Check whether the registrant filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Exchange Act after the distribution of securities under a plan confirmed by a court. Yes  No

As of February 10, 2005, 16,384,061 shares of Common Stock of the Issuer were outstanding.

Transitional Small Business Disclosure Format (Check one): Yes  No

## Part I -- Financial Information

## Item 1. Financial Statements

The consolidated financial statements included herein have been prepared by Torrent Energy Corporation (the "Company") without audit, pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to such SEC rules and regulations. In the opinion of the Company, the accompanying statements contain all adjustments necessary to present fairly the financial position of the Company as of December 31, 2004, and its results of operations for the nine month periods ended December 31, 2004 and 2003 and its cash flows for the nine month periods ended December 31, 2004 and 2003. The results for these interim periods are not necessarily indicative of the results for the entire year. The accompanying financial statements should be read in conjunction with the financial statements and the notes thereto filed as a part of the Company's annual report on Form 10-KSB.

Note: EXCEPT WHERE AND AS OTHERWISE STATED TO THE CONTRARY IN THIS QUARTERLY REPORT, ALL SHARE, PRICES PER SHARE AND EXERCISE PRICES HAVE BEEN ADJUSTED TO GIVE RETROACTIVE EFFECT TO THE CHANGE IN THE PRICE PER SHARE OF THE COMMON STOCK RESULTING FROM THE ONE-FOR-TEN SHARE CONSOLIDATION OF THE COMMON STOCK THAT TOOK EFFECT ON JANUARY 20, 2004.

TORRENT ENERGY CORPORATION

(formerly Scarab Systems, Inc.)  
(An exploration stage enterprise)

Notes to Consolidated Financial Statements

(Unaudited and Prepared by Management)

1. Incorporation and Continuance of Operations

Torrent Energy Corporation (the "Company" or "Torrent") is an exploration stage company that, pursuant to shareholder approval on July 13, 2004, changed its name from Scarab System, Inc.

Torrent was formed by the merger of Scarab Systems, Inc., a Nevada corporation into iRV, Inc., a Colorado corporation. Scarab Systems, Inc. (Nevada) was a privately owned Nevada corporation that was incorporated on October 8, 2001. The effective date of the merger transaction between Scarab Systems, Inc. (Nevada) and iRV, Inc. was July 17, 2002. Subsequent to completion of the reorganization, Scarab Systems, Inc. (Nevada) transferred all its assets and liabilities to iRV, Inc. and ceased operations. The directors and executive officers of iRV, Inc. were subsequently reconstituted. iRV, Inc. changed its name to Scarab Systems, Inc. on March 24, 2003. The corporate charter of Scarab Systems Inc. (Nevada) was revoked in 2002. The Company was initially providing services to the e-commerce industry but ceased all activity in the e-commerce industry by the end of the fiscal year ended March 31, 2003.

On January 30, 2002, the Company was given two options in fiscal year 2002 to acquire all the issued and outstanding shares of 485017 B.C. Ltd., a British Columbia company doing business as MarketEdge Direct ("MED"), as security against a subscription receivable of \$337,500 for 675,000 shares from the shareholders of MED. MED was in the business of providing a wide range of marketing products and services. Effective August 7, 2002, the Company exercised both of the options and acquired all the issued and outstanding shares of MED. Due to disappointing financial results of MED, on March 28, 2003, the Company entered into an agreement with the former shareholders of MED to sell MED back to them. As a result, all the issued and outstanding shares of MED that the Company acquired were sold back to the former MED shareholders for the return to treasury of 540,000 of its common shares.

On March 28, 2003, the Company acquired all the issued and outstanding shares of Catalyst Technologies, Inc., a British Columbia corporation ("Catalyst"). Catalyst is a Vancouver based, web design and Internet application developer. Catalyst specializes in the development of web-sites and Internet software design, primarily for the Health and Nutraceutical industry. The acquisition of Catalyst was treated as a non-material business combination in the

fiscal year 2003 and the Company abandoned Catalyst during the fiscal year ended March 31, 2004 due to a lack of working capital and disappointing financial results.

On April 30, 2004, Torrent incorporated an Oregon subsidiary company named Methane Energy Corp. ("Methane") in anticipation of acquiring oil and gas properties in the State of Oregon.

