FORM 10-K

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

FOR THE FISCAL YEAR ENDED JANUARY 31, 2009

Commission File No. 000-1409171

TITAN MACHINERY INC.

(Exact name of registrant as specified in its charter)

Delaware **No. 45-0357838**
(State or Other Jurisdiction of (IRS Employer Identification No.)
Incorporation or Organization)

4876 Rocking Horse Circle
Fargo, ND 58104-6049
(Address of Principal Executive Offices)

(701) 356-0130
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act: **Common Stock, \$0.00001 Par Value**

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Note: Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Exchange Act from their obligations under those Sections.

Edgar Filing: Titan Machinery Inc. - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of our common stock held by non-affiliates as of July 31, 2008 was approximately \$347,910,252 (based on the last sale price of \$27.42 per share on such date as reported on the Nasdaq Global Market).

The number of shares outstanding of the registrant's common stock as of April 1, 2009 was: Common Stock, \$0.00001 par value, 17,688,463 shares.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the proxy statement for the registrant's 2009 Annual Meeting of Stockholders are incorporated by reference into Items 10, 11, 12, 13 and 14 of Part III of this report.

We are not including the information on our web site as a part of, or incorporating it by reference into, our Form 10-K.

Table of Contents

ITEM 1. BUSINESS

Our Company

Overview

We own and operate one of the largest networks of full service agricultural and construction equipment stores in North America. Based upon information provided to us by CNH Global N.V. or its U.S. subsidiary CNH America LLC, collectively referred to in this Form 10-K as CNH, we are the world's largest retail dealer of Case IH Agriculture equipment and a major retail dealer of New Holland Agriculture, Case Construction and New Holland Construction equipment in the U.S. We sell and rent agricultural and construction equipment, sell parts, and service the equipment in the areas surrounding our stores.

The agricultural equipment we sell and service includes machinery and attachments for uses ranging from large-scale farming to home and garden use. The construction equipment we sell and service includes heavy construction and light industrial machinery for commercial and residential construction, road and highway construction and mining. We engage in four principal business activities:

new and used equipment sales;

parts sales;

repair and maintenance services; and

equipment rental and other activities.

The new equipment and parts we sell are supplied primarily by CNH. CNH is a leading manufacturer and supplier of agricultural and construction equipment, primarily through the Case IH Agriculture, New Holland Agriculture, Case Construction and New Holland Construction brands. We acquire used equipment for resale through trade-ins from our customers and selective purchases. We also sell parts and provide in-store and on-site repair and maintenance services. We also rent equipment and provide other ancillary services such as equipment transportation, GPS signal subscriptions and finance and insurance products.

We offer our customers a one-stop solution by providing equipment and parts sales, repair and maintenance services and rental functions in each store. Our full service approach provides us with multiple points of customer contact and substantial cross-selling opportunities. We believe our mix of equipment and recurring parts and service sales enables us to operate effectively throughout economic cycles. We also believe our significant scale, superior customer service, diverse and stable customer base, proven management reporting system and experienced management team provide us with a competitive advantage in many of our local markets.

Throughout our 29-year operating history we have built an extensive, geographically contiguous network of 62 stores, including two outlet stores. Our agricultural equipment stores are located in highly productive farming regions, including the Red River valley in eastern North Dakota and northwestern Minnesota and western portions of the corn belt in Iowa, eastern South Dakota and southern Minnesota. Our construction equipment stores are located in North Dakota, South Dakota, Iowa, Montana, Wyoming, eastern Nebraska and western Minnesota.

Our executives have extensive industry experience. David Meyer, our Chairman and Chief Executive Officer, founded our company in 1980. In 2002, we acquired two stores owned by C.I. Farm Power, Inc., a business owned by our President and Chief Financial Officer, Peter Christianson, which he co-founded in 1988. Based on our collective industry experience, we developed the Titan Operating Model, which combines management accountability and decision-making at the store level with centralized, back-office support. In addition, our executives work closely with our store managers to

Table of Contents

develop the managers' industry knowledge and ensure these managers achieve operational excellence in line with our management philosophy.

We have a history of successful growth through acquisitions. Since January 1, 2003, we have completed 23 acquisitions consisting of 55 stores operating in seven states, including eight acquisitions consisting of 24 stores completed since our initial public offering on December 11, 2007. We have a well-established track record of successfully integrating acquired stores through the Titan Operating Model, retaining acquired-store employees and maintaining acquired-store customer relationships. We expect that acquisitions will continue to be an important component of our growth.

Industry Overview

Agricultural Equipment Industry

Agricultural equipment is purchased primarily for the production of food, fiber, feed grain and renewable energy. It is also purchased for home and garden applications and maintenance of commercial, residential and government properties. Deere & Company, CNH and AGCO Corporation are the largest global manufacturers and supply a full line of equipment and parts that address the primary machinery requirements of farmers. For the most recent fiscal year-ends for which information is currently available, revenue from agriculture operations was \$16.5 billion for Deere & Company, \$12.9 billion for CNH and \$8.4 billion for AGCO. In addition to the major manufacturers, several short-line manufacturers produce specialized equipment that addresses regional and niche requirements of farmers. Agricultural equipment manufacturers typically grant dealers in the U.S. authorized store locations, not exclusive territories, to distribute their products.

According to IBISWorld reports, there are many factors that influence demand for agricultural equipment, parts and repair and maintenance services, including commodity prices, interest rates, general economic conditions and weather. Conditions can fluctuate drastically in a short time period, creating volatility in demand, especially for equipment, in a given year. Government subsidies also influence demand for agricultural equipment. Legislation, most notably the U.S. Farm Bill and the Farm Security and Rural Investment Act of 2002, attempts to stabilize the agriculture industry through USDA subsidies. USDA subsidies include (i) commodity programs consisting of direct, counter-cyclical and price support payments to farmers; (ii) conservation programs; and (iii) disaster relief programs. We believe USDA subsidies reduce financial volatility and help ensure that farmers operate their farms and equipment during economic down cycles, thus stabilizing demand for equipment, replacement parts and repair and maintenance services.

Construction Equipment Industry

Construction equipment is purchased primarily for commercial, residential and infrastructure construction, as well as for demolition, maintenance, mining, energy production and forestry operations. The market for construction equipment is larger than the market for agricultural equipment and is segmented across multiple categories including earth moving, lifting, light industrial, asphalt and paving, and concrete and aggregate equipment. We believe Caterpillar, Inc., Komatsu Ltd., Deere & Company, CNH and Ingersoll-Rand Co. Ltd. are the largest global manufacturers of construction equipment. These companies generated revenue from their construction operations of \$48.0 billion for Caterpillar, \$19.0 billion for Komatsu, \$4.8 billion for Deere & Company, and \$4.5 billion for CNH for the most recent fiscal year-ends for which information is currently available. As in the agricultural equipment market, distribution of construction equipment in the U.S. is executed primarily by manufacturer authorized dealers; however, manufacturers' dealership agreements in the construction industry typically assign exclusive distribution territories.

Construction machinery is generally divided into heavy and light subgroups. Heavy machinery includes large wheel loaders, large tracked excavators, crawler dozers, motor graders and articulated

Table of Contents

haul trucks. Light machinery includes backhoe landscape tractors, forklifts, compact excavators and skid steers. Heavy machinery is generally purchased by construction companies, municipalities, local governments, rental fleet owners, quarrying and mining companies, waste management companies and forestry-related organizations. Typically, light machinery is purchased by contractors, rental fleet owners, landscapers, logistics companies, farmers and recreational users. Although demand for construction equipment is affected by weather and seasonal factors, it is usually less susceptible to seasonal changes than the agricultural equipment industry.

CNH and industry reports show demand for construction equipment in our markets is driven by several factors, one of which is public infrastructure spending, including roads and highways, sewer and water, as well as by public and private expenditures for the energy and mining industries. Demand for construction equipment is also driven by demand for fossil fuels, as well as metals and other commodities. We expect to benefit from the need for equipment to establish the infrastructure necessary to extract these natural resources, particularly in North Dakota, as consumer and wholesale consumption accelerates.

Titan Operating Model

We believe the Titan Operating Model is a key element to our continued success. Through the Titan Operating Model, we empower leadership and share best practices at the store level while realizing efficiencies at the corporate level. We believe exceptional customer service is most efficiently delivered through accountable store employees who are supported by centralized administrative, finance and marketing functions. By managing our business as a network of independent stores supported by a centralized, shared resources group, we ensure coordination of the entire enterprise while promoting local business relationships on a store-by-store basis.

