Citigroup Global Market Holdings Inc. (CGMHI), had net capital, computed in accordance with the Net Capital Rule, of \$7.3 billion, which exceeded the minimum requirement by \$5.5 billion.

In addition, certain of the Company's broker-dealer subsidiaries are subject to regulation in the other countries in which they do business, including requirements to maintain specified levels of net capital or its equivalent. The Company's broker-dealer subsidiaries were in compliance with their capital requirements at June 30, 2008.

Regulatory Capital Standards Developments

Citigroup supports the move to a new set of risk-based regulatory capital standards, published on June 26, 2004 (and subsequently amended in November 2005) by the Basel Committee on Banking Supervision, consisting of central banks and bank supervisors from 13 countries. The international version of the Basel II framework will allow Citigroup to leverage internal risk models used to measure credit, operational, and market risk exposures to drive regulatory capital calculations.

On December 7, 2007, the U.S. banking regulators published the rules for large banks to comply with Basel II in the U.S. These rules require Citigroup, as a large and internationally active bank, to comply with the most advanced Basel II approaches for calculating credit and operational risk capital requirements. The U.S. implementation timetable consists of a parallel calculation period under the current regulatory capital regime (Basel I) and Basel II, starting any time between April 1, 2008, and April 1, 2010 followed by a three-year transition period, typically starting 12 months after the beginning of parallel reporting. The U.S. regulators have reserved the right to change how Basel II is applied in the U.S. following a review at the end of the second year of the transitional period, and to retain the existing prompt corrective action and leverage capital requirements applicable to banking organizations in the U.S. The Company is currently reviewing its timetable for adoption. The regulators have not determined any regulatory response to changes of accounting treatment regarding Qualifying Special Purpose Entities (QSPEs) or variable interest entities.

FUNDING**Overview**

As a financial holding company, substantially all of Citigroup's net earnings are generated within its operating subsidiaries. These subsidiaries make funds available to Citigroup, primarily in the form of dividends. Certain subsidiaries' dividend paying abilities may be limited by covenant restrictions in credit agreements, regulatory requirements and/or rating agency requirements that also impact their capitalization levels.

During the second half of 2007 and the first six months of 2008, the Company took a series of actions to reduce potential funding risks related to short-term market dislocations. The amount of commercial paper outstanding was reduced and the weighted-average maturity was extended, the Parent Company liquidity portfolio (a portfolio of cash and highly liquid securities) and broker-dealer "cash box" (unencumbered cash deposits) were increased substantially, and the amount of unsecured overnight bank borrowings was reduced. As of June 30, 2008, the Parent Company liquidity portfolio and broker-dealer "cash box" totaled \$64.8 billion as compared with \$24.2 billion at December 31, 2007 and \$11.4 billion at June 30, 2007.

Banking Subsidiaries

There are various legal limitations on the ability of Citigroup's subsidiary depository institutions to extend credit, pay dividends or otherwise supply funds to Citigroup and its nonbank subsidiaries. The approval of the Office of the Comptroller of the Currency, in the case of national banks, or the Office of Thrift Supervision, in the case of federal savings banks, is required if total dividends declared in any calendar year exceed amounts specified by the applicable agency's regulations. State-chartered depository institutions are subject to dividend limitations imposed by applicable state law.

As of June 30, 2008, Citigroup's subsidiary depository institutions could declare dividends to their parent companies, without regulatory approval, of approximately \$6.9 billion. In determining the dividends, each depository institution must also consider its effect on applicable risk-based capital and leverage ratio requirements, as well as policy statements of the federal regulatory agencies that indicate that banking organizations should generally pay dividends out of current operating earnings. Consistent with these considerations, Citigroup estimates that, as of June 30, 2008, its subsidiary depository institutions could distribute dividends to Citigroup of the entire \$6.9 billion.

At June 30, 2008, long-term debt and commercial paper outstanding for Citigroup Parent Company, CGMHI, Citigroup Funding Inc. (CFI) and Citigroup's Subsidiaries were as follows:

<i>In billions of dollars</i>	Citigroup Parent company	CGMHI(1)	Citigroup Funding Inc.(1)	Other Citigroup Subsidiaries(2)
Long-term debt	\$ 185.5	\$ 21.2	\$ 45.3	\$ 165.9
Commercial paper	\$	\$	\$ 32.1	\$ 1.9

(1) Citigroup Inc. guarantees all of CFI's debt and CGMHI's publicly issued securities.

(2) At June 30, 2008, approximately \$84.5 billion relates to collateralized advances from the Federal Home Loan Bank and \$28.3 billion related to the consolidation of the ICG Structured Investment Vehicles.

See Note 12 to the Consolidated Financial Statements on page 90 for further detail on long-term debt and commercial paper outstanding.

Citigroup's ability to access the capital markets and other sources of wholesale funds, as well as the cost of these funds, is highly dependent on its credit ratings. The table below indicates the current ratings for Citigroup.

On April 18, 2008, Fitch Ratings lowered Citigroup Inc.'s and Citibank, N.A.'s senior debt rating to "AA-" from "AA". In doing so, Fitch removed the rating from "Watch Negative" and applied a "Negative Outlook". Also on April 18, 2008, Moody's Investors Service placed the ratings of Citigroup Inc. and its subsidiaries on "Negative Outlook", and Standard & Poor's changed the outlook on Citigroup and its subsidiaries ratings to "CreditWatch Negative" from "Negative Outlook".

Edgar Filing: CITIGROUP INC - Form 10-Q

On June 2, 2008, Standard & Poor's removed the "CreditWatch with negative implications" designation from Citigroup Inc.'s and Citibank, N.A.'s senior debt ratings and changed the outlook on the ratings to "Negative".

As a result of the Citigroup guarantee, changes in ratings and ratings outlooks for Citigroup Funding Inc. are the same as those of Citigroup Inc. noted above.

Citigroup's Debt Ratings as of June 30, 2008

	Citigroup Inc.		Citigroup Funding Inc.		Citibank, N.A.	
	Senior Debt	Commercial paper	Senior debt	Commercial paper	Long-term	Short-term
Fitch Ratings	AA-	F1+	AA-	F1+	AA-	F1+
Moody's Investors Service	Aa3	P-1	Aa3	P-1	Aa1	P-1
Standard & Poor's	AA-	A-1+	AA-	A-1+	AA	A-1+

51

LIQUIDITY

Citigroup's liquidity management is structured to optimize the free flow of funds through the Company's legal and regulatory structure. Principal constraints relate to legal and regulatory limitations, sovereign risk and tax considerations. Consistent with these constraints, Citigroup's primary objectives for liquidity management are established by entity and in aggregate across three main operating entities as follows:

Parent Holding Company

Broker Dealer Entities

Bank Entities

Within this construct, there is a funding framework for the Company's activities. The primary benchmark for the Parent and Broker Dealer Entities is that on a combined basis, Citigroup maintains sufficient liquidity to meet all maturing unsecured debt obligations due within a one-year time horizon without accessing the unsecured markets. The resulting "short-term ratio" is monitored on a daily basis.

OFF-BALANCE SHEET ARRANGEMENTS

Overview

Citigroup and its subsidiaries are involved with numerous types of off-balance-sheet arrangements, including special purpose entities (SPEs), lines and letters of credit and loan commitments.

Uses of SPEs

An SPE is an entity in the form of a trust or other legal vehicle designed to fulfill a specific limited need of the company that organized it.

The principal uses of SPEs are to obtain liquidity and favorable capital treatment by securitizing certain of Citigroup's financial assets, to assist clients in securitizing their financial assets, and to create investment products for clients. SPEs may be organized as trusts, partnerships, or corporations. In a securitization, the company transferring assets to an SPE converts those assets into cash before they would have been realized in the normal course of business, through the SPEs issuing debt and equity instruments, certificates, commercial paper, and other notes of indebtedness, which are recorded on the balance sheet of the SPE and not reflected on the transferring company's balance sheet, assuming applicable accounting requirements are satisfied. Investors usually have recourse to the assets in the SPE and often benefit from other credit enhancements, such as a collateral account or overcollateralization in the form of excess assets in the SPE, or from a liquidity facility, such as a line of credit, liquidity put option or asset purchase agreement. The SPE can typically obtain a more favorable credit rating from rating agencies than the transferor could obtain for its own debt issuances, resulting in less expensive financing costs. The SPE may also enter into derivative contracts in order to convert the yield or currency of the underlying assets to match the needs of the SPE investors, or to limit or change the credit risk of the SPE. Citigroup may be the provider of certain credit enhancements as well as the counterparty to any related derivative contracts.

SPEs may be Qualifying SPEs (QSPEs) or Variable Interest Entities (VIEs) or neither.

Qualifying SPEs

QSPEs are a special class of SPEs defined in FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities" (SFAS 140). These SPEs have significant limitations on the types of assets and derivative instruments they may own and the types and extent of activities and decision-making they may engage in. Generally, QSPEs are passive entities designed to purchase assets and pass through the cash flows from those assets to the investors in the QSPE. QSPEs may not actively manage their assets through discretionary sales and are generally limited to making decisions inherent in servicing activities and issuance of liabilities. QSPEs are generally exempt from consolidation by the transferor of assets to the QSPE and any investor or counterparty.

Variable Interest Entities

Edgar Filing: CITIGROUP INC - Form 10-Q

VIEs are entities defined in FASB Interpretation No. 46, "Consolidation of Variable Interest Entities (revised December 2003)" (FIN 46-R), and are entities that have either a total equity investment at risk that is insufficient to permit the entity to finance its activities without additional subordinated financial support or whose equity investors lack the characteristics of a controlling financial interest (i.e., ability to make significant decisions through voting rights, right to receive the expected residual returns of the entity, and obligation to absorb the expected losses of the entity). Investors that finance the VIE through debt or equity interests, or other counterparties that provide other forms of support, such as guarantees, subordinated fee arrangements, or certain types of derivative contracts, are variable interest holders in the entity. The variable interest holder, if any, that will absorb a majority of the entity's expected losses, receive a majority of the entity's expected residual returns, or both, is deemed to be the primary beneficiary and must consolidate the VIE. Consolidation under FIN 46-R is based on *expected* losses and residual returns, which consider various scenarios on a probability-weighted basis. Consolidation of a VIE is, therefore, determined based primarily on variability generated in scenarios that are considered most likely to occur, rather than based on scenarios that are considered more remote. Certain variable interests may absorb significant amounts of losses or residual returns contractually, but if those scenarios are considered very unlikely to occur, they may not lead to consolidation of the VIE.

All of these facts and circumstances are taken into consideration when determining whether the Company has variable interests that would deem it the primary beneficiary and, therefore, require consolidation of the related VIE or otherwise rise to the level where disclosure would provide useful information to the users of the Company's financial statements. In some cases, it is qualitatively clear based on the extent of the Company's involvement or the seniority of its investments that the Company is not the primary beneficiary of the VIE. In other cases, a more detailed and quantitative analysis is required to make such a determination.

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company generally considers the following types of involvement to be significant:

Assisting in the structuring of a transaction and retaining any amount of debt financing (e.g., loans, notes, bonds, or other debt instruments) or an equity investment (e.g., common shares, partnership interests, or warrants);

Writing a "liquidity put" or other liquidity facility to support the issuance of short-term notes;

Writing credit protection (e.g., guarantees, letters of credit, credit default swaps or total return swaps where the Company *receives* the total return or risk on the assets held by the VIE); or

Certain transactions where the Company is the investment manager and receives variable fees for services.

Thus, the Company's definition of "significant" involvement generally includes all variable interests held by the Company, even those where the likelihood of loss or the notional amount of exposure to any single legal entity is small. Involvement with a VIE as described above, regardless of the seniority or perceived risk of the Company's involvement, is included as significant.

In various other transactions the Company may act as a derivative counterparty (for example, interest rate swap, cross-currency swap, or purchaser of credit protection under a credit default swap or total return swap where the Company *pays* the total return on certain assets to the SPE); may act as underwriter or placement agent; may provide administrative, trustee, or other services; or may make a market in debt securities or other instruments issued by VIEs. The Company generally considers such involvement, by itself, "not significant" under FIN 46-R.

Citigroup's total involvement with SPEs, including QSPEs, consolidated VIEs and significant unconsolidated VIEs as of June 30, 2008 and December 31, 2007 is presented below:

<i>In millions of dollars of SPE assets</i>	June 30, 2008

(1) Updated to conform to the current period's presentation.

(2) A significant unconsolidated VIE is an entity where the Company has any variable interest considered to be significant as discussed above, regardless of the likelihood of loss, or the notional amount of exposure.

These tables do not include:

Certain venture capital investments made by some of the Company's private equity subsidiaries as the Company accounts for these investments in accordance with the Investment Company Audit Guide.

Certain limited partnerships where the Company is the general partner and the limited partners have the right to replace the general partner or liquidate the funds.

Certain investment funds for which the Company provides investment management services and personal estate trusts for which the Company provides administrative, trustee and/or investment management services.

VIEs and QSPEs structured by third parties where the Company holds securities in trading inventory. These investments are made on arm's-length terms, are typically held for relatively short periods of time and are not considered to represent significant involvement in the VIE.

VIE structures in which the Company transferred assets to the VIE that did not qualify as a sale, and where the Company did not have any other involvement that is deemed to be a variable interest with the VIE that was deemed significant. These transfers are accounted for as secured borrowings by the Company.

The significant variances between the balances reported in the June 30, 2008 and December 31, 2007 tables are primarily due to:

An increase in Consumer Banking mortgage QSPE assets of \$61 billion from new loan securitizations.

A decrease of significant unconsolidated CDOs of \$26 billion resulting from the consolidation of certain CDOs as discussed on page 58, liquidations of other certain CDOs, and asset sales.

An increase of significant unconsolidated asset based financings of \$26 billion due to higher levels of assets supporting the Company's financing positions, increased business activity, and the senior debt securities retained in the Company's April 17, 2008 sale of a corporate loan portfolio. The latter is further discussed on page 66.

A decrease in significant unconsolidated TOBs of \$6 billion which reflects the liquidations of customer and unconsolidated proprietary TOB trusts.

A decrease in consolidated assets of structured investment vehicles of \$24 billion due to the execution of their asset reduction plan as described on page 105.

An increase in consolidated assets of investment funds of \$5 billion due to the consolidation of Falcon multi-strategy fixed income funds and the ASTA/MAT municipal funds as further discussed on page 64.

Primary Uses of SPEs by Consumer Banking

Securitization of Credit Card Receivables

Credit card receivables are securitized through trusts, which are established to purchase the receivables. Credit card securitizations are revolving securitizations; that is, as customers pay their credit card balances, the cash proceeds are used to purchase new receivables and replenish the receivables in the trust. The Company relies on securitizations to fund a significant portion of its managed *N.A. Cards* business, which includes both on-balance-sheet and securitized receivables.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following table reflects amounts related to the Company's securitized credit card receivables at June 30, 2008 and December 31, 2007:

<i>In billions of dollars</i>	June 30, 2008	December 31, 2007
Principal amount of credit card receivables in trusts	\$ 122.2	\$ 125.1
Ownership interests in principal amount of trust credit card receivables:		
Sold to investors via trust-issued securities	\$ 103.7	\$ 102.3
Retained by Citigroup as trust-issued securities	6.0	4.5
Retained by Citigroup via non-certificated interests recorded as consumer loans	12.5	18.3
Total ownership interests in principal amount of trust credit card receivables	\$ 122.2	\$ 125.1
Other amounts recorded on the balance sheet related to interests retained in the trusts:		
Amounts receivable from trusts	\$ 4.0	\$ 4.4
Amounts payable to trusts	1.6	1.6
Residual interest retained in trust cash flows	3.1	2.7

In the second quarters of 2008 and 2007, the Company recorded net gains (losses) from securitization of credit card receivables of (\$176) million and \$243 million, and \$45 million and \$578 million during the first six months of 2008 and 2007, respectively. Net gains (losses) reflect the following:

- incremental gains from new securitizations
- the reversal of the allowance for loan losses associated with receivables sold
- net gains on replenishments of the trust assets offset by other-than-temporary impairments
- mark-to-market changes for the portion of the residual interest classified as trading assets

Securitization of Originated Mortgage and Other Consumer Loans

The Company's Consumer business provides a wide range of mortgage and other consumer loan products to its customers. Once originated, the Company often securitizes these loans (primarily mortgage and student loans). In addition to providing a source of liquidity and less expensive funding, securitizing these assets also reduces the Company's credit exposure to the borrowers.

The Company's mortgage and student loan securitizations are primarily non-recourse, thereby effectively transferring the risk of future credit losses to the purchasers of the securities issued by the trust. However, the Company's Consumer business generally retains the servicing rights.

The Company recognized gains related to the securitization of these mortgage and other consumer loan products of \$95 million and \$125 million in the second quarters of 2008 and 2007, respectively, and \$98 million and \$156 million in the first six months of 2008 and 2007, respectively.

Primary Uses of SPEs by Institutional Clients Group

Citi-administered Asset-backed Commercial Paper Conduits

The Company is active in the asset-backed commercial paper conduit business as administrator of several multi-seller commercial paper conduits, and also as a service provider to single-seller and other commercial paper conduits sponsored by third parties.

Edgar Filing: CITIGROUP INC - Form 10-Q

The multi-seller commercial paper conduits are designed to provide the Company's customers access to low-cost funding in the commercial paper markets. The conduits purchase assets from or provide financing facilities to customers and are funded by issuing commercial paper to third-party investors. The conduits generally do not purchase assets originated by the Company. The funding of the conduit is facilitated by the liquidity support and credit enhancements provided by the Company and by certain third parties. As administrator to the conduits, the Company is responsible for selecting and structuring of assets purchased or financed by the conduits, making decisions regarding the funding of the conduits, including determining the tenor and other features of the commercial paper issued, monitoring the quality and performance of the conduits' assets, and facilitating the operations and cash flows of the conduits.

In return, the Company earns structuring fees from clients for individual transactions and earns an administration fee from the conduit, which is equal to the income from client program and liquidity fees of the conduit after payment of interest costs and other fees. This administration fee is fairly stable, since most risks and rewards of the underlying assets are passed back to the customers and, once the asset pricing is negotiated, most ongoing income, costs and fees are relatively stable as a percentage of the conduit's size.

The conduits administered by the Company do not generally invest in liquid securities that are formally rated by third parties. The assets are privately negotiated and structured transactions that are designed to be held by the conduit, rather than actively traded and sold. The yield earned by the conduit on each asset is generally tied to the rate on the commercial paper issued by the conduit, thus passing interest rate risk to the client. Each asset purchased by the conduit is structured with transaction-specific credit enhancement features provided by the third-party seller, including over-collateralization, cash and excess spread collateral accounts, direct recourse or third-party guarantees. Credit enhancements are sized based on historic asset performance to achieve an internal risk rating that, on average, approximates an AA or A rating.

Substantially all of the funding of the conduits is in the form of commercial paper, with a weighted average life generally ranging from 35-45 days. As of June 30, 2008 and December 31, 2007, the weighted average life of the commercial paper issued was approximately 39 days and 30

Edgar Filing: CITIGROUP INC - Form 10-Q

days, respectively. In addition, the conduits have issued Subordinate Loss Notes and equity with a notional amount of approximately \$81 million and \$77 million as of June 30, 2008 and December 31, 2007, respectively, with varying remaining tenors ranging from one to seven years.

The primary credit enhancement provided to the conduit investors is in the form of transaction-specific credit enhancement described above. In addition, there are two additional forms of credit enhancement that protect the commercial paper investors from defaulting assets. First, the Subordinate Loss Notes issued by each conduit absorb any credit losses up to their full notional amount. It is expected that the Subordinate Loss Notes issued by each conduit are sufficient to absorb a majority of the expected losses from each conduit, thereby making the single investor in the Subordinate Loss Note the primary beneficiary under FIN 46-R. Second, each conduit has obtained either a letter of credit from the Company or a surety bond from a monoline insurer that will reimburse the conduit for any losses up to a specified amount, which is generally 8-10% of the conduit's assets. Where surety bonds are obtained, the Company, in turn, provides the surety bond provider a reimbursement guarantee up to a stated amount for aggregate losses incurred by any of the conduits covered by the surety bond. The total of the letters of credit and the reimbursement guarantee provided by the Company is approximately \$2.0 billion and is considered in the Company's maximum exposure to loss. The net result across all multi-seller conduits administered by the Company is that, in the event of defaulted assets in excess of the transaction-specific credit enhancement described above, any losses in each conduit are allocated in the following order:

Subordinate Loss Note holders

the Company

the monoline insurer, if any (up to the 8%-10% cap), and

the commercial paper investors.

The Company, along with third parties, also provides the conduits with two forms of liquidity facilities that are used to provide funding to the conduits in the event of a market disruption, among other events. Each asset of the conduit is supported by a transaction-specific liquidity facility in the form of an asset purchase agreement (APA). Under the APA, the Company has agreed to purchase non-defaulted eligible receivables from the conduit at par. Any assets purchased under the APA are subject to increased pricing. The APA is not designed to provide credit support to the conduit, as it generally does not permit the purchase of defaulted or impaired assets and generally reprices the assets purchased to consider any potential increased credit risk. The APA covers all assets in the conduits and is considered in the Company's maximum exposure to loss. In addition, the Company provides the conduits with program-wide liquidity in the form of short-term lending commitments. Under these commitments, the Company has agreed to lend to the conduits in the event of a short-term disruption in the commercial paper market, subject to specified conditions. The total notional exposure under the program-wide liquidity agreement is \$11.3 billion and is considered in the Company's maximum exposure to loss. The Company receives fees for providing both types of liquidity agreements, and considers these fees to be on fair market terms.

Finally, the Company is one of several named dealers in the commercial paper issued by the conduits and earns a market-based fee for providing such services. Along with third-party dealers, the Company makes a market in the commercial paper and may from time to time fund commercial paper pending sale to a third party. On specific dates with less liquidity in the market, the Company may hold in inventory commercial paper issued by conduits administered by the Company, as well as conduits administered by third parties. The amount of commercial paper issued by its administered conduits held in inventory fluctuates based on market conditions and activity. As of June 30, 2008 and December 31, 2007, the Company owned less than \$100 million and \$10 million, respectively, of commercial paper issued by its administered conduits.

FIN 46-R requires that the Company quantitatively analyze the expected variability of the Conduit to determine whether the Company is the primary beneficiary of the conduit. The Company performs this analysis on a quarterly basis, and has concluded that the Company is not the primary beneficiary of the conduits as defined in FIN 46-R and, therefore, does not consolidate the conduits it administers. In conducting this analysis, the Company considers three primary sources of variability in the conduit: credit risk, interest rate risk and fee variability.

The Company models the credit risk of the conduit's assets using a Credit Value at Risk (C-VaR) model. The C-VaR model considers changes in credit spreads (both within a rating class as well as due to rating upgrades and downgrades), name-specific changes in credit spreads, credit defaults and recovery rates and diversification effects of pools of financial assets. The model incorporates data from independent rating agencies as well as the Company's own proprietary information regarding spread changes, ratings transitions and losses given default. Using this credit data, a Monte Carlo simulation is performed to develop a distribution of credit risk for the portfolio of assets owned by each conduit, which is then applied on a probability-weighted basis to determine expected losses due to credit risk. In addition, the Company continuously monitors the specific credit characteristics of the conduit's assets and the current credit environment to confirm that the C-VaR model used continues to incorporate the Company's best information regarding the expected credit risk of the conduit's assets.

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company also analyzes the variability in the fees that it earns from the conduit using monthly actual historical cash flow data to determine average fee and standard deviation measures for each conduit. Because any unhedged interest rate and foreign currency risk not contractually passed on to customers is absorbed by the fees earned by the Company, the fee variability analysis incorporates those risks.

The fee variability and credit risk variability are then combined into a single distribution of the conduit's overall returns. This return distribution is updated and analyzed on at least a quarterly basis to ensure that the amount of the Subordinate Loss Notes issued to third parties is sufficient to absorb greater than 50% of the total expected variability in the conduit's returns. The expected variability absorbed by the

Edgar Filing: CITIGROUP INC - Form 10-Q

Subordinate Loss Note investors is therefore measured to be greater than the expected variability absorbed by the Company through its liquidity arrangements and other fees earned, the surety bond providers, and the investors in commercial paper and medium-term notes. While the notional amounts of the Subordinate Loss Notes are quantitatively small compared to the size of the conduits, this is reflective of the fact that most of the substantive risks of the conduits are absorbed by the enhancements provided by the sellers and other third parties that provide transaction-level credit enhancement. Because FIN 46-R requires these risks and related enhancements to be excluded from the analysis, the remaining risks and expected variability are quantitatively small. The calculation of variability under FIN46-R focuses primarily on *expected* variability, rather than the risks associated with extreme outcomes (for example, large levels of default) that are expected to occur very infrequently. So while the Subordinate Loss Notes are sized appropriately compared to expected losses as measured in FIN 46-R, they do not provide significant protection against extreme or unusual credit losses.

The following tables describe the important characteristics of assets owned by the administered multi-seller conduits as of June 30, 2008 and December 31, 2007:

	Weighted average life	Credit rating distribution			
		AAA	AA	A	BBB
June 30, 2008	3.7 years	32%	55%	8%	5%
December 31, 2007	2.5 years	30%	59%	9%	2%

Asset Class	% of Total Portfolio	
	June 30, 2008	December 31, 2007
Student loans	22%	21%
Trade receivables	15%	16%
Credit cards and consumer loans	11%	13%
Portfolio finance	15%	11%
Commercial loans and corporate credit	9%	10%
Export finance	9%	9%
Auto	7%	8%
Residential mortgage	5%	7%
Other	7%	5%
Total	100%	100%

Third-party Conduits

The Company also provides liquidity facilities to single- and multi-seller conduits sponsored by third parties. These conduits are independently owned and managed and invest in a variety of asset classes, depending on the nature of the conduit. The facilities provided by the Company typically represent a small portion of the total liquidity facilities obtained by each conduit, and are collateralized by the assets of each conduit. The notional amount of these facilities was approximately \$1.5 billion and \$2.2 billion as of June 30, 2008 and December 31, 2007, respectively. The conduits received \$3 million of funding as of June 30, 2006, compared to zero as of December 31, 2007.

Collateralized Debt Obligations

A collateralized debt obligation (CDO) is an SPE that purchases a pool of assets consisting of asset-backed securities and synthetic exposures through derivatives on asset-backed securities and issues multiple tranches of equity and notes to investors. A third-party manager is typically retained by the CDO to select the pool of assets and manage those assets over the term of the CDO. The Company earns fees for warehousing assets prior to the creation of a CDO, structuring CDOs, and placing debt securities with investors. In addition, the Company has retained interests in many of the CDOs it has structured and makes a market in those issued notes.

A cash CDO, or arbitrage CDO, is a CDO designed to take advantage of the difference between the yield on a portfolio of selected assets, typically residential mortgage-backed securities, and the cost of funding the CDO through the sale of notes to investors. "Cash flow" CDOs are

vehicles in which the CDO passes on cash flows from a pool of assets, while "market value" CDOs pay to investors the market value of the pool of assets owned by the CDO at maturity. Both types of CDOs are typically managed by a third-party asset manager. In these transactions, all of the equity and notes issued by the CDO are funded, as the cash is needed to purchase the debt securities. In a typical cash CDO, a third-party investment manager selects a portfolio of assets, which the Company funds through a "warehouse" financing arrangement prior to the creation of the CDO. The Company then sells the debt securities to the CDO in exchange for cash raised through the issuance of notes. The Company's involvement in cash CDOs after issuance is typically limited to investing in a portion of the notes or loans issued by the CDO, making a market in those securities, and acting as derivative counterparty for interest rate or foreign currency swaps used in the structuring of the CDO.

A synthetic CDO is similar to a cash CDO, except that the CDO obtains exposure to all or a portion of the referenced assets synthetically through derivative instruments, such as credit default swaps. Because the CDO does not need to raise cash sufficient to purchase the entire referenced portfolio, a substantial portion of the senior tranches of risk is typically passed on to CDO investors in the form of unfunded liabilities or derivative instruments. Thus, the CDO writes credit

Edgar Filing: CITIGROUP INC - Form 10-Q

protection on selected referenced debt securities to the Company or third parties, and the risk is then passed on to the CDO investors in the form of funded notes or purchased credit protection through derivative instruments. Any cash raised from investors is invested in a portfolio of collateral securities or investment contracts. The collateral is then used to support the CDO's obligations on the credit default swaps written to counterparties. The Company's involvement in synthetic CDOs after issuance generally includes purchasing credit protection through credit default swaps with the CDO, owning a portion of the capital structure of the CDO in the form of both unfunded derivative positions (primarily super senior exposures discussed below) and funded notes, entering into interest rate swap and total return swap transactions with the CDO, lending to the CDO, and making a market in those funded notes.