On May 11, 2004, Methane entered into a Lease Purchase and Sale Agreement (the "Agreement") with GeoTrends-Hampton International LLC ("GHI") to purchase GHI's undivided working interest in certain oil and gas leases for the Coos Bay Basin prospect located onshore in the Coos Bay Basin of Oregon. To acquire these oil and gas leases, the Company paid a total of \$300,000 in cash and will issue 1,800,000 restricted common shares in three performance based tranches. The agreement closed on June 22, 2004. On closing, the Company paid \$100,000 of the cash and 600,000 of the common shares. During the quarter ended September 30, 2004, the Company paid the remaining \$200,000 so that the cash consideration is fully paid.

-8-

## TORRENT ENERGY CORPORATION

(formerly Scarab Systems, Inc.)  
(An exploration stage enterprise)

### Notes to Consolidated Financial Statements

(Unaudited and Prepared by Management)

Pursuant to the GHI Agreement, the Company acquired leases of certain properties in the Coos Bay area of Oregon which are prospective for oil and gas exploration and cover approximately 50,000 acres. On July 1, 2004, we leased an additional 10,400 acres within the Coos Bay Basin in Oregon. With this additional acreage the total land position held by us now exceeds 60,000 acres. The Company is pursuing the leasing of additional properties in the Coos Bay area.

On August 20, 2004, by unanimous consent of the board of directors, the Company created a class of Series B Convertible Preferred Stock (the "Series B Stock"). The Series B Stock consists of 5,000 shares with a par value \$0.01 per share and have certain special rights and restrictions, including conversion to common stock at the lower of \$1.20 and the 10 day weighted average trading price of our common stock. The Series B Stock became effective on August 24, 2004 with the filing of Articles of Amendment with the Colorado Secretary of State. We issued 2,200 Series B Stock on August 27, 2004, with effect from August 24, 2004.

On September 21, 2004, Mark Gustafson was hired as the new Chief Executive Officer of the Company. He was also appointed as director of the Company.

On November 16, 2004, the Company's subsidiary, Methane, commenced a multi-hole coring program on its oil and gas leases in Coos County, Oregon.

The consolidated financial statements presented are those of Torrent and its wholly-owned subsidiary Methane. Collectively, they are referred to herein as the "Company". Significant intercompany balances and transactions have been eliminated.

## 2. Significant Accounting Policies

### Basis of Presentation

The accompanying consolidated financial statements of the Company are unaudited and include, in the opinion of management, all normal recurring adjustments necessary to present fairly the consolidated balance sheet as of December 31, 2004, and the related statements of operations and cash flows for the periods presented. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. These consolidated financial statements should be read in conjunction with the Company's audited financial statements and the related notes thereto included in the Company's Form 10-KSB filed with the Securities and Exchange Commission.

#### Oil and Gas Properties

The Company utilizes the full cost method to account for its investment in oil and gas properties. Accordingly, all costs associated with acquisition, exploration and development of oil and gas reserves, including such costs as leasehold acquisition costs, capitalized interest costs relating to unproved properties, geological expenditures, tangible and intangible development costs including direct internal costs are capitalized to the full cost pool. As of December 31, 2004, the Company has no properties with proven reserves. When the Company obtains proven oil and gas reserves, capitalized costs, including estimated future costs to develop the reserves and estimated abandonment costs, net of salvage, will be depleted on the units-of-production method using estimates of proved

-9-

#### TORRENT ENERGY CORPORATION

(formerly Scarab Systems, Inc.)  
(An exploration stage enterprise)

#### Notes to Consolidated Financial Statements

(Unaudited and Prepared by Management)

reserves. Investments in unproved properties and major development projects including capitalized interest, if any, are not amortized until proved reserves associated with the projects can be determined. If the future exploration of unproved properties are determined uneconomical the amount of such properties are added to the capitalized cost to be amortized. As of December 31, 2004, all of the Company's oil and gas properties were unproved and were excluded from amortization. At December 31, 2004, none of the Company's unproved oil and gas properties were considered impaired.

The capitalized costs included in the full cost pool are subject to a "ceiling test", which limits such costs to the aggregate of the estimated present value, using a ten percent discount rate, of the future net revenues from proved reserves, based on current economic and operating conditions and estimated value of proven properties. No impairment existed as of December 31, 2004.

Sales of proved and unproved properties are accounted for as adjustments of capitalized costs with no gain or loss recognized, unless such adjustments would significantly alter the relationship between capitalized costs and proved reserves of oil and gas, in which case the gain or loss is recognized in the statement of operations.