Strong Stores

Each of our stores is run by a store manager who is reviewed and compensated based on the store's achievement of revenue, profitability, market share and balance sheet objectives. Also, each store is typically staffed by a parts manager, a service manager and field marketers, all of whom report directly to the store manager. Under our operating model, decision-making for customer-related issues is decentralized, with each store manager responsible for matters such as the type of equipment to stock, equipment pricing, customer credit approvals, staffing levels and customer satisfaction. This operating model enables each trained and motivated store manager to concentrate on customers' equipment, parts and service needs, while our shared resources group manages the administrative functions of the store. We believe customers in our industry view store managers and sales and service personnel as important partners in operating their businesses. Therefore, we believe developing and supporting strong store managers enables us to grow same-store sales through fostering new relationships and further developing existing relationships with our customers. In addition, we believe other regional operators that choose to centralize customer-related decision making at the corporate level risk undermining the partnership many customers seek to build with their dealer.

Shared Resources

Our shared resources group provides a range of services to support our stores, including warranty and service administration, information technology support, administration, marketing campaigns, human resources management, finance and insurance, central purchasing, accounting, data administration and cash management. We believe these functions can be run more efficiently when combined and provide more sophisticated tools to our store managers than an independent dealership could support alone. We maintain accountability on a daily basis through our management reporting systems, which provide data on key operational and financial metrics, as well as monthly reviews of financial performance. We believe the services provided by our shared resources group enables our

Table of Contents

stores to achieve a higher level of customer service by freeing them from certain general and administrative functions and a more competitive market presence at a lower cost than would be feasible if our stores operated independently. Furthermore, as we acquire new stores, we believe the shared services required to support these stores will grow at a lower rate than our overall growth in store count.

Management Development and Succession Planning

Our executives work closely with our store managers and mid-level corporate managers to ensure the managers benefit from our executives' industry knowledge and execute operational excellence in line with our management philosophy. We also conduct formal store manager meetings every month to assess operational and financial objectives, develop near-term strategies and share best practices across the organization. We believe the relationships between our executives, regional managers, store managers and mid-level corporate managers will sustain our financial success through continued implementation of our effective operating model, by providing a strong pool of capable successors to our current team of executives, regional managers and store managers. Further, we have deliberately structured our store personnel with entrepreneurial individuals trained, including through our programs, to move up the management ladder. In addition, we sponsor a program with Minnesota State Technical College that offers scholarships to students who will ultimately work for us in various capacities empowered with the basic knowledge and tools to succeed. This program was the first of its kind among CNH dealers and is now being replicated elsewhere in the CNH network.

Business Strengths

In addition to the Titan Operating Model, we believe the following attributes of our business model and market position are important factors in our ability to compete effectively and achieve our long-term financial objectives:

Leading North American Equipment Provider with Significant Scale

According to CNH, we are the world's largest retail dealer of Case IH Agriculture equipment and a major retail dealer of New Holland Agriculture, Case Construction and New Holland Construction equipment in the U.S. We believe our size and large, contiguous geographic market provide us with several competitive advantages including:

our ability to efficiently manage inventory by empowering each individual store with inventory management responsibility and access to our centralized inventory management system, thus allowing inventory exchanges among the stores, which permits us to maintain only the inventory deemed needed by each store while providing significant breadth of parts and equipment to our customers;

our ability to use expanded sales channels, including used equipment listings and periodic auctions hosted on our website, which enables us to offer our customers alternative purchasing options; and

our ability to sell inventory to customers in a large geographic area covering North Dakota, South Dakota, Iowa, Minnesota, Nebraska, Wyoming and Montana, which enables us to capitalize on crop diversification and disparate weather throughout this area, as well as local trends in residential, infrastructure and commercial construction.

Customer Focus at the Local Level

As part of the Titan Operating Model, we centralize general and administrative functions and finance resources. This strategy enables our store employees to focus exclusively on customers and

Table of Contents

eliminates redundant operating expenses. We also centralize our marketing resources to offer our stores and field marketers professional marketing support that includes targeted direct mailings, advertising with targeted local media outlets, participation in and sponsorship of trade shows and industry events, our Titan Trader monthly magazine, and our hosting of open houses, service clinics, equipment demonstrations, product showcases and customer appreciation outings. We believe this operating structure, which focuses on serving our customers on a local level, will allow us to increase market share.

Superior Customer Service to Attract and Retain Customers

We believe our ability to respond quickly to our customers' demands is a key to profitable growth. Our executives are committed to maintaining a customer-focused culture. We spend significant time and resources training our employees to effectively service our customers in each of our local markets, which we believe will increase our revenue. Our training program involves active participation in all manufacturer-sponsored training programs and the use of industry experts as consultants for customized training programs and a training team to assist in the integration of newly-acquired operations. We also partner with a local technical college to sponsor students who we plan to ultimately employ. In particular, the following capabilities enable us to better service our customers:

our ability to staff a large number of highly-trained service technicians across our network of stores, which makes it possible to schedule repair services on short notice without affecting our technician utilization rates;

our ability to staff and leverage product and application specialists across our network of stores, which makes it possible to offer valuable pre-sale and aftermarket services, including equipment training, best practices education and precision farming technology support; and

our ability to innovate and lead our industry through initiatives such as Rural Tower Network, our joint venture with certain local Caterpillar and John Deere dealerships to deploy a GPS guidance system in support of precision farming in our core geographic market, which provides our customers with the latest advances in technology and operating practices.

Unique Entrepreneurial Culture to Attract and Retain Superior Employees

We created a unique entrepreneurial culture that empowers our employees to make decisions and act within the parameters of a proven operating process and system. We believe this culture and our size gives us a competitive advantage in attracting and retaining the best employees in our industry. We developed an operating system and process that provides our employees with defined objectives and frequent feedback of results within an entrepreneurial environment that allows them to work independently yet consistently throughout our company. Through this operating system and process we have established defined financial metrics on a balanced scorecard, which is used monthly with each store manager to assess performance. Each store manager is empowered to operate the individual store as appropriate within the guidelines set by the operating system and process. This balanced management philosophy enables our employees to understand clearly how they succeed in our organization and how to interact with customers who expect a level of autonomy from our employees. Our compensation system focuses on rewarding our employees for high performance, thus enabling us to retain most of those employees who perform at or above expectations. This system also enables us to attract talented individuals outside of our industry and train them to perform at a high level within a relatively short period of time.

Diverse and Stable Customer Base to Avoid Market Volatility

We believe our large and diverse customer base limits our exposure to risks associated with customer concentration and fluctuations in local market conditions. We have long and stable

Table of Contents

relationships with many of our customers. During fiscal 2009, we conducted business with over 39,000 customers and no customer accounted for more than 1.0% of our total revenue and our top ten customers combined represented less than 5.5% of our total revenue.

Proven Information Technology Systems

Our management reporting systems provide the data and reports that facilitate our ability to make informed decisions. We use these systems to actively manage our business and enable each store to access the available inventory of our other stores before ordering additional parts or equipment from our suppliers. As a result, we minimize our investment in inventory while promptly satisfying our customers' parts and equipment needs. Our customer relationship management system provides sales and customer information and other organizational tools to assist our field marketers, parts managers and service managers. In addition, our management reporting systems facilitate training and foster development of management personnel.

Experienced Management Team to Implement our Growth Strategy

Our executive team is led by David Meyer, our Chairman and Chief Executive Officer, and Peter Christianson, our President and Chief Financial Officer, who have approximately 34 and 30 years, respectively, of industry experience. Our regional managers, store managers and field marketers also have extensive knowledge and experience in our industry. In addition, we compensate, develop and review our regional managers and store managers based on an approach that aligns their incentives with the goals and objectives of our company, including achievement of revenue, profitability, market share and balance sheet objectives. We believe the strength of our management team will help our success in the marketplace.

Growth Strategy

We believe our business strengths will enable us to grow our business as we continue to pursue the following growth strategies:

Increase Market Share and Same-Store Sales

We focus on increasing our share of the equipment sold in our markets because our market share impacts current period revenue and compounds our revenue over the life of the equipment sold through recurring parts and service business. We seek to generate same-store growth and increase market share through:

employing significant marketing and advertising programs, including targeted direct mailings, advertising with targeted local media outlets, participation in and sponsorship of trade shows and industry events, our Titan Trader monthly magazine, and by hosting open houses, service clinics, equipment demonstrations, product showcases and customer appreciation outings;

supporting and providing customers with training for evolving technologies, such as precision farming, that are difficult for single-store operators to support;

maintaining state-of-the-art service facilities, mobile service trucks and trained service technicians to maximize our customers' equipment uptime through preventative maintenance programs and seasonal 24/7 service support; and

utilizing our inventory system to maximize parts and equipment availability for our customers.