The following table describes credit ratings of assets of unconsolidated CDOs with which the Company had significant involvement as of June 30, 2008 and December 31, 2007:

	Weighted average life	Credit rating distribution				
		A or higher	BBB	BB/B	CCC	Unrated
June 30, 2008	4.1 years	20%	14%	14%	40%	12%
December 31, 2007	5.1 years	40%	20%	12%	25%	3%

Asset-Backed Commercial Paper CDOs (ABCP CDOs)

During the second half of 2007, the market interest rates on commercial paper issued by certain CDO structures increased significantly. To pre-empt the formal exercise of liquidity puts provided by the Company to its CDO structures, the Company purchased all of the outstanding commercial paper issued by these entities, which totaled approximately \$25 billion. Because of these purchases, which are deemed to be FIN 46-R reconsideration events, and because the value of the CDOs' commercial paper and subordinated tranches were deteriorating as the underlying collateral of the CDOs (primarily residential mortgage-backed securities) was being downgraded, the Company concluded that it was the primary beneficiary of these entities and began consolidating them in the fourth quarter of 2007.

Upon consolidation, the Company reflected the underlying assets of the CDOs on its balance sheet in Trading account assets at fair value, eliminated the commercial paper assets previously recognized, and recognized the subordinate CDO liabilities (owned by third parties) at fair value. This resulted in a balance sheet gross-up of approximately \$400 million as of December 31, 2007 compared to the prior accounting treatment as unconsolidated VIEs.

During the second quarter of 2008 and the fourth quarter of 2007, the Company recognized pretax losses of \$2.0 billion and \$4.3 billion, respectively, for changes in the fair value of the consolidated CPCDOs' assets.

CDO Super Senior Exposure

In addition to asset-backed commercial paper positions in consolidated CDOs, the Company has retained significant portions of the "super senior" positions issued by certain CDOs. These positions are referred to as "super senior," because they represent the most senior positions in the CDO and, at the time of structuring, were senior to tranches rated AAA by independent rating agencies. However, since inception of these transactions, the subordinate positions have diminished significantly in value and in rating. There have been substantial reductions in value of these super senior positions since the fourth quarter of 2007.

At inception of the transactions, the super senior tranches were well protected from the expected losses of these CDOs. Subsequent declines in value of the subordinate tranches and the super senior tranches in the fourth quarter of 2007 indicated that the super senior tranches now are exposed to a significant portion of the expected losses of the CDOs, based on current market assumptions. The Company evaluates these transactions for consolidation when reconsideration events occur, as defined in FIN 46-R. The Company continues to monitor its involvement in these transactions and, if the Company were to acquire additional interests in these vehicles or if the CDOs' contractual arrangements were to be changed to reallocate expected losses or residual returns among the various interest holders, the Company may be required to consolidate the CDOs. For cash CDOs, the net result of such consolidation would generally be to gross up the Company's balance sheet by the current fair value of the subordinate securities held by third parties, which amounts are not considered material. For synthetic CDOs, the net result of such consolidation may reduce the Company's balance sheet by eliminating what would be intercompany derivative receivables and payables in consolidation.

During the second quarter, the Company purchased additional interests in certain CDO transactions. These purchases were determined to be reconsideration events as defined in FIN46-R, and as a result it was determined that the Company is required to consolidate certain CDO's as it

has become the primary beneficiary. The impact of the consolidation was deemed to be immaterial.

Edgar Filing: CITIGROUP INC - Form 10-Q

The consolidation of these entities reduced the disclosed total assets of significant unconsolidated VIEs reflected above by \$15.6 billion (representing the original cost basis or total notional of the VIE's asset positions), and reduced the Company's disclosed maximum exposure to significant unconsolidated VIEs by \$2.0 billion. Upon consolidating these VIEs, the Company eliminates previously recognized assets and liabilities (including derivative payables and receivables with the VIEs), and recognizes the underlying third party assets and liabilities of the VIEs at current fair value. The current fair value of the assets owned by these CDO VIEs is approximately \$2.9 billion. The consolidation of the CDOs results in a net reduction of assets on the Company's consolidated balance sheet of approximately \$1.6 billion.

Collateralized Loan Obligations

A collateralized loan obligation (CLO) is substantially similar to the CDO transactions described above, except that the assets owned by the SPE (either cash instruments or synthetic exposures through derivative instruments) are corporate loans and to a lesser extent corporate bonds, rather than asset-backed debt securities.

The following table describes credit ratings of assets of unconsolidated CLOs with which the Company had significant involvement as of June 30, 2008 and December 31, 2007, respectively:

	Weighted average life	Credit rating distribution				
		A or Higher	BBB	BB/B	CCC	Unrated
June 30, 2008	3.2 years	4%	5%	81%	0%	10%
December 31, 2007	5.0 years	7%	11%	56%	0%	26%

Mortgage Loan Securitizations

CMB is active in structuring and underwriting residential and commercial mortgage-backed securitizations. In these transactions, the Company or its customer transfers loans into a bankruptcy-remote SPE. These SPEs are designed to be QSPEs as described above. The Company may hold residual interests and other securities issued by the SPEs until they can be sold to independent investors and makes a market in those securities on an ongoing basis. These securities are held as trading assets on the balance sheet, are managed as part of the Company's trading activities, and are marked to market with changes in value recognized in earnings. The Company sometimes retains servicing rights for certain entities. The table on page 53 and 54 shows the assets for mortgage QSPEs in which ICG acted as principal in transferring mortgages to the QSPE.

Asset-Based Financing

The Company provides loans and other forms of financing to VIEs that hold assets. Those loans are subject to the same credit approvals as all other loans originated or purchased by the Company, and related loan loss reserves are reported as part of the Company's Allowance for loan losses. Financings in the form of debt securities or derivatives are, in most circumstances, reported in Trading account assets and accounted for at fair value through earnings.

The primary types of asset-based financing, total assets of the unconsolidated VIEs with significant involvement, and the Company's maximum exposure to loss at June 30, 2008 and December 31, 2007 are shown below. For the Company to realize that maximum loss, the VIE (borrower) would have to default with no recovery from the assets held by the VIE.

<i>In billions of dollars</i>	June 30, 2008		December 31, 2007	
	Total assets	Maximum exposure	Total assets	Maximum exposure
Commercial and other real estate	\$ 48.3	\$ 13.3	\$ 34.3	\$ 16.0
Hedge funds and equities	43.9	14.0	36.0	13.1
Asset purchasing vehicles/SIVs	4.5	1.1	10.2	2.5
Airplanes, ships and other assets	11.0	3.4	11.1	2.7
Corporate loans	10.3	8.7		

Edgar Filing: CITIGROUP INC - Form 10-Q

In billions of dollars

	June 30, 2008		December 31, 2007	
Total	\$ 118.0	\$ 40.5	\$ 91.6	\$ 34.3

The amounts disclosed as corporate loan assets and exposure relate to the senior financing the Company provided to the purchaser of a portfolio of corporate loans, including highly leveraged loans. The Company has purchased credit protection on the senior financing via total return swaps with the third parties who also own the subordinate interests in the loans. The credit risk in the total return swap is protected through margin agreements that provide for both initial margin as well as additional margin at specified triggers.

The Company's involvement in the asset purchasing vehicles and Structured Investment Vehicles (SIV's) sponsored and managed by third parties is primarily in the form of providing backstop liquidity. Those vehicles finance a majority of their asset purchases with commercial paper and short-term notes. Certain of the assets owned by the vehicles have suffered significant declines in fair value, leading to an inability to re-issue maturing commercial paper and short-term notes. Citigroup has been required to provide loans to those vehicles to replace maturing commercial paper and short-term notes, in accordance with the original terms of the backstop liquidity facilities.

Edgar Filing: CITIGROUP INC - Form 10-Q

The asset quality of the third-party asset purchasing vehicle and SIVs to which the Company had provided backstop liquidity as of June 30, 2008 and December 31, 2007 consisted of the following:

	Credit rating distribution				
	A or Higher	BBB	BB/B	CCC	Unrated
June 30, 2008	90%	3%	7%	0%	0%
December 31, 2007	96%	1%	3%	0%	0%

Municipal Securities Tender Option Bond (TOB) Trusts

The Company sponsors TOB trusts that hold fixed- and floating-rate, tax-exempt securities issued by state and local municipalities. The trusts are single-issuer trusts whose assets are purchased from the Company and from the secondary market. The trusts issue long-term senior floating-rate notes ("Floaters") and junior residual securities ("Residuals"). The Floaters have a long-term rating based on the long-term rating of the underlying municipal bond and a short-term rating based on that of the liquidity provider to the trust. The Residuals are generally rated based on the long-term rating of the underlying municipal bond and entitle the holder to the residual cash flows from the issuing trust.

The Company sponsors three kinds of TOB trusts: customer TOB trusts, proprietary TOB trusts, and QSPE TOB trusts.

Customer TOB trusts are trusts through which customers finance investments in municipal securities and are not consolidated by the Company. Proprietary and QSPE TOB trusts, on the other hand, provide the Company with the ability to finance its own investments in municipal securities.

Proprietary TOB trusts are generally consolidated, in which case the financing (the Floaters) is recognized on the Company's balance sheet as a liability. However, certain proprietary TOB trusts are not consolidated by the Company, where the Residuals are held by hedge funds that are consolidated and managed by the Company. The assets and the associated liabilities of these TOB trusts are not consolidated by the hedge funds (and, thus, are not consolidated by the Company) under the application of the AICPA Investment Company Audit Guide, which precludes consolidation of owned investments. The Company consolidates the hedge funds because the Company holds controlling financial interests in the hedge funds. Certain of the Company's equity investments in the hedge funds are hedged with derivatives transactions executed by the Company with third parties referencing the returns of the hedge funds.

QSPE TOB trusts provide the Company with the same exposure as proprietary TOB trusts and are not consolidated by the Company.

Edgar Filing: CITIGROUP INC - Form 10-Q

The total assets and other characteristics of the three categories of TOB trusts as of June 30, 2008 and December 31, 2007 are as follows:

June 30, 2008

TOB trust type	Total assets (in billions)	Weighted average life	Credit rating distribution		
			AAA/Aaa	AA/Aa1-AA-/Aa3	Less than AA-/Aa3
Customer TOB Trusts (Not consolidated)	\$ 9.5	12.2 years	48%	33%	19%
Proprietary TOB Trusts (Consolidated and Non-consolidated)	\$ 22.2	20.2 years	54%	45%	1%
QSPE TOB Trusts (Not consolidated)	\$ 9.2	3.0 years	58%	40%	2%

December 31, 2007

TOB trust type	Total assets (in billions)	Weighted average life	Credit rating distribution		
			AAA/Aaa	AA/Aa1-AA-/Aa3	Less than AA-/Aa3
Customer TOB Trusts (Not consolidated)	\$ 17.6	8.4 years	84%	16%	
Proprietary TOB Trusts (Consolidated and Non-consolidated)	\$ 22.0	18.1 years	67%	33%	
QSPE TOB Trusts (Not consolidated)	\$ 10.6	3.0 years	80%	20%	

Credit rating distribution is based on the external rating of the municipal bonds within the TOB trusts, including any credit enhancement provided by monoline insurance companies or the Company in the primary or secondary markets, as discussed below. The total assets for proprietary TOB Trusts (Consolidated and Non-consolidated) include \$6.6 billion and \$5.0 billion of assets as of June 30, 2008 and December 31, 2007, respectively, where the Residuals are held by hedge funds that are consolidated and managed by the Company.

The TOB trusts fund the purchase of their assets by issuing Floaters along with Residuals, which are frequently less than 1% of a trust's total funding. The tenor of the Floaters matches the maturity of the TOB trust and is equal to or shorter than the tenor of the municipal bond held by the trust, and the Floaters bear interest rates that are typically reset weekly to a new market rate (based on the SIFMA index). Floater holders have an option to tender the Floaters they hold back to the trust periodically. Customer TOB trusts issue the Floaters and Residuals to third parties. Proprietary and QSPE TOB trusts issue the Floaters to third parties, and the Residuals are held by the Company.

Approximately \$3.6 billion as of June 30, 2008 and \$5.7 billion as of December 31, 2007 of the municipal bonds owned by TOB trusts have an additional credit guarantee provided by the Company. In all other cases, the assets are either unenhanced or are insured with a monoline insurance provider in the primary market or in the secondary market. While the trusts have not encountered any adverse credit events as defined in the underlying trust agreements, certain monoline insurance companies have experienced downgrades. In these cases, the Company has proactively managed the TOB programs by applying additional secondary market insurance on the assets or proceeding with orderly unwinds of the trusts.

The Company, in its capacity as remarketing agent, facilitates the sale of the Floaters to third parties at inception of the trust and facilitates the reset of the Floater coupon and tenders of Floaters. If Floaters are tendered and the Company (in its role as remarketing agent) is unable to find a new investor within a specified period of time, it can declare a failed remarketing (in which case the trust is unwound) or may choose to buy the Floaters into its own inventory and may continue to try to sell it to a third-party investor. While the levels of the Company's inventory of Floaters fluctuates, the Company held approximately \$1.1 billion and \$0.9 billion of Floater inventory related to the TOB programs as of June 30, 2008 and December 31, 2007, respectively.

If a trust is unwound early due to an event other than a credit event on the underlying municipal bond, the underlying municipal bond is sold in the secondary market. If there is an accompanying shortfall in the trust's cash flows to fund the redemption of the Floaters after the sale of the underlying municipal bond, the trust draws on a liquidity agreement in an amount equal to the shortfall. Liquidity agreements are generally provided to the trust directly by the Company. For customer TOBs where the Residual is less than 25% of the trust's capital structure, the Company has a reimbursement agreement with the Residual holder under which the Residual holder reimburses the Company for any payment made under the liquidity arrangement. Through this reimbursement agreement, the Residual holder remains economically exposed to fluctuations in value of the municipal bond. These reimbursement agreements are actively margined based on changes in value of the underlying

Edgar Filing: CITIGROUP INC - Form 10-Q

municipal bond to mitigate the Company's counterparty credit risk. In cases where a third party provides liquidity to a proprietary or QSPE TOB trust, a similar reimbursement arrangement is made whereby the Company (or a consolidated subsidiary of the Company) as Residual holder absorbs any losses incurred by the liquidity provider. As of June 30, 2008 and December 31, 2007, liquidity agreements provided with respect to customer TOB trusts totaled \$8.5 billion and \$14.4 billion, offset by reimbursement agreements in place with a notional amount of \$7.1 billion and \$11.5 billion, respectively. The remaining exposure relates to TOB transactions where the Residual owned by the customer is at least 25% of the bond value at the inception of the transaction. In addition, the Company has provided liquidity arrangements with a notional amount of \$11.2 billion as of June 30, 2008, and \$11.4 billion as of December 31, 2007, to QSPE TOB trusts and other non-consolidated proprietary TOB trusts described above.

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company considers the customer and proprietary TOB trusts (excluding QSPE TOB trusts) to be variable interest entities within the scope of FIN 46-R. Because third-party investors hold the Residual and Floater interests in the customer TOB trusts, the Company's involvement and variable interests include only its role as remarketing agent and liquidity provider. On the basis of the variability absorbed by the customer through the reimbursement arrangement or significant residual investment, the Company does not consolidate the Customer TOB trusts. The Company's variable interests in the Proprietary TOB trusts include the Residual as well as the remarketing and liquidity agreements with the trusts. On the basis of the variability absorbed through these contracts (primarily the Residual), the Company generally consolidates the Proprietary TOB trusts. Finally, certain proprietary TOB trusts and QSPE TOB trusts are not consolidated by application of specific accounting literature. For the nonconsolidated proprietary TOB trusts and QSPE TOB trusts, the Company recognizes only its residual investment on its balance sheet at fair value and the third-party financing raised by the trusts is off-balance sheet.

Municipal Investments

Municipal investment transactions represent partnerships that finance the construction and rehabilitation of low-income affordable rental housing. The Company generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits earned from the affordable housing investments made by the partnership.

Client Intermediation

Client intermediation transactions represent a range of transactions designed to provide investors with specified returns based on the returns of an underlying security, referenced asset or index. These transactions include credit-linked notes and equity-linked notes. In these transactions, the SPE typically obtains exposure to the underlying security, referenced asset or index through a derivative instrument such as a total return swap or a credit default swap. In turn, the SPE issues notes to investors that pay a return based on the specified underlying security, referenced asset or index. The SPE invests the proceeds in a financial asset or a guaranteed insurance contract (GIC) that serves as collateral for the derivative contract over the term of the transaction. The Company's involvement in these transactions includes being the counterparty to the SPE's derivative instruments and investing in a portion of the notes issued by the SPE. In certain transactions, the investor's maximum risk of loss is limited and the Company absorbs risk of loss above a specified level.

The Company's maximum risk of loss in these transactions is defined as the amount invested in notes issued by the SPE and the notional amount of any risk of loss absorbed by the Company through a separate instrument issued by the SPE. The derivative instrument held by the Company may generate a receivable from the SPE (for example, where the Company purchases credit protection from the SPE in connection with the SPE's issuance of a credit-linked note), which is collateralized by the assets owned by the SPE. These derivative instruments are not considered to be variable interests under FIN 46-R and any associated receivables are not included in the calculation of maximum exposure to the SPE.

Mutual Fund Deferred Sales Commission (DSC) Securitizations

Mutual Fund Deferred Sales Commission (DSC) receivables are assets purchased from distributors of mutual funds that are backed by distribution fees and contingent deferred sales charges (CDSC) generated by the distribution of certain shares to mutual fund investors. These share investors pay no upfront load, but the shareholder agrees to pay, in addition to the management fee imposed by the mutual fund, the distribution fee over a period of time and the CDSC (a penalty for early redemption to recover lost distribution fees). Asset managers use the proceeds from the sale of DSC receivables to cover sales commissions owed to brokers associated with the shares sold.

The Company purchases these receivables from mutual fund distributors and sells a diversified pool of receivables to a trust. The trust in turn issues two tranches of securities:

Senior term notes (generally 92-94%) via private placement to third-party investors. These notes are structured to have at least a single "A" rating standard. The senior notes receive all cash distributions until fully repaid, which is generally approximately 5-6 years;

A residual certificate in the trust (generally 6-8%) to the Company. This residual certificate is fully subordinated to the senior notes, and receives no cash flows until the senior notes are fully paid.

Structured Investment Vehicles

Structured Investment Vehicles (SIVs) are SPEs that issue junior notes and senior debt (medium-term notes and short-term commercial paper) to fund the purchase of high quality assets. The junior notes are subject to the "first loss" risk of the SIVs. The SIVs provide a variable return to the junior note investors based on the net spread between the cost to issue the senior debt and the return realized by the high quality assets. The Company acts as investment manager for the SIVs and, prior to December 13, 2007, was not contractually obligated to provide liquidity facilities or guarantees to the SIVs.

In response to the ratings review of the outstanding senior debt of the SIVs, for a possible downgrade announced by two ratings agencies and the continued reduction of liquidity in the SIV-related asset-backed commercial paper and medium-term note markets, on December 13, 2007, Citigroup announced its commitment to provide support facilities that would support the SIVs' senior debt ratings. As a result of this commitment, Citigroup became the SIVs' primary beneficiary and began consolidating these entities.

On February 12, 2008, Citigroup finalized the terms of the support facilities, which take the form of a commitment to provide mezzanine capital to the SIVs in the event the market value of their junior notes approaches zero. The facilities rank senior to the junior notes but junior to the commercial paper and medium-term notes. The facilities are on arm's-length terms. Interest will be paid on the drawn amount of the facilities and a commitment fee will be paid on the unused portion. The termination date of the facilities is January 15, 2011, cancelable at any time at the discretion of the SIVs.

The impact of this consolidation on Citigroup's Consolidated Balance Sheet as of June 30, 2008 and December 31, 2007 is as follows:

<i>In billions of dollars</i>	June 30, 2008	December 31, 2007
Assets		
Cash and due from banks	\$ 7.3	\$ 11.8
Trading account assets	27.2	46.4
Other assets	0.3	0.3
Total assets	\$ 34.8	\$ 58.5
Liabilities		
Short-term borrowings	\$ 1.9	\$ 11.7
Long-term borrowings	32.6	45.9
Other liabilities	0.3	0.9
Total liabilities	\$ 34.8	\$ 58.5

Balances include intercompany assets of \$1 billion and intercompany liabilities of \$6 billion as of June 30, 2008 and intercompany assets of \$1 billion and intercompany liabilities of \$7 billion as of December 31, 2007, respectively, which are eliminated in consolidation. In addition, Long-term borrowings include the current portion of medium-term notes with an original maturity of greater than 364 days.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following tables summarize the seven Citigroup-advised SIVs as of June 30, 2008 and December 31, 2007 as well as the aggregate asset mix and credit quality of the SIV assets.

In billions of dollars

(1) Credit ratings based on Moody's ratings as of June 30, 2008 and December 31, 2007.

(2) The SIVs have no direct exposure to U.S. subprime assets and have approximately \$46 million and \$50 million of indirect exposure to subprime assets through CDOs, which are Aaa rated and carry credit enhancements as of June 30, 2008 and December 31, 2007.

(3) At June 30, 2008 the breakout of ratings of financial institutions debt was; A-6%, Baa-<1% and B-<1%. At June 30, 2008 the other structured finance category was 0% A rated and 1% Baa rated.

Investment Funds

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company is the investment manager for certain investment funds that invest in various asset classes including private equity, hedge funds, real estate, fixed income and infrastructure. The Company earns a management fee which is a percentage of capital under management, and may earn performance fees. In addition, for some of these funds, the Company has an ownership interest in the investment funds.

The Company has also established a number of investment funds as opportunities for qualified employees to invest in private equity investments. The Company acts as investment manager to these funds and may provide employees with financing on both a recourse and non-recourse basis for a portion of the employees' investment commitments.

Certain Fixed Income Funds Managed By Institutional Clients Group

Falcon multi-strategy fixed income funds

On February 20, 2008, the Company entered into a \$500 million credit facility with the Falcon multi-strategy fixed income funds (the "Falcon funds") managed by Institutional Clients Group. As a result of providing this facility, the Company became the primary beneficiary of the Falcon funds and consolidated the assets and liabilities in its Consolidated Balance Sheet. At June 30, 2008, the total assets of the Falcon funds were approximately \$3 billion.

ASTA/MAT municipal funds

On March 3, 2008, the Company made an equity investment of \$661 million (under a \$1 billion commitment) which provides for gain sharing with unaffiliated investors, in the Municipal Opportunity Funds (MOFs). The MOFs are funds managed by Institutional Clients Group that make leveraged investments in tax-exempt municipal bonds and accept investments through feeder funds known as ASTA and MAT. As a result of the Company's equity commitment, the Company became the primary beneficiary of the MOFs and consolidated the assets and liabilities in its Consolidated Balance Sheet. At June 30, 2008, the total assets of the MOFs were approximately \$2 billion.

Primary Uses of SPEs by Corporate/Other

Trust Preferred Securities

The Company has raised financing through the issuance of trust preferred securities. In these transactions, the Company forms a statutory business trust and owns all of the voting equity shares of the trust. The trust issues preferred equity securities to third-party investors and invests the gross

Edgar Filing: CITIGROUP INC - Form 10-Q

proceeds in junior subordinated deferrable interest debentures issued by the Company. These trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the preferred equity securities held by third-party investors. These trusts' obligations are fully and unconditionally guaranteed by the Company.

Because the sole asset of the trust is a receivable from the Company, the Company is not permitted to consolidate the trusts under FIN 46-R, even though the Company owns all of the voting equity shares of the trust, has fully guaranteed the trusts' obligations, and has the right to redeem the preferred securities in certain circumstances. The Company recognizes the subordinated debentures on its balance sheet as long-term liabilities.

See Note 12 on page 90 for additional information about the Company's involvement with trust preferred securities. See Note 15 on page 95 for additional information regarding the Company's off-balance-sheet arrangements with respect to securitizations and SPEs.

Elimination of QSPEs and Changes in the FIN 46(R) Consolidation Model

In April of 2008, the FASB voted to eliminate Qualifying Special Purpose Entities (QSPEs) from the guidance in SFAS 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities." While the revised standard has not been finalized and the Board's proposals will be subject to a public comment period, this change may have a significant impact on Citigroup's consolidated financial statements as the Company may lose sales treatment for assets previously sold to a QSPE, as well as for future sales. This proposed revision could be effective January 2010. As of June 30, 2008, the total assets of QSPEs to which Citigroup, acting as principal, has transferred assets and received sales treatment were \$828 billion.

In connection with the proposed changes to SFAS 140, the FASB also is proposing three key changes to the consolidation model in FIN 46(R). First, the Board will now include former QSPEs in the scope of FIN 46(R). In addition, the FASB supports amending FIN 46(R) to change the method of analyzing which party to a variable interest entity (VIE) should consolidate the VIE to a primarily qualitative determination of power combined with benefits and losses instead of today's risks and rewards model. Finally, the proposed amendment is expected to require all VIEs and their primary beneficiaries to be reevaluated quarterly. The previous rules required reconsideration only when specified reconsideration events occurred. As of June 30, 2008, the total assets of significant unconsolidated VIEs with which Citigroup is involved were approximately \$355 billion.

The Company will be evaluating the impact of these changes on Citigroup's consolidated financial statements once the actual guidelines are completed.

Credit Commitments and Lines of Credit

The table below summarizes Citigroup's credit commitments as of June 30, 2008 and December 31, 2007:

<i>In millions of dollars</i>	U.S.	Outside of U.S.	June 30, 2008	December 31, 2007
Financial standby letters of credit and foreign office guarantees	\$ 56,751	\$ 27,661	\$ 84,412	\$ 87,066
Performance standby letters of credit and foreign office guarantees	6,017	11,613	17,630	18,055
Commercial and similar letters of credit	2,067	8,342	10,409	9,175
One- to four-family residential mortgages	1,678	623	2,301	4,587
Revolving open-end loans secured by one- to four-family residential properties	27,318	3,349	30,667	35,187
Commercial real estate, construction and land development	2,827	796	3,623	4,834
Credit card lines(1)	965,675	164,337	1,130,012	1,103,535
Commercial and other consumer loan commitments(2)	283,954	145,729	429,683	473,631
Total	\$ 1,346,287	\$ 362,450	\$ 1,708,737	\$ 1,736,070

(1) Credit card lines are unconditionally cancelable by the issuer.

(2)

Edgar Filing: CITIGROUP INC - Form 10-Q

Includes commercial commitments to make or purchase loans, to purchase third-party receivables, and to provide note issuance or revolving underwriting facilities. Amounts include \$237 billion and \$259 billion with original maturity of less than one year at June 30, 2008 and December 31, 2007, respectively.

See Note 18 to the Consolidated Financial Statements on page 127 for additional information on credit commitments and lines of credit.

Highly Leveraged Financing Commitments

Included in the line item "Commercial and other consumer loan commitments" in the table above are highly leveraged financing commitments, which are agreements that provide funding to a borrower with higher levels of debt (measured by the ratio of debt capital to equity capital of the borrower) than is generally the case for other companies. Highly leveraged financing is commonly employed in corporate acquisitions, management buy-outs and similar transactions.

As a result, debt service (that is, principal and interest payments) absorbs a significant portion of the cash flows generated by the borrower's business. Consequently, the risk that the borrower may not be able to meet its debt obligations is greater. Due to this risk, the interest rates and fees charged for this type of financing are generally higher than other types of financing.

Prior to funding, highly leveraged financing commitments are assessed for impairment in accordance with SFAS 5 and losses are recorded when they are probable and reasonably estimable. For the portion of loan commitments that relate to loans that will be held for investment, loss estimates are made based on the borrower's ability to repay the facility according to its contractual terms. For the portion of loan commitments that relate to loans that will be held for sale, loss estimates are made in reference to current conditions in the resale market (both interest rate risk and credit risk are considered in the estimate). Loan origination, commitment, underwriting, and other fees are netted against any recorded losses.