#### Stock Based Compensation

The Company has adopted the disclosure-only provisions of SFAS No. 123, "Accounting for Stock-based Compensation", as amended by SFAS No. 148 "Accounting for Stock-based Compensation - Transition and Disclosure - An amendment of SFAS No. 123". SFAS No. 123 encourages, but does not require, companies to adopt a fair value based method for determining expense related to stock-based compensation. The Company accounts for

stock-based compensation issued to employees and directors using the intrinsic value method as prescribed under Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" and related interpretations.

The Company initiated a 2004 Non-Qualified Stock Option Plan (the "Plan"). Since inception of the plan, the Company has granted 1,800,000 stock options to non-employees and directors of the Company. In addition, the Company has granted an additional 600,000 stock options to non-employees outside of the Plan.

#### Recent Accounting Pronouncements

A reporting issue has arisen regarding the application of certain provisions of SFAS No. 141 and SFAS No. 142 to companies in the extractive industries, including oil and gas companies. The issue is whether SFAS No. 142 requires registrants to classify the costs of oil and gas rights held under lease or other contractual arrangement associated with extracting oil and gas as intangible assets in the balance sheet, apart from other capitalized oil and gas property costs, and provide specific footnote disclosures. Historically, the Company has included the costs of such oil and gas rights associated with extracting oil and gas as a component of oil and gas properties. If it is ultimately determined that SFAS No. 142 requires oil and gas companies to classify costs of oil and gas rights held under lease or other contractual arrangement associated with extracting oil and gas as a separate intangible assets line item on the balance sheet, the Company would be required to reclassify approximately \$784,583 at December 31, 2004 and \$nil at March 31, 2004 out of oil and gas properties and into a separate intangible assets line item. The Company's cash flows and results of operations would not be affected since such intangible assets would continue to be depleted and assessed for impairment in accordance with full-cost accounting rules.

-10-

#### TORRENT ENERGY CORPORATION

(formerly Scarab Systems, Inc.)  
(An exploration stage enterprise)

#### Notes to Consolidated Financial Statements

(Unaudited and Prepared by Management)

In April 2004, the EITF released Issue No. 03-06, *Participating Securities and the Two Class Method under SFAS No. 128, Earnings per Share*, which addressed a number of questions regarding the computation of earnings per share by companies that have issued securities other than common stock that contractually entitle the holder to participate in dividends and earnings of the company when, and if, it declares dividends on its common stock. It requires that undistributed earnings for the period be allocated to a participating security based on the contractual participation rights of the security to share in those earnings as if all the earnings for the period had been distributed in calculating earnings per share. EITF Issue No. 03-06 is effective for fiscal periods beginning after March 15, 2004. It requires that prior period earnings per share amounts be restated to ensure comparability year over year. The adoption of EITF Issue No. 03-06 did not have an impact on the Company's financial statements.

In November 2004, the FASB issued SFAS No. 151, "Inventory Costs-an amendment of ARB No. 43, Chapter 4", which is the result of the FASB's project to reduce differences between U.S. and international accounting standards. SFAS No. 151 requires idle facility costs, abnormal freight, handling costs, and amounts of wasted materials (spoilage) be treated as current-period costs. Under this concept, if the costs associated with the actual level of spoilage or production defects are greater than the costs associated with the range of normal spoilage or defects, the difference would be charged to current-period expense, not included in inventory costs. SFAS No. 151 will be effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The adoption of SFAS No. 151 will not have a material impact on the Company's financial statements.

In December 2004, the FASB issued SFAS No. 153, *Exchanges of Nonmonetary Assets, an amendment of APB No. 29, Accounting for Nonmonetary Transactions*. SFAS No. 153 requires exchanges of productive assets to be accounted for at fair value, rather than at carryover basis, unless (1) neither the asset received nor the asset surrendered has a fair value that is determinable within reasonable limits or (2) the transactions lack commercial substance. SFAS 153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. The adoption of FASB No. 153 will not have a material impact on the Company's financial statements.

In December 2004, the FASB issued SFAS No. 123(R), "Accounting for Stock-Based Compensation". SFAS 123(R) establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. This Statement focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. SFAS 123(R) requires that the fair value of such equity instruments be recognized as expense in the historical financial statements as services are performed. Prior to SFAS 123(R), only certain pro-forma disclosures of fair value were required. SFAS 123(R) shall be effective for the Company as of the beginning of the first interim or annual reporting period that begins after December 15, 2005. The adoption of FASB No. 123(R) will not have a material impact on the Company's financial statements.