Table of Contents

Make Selective Acquisitions

The agricultural and construction equipment industries are fragmented and consist of many relatively small, independent businesses servicing discrete local markets. We believe a favorable climate for dealership consolidation exists due to several factors, including the competitiveness of our industry, growing dealer capitalization requirements and lack of succession alternatives. We intend to evaluate and pursue acquisitions with the objectives of entering new markets, consolidating distribution within our established network and strengthening our competitive position.

We have a track record of completing and integrating acquisitions and have successfully used acquisitions to enter new markets. We look to add stores through acquisitions that offer attractive growth opportunities, high demand for the equipment we sell and services we offer, management strength, and contiguity with our existing geography. These factors have guided us to successful acquisition candidates. We believe our track record of successful acquisitions and expansion increases the probability that our future expansion will be profitable.

We believe that we are effectively able to identify attractive acquisition candidates due to our leadership position in the industry, our track record of completing and integrating acquisitions, and our contacts in and knowledge of our industry and geographic region. We regularly assess the acquisition landscape, evaluating potential acquisition candidates in terms of their availability and desirability to our long-term growth strategy. In addition, we believe acquisition economics in our industry have been and will continue to be conducive to executing our long-term growth strategy. Typically, we acquire only the fixed assets, working capital and selected inventory we believe are necessary to run an efficient store according to the Titan Operating Model and assume only the liabilities related to financing the inventory and working capital acquired, although we sometimes acquire all the stock of a company. We, therefore, typically calculate our net purchase price of an acquisition as the value paid for the assets acquired less the amount of any liabilities assumed. Upon completion of an acquisition we seek to re-finance the inventory acquired according to the parts and floor plan financing parameters of the Titan Operating Model. We believe our management team's experience in evaluating potential acquisition candidates helps them determine whether a particular dealership can be successfully integrated into our existing operations and enables them to structure mutually beneficial purchase terms.

The consent of CNH is required to acquire any CNH dealership, and the consent of Bremer Bank, N.A. ("Bremer Bank") is required for the acquisition of any dealership.

The following table summarizes our acquisition of 23 dealers, totaling 55 stores, since January 1, 2003:

Integrate New Dealers into the Titan Operating Model

We have developed the Titan Operating Model to optimize the performance and profitability of each of our stores. Upon consummation of each acquisition, we integrate acquired stores into our operations by implementing the Titan Operating Model to enhance each acquired store's performance within its target market. We generally complete integration of a store in six to 18 months, although it may take several years before acquired stores fully realize the benefits of the Titan Operating Model. We believe the Titan Operating Model provides us with multiple points of customer contact, creates cross-selling opportunities, fosters strong customer relationships and supports a culture of individual accountability that increases our revenue and provides a strong platform for future growth.

Suppliers

CNH Case IH Agriculture, Case Construction, New Holland Agriculture and New Holland Construction

We have a longstanding relationship with CNH and, according to CNH, are the world's largest retail dealer of Case IH Agriculture equipment. We have been an authorized dealer of Case agricultural equipment since the inception of our company in 1980 and added the other CNH brands as Case grew, acquired other brands and merged with New Holland in 1999 to form CNH. CNH supplied approximately 79.8% of the new equipment we sold in fiscal 2009 through CNH America LLC, CNH's U.S. manufacturing entity.

CNH is a global leader in the agricultural and construction equipment industries based on the number of units sold. In 2007, CNH had \$18.5 billion in worldwide revenue, with agricultural equipment accounting for approximately 74% and construction equipment accounting for approximately 26% of CNH's total revenue. In addition, CNH provides financing and insurance products and services to its end-user customers and authorized dealers through its CNH Capital business unit. CNH is a publicly-traded company and a majority-owned subsidiary of Fiat S.p.A.

CNH is the world's second largest manufacturer of agricultural equipment. CNH owns and operates the Case IH Agriculture and New Holland Agriculture brands. Case IH Agriculture, recognized by the red color of its equipment, possesses over 160 years of farm equipment heritage. New Holland Agriculture, recognized by the blue color of its tractors and the yellow color of its harvesting and hay equipment, has over 100 years of farm equipment industry experience. CNH's agricultural equipment dealers are assigned authorized store locations but do not have exclusive territories.

Table of Contents

CNH is the world's fifth largest manufacturer of construction equipment in terms of market share, owning and operating the Case Construction, New Holland Construction and Kobelco brands. CNH's construction equipment dealers are assigned a specific geographic area of responsibility, which typically includes an entire state, within which they have the right to sell new Case Construction, New Holland Construction and/or Kobelco equipment.

We have entered into separate dealership agreements with certain CNH entities to sell the Case IH Agriculture, New Holland Agriculture, Case Construction and New Holland Construction brands. These dealer agreements authorize us to sell CNH equipment and parts and entitle us to use CNH trademarks and trade names, with certain restrictions. The CNH entities have the right to terminate their dealer agreements with us immediately in certain circumstances, including if a person acquires 20% or more of our common stock without CNH's consent, and, in some cases, for any reason 90 days following written notice. The dealership agreements and industry practices generally provide that payment on equipment and parts purchased from CNH entities is due within 30 days and is typically subject to floor plan financing as discussed below. With respect to sales of equipment, payments from customers, which are typically financed by a third party, are due upon sale. Payments from customers for parts and services are due within 30 days. CNH makes available to us any floorplans, parts return programs, sales or incentive programs or similar plans or programs it offers to other dealers, and provides us with promotional items and marketing materials.

Based upon information provided to us by CNH, we are the world's largest retail dealer of Case IH Agriculture equipment and a major retail dealer of New Holland Agriculture, Case Construction and New Holland Construction equipment in the U.S. Thus, our relationship with CNH entities is more than a typical supply relationship; it is strategic for both our company and CNH. In that regard, it is in our mutual interests to maintain the strong longstanding relationship we share.

Other Suppliers

In addition to products supplied by CNH, we sell a variety of new equipment, parts and attachments from other manufacturers. These products tend to address specialized niche markets and complement the CNH products we sell by filling gaps in the CNH line of products. We believe our offering of products for specialized niche markets supports our goal of being a one-stop solution for equipment needs at each of our stores. Approximately 20.2% of our total new equipment sales in fiscal 2009 resulted from sales of products manufactured by companies other than CNH with our single largest manufacturer other than CNH representing less than 3.5% of our total new equipment sales. The terms of our arrangements with these other suppliers vary, but most of the dealership agreements contain termination provisions allowing the supplier to terminate the agreement after a specified notice period, which is typically 30 days. Payment and financing practices with these other suppliers are similar to those practices described above with respect to CNH entities.

Products and Services

We have four principal sources of revenue: new and used equipment sales, parts sales, repair and maintenance service and equipment rental and other business activities.

Equipment Sales

We sell new agricultural and construction equipment manufactured under the CNH family of brands as well as equipment from a variety of other manufacturers. The used equipment we sell is from inventory acquired through trade-ins from our customers and selective purchases. The agricultural equipment we sell and service includes application equipment and sprayers, combines and attachments, hay and forage equipment, planting and seeding equipment, precision farming technology, tillage equipment, and tractors. The construction equipment we sell and service includes articulated trucks,

Table of Contents

compact track loaders, compaction equipment, cranes, crawler dozers, excavators, forklifts, loader/backhoes, loader/tool carriers, motor graders, skid steer loaders, telehandlers and wheel loaders. We sell new and used equipment through our professional in-house retail sales force, which is organized by geography and product type. We also sell used equipment through an outlet store and the internet. We believe this organizational structure improves the effectiveness of our sales force, better serves our customers and helps us negotiate advantageous trade-in purchase terms. Equipment sales generate cross-selling opportunities for us by populating our markets with equipment we repair and maintain and for which we sell parts. For the year ended January 31, 2009, equipment revenue was \$540.3 million, representing 78.3% of total revenue for the period.