Citigroup generally manages the risk associated with highly leveraged financings it generally has entered into by seeking to sell a majority of its exposures to the market prior to or shortly after funding. In certain cases, all or a portion of a highly leveraged financing to be retained is hedged with credit derivatives or other hedging instruments. Thus, when a highly leveraged financing is funded, Citigroup records the resulting loan as follows:

The portion that Citigroup will seek to sell is recorded as a loan held-for-sale in Other Assets on the Consolidated Balance Sheet, and measured at the lower-of-cost-or-market (LOCOM)

The portion that will be retained is recorded as a loan held-for-investment in Loans and measured at amortized cost less impairment.

Due to the dislocation of the credit markets and the reduced market interest in higher risk/higher yield instruments since the latter half of 2007, liquidity in the market for highly leveraged financings has been limited.

Citigroup's exposures for highly leveraged financings totaled \$24 billion at June 30, 2008 (\$11 billion funded, recorded as loans-held-for-sale in other assets and carried at LOCOM, and \$13 billion in unfunded commitments). This compares to total commitments of \$43 billion (\$22 billion funded and \$21 billion unfunded) at December 31, 2007. During the second quarter of 2008, the Company recorded an incremental net \$428 million pretax write down on its highly leveraged financing commitments as a result of the reduction in liquidity in the market for such instruments. This brings the cumulative write-downs for the first half of 2008 to \$3.5 billion pretax.

On April 17, 2008, the Company completed the transfer of approximately \$12 billion of loans to third parties, of which \$8.5 billion relates to the highly leveraged loans and commitments. In these transactions, the third parties purchased subordinate interests backed by the transferred loans. These subordinate interests absorb first loss on the transferred loans and provide the third parties with control of the loans. The Company retained senior debt securities backed by the transferred loans, and purchased protection on these retained senior positions via total return swaps. The credit risk in the total return swap is protected through margin arrangements that provide for both initial margin as well as additional margin at specified triggers. These transactions were accounted for as sales of the transferred loans. The loans were removed from the balance sheet and the retained securities are classified as available-for-sale securities on the Company's consolidated balance sheet. Due to the initial cash margin received and ongoing margin requirements on the total return swaps, and the substantive subordinate investments made by third parties, the Company believes that the transactions substantially mitigate the Company's risk related to these transferred loans.

FAIR VALUATION

For a discussion of fair value of assets and liabilities, see Note 17 to the Consolidated Financial Statements on page 110.

CONTROLS AND PROCEDURES

Disclosure

The Company's management, with the participation of the Company's CEO and CFO, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of June 30, 2008 and, based on that evaluation, the CEO and CFO have concluded that at that date the Company's disclosure controls and procedures were effective.

Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the fiscal quarter ended June 30, 2008 that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

In this Quarterly Report on Form 10-Q, the Company uses certain forward-looking statements when describing future business conditions. The Company's actual results may differ materially from those included in the forward-looking statements and are indicated by words such as "believe," "expect," "anticipate," "intend," "estimate," "may increase," "may fluctuate," and similar expressions, or future or conditional verbs such as "will," "should," "would," and "could."

These forward-looking statements involve external risks and uncertainties including, but not limited, to those described in the Company's 2007 Annual Report on Form 10-K section entitled "Risk Factors": economic conditions; credit, market and liquidity risk; competition; country risk; operational risk; fiscal and monetary policies; reputational and legal risk; and certain regulatory considerations. Risks and uncertainties disclosed in this 10-Q include, but are not limited to:

the effectiveness of the hedging products used in connection with Securities & Banking's trading positions in U.S. subprime RMBS and related products, including ABS CDOs, in the event of material changes in market conditions; and

the impact the elimination of QSPEs from the guidance on SFAS 140 may have on the Company's consolidated financial statements.

- (1) The issuance of shares for the six months ended June 30, 2008 related to the acquisition of the remaining stake in Nikko Cordial. The issuance of shares for the six months ended June 30, 2007 related to the acquisition of Grupo Cuscatlan.
- (2) Citigroup's January 1, 2007 opening Retained earnings balance has been reduced by \$151 million to reflect a prior period adjustment to goodwill. This reduction adjusts goodwill to reflect a portion of the losses incurred in January 2002, related to the sale of the Argentinean subsidiary of Banamex, Bansud, that was recorded as an adjustment to the purchase price of Banamex. There is no tax benefit and there is no income statement impact for the quarter and six-months ended June 30, 2008 and 2007 from this adjustment. See "Legal Proceedings" for further discussion.
- (3) The adjustment to the opening balance of Retained earnings represents the total of the after-tax gain (loss) amounts for the adoption of the following accounting pronouncements:
- SFAS 157 for \$75 million,
 - SFAS 159 for (\$99) million,
 - FSP 13-2 for (\$148) million, and
 - FIN 48 for (\$14) million.
- See Notes 1 and 17 on pages 77 and 110, respectively.
- (4) Common dividends declared were \$0.32 per share in the first and second quarters of 2008 and \$0.54 per share in the first and second quarters of 2007.
- (5) All open market repurchases were transacted under an existing authorized share repurchase plan.

(6)

The after-tax adjustment to the opening balance of Accumulated other comprehensive income (loss) represents the reclassification of the unrealized gains (losses) related to the Legg Mason securities as well as several miscellaneous items previously reported in accordance with SFAS No. 115, "*Accounting for Certain Investments in Debt and Equity Securities*" (SFAS 115). The related unrealized gains and losses were reclassified to Retained earnings upon the adoption of the fair value option in accordance with SFAS 159. See Notes 1 and 17 on pages 77 and 110 for further discussions.

See Notes to the unaudited Consolidated Financial Statements.

Amounts at June 30, 2008 and December 31, 2007 include the after-tax amounts for net unrealized gains (losses) on investment securities of (\$3.496) billion and (\$1.262) billion, respectively, for foreign currency translation of \$2.214 billion and \$1.687 billion, respectively, for cash flow hedges of (\$2.487) billion and (\$2.085) billion, respectively, and for pension liability adjustments of (\$770) million and (\$835) million, respectively.

See Notes to the unaudited Consolidated Financial Statements.

CITIGROUP INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements as of June 30, 2008 and for the three-and-six-month period ended June 30, 2008 include the accounts of Citigroup Inc. (Citigroup) and its subsidiaries (collectively, the Company). In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation, have been reflected. The accompanying unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in Citigroup's 2007 Annual Report on Form 10-K and Citigroup's Quarterly Report on Form 10-Q for the quarter ended March 31, 2008.

Certain financial information that is normally included in annual financial statements prepared in accordance with U.S. generally accepted accounting principles, but is not required for interim reporting purposes, has been condensed or omitted.

Management must make estimates and assumptions that affect the Consolidated Financial Statements and the related footnote disclosures. While management makes its best judgment, actual results could differ from those estimates. Current market conditions increase the risk and complexity of the judgments in these estimates.

Certain reclassifications have been made to the prior-period's financial statements to conform to the current period's presentation.

Significant Accounting Policies

The Company's accounting policies are fundamental to understanding management's discussion and analysis of results of operations and financial condition. The Company has identified five policies as being significant because they require management to make subjective and/or complex judgments about matters that are inherently uncertain. These policies relate to Valuations of Financial Instruments, Allowance for Credit Losses, Securitizations, Income Taxes and Legal Reserves. The Company, in consultation with the Audit and Risk Management Committee of the Board of Directors, has reviewed and approved these significant accounting policies, which are further described in the Company's 2007 Annual Report on Form 10-K.

ACCOUNTING CHANGES

SEC Staff Guidance on Loan Commitments Recorded at Fair Value through Earnings

On January 1, 2008, the Company adopted Staff Accounting Bulletin No. 109 (SAB 109), which requires that the fair value of a written loan commitment that is marked to market through earnings should include the future cash flows related to the loan's servicing rights. However, the fair value measurement of a written loan commitment still must exclude the expected net cash flows related to internally developed intangible assets (such as customer relationship intangible assets).

SAB 109 applies to two types of loan commitments: (1) written mortgage loan commitments for loans that will be held-for-sale when funded that are marked to market as derivatives under FAS 133 (derivative loan commitments); and (2) other written loan commitments that are accounted for at fair value through earnings under Statement 159's fair-value election. SAB 109 supersedes SAB 105, which applied only to derivative loan commitments and allowed the expected future cash flows related to the associated servicing of the loan to be recognized only after the servicing asset had been contractually separated from the underlying loan by sale or securitization of the loan with servicing retained. SAB 109 was applied prospectively to loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The impact of adopting this SAB was immaterial.

Netting of Cash Collateral against Derivative Exposures

During April 2007, the FASB issued FASB Staff Position No. FIN 39-1, "Amendment of FASB Interpretation No. 39" (FSP FIN 39-1) modifying certain provisions of FIN 39, "Offsetting of Amounts Related to Certain Contracts". This amendment clarified the acceptability of the existing market practice of offsetting the amounts recorded for cash collateral receivables or payables against the fair value amounts recognized for net derivative positions executed with the same counterparty under the same master netting agreement, which was the Company's prior accounting practice. Thus, this amendment did not affect the Company's consolidated financial statements as of June 30, 2008.

Adoption of SFAS 157 Fair Value Measurements

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company elected to early-adopt SFAS No. 157, "Fair Value Measurements" (SFAS 157), as of January 1, 2007. SFAS 157 defines fair value, expands disclosure requirements around fair value and specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1 Quoted prices for *identical* instruments in active markets.

Level 2 Quoted prices for *similar* instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

Edgar Filing: CITIGROUP INC - Form 10-Q

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

For some products or in certain market conditions, observable inputs may not always be available. For example, during the market dislocations that occurred in the second half of 2007, certain markets became illiquid, and some key observable inputs used in valuing certain exposures were unavailable. When and if these markets are liquid, the valuation of these exposures will use the related observable inputs available at that time from these markets.

Under SFAS 157, Citigroup is required to take into account its own credit risk when measuring the fair value of derivative positions as well as the other liabilities for which fair value accounting has been elected under SFAS 155, "Accounting for certain Hybrid Financial Instruments" (SFAS 155) and SFAS 159, "The Fair Value Option for Financial Assets and Financial Liabilities" (SFAS 159). The adoption of SFAS 157 has also resulted in some other changes to the valuation techniques used by Citigroup when determining fair value, most notably the changes to the way that the probability of default of a counterparty is factored in and the elimination of a derivative valuation adjustment which is no longer necessary under SFAS 157. The cumulative effect at January 1, 2007, of making these changes was a gain of \$250 million after-tax (\$402 million pretax), or \$0.05 per diluted share, which was recorded in the first quarter of 2007 earnings within the Securities and Banking business.

SFAS 157 also precludes the use of block discounts for instruments traded in an active market, which were previously applied to large holdings of publicly traded equity securities, and requires the recognition of trade-date gains after consideration of all appropriate valuation adjustments related to certain derivative trades that use unobservable inputs in determining their fair value. Previous accounting guidance allowed the use of block discounts in certain circumstances and prohibited the recognition of day-one gains on certain derivative trades when determining the fair value of instruments not traded in an active market. The cumulative effect of these changes resulted in an increase to January 1, 2007 retained earnings of \$75 million.

Fair Value Option (SFAS 159)

In conjunction with the adoption of SFAS 157, the Company early-adopted SFAS 159, "The Fair Value Option for Financial Assets and Financial Liabilities" (SFAS 159), as of January 1, 2007. SFAS 159 provides an option on an instrument-by-instrument basis for most financial assets and liabilities to be reported at fair value with changes in fair value reported in earnings. After the initial adoption, the election is made at the acquisition of a financial asset, financial liability, or a firm commitment and it may not be revoked. SFAS 159 provides an opportunity to mitigate volatility in reported earnings that resulted prior to its adoption from being required to apply fair value accounting to certain economic hedges (e.g., derivatives) while having to measure the assets and liabilities being economically hedged using an accounting method other than fair value.

Under the SFAS 159 transition provisions, the Company elected to apply fair value accounting to certain financial instruments held at January 1, 2007 with future changes in value reported in earnings. The adoption of SFAS 159 resulted in a decrease to January 1, 2007 retained earnings of \$99 million.

See Note 17 on page 110 for additional information.

Accounting for Uncertainty in Income Taxes

In July 2006, the FASB issued FIN 48, "Accounting for Uncertainty in Income Taxes," which attempts to set out a consistent framework for preparers to use to determine the appropriate level of tax reserves to maintain for uncertain tax positions. This interpretation of FASB Statement No. 109 uses a two-step approach wherein a tax benefit is recognized if a position is more-likely-than-not to be sustained. The amount of the benefit is then measured to be the highest tax benefit which is greater than 50% likely to be realized. FIN 48 also sets out disclosure requirements to enhance transparency of an entity's tax reserves. Citigroup adopted this Interpretation as of January 1, 2007. The adoption of FIN 48 resulted in a reduction to 2007 opening retained earnings of \$14 million.

The Company is presently under audit by the Internal Revenue Service (IRS) for 2003-2005. It is reasonably possible that the exam will conclude within the next 12 months. An estimate of the change in FIN 48 liabilities cannot be made at this time due to the number of items still being reviewed by the IRS.

Leveraged Leases

On January 1, 2007, the Company adopted FASB Staff Position No. 13-2, "Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leverage Lease Transaction" (FSP 13-2), which provides guidance regarding changes or projected changes in the timing of cash flows relating to income taxes generated by a leveraged lease transaction.

Leveraged leases can provide significant tax benefits to the lessor, primarily as a result of the timing of tax payments. Since changes in the timing and/or amount of these tax benefits may have a significant effect on the cash flows of a lease transaction, a lessor, in accordance with FSP 13-2, will be required to perform a recalculation of a leveraged lease when there is a change or projected change in the timing of the realization of tax benefits generated by that lease. Previously, Citigroup did not recalculate the tax benefits if only the timing of cash flows had changed.

FUTURE APPLICATION OF ACCOUNTING STANDARDS

Business Combinations

In December 2007, the FASB issued Statement No. 141 (revised), "*Business Combinations*" (SFAS 141(R)), which attempts to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. This Statement replaces SFAS 141, "*Business Combinations*". SFAS 141(R) retains the fundamental requirements in Statement 141 that the acquisition method of accounting (which Statement 141 called the *purchase method*) be used for all business combinations and for an acquirer to be identified for each business combination. This Statement also retains the guidance in SFAS 141 for identifying and recognizing intangible assets separately from goodwill. The most significant changes in

Edgar Filing: CITIGROUP INC - Form 10-Q

SFAS 141(R) are: (1) acquisition costs and restructuring costs would now be expensed; (2) stock consideration will be measured based on the quoted market price as of the acquisition date instead of the date the deal is announced; (3) contingent consideration arising from contractual and noncontractual contingencies that meet the more-likely-than-not recognition threshold will be measured and recognized as an asset or liability at fair value at the acquisition date using a probability-weighted discounted cash flows model, with subsequent changes in fair value reflected in earnings. Noncontractual contingencies that do not meet the more-likely-than-not criteria will continue to be recognized when they are probable and reasonably estimable; and (4) acquirer records 100% step-up to fair value for all assets & liabilities, including the minority interest portion and goodwill is recorded as if a 100% interest was acquired.

SFAS 141(R) is effective for Citigroup on January 1, 2009. The Company is currently evaluating the potential impact of adopting this statement.

Noncontrolling Interests in Subsidiaries

In December 2007, the FASB issued Statement No. 160, *"Noncontrolling Interests in Consolidated Financial Statements"* (SFAS 160), which establishes standards for the accounting and reporting of noncontrolling interests in subsidiaries (that is, minority interests) in consolidated financial statements and for the loss of control of subsidiaries.

SFAS 160 requires: (1) the equity interest of noncontrolling shareholders, partners, or other equity holders in subsidiaries to be accounted for and presented in equity, separately from the parent shareholder's equity, rather than as liabilities or as "mezzanine" items between liabilities and equity; (2) the amount of consolidated net income attributable to the parent and to the noncontrolling interests be clearly identified and presented on the face of the consolidated statement of income; and (3) when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary be initially measured at fair value. The gain or loss on the deconsolidation of the subsidiary is measured using the fair value of any noncontrolling equity investment rather than the carrying amount of that retained investment.

SFAS 160 is effective for Citigroup on January 1, 2009. Early application is not allowed. The Company is currently evaluating the potential impact of adopting this statement.

Sale with Repurchase Financing Agreements

In February 2008, the FASB issued FASB Staff Position (FSP) FAS 140-3, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions." The objective of this FSP is to provide implementation guidance on whether the security transfer and contemporaneous repurchase financing involving the transferred financial asset must be evaluated as one linked transaction or two separate de-linked transactions.

Current practice records the transfer as a sale and the repurchase agreement as a financing. The FSP requires the recognition of the transfer and the repurchase agreement as one linked transaction, unless all of the following criteria are met: (1) the initial transfer and the repurchase financing are not contractually contingent on one another; (2) the initial transferor has full recourse upon default, and the repurchase agreement's price is fixed and not at fair value; (3) the financial asset is readily obtainable in the marketplace and the transfer and repurchase financing are executed at market rates; and (4) the maturity of the repurchase financing is before the maturity of the financial asset. The scope of this FSP is limited to transfers and subsequent repurchase financings that are entered into contemporaneously or in contemplation of one another.

The FSP will be effective for Citigroup on January 1, 2009. Early adoption is prohibited. The Company is currently evaluating the potential impact of adopting this FSP.

Investment Company Audit Guide (SOP 07-1)

In July 2007, the AICPA issued Statement of Position 07-1, "Clarification of the Scope of the Audit and Accounting Guide for Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies" (SOP 07-1), which was expected to be effective for fiscal years beginning on or after December 15, 2007. However, in February 2008, the FASB delayed the effective date indefinitely by issuing an FSP SOP 07-1-1, "Effective Date of AICPA Statement of Position 07-1." SOP 07-1 sets forth more stringent criteria for qualifying as an investment company than does the predecessor Audit Guide. In addition, SOP 07-1 establishes new criteria for a parent company or equity method investor to retain investment company accounting in their consolidated financial statements. Investment companies record all their investments at fair value with changes in value reflected in earnings. The Company is currently evaluating the potential impact of adopting SOP 07-1.

Elimination of QSPEs and Changes in the FIN 46(R) Consolidation Model

In April of 2008, the FASB voted to eliminate Qualifying Special Purpose Entities (QSPEs) from the guidance in SFAS 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities." While the revised standard has not been finalized and the Board's proposals will be subject to a public comment period, this change may have a significant impact on Citigroup's consolidated financial

Edgar Filing: CITIGROUP INC - Form 10-Q

statements as the Company may lose sales treatment for assets previously sold to a QSPE, as well as for future sales. This proposed revision could be effective January 2010. As of June 30, 2008, the total assets of QSPEs to which Citigroup, acting as principal, has transferred assets and received sales treatment were \$828 billion.

In connection with the proposed changes to SFAS 140, the FASB also is proposing three key changes to the consolidation model in FIN 46(R). First, the Board will now include former QSPEs in the scope of FIN 46(R). In addition, the FASB supports amending FIN 46(R) to change the method of analyzing which party to a variable interest entity (VIE) should consolidate the VIE to a primarily qualitative determination of power combined with benefits and losses instead of today's risks and rewards model. Finally, the proposed amendment is expected to require all VIEs and their primary beneficiaries to be reevaluated quarterly. The previous rules required reconsideration only when specified reconsideration events occurred. As of June 30, 2008, the total assets of significant unconsolidated VIEs with which Citigroup is involved were approximately \$355 billion.

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company will be evaluating the impact of these changes on Citigroup's consolidated financial statements once the actual guidelines are completed.

Disclosures about Derivative Instruments and Hedging Activities

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities" (SFAS 161), an amendment of SFAS 133. The standard requires enhanced disclosures about derivative instruments and hedged items that are accounted for under SFAS 133 and related interpretations. The standard will be effective for all of the Company's interim and annual financial statements for periods beginning after November 15, 2008, with early adoption permitted. The standard expands the disclosure requirements for derivatives and hedged items and has no impact on how Citigroup accounts for these instruments.

2. Discontinued Operations

CitiCapital

On April 17, 2008, the Company announced an agreement to sell most of its CitiCapital business unit to GE Capital, which includes its North American commercial lending and leasing business. This all cash transaction closed on July 31, 2008.

The total proceeds from the transaction are approximately \$12.5 billion and will result in an after-tax loss to Citigroup upon closing of approximately \$309 million, with both amounts subject to closing adjustments. This loss is included in Income from discontinued operations on the Company's Consolidated Statement of Income for the second quarter of 2008.

This transaction encompasses seven CitiCapital equipment finance business lines, including Healthcare Finance, Private Label Equipment Finance, Material Handling Finance, Franchise Finance, Construction Equipment Finance, Bankers Leasing, and CitiCapital Canada. CitiCapital's Tax Exempt Finance business is not part of the transaction and will remain with Citigroup.

The CitiCapital business units being acquired by GE Capital generate total revenues of approximately \$236 million and \$300 million and net income of \$31 million and \$83 million for the three months ended June 30, 2008 and 2007, respectively.

For the six months ended June 30, 2008 and 2007, the business generated total revenues of approximately \$435 million and \$575 million and net income of \$43 million and \$127 million, respectively. The businesses had total assets of \$12.9 billion at June 30, 2008.

CitiCapital has approximately 1,400 employees and 160,000 customers throughout *North America*.

Results for all of the CitiCapital businesses sold, as well as the net loss recognized in the second quarter of 2008 from this sale, are reported as Discontinued operations for all periods presented. The assets and liabilities of the businesses being sold are included in Assets of Discontinued operations held for sale and Liabilities of Discontinued operations held for sale on the Consolidated Balance Sheet.

The following is a summary as of June 30, 2008 of the assets and liabilities of Discontinued operations held for sale on the Consolidated Balance Sheet for the operations related to the CitiCapital businesses to be sold:

<i>In millions of dollars</i>	June 30, 2008
Assets	
Cash due from banks	\$ 6
Loans	11,742
Allowance for Loan Losses	(156)
Goodwill	221
Intangible Assets	3
Valuation allowance(1)	(517)
Other Assets	1,647
Total assets	\$ 12,946

Total	\$ 31,672	\$ 51,514	\$ (6,220)	\$ 4,509	\$ (7,340)	\$ 11,111

- (1) Includes pretax provisions for credit losses and for benefits and claims in the Global Cards results of \$2.0 billion and \$1.3 billion; in the Consumer Banking results of \$4.5 billion and \$1.4 billion; in the ICG results of \$626 million and \$(30) million; and in the GWM results of \$40 million and \$12 million for the second quarters of 2008 and 2007, respectively.
- (2) Corporate/Other reflects the restructuring charge of \$1.440 billion in the six months ending June 30, 2007. See Note 7 on page 84 for further discussion.
- (3) Identifiable assets at June 30, 2008 excludes assets of discontinued operations held-for-sale.
- (4) Reclassified to conform to the current period's presentation.

4. Interest Revenue and Expense

For the three- and six-month periods ended June 30, 2008 and 2007, interest revenue and expense consisted of the following:

<i>In millions of dollars</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007(1)	2008	2007(1)
Interest revenue				
Loan interest, including fees	\$ 16,431	\$ 15,969	\$ 33,324	\$ 30,609
Deposits at interest with banks	805	792	1,610	1,501
Federal funds sold and securities purchased under agreements to resell	2,377	4,662	5,549	8,951
Investments, including dividends	2,556	3,577	5,255	7,117
Trading account assets(2)	4,644	4,385	9,443	8,315
Other interest	1,089	984	2,423	1,748
Total interest revenue	\$ 27,902	\$ 30,369	\$ 57,604	\$ 58,241
Interest expense				
Deposits	\$ 5,195	\$ 6,939	\$ 11,495	\$ 13,497
Trading account liabilities(2)	456	380	789	687
Short-term debt and other liabilities	4,029	7,849	9,382	14,796
Long-term debt	3,917	3,803	8,234	7,335
Total interest expense	\$ 13,597	\$ 18,971	\$ 29,900	\$ 36,315
Net interest revenue	\$ 14,305	\$ 11,398	\$ 27,704	\$ 21,926
Provision for loan losses	7,070	2,513	12,771	5,202
Net interest revenue after provision for loan losses	\$ 7,235	\$ 8,885	\$ 14,933	\$ 16,724

(1) Reclassified to conform to the current period's presentation.

(2) Interest expense on trading account liabilities of the Institutional Clients Group is reported as a reduction of interest revenue for Trading account assets.

5. Commissions and Fees

Commissions and fees revenue includes charges to customers for credit and bank cards, including transaction-processing fees and annual fees; advisory, and equity and debt underwriting services; lending and deposit-related transactions, such as loan commitments, standby letters of credit, and other deposit and loan servicing activities; investment management-related fees, including brokerage services, and custody and trust services; and insurance fees and commissions.

The following table presents commissions and fees revenue for the three and six months ended June 30, 2008 and 2007:

<i>In millions of dollars</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007(1)	2008	2007(1)
Credit cards and bank cards	\$ 1,195	\$ 1,242	\$ 2,408	\$ 2,512

Edgar Filing: CITIGROUP INC - Form 10-Q

	Three Months Ended June 30,		Six Months Ended June 30,	
Investment banking	997	1,425	1,792	2,815
Smith Barney	744	803	1,507	1,577
ICG trading-related	600	598	1,302	1,284
Other Consumer	362	122	718	338
Transaction services	364	251	717	482
Checking-related	338	305	668	592
Nikko Cordial-related(2)	300	263	600	263
Other ICG	114	84	244	141
Primerica	107	113	217	229
Loan servicing(3)	1,393	1,224	1,107	1,483
Corporate finance(4)	(389)	186	(3,500)	481
Other	9	12	22	30
Total commissions and fees	\$ 6,134	\$ 6,628	\$ 7,802	\$ 12,227

- (1) Reclassified to conform to the current period's presentation.
- (2) Commissions and fees for Nikko Cordial have not been detailed due to unavailability of the information.
- (3) Includes fair value adjustments on mortgage servicing assets. The mark-to-market on the underlying economic hedges of the MSR's is included in Other revenue.
- (4) Includes write-downs of approximately \$428 million and \$3.5 billion net of underwriting fees, for the three and six months ended June 30, 2008 on funded and unfunded highly leveraged finance commitments. Write-downs were recorded on all highly leveraged finance commitments where there was value impairment, regardless of funding date.

6. Retirement Benefits

The Company has several non-contributory defined benefit pension plans covering U.S. employees and has various defined benefit pension and termination indemnity plans covering employees outside the United States. The principal U.S. defined benefit plan which formerly covered substantially all U.S. employees, is closed to new entrants and effective January 1, 2008 no longer accrues benefits for most employees. Employees satisfying certain age and service requirements remain covered by a prior final pay formula.

The Company also offers postretirement health care and life insurance benefits to certain eligible U.S. retired employees, as well as to certain eligible employees outside the United States. For information on the Company's Retirement Benefit Plans and Pension Assumptions, see Citigroup's 2007 Annual Report on Form 10-K.

The following tables summarize the components of the net expense recognized in the Consolidated Statement of Income for the three and six months ended June 30, 2008 and 2007.

Net Expense (Benefit)

	Three Months Ended June 30,							
	Pension Plans				Postretirement Benefit Plans			
	U.S. Plans(1)		Plans Outside U.S.		U.S. Plans		Plans Outside U.S.	
	2008	2007	2008	2007	2008	2007	2008	2007
<i>In millions of dollars</i>								
Benefits earned during the period	\$ 7	\$ 67	\$ 52	\$ 46	\$ 1	\$ 12	\$ 5	
Interest cost on benefit obligation	165	163	99	75	15	15	30	17
Expected return on plan assets	(234)	(223)	(122)	(109)	(3)	(3)	(29)	(23)
Amortization of unrecognized:								
Net transition obligation			1					
Prior service cost (benefit)			1	1		(1)		
Net actuarial loss		27	4	12		1	8	2
Net expense (benefit)	\$ (62)	\$ 34	\$ 35	\$ 25	\$ 13	\$ 12	\$ 21	\$ 1

	Six Months Ended June 30,							
	Pension Plans				Postretirement Benefit Plans			
	U.S. Plans(1)		Plans Outside U.S.		U.S. Plans		Plans Outside U.S.	
	2008	2007	2008	2007	2008	2007	2008	2007
<i>In millions of dollars</i>								
Benefits earned during the period	\$ 15	\$ 134	\$ 103	\$ 90	\$ 1	\$ 1	\$ 19	\$ 11
Interest cost on benefit obligation	329	326	182	149	30	30	50	35
Expected return on plan assets	(467)	(445)	(250)	(216)	(5)	(6)	(57)	(47)
Amortization of unrecognized:								
Net transition obligation			1	1				
Prior service cost (benefit)	(1)	(1)	2	1		(2)		
Net actuarial loss		54	13	25		2	11	4
Net expense (benefit)	\$ (124)	\$ 68	\$ 51	\$ 50	\$ 26	\$ 25	\$ 23	\$ 3

(1)

The U.S. plans exclude nonqualified pension plans, for which the net expense was \$10 million and \$12 million for the three months ended June 30, 2008 and 2007, respectively, and \$20 million and \$24 million for the first six months of 2008 and 2007, respectively.