### 3. Going Concern

These financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America applicable to a going concern which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The general business strategy of the Company is to explore its newly-acquired oil and gas properties. The Company has incurred operating losses and requires additional funds to meet its obligations and maintain its operations. Management's plan in this regard is to raise equity financing as required. These conditions raise substantial doubt about the Company's ability to continue as a going concern. These financial statements do not include any adjustments that might result from this uncertainty.

TORRENT ENERGY CORPORATION

(formerly Scarab Systems, Inc.)  
(An exploration stage enterprise)

Notes to Consolidated Financial Statements

(Unaudited and Prepared by Management)

#### 4. Related Party Transactions

During the nine month period ended December 31, 2004, the Company paid or accrued \$103,875 in consulting fees to directors and officers of the Company, as compared to \$59,413 during the nine months ended December 31, 2003. In addition, the Company paid officers and directors of the Company \$66,330 for consulting fees relating to the Company's oil and gas leases and \$43,200 for geological and geophysical consulting fees, both of which are included in the costs of the oil and gas properties. At December 31, 2004 and March 31, 2004, there was \$35,173 and \$nil, respectively, in accounts payable and accrued liabilities that are owing to related parties.

On December 1, 2004, the Company entered into a consulting agreement with MGG Consulting to provide for services as the Chief Executive Officer and acting Chief Financial Officer. The Company is committed to pay \$8,000 per month unless terminated at any time by either party upon written notice. MGG is wholly owned by Mark Gustafson, president and director of our company.

#### 5. Oil and Gas Properties, Unproven

The total costs incurred and excluded from amortization are summarized as follows:

At December 31, 2004, all of the Company's oil and gas properties are considered unproven. Based on the status of the Company's exploration activities, management has determined that no impairment has occurred.

#### 6. Stock Options

Edgar Filing: TORRENT ENERGY CORP - Form 10QSB

As at December 31, 2004, the Company had 200,000 stock options outstanding under the 2004 Non-Qualified Stock Option Plan (the "Plan") with an exercise price of \$0.50. There are no further stocks options eligible to be granted under the Plan.

During the quarter ended December 31, 2004, the Company granted an additional 600,000 stock options outside of the Plan. This included an option to purchase 200,000 common shares at \$1.00 per share and another 200,000 common shares at \$2.00 per share until November 1, 2005 pursuant to a Mail Distribution Agreement with a third party. These options have a cashless exercise provision whereby the optionor can elect to receive common stock in lieu of paying cash for the options based on a formula that includes using the average closing prices of the five

-12-

TORRENT ENERGY CORPORATION

(formerly Scarab Systems, Inc.)  
(An exploration stage enterprise)

Notes to Consolidated Financial Statements

(Unaudited and Prepared by Management)

trading days preceding the exercise date. In addition, the Company granted a consultant the option to purchase 200,000 common shares at \$0.83 per share pursuant to a consulting agreement for public and investor relations with a third party. Twenty-five percent of the options to the investor relations consultant vest immediately and twenty-five percent vest every quarter thereafter. Either party may terminate the investor relations agreement with thirty days written notice.

During the nine months ended December 31, 2004, compensation costs of \$821,049 were recorded in the statements of operations and deficit for options granted by the Company. The compensation costs recorded were calculated using the Black-Scholes option pricing model.

The fair value of share options used to calculate compensation expense has been estimated using the Black-Scholes option pricing model with the following assumptions:

The weighted average fair value of options granted during the nine months ended December 31, 2004 is \$0.55 (2003 - \$nil) each.

#### 7. Warrants

In connection with the sale of common stock during the three months ended June 30, 2004, the Company issued warrants to purchase 1,442,930 shares of common stock at \$0.50 per share exercisable until May 19, 2006. Using the Black-Scholes valuation model, the fair value of these warrants was estimated at \$221,373 and has been included in additional paid in capital.

In connection with the sale of common stock during the three months ended September 30, 2004, the Company issued warrants to purchase 500,000 shares of common stock at \$0.55 per share exercisable until July 7, 2006. Using the Black-Scholes valuation model, the fair value of these warrants was estimated at \$128,347 and has been included in additional paid in capital.