Parts Sales

We sell a broad range of maintenance and replacement parts on equipment that we sell, as well as other types of equipment. We maintain an extensive in-house parts inventory to provide timely parts and repair and maintenance support to our customers. We generally are able to acquire out-of-stock parts directly from manufacturers within two business days. Our parts sales provide us with a relatively stable revenue stream that is less sensitive to economic cycles than our equipment sales and rental operations. For the year ended January 31, 2009, parts revenue was \$95.0 million, representing 13.8% of total revenue for the period.

Repair and Maintenance Services

We provide repair and maintenance services, including warranty repairs, for our customers' equipment. Each of our stores includes service bays staffed by trained service technicians. Our technicians are also available to make on-site repairs. In addition, we provide proactive and comprehensive customer service by maintaining service histories for each piece of equipment owned by our customers, maintaining 24/7 service hours in times of peak service usage, providing on-site repair services, scheduling off-season maintenance activities with customers, notifying customers of periodic service requirements and providing training programs to customers to educate them as to standard maintenance requirements. At the time equipment is purchased, we also offer customers the option of purchasing guaranteed maintenance contracts. These after-market services have historically provided us with a high-margin, relatively stable source of revenue through changing economic cycles. For the year ended January 31, 2009, service revenue was \$44.2 million, representing 6.4% of total revenue for the period.

Equipment Rental and Other Business Activities

We rent equipment to our customers on a short-term basis for periods ranging from a few days to a few months. We actively manage the size, quality, age and composition of our rental fleet and use our information technology systems to closely monitor and analyze customer demand and rate trends. We maintain the quality of our fleet through our on-site parts and services support and dispose of rental equipment through our retail sales force. Our rental business creates cross-selling opportunities for us in equipment sales. In addition, we provide ancillary equipment support activities such as equipment transportation, GPS signal subscriptions in connection with precision farming and reselling CNH Capital finance and insurance products. For the year ended January 31, 2009, other revenue was \$10.9 million, representing 1.6% of total revenue for the period.

Customers

We serve over 39,000 customers in the U.S., primarily in North Dakota, South Dakota, Minnesota, Iowa, Nebraska, Wyoming and Montana. Our customers include a wide range of farmers, construction contractors, public utilities, municipalities and maintenance contractors. They vary from small, single machine owners to large farming or contracting firms that operate under sophisticated capital

Table of Contents

equipment and maintenance budgets. Our stores enable us to closely service local and regional customers. We believe the Titan Operating Model enables us to satisfy customer requirements and increase revenue through cross-selling opportunities presented by the various products and services that we offer. In fiscal 2009, no single customer accounted for more than 1.0% of our revenue and our top ten customers combined accounted for less than 5.5% of our total revenue. In addition to our U.S. customers, we sell equipment on a limited basis to international customers, primarily in Eastern Europe. Our U.S. customers primarily finance their equipment purchases through CNH Capital.

Floorplan Financing

We attempt to maintain at each store, or have readily available at other stores in our network, sufficient inventory to satisfy customer needs. Inventory levels fluctuate throughout the year and tend to increase before the primary sales seasons for agricultural equipment. The cost of financing our inventory is an important factor affecting our financial results.

CNH Capital

CNH Capital offers floorplan financing to CNH dealers for extended periods to finance products from both CNH and other suppliers. CNH Capital provides this financing in part to enable dealers to carry representative inventories of equipment and encourage the purchase of goods by dealers in advance of seasonal retail demand. CNH Capital charges variable market rates of interest at or over the prime rate on balances outstanding after any interest-free periods and retains a security interest in all of our assets, including inventories, which it inspects periodically. The interest-free periods, which CNH offers periodically in the form of additional incentives or special offers, typically average four months. CNH Capital also provides financing for used equipment accepted in trade, repossessed equipment and approved equipment from other suppliers, and receives a security interest in such equipment.

Other Financing Sources for Equipment

In addition to the financing provided by CNH Capital, financing also may be available through floorplan financing programs provided by the suppliers, which may be financed by such suppliers themselves or through third party lenders.

Other Financing

We have a revolving operating line of credit with Bremer Bank for up to \$25.0 million. The revolving operating line of credit is to provide for our short term working capital requirements. Additionally, under the agreement, Bremer Bank, in its discretion, may issue standby letters of credit totaling up to \$1.0 million.

Sales and Marketing

As part of the Titan Operating Model, we have centralized sales support and marketing management. All of our stores benefit from our centralized media buys, strategic planning, sales support and training, and we provide our store managers and their sales teams with flexibility to localize sales and marketing.

We currently market our products and services through:

field marketers, our direct sales representatives who operate out of our network of local stores and call on customers in the markets surrounding each store;

parts counter and service managers, who provide our customers with comprehensive after-market support;

Table of Contents

local and national advertising efforts, including broadcast, cable, print and web-based media; and

our remarketing division, which trades and sells used equipment through our outlet store and website.

Field Marketers

We believe our sales force is one of the industry's most productive and highly trained. Our field marketers perform a variety of functions, such as servicing customers at our stores, calling on existing customers and soliciting new business at farming, construction and industrial sites. These field marketers target customers in specific areas, and we develop customized marketing programs for our sales force by analyzing each customer group for profitability, buying behavior and product selection. All members of our sales force are required to attend frequent in-house training sessions to develop product and application knowledge, sales techniques and financial acumen. Our sales force is supported by our corporate marketing department.

Parts Counter and Service Managers

Our parts counter and service managers are involved in our uptime service efforts, taking advantage of our seasonal marketing campaigns in parts and service sales. As a group, they have won multiple awards from our suppliers for their efforts benefiting both our customers and our key strategic partners. We believe they rank among the most well-trained and efficient parts and service groups in our industry.

Print, Broadcast and Web-Based Advertising Campaigns

Each year we initiate several targeted direct mail, print and broadcast advertising and marketing campaigns. CNH and other suppliers periodically provide us with advertising funds, which we primarily use to promote new equipment, parts and financing programs. We will continue to explore and launch new internet-based efforts to provide additional sales channels.

Remarketing Division

Our remarketing division capitalizes on after-market sales opportunities for used equipment. We have opened two outlet stores that sell used equipment. In addition, we are actively engaged in selling equipment through our website, both through direct purchases and auctions.

Competition

The agricultural and construction equipment sales and distribution industries are highly competitive and fragmented, with large numbers of companies operating on a regional or local scale. Our competitors range from multi-location, regional operators to single-location, local dealers and include dealers and distributors of competing equipment brands, including John Deere, Caterpillar and the AGCO family of brands, as well as other dealers and distributors of the CNH family of brands. Competition among equipment dealers is primarily based on the price, value, reputation, quality and design of the products offered by the dealer, the customer service and repair and maintenance service provided by the dealer, the availability of equipment and parts and the accessibility of stores. While we believe we compete favorably on each of the identified competitive factors, our sales and margins may be impacted depending on (i) the extent of aggressive pricing competition through manufacturer discount programs or other competitive pricing tactics, (ii) our ability to obtain higher service gross margins based on our service quality and reputation and (iii) our ability to attract new and maintain existing customers based on the availability and quality of the products we offer and our local relationship and reputation.

Table of Contents

The number of agricultural and construction equipment dealers operating on a regional scale is limited and we are one of the principal regional-scale, agricultural and construction equipment dealers in the U.S. The primary regional-scale equipment dealers with whom we compete include RDO Equipment Co., Butler Machinery and Brandt Holdings Co. RDO Equipment Co. is a John Deere agricultural and construction equipment dealer with 27 locations in North Dakota, South Dakota, Minnesota and Montana, as well as 29 locations in Arizona, California, Oregon, Texas and Washington. Butler Machinery is a Caterpillar dealer with ten locations in North Dakota and South Dakota. Brandt Holdings owns John Deere, Vermeer and Bobcat equipment dealers with 22 locations in California, Connecticut, Iowa, Massachusetts, Minnesota, Nebraska, New York, North Dakota, South Carolina and South Dakota. Other agricultural and construction equipment dealers that have consolidated stores in other regions of the country include Pioneer Equipment, which has 14 locations that sell Case IH Agriculture, New Holland Agriculture and Case Construction equipment in California, Idaho and Texas; Western Power and Equipment, which has eight Case Construction locations in California, Nevada, Oregon and Washington; Scott Companies, which has 26 locations that sell Case IH Agriculture and Case Construction equipment in Arkansas, Louisiana, Mississippi, Tennessee, Texas, Iowa and Nebraska; and Birkey's Farm Store, which has eleven Case IH Agriculture and New Holland dealerships located in Illinois and Indiana and four Case Construction dealerships located in Illinois.