Employer Contributions

Citigroup's pension funding policy for U.S. plans and non-U.S. plans is generally to fund to applicable minimum funding requirements, rather than to the amounts of accumulated benefit obligations. For the U.S. plans, the Company may increase its contributions above the minimum required contribution under the Employee Retirement Income Security Act of 1974 (ERISA), if appropriate to its tax and cash position and the plan's funded position. At June 30, 2008 and December 31, 2007, there were no minimum required contributions and no discretionary cash or non-cash contributions are currently planned for the U.S. plans. For the non-U.S. plans, the Company contributed \$57 million as of June 30, 2008. Citigroup presently anticipates contributing an additional \$103 million to fund its non-U.S. plans in 2008 for a total of \$160 million.

7. Restructuring

During the first quarter of 2007, the Company completed a review of its structural expense base in a Company-wide effort to create a more streamlined organization, reduce expense growth and provide investment funds for future growth initiatives.

The primary goals of the 2007 Structural Expense Review were:

Eliminate layers of management/improve workforce management;

Consolidate certain back-office, middle-office and corporate functions;

Increase the use of shared services;

Expand centralized procurement; and

Continue to rationalize operational spending on technology.

For the three months ended June 30, 2008, Citigroup recorded a pretax net restructuring expense of (\$43) million composed of a gross charge of \$34 million and a credit of \$77 million due to changes in estimates attributable to lower than anticipated costs of implementing certain projects and the sale of businesses in Europe.

The implementation of these restructuring initiatives also caused certain related premises and equipment assets to become redundant. The remaining depreciable lives of these assets were shortened, and accelerated depreciation charges began in the second quarter of 2007 in addition to normal scheduled depreciation.

Additional charges totaling approximately \$20 million pretax are anticipated to be recorded by the end of the third quarter of 2008. Of this charge, \$20 million is attributable to Corporate/Other.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following table details the Company's restructuring reserves.

<i>In millions of dollars</i>	Severance		Contract termination costs	Asset write- downs(3)	Employee termination cost	Total Citigroup

Net income	\$ (0.54)	\$ 1.27	\$ (1.55)	\$ 2.29
Diluted earnings per share(2)(3)				
Income from continuing operations	\$ (0.49)	\$ 1.23	\$ (1.50)	\$ 2.22
Discontinued operations	(0.05)	0.02	(0.05)	0.03
Net income	\$ (0.54)	\$ 1.24	\$ (1.55)	\$ 2.25

(1) Due to the net loss in the first and second quarters of 2008, income available to common stockholders for basic EPS was used to calculate diluted earnings per share. Adding back the effect of dilutive securities would result in anti-dilution.

(2) Due to rounding, earnings per share on continuing and discontinued operations may not sum to earnings per share on net income.

(3) Diluted shares used in the diluted EPS calculation represent basic shares for the 2008 periods due to the net loss. Using actual diluted shares would result in anti-dilution.

9. Trading Account Assets and Liabilities

Trading account assets and liabilities, at fair value, consisted of the following at June 30, 2008 and December 31, 2007:

<i>In millions of dollars</i>	June 30, 2008	December 31, 2007(1)
Trading account assets		
U.S. Treasury and federal agency securities	\$ 30,824	\$ 32,180
State and municipal securities	17,036	18,574
Foreign government securities	60,245	52,332
Corporate and other debt securities	125,734	156,242
Derivatives(2)	104,086	76,881
Equity securities	87,063	106,868
Mortgage loans and collateralized mortgage securities	36,202	56,740
Other	44,249	39,167
Total trading account assets	\$ 505,439	\$ 538,984
Trading account liabilities		
Securities sold, not yet purchased	\$ 72,975	\$ 78,541
Derivatives(2)	116,493	103,541
Total trading account liabilities	\$ 189,468	\$ 182,082

(1) Reclassified to conform to the current period's presentation.

(2) Pursuant to master netting agreements.

10. Investments

<i>In millions of dollars</i>	June 30, 2008	December 31, 2007
Securities available-for-sale	\$ 211,380	\$ 193,113
Non-marketable equity securities carried at fair value(1)	13,053	13,603
Non-marketable equity securities carried at cost(2)	8,094	8,291
Debt securities held-to-maturity(3)	1	1
Total	\$ 232,528	\$ 215,008

(1) Unrealized gains and losses for non-marketable equity securities carried at fair value are recognized in earnings.

(2) Non-marketable equity securities carried at cost are periodically evaluated for other-than-temporary impairment.

(3) Recorded at amortized cost.

Edgar Filing: CITIGROUP INC - Form 10-Q

The amortized cost and fair value of securities available-for-sale at June 30, 2008 and December 31, 2007 were as follows:

In millions of dollars	June 30, 2008				December 31, 2007(1)	
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value	Amortized cost	Fair value
Securities available-for-sale						
Mortgage-backed securities	\$ 61,946	\$ 34	\$ 4,414	\$ 57,566	\$ 63,888	\$ 63,075
U.S. Treasury and federal agencies	38,458	26	245	38,239	19,428	19,424
State and municipal	13,740	62	723	13,079	13,342	13,206
Foreign government	72,407	319	1,367	71,359	72,339	72,075
U.S. corporate	8,289	39	189	8,139	9,648	9,598
Other debt securities	19,173	72	286	18,959	12,336	11,969
Total debt securities available-for-sale	\$ 214,013	\$ 552	\$ 7,224	\$ 207,341	\$ 190,981	\$ 189,347
Marketable equity securities available-for-sale	\$ 2,449	\$ 1,714	\$ 124	\$ 4,039	\$ 1,404	\$ 3,766
Total securities available-for-sale	\$ 216,462	\$ 2,266	\$ 7,348	\$ 211,380	\$ 192,385	\$ 193,113

(1) Reclassified to conform to the current period's presentation.

Edgar Filing: CITIGROUP INC - Form 10-Q

As described in more detail below, the Company conducts periodic reviews to identify and evaluate each investment that has an unrealized loss, in accordance with FASB Staff Position FAS No. 115-1, "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments" (FSP FAS 115-1). Any unrealized loss identified as other-than-temporary is recorded directly in the Consolidated Statement of Income.

For the investments in the table above, management has determined that the unrealized losses are temporary in nature. A primary factor considered in making that determination is management's intent and ability to hold each investment for a period of time sufficient to allow for an anticipated recovery in fair value. Management has the positive intent and ability to hold each investment until the earlier of its anticipated recovery or maturity. Other factors considered in determining whether a loss is temporary include:

The length of time and the extent to which fair value has been below cost;

The severity of the impairment;

The cause of the impairment and the financial condition and near-term prospects of the issuer; and

Activity in the market of the issuer which may indicate adverse credit conditions.

The Company's review for other-than-temporary impairment under FSP FAS 115-1 generally entails:

Identification and evaluation of investments that have indications of possible impairment;

Analysis of individual investments that have fair values less than amortized cost, including consideration of the length of time the investment has been in an unrealized loss position and the expected recovery period;

Discussion of evidential matter, including an evaluation of factors or triggers that could cause an individual investment to qualify as having other-than-temporary impairment and those that would not support other-than-temporary impairment; and

Documentation of the results of these analyses, as required under business policies.

The increase in gross unrealized losses on mortgage-backed securities and foreign government securities during the quarter ended June 30, 2008 was primarily related to a widening of credit spreads. For mortgage-backed securities, management first considers if fair value is less than amortized cost. Next, management evaluates whether the Company is expected to incur any credit-related losses of either principal or interest receipts due. Management considers all information available at the time of the analysis, including rating agency downgrades and delinquency information that would indicate there are losses expected on the underlying assets and the expectation that those losses would impact the tranche of securities the Company holds. Citigroup makes these credit loss estimations using a valuation model applied to each security that projects cash flows using default levels of varying intensities and a given loss severity that represents the Company's expected losses on the underlying assets. If the model indicates, across various scenarios and assumptions, that the Company is expected to incur credit-related losses of either principal or interest based on cash flow projections, management considers the position to have other-than-temporary impairment and recognizes the entire unrealized loss through the Consolidated Statement of Income.

Where credit-related losses of either principal or interest receipts are not expected, management performs additional analysis to assess whether it has the intent and ability to hold each security for a period of time sufficient for a forecasted recovery of fair value. Management estimates the forecasted recovery period using current estimates of volatility in market rates. Where management does not have the intent and ability to hold the position for a sufficient time period, the Company recognizes other-than-temporary impairment in the Consolidated Statement of Income. If management determines that it does have the intent and ability to hold the investment for the forecasted recovery period, the impairment is deemed temporary. In some cases, management has asserted that it has the intent and ability to hold investments until maturity.

11. Goodwill and Intangible Assets**Goodwill**

The changes in goodwill during the first six months of 2008 were as follows:

In millions of dollars	Goodwill
Balance at December 31, 2007 (as previously reported)	\$ 41,204
Prior Period Adjustment(1)	(151)
Balance at December 31, 2007 (as restated)	41,053
Purchase of the remaining shares of Nikko Cordial	1,492
Purchase accounting adjustment BOOC acquisition	100
Acquisition of the U.S. branches of Banco de Chile	88
Purchase accounting adjustment Bisys acquisition	68
Foreign exchange translation and other	670
Balance at March 31, 2008	\$ 43,471
Purchase accounting adjustment Nikko Cordial	\$ (1,145)
Sale of CitiCapital(2)	(221)
Acquisition of the Legg Mason Private Portfolio Group	98
Purchase accounting adjustment Grupo Cuscatlan	68
Foreign exchange translation and other	115
Balance at June 30, 2008	\$ 42,386

(1) Correction of an overstatement of goodwill to reflect a portion of the losses incurred in January 2002 related to the sale of the Argentinean subsidiary of Banamex, Bansud, that was recorded as an adjustment to the purchase price of Banamex. See Footnote 2 to the Consolidated Statement of Changes in Stockholders' Equity on page 73.

(2) Goodwill allocated to CitiCapital assets sold.

Identification of New Reporting Units

The changes in the organizational structure resulted in the creation of new reporting segments. As a result, commencing with the third quarter 2008, the Company has identified new reporting units as required under SFAS 142, *Goodwill and Other Intangible Assets*. Goodwill affected by the reorganization will be reassigned from seven reporting units to twelve, using a fair value approach. Subsequent to June 30, 2008, goodwill will be allocated to disposals and tested for impairment under the new reporting units.

During the first six months of 2008, no goodwill was written off due to impairment.

Intangible Assets

The components of intangible assets were as follows:

In millions of dollars	June 30, 2008			December 31, 2007		
	Gross carrying	Accumulated amortization	Net carrying	Gross carrying	Accumulated amortization	Net carrying

Edgar Filing: CITIGROUP INC - Form 10-Q

	June 30, 2008			December 31, 2007		
	amount	amount	amount	amount	amount	amount
Purchased credit card relationships	\$ 8,845	\$ 4,426	\$ 4,419	\$ 8,499	\$ 4,045	\$ 4,454
Core deposit intangibles	1,556	705	851	1,435	518	917

Total intangible assets	\$ 31,462	\$ 6,920	\$ 24,542	\$ 28,861	\$ 6,174	\$ 22,687

(1) Includes contract-related intangible assets.

N/A Not Applicable.

The changes in intangible assets during the first six months of 2008 were as follows:

<i>In millions of dollars</i>	Net carrying amount at December 31, 2007	Acquisitions	Amortization	Impairments(1)	FX and other(2)	Net carrying amount at June 30, 2008
Purchased credit card relationships	\$ 4,454	\$ 103	\$ (337)	\$	\$ 199	\$ 4,419
Core deposit intangibles	917	15	(79)		(2)	851
Other customer relationships	2,549	1,355	(104)		(283)	3,517
Present value of future profits	170		(7)		2	165
Indefinite-lived intangible assets	1,591	550			162	2,303
Other	4,626	189	(179)	(213)	(70)	4,353
	\$ 14,307	\$ 2,212	\$ (706)	\$ (213)	\$ 8	\$ 15,608
Mortgage servicing rights(3)	\$ 8,380					\$ 8,380
Total intangible assets	\$ 22,687					\$ 24,542

(1) During the first quarter of 2008, Old Lane notified investors in its multi-strategy hedge fund that they would have the opportunity to redeem their investments in the fund, without restriction, effective July 31, 2008. In April 2008, substantially all unaffiliated investors had notified Old Lane of their intention to redeem their investments. Based on the Company's expectation of the level of redemptions in the fund, the Company expected that the cash flows from the hedge fund management contract will be lower than previously estimated. The Company performed an impairment analysis of the intangible asset relating to the hedge fund management contract. As a result, an impairment loss of \$202 million, representing the remaining unamortized balance of the intangible assets, was recorded in the first quarter of 2008 operating expenses in the results of the ICG segment. The fair value was estimated using a discounted cash flow approach.

- (2) Includes foreign exchange translation and purchase accounting adjustments.
- (3) See page 97 for the roll-forward of mortgage servicing rights.

12. Debt**Short-Term Borrowings**

Short-term borrowings consist of commercial paper and other borrowings as follows:

<i>In millions of dollars</i>	June 30, 2008	December 31, 2007
Commercial paper		
Citigroup Funding Inc.	\$ 32,093	\$ 34,939
Other Citigroup Subsidiaries	1,882	2,404
	\$ 33,975	\$ 37,343
Other short-term borrowings	80,470	109,145
	\$ 114,445	\$ 146,488

Borrowings under bank lines of credit may be at interest rates based on LIBOR, CD rates, the prime rate, or bids submitted by the banks. Citigroup pays commitment fees for its lines of credit.

Some of Citigroup's nonbank subsidiaries have credit facilities with Citigroup's subsidiary depository institutions, including Citibank, N.A. Borrowings under these facilities must be secured in accordance with Section 23A of the Federal Reserve Act.

Long-Term Debt

<i>In millions of dollars</i>	June 30, 2008	December 31, 2007
Citigroup Parent Company	\$ 185,534	\$ 171,637
Other Citigroup Subsidiaries(1)	165,898	187,657
Citigroup Global Markets Holdings Inc.(2)	21,164	31,401
Citigroup Funding Inc.(3)(4)	45,332	36,417
	\$ 417,928	\$ 427,112

(1) At June 30, 2008 and December 31, 2007, collateralized advances from the Federal Home Loan Bank are \$84.5 billion and \$86.9 billion, respectively.

(2) Includes Targeted Growth Enhanced Term Securities (TARGETS) with no carrying value at June 30, 2008 and \$48 million issued by TARGETS Trust XXIV at December 31, 2007 (the "CGMHI Trust"). CGMHI owned all of the voting securities of the CGMHI Trust. The CGMHI Trust had no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the TARGETS and the CGMHI Trust's common securities. The CGMHI Trust's obligations under the TARGETS were fully and unconditionally guaranteed by CGMHI, and CGMHI's guarantee obligations were fully and unconditionally guaranteed by Citigroup.

(3) Includes Targeted Growth Enhanced Term Securities (CFI TARGETS) with carrying values of \$54 million and \$55 million issued by TARGETS Trusts XXV and XXVI at June 30, 2008 and December 31, 2007, respectively, (collectively, the "CFI Trusts"). CFI owns all of the voting securities of the CFI Trusts. The CFI Trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the CFI TARGETS and the CFI Trusts' common securities. The CFI Trusts' obligations under the CFI TARGETS are fully and unconditionally guaranteed by CFI, and CFI's guarantee obligations are fully and unconditionally guaranteed by Citigroup.

(4)

Includes Principal-Protected Trust Securities (Safety First Trust Securities) with carrying values of \$334 million issued by Safety First Trust Series 2006-1, 2007-1, 2007-2, 2007-3, 2007-4, 2008-1 and 2008-2 (collectively, the "Safety First Trusts") at June 30, 2008 and \$301 million issued by Safety First Trust Series 2006-1, 2007-1, 2007-2, 2007-3 and 2007-4 at December 31, 2007. CFI owns all of the voting securities of the Safety First Trusts. The Safety First Trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the Safety First Trust Securities and the Safety First Trusts' common securities. The Safety First Trusts' obligations under the Safety First Trust Securities are fully and unconditionally guaranteed by CFI, and CFI's guarantee obligations are fully and unconditionally guaranteed by Citigroup.

CGMHI has a syndicated five-year committed uncollateralized revolving line of credit facility with unaffiliated banks totaling \$3.0 billion, which matures in 2011. CGMHI also has three-year and one-year bilateral facilities totaling \$1.375 billion with unaffiliated banks with borrowings maturing on various dates in 2008 and 2009. At June 30, 2008, \$800 million of the bilateral facilities were drawn.

CGMHI also has committed long-term financing facilities with unaffiliated banks. At June 30, 2008, CGMHI had drawn down the full \$2.075 billion available under these facilities, of which \$1.08 billion is guaranteed by Citigroup. A bank can terminate these facilities by giving CGMHI prior notice (generally one year). CGMHI also has substantial borrowing arrangements consisting of facilities that CGMHI has been advised are available, but where no contractual lending obligation exists. These arrangements are reviewed on an ongoing basis to ensure flexibility in meeting CGMHI's short-term requirements.

The Company issues both fixed and variable rate debt in a range of currencies. It uses derivative contracts, primarily interest rate swaps, to effectively convert a portion of its fixed rate debt to variable rate debt and variable rate debt to fixed rate debt. The maturity structure of the derivatives generally corresponds to the maturity structure of the debt being hedged. In addition, the Company uses other derivative contracts to manage the foreign exchange impact of certain debt issuances.

Long-term debt at June 30, 2008 and December 31, 2007 includes \$23.8 billion of junior subordinated debt. The Company formed statutory business trusts under the laws of the state of Delaware. The trusts exist for the exclusive purposes of (i) issuing Trust Securities representing undivided beneficial interests in the assets of the Trust; (ii) investing the gross proceeds of the Trust securities in junior subordinated deferrable interest debentures (subordinated debentures) of its parent; and (iii) engaging in only those activities necessary or incidental thereto. Upon approval from the Federal Reserve, Citigroup has the right to redeem these securities.

Edgar Filing: CITIGROUP INC - Form 10-Q

Citigroup has contractually agreed not to redeem or purchase (i) the 6.50% Enhanced Trust Preferred Securities of Citigroup Capital XV before September 15, 2056, (ii) the 6.45% Enhanced Trust Preferred Securities of Citigroup Capital XVI before December 31, 2046, (iii) the 6.35% Enhanced Trust Preferred Securities of Citigroup Capital XVII before March 15, 2057, (iv) the 6.829% Fixed Rate/Floating Rate Enhanced Trust Preferred Securities of Citigroup Capital XVIII before June 28, 2047, (v) the 7.250% Enhanced Trust Preferred Securities of Citigroup Capital XIX before August 15, 2047, (vi) the 7.875% Enhanced Trust Preferred Securities of Citigroup Capital XX before December 15, 2067, and (vii) the 8.300% Fixed Rate/Floating Rate Enhanced Trust Preferred Securities of Citigroup Capital XXI before December 21, 2067 unless certain conditions, described in Exhibit 4.03 to Citigroup's Current Report on Form 8-K filed on September 18, 2006, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on November 28, 2006, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on March 8, 2007, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on July 2, 2007, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on August 17, 2007, in Exhibit 4.2 to Citigroup's Current Report on Form 8-K filed on November 27, 2007, and in Exhibit 4.2 to Citigroup's Current Report on Form 8-K filed on December 21, 2007, respectively, are met. These agreements are for the benefit of the holders of Citigroup's 6.00% Junior Subordinated Deferrable Interest Debentures due 2034.

Citigroup owns all of the voting securities of these subsidiary trusts. These subsidiary trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the subsidiary trusts and the subsidiary trusts' common securities. These subsidiary trusts' obligations are fully and unconditionally guaranteed by Citigroup.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following table summarizes the financial structure of each of the Company's subsidiary trusts at June 30, 2008:

Trust securities with distributions guaranteed by Citigroup	Issuance date	Securities issued	Liquidation value	Coupon rate	Common shares issued to parent	Junior subordinated debentures owned by trust		
						Amount(1)	Maturity	Redeemable by issuer beginning
<i>In millions of dollars, except share amounts</i>

- (1) Issued on January 23, 2008 as depositary shares, each representing a 1/1000th interest in a share of the corresponding series of Non-Cumulative Convertible Preferred Stock. Redeemable in whole or in part on or after February 15, 2015. Convertible into Citigroup common stock at a conversion rate of approximately 1,581.1737 per share, which is subject to adjustment under certain conditions. The dividend of \$0.88 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. Redemption is subject to a capital replacement covenant.
- (2) Issued on April 28, 2008 as depositary shares, each representing a 1/25th interest in a share of the corresponding series of Fixed Rate/Floating Rate Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after April 30, 2018. Dividends are payable semi-annually for the first 10 years until April 30, 2018 at \$42.70 per depositary share and thereafter quarterly at floating rate when, as and if declared by the Company's Board of Directors.
- (3) Issued on May 13, 2008 and May 28, 2008 as depositary shares, each representing a 1/1000th interest in a share of the corresponding series of Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after June 15, 2013. The dividend of \$0.53 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors.
- (4) Issued on January 23, 2008 and January 29, 2008 as depositary shares, each representing a 1/1000th interest in a share of the corresponding series of Non-Cumulative Convertible Preferred Stock. Redeemable in whole in or part on or after February 15, 2015. Convertible into Citigroup common stock at a conversion rate of approximately 1,482.3503 per share, which is subject to adjustment under certain conditions. The dividend of \$0.81 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. Redemption is subject to a capital replacement covenant.
- (5) Issued on January 25, 2008 as depositary shares, each representing a 1/1000th interest in a share of the corresponding series of Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after February 15, 2018. The dividend of \$0.51 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. Redemption is subject to a capital replacement covenant.

Edgar Filing: CITIGROUP INC - Form 10-Q

If dividends are declared on Series E as scheduled, the impact from preferred dividends on earnings per share in the first and third quarters will be lower than the impact in the second and fourth quarters. All other series currently have a quarterly dividend declaration schedule.

14. CHANGES IN ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Changes in each component of "Accumulated Other Comprehensive Income (Loss)" for first and second quarters of 2008 were as follows:

<i>In millions of dollars</i>	Net unrealized gains (losses) on investment securities	Foreign currency translation adjustment	Cash flow hedges	Pension liability adjustments	Accumulated other comprehensive income (loss)
Balance, December 31, 2007	\$ 471	\$ (772)	\$ (3,163)	\$ (1,196)	\$ (4,660)
Increase in net unrealized losses on investment securities, net of taxes(1)	(2,464)				(2,464)
Less: Reclassification adjustment for losses included in net income, net of taxes	77				77
Foreign currency translation adjustment, net of taxes(2)		1,273			1,273
Cash flow hedges, net of taxes(3)			(1,638)		(1,638)
Pension liability adjustment, net of taxes				31	31
Change	\$ (2,387)	\$ 1,273	\$ (1,638)	\$ 31	\$ (2,721)
Balance, March 31, 2008	\$ (1,916)	\$ 501	\$ (4,801)	\$ (1,165)	\$ (7,381)
Increase in net unrealized losses on investment securities, net of taxes(4)	(1,418)				(1,418)
Less: Reclassification adjustment for losses included in net income, net of taxes	90				90
Foreign currency translation adjustment, net of taxes(5)		(162)			(162)
Cash flow hedges, net of taxes(6)			878		878
Pension liability adjustment, net of taxes				(56)	(56)
Change	\$ (1,328)	\$ (162)	\$ 878	\$ (56)	\$ (668)
Balance, June 30, 2008	\$ (3,244)	\$ 339	\$ (3,923)	\$ (1,221)	\$ (8,049)

- (1) Primarily related to mortgage-backed securities activity.
- (2) Reflects, among other items, the movements in the Japanese yen, Mexican peso, Euro, Korean won, and Turkish lira against the U.S. dollar, and changes in related tax effects.
- (3) Primarily reflects the decrease in market interest rates during the first quarter of 2008 in Citigroup's pay-fixed/receive-floating swap programs hedging floating rate deposits and long-term debt. Also reflects the widening of interest rate spreads during the period.
- (4) Primarily related to foreign government securities, foreign marketable equity securities, and mortgage-backed securities activities.
- (5) Reflects, among other items, the movements in the Japanese yen, Mexican peso, Korean won, Brazilian real, and Indian rupee against the U.S. dollar, and changes in related tax effects.
- (6) Primarily reflects the increase in market interest rates during the second quarter of 2008 in Citigroup's pay-fixed/receive-floating swap programs hedging floating rate deposits and long-term debt.

15. SECURITIZATIONS AND VARIABLE INTEREST ENTITIES

The Company primarily securitizes credit card receivables and mortgages. Other types of assets securitized include corporate debt instruments (in cash and synthetic form), auto loans, and student loans.

After securitization of credit card receivables, the Company continues to maintain credit card customer account relationships and provides servicing for receivables transferred to the trusts. The Company provides and at times arranges for third parties to provide credit enhancement to the trusts, including cash collateral accounts, subordinated securities, liquidity facilities and letters of credit. As specified in some of the sale agreements, the net revenue collected each month is accumulated up to a predetermined maximum amount, and is available over the remaining term of that transaction to make payments of yield, fees, and transaction costs in the event that net cash flows from the receivables are not sufficient. Once the predetermined amount is reached, net revenue is recognized by the Citigroup subsidiary that sold the receivables.

The Company provides a wide range of mortgage and other loan products to a diverse customer base. In connection with the securitization of these loans, the Company's U.S. Consumer business retains the servicing rights, which entitle the Company to a future stream of cash flows based on the outstanding principal balances of the loans and the contractual servicing fee. Failure to service the loans in accordance with contractual requirements may lead to a termination of the servicing rights and the loss of future servicing fees. In non-recourse servicing, the principal credit risk to the Company is the cost of temporary advances of funds. In recourse servicing, the servicer agrees to share credit risk with the owner of the mortgage loans such as FNMA or FHLMC or with a private investor, insurer, or guarantor. Losses on recourse servicing occur primarily when foreclosure sale proceeds of the property underlying a defaulted mortgage loan are less than the outstanding principal balance and accrued interest of the loan and the cost of holding and disposing of the underlying property. The Company's mortgage loan securitizations are primarily non-recourse, thereby effectively transferring the risk of future credit losses to the purchasers of the securities issued by the trust. Institutional Clients Group retains servicing for a limited number of its mortgage securitizations.

The following tables summarize selected cash flow information related to credit card, mortgage, and certain other securitizations for the three months ended June 30, 2008 and 2007:

Three Months Ended June 30, 2008				
<i>In billions of dollars</i>	Credit cards	U.S. Consumer mortgages	Institutional Clients Group mortgages	Other(1)
Proceeds from new securitizations	\$ 9.1	\$ 24.3	\$ 3.2	\$ 2.6
Proceeds from collections reinvested in new receivables	57.1			0.3
Contractual servicing fees received	0.5	0.4		
Cash flows received on retained interests and other net cash flows	1.9	0.2	0.1	0.3
Three Months Ended June 30, 2007				
<i>In billions of dollars</i>	Credit cards	U.S. Consumer mortgages	Institutional Clients Group mortgages	Other(1)
Proceeds from new securitizations	\$ 6.4	\$ 29.6	\$ 13.1	\$ 11.6

<i>In billions of dollars</i>	Credit cards	U.S. Consumer mortgages	Institutional Clients Group mortgages	Other(1)
Proceeds from new securitizations	\$ 19.1	\$ 48.0	\$ 5.2	\$ 2.7
Proceeds from collections reinvested in new receivables	112.2			0.6
Contractual servicing fees received	1.0	0.8		

Edgar Filing: CITIGROUP INC - Form 10-Q

	Six Months Ended June 30, 2008			
Cash flows received on retained interests and other net cash flows	3.9	0.4	0.2	0.4

	Six Months Ended June 30, 2007			
<i>In billions of dollars</i>	Credit cards	U.S. Consumer mortgages	Institutional Clients Group mortgages	Other(1)
Proceeds from new securitizations	\$ 12.7	\$ 56.5	\$ 29.6	\$ 24.7
Proceeds from collections reinvested in new receivables	107.7			1.3
Contractual servicing fees received	1.1	0.8		
Cash flows received on retained interests and other net cash flows	4.2	0.1		

(1) Other includes student loans and other assets

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company recognized gains on securitizations of U.S. Consumer mortgages of \$75 million and \$52 million for the second quarters of 2008 and 2007, respectively, and \$77 and \$83 million for the six-month periods ended June 30, 2008 and 2007, respectively. In the second quarter of 2008 and 2007, the Company recorded gains (losses) of (\$176) million and \$243 million related to the securitization of credit card receivables, and \$45 million and \$578 million for the six months ended June 30, 2008 and 2007 respectively. Gains (losses) recognized on the securitization of Institutional Clients Group activities and other assets during the second quarter of 2008 and 2007 were \$(1) million and \$92 million, respectively, and \$5 million and \$106 million for the first six months ended June 30, 2008 and 2007, respectively.