## TORRENT ENERGY CORPORATION

(formerly Scarab Systems, Inc.)  
(An exploration stage enterprise)

### Notes to Consolidated Financial Statements

(Unaudited and Prepared by Management)

#### 8. Series B Convertible Preferred Stock ("Series B Stock")

On August 27, 2004, the Company closed a private placement in its Series B Stock for up to \$2,200,000 in gross proceeds (the "Private Placement"). The Series B Stock is convertible into common stock at any time by dividing the dollar amount being converted by the lower of \$1.20 or 80% of the lowest volume weighted average trading price per common share of our Company for 10 trading days. The holder of the Series B Stock may only convert up to \$250,000 of Series B Stock into common shares in any 30 day period. The Company may redeem the Series B Stock by paying 120% of the invested amount together with any unpaid dividends. As a condition of the Private Placement, the Company agreed to file a registration statement registering up to 5,000,000 shares of common stock (the "Registration Statement") in order to receive all of the proceeds of the Private Placement.

Each share of Series B Stock will be automatically converted into common stock immediately upon the consummation of the occurrence of a stock acquisition, merger, consolidation, or reorganization of the Company.

The gross proceeds of the Private Placement has been received as follows:

- (i) \$1,100,000 was paid on closing (received);
- (ii) \$550,000 on the fifth business day following the filing date of the Registration Statement (received); and
- (iii) \$550,000 on the fifth business day following the effective date of the Registration Statement (received subsequent to quarter end).

Net proceeds received as of December 31, 2004, was \$1,440,000 after payment of \$165,000 in finders' fees (10% of gross proceeds) and \$45,000 in legal fees. The transaction resulted in a beneficial conversion feature calculation in accordance with EITF 98-5 "Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios", of \$315,244 which will be accreted over nine months commencing October 1, 2004. The Company recorded an accretion expense of \$105,081 for the nine months ended December 31, 2004.

Subsequent to the quarter end, the Company received the last payment of \$550,000 and the Company paid \$55,000 in finders' fees for net proceeds of \$495,000.

#### 9. Shareholder Loan

During the quarter ended December 31, 2004, the Company received proceeds of \$80,000 pursuant to a shareholder loan. The loan was to be repaid by January 22, 2005 or the Company would be required to pay interest at 12% per annum. If the loan was repaid prior to January 22, 2005, the loan would bear no interest. Subsequent to the quarter ended December 31, 2004 and on January 17, 2005, the shareholder loan was repaid in full with no interest.

-14-

## TORRENT ENERGY CORPORATION

(formerly Scarab Systems, Inc.)  
(An exploration stage enterprise)

### Notes to Consolidated Financial Statements

(Unaudited and Prepared by Management)

#### 10. Commitments

On October 1, 2004, the Company entered into a consulting agreement for public and investor relations with a third party. The Company is committed to pay \$5,000 per month for the service for the term of one year. Either party may terminate the agreement with thirty days written notice.

On December 1, 2004, the Company entered into a consulting agreement with MGG Consulting to provide for services as the Chief Executive Officer and acting Chief Financial Officer. The Company is committed to pay \$8,000 per month unless terminated at any time by either party upon written notice. MGG is wholly owned by Mark Gustafson, president and director of our company.

#### 11. Subsequent Events

Subsequent to the quarter ended December 31, 2004, the Company received the last payment of the proceeds of the Series B private placement. The Company received \$495,000 which represents the last payment of \$550,000, less \$55,000 in finders' fees. The net amount was included as subscription receivable as at December 31, 2004.

Subsequent to the quarter ended December 31, 2004, and pursuant to the Lease Purchase and Sale Agreement to purchase certain oil and gas leases for the Coos Bay Basin exploration prospect, the Company made its second common share installment and issued an additional 600,000 common shares.

Subsequent to the quarter ended December 31, 2004, the shareholder loan in the amount of \$80,000 was repaid in full.

Subsequent to the quarter ended December 31, 2004, the holder of the Series B Stock notified the Company of its intention to exercise \$100,000 worth of Series B Stock to common stock. The conversion price was \$0.78 per share resulting in the issuance of 127,812 shares of our common stock and the cancellation of 100 shares of Series B Stock.