Information Technology Systems

We currently use an integrated management reporting system developed and supported by Dealer Information Systems Corporation to manage our operating information. In fiscal 2010 we began implementing a new enterprise resource planning ("ERP") system that will replace our current management reporting system. Our information system enables us to closely monitor our performance and actively manage our business and includes features that were enhanced to support the Titan Operating Model, including detailed store-based financial reporting, inventory management and customer relationship management.

Through our information system we maintain a complete database on inventory of parts and equipment and a centralized inventory control system. Our system enables each store to access the available inventory of our other stores before ordering additional parts or equipment from our suppliers. As a result, we minimize our investment in inventory while effectively and promptly satisfying our customers' needs. We are also able to monitor inventory levels and mix at each store and make adjustments in accordance with our operating plan. Finally, our system is externally connected to CNH, enabling us to locate CNH parts, communicate with other CNH dealers, make electronic payments to CNH and register and reimburse warranty expenses.

Our customer relationship management system provides sales and customer information and other organizational tools to assist our sales force. We maintain an extensive customer database that allows us to monitor the status and maintenance history of our customers' equipment and enables us to more effectively provide parts and services to meet their needs. In addition, our system includes, among other features, on-line contract generation, automated billing, local sales tax computation and automated rental purchase option calculation. We also use our relationship management information system and customer database to monitor market conditions, sales information and customer demand, as well as to assess product merchandising strategies.

The data we store in our information system is backed-up on a daily basis and stored at an off-site location. Thus, if our system were to become inoperable, we would be able to continue operations through an off-site data center. Further, we own the software and hardware necessary to operate this system and have employees trained to manage and maintain the software without reliance on external support.

Table of Contents

Corporate Information

We were incorporated as a North Dakota corporation in 1980 and reincorporated in Delaware in December 2007 prior to our initial public offering. Our executive offices are located at 4876 Rocking Horse Circle, Fargo, ND 58104-6049. Our telephone number is (701) 356-0130. We maintain a web site at www.titanmachinery.com.

Intellectual Property

We do not have any registered intellectual property. Case IH, Case and New Holland are registered trademarks of CNH, which we use in connection with advertisements and sales as authorized under our dealership agreements. We license trademarks and trade names of new equipment obtained from suppliers other than CNH from their respective owners. We operate each of our stores under either the Titan Machinery name or, if there was strong local name recognition and customer loyalty at a location we acquired, the name historically used by the dealership in that location for a transition period, the length of which can vary depending upon the location.

Product Warranties

Product warranties for new equipment and parts are provided by our suppliers. The term and scope of these warranties vary greatly by supplier and by product. We occasionally provide additional warranties to retail purchasers of new equipment. CNH pays us for repairs we perform to CNH equipment under warranty. We generally sell used equipment "as is" and without manufacturer's warranty, although manufacturers sometimes provide limited warranties if the supplier's original warranty is transferable and has not expired. Typically, we provide no additional warranties on used equipment.

Seasonality

Our quarterly operating results are subject to fluctuation due to varying weather patterns, which may impact the timing and amount of equipment, parts and service purchases by our customers. A significant increase in the severity of weather cycles could increase the volatility of our results of operations and impact our financial condition. If we acquire businesses in geographic areas other than where we currently have operations, we may be affected more by the above-mentioned or other seasonal and equipment buying trends.

Employees

As of April 1, 2009, we employed 1,059 full-time and 229 part-time employees. None of our employees is covered by a collective bargaining agreement. We believe our relations with our employees are good.

Governmental Regulation

We are subject to numerous federal, state, and local rules and regulations, including regulations promulgated by the Environmental Protection Agency and similar state agencies, with respect to storing, shipping, disposing, discharging and manufacturing hazardous materials and hazardous and non-hazardous waste. These activities are associated with the repair and maintenance of equipment at our stores. Currently, none of our stores or operations exceeds small quantity generation status. Compliance with these rules and regulations has not had any material effect on our operations, nor do we expect it to in the future. Further, we have not made, and do not anticipate making, any material capital expenditures in compliance with environmental regulations. However, there can be no assurance that these expectations are accurate, particularly if regulations change, unforeseen incidents occur or unknown past contamination or non-compliance is discovered, among other similar events.

Table of Contents

ITEM 1A. RISK FACTORS

We are substantially dependent upon our relationship with CNH.

We are an authorized dealer of CNH agricultural and construction equipment and parts. In fiscal 2009, CNH supplied approximately 79.8% of the new equipment we sold and represented a significant portion of our parts revenue. Our acquisition strategy contemplates the acquisition of additional CNH geographic areas of responsibility and store locations in both the agricultural and construction equipment areas. We depend on CNH Capital America LLC, or CNH Capital, for floorplan financing to purchase a substantial portion of our inventory. In addition, CNH Capital provides a significant percentage of the financing used by our customers to purchase CNH equipment from us. CNH also provides incentive programs and discount programs from time to time that enable us to price our products more competitively. In addition, CNH conducts promotional and marketing activities on national, regional and local levels. Due to our substantial dependence on CNH, our success depends, in significant part, on (i) the overall reputation and success of CNH; (ii) the availability and terms of floorplan financing and customer financing from CNH Capital; (iii) the incentive and discount programs provided by CNH and its promotional and marketing efforts for its industrial and agricultural products; (iv) the goodwill associated with CNH trademarks; (v) the introduction of new and innovative products by CNH; (vi) the manufacture and delivery of competitively-priced, high quality equipment and parts by CNH in quantities sufficient to meet our customers' requirements on a timely basis; (vii) the quality, consistency and management of the overall CNH dealership system; and (viii) the ability of CNH to manage its risks and costs, including those associated with being a multinational company. If CNH does not provide, maintain or improve any of the foregoing, or if CNH were sold or reduced or ceased operations, there could be a material adverse effect on our financial condition and results of operations.

CNH may terminate its dealership agreements with us or change the terms of those agreements, which could adversely affect our business.

Under our dealership agreements with CNH through CNH America LLC, CNH's U.S. manufacturing entity, CNH entities have the right to terminate these agreements immediately in certain circumstances, and, in some cases, for any reason 90 days following written notice. Furthermore, CNH entities may change the terms of their agreements with us, among other things, to change our sales and service areas and/or the product, pricing or delivery terms. CNH routinely conducts evaluations of dealership standards, customer satisfaction surveys and market share studies, the results of which can impact the relationships with its dealers. CNH uses the evaluation results to increase or decrease the monetary rewards to dealers, or limit or expand the availability of financing, warranty reimbursements or other marketing incentives. If CNH were to change the terms of any or all of these agreements in a manner that adversely affects us, our business may be harmed, and if CNH were to terminate all or any of its dealer agreements with us, our business would be severely harmed.

Restrictions in our CNH dealership agreements may significantly affect our operations and growth and prevent a change in control of our company.

We operate our stores pursuant to CNH's customary dealership agreements. These agreements impose a number of restrictions and obligations on us with respect to our operations, including our obligations to actively promote the sale of CNH equipment within our designated geographic areas of responsibility, fulfill the warranty obligations of CNH, provide services to our customers, maintain sufficient parts inventory to service the needs of our customers, maintain inventory in proportion to the sales potential in each sales and service geographic area of responsibility, maintain adequate working capital and maintain stores only in authorized locations. Prior consent of CNH is required for the acquisition by another party of 20% or more of our outstanding stock and for our acquisition of other CNH dealerships; otherwise, CNH may terminate our dealership agreements. There can be no

Table of Contents

assurances that CNH will give its consent. The restrictions and obligations in our CNH dealership agreements limit our flexibility in operating our current stores and acquiring new stores, which could have an adverse effect on our operations and growth. Furthermore, the requirement that CNH consent to the acquisition by any party of 20% or more of our outstanding stock may have the effect of discouraging transactions involving a change in our control, including transactions that stockholders might deem to be in their best interests.

Our agricultural equipment dealer appointments are not exclusive to the geographic areas we serve, which could adversely affect our operations and financial condition.

CNH could appoint other agricultural equipment dealers in close proximity to our existing stores. The sales and service geographic areas of responsibility assigned to our dealerships can be enlarged or reduced by CNH upon 30 days' prior written notice. CNH and other agricultural equipment dealers can also sell in our sales and service geographic areas of responsibility. To the extent CNH appoints other agricultural equipment dealers within our markets, enlarges or reduces the sales and service geographic areas of responsibility relating to our stores, amends the dealership agreements or imposes new or different terms or conditions under the dealer agreements, our operations and financial condition could be adversely affected.