Key assumptions used for the securitization of credit cards, mortgages, and certain other assets during the second quarter of 2008 and 2007 in measuring the fair value of retained interests at the date of sale or securitization are as follows:

Three Months Ended June 30, 2008				
	Credit Cards	U.S. Consumer Mortgages	Institutional Clients Group mortgages	Other(1)
Discount rate	14.5% to 17.9%	12.4% to 15.3%	2.7% to 34.9%	10.6%
Constant prepayment rate	5.9% to 20.3%	3.6% to 6.1%	2.0% to 28.4%	7.8%
Anticipated net credit losses	5.1% to 6.8%	N/A	20% to 100%	0.5%

Three Months Ended June 30, 2007				
	Credit Cards	U.S. Consumer Mortgages	Institutional Clients Group mortgages	Other(1)
Discount rate	12.8% to 16.2%	11.1% to 14.9%	4.1% to 27.9%	10.2%
Constant prepayment rate	6.7% to 21.3%	5.1% to 9.6%	10.0% to 52.5%	3.8%
Anticipated net credit losses	3.4% to 5.9%	N/A	24.0% to 100.0%	0.2% to 0.5%

(1) Other includes student loans and other assets.

As required by SFAS 140, the effect of two negative changes in each of the key assumptions used to determine the fair value of retained interests must be disclosed. The negative effect of each change must be calculated independently, holding all other assumptions constant. Because the key assumptions may not in fact be independent, the net effect of simultaneous adverse changes in the key assumptions may be less than the sum of the individual effects shown below.

At June 30, 2008, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

Key Assumptions at June 30, 2008

June 30, 2008				
	Credit Cards	U.S. Consumer Mortgages(1)	Institutional Clients Group mortgages	Other(2)
Discount rate	14.5% to 17.9%	11.3%	2.7% to 34.9%	10.6% to 13.6%
Constant prepayment rate	5.9% to 20.3%	8.1%	2.0% to 28.4%	1.2% to 11.6%
Anticipated net credit losses	5.2% to 6.6%	N/A	20% to 100%	0.2% to 0.8%
Weighted average life	10.6 to 12.0 months	7 years	0 to 18.2 years	4.1 to 9.1 years

(1) Includes mortgage servicing rights.

(2) Other includes student loans and other assets.

Edgar Filing: CITIGROUP INC - Form 10-Q

June 30, 2008

<i>In millions of dollars</i>	Credit cards	U.S. Consumer mortgages	Institutional Clients Group mortgages	Other(1)
Carrying value of retained interests	\$ 12,126	\$ 13,831	\$ 2,135	\$ 1,866
Discount Rates				
Adverse change of 10%	\$ (74)	\$ (369)	\$ (78)	\$ (28)
Adverse change of 20%	(142)	(716)	(149)	(53)
Constant prepayment rate				
Adverse change of 10%	\$ (196)	\$ (516)	\$ (13)	\$ (11)
Adverse change of 20%	(371)	(987)	(22)	(22)
Anticipated net credit losses				
Adverse change of 10%	\$ (577)	\$ (20)	\$ (78)	\$ (7)
Adverse change of 20%	(1,148)	(39)	(135)	(14)

(1) Other includes student loans and other assets. Sensitivity analysis excludes \$660 million of retained interests that are valued using third-party quotations and thus are not dependent on proprietary valuation models.

Managed Loans

After securitization of credit card receivables, the Company continues to maintain credit card customer account relationships and provides servicing for receivables transferred to the trusts. As a result, the Company considers the securitized credit card receivables to be part of the business it manages.

The following tables present a reconciliation between the managed basis and on-balance sheet credit card portfolios and the related delinquencies (loans which are 90 days or more past due) and credit losses, net of recoveries.

<i>In millions of dollars, except loans in billions</i>	Jun. 30, 2008	Dec. 31, 2007
Loan amounts, at period end		
On balance sheet	\$ 90.8	\$ 94.1
Securitized amounts	111.0	108.1
Loans held-for-sale		1.0
Total managed loans	\$ 201.8	\$ 203.2
Delinquencies, at period end		
On balance sheet	\$ 2,105	\$ 1,937
Securitized amounts	2,163	1,864
Loans held-for-sale		14
Total managed delinquencies	\$ 4,268	\$ 3,815

Edgar Filing: CITIGROUP INC - Form 10-Q

Credit losses, net of recoveries, for the three months ended June 30,	2008	2007
On balance sheet	\$ 1,417	\$ 850
Securitized amounts	1,766	1,158
Loans held-for-sale		
Total managed	\$ 3,183	\$ 2,008

Credit losses, net of recoveries, for the six months ended June 30,	2008	2007
On balance sheet	\$ 2,669	\$ 1,720
Securitized amounts	3,357	2,308
Loans held-for-sale		
Total managed	\$ 6,026	\$ 4,028

Mortgage Servicing Rights

The fair value of capitalized mortgage loan servicing rights (MSRs) was \$8.9 billion and \$10.1 billion at June 30, 2008 and 2007, respectively. The following table summarizes the changes in capitalized MSRs:

<i>In millions of dollars</i>	Three Months Ended June 30,	
	2008	2007
Balance, beginning of period	\$ 7,716	\$ 8,832
Originations	424	534
Purchases		14
Changes in fair value of MSRs due to changes in inputs and assumptions	1,066	1,041
Transfer to Trading account assets	(59)	
Other changes(1)	(213)	(349)
Balance, end of period	\$ 8,934	\$ 10,072

<i>In millions of dollars</i>	Six Months Ended June 30,	
	2008	2007
Balance, beginning of period	\$ 8,380	\$ 5,439
Originations	769	961
Purchases	1	3,133
Changes in fair value of MSRs due to changes in inputs and assumptions	505	1,166
Transfer to Trading account assets	(163)	
Other changes(1)	(558)	(627)
Balance, end of period	\$ 8,934	\$ 10,072

(1) Represents changes due to customer payments and passage of time.

The market for MSRs is not sufficiently liquid to provide participants with quoted market prices. Therefore, the Company uses an option-adjusted spread valuation approach to determine the fair value of MSRs. This approach consists of projecting servicing cash flows under

Edgar Filing: CITIGROUP INC - Form 10-Q

multiple interest rate scenarios, and discounting these cash flows using risk-adjusted discount rates. The key assumptions used in the valuation of MSRs include mortgage prepayment speeds and discount rates. The model assumptions and the MSRs' fair value estimates are compared to observable trades of similar MSR portfolios and interest-only security portfolios, as well as

Edgar Filing: CITIGROUP INC - Form 10-Q

to MSR broker valuations and industry surveys. The cash flow model and underlying prepayment and interest rate models used to value these MSRs are subject to validation in accordance with the Company's model validation policies.

The fair value of the MSRs is primarily affected by changes in prepayments that result from shifts in mortgage interest rates. In managing this risk, the Company economically hedges a significant portion of the value of its MSRs through the use of interest rate derivative contracts, forward purchase commitments of mortgage-backed securities, and purchased securities classified as trading. The amount of contractually specified servicing fees, late fees and ancillary fees earned were \$420 million, \$24 million and \$17 million, respectively, for the quarter ended June 30, 2008, and \$466 million, \$25 million, and \$17 million, respectively, for the second quarter of 2007. These fees are classified in the Consolidated Statement of Income as Commissions and Fees.

Special-Purpose Entities

Primary Uses of and Involvement in SPEs

Citigroup is involved with many types of special-purpose entities (SPEs) in the normal course of business. The primary uses of SPEs are to obtain sources of liquidity for the Company and its clients through securitization vehicles and commercial paper conduits; to create investment products for clients; to provide asset-based financing to clients; or to raise financing for the Company.

The Company provides various products and services to SPEs. For example, it may:

Underwrite securities issued by SPEs and subsequently make a market in those securities;

Provide liquidity facilities to support short-term obligations of the SPE issued to third parties;

Provide credit enhancement in the form of letters of credit, guarantees, credit default swaps or total return swaps (where the Company receives the total return on certain assets held by the SPE);

Enter into interest rate, currency or other derivative contracts with the SPE;

Act as investment manager;

Provide debt financing to or have an ownership interest in the SPE; or

Provide administrative, trustee or other services.

SPEs used by the Company are generally accounted for as qualifying SPEs (QSPEs) or Variable Interest Entities (VIEs), as described below.

Qualifying SPEs

QSPEs are a special class of SPEs defined in FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities" (SFAS 140). These SPEs have significant limitations on the types of assets and derivative instruments they may own and the types and extent of activities and decision-making they may engage in. Generally, QSPEs are passive entities designed to purchase assets and pass through the cash flows from those assets to the investors in the QSPE. QSPEs may not actively manage their assets through discretionary sales and are generally limited to making decisions inherent in servicing activities and issuance of liabilities. QSPEs are generally exempt from consolidation by the transferor of assets to the QSPE and any investor or counterparty.

The following table summarizes the Company's involvement in QSPEs by business segment at June 30, 2008 and December 31, 2007:

	Assets of QSPEs	Retained interests
--	-----------------	--------------------

In million of dollars

Edgar Filing: CITIGROUP INC - Form 10-Q

	Assets of QSPEs		Retained interests	
	June 30, 2008	Dec.31,(1) 2007	June 30, 2008	Dec. 31,(1) 2007

Citigroup Total	\$ 828,345	\$ 774,138	\$ 29,958	\$ 32,299

(1) Updated to conform to the current period's presentation.

Credit Card Master Trusts

The Company securitizes credit card receivables through trusts which are established to purchase the receivables. Citigroup sells receivables into the QSPE trusts on a non-recourse basis. Credit card securitizations are revolving securitizations; that is, as customers pay their credit card balances, the cash proceeds are used to purchase new receivables and replenish the receivables in the trust. The Company relies on securitizations to fund a significant portion of its managed *N.A. Cards* business.

Citigroup is a provider of liquidity facilities to the commercial paper programs of the two primary securitization trusts it transacts with. Both facilities are made available on market terms to each trust. With respect to the Palisades commercial paper program in the Omni Master Trust, Citibank (South Dakota), N. A. is the sole provider of a full liquidity facility. The liquidity facility requires Citibank (South Dakota), N.A. to purchase Palisades's commercial paper at maturity if the commercial paper does not roll over as long as there are available credit enhancements outstanding, typically in the form of subordinated notes. The Palisades liquidity commitment amounted to \$9.5 billion at June 30, 2008 and \$7.5 billion at December 31, 2007. During the 2008 second quarter, Citibank (South Dakota) N.A. also became the sole provider of a full liquidity facility to the Dakota commercial program of the Citibank Master Credit Card Trust. This facility requires Citibank (South Dakota) N.A. to purchase Dakota commercial paper at maturity if the commercial paper does not roll over as long as there are available credit enhancements outstanding, typically in the form of

Edgar Filing: CITIGROUP INC - Form 10-Q

subordinated notes. The Dakota liquidity commitment amounted to \$9.0 billion at June 30, 2008.

Mortgage and Other Consumer Loan Securitization Vehicles

The Company's Consumer business provides a wide range of mortgage and other consumer loan products to its customers. Once originated, the Company often securitizes these loans (primarily mortgage and student loans) through the use of QSPEs. In addition to providing a source of liquidity and less expensive funding, securitizing these assets also reduces the Company's credit exposure to the borrowers. These mortgage and student loan securitizations are primarily non-recourse to the Company, thereby effectively transferring the risk of future credit losses to the purchasers of the securities issued by the trust. However, the Company generally retains the servicing rights and a residual interest in future cash flows from the trusts.

Municipal Tender Option Bond (TOB) QSPEs

The Company sponsors QSPE TOB trusts that hold municipal securities and issue long-term senior floating-rate notes ("Floaters") to third-party investors and junior residual securities ("Residuals") to the Company.

Unlike other Proprietary TOB trusts, and to conform to the requirements for a QSPE, the Company has no ability to unilaterally unwind QSPE TOB trusts. The Company would reconsider consolidation of the QSPE TOB trusts in the event that the amount of Floaters held by third parties decreased to such a level that the QSPE TOB trusts no longer met the definition of a QSPE because of insufficient third-party investor ownership of the Floaters.

Mutual Fund Deferred Sales Commission (DSC) Securitizations

Mutual Fund Deferred Sales Commission (DSC) receivables are assets purchased from distributors of mutual funds that are backed by distribution fees and contingent deferred sales charges (CDSC) generated by the distribution of certain shares to mutual fund investors. These share investors pay no upfront load, but the shareholder agrees to pay, in addition to the management fee imposed by the mutual fund, the distribution fee over a period of time and the CDSC (a penalty for early redemption to recover lost distribution fees). Asset managers use the proceeds from the sale of DSC receivables to cover the sales commissions associated with the shares sold.

The Company purchases these receivables from mutual fund distributors and sells a diversified pool of receivables to a trust. The trust in turn issues two tranches of securities:

Senior term notes (generally 92-94%) via private placement to third-party investors. These notes are structured to have at least a single "A" rating standard. The senior notes receive all cash distributions until fully repaid, which is generally approximately 5-6 years;

A residual certificate in the trust (generally 6-8%) to the Company. This residual certificate is fully subordinated to the senior notes, and receives no cash flows until the senior notes are fully paid.

Mortgage Loan Securitizations

Institutional Clients Group is active in structuring and underwriting residential and commercial mortgage-backed securitizations. In these transactions, the Company or its customer transfers loans into a bankruptcy-remote SPE. These SPEs are designed to be QSPEs as described above. The Company may hold residual interests and other securities issued by the SPEs until they can be sold to independent investors, and makes a market in those securities on an ongoing basis. The Company sometimes retains servicing rights for certain entities. These securities are held as trading assets on the balance sheet, are managed as part of the Company's trading activities, and are marked to-market with most changes in value recognized in earnings. The table above shows the assets and retained interests for mortgage QSPEs in which the Company acted as principal in transferring mortgages to the QSPE.

Variable Interest Entities

VIEs are entities defined in FIN 46-R as entities which either have a total equity investment at risk that is insufficient to permit the entity to finance its activities without additional subordinated financial support or whose equity investors lack the characteristics of a controlling financial interest (i.e., ability to make significant decisions through voting rights, right to receive the expected residual returns of the entity, and obligation to absorb the expected losses of the entity). Investors that finance the VIE through debt or equity interests, or other counterparties that provide other forms of support, such as guarantees, subordinated fee arrangements, or certain types of derivative contracts, are variable interest holders in the entity. The variable interest holder, if any, that will absorb a majority of the entity's expected losses, receive a majority of the entity's

Edgar Filing: CITIGROUP INC - Form 10-Q

expected residual returns, or both, is deemed to be the primary beneficiary and must consolidate the VIE. Consolidation under FIN 46-R is based on *expected* losses and residual returns, which consider various scenarios on a probability-weighted basis. Consolidation of a VIE is, therefore, determined based primarily on variability generated in scenarios that are considered most likely to occur, rather than based on scenarios that are considered more remote. Certain variable interests may absorb significant amounts of losses or residual returns contractually, but if those scenarios are considered very unlikely to occur, they may not lead to consolidation of the VIE.

All of these facts and circumstances are taken into consideration when determining whether the Company has variable interests that would deem it the primary beneficiary and, therefore, require consolidation of the related VIE or otherwise rise to the level where disclosure would provide useful information to the users of the Company's financial statements. In some cases, it is qualitatively clear based on the extent of the Company's involvement or the seniority of its investments that the Company is not the primary beneficiary of the VIE. In other cases, more detailed and quantitative analysis is required to make such a determination.

FIN 46-R requires disclosure of the Company's maximum exposure to loss where the Company has "significant" variable interests in an unconsolidated VIE. FIN 46-R does not define "significant" and, as such, judgment is required. The Company

Edgar Filing: CITIGROUP INC - Form 10-Q

generally considers the following types of involvement to be "significant":

Retaining any amount of debt financing (e.g., loans, notes, bonds, or other debt instruments) or an equity investment (e.g., common shares, partnership interests, or warrants) in any VIE where the Company has assisted with the structure of the transaction;

Writing a "liquidity put" or other facility to support the issuance of short-term notes;

Writing credit protection (e.g., guarantees, letters of credit, credit default swaps or total return swaps where the Company *receives* the total return or risk on the assets held by the VIE); or

Certain transactions where the Company is the investment manager and receives variable fees for services.

Thus, the Company's definition of "significant" involvement generally includes all variable interests held by the Company, even those where the likelihood of loss or the notional amount of exposure to any single legal entity is small. Involvement with a VIE as described above, regardless of the seniority or perceived risk of the Company's involvement, is included as significant. The Company believes that this more expansive interpretation of "significant" provides more meaningful and consistent information regarding its involvement in various VIE structures and provides more data for an independent assessment of the potential risks of the Company's involvement in various VIEs and asset classes.

In various other transactions the Company may act as a derivative counterparty (for example, interest rate swap, cross-currency swap, or purchaser of credit protection under a credit default swap or total return swap where the Company *pays* the total return on certain assets to the SPE); may act as underwriter or placement agent; may provide administrative, trustee, or other services; or may make a market in debt securities or other instruments issued by VIEs. The Company generally considers such involvement, by itself, "not significant" under FIN 46-R.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following tables summarize the Company's significant involvement in VIEs in millions of dollars:

As of June 30, 2008

	Maximum exposure to loss in significant unconsolidated VIEs(2)					
	Consolidated VIE assets	Significant unconsolidated VIE assets(1)	Funded exposures		Unfunded exposures	
			Debt investments	Equity investments	Funding Commitments	Guarantees and derivatives

(1)

A significant unconsolidated VIE is an entity where the Company has any variable interest considered to be significant as discussed on page 99, regardless of the likelihood of loss or the notional amount of exposure.

(2)

The definition of maximum exposure to loss is included in the text that follows.

Edgar Filing: CITIGROUP INC - Form 10-Q

As of June 30, 2008 (continued)			
Maximum exposure to loss in significant unconsolidated VIEs (continued)			
Total maximum exposure	As of December 31, 2007(1)		
	Consolidated VIE assets	Significant unconsolidated VIE assets(2)	Maximum exposure to loss in significant unconsolidated VIE assets(3)
\$	\$ 63	\$	\$
	35		
	1,385		
\$	\$ 1,483	\$	\$
\$ 70,472	\$	\$ 72,558	\$ 72,558

(1) Reclassified to conform to the current period's presentation.

(2) A significant unconsolidated VIE is an entity where the Company has any variable interest considered to be significant, regardless of the likelihood of loss or the notional amount of exposure.

(3) The definition of maximum exposure to loss is included in the text that follows.

Edgar Filing: CITIGROUP INC - Form 10-Q

These tables do not include:

Certain venture capital investments made by some of the Company's private equity subsidiaries, as the Company accounts for these investments in accordance with the AICPA Investment Company Audit Guide;

Certain limited partnerships where the Company is the general partner and the limited partners have the right to replace the general partner or liquidate the funds;

Certain investment funds for which the Company provides investment management services and personal estate trusts for which the Company provides administrative, trustee and/or investment management services;

VIEs structured by third parties where the Company holds securities in trading inventory. These investments are made on arm's-length terms, and are typically held for relatively short periods of time; and

Transferred assets to a VIE where the transfer did not qualify as a sale and where the Company did not have any other involvement that is deemed to be a variable interest with the VIE. These transfers are accounted for as secured borrowings by the Company.

The asset balances for consolidated VIEs represent the carrying amounts of the assets consolidated by the Company. The carrying amount may represent the amortized cost or the current fair value of the assets depending on the legal form of the asset (security or loan) and the Company's standard accounting policies for the asset type and line of business. The asset balances for unconsolidated VIEs where the Company has significant involvement represent the most current information available to the Company regarding the remaining principal balance of cash assets owned. In most cases, the asset balances represent an amortized cost basis without regard to impairments in fair value, unless fair value information is readily available to the Company. For VIEs that obtain asset exposures synthetically through derivative instruments (for example, synthetic CDOs), the Company includes the full original notional amount of the derivative as an asset.

The maximum funded exposure represents the balance sheet carrying amount of the Company's investment in the VIE in the form of purchased debt, funded loans or retained equity interest. It reflects the initial amount of cash invested in the VIE plus any accrued interest and is adjusted for any impairments in value recognized in earnings and any cash principal payments received. The maximum exposure of unfunded positions represents the remaining undrawn committed amount, including liquidity and credit facilities (such as guarantees) provided by the Company, or the notional amount of a derivative instrument considered to be a variable interest, adjusted for any declines in fair value recognized in earnings. In certain transactions, the Company has entered into derivative instruments or other arrangements that are not considered variable interests in the VIE under FIN 46-R (for example, interest rate swaps, cross-currency swaps, or where the Company is the purchaser of credit protection under a credit default swap or total return swap where the Company *pays* the total return on certain assets to the SPE). Receivables under such arrangements are not included in the maximum exposure amounts.

Consolidated VIEs Balance Sheet Classification

The following table presents the carrying amounts and classification of consolidated assets that are collateral for VIE obligations:

<i>In billions of dollars</i>	June 30, 2008	December 31, 2007
Cash	\$ 8.6	\$ 12.3
Trading account assets	61.5	87.3
Investments	21.7	15.0
Loans	2.2	2.2
Other assets	3.4	4.8
Total assets of consolidated VIEs	\$ 97.4	\$ 121.6

The consolidated VIEs included in the table above represent hundreds of separate entities with which the Company is involved. In general, the third-party investors in the obligations of consolidated VIEs have recourse only to the assets of the VIEs and do not have recourse to the Company, except where the Company has provided a guarantee to the investors or is the counterparty to certain derivative transactions involving

the VIE. Thus, the Company's maximum exposure to loss related to consolidated VIEs is significantly less than the carrying value of the consolidated VIE assets due to outstanding third-party financing.

Citi-Administered Asset-Backed Commercial Paper Conduits

The Company is active in the asset-backed commercial paper conduit business as administrator of several multi-seller commercial paper conduits, and also as a service provider to single-seller and other commercial paper conduits sponsored by third parties.

The multi-seller commercial paper conduits are designed to provide the Company's customers access to low-cost funding in the commercial paper markets. The conduits purchase assets from or provide financing facilities to customers and are funded by issuing high-grade commercial paper to third-party investors. The conduits generally do not purchase assets originated by the Company. The funding of the conduit is facilitated by the liquidity support and credit enhancement provided by the Company and by certain third parties. As administrator to the conduits, the Company is responsible for selecting and structuring assets purchased or financed by the conduits, making decisions regarding the funding of the conduit, including determining the tenor and other features of the commercial paper issued, monitoring the quality and performance of the conduit's assets, and facilitating the operations and cash flows of the conduit. In return, the Company earns structuring fees from clients for individual transactions and earns an administration fee from the conduit, which is equal to the income from client program and liquidity fees of the conduit after payment of interest costs and other fees.

Third-Party Conduits

The Company also provides liquidity facilities to single-and multi-seller conduits sponsored by third parties. These conduits are independently owned and managed and invest in a variety of asset classes, depending on the nature of the conduit. The facilities provided by the Company typically represent a small portion of the total liquidity facilities obtained by each conduit, and are collateralized by the assets of each conduit. The notional amount of these facilities is approximately \$1.7 billion as of June 30, 2008, and \$2.2 billion as of December 31, 2007. The conduits received \$3 million of funding as of June 30, 2008, compared to zero as of December 31, 2007.

Collateralized Debt Obligations

A collateralized debt obligation (CDO) is an SPE that purchases a pool of assets consisting of asset-backed securities and/or synthetic exposures through derivatives on asset-backed securities and issues multiple tranches of equity and notes to investors. A third-party manager is typically retained by the CDO to select the pool of assets and manage those assets over the term of the CDO. The Company earns fees for warehousing assets prior to the creation of a CDO, structuring CDOs, and placing debt securities with investors. In addition, the Company has retained interests in many of the CDOs it has structured and makes a market in those issued notes.

Collateralized Loan Obligations

A collateralized loan obligation (CLO) is substantially similar to the CDO transactions described above, except that the assets owned by the SPE (either cash instruments or synthetic exposures through derivative instruments) are corporate loans and to a lesser extent corporate bonds, rather than asset-backed debt securities.

Certain of the assets and exposure amounts relate to CLO warehouses, whereby the Company provides senior financing to the CLO to purchase assets during the warehouse period. The senior financing is repaid upon issuance of notes to third-parties.

Asset-Based Financing

The Company provides loans and other forms of financing to VIEs that hold assets. Those loans are subject to the same credit approvals as all other loans originated or purchased by the Company, and related loan loss reserves are reported as part of the Company's Allowance for loan losses. Financing in the form of debt securities or derivatives is, in most circumstances, reported in Trading account assets and accounted for at fair value with changes in value reported in earnings.

Municipal Securities Tender Option Bond (TOB) Trusts

The Company sponsors TOB trusts that hold fixed- and floating-rate, tax-exempt securities issued by state or local municipalities. The trusts are single-issuer trusts whose assets are purchased from the Company and from the secondary market. The trusts issue long-term senior floating rate notes ("Floaters") and junior residual securities ("Residuals"). The Floaters have a long-term rating based on the long-term rating of the underlying municipal bond and a short-term rating based on that of the liquidity provider to the trust. The Residuals are generally rated based on the long-term rating of the underlying municipal bond and entitle the holder to the residual cash flows from the issuing trust.

The Company sponsors three kinds of TOB trusts: customer TOB trusts, proprietary TOB trusts, and QSPE TOB trusts. Customer TOB trusts are trusts through which customers finance investments in municipal securities and are not consolidated by the Company. Proprietary and QSPE TOB trusts, on the other hand, provide the Company with the ability to finance its own investments in municipal securities. Proprietary TOB trusts are generally consolidated, in which case the financing (the Floaters) is recognized on the Company's balance sheet as a liability. However, certain proprietary TOB trusts, the Residuals of which are held by hedge funds that are consolidated and managed by the Company, are not consolidated by the Company. The assets and the associated liabilities of these TOB trusts are not consolidated by the hedge funds (and, thus, are not consolidated by the Company) under the application of the AICPA Investment Company Audit Guide, which precludes consolidation of owned investments. In accordance with the Audit Guide, the hedge funds report their investments in the Residuals at fair value with changes in value included in earnings. The Company consolidates the hedge funds because the Company holds controlling financial interests in the hedge funds. Certain of the Company's equity investments in the hedge funds are hedged with derivatives transactions executed by the Company with third parties referencing the returns of the hedge fund. QSPE trusts provide the Company with the same exposure as proprietary TOB trusts and are not consolidated by the Company. The Company's residual interests in QSPE TOB trusts are evaluated for bifurcation in accordance with SFAS 133. Any embedded derivatives are separately reported at fair value, while the debt host contracts are classified as available-for-sale securities.

The total assets of the three categories of TOB trusts as of June 30, 2008 and December 31, 2007 are as follows:

<i>In billions of dollars</i>	June 30, 2008	December 31, 2007
-------------------------------	--------------------------	------------------------------

TOB trust type			
Customer TOB Trusts (Not consolidated)	\$	9.5	\$ 17.6
Proprietary TOB Trusts (Consolidated and Non- consolidated)	\$	22.2	\$ 22.0
QSPE TOB Trusts (Not consolidated)	\$	9.2	\$ 10.6

Municipal Investments

Municipal investment transactions represent partnerships that finance the construction and rehabilitation of low-income affordable rental housing. The Company generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits accorded the affordable housing investments made by the partnership.