Our operating results may be adversely impacted by an under-supply or over-supply of equipment.

If our suppliers cannot continue to provide us a reliable supply of new equipment, we may not be able to meet our customers' demand and our operating results could be negatively impacted. In times of heightened global demand for agricultural commodities and the equipment needed to produce those commodities, agricultural equipment suppliers may experience difficulty providing all dealerships a reliable supply of new agricultural equipment, which could adversely impact our results of operations. Further, an under-supply of equipment may cause prices for such equipment to increase. To the extent we cannot pass on any increased costs of equipment to our customers, our operating results may suffer. Conversely, an industry over-supply of equipment may also adversely affect our operations. Though manufacturers typically manage production of new equipment in response to demand, there may be short-term over-supplies of new equipment as manufacturers adjust to industry demand fluctuations. For used and rental equipment, short-term lease programs and commercial rental agencies for construction and agricultural equipment have expanded significantly in North America. Nationwide rental conglomerates have become sizeable purchasers of new equipment and can have a significant impact on industry sales and margins. When equipment comes off of lease or is replaced with newer equipment by rental agencies, there may be a significant increase in the availability of late-model used equipment. An over-supply of used equipment could adversely affect demand for, or the market prices of, new and used equipment. In addition, a decline in used equipment prices could have an adverse effect on residual values for leased equipment, which could adversely affect our financial performance.

If our acquisition plans are unsuccessful, we may not achieve our planned revenue growth.

We believe a significant portion of our future growth will depend on our ability to acquire additional dealerships. Our ability to continue to grow through the acquisition of additional CNH geographic areas of responsibility and store locations or other businesses will be dependent upon the availability of suitable acquisition candidates at acceptable costs, our ability to compete effectively for available acquisition candidates and the availability of capital to complete the acquisitions. We may not successfully identify suitable targets, or if we do, we may not be able to close the transactions, or if we close the transactions, they may not be profitable. In addition, CNH's consent is required for the acquisition of any CNH dealership, and the consent of Bremer Bank is required for the acquisition of any dealership. CNH typically evaluates management, performance and capitalization of a prospective acquirer in determining whether to consent to the sale of a CNH dealership. There can be no

Table of Contents

assurance that CNH or Bremer Bank will consent to any or all acquisitions of dealerships that we may propose.

Our potential inability to successfully integrate newly-acquired dealerships may adversely affect our financial results.

Once an acquisition is completed, we face many other risks commonly encountered with growth through acquisitions. These risks include incurring significantly higher than anticipated capital expenditures and operating expenses; failing to assimilate the operations and personnel of the acquired dealerships; disrupting our ongoing business; dissipating our management resources; failing to maintain uniform standards, controls and policies; and impairing relationships with employees and customers as a result of changes in management. Fully integrating an acquired dealership into our operations and realization of the full benefit of our strategies, operating model and systems may take several years. There can be no assurance that we will be successful in overcoming these risks or any other problems encountered with such acquisitions. To the extent we do not successfully avoid or overcome the risks or problems related to acquisitions, our results of operations and financial condition could be adversely affected. Future acquisitions also will have a significant impact on our financial position and capital needs, and could cause substantial fluctuations in our quarterly and yearly results of operations. Acquisitions could include significant goodwill and intangible assets, which may result in future impairment charges that would reduce our stated earnings.

We have grown significantly through acquisitions in recent years and expect to continue to grow through acquisitions. Management has expended, and expects to continue to expend, significant time and effort in evaluating, completing and integrating acquisitions and opening new stores. There can be no assurance that our systems, procedures and controls will be adequate to support our expanding operations. Any future growth will also impose significant added responsibilities on our executives, including the need to identify, recruit and integrate new senior level managers and executives. There can be no assurance we will be able to identify and retain such additional management. If we are unable to manage growth efficiently and effectively, or are unable to attract and retain additional qualified management, there could be a material adverse effect on our financial condition and results of operations.

We lease many of our dealership sites from related parties, and if we are unable to obtain commercially reasonable terms and conditions from these related parties or unrelated third parties in the future, our growth and financial condition may be adversely affected.

We lease 29 of our 62 dealership sites from entities affiliated with David Meyer, our Chairman and Chief Executive Officer, Tony Christianson, one of our directors, or Peter Christianson, our President and Chief Financial Officer. We expect that we may lease future dealership sites we acquire from parties related to our affiliates. There is no guarantee that related parties will offer us commercially reasonable terms and conditions or that unrelated third parties will provide alternate dealership sites on commercially reasonable terms and conditions. If we cannot obtain commercially reasonable terms and conditions on leases for our current or future dealership sites from entities related to Messrs. Meyer, Tony Christianson or Peter Christianson, or from unrelated third parties, our growth and financial condition may be adversely affected.

Substantial inventory financing is required for the equipment we sell but may not be available, which could adversely affect our growth and results of operations.

The sale of agricultural and construction equipment requires substantial inventories of equipment and parts to be maintained at each store to facilitate sales to customers on a timely basis. We generally purchase our inventories of equipment with the assistance of floorplan financing programs through CNH Capital and other lenders. As we grow, whether internally or through acquisitions, our inventory

Table of Contents

requirements will increase and, as a result, our financing requirements also will increase. In the event that our available financing sources are not maintained or are insufficient to satisfy our future requirements, we would be required to obtain financing from other sources. There can be no assurance that additional or alternative financing could be obtained on commercially reasonable terms. To the extent additional financing cannot be obtained on commercially reasonable terms, our growth and results of operations could be adversely affected.

Failure to properly manage our equipment inventory, our largest asset, would have a significant adverse effect on our operations.

Our equipment inventory has generally represented 50% or more of our total assets. Thus, our success is significantly dependent upon our ability to manage the supply and cost of new and used equipment. The pricing of equipment can be highly volatile and subject to negotiation, particularly in the used equipment market. Pricing for and sales of used equipment can be significantly affected by the limited market for such equipment. Further, liquidation prices of used agricultural and construction equipment can have significant fluctuations due to economic cycles, utilization trends and degree of specialization. We are dependent upon the ability of our management and buyers to negotiate acceptable purchase prices, to affect a proper balance of new and used equipment and to manage the amount of equipment in inventory to assure quick turnover. Our failure to manage our inventory and equipment costs could materially adversely affect our results of operations and financial condition.

Adverse changes in governmental agricultural policies, including decreases in farm subsidies, may reduce demand for agricultural equipment and cause our revenue to decline.

Changes in governmental agricultural policy could adversely affect sales of agricultural equipment. Government subsidies influence demand for agricultural equipment. Future farm bills and USDA budgets may reduce the amount of payments to individual farmers. We cannot predict the outcome of such governmental funding, and to the extent that future funding to individual farmers is reduced, these reductions in funding could reduce demand for agricultural equipment and we could experience a decline in revenue.

Recent economic events, particularly in the credit markets, may adversely affect our business and results of operations.

The agricultural and construction equipment industries are affected by macroeconomic factors, including changes in international, national, regional, and local economic conditions. Current global economic conditions pose a risk to our business as customers may postpone spending in response to tighter credit, negative financial news, downturns in agricultural commodity prices and the housing market and/or declines in income or asset values, which could have a material negative effect on the demand for our products and services. Our business is also particularly dependent on our access to the capital and credit markets to finance acquisitions and manage inventory. The current financial turmoil affecting the banking system and financial markets have resulted in a tightening in the credit markets, a low level of liquidity in many financial markets, and extreme volatility in fixed income, credit, currency and equity markets. These recent disruptions in the overall economy and financial markets and the related reduction in consumer confidence in the economy, have slowed activity in the capital markets, negatively affected access to credit on commercially acceptable terms, and may adversely impact the access of us or our customers to credit and the terms of any such credit. Though the regions in which we operate have not been impacted by the sub-prime lending market collapse and the resulting tightening of lending standards to the same magnitude as has occurred in other regions or on a national level, any greater extension of those conditions to the regions in which we operate may adversely affect our results of operations. Further, any decreased collectability of accounts receivable or increase in customer insolvencies could negatively impact our results of operations. The nature of the

Table of Contents

agricultural and construction equipment industries is such that a downturn in demand can occur suddenly, due to tightening credit markets, decreasing commodity prices or demand, adverse weather conditions or other circumstances, resulting in excess inventory, un-utilized production capacity and reduced prices for equipment, which would harm our revenue and profitability. Uncertainty about current global economic conditions, agricultural commodity prices and demand and the housing market could also continue to increase the volatility of our stock price.