Client Intermediation

Client intermediation transactions represent a range of transactions designed to provide investors with specified returns based on the returns of an underlying security, referenced asset or index. These transactions include credit-linked notes and equity-linked notes. In these transactions, the SPE typically obtains exposure to the underlying security, referenced asset or index through a derivative instrument such as a total return swap or a credit default swap. In turn the SPE issues notes to investors that pay a return based on the specified underlying security, referenced asset or index. The SPE invests the proceeds in a financial asset or a

Edgar Filing: CITIGROUP INC - Form 10-Q

guaranteed insurance contract (GIC) that serves as collateral for the derivative contract over the term of the transaction.

The Company's involvement in these transactions includes being the counterparty to the SPE's derivative instruments and investing in a portion of the notes issued by the SPE.

Other

Other vehicles include the Company's interests in entities established to facilitate various client financing transactions as well as a variety of investment partnerships.

Structured Investment Vehicles

Structured Investment Vehicles (SIVs) are SPEs that issue junior notes and senior debt (medium-term notes, and short-term commercial paper) to fund the purchase of high-quality assets. The junior notes are subject to the "first loss" risk of the SIVs. The SIVs provide a variable return to junior note holders based on the net spread between the cost to issue the senior debt and the return realized by the high-quality assets. The Company acts as investment manager for the SIVs and, prior to December 13, 2007, was not contractually obligated to provide liquidity facilities or guarantees to the SIVs.

On December 13, 2007, the Company announced its commitment to provide support facilities that would resolve uncertainties regarding senior debt ratings facing the Citi-advised SIVs. The Company's commitment was a response to the ratings review for possible downgrade announced by two rating agencies of the outstanding senior debt of the SIVs, and the continued reduction of liquidity in the SIV-related asset-backed commercial paper and medium-term note markets. These markets are the traditional funding sources for the SIVs. The Company's actions are designed to support the SIVs' senior debt ratings and to allow the SIVs to continue to pursue their asset reduction plan. As a result of this commitment, the Company became the SIVs' primary beneficiary and began consolidating these entities.

On February 12, 2008, Citigroup finalized the terms of the support facilities, which take the form of a commitment to provide \$3.5 billion of mezzanine capital to the SIVs in the event the market value of their junior notes approaches zero. At June 30, 2008, \$3.4 billion has been drawn in aggregate by the SIVs under the support facilities.

Investment Funds

The Company is the investment manager for certain VIEs that invest in various asset classes including private equity, hedge funds, real estate, fixed income and infrastructure. The Company earns a management fee, which is a percentage of capital under management, and may earn performance fees. In addition, for some of these funds, the Company has an ownership interest in the investment funds. As of June 30, 2008 and December 31, 2007 the total amount invested in these funds was \$0.6 billion and \$0.2 billion, respectively.

The Company has also established a number of investment funds as opportunities for qualified employees to invest in private equity investments. The Company acts as investment manager to these funds and may provide employees with financing on both a recourse and non-recourse basis for a portion of the employees' investment commitments.

Certain Fixed Income Funds Managed by Institutional Clients Group

Falcon multi-strategy fixed income funds

On February 20, 2008, the Company entered into a \$500 million credit facility with the Falcon multi-strategy fixed income funds (the "Falcon funds") managed by Institutional Clients Group. As a result of providing this facility, the Company became the primary beneficiary of the Falcon funds and consolidated the assets and liabilities in its Consolidated Balance Sheet. At June 30, 2008, the total assets of the Falcon funds were approximately \$3 billion.

ASTA/MAT municipal funds

On March 3, 2008, the Company made an equity investment of \$661 million (under a \$1 billion commitment) which provides for gain sharing with unaffiliated investors, in the Municipal Opportunity Funds (MOFs). The MOFs are funds managed by Institutional Clients Group that make leveraged investments in tax-exempt municipal bonds and accept investments through feeder funds known as ASTA and MAT. As a result of the Company's equity commitment, the Company became the primary beneficiary of the MOFs and consolidated the assets and liabilities in its Consolidated Balance Sheet. At June 30, 2008, the total assets of the MOFs were approximately \$2 billion.

Trust Preferred Securities

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company has raised financing through the issuance of trust preferred securities. In these transactions, the Company forms a statutory business trust and owns all of the voting equity shares of the trust. The trust issues preferred equity securities to third-party investors and invests the gross proceeds in junior subordinated deferrable interest debentures issued by the Company. These trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the preferred equity securities held by third-party investors. These trusts' obligations are fully and unconditionally guaranteed by the Company.

Because the sole asset of the trust is a receivable from the Company, the Company is not permitted to consolidate the trusts under FIN 46-R, even though the Company owns all of the voting equity shares of the trust, has fully guaranteed the trusts' obligations, and has the right to redeem the preferred securities in certain circumstances. The Company recognizes the subordinated debentures on its balance sheet as long-term liabilities.

16. DERIVATIVES ACTIVITIES

In the ordinary course of business, Citigroup enters into various types of derivative transactions. These derivative transactions include:

Futures and forward contracts which are commitments to buy or sell at a future date a financial instrument, commodity or currency at a contracted price and may be settled in cash or through delivery.

Swap contracts which are commitments to settle in cash at a future date or dates that may range from a few days to a number of years, based on differentials between specified financial indices, as applied to a notional principal amount.

Option contracts which give the purchaser, for a fee, the right, but not the obligation, to buy or sell within a limited time a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

Citigroup enters into these derivative contracts for the following reasons:

Trading Purposes Customer Needs Citigroup offers its customers derivatives in connection with their risk-management actions to transfer, modify or reduce their interest rate, foreign exchange and other market/credit risks or for their own trading purposes. As part of this process, Citigroup considers the customers' suitability for the risk involved, and the business purpose for the transaction. Citigroup also manages its derivative-risk positions through offsetting trade activities, controls focused on price verification, and daily reporting of positions to senior managers.

Trading Purposes Own Account Citigroup trades derivatives for its own account. Trading limits and price verification controls are key aspects of this activity.

Asset/Liability Management Hedging Citigroup uses derivatives in connection with its risk-management activities to hedge certain risks or reposition the risk profile of the Company. For example, Citigroup may issue fixed-rate long-term debt and then enter into a receive-fixed, pay-variable-rate interest rate swap with the same tenor and notional amount to convert the interest payments to a net variable-rate basis. This strategy is the most common form of an interest rate hedge, as it minimizes interest cost in certain yield curve environments. Derivatives are also used to manage risks inherent in specific groups of on-balance sheet assets and liabilities, including investments, corporate and consumer loans, deposit liabilities, as well as other interest-sensitive assets and liabilities. In addition, foreign exchange contracts are used to hedge non-U.S. dollar denominated debt, available-for-sale securities, net capital exposures and foreign-exchange transactions.

Citigroup accounts for its hedging activity in accordance with SFAS 133. As a general rule, SFAS 133 hedge accounting is permitted for those situations where the Company is exposed to a particular risk, such as interest rate or foreign-exchange risk, that causes changes in the fair value of an asset or liability, or variability in the expected future cash flows of an existing asset, liability, or a forecasted transaction that may affect earnings.

Derivative contracts hedging the risks associated with the changes in fair value are referred to as *fair value hedges*, while contracts hedging the risks affecting the expected future cash flows are called *cash flow hedges*. Hedges that utilize derivatives or debt instruments to manage the foreign exchange risk associated with equity investments in non-U.S. dollar functional currency foreign subsidiaries (net investment in a foreign operation) are called *net investment hedges*.

All derivatives are reported on the balance sheet at fair value. In addition, where applicable, all such contracts covered by master netting agreements are reported net. Gross positive fair values are netted with gross negative fair values by counterparty pursuant to a valid master netting agreement. In addition payables and receivables in respect of cash collateral received from or paid to a given counterparty is included in this netting. However, non-cash collateral is not included.

As of June 30, 2008, and December 31, 2007, the amount of payables in respect of cash collateral received that was netted with unrealized gains from derivatives was \$27 billion and \$26 billion, respectively, while the amount of receivables in respect of cash collateral paid that was netted with unrealized losses from derivatives was \$35 billion and \$37 billion, respectively.

Edgar Filing: CITIGROUP INC - Form 10-Q

If certain hedging criteria specified in SFAS 133 are met, including testing for hedge effectiveness, special hedge accounting may be applied. The hedge-effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships. For fair-value hedges, the changes in value of the hedging derivative, as well as the changes in value of the related hedged item, due to the risk being hedged, are reflected in current earnings. For cash-flow hedges and net-investment hedges, the changes in value of the hedging derivative are reflected in Accumulated other comprehensive income (loss) in stockholders' equity to the extent the hedge was effective. Hedge ineffectiveness, in either case, is reflected in current earnings.

Continuing with the example referred to above, for Asset/Liability Management Hedging, the fixed-rate long-term debt may be recorded at amortized cost under current U.S. GAAP. However, by electing to use SFAS 133 hedge accounting, the carrying value of this note is adjusted for changes in the benchmark interest rate, with any such changes in value recorded in current earnings. The related interest-rate swap is also recorded on the balance sheet at fair value, with any changes in fair value reflected in earnings. Thus, any ineffectiveness resulting from the hedging relationship is recorded in current earnings. Alternatively, an economic hedge, which does not meet the SFAS 133 hedging criteria, would involve only recording the derivative at fair value on the balance sheet, with its associated changes in fair

Edgar Filing: CITIGROUP INC - Form 10-Q

value recorded in earnings. The debt would continue to be carried at amortized cost and, therefore, current earnings would be impacted only by the interest rate shifts that cause the change in the swap's value and the underlying yield of the debt. This type of hedge is undertaken when SFAS 133 hedge requirements cannot be achieved or management decides not to apply SFAS 133 hedge accounting. Another alternative for the Company would be to elect to carry the note at fair value under SFAS 159. Once the irrevocable election is made upon issuance of the note, the full change in fair value of the note would be reported in earnings. The related interest rate swap, with changes in fair value also reflected in earnings, provides a natural offset to the note's fair value change. To the extent the two offsets would not be exactly equal, the difference would be reflected in current earnings. This type of economic hedge is undertaken when the Company prefers to follow this simpler method that achieves similar financial statement results to an SFAS 133 fair-value hedge.

Fair-value hedges

Hedging of benchmark interest rate risk Citigroup hedges exposure to changes in the fair value of fixed-rate financing transactions, including liabilities related to outstanding debt, borrowings and time deposits. The fixed cash flows from those financing transactions are converted to benchmark variable-rate cash flows by entering into receive-fixed, pay-variable interest rate swaps. Typically these fair-value hedge relationships use dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis.

Citigroup also hedges exposure to changes in the fair value of fixed-rate assets, including available-for-sale debt securities and interbank placements. The hedging instruments mainly used are receive-variable, pay-fixed interest rate swaps for the remaining hedged asset categories. Most of these fair-value hedging relationships use dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis, while certain others use regression analysis.

For a limited number of fair-value hedges of benchmark interest-rate risk, Citigroup uses the "shortcut" method as SFAS 133 allows the Company to assume no ineffectiveness if the hedging relationship involves an interest-bearing financial asset or liability and an interest-rate swap. In order to assume no ineffectiveness, Citigroup ensures that all the shortcut method requirements of SFAS 133 for these types of hedging relationships are met. The amount of shortcut method hedges that Citigroup uses is de minimis.

Hedging of foreign-exchange risk Citigroup hedges the change in fair value attributable to foreign-exchange rate movements in available-for-sale securities that are denominated in currencies other than the functional currency of the entity holding the securities, which may be in or outside the U.S. Typically, the hedging instrument employed is a forward foreign-exchange contract. In this type of hedge, the change in fair value of the hedged available-for-sale security attributable to the portion of foreign-exchange risk hedged is reported in earnings and not Accumulated other comprehensive income a process that serves to offset substantially the change in fair value of the forward contract that is also reflected in earnings. Citigroup typically considers the premium associated with forward contracts (differential between spot and contractual forward rates) as the cost of hedging; this is generally excluded from the assessment of hedge effectiveness and reflected directly in earnings. Dollar-offset method is typically used to assess hedge effectiveness. Since that assessment is based on changes in fair value attributable to changes in spot rates on both the available-for-sale securities and the forward contracts for the portion of the relationship hedged, the amount of hedge ineffectiveness is not significant.

Cash-flow hedges

Hedging of benchmark interest rate risk Citigroup hedges variable cash flows resulting from floating-rate liabilities and roll-over (re-issuance) of short-term liabilities. Variable cash flows from those liabilities are converted to fixed-rate cash flows by entering into receive-variable, pay-fixed interest-rate swaps and receive-variable, pay-fixed forward-starting interest-rate swaps. For some hedges, the hedge ineffectiveness is eliminated by matching all terms of the hedged item and the hedging derivative at inception and on an ongoing basis. Citigroup does not exclude any terms from consideration when applying the matched terms method. To the extent all terms are not perfectly matched, these cash-flow hedging relationships use either regression analysis or dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis. Since efforts are made to match the terms of the derivatives to those of the hedged forecasted cash flows as closely as possible, the amount of hedge ineffectiveness is not significant even when the terms do not match perfectly.

Citigroup also hedges variable cash flows resulting from investments in floating-rate available-for-sale debt securities. Variable cash flows from those assets are converted to fixed-rate cash flows by entering into receive-fixed, pay-variable interest rate swaps. These cash-flow hedging relationships use either regression analysis or dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis. Since efforts are made to align the terms of the derivatives to those of the hedged forecasted cash flows as closely as possible, the amount of hedge ineffectiveness is not significant.

Citigroup is currently not using the shortcut method for any cash-flow hedging relationships.

Edgar Filing: CITIGROUP INC - Form 10-Q

Hedging of foreign exchange risk Citigroup locks in the functional currency equivalent of cash flows of various balance sheet liability exposures, including deposits, short-term borrowings and long-term debt (and the forecasted issuances or rollover of such items) that are denominated in a currency other than the functional currency of the issuing entity. Depending on the risk management objectives, these types of hedges are designated as either cash-flow hedges of only foreign exchange risk or cash-flow hedges of both foreign exchange and interest-rate risk. The hedging instruments used are foreign-exchange forward contracts, cross-currency swaps and foreign-currency options. For some hedges, Citigroup matches all terms of the hedged item and the hedging derivative at inception and on an ongoing basis to eliminate hedge ineffectiveness. Citigroup does not exclude any terms from consideration when applying the matched terms method. To the extent all terms are not perfectly matched, any ineffectiveness is measured using the "hypothetical derivative method" from FASB Derivative Implementation Group Issue G7. Efforts are made to match up the terms of the hypothetical and actual derivatives used as closely as possible. As a result, the amount of hedge ineffectiveness is not significant even when the terms do not match perfectly.

Hedging the overall changes in cash flows In situations where the contractual rate of a variable-rate asset or liability is not a benchmark rate, Citigroup designates the risk of overall changes in cash flows as the hedged risk. Citigroup primarily hedges variability in the total cash flows related to non-benchmark-rate-based liabilities and uses receive-variable, pay-fixed interest rate swaps as the hedging instrument. These cash flow hedging relationships use regression analysis to assess effectiveness at inception and on an ongoing basis.

Net investment hedges

Consistent with SFAS No. 52, "Foreign Currency Translation" (SFAS 52), SFAS 133 allows hedging of the foreign-currency risk of a net investment in a foreign operation. Citigroup primarily uses foreign-currency forwards, options and foreign-currency-denominated debt instruments to manage the foreign-exchange risk associated with Citigroup's equity investments in several non-U.S. dollar functional currency foreign subsidiaries. In accordance with SFAS 52, Citigroup records the change in the carrying amount of these investments in the cumulative translation adjustment account within Accumulated other comprehensive income (loss). Simultaneously, the effective portion of the hedge of this exposure is also recorded in the cumulative translation adjustment account, and the ineffective portion, if any, is immediately recorded in earnings.

For derivatives used in net-investment hedges, Citigroup follows the forward rate method from FASB Derivative Implementation Group Issue H8. According to that method, all changes in fair value, including changes related to the forward rate component of the foreign-currency forward contracts and the time value of foreign currency option, are recorded in the cumulative translation adjustment account. For foreign-currency-denominated debt instruments that are designated as hedges of net investments, the translation gain or loss that is recorded in the cumulative translation adjustment account is based on the spot exchange rate between the functional currency of the respective subsidiary and the U.S. dollar, which is the functional currency of Citigroup. To the extent the notional amount of the hedging instrument exactly matches the hedged net investment, and the underlying exchange rate of the derivative hedging instrument relates to the exchange rate between the functional currency of the net investment and Citigroup's functional currency, (or, in the case of the non-derivative debt instrument, such instrument is denominated in the functional currency of the net investment) no ineffectiveness is recorded in earnings.

Key aspects of achieving SFAS 133 hedge accounting are documentation of hedging strategy and hedge effectiveness at the hedge inception and substantiating hedge effectiveness on an ongoing basis. A derivative must be highly effective in accomplishing the hedge objective of offsetting either changes in the fair value or cash flows of the hedged item for the risk being hedged. Any ineffectiveness in the hedge relationship is recognized in current earnings. The assessment of effectiveness excludes changes in the value of the hedged item that are unrelated to the risks being hedged. Similarly, the assessment of effectiveness may exclude changes in the fair value of a derivative related to time value that, if excluded, are recognized in current earnings.

The following table summarizes certain information related to the Company's hedging activities for the three and six months ended June 30, 2008 and 2007:

<i>In millions of dollars</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Fair value hedges				
Hedge ineffectiveness recognized in earnings	\$ 35	\$ (9)	\$ 84	\$ 8
Net gain excluded from assessment of effectiveness	23	173	140	255
Cash flow hedges				

Edgar Filing: CITIGROUP INC - Form 10-Q

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
Hedge ineffectiveness recognized in earnings	<u>(5)</u>		<u>(15)</u>	
Net gain (loss) excluded from assessment of effectiveness	<u>3</u>		<u>(3)</u>	
Net investment hedges				
Net (loss) included in foreign currency translation adjustment within Accumulated other comprehensive income	<u>\$ (311)</u>	<u>\$ (121)</u>	<u>\$ (477)</u>	<u>\$ (144)</u>

Edgar Filing: CITIGROUP INC - Form 10-Q

For cash-flow hedges, any changes in the fair value of the end-user derivative remaining in Accumulated other comprehensive income (loss) on the Consolidated Balance Sheet will be included in earnings of future periods to offset the variability of the hedged cash flows when such cash flows affects earnings.

The change in Accumulated other comprehensive income (loss) from cash-flow hedges for the three and six months ended June 30, 2008 and 2007 can be summarized as follows (after-tax):

<i>In millions of dollars</i>	2008	2007
Beginning balance, January 1	\$ (3,163)	\$ (61)
Net (loss) from cash flow hedges	(1,833)	(347)
Net amounts reclassified to earnings	195	(92)
Ending balance, March 31	\$ (4,801)	\$ (500)
Net gain from cash flow hedges	752	1,127
Net amounts reclassified to earnings	126	(81)
Balance at June 30	\$ (3,923)	\$ 546

Derivatives may expose Citigroup to market, credit or liquidity risks in excess of the amounts recorded on the Consolidated Balance Sheet. Market risk on a derivative product is the exposure created by potential fluctuations in interest rates, foreign-exchange rates and other values, and is a function of the type of product, the volume of transactions, the tenor and terms of the agreement, and the underlying volatility. Credit risk is the exposure to loss in the event of nonperformance by the other party to the transaction where the value of any collateral held is not adequate to cover such losses. The recognition in earnings of unrealized gains on these transactions is subject to management's assessment as to collectibility. Liquidity risk is the potential exposure that arises when the size of the derivative position may not be able to be rapidly adjusted in periods of high volatility and financial stress at a reasonable cost.

17. FAIR VALUE (SFAS 155, SFAS 156, SFAS 157, and SFAS 159)

Effective January 1, 2007, the Company adopted SFAS 157 and SFAS 159. Both standards address aspects of the expanding application of fair-value accounting. SFAS 157 defines fair value, establishes a consistent framework for measuring fair value and expands disclosure requirements about fair-value measurements. SFAS 157, among other things, requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. In addition, SFAS 157 precludes the use of block discounts when measuring the fair value of instruments traded in an active market, which discounts were previously applied to large holdings of publicly traded equity securities. It also requires recognition of trade-date gains related to certain derivative transactions whose fair value has been determined using unobservable market inputs. This guidance supersedes the guidance in Emerging Issues Task Force Issue No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities" (EITF Issue 02-3), which prohibited the recognition of trade-date gains for such derivative transactions when determining the fair value of instruments not traded in an active market.

As a result of the adoption of SFAS 157, the Company has made some amendments to the techniques used in measuring the fair value of derivative and other positions. These amendments change the way that the probability of default of a counterparty is factored into the valuation of derivative positions, include for the first time the impact of Citigroup's own credit risk on derivatives and other liabilities measured at fair value, and also eliminate the portfolio servicing adjustment that is no longer necessary under SFAS 157.

Under SFAS 159, the Company may elect to report most financial instruments and certain other items at fair value on an instrument-by-instrument basis with changes in fair value reported in earnings. After the initial adoption, the election is made at the acquisition of an eligible financial asset, financial liability, or firm commitment or when certain specified reconsideration events occur. The fair value election may not be revoked once an election is made.

Additionally, the transition provisions of SFAS 159 permit a one-time election for existing positions at the adoption date with a cumulative-effect adjustment included in opening retained earnings and future changes in fair value reported in earnings.

The Company also has elected the fair value accounting provisions permitted under FASB Statement No. 155, "Accounting for Certain Hybrid Financial Instruments" (SFAS 155), and FASB Statement No 156, "Accounting for Servicing of Financial Assets" (SFAS 156) for certain assets and liabilities. In accordance with SFAS 155, which was primarily adopted on a prospective basis, hybrid financial instruments such as structured notes containing embedded derivatives that otherwise would require bifurcation, as well as certain interest-only instruments may be accounted for at fair value if the Company makes an irrevocable election to do so on an instrument-by-instrument basis. The changes in fair value are recorded in current earnings. Additional discussion regarding the applicable areas in which SFAS 155 was adopted is presented below.

SFAS 156 requires all servicing rights to be recognized initially at fair value. At its initial adoption, the standard permits a one-time irrevocable election to re-measure each class of servicing rights at fair value, with the changes in fair value recorded in current earnings. The classes of servicing rights are identified based on the availability of market inputs used in determining their fair values and the methods for managing their risks. The Company has elected fair-value accounting for its mortgage and student loan classes of servicing rights. The impact of adopting this standard was not material. See Note 15 on page 95 for further discussions regarding the accounting and reporting of mortgage servicing rights.

Fair-Value Hierarchy

SFAS 157 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. These two types of inputs have created the following fair-value hierarchy:

Level 1 Quoted prices for *identical* instruments in active markets.

Level 2 Quoted prices for *similar* instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are *unobservable*.

This hierarchy requires the use of observable market data when available.

Determination of Fair Value

For assets and liabilities carried at fair value, the Company measures such value using the procedures set out below, irrespective of whether these assets and liabilities are carried at fair value as a result of an election under SFAS 159, SFAS 155 or SFAS 156, or whether they were previously carried at fair value.

When available, the Company generally uses quoted market prices to determine fair value, and classifies such items in Level 1. In some cases where a market price is available the Company will make use of acceptable practical expedients (such as matrix pricing) to calculate fair value, in which case the items are classified in Level 2.

If quoted market prices are not available, fair value is based upon internally developed valuation techniques that use, where possible, current market-based or independently sourced market parameters, such as interest rates, currency rates, option volatilities, etc. Items valued using such internally generated valuation techniques are classified according to the lowest level input or value driver that is significant to the valuation. Thus, an item may be classified

Edgar Filing: CITIGROUP INC - Form 10-Q

in Level 3 even though there may be some significant inputs that are readily observable.

The following section describes the valuation methodologies used by the Company to measure various financial instruments at fair value, including an indication of the level in the fair value hierarchy in which each instrument is generally classified. Where appropriate the description includes details of the valuation models, the key inputs to those models as well as any significant assumptions.

Securities purchased under agreements to resell & securities sold under agreements to repurchase

No quoted prices exist for such instruments and so fair value is determined using a discounted cash-flow technique. Cash flows are estimated based on the terms of the contract, taking into account any embedded derivative or other features. Expected cash flows are discounted using market rates appropriate to the maturity of the instrument as well as the nature and amount of collateral taken or received. Generally, such instruments are classified within Level 2 of the fair-value hierarchy as the inputs used in the fair valuation are readily observable.

Trading Account Assets Trading Securities and Trading Loans

When available, the Company uses quoted market prices to determine the fair value of trading securities; such items are classified in Level 1 of the fair-value hierarchy. Examples include some government securities and exchange-traded equity securities.

For bonds and secondary market loans traded over the counter, the Company generally determines fair value utilizing internal valuation techniques. Fair values estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources and may apply matrix pricing for similar bonds or loans where no price is observable. If available, the Company may also use quoted prices for recent trading activity of assets with similar characteristics to the bond or loan being valued. Trading securities and loans priced using such methods are generally classified as Level 2. However, when less liquidity exists for a security or loan, a quoted price is stale, or prices from independent sources vary, a loan or security is generally classified as Level 3.

Where the Company's principal market for a portfolio of loans is the securitization market, the Company uses the securitization price to determine the fair value of the portfolio. The securitization price is determined from the assumed proceeds of a hypothetical securitization in the current market, adjusted for transformation costs (i.e., direct costs other than transaction costs) and securitization uncertainties such as market conditions and liquidity. As a result of the severe reduction in the level of activity in certain securitization markets since the second half of 2007, observable securitization prices for certain directly comparable portfolios of loans have not been readily available. Therefore, such portfolios of loans are generally classified within Level 3 of the fair value hierarchy. However, for other loan securitization markets, such as those related to conforming prime fixed rate and conforming adjustable-rate mortgage loans, pricing verification of the hypothetical securitizations has been possible, since these markets have remained active. Accordingly, these loan portfolios are classified as Level 2 within the fair value hierarchy.

Trading Account Assets and Liabilities Derivatives

Exchange-traded derivatives are generally fair valued using quoted market (i.e., exchange) prices and so are classified within Level 1 of the fair-value hierarchy.

The majority of derivatives entered into by the Company are executed over the counter and so are valued using internal valuation techniques as no quoted market prices exist for such instruments. The valuation techniques and inputs depend on the type of derivative and the nature of the underlying instrument. The principal techniques used to value these instruments are discounted cash flows, Black-Scholes and Monte Carlo simulation. The fair values of derivative contracts reflect cash the Company has paid or received (for example, option premiums paid and received).

The key inputs depend upon the type of derivative and the nature of the underlying instrument and include interest rate yield curves, foreign-exchange rates, the spot price of the underlying, volatility, and correlation. The item is placed in either Level 2 or Level 3 depending on the observability of the significant inputs to the model. Correlation and items with longer tenors are generally less observable.

Subprime-Related Direct Exposures in CDOs

The Company accounts for its CDO super senior subprime direct exposures and the underlying securities on a fair-value basis with all changes in fair value recorded in earnings. Citigroup's CDO super senior subprime direct exposures are not subject to valuation based on observable transactions. Accordingly, the fair value of these exposures is based on management's best estimates based on facts and circumstances as of the date of these consolidated financial statements.

Citigroup's net CDO super senior subprime direct exposures, \$18.1 billion at June 30, 2008, are Level 3 assets and are subject to valuation based on significant unobservable inputs. Accordingly, fair value of these exposures is based on estimates of the future cash flows from the mortgage loans underlying the assets of the ABS CDOs. To determine the performance of the underlying mortgage loan portfolios, the Company

Edgar Filing: CITIGROUP INC - Form 10-Q

estimates the prepayments, defaults and loss severity based on a number of macro-economic factors, including housing price changes, unemployment rates and interest rates and borrower and loan attributes, such as age, credit scores, documentation status, loan-to-value (LTV) ratios, and debt-to-income (DTI) ratios. The model is calibrated using available mortgage loan information including historical loan performance. In addition, the methodology estimates the impact of geographic concentration of mortgages, and the impact of reported fraud in the origination of subprime mortgages. An appropriate discount rate is then applied to the cash flows generated for each super senior ABS CDO tranche, in order to estimate its current fair value.

When necessary, the valuation methodology used by Citigroup is refined and the inputs used for the purposes of estimation are modified, in part, to reflect ongoing market developments. More specifically, two refinements were made

Edgar Filing: CITIGROUP INC - Form 10-Q

during the first quarter of 2008: a more direct method of calculating estimated housing-price changes and a more refined method for calculating the discount rate. During the fourth quarter 2007, housing-price changes were estimated using a series of factors including projected national housing-price changes. During the first quarter of 2008, housing-price changes were estimated using a forward looking projection based on the S&P Case-Shiller Home Price Index. This change facilitates a more direct estimation of subprime house price changes. Prior to the first quarter of 2008, the discount rate used was based on observable CLO spreads applicable to the assumed rating of each ABS CDO super senior tranche. During the first and second quarters of 2008, the discount rate was based on a weighted average combination of the implied spreads from single named ABS bond prices, ABX indices and CLO spreads depending on vintage and asset types. This refinement was made, in part, in response to the combination of continuing rating agency downgrades of RMBS and ABS CDOs and the absence of observable CLO spreads at the resulting rating levels.

Consistent with the first quarter of 2008, the second quarter housing-price changes were estimated using a forward-looking projection based on the S&P Case-Shiller Home Price Index. In addition, during the second quarter of 2008, the discount rates continued to be based on a weighted average combination of the implied spreads from single named ABS bond prices, ABX indices and CLO spreads depending on vintage and asset types.

The primary drivers that currently impact the super senior valuations are the discount rates used to calculate the present value of projected cash flows and projected mortgage loan performance.

Given the above, the Company's CDO super senior subprime direct exposures were classified in Level 3 of the fair-value hierarchy.

For most of the lending and structuring direct subprime exposures (excluding super seniors), fair value is determined utilizing observable transactions where available, other market data for similar assets in markets that are not active and other internal valuation techniques.

Investments

The investments category includes available-for-sale debt and equity securities, whose fair value is determined using the same procedures described for trading securities above.

Also included in investments are nonpublic investments in private equity and real estate entities held by the Securities and Banking business. Determining the fair value of nonpublic securities involves a significant degree of management resources and judgment as no quoted prices exist and such securities are generally very thinly traded. In addition, there may be transfer restrictions on private equity securities. The Company uses an established process for determining the fair value of such securities, using commonly accepted valuation techniques, including the use of earnings multiples based on comparable public securities, industry specific non-earnings-based multiples and discounted cash flow models. In determining the fair value of nonpublic securities, the Company also considers events such as a proposed sale of the investee company, initial public offerings, equity issuances, or other observable transactions.

Private equity securities are generally classified in Level 3 of the fair value hierarchy.

Short-Term Borrowings and Long-Term Debt

The fair value of non-structured liabilities is determined by discounting expected cash flows using the appropriate discount rate for the applicable maturity. Such instruments are generally classified in Level 2 of the fair-value hierarchy as all inputs are readily observable.

The Company determines the fair value of structured liabilities (where performance is linked to structured interest rates, inflation or currency risks) and hybrid financial instruments (performance linked to risks other than interest rates, inflation or currency risks) using the appropriate derivative valuation methodology (described above) given the nature of the embedded risk profile. Such instruments are classified in Level 2 or Level 3 depending on the observability of significant inputs to the model.

Market Valuation Adjustments

Counterparty credit-risk adjustments are applied to financial instruments such as over-the-counter derivatives, where the base valuation uses market parameters based on the LIBOR interest rate curves. Not all counterparties have the same credit rating as that implied by the relevant LIBOR curve and so it is necessary to take into account the actual credit rating of a counterparty in order to arrive at the true fair value of such an item. Furthermore, the counterparty credit-risk adjustment takes into account the effect of credit-risk mitigants such as pledged collateral and to what extent there is a legal right of offset with a counterparty.

Edgar Filing: CITIGROUP INC - Form 10-Q

Bilateral or "own" credit risk adjustments are applied to reflect the Company's own credit risk when valuing all liabilities measured at fair value, in accordance with the requirements of SFAS 157. The methodology is consistent with that applied in generating counterparty credit risk adjustments, but incorporates the Company's own credit risk as observed in the credit default swap market. As for counterparty credit risk, own credit-risk adjustments include the impact of credit-risk mitigants.

Liquidity adjustments are applied to items in Level 2 or Level 3 of the fair-value hierarchy to ensure that the fair value reflects the price at which the entire position could be liquidated. The liquidity reserve is based on the bid/offer spread for an instrument, amended to the extent that the size and nature of the position would result in its being liquidated outside that bid/offer spread.

Auction Rate Securities

Auction Rate Securities (ARS) are long-term municipal bonds, corporate bonds, securitizations and preferred stocks with interest rates or dividend yields that are re-set through periodic auctions. The coupon paid in the current period is based on the rate determined by the prior auction. In the event of an auction failure, ARS holders receive a 'fail rate' coupon, which is specified by the original issue documentation of each ARS.

Edgar Filing: CITIGROUP INC - Form 10-Q

Where insufficient orders to purchase all of the ARS issue to be sold in an auction were received, the primary dealer or auction agent would traditionally have purchased any residual unsold inventory (without a contractual obligation to do so). This residual inventory would then be repaid through subsequent auctions, typically in a short timeframe. Due to this auction mechanism and generally liquid market, ARS have historically traded and were valued as short-term instruments.

Citigroup acted in the capacity of primary dealer for approximately \$72 billion of ARS and continued to purchase residual unsold inventory in support of the auction mechanism until mid-February 2008. After this date, liquidity in the ARS market deteriorated significantly, auctions failed due to a lack of bids from third-party investors, and Citigroup ceased to purchase unsold inventory. Following a number of ARS refinancings, at June 30, 2008, Citigroup continued to act in the capacity of primary dealer for approximately \$48 billion of outstanding ARS.

The Company classifies its ARS as trading securities and accounts for them on a fair value basis with all changes in fair value recorded in earnings.

Prior to our first auction failing in the first quarter of 2008, Citigroup valued ARS based on observation of auction market prices, because the auctions had a short maturity period (7, 28, and 35 days). This generally resulted in valuations at par. Once the auctions failed, ARS could no longer be valued using observation of auction market prices. Accordingly, the fair value of ARS is currently estimated using internally developed discounted cash flow valuation techniques specific to the nature of the assets underlying each ARS.

For ARS with U.S. municipal securities as underlying assets, future cash flows are estimated based on the terms of the securities underlying each individual ARS and discounted at an estimated discount rate in order to estimate the current fair value. The key assumptions that impact the ARS valuations are estimated prepayments and re-financings, estimated fail rate coupons (i.e., the rate paid in the event of auction failure, which varies according to the current credit rating of the issuer), and the discount rate used to calculate the present value of projected cash flows. The discount rate used for each ARS is based on rates observed for straight issuances of other municipal securities. In order to arrive at the appropriate discount rate, these observed rates were adjusted upwards to factor in the specifics of the ARS structure being valued, such as callability, and the illiquidity in the ARS market.

For ARS with student loans as underlying assets, future cash flows are estimated based on the terms of the loans underlying each individual ARS, discounted at an appropriate discount rate in order to estimate the current fair value. The key assumptions that impact the ARS valuations are the expected weighted average life of the structure, estimated fail rate coupons, the amount of leverage in each structure, and the discount rate used to calculate the present value of projected cash flows. The discount rate used for each ARS is based on rates observed for vanilla securitizations of student loans with similar maturities to the loans underlying each ARS being valued. In order to arrive at the appropriate discount rate, these observed rates were adjusted upwards to factor in the specifics of the ARS structure being valued, such as callability, and the illiquidity in the ARS market.

During the first quarter of 2008, ARS for which the auctions failed and where no secondary market has developed were moved to Level 3, as the assets were subject to valuation using significant unobservable inputs. These ARS continued to be classified in Level 3 throughout the second quarter of 2008.

Alt-A Mortgage Securities

The Company reports Alt-A mortgage securities in Trading account assets and available-for-sale Investments. In both cases the securities are recorded at fair value with changes in fair value reported in current earnings and OCI, respectively. For these purposes, Alt-A mortgage securities are non-agency residential mortgage-backed securities (RMBS) where: (1) the underlying collateral has weighted average FICO scores between 680 and 720 or, (2) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans.

Similar to the valuation methodologies used for other trading securities and trading loans, the Company generally determines the fair value of Alt-A mortgage securities utilizing internal valuation techniques. Fair value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources. Where available, the Company may also make use of quoted prices for recent trading activity in securities with the same or similar characteristics to that being valued.

The internal valuation techniques used for Alt-A mortgage securities, as with other mortgage exposures, consider, estimated housing price changes, unemployment rates interest rates and borrower attributes. They also consider prepayment rates as well as other market indicators.

Alt-A mortgage securities that are valued using these methods are generally classified as Level 2. However, Alt-A mortgage securities backed by Alt-A mortgages of lower quality or more recent vintages are mostly classified in Level 3 due to the reduced liquidity that exists for such positions, which reduces the reliability of prices available from independent sources.

Commercial Real Estate Exposure

Edgar Filing: CITIGROUP INC - Form 10-Q

Citigroup reports a number of different exposures linked to commercial real estate at fair value with changes in fair value reported in earnings, including securities, loans and investments in entities that hold commercial real estate loans or commercial real estate directly. The Company also reports securities backed by commercial real estate as available-for-sale investments, which are carried at fair value with changes in fair value reported in OCI.

Similar to the valuation methodologies used for other trading securities and trading loans, the Company generally determines the fair value of securities and loans linked to commercial real estate utilizing internal valuation techniques. Fair value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources. Where available, the Company may also make use of quoted prices for recent trading activity in securities or loans with the same or similar characteristics to that being valued. Securities

Edgar Filing: CITIGROUP INC - Form 10-Q

and loans linked to commercial real estate valued using these methodologies are generally classified as Level 3 as a result of the reduced liquidity currently in the market for such exposures.

The fair value of investments in entities that hold commercial real estate loans or commercial real estate directly is determined using a similar methodology to that used for other non-public investments in real estate held by Securities and Banking business. The Company uses an established process for determining the fair value of such securities, using commonly accepted valuation techniques, including the use of earnings multiples based on comparable public securities, industry specific non-earnings-based multiples and discounted cash flow models. In determining the fair value of such investments, the Company also considers events such as a proposed sale of the investee company, initial public offerings, equity issuances, or other observable transactions. Such investments are generally classified in Level 3 of the fair value hierarchy.

Fair-Value Elections

The following table presents, as of June 30, 2008, those positions selected for fair-value accounting in accordance with SFAS 159, SFAS 156, and SFAS 155, as well as the changes in fair value for the six months ended June 30, 2008 and June 30, 2007.

<i>In millions of dollars</i>	June 30, 2008	Changes in fair value gains (losses)			
		Year-to-Date 2008		Year-to-Date 2007	
		Principal transactions	Other	Principal transactions	Other
Assets					
Federal funds sold and securities borrowed or purchased under agreements to resell					
Selected portfolios of securities purchased under agreements to resell, securities borrowed(1)	\$ 69,730	\$ 120	\$	\$ (38)	\$
Trading account assets:					
Legg Mason convertible preferred equity securities originally classified as available-for-sale	\$	\$ (13)	\$	\$ 28	\$
Selected letters of credit hedged by credit default swaps or participation notes	8	(2)		(1)	
Certain credit products	23,545	(1,172)		180	
Certain hybrid financial instruments	61	3			
Retained interests from asset securitizations	5,861	307		201	
Total trading account assets	\$ 29,475	\$ (877)	\$	\$ 408	\$
Investments:					
Certain investments in private equity and real estate ventures	\$ 695	\$	\$ (12)	\$	\$ 22
Certain equity method investments	1,318		(110)		94
Other	346		(20)		6

Edgar Filing: CITIGROUP INC - Form 10-Q

The fair value of liabilities for which the fair-value option was elected (other than non-recourse and similar liabilities such as the liabilities of the SIVs consolidated by the Company), was impacted by the widening of the Company's credit spread. The estimated change in the fair value of these liabilities due to such changes in the Company's own credit risk (or instrument-specific credit risk) was a loss of \$228 million and a gain of \$51 million for the three months ended June 30, 2008 and June 30, 2007, respectively, and a gain of \$1,051 million and \$182 million for the six months ended June 30, 2008 and June 30, 2007, respectively. Changes in fair value resulting from changes in instrument-specific credit risk were estimated by incorporating the Company's current observable credit spreads into the relevant valuation technique used to value each liability as described above.

Impact on Retained earnings of certain fair-value elections in accordance with SFAS 159

Detailed below are the December 31, 2006 carrying values prior to adoption of SFAS 159, the transition adjustments booked to opening Retained earnings and the fair values (that is, the carrying values at January 1, 2007 after adoption) for those items that were selected for fair-value option accounting and that had an impact on Retained earnings:

<i>In millions of dollars</i>	December 31, 2006 (carrying value prior to adoption)	Cumulative-effect adjustment to January 1, 2007 retained earnings gain (loss)	January 1, 2007 fair value (carrying value after adoption)
Legg Mason convertible preferred equity securities originally classified as available-for-sale(1)	\$ 797	\$ (232)	\$ 797
Selected portfolios of securities purchased under agreements to resell(2)	167,525	25	167,550
Selected portfolios of securities sold under agreements to repurchase(2)	237,788	40	237,748
Selected non-collateralized short-term borrowings	3,284	(7)	3,291
Selected letters of credit hedged by credit default swaps or participation notes		14	14
Various miscellaneous eligible items(1)	96	3	96
Pretax cumulative effect of adopting fair value option accounting		\$ (157)	
After-tax cumulative effect of adopting fair value option accounting		(99)	

(1) The Legg Mason securities as well as several miscellaneous items were previously reported at fair value within available-for-sale securities. The cumulative-effect adjustment represents the reclassification of the related unrealized gain/loss from Accumulated other comprehensive income to Retained earnings upon the adoption of the fair value option.

(2) Excludes netting of the amounts due from securities purchased under agreements to resell and the amounts owed under securities sold under agreements to repurchase in accordance with FIN 41.

Additional information regarding each of these items follows.

Legg Mason convertible preferred equity securities

The Legg Mason convertible preferred equity securities (Legg shares) were acquired in connection with the sale of Citigroup's Asset Management business in December 2005. The Company held these shares as a non-strategic investment for long-term appreciation and, therefore, selected fair-value option accounting in anticipation of the future implementation of the Investment Company Audit Guide Statement of Position 07-1, "Clarification of the Scope of Audit and Accounting Guide *Audits of Investment Companies* and Accounting by Parent Companies and Equity Method Investors for Investment Companies" (SOP), which was to be effective beginning January 1, 2008. In February 2008, the FASB delayed the implementation of the SOP indefinitely.

Under the current investment company accounting model, investments held in investment company vehicles are recorded at full fair value (where changes in fair value are recorded in earnings) and are not subject to consolidation guidelines. Under the SOP, non-strategic investments not held in investment companies, which are deemed similar to non-strategic investments held in Citigroup's investment companies, must be accounted for at full fair value in order for Citigroup to retain investment company accounting in the Company's Consolidated Financial Statements. Therefore, we have utilized the fair-value option to migrate the Legg shares from available-for-sale (where changes in fair value are recorded in accumulated other comprehensive income (loss)) to a full fair value model (where changes in value are recorded in earnings).

Edgar Filing: CITIGROUP INC - Form 10-Q

Prior to the election of fair value option accounting, the shares were classified as available-for-sale securities with the unrealized loss of \$232 million as of December 31, 2006 included in Accumulated other comprehensive income (loss). In connection with the Company's adoption of SFAS 159, this unrealized loss was recorded as a reduction of January 1, 2007 Retained earnings as part of the cumulative-effect adjustment.

During the first quarter of 2008, the Company sold the remaining 8.4 million Legg shares at a pretax loss of \$10.3 million (\$6.7 million after-tax).

Selected portfolios of securities purchased under agreements to resell, securities borrowed, securities sold under agreements to repurchase, securities loaned, and certain non-collateralized short-term borrowings

The Company elected the fair-value option retrospectively for our United States and United Kingdom portfolios of fixed-income securities purchased under agreements to resell and

Edgar Filing: CITIGROUP INC - Form 10-Q

fixed-income securities sold under agreements to repurchase (and certain non-collateralized short-term borrowings). The fair-value option was also elected prospectively in the second quarter of 2007 for certain portfolios of fixed-income securities lending and borrowing transactions based in Japan. In each case, the election was made because these positions are managed on a fair value basis. Specifically, related interest-rate risk is managed on a portfolio basis, primarily with derivative instruments that are accounted for at fair value through earnings. Previously, these positions were accounted for on an accrual basis.

The cumulative effect of \$58 million pretax (\$37 million after-tax) from adopting the fair-value option for the U.S. and U.K. portfolios was recorded as an increase in the January 1, 2007 Retained earnings balance. The June 30, 2008 and December 31, 2007 net balances of \$69.7 billion and \$84.3 billion, respectively, for Securities purchased under agreements to resell and Securities borrowed, and \$154.2 billion and \$199.9 billion for Securities sold under agreements to repurchase and Securities loaned are included as such in the Consolidated Balance Sheet. The uncollateralized short-term borrowings of \$4.1 billion and \$5.1 billion as of June 30, 2008 and December 31, 2007, respectively, are recorded in that account in the Consolidated Balance Sheet.

Changes in fair value for transactions in these portfolios are recorded in Principal transactions. The related interest revenue and interest expense are measured based on the contractual rates specified in the transactions and are reported as interest revenue and expense in the Consolidated Statement of Income.

Selected letters of credit and revolving loans hedged by credit default swaps or participation notes

The Company has elected fair-value accounting for certain letters of credit that are hedged with derivative instruments or participation notes. Upon electing the fair-value option, the related portions of the allowance for loan losses and the allowance for unfunded lending commitments were reversed. Citigroup elected the fair-value option for these transactions because the risk is managed on a fair-value basis and to mitigate accounting mismatches.

The cumulative effect of \$14 million pretax (\$9 million after-tax) of adopting fair-value option accounting was recorded as an increase in the January 1, 2007 Retained earnings balance. The change in fair value, as well as the receipt of related fees, were reported as Principal transactions in the Company's Consolidated Statement of Income.

The notional amount of these unfunded letters of credit was \$1.4 billion as of June 30, 2008 and December 31, 2007. The amount funded was insignificant with no amounts 90 days or more past due or on a non-accrual status at June 30, 2008 and December 31, 2007.

These items have been classified appropriately in Trading account assets or Trading account liabilities on the Consolidated Balance Sheet.

Various miscellaneous eligible items

Several miscellaneous eligible items previously classified as available-for-sale securities were selected for fair-value option accounting. These items were selected in preparation for the adoption of the Investment Company Audit Guide SOP, as previously discussed. In February 2008, the FASB delayed the implementation of this SOP indefinitely.

Other items for which the fair value option was selected in accordance with SFAS 159

The Company has elected the fair-value option for the following eligible items, which did not affect opening Retained earnings:

- certain credit products
- certain investments in private equity and real estate ventures
- certain structured liabilities
- certain non-structured liabilities
- certain equity-method investments
- certain mortgage loans

Certain credit products

Edgar Filing: CITIGROUP INC - Form 10-Q

Citigroup has elected the fair-value option for certain originated and purchased loans, including certain unfunded loan products, such as guarantees and letters of credit, executed by Citigroup's trading businesses. None of these credit products are highly leveraged financing commitments. Significant groups of transactions include loans and unfunded loan products that will either be sold or securitized in the near term, or transactions where the economic risks are hedged with derivative instruments. Citigroup has elected the fair-value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplifications. Fair value was not elected for most lending transactions across the Company, including where those management objectives would not be met.

The balances for these loan products, which are classified in Trading account assets or Loans, were \$23.5 billion and \$2.4 billion as of June 30, 2008, and \$26.0 billion and \$3.0 billion as of December 31, 2007, respectively. The aggregate unpaid principal balances exceeded the aggregate fair values by \$549 million and \$894 million as of June 30, 2008 and December 31, 2007, respectively. \$191 million and \$186 million of these loans were on a non-accrual basis as of June 30, 2008 and December 31, 2007, respectively. For those loans that are on a non-accrual basis, the aggregate unpaid principal balances exceeded the aggregate fair values by \$11 million as of June 30, 2008 and \$68 million as of December 31, 2007.

In addition, \$188 million and \$141 million of unfunded loan commitments related to certain credit products selected for fair-value accounting were outstanding as of June 30, 2008 and December 31, 2007, respectively.

Changes in fair value of funded and unfunded credit products are classified in Principal transactions in the Company's Consolidated Statement of Income. Related interest revenue is measured based on the contractual interest rates and reported as Interest revenue on trading account assets or loans depending on their balance sheet classifications. The changes in fair value for the six months ended June 30, 2008 due to instrument-specific credit risk totaled to a loss of \$25 million.

Certain investments in private equity and real estate ventures

Citigroup invests in private equity and real estate ventures for the purpose of earning investment returns and for capital appreciation. The Company has elected the fair-value option for certain of these ventures in anticipation of the future implementation of the Investment Company Audit Guide SOP, because such investments are considered similar to many private equity or hedge fund activities in our investment companies, which are reported at fair value. See previous discussion regarding the SOP. The fair-value option brings consistency in the accounting and evaluation of certain of these investments. As required by SFAS 159, all investments (debt and equity) in such private equity and real estate entities are accounted for at fair value.

These investments, which totaled \$695 million and \$539 million as of June 30, 2008 and December 31, 2007, respectively, are classified as Investments on Citigroup's Consolidated Balance Sheet. Changes in the fair values of these investments are classified in Other revenue in the Company's Consolidated Statement of Income.

Certain structured liabilities

The Company has elected the fair-value option for certain structured liabilities whose performance is linked to structured interest rates, inflation or currency risks ("structured liabilities").

The Company has elected the fair-value option for structured liabilities, because these exposures are considered to be trading-related positions and, therefore, are managed on a fair-value basis. These positions will continue to be classified as debt, deposits or derivatives according to their legal form on the Company's Consolidated Balance Sheet. The balances for these structured liabilities, which are classified as Interest-bearing deposits and Long-term debt on the Consolidated Balance Sheet, are \$335 million and \$3.4 billion as of June 30, 2008 and \$264 million and \$3.0 billion as of December 31, 2007.

For those structured liabilities classified as Long-term debt for which the fair-value option has been elected, the aggregate unpaid principal balance exceeds the aggregate fair value of such instruments by \$64 million as of June 30, 2008 and \$7 million as of December 31, 2007.

The change in fair value for these structured liabilities is reported in Principal transactions in the Company's Consolidated Statement of Income.

Related interest expense is measured based on the contractual interest rates and reported as such in the Consolidated Income Statement.

Certain non-structured liabilities

The Company has elected the fair-value option for certain non-structured liabilities with fixed and floating interest rates ("non-structured liabilities"). The Company has elected the fair-value option where the interest-rate risk of such liabilities is economically hedged with derivative contracts or the proceeds are used to purchase financial assets that will also be fair valued. The election has been made to mitigate accounting mismatches and to achieve operational simplifications. These positions are reported in Short-term borrowings and Long-term debt on the Company's Consolidated Balance Sheet. The balances of these short-term and long-term non-structured liabilities as of June 30, 2008 were \$139 million and, \$33.7 billion and, as of December 31, 2007 were \$4.8 billion and \$49.1 billion, respectively.

The majority of these non-structured liabilities are a result of the Company's election of the fair value option for liabilities associated with the consolidation of CAI's Structured Investment Vehicles (SIVs) during the fourth quarter of 2007. The change in fair values of the SIV's liabilities reported in earnings was \$62 million for the quarter ended June 30, 2008.

For these non-structured liabilities classified as Long-term debt for which the fair-value option has been elected, the aggregate unpaid principal balance exceeds the aggregate fair value of such instruments by \$623 million as of June 30, 2008 while the aggregate fair value exceeded the aggregate unpaid principal by \$434 million as of December 31, 2007.

The change in fair value for these non-structured liabilities is reported in Principal transactions in the Company's Consolidated Statement of Income.

Related interest expense continues to be measured based on the contractual interest rates and reported as such in the Consolidated Income Statement.

Certain equity-method investments

Edgar Filing: CITIGROUP INC - Form 10-Q

Citigroup adopted fair-value accounting for various non-strategic investments in leveraged buyout funds and other hedge funds that previously were required to be accounted for under the equity method. Management elected fair-value accounting to reduce operational and accounting complexity. Since the funds account for all of their underlying assets at full fair value, the impact of applying the equity method to Citigroup's investment in these funds was equivalent to fair value accounting. Thus, this fair-value election had no impact on opening Retained earnings.

These fund investments, which totaled \$1.3 billion as of June 30, 2008 and \$1.1 billion as of December 31, 2007, are classified as Investments on the Consolidated Balance Sheet. Changes in the fair values of these investments are classified in other revenue in the Consolidated Statement of Income.

Certain mortgage loans

Citigroup has elected the fair-value option for certain purchased and originated prime fixed-rate and conforming adjustable-rate first mortgage loans held-for-sale. These loans are intended for sale or securitization and are hedged with derivative instruments. The Company has elected the fair-value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplifications. The fair-value option was not elected for loans held-for-investment, as those loans are not hedged with derivative instruments. This election was effective for applicable instruments originated or purchased since September 1, 2007.

The balance of these mortgage loans held-for-sale, which were classified as Other assets as of June 30, 2008, was \$6.4 billion. As of December 31, 2007, the balance was \$6.4 billion. The aggregate fair value exceeded the unpaid principal balances by \$17 million as of June 30, 2008 and \$136 million as of December 31, 2007. The balance of these loans 90 days or more past due and on a non-accrual basis was \$17 million at June 30, 2008 and \$17 million at December 31, 2007, with aggregate unpaid principal balances exceeding aggregate fair values by \$16 million at June 30,

2008. The difference between aggregate fair values and aggregate unpaid principal balance was immaterial at December 31, 2007.

The changes in fair values of these mortgage loans held-for-sale is reported in other revenue in the Company's Consolidated Statement of Income. The changes in fair value during the six months ended June 30, 2008 due to instrument-specific credit risk resulted in a \$24 million loss. Related interest income continues to be measured based on the contractual interest rates and reported as such in the Consolidated Income Statement.

Items selected for fair-value accounting in accordance with SFAS 155 and SFAS 156

Certain hybrid financial instruments

The Company has elected to apply fair-value accounting under SFAS 155 for certain hybrid financial assets and liabilities whose performance is linked to risks other than interest rate, foreign exchange or inflation (e.g., equity, credit or commodity risks). In addition, the Company has elected fair-value accounting under SFAS 155 for residual interests retained from securitizing certain financial assets.

The Company has elected fair-value accounting for these instruments because these exposures are considered to be trading-related positions and, therefore, are managed on a fair-value basis. In addition, the accounting for these instruments is simplified under a fair-value approach as it eliminates the complicated operational requirements of bifurcating the embedded derivatives from the host contracts and accounting for each separately. The hybrid financial instruments are classified as Loans, Deposits, Trading liabilities (for pre-paid derivatives) or debt on the Company's Consolidated Balance Sheet according to their legal form, while residual interests in certain securitizations are classified as Trading account assets.

The outstanding balances for these hybrid financial instruments classified in Loans is \$548 million, while \$3.4 billion was in Interest-bearing deposits, \$10.9 billion in Trading account liabilities, \$3.7 billion in Short-term borrowings and \$23.7 billion in Long-term debt on the Consolidated Balance Sheet as of June 30, 2008. As of December 31, 2007, the outstanding balances for such instruments classified in Loans was \$689 million, while \$3.3 billion was in Interest-bearing deposits, \$12.1 billion in Trading account liabilities, \$3.6 billion in Short-term borrowings and \$27.3 billion in Long-term debt on the Consolidated Balance Sheet. In addition, \$5.9 billion and \$2.6 billion of the amount reported in Trading account assets as of June 30, 2008 and December 31, 2007, respectively, were primarily for the retained interests in securitizations.

For hybrid financial instruments for which fair-value accounting has been elected under SFAS 155 and that are classified as Long-term debt the aggregate unpaid principal exceeds the aggregate fair value by \$489 million as of June 30, 2008, while the aggregate fair value exceeds the aggregate unpaid principal balance by \$460 million as of December 31, 2007. The difference for those instruments classified as Loans is immaterial.

Changes in fair value for hybrid financial instruments, which in most cases includes a component for accrued interest, are recorded in Principal transactions in the Company's Consolidated Statement of Income. Interest accruals for certain hybrid instruments classified as trading assets are recorded separately from the change in fair value as Interest revenue in the Company's Consolidated Statement of Income.