Adverse changes in the agricultural industries could result in decreases in purchases of agricultural equipment and harm our revenue and profitability.

Our business depends to a great extent upon general activity levels in the agricultural industries. Changes in farm income and farmland value, the level of worldwide farm output and demand for farm products, commodity prices, animal diseases and crop pests, and limits on agricultural imports are all material factors that could adversely affect the agricultural industries and result in a decrease in the amount of agricultural equipment that our customers purchase. The nature of the agricultural equipment industries is such that a downturn in demand can occur suddenly, resulting in excess inventories, un-utilized production capacity and reduced prices for new and used equipment. These downturns may be prolonged and our revenue and profitability would be harmed.

Adverse changes in the construction industry could result in decreased demand for construction equipment and harm our revenue.

General economic conditions in markets in which we do business can impact the demand for our construction equipment. The construction industry in our geographical areas has experienced a prolonged economic down cycle and interest rate fluctuations that have negatively affected the new residential housing market, which negatively impacts sales of light construction equipment. Decreased demand for our products can have a negative impact on our financial performance and cash flow. Our business and earnings are impacted by the changes in the construction industry. The ability of consumers to obtain mortgages for the purchase of newly constructed homes or commercial properties impacts the overall demand for new home construction. The uncertainties created by recent events in the sub-prime mortgage market and their impact on the overall mortgage market, including the tightening of credit standards, could adversely affect the ability of consumers to obtain financing, thus reducing demand for new construction and in turn reducing our customers' demand for our construction equipment. Reduced demand for our construction equipment can negatively affect our financial performance and cash flow.

Climate fluctuations may negatively impact the agricultural and construction equipment markets and harm our sales.

Weather conditions, particularly severe floods and droughts, can have a significant impact on the success of regional agricultural and construction markets and, therefore, the economic conditions of the regions in which we operate stores. Accordingly, our financial condition and results of operations may be materially and adversely affected by any adverse cyclical trends or weather conditions. Our quarterly operating results are subject to fluctuation due to varying weather patterns, which may impact the timing and amount of equipment, parts and service purchases by our customers. A significant increase in the severity of weather cycles could increase the volatility of our results of operations and impact our financial condition. If we acquire businesses in geographic areas other than where we currently have operations, we may be affected more by the above-mentioned or other seasonal and equipment buying trends.

Table of Contents

Our results of operations may fluctuate from period to period due to interest rate adjustments.

The ability to finance affordable purchases, of which the interest rate charged is a significant component, is an important part of a customer's decision to purchase agricultural or construction equipment. Interest rate increases may make equipment purchases less affordable for customers and, as a result, our revenue and profitability may decrease as we manage excess inventory and reduce prices for equipment. To the extent we cannot pass on our increased costs of inventory to our customers, our net income may decrease. Partially as a result of the foregoing, our results of operations have in the past and in the future are expected to continue to fluctuate from quarter to quarter and year to year. We are unable to anticipate the timing and impact of interest rate adjustments. Recently, the economic downturn caused in part by the sub-prime and alternative mortgage markets have resulted in tighter lending standards throughout the mortgage industry and overall credit markets. This volatility in the credit markets may have a negative impact on our business by making it more difficult for certain of our customers to obtain financing to purchase agricultural or construction equipment. Conversely, the recent decreases in interest rates may positively affect a customer's decision to purchase agricultural or construction equipment. We are unable to predict with certainty any positive or negative effect on our business as a result of the recent interest rate decreases.

Aggressive pricing competition could adversely affect our results of operation and growth.

The agricultural and construction equipment sales and distribution industries are highly competitive and fragmented, with large numbers of companies operating on a regional or local scale. Historically, our competitors have competed aggressively on the basis of pricing or inventory availability, resulting in decreased margins on our sales to the extent we choose to match our competitors' downward pricing. To the extent we choose not to match or remain within a reasonable competitive distance from our competitors' pricing, it could also have an adverse impact on our results of operations, as we may lose sales volume. In addition, to the extent CNH's competitors provide their dealers with more innovative or higher quality products, better customer financing, or have more effective marketing efforts, our ability to compete and financial condition and results of operations could be adversely affected.

We are substantially dependent on our Chief Executive Officer and President, the loss of whom could have a material adverse effect on our business.

We believe our success will depend to a significant extent upon the efforts and abilities of David Meyer, our Chairman and Chief Executive Officer, and Peter Christianson, our President and Chief Financial Officer. The employment relationships with both Mr. Meyer and Mr. Christianson are terminable by us or each of them at any time for any reason. The loss of the services of one or both of these persons and other key employees could have a material adverse effect on our operating results.

Selling agricultural and construction equipment and parts subjects us to product liability risks that could adversely affect our financial condition and reputation.

Products sold or serviced by us may expose us to potential liabilities for personal injury or property damage claims relating to the use of such products. There can be no assurance that we will not be subject to or incur any liability for such claims in the future. There can be no assurance that our product liability insurance will be adequate to cover product liability claims. There also can be no assurance that such insurance will continue to be available on economically reasonable terms. An uninsured or partially insured claim for which indemnification is not provided could have a material adverse effect on our financial condition. Furthermore, if any significant claims are made against us or against CNH or any of our other suppliers, our business may be adversely affected by any resulting negative publicity.

Table of Contents

Being a public company has substantially increased our legal and financial compliance costs, which could harm our business, financial condition and results of operations.

Compliance with publicly-traded company regulations adversely impacts our resources. As a publicly-traded company, we are subject to rules and regulations that increase our legal and financial compliance costs, make some activities more time-consuming and costly, and divert our management's attention away from the operation of our business. These rules and regulations may make it more difficult and more expensive for us to maintain director and officer liability insurance and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, we may experience more difficulty attracting and retaining qualified individuals to serve on our board of directors or as executive officers. We cannot predict or estimate the amount of additional costs we may incur as a result of these requirements or the timing of these costs. Furthermore, our current management has limited experience in running a public company. The costs of being public and the diversion of management's time and attention may have a material adverse effect on our business, financial condition and results of operations.

Our internal controls over financial reporting may not be effective and our independent registered public accounting firm may not be able to certify as to their effectiveness, which could have a significant and adverse effect on our business and reputation.

We are required to comply with the requirements of Section 404 of the Sarbanes-Oxley Act of 2002 and rules and regulations of the SEC thereunder. If we fail to maintain the adequacy of our internal controls, as such standards are modified, supplemented or amended from time to time, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal controls over financial reporting in accordance with Section 404. We cannot be certain as to the timing of completion of our evaluation, testing and any remedial actions or their impact on our operations. If we are not able to comply with the requirements of Section 404 our independent registered public accounting firm may not be able to certify as to the effectiveness of our internal control over financial reporting, we may be unable to report our financial results accurately or in a timely manner and we may be subject to sanctions or investigation by regulatory authorities, such as the SEC. As a result, there could be a negative reaction in the financial markets due to a loss of confidence in the reliability of our financial statements. In fiscal 2010, we began implementing a new ERP system. Unforeseen problems with or any difficulties encountered integrating the new ERP system could result in internal control deficiencies.

ITEM 2. PROPERTIES

Equipment Stores

We currently operate 62 agricultural and construction equipment stores, including two outlet stores, in the following locations:

North Dakota (15 stores)		Iowa (15 stores)	
Bismarck	Lamoure	Anthon	Des Moines
Casselton	Lidgerwood	Avoca	Greenfield
Fargo	Lisbon	Blairstown	Grundy Center
Grand Forks	Mandan	Cedar Rapids	Kingsley
Jamestown	Wahpeton (2 stores)	Cherokee	Le Mars
Kintyre	West Fargo	Cherokee (outlet)	Sioux City
Kulm	Wishek	Clear Lake	Waverly
		Davenport	
Minnesota (11 stores)		South Dakota (10 stores)	
Ada	Moorhead	Aberdeen (2 stores)	Rapid City
Crookston	Moorhead (outlet)	Highmore	Redfield
Elbow Lake	Pipestone	Huron	Sioux Falls
Fergus Falls	Roseau	Miller	Watertown
Graceville	Thief River Falls	Pierre	
Marshall			
Montana (6 stores)		Wyoming (3 stores)	
Belgrade	Great Falls (rental)	Casper (rental)	Gillette (rental)
Billings	Kalispell (rental)	Cheyenne	
Billings (Rental)	Missoula (rental)		
Nebraska (2 stores)			
Lincoln	Omaha		

Our stores are generally located in rural areas on property zoned for commercial use. The stores typically range from 5,000 square feet with three acres of land to 40,000 square feet with 14 acres of land. We fully utilize the leased space for each of our stores and believe the respective square footage and related acreage is adequate to meet our current and anticipated needs.

Store Lease Arrangements

We lease real estate for 29 of our stores from entities affiliated with David Meyer, our Chairman and Chief Executive Officer, Tony Christianson, one of our directors and/or Peter Christianson, our President and Chief Financial Officer. Of these 29 stores, we lease 28 dealership sites from Dealer Sites, LLC, an entity affiliated by common ownership with Messrs. Meyer and Tony Christianson and one warehouse from C.I. Farm Power, Inc., an entity affiliated by common ownership with Mr. Peter Christianson. We lease 38 additional properties under operating lease agreements with unrelated parties. The leases for our dealership sites generally expire between 2010 and 2024, other than those leases which are currently automatically renewed on a year-to-year-basis until either we or the lessor terminate them. We do not intend to own significant amounts of real estate. Therefore, we anticipate that when we need real estate, including as part of acquiring dealerships, we will lease such real estate from third parties, which may include affiliates of our investors, directors or management. We intend for the terms of all of our leases to be commercially reasonable. We do not believe the terms of our

Table of Contents

leases with entities affiliated with Messrs. Meyer, Tony Christianson and Peter Christianson are any less favorable to us than could be obtained in an arm's length transaction with an unrelated party.

Our store lease agreements with entities affiliated with David Meyer, Peter Christianson, and/or Tony Christianson all contain substantially similar terms. The leases with Dealer Sites, LLC and C.I. Farm Power, Inc. provide for fixed lease periods ranging from three to ten years. All of the leases provide for fixed monthly rental payments and require us to pay the real estate taxes on the properties for the lease periods. The leases require that we maintain public liability and personal property insurance on each of the leased premises, and require us to indemnify the lessor in connection with any claims arising from the leased premises during our occupation of the property. The leases generally prohibit us from assigning the lease agreements or subletting the leased premises without the prior written consent of the lessor. The lease agreements with Dealer Sites, LLC provide that in the event Dealer Sites, LLC and Titan Machinery Inc. agree to sell the leased premises to a party other than us or our affiliates during the term of the lease, then we shall share in half of any surplus or deficit resulting to Dealer Sites, LLC from that sale.

Our store lease agreements with unrelated parties contain terms comparable to the agreements with entities affiliated with our directors and officers described above. The lease periods range from automatically renewable month-to-month terms to twenty years in length. A majority of the lease agreements either give us the option to renew or extend the lease for an additional period at the conclusion of the original lease term or automatically renew the lease term at the conclusion of the original lease period on a month-to-month or year-to-year basis. A majority of the leases provide for fixed monthly rental payments and require us to pay the real estate taxes on the properties for the lease periods. All of the leases require that we maintain public liability and personal property insurance on each of the leased premises, and a majority of the leases require us to indemnify the lessor in connection with any claims arising from the leased premises during our occupation of the property. Most of the leases prohibit us from assigning the lease agreements or subletting the leased premises without the prior written consent of the lessor. We have been granted a right of first refusal to purchase the Watertown and one of the Aberdeen properties during the applicable lease terms. The lease agreements for the West Fargo, Kingsley, Le Mars, Watertown and Redfield properties grant us the option to purchase the leased premises during or at the conclusion of the lease term. The Kingsley, Le Mars and Redfield lease agreements grant the lessor the right to require Dealer Sites, LLC to purchase the leased premises during or at the conclusion of the lease term.

As part of our due diligence review prior to a dealership acquisition, we evaluate the adequacy, suitability and condition of the related real estate. Our evaluation typically includes a Phase I environmental study of the real property to determine whether there are any environmental concerns. If any environmental concerns exist, we generally require that such concerns be addressed prior to acquisition of the dealership.

Headquarters

We currently lease and occupy approximately 12,700 square feet in Fargo, North Dakota for our headquarters. This lease expires on January 31, 2015, with an option to extend for two additional five-year terms. We also lease and occupy approximately 6,000 square feet in Fargo, North Dakota for additional space for our headquarters. We continually review our location needs, including the adequacy of our headquarters space, to ensure they are sufficient to support our operations. We believe there is ample opportunity for expansion in the Fargo area if necessary.

ITEM 3. LEGAL PROCEEDINGS

We are, from time to time, subject to claims and suits arising in the ordinary course of business. Such claims have, in the past, generally been covered by insurance. Management believes the resolution

Table of Contents

of other legal matters will not have a material effect on our financial condition or results of operation, although no assurance can be given with respect to the ultimate outcome of any such actions. Furthermore, there can be no assurance that our insurance will be adequate to cover all liabilities that may arise out of claims brought against us. We are not currently a party to any material litigation.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

EXECUTIVE OFFICERS OF THE REGISTRANT

The names, ages and positions of our executive officers are as follows:

Name	Age	Position
David Meyer	55	Chairman and Chief Executive Officer
Peter Christianson	52	President, Chief Financial Officer and Director
Ted Christianson	50	Vice President, Finance and Treasurer

David Meyer is our Chairman and Chief Executive Officer. Mr. Meyer was a founder of our company in 1980 and has been a director of our company since its creation. From 1976 to 1980, Mr. Meyer was a partner in a Case and New Holland dealership with locations in Lisbon and Wahpeton, North Dakota.

Peter Christianson has been our President and a director since January 2003 and our Chief Financial Officer since August 2007. Prior to joining us and since 1988, he was a partner and owner of C.I. Farm Power, Inc., the operator of two of the dealership locations acquired by Titan Machinery LLC in 2002. Peter Christianson and Ted Christianson are brothers.

Ted Christianson has been our Vice President, Finance and Treasurer since August 2007 and was previously our Chief Financial Officer from 2003 until August 2007. Mr. Christianson has spent over 15 years with startups and high growth companies in a variety of financial management roles, including as chief financial officer. Mr. Christianson was the full-time Managing Partner for Adam Smith Properties, a private real estate development company from 1997 to 2003. Mr. Christianson was formerly with US Bank (First Bank System).

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

Our common stock began trading on December 6, 2007 on the Nasdaq Global Market under the symbol "TITN" in connection with our initial public offering. The following table sets forth, for the periods indicated, the high and low sale prices of our common stock as reported by the Nasdaq Global Market.

	High	Low
Fiscal 2008		
Fourth Quarter (from December 6, 2007)	\$ 18.50	\$ 9.48
Fiscal 2009		
First Quarter	\$ 24.50	\$ 14.66
Second Quarter	\$ 34.49	\$ 17.59
Third Quarter	\$ 28.17	\$ 9.53
Fourth Quarter	\$ 16.20	\$ 7.75

As of April 1, 2009, there were approximately 57 record holders of our common stock, excluding holders whose stock is held either in nominee name and/or street name brokerage accounts.

DIVIDENDS

We have not historically paid any dividends on our common stock and do not expect to pay cash dividends on our common stock in the foreseeable future. Payment of future cash dividends, if any, will be at the discretion of our board of directors after taking into account various factors, including our financial condition, operating results, current and anticipated cash needs, outstanding indebtedness and plans for expansion and restrictions imposed by lenders, if any. Currently, our credit facilities restrict our ability to pay cash dividends. Upon the consummation of our initial public offering on December 11, 2007, we paid accrued cash dividends in the aggregate amount of \$441,028 in connection with the conversion of all of our outstanding preferred stock.

UNREGISTERED SALES OF EQUITY SECURITIES

We did not have any unregistered sales of equity securities during the fourth quarter of fiscal 2009.

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

For information on our equity compensation plans, refer to Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters."

REPURCHASES

We did not engage in any repurchases of our Common Stock during the fiscal year ended January 31, 2009.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The data given below as of and for each of the five years in the period ended January 31, 2009, has been derived from the Company's Audited Consolidated Financial Statements. In order to understand the effect of accounting policies and material uncertainties that could affect our presentation of financial information, such data should be read in conjunction with the Company's Consolidated Financial Statements and Notes thereto included under Item 8 to this Form 10-K and in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operation included under Item 7 to this Form 10-K.