Mortgage servicing rights

The Company accounts for mortgage servicing rights (MSRs) at fair value in accordance with SFAS 156. Fair value for MSRs is determined using an option-adjusted spread valuation approach. This approach consists of projecting servicing cash flows under multiple interest-rate scenarios and discounting these cash flows using risk-adjusted discount rates. The model assumptions used in the valuation of MSRs include mortgage prepayment speeds and discount rates. The fair value of MSRs is primarily affected by changes in prepayments that result from shifts in mortgage interest rates. In managing this risk, the Company hedges a significant portion of the values of its MSRs through the use of interest-rate derivative contracts, forward-purchase commitments of mortgage-backed securities, and purchased securities classified as trading. See Note 15 on page 95 for further discussions regarding the accounting and reporting of MSRs.

These MSRs, which totaled \$8.9 billion and \$8.4 billion as of June 30, 2008 and December 31, 2007, respectively, are classified as Intangible assets on Citigroup's Consolidated Balance Sheet. Changes in fair value for MSRs are recorded in Commissions and fees in the Company's Consolidated Statement of Income.

Items Measured at Fair Value on a Recurring Basis

The following tables present for each of the fair-value hierarchy levels the Company's assets and liabilities that are measured at fair value on a recurring basis at June 30, 2008 and December 31, 2007. The Company often hedges positions that have been classified in the Level 3 category with financial instruments that have been classified as Level 1 or Level 2. In addition, the Company also hedges items classified in the Level 3 category with instruments classified in Level 3 of the fair value hierarchy. The effects of these hedges are presented gross in the following table.

<i>In millions of dollars at June 30, 2008</i>	Level 1	Level 2	Level 3	Gross inventory	Netting(1)	Net balance
Assets

(1) Represents netting of: (i) the amounts due under securities purchased under agreements to resell and the amounts owed under securities sold under agreements to repurchase in accordance with FIN 41, and (ii) derivative exposures covered by a qualifying master netting agreement in accordance with FIN 39, cash collateral, and the market value adjustment.

(2) There is no allowance for loan losses recorded for loans reported at fair value.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following tables present the changes in the Level 3 fair-value category for the three months and six months ended June 30, 2008 and 2007. The Company classifies financial instruments in Level 3 of the fair-value hierarchy when there is reliance on at least one significant unobservable input to the valuation model. In addition to these unobservable inputs, the valuation models for Level 3 financial instruments typically also rely on a number of inputs that are readily observable either directly or indirectly. Thus, the gains and losses presented below include changes in the fair value related to both observable and unobservable inputs.

The Company often hedges positions with offsetting positions that are classified in a different level. For example, the gains and losses for assets and liabilities in the Level 3 category presented in the tables below do not reflect the effect of offsetting losses and gains on hedging instruments that have been classified by the Company in the Level 1 and Level 2 categories. In addition, the Company hedges items classified in the Level 3 category with instruments also classified in Level 3 of the fair-value hierarchy. The effects of these hedges are presented gross in the following tables.

<i>In millions of dollars</i>	March 31, 2008	Net realized/ unrealized gains (losses) included in		Transfers in and/or out of Level 3	Purchases, issuances and settlements	June 30, 2008	Unrealized gains (losses) still held(3)

- (1) Changes in fair value for available-for-sale investments (debt securities) are recorded in Accumulated other comprehensive income, while gains and losses from sales are recorded in Realized gains (losses) from sales of investments on the Consolidated Statement of Income.
- (2) Unrealized gains (losses) on MSRs are recorded in Commissions and fees on the Consolidated Statement of Income.
- (3) Represents the amount of total gains or losses for the period, included in earnings (and Accumulated other comprehensive income for changes in fair value for available-for-sale investments) attributable to the change in fair value relating to assets and liabilities classified as Level 3 that are still held at June 30, 2008 and 2007.
- (4) Total Level 3 derivative exposures have been netted on these tables for presentation purposes only.

Edgar Filing: CITIGROUP INC - Form 10-Q

The following is a discussion of the changes to the Level 3 balances for each of the rollforward tables presented above.

For the period March 31, 2008 to June 30, 2008, the changes in Level 3 assets and liabilities are due to:

The decrease in trading account securities of \$14 billion, which was driven primarily by the write-downs on ABS-CDO super senior exposures plus approximately \$9 billion of net sales of trading securities, including CDO liquidations.

The increase in investments of \$7 billion, which was largely due to \$8.7 billion of senior debt securities retained from the Company's April 17, 2008 sale of a corporate loan portfolio that included highly leverage loans, offset by net sales/settlements of other investments.

The increase in MSR of \$1.2 billion, which resulted from the mark-to-market gain recognized of \$1.4 billion. This gain was offset by the decrease of \$2.1 billion in the value of the related non-Level 3 hedges.

The reductions in securities sold under agreement to repurchase of \$3 billion, and short-term borrowings of \$5 billion, which were driven primarily by the transfers of certain positions from Level 3 to Level 2, as valuation methodology inputs considered to be unobservable were demonstrated to be insignificant to the overall valuation.

The decrease in long-term debt of \$9 billion, as payments were made against the consolidated SIV's long-term debt.

The significant changes from December 31, 2007 to June 30, 2008 in Level 3 assets and liabilities are due to:

A minimal net increase in trading securities as net write-downs recognized for ABS-CDO super senior exposures and Alt- A mortgage securities, plus a net reduction from settlements/sales of trading securities, were offset by a net transfer-in to Level 3 from Level 2 as prices and other valuation inputs became unobservable for a number of positions including auction rate securities and Alt-A mortgage securities.

The increase in investments of \$10 billion, which was due primarily to \$8.7 billion of senior debt securities retained from the Company's April 17, 2008 sale of a corporate loan portfolio that included highly leverage loans.

The reduction in securities sold under agreement to repurchase of \$3 billion, which was driven by the transfer of positions from Level 3 to Level 2 as valuation methodology inputs considered to be unobservable were demonstrated to be insignificant to the overall valuation.

The decrease in short-term borrowings of \$4 billion, which was primarily due to net transfers out of \$2 billion as valuation methodology inputs considered to be unobservable were demonstrated to be insignificant to the overall valuation, and payments of \$1 billion against the consolidated SIV's short-term debt.

The increase in long-term debt of \$29 billion, which was driven by the transfer of consolidated SIV liabilities to Level 3 due to the lack of observable inputs, offset by the payments made against this debt in the second quarter 2008.

The significant changes from March 31, 2007 to June 30, 2007 in Level 3 assets and liabilities are due to:

The increase in trading securities of \$11 billion, which was driven by net additions/purchases of \$8 billion plus the net transfer-in of \$3 billion for positions previously classified as Level 2, as prices and other valuations inputs

Edgar Filing: CITIGROUP INC - Form 10-Q

became unobservable.

The increase in investments of \$8 billion, largely resulting from the acquisition of Nikko Cordial.

The significant changes from January 1, 2007 to June 30, 2007 in Level 3 assets and liabilities are due to:

The increase in trading securities of \$20 billion, which was driven primarily by the net transfer-in of \$5 billion of items previously classified as Level 2 as prices and other valuations inputs became unobservable, plus the net additions/purchases of \$15 billion including the Level 3 assets acquired with Nikko Cordial.

The increase in investments of \$9 billion, primarily resulting from the acquisition of Nikko Cordial.

The increase in Mortgage servicing rights of \$5 billion which was primarily due to the first quarter 2007 acquisition of ABN AMRO Mortgage Group.

Items Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a non-recurring basis and therefore are not included in the tables above. These include assets such as loans held-for-sale that are measured at the lower of cost or market (LOCOM) that were recognized at fair value below cost at the end of the period. Assets measured at cost that have been written down to fair value during the period as a result of an impairment are also included.

The fair value of loans measured on a LOCOM basis is determined where possible using quoted secondary-market prices. Such loans are generally classified in Level 2 of the fair-value hierarchy given the level of activity in the market and the frequency of available quotes. If no such quoted price exists, the fair value of a loan is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of that loan.

The following table presents all loans held-for-sale that are carried at LOCOM as of June 30, 2008 and December 31, 2007 (in billions):

	<u>Aggregate Cost</u>	<u>Fair value</u>	<u>Level 2</u>	<u>Level 3</u>
June 30, 2008	\$ 26.9	\$ 23.6	\$ 2.8	\$ 20.8
December 31, 2007	33.6	31.9	5.1	26.8

For the three months ended and six months ended June 30, 2008, the resulting charges taken on loans held-for-sale carried at fair value below cost were \$1.4 billion and \$3.7 billion, respectively, \$1.8 billion was the resulting charge taken on loans held-for-sale carried at fair value below cost for the year ended December 31, 2007.

Highly Leveraged Financing Commitments

The Company reports a number of highly leveraged loans as held-for-sale, which are measured on a LOCOM basis. The fair value of such exposures is determined, where possible, using quoted secondary-market prices and classified in Level 2 of the fair-value hierarchy if there is a sufficient level of activity in the market and quotes or traded prices are available with suitable frequency.

However, due to the dislocation of the credit markets and the reduced market interest in higher risk/higher yield instruments since the latter half of 2007, liquidity in the market for highly leveraged financings has been limited. Therefore, a majority of such exposures are classified in Level 3 as quoted secondary market prices do not generally exist. The fair value for such exposures is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of the loan being valued.

18. GUARANTEES

The Company provides a variety of guarantees and indemnifications to Citigroup customers to enhance their credit standing and enable them to complete a wide variety of business transactions. FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others" (FIN 45), provides initial measurement and disclosure guidance in accounting for guarantees. FIN 45 requires that, for certain contracts meeting the definition of a guarantee, the guarantor must recognize, at inception, a liability for the fair value of the obligation undertaken in issuing the guarantee.

In addition, the guarantor must disclose the maximum potential amount of future payments the guarantor could be required to make under the guarantee, if there were a total default by the guaranteed parties. The determination of the maximum potential future payments is based on the notional amount of the guarantees without consideration of possible recoveries under recourse provisions or from collateral held or pledged. Such amounts bear no relationship to the anticipated losses, if any, on these guarantees.

The following tables present information about the Company's guarantees at June 30, 2008 and December 31, 2007:

<i>In billions of dollars at June 30, except carrying value in millions</i>	Maximum potential amount of future payments			Carrying value (in millions)
	Expire within 1 year	Expire after 1 year	Total amount outstanding	
2008				
Financial standby letters of credit	\$ 47.5	\$ 36.9	\$ 84.4	\$ 159.7
Performance guarantees	10.0	7.6	17.6	29.7
Derivative instruments	12.6	95.2	107.8	16,831.0
Loans sold with recourse		0.4	0.4	43.2
Securities lending indemnifications(1)	154.1		154.1	
Credit card merchant processing(1)	62.1		62.1	
Custody indemnifications and other		43.2	43.2	140.0
Total	\$ 286.3	\$ 183.3	\$ 469.6	\$ 17,203.6

<i>In billions of dollars at December 31, except carrying value in millions</i>	Maximum potential amount of future payments			Carrying value (in millions)
	Expire within 1 year	Expire after 1 year	Total amount outstanding	
2007(2)				
Financial standby letters of credit	\$ 43.5	\$ 43.6	\$ 87.1	\$ 160.6
Performance guarantees	11.3	6.8	18.1	24.4
Derivative instruments	9.6	91.4	101.0	3,911.0
Loans sold with recourse		0.5	0.5	45.5
Securities lending indemnifications(1)	153.4		153.4	
Credit card merchant processing(1)	64.0		64.0	
Custody indemnifications and other		53.4	53.4	306.0
Total	\$ 281.8	\$ 195.7	\$ 477.5	\$ 4,447.5

(1) The carrying values of securities lending indemnifications and credit card merchant processing are not material, as the Company has determined that the amount and probability of potential liabilities arising from these guarantees are not significant and the carrying amount of the Company's obligations under these guarantees is immaterial.

(2)

Reclassified to conform to the current period's presentation.

Financial Standby Letters of Credit

Citigroup issues standby letters of credit which substitute its own credit for that of the borrower. If a letter of credit is drawn down, the borrower is obligated to repay Citigroup. Standby letters of credit protect a third party from defaults on contractual obligations. Financial standby letters of credit include guarantees of payment of insurance premiums and reinsurance risks that support industrial revenue bond underwriting and settlement of payment obligations to clearing houses, and also support options and purchases of securities or are in lieu of escrow deposit accounts. Financial standbys also backstop loans, credit facilities, promissory notes and trade acceptances.

Performance Guarantees

Performance guarantees and letters of credit are issued to guarantee a customer's tender bid on a construction or systems installation project or to guarantee completion of such projects in accordance with contract terms. They are also issued to support a customer's obligation to supply specified products, commodities, or maintenance or warranty services to a third party.

Derivative Instruments

Derivatives are financial instruments whose cash flows are based on a notional amount or an underlying instrument, where there is little or no initial investment, and whose terms require or permit net settlement.

The main use of derivatives is to reduce risk for one party while offering the potential for high return (at increased risk) to another. Financial institutions often act as intermediaries for their clients, helping clients reduce their risks. However, derivatives may also be used to take a risk position. Certain derivative contracts entered into by the

Edgar Filing: CITIGROUP INC - Form 10-Q

Company meet the definition of a guarantee, including credit default swaps, total return swaps and certain written options. However, credit derivatives (that is, credit default swaps and total return swaps) with banks, hedge funds, and broker-dealers are excluded from this definition as these counterparties are considered to be dealers in these instruments with the primary purpose of taking a risk position. In addition, non-credit derivative contracts that are cash settled and for which the Company is unable to assert that it is probable the counterparty held the underlying instrument at the inception of the contract are also not considered guarantees under FIN 45. Accordingly, these contracts are excluded from the disclosure above. In instances where the Company's maximum potential future payment is unlimited, such as in certain written foreign currency options, the notional amount of the contract is disclosed.

Loans Sold with Recourse

Loans sold with recourse represent the Company's obligations to reimburse the buyers for loan losses under certain circumstances. Recourse refers to the clause in a sales agreement under which a lender will fully reimburse the buyer/investor for any losses resulting from the purchased loans. This may be accomplished by the seller's taking back any loans that become delinquent.

Securities Lending Indemnifications

Owners of securities frequently lend those securities for a fee to other parties who may sell them short or deliver them to another party to satisfy some other obligation. Banks may administer such securities lending programs for their clients. Securities lending indemnifications are issued by the bank to guarantee that a securities lending customer will be made whole in the event that the security borrower does not return the security subject to the lending agreement and collateral held is insufficient to cover the market value of the security.

Credit Card Merchant Processing

Credit card merchant processing guarantees represent the Company's indirect obligations in connection with the processing of private label and bankcard transactions on behalf of merchants.

Citigroup's primary credit card business is the issuance of credit cards to individuals. In addition, the Company provides transaction processing services to various merchants with respect to bankcard and private label cards. In the event of a billing dispute with respect to a bankcard transaction between a merchant and a cardholder that is ultimately resolved in the cardholder's favor, the third party holds the primary contingent liability to credit or refund the amount to the cardholder and charge back the transaction to the merchant. If the third party is unable to collect this amount from the merchant, it bears the loss for the amount of the credit or refund paid to the cardholder.

The Company continues to have the primary contingent liability with respect to its portfolio of private label merchants. The risk of loss is mitigated as the cash flows between the third party or the Company and the merchant are settled on a net basis and the third party or the Company has the right to offset any payments with cash flows otherwise due to the merchant. To further mitigate this risk, the third party or the Company may require a merchant to make an escrow deposit, delay settlement, or include event triggers to provide the third party or the Company with more financial and operational control in the event of the financial deterioration of the merchant, or require various credit enhancements (including letters of credit and bank guarantees). In the unlikely event that a private label merchant is unable to deliver products, services or a refund to its private label cardholders, Citigroup is contingently liable to credit or refund cardholders. In addition, although a third party holds the primary contingent liability with respect to the processing of bankcard transactions, in the event that the third party does not have sufficient collateral from the merchant or sufficient financial resources of its own to provide the credit or refunds to the cardholders, Citigroup would be liable to credit or refund the cardholders.

The Company's maximum potential contingent liability related to both bankcard and private label merchant processing services is estimated to be the total volume of credit card transactions that meet the requirements to be valid chargeback transactions at any given time. At June 30, 2008 and December 31, 2007, this maximum potential exposure was estimated to be \$62 billion and \$64 billion, respectively.

However, the Company believes that the maximum exposure is not representative of the actual potential loss exposure based on the Company's historical experience and its position as a secondary guarantor (in the case of bankcards). In most cases, this contingent liability is unlikely to arise, as most products and services are delivered when purchased and amounts are refunded when items are returned to merchants. The Company assesses the probability and amount of its contingent liability related to merchant processing based on the financial strength of the primary guarantor (in the case of bankcards) and the extent and nature of unresolved chargebacks and its historical loss experience. At June 30, 2008 and December 31, 2007, the estimated losses incurred and the carrying amounts of the Company's contingent obligations related to merchant processing activities were immaterial.

Custody Indemnifications

Custody indemnifications are issued to guarantee that custody clients will be made whole in the event that a third-party subcustodian fails to safeguard clients' assets. The scope of the custody indemnifications also covers all clients' assets held by third-party subcustodians.

Other

In the fourth quarter of 2007, Citigroup recorded a \$306 million (pretax) charge related to certain of Visa USA's litigation matters. In March 2008, in connection with the IPO, Visa used a portion of its IPO proceeds to fund an escrow account with respect to those litigation matters. This has enabled Citigroup to recognize a \$166 million (pretax) reduction of its \$306 million reserve during the first quarter of 2008. The carrying value of the reserve is included in Other liabilities.

Other Guarantees and Indemnifications

The Company, through its credit card business, provides various cardholder protection programs on several of its card products, including programs that provide insurance coverage for rental cars, coverage for certain losses associated with purchased products, price protection for certain purchases and

Edgar Filing: CITIGROUP INC - Form 10-Q

protection for lost luggage. These guarantees are not included in the table, since the total outstanding amount of the guarantees and the Company's maximum exposure to loss cannot be quantified. The protection is limited to certain types of purchases and certain types of losses and it is not possible to quantify the purchases that would qualify for these benefits at any given time. The Company assesses the probability and amount of its potential liability related to these programs based on the extent and nature of its historical loss experience. At June 30, 2008, the actual and estimated losses incurred and the carrying value of the Company's obligations related to these programs were immaterial.

In the normal course of business, the Company provides standard representations and warranties to counterparties in contracts in connection with numerous transactions and also provides indemnifications that protect the counterparties to the contracts in the event that additional taxes are owed due either to a change in the tax law or an adverse interpretation of the tax law. Counterparties to these transactions provide the Company with comparable indemnifications. While such representations, warranties and tax indemnifications are essential components of many contractual relationships, they do not represent the underlying business purpose for the transactions. The indemnification clauses are often standard contractual terms related to the Company's own performance under the terms of a contract and are entered into in the normal course of business based on an assessment that the risk of loss is remote. Often these clauses are intended to ensure that terms of a contract are met at inception (for example, that loans transferred to a counterparty in a sales transaction did in fact meet the conditions specified in the contract at the transfer date). No compensation is received for these standard representations and warranties, and it is not possible to determine their fair value because they rarely, if ever, result in a payment. In many cases, there are no stated or notional amounts included in the indemnification clauses and the contingencies potentially triggering the obligation to indemnify have not occurred and are not expected to occur. There are no amounts reflected on the Consolidated Balance Sheet as of June 30, 2008 and December 31, 2007, related to these indemnifications and they are not included in the table.

In addition, the Company is a member of or shareholder in hundreds of value transfer networks (VTNs) (payment clearing and settlement systems as well as securities exchanges) around the world. As a condition of membership, many of these VTNs require that members stand ready to backstop the net effect on the VTNs of a member's default on its obligations. The Company's potential obligations as a shareholder or member of VTN associations are excluded from the scope of FIN 45, since the shareholders and members represent subordinated classes of investors in the VTNs. Accordingly, the Company's participation in VTNs is not reported in the table and there are no amounts reflected on the Consolidated Balance Sheet as of June 30, 2008 or December 31, 2007 for potential obligations that could arise from the Company's involvement with VTN associations.

At June 30, 2008 and December 31, 2007, the carrying amounts of the liabilities related to the guarantees and indemnifications included in the table amounted to approximately \$17 billion and \$4 billion, respectively. The carrying value of derivative instruments is included in either Trading liabilities or Other liabilities, depending upon whether the derivative was entered into for trading or non-trading purposes. The carrying value of financial and performance guarantees is included in Other liabilities. For loans sold with recourse, the carrying value of the liability is included in Other liabilities. In addition, at June 30, 2008 and December 31, 2007, Other liabilities on the Consolidated Balance Sheet include an allowance for credit losses of \$1.107 billion and \$1.250 billion relating to letters of credit and unfunded lending commitments, respectively.

In addition to the collateral available in respect of the credit card merchant processing contingent liability discussed above, the Company has collateral available to reimburse potential losses on its other guarantees. Cash collateral available to the Company to reimburse losses realized under these guarantees and indemnifications amounted to \$107 billion and \$112 billion at June 30, 2008 and December 31, 2007, respectively. Securities and other marketable assets held as collateral amounted to \$61 billion and \$54 billion and letters of credit in favor of the Company held as collateral amounted to \$569 million and \$370 million at June 30, 2008 and December 31, 2007, respectively. Other property may also be available to the Company to cover losses under certain guarantees and indemnifications; however, the value of such property has not been determined.

Credit Commitments

The table below summarizes Citigroup's other commitments as of June 30, 2008 and December 31, 2007.

<i>In millions of dollars</i>	U.S.	Outside of U.S.	June 30, 2008	December 31, 2007
Commercial and similar letters of credit	\$ 2,067	\$ 8,342	\$ 10,409	\$ 9,175
One- to four-family residential mortgages	1,678	623	2,301	4,587
Revolving open-end loans secured by one- to four-family residential properties	27,318	3,349	30,667	35,187
Commercial real estate, construction and land development	2,827	796	3,623	4,834

<i>In millions of dollars</i>	U.S.	Outside of U.S.	June 30, 2008	December 31, 2007

The majority of unused commitments are contingent upon customers' maintaining specific credit standards. Commercial commitments generally have floating interest rates and fixed expiration dates and may require payment of fees. Such fees (net of certain direct costs) are deferred and, upon exercise of the commitment, amortized over the life of the loan or, if exercise is deemed remote, amortized over the commitment period.

Commercial and similar letters of credit

A commercial letter of credit is an instrument by which Citigroup substitutes its credit for that of a customer to enable

Edgar Filing: CITIGROUP INC - Form 10-Q

the customers to finance the purchase of goods or to incur other commitments. Citigroup issues a letter on behalf of its client to a supplier and agrees to pay them upon presentation of documentary evidence that the supplier has performed in accordance with the terms of the letter of credit. When drawn, the customer then is required to reimburse Citigroup.

One- to four-family residential mortgages

A one- to four-family residential mortgage commitment is a written confirmation from Citigroup to a seller of a property that the bank will advance the specified sums enabling the buyer to complete the purchase.

Revolving open-end loans secured by one- to four-family residential properties

Revolving open-end loans secured by one- to four-family residential properties are essentially home equity lines of credit. A home equity line of credit is a loan secured by a primary residence or second home to the extent of the excess of fair market value over the debt outstanding for the first mortgage.

Commercial real estate, construction and land development

Commercial real estate, construction and land development include unused portions of commitments to extend credit for the purpose of financing commercial and multifamily residential properties as well as land development projects. Both secured by real estate and unsecured commitments are included in this line. In addition, undistributed loan proceeds where there is an obligation to advance for construction progress payments are also included. However, this line only includes those extensions of credit that once funded will be classified as Loans on the Consolidated Balance Sheet.

Credit card lines

Citigroup provides credit to customers by issuing credit cards. The credit card lines are unconditionally cancellable by the issuer.

Commercial and other consumer loan commitments

Commercial and other consumer loan commitments include commercial commitments to make or purchase loans, to purchase third-party receivables, and to provide note issuance or revolving underwriting facilities. Amounts include \$237 billion and \$259 billion with an original maturity of less than one year at June 30, 2008 and December 31, 2007, respectively.

In addition, included in this line item are highly leveraged financing commitments which are agreements that provide funding to a borrower with higher levels of debt (measured by the ratio of debt capital to equity capital of the borrower) than is generally considered normal for other companies. This type of financing is commonly employed in corporate acquisitions, management buy-outs and similar transactions.

19. CONTINGENCIES

As described in the "Legal Proceedings" discussion on page 141, the Company has been a defendant in numerous lawsuits and other legal proceedings arising out of alleged misconduct in connection with:

- (i) underwritings for, and research coverage of, WorldCom;
- (ii) underwritings for Enron and other transactions and activities related to Enron;
- (iii) transactions and activities related to research coverage of companies other than WorldCom; and
- (iv) transactions and activities related to the IPO Securities Litigation.

As of June 30, 2008, the Company's litigation reserve for these matters, net of amounts previously paid or not yet paid but committed to be paid in connection with settlements arising out of these matters, was approximately \$1.0 billion. The Company believes that this reserve is adequate to meet all of its remaining exposure for these matters.

Edgar Filing: CITIGROUP INC - Form 10-Q

As described in the "Legal Proceedings" discussion on page 141, the Company is also a defendant in numerous lawsuits and other legal proceedings arising out of alleged misconduct in connection with other matters. In view of the large number of litigation matters, the uncertainties of the timing and outcome of this type of litigation, the novel issues presented, and the significant amounts involved, it is possible that the ultimate costs of these matters may exceed or be below the Company's litigation reserves. The Company will continue to defend itself vigorously in these cases, and seek to resolve them in the manner management believes is in the best interests of the Company.

In addition, in the ordinary course of business, Citigroup and its subsidiaries are defendants or co-defendants or parties in various litigation and regulatory matters incidental to and typical of the businesses in which they are engaged. In the opinion of the Company's management, the ultimate resolution of these legal and regulatory proceedings would not be likely to have a material adverse effect on the consolidated financial condition of the Company but, if involving monetary liability, may be material to the Company's operating results for any particular period.

Edgar Filing: CITIGROUP INC - Form 10-Q

(1)

The adjustment to opening balance for Retained earnings represents the total of the after-tax gain (loss) amounts for the adoption of the following accounting pronouncements:

SFAS 157 for \$9 million,

SFAS 159 for \$15 million,

FSP 13-2 for \$(142) million, and

FIN 48 for \$22 million.

See Notes 1 and 17 on pages 78 and 111, respectively.

(2)

The after-tax adjustment to the opening balance of Accumulated other comprehensive income (loss) represents the reclassification of the unrealized gains (losses) related to several miscellaneous items previously reported in accordance with SFAS 115. The related unrealized gains and losses were reclassified to retained earnings upon the adoption of the fair value option in accordance with SFAS 159. See Notes 1 and 17 on pages 78 and 111 for further discussions.

21. CONDENSED CONSOLIDATING FINANCIAL STATEMENT SCHEDULES

These condensed consolidating financial statement schedules are presented for purposes of additional analysis but should be considered in relation to the consolidated financial statements of Citigroup taken as a whole.

Citigroup Parent Company

The holding company, Citigroup Inc.

Citigroup Global Markets Holdings Inc. (CGMHI)

Citigroup guarantees various debt obligations of CGMHI as well as all of the outstanding debt obligations under CGMHI's publicly issued debt.

Citigroup Funding Inc. (CFI)

CFI is a first-tier subsidiary of Citigroup, which issues commercial paper, medium-term notes and structured equity-linked and credit-linked notes, all of which are guaranteed by Citigroup.

CitiFinancial Credit Company (CCC)

An indirect wholly-owned subsidiary of Citigroup. CCC is a wholly-owned subsidiary of Associates. Citigroup has issued a full and unconditional guarantee of the outstanding indebtedness of CCC.

Associates First Capital Corporation (Associates)

A wholly-owned subsidiary of Citigroup. Citigroup has issued a full and unconditional guarantee of the outstanding long-term debt securities of Associates. In addition, Citigroup guaranteed various debt obligations of Citigroup Finance Canada Inc. (CFCI), a wholly-owned subsidiary of Associates. CFCI continues to issue debt in the Canadian market supported by a Citigroup guarantee. Associates is the immediate parent company of CCC.

Other Citigroup Subsidiaries

Includes all other subsidiaries of Citigroup and intercompany eliminations.

Consolidating Adjustments

Includes Citigroup parent company elimination of distributed and undistributed income of subsidiaries, investment in subsidiaries and the elimination of CCC, which is included in the Associates column.