-15-

## Item 2. Management's Discussion and Analysis or Plan of Operations

### FORWARD LOOKING STATEMENTS

The information in this discussion contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These

forward-looking statements involve risks and uncertainties, including statements regarding the Company's capital needs, business strategy and expectations. Any statements contained herein that are not statements of historical facts may be deemed to be forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "may", "will", "should", "expect", "plan", "intend", "anticipate", "believe", "estimate", "predict", "potential" or "continue", the negative of such terms or other comparable terminology. Actual events or results may differ materially. In evaluating these statements, you should consider various risk factors in other reports the Company files with the SEC, including the Company's prospectus dated January 19, 2005 and the Company's Annual Report on Form 10-KSB for the year ended March 31, 2004. These factors may cause the Company's actual results to differ materially from any forward-looking statement. The Company disclaims any obligation to publicly update these statements, or disclose any difference between its actual results and those reflected in these statements. The information constitutes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

#### Overview

Torrent Energy Corporation is engaged in the acquisition, exploration and if and when warranted, development of unconventional natural gas niche opportunities with primarily a North American focus. Our current project is the development of the Coos Bay Basin in Oregon.

We have been in the exploration or development stage since our inception. We have had no operating revenue to date, have accumulated losses of \$3,054,657 and will require additional working capital to sustain our operations and carry out our exploration objectives. These circumstances raise substantial doubt as to our ability to continue as a going concern.

We are currently reviewing various financing alternatives, including the possibility of an additional private equity offering. There can be no assurance, however, that such financings will be available to us or, if it is, that it will be available on terms acceptable to us. If we are unable to obtain the financing necessary to support our operations, we may be unable to continue as a going concern.

We currently have no facilities and no employees.

#### Current Business

On May 11, 2004, we entered into a Lease Purchase and Sale Agreement (the "Agreement") with GeoTrends-Hampton International LLC ("GHI") to purchase certain oil and gas leases for the Coos Bay Basin exploration prospect located onshore in the Coos Bay Basin of Oregon, through our subsidiary, Methane Energy Corp. ("Methane"). GHI is a Washington limited liability company that owned the rights to a coalbed methane gas exploration prospect in the Coos Bay Basin of Oregon, including technical information on this prospect, fee leases, State leases, lease options and agreements controlling oil and gas rights covering approximately 50,000 acres.

Pursuant to the Agreement, we, through Methane, have acquired all of GHI's petroleum and natural gas rights in and to a number of oil and gas leases (the "Leases") for the Coos Bay Basin exploration prospect. As consideration for the rights in and to the Leases, we paid to GHI an aggregate of \$300,000 in cash and will issue 1,800,000 shares of our common stock in the following installments:

-16-

First common share installment: On the closing of the Agreement, we issued to GHI 450,000 and to Thomas Deacon 150,000 of our common shares. Thomas Deacon is an operator who worked with GHI in assembling the leases purchased by Methane and became the Vice President of Land of Methane in August of 2004.

Second common share installment: Due to the spudding of the initial well of the core test program, we issued to GHI an additional 450,000 and to Thomas Deacon 150,000 of our common shares in January of 2005.

Third common share installment: Upon Methane and/or our agents or contractors spudding of the initial well of the state approved development drilling program within, on or under the lands as permitted by the Leases, we will issue to GHI the final 450,000 and to Thomas Deacon 150,000 of our common shares. However, if such drilling is not commenced by June 30, 2006, then the parties will have no further rights or obligations under the Agreement.

GHI delivered to us an assignment of 100% of the petroleum and natural gas lease rights it controlled subject only to royalty and overriding royalty interests of record on the closing date. GHI reserved to itself an undivided 4% of 8/8ths overriding royalty interest in the lands covered by the Leases, and all production therefrom. This reservation of overriding royalty interest will also apply to any oil and gas leases acquired within an area of mutual interest of both GHI and us and will be free and clear of any cost and expense of the development, operation and marketing of production from the Leases, except for taxes applicable.

On July 1, 2004, we leased an additional 10,400 acres within the Coos Bay Basin in Oregon. With this additional acreage the total land position held by us now exceeds 60,000 acres. We continue to identify and negotiate the leasing of additional acreage in the area.

On October 6, 2004, we signed a Drilling Services Agreement with a Utah based drilling company which has extensive drilling and consulting experience in coalbed methane in order to commence a multi-hole coring program on our Leases. The multi-hole coring program commenced in November and is expected to take approximately four months in order to properly complete the coring and sampling process. The analysis of the coring samples should be complete within sixty days of the entire coring program being finished. The coring locations were chosen in order to further confirm and delineate the gas content data in the Coos County coal beds and to assist us in determining the positioning of our potential pilot test well programs anticipated next year.

#### Coalbed Methane Overview

Coalbed methane is the natural gas that lies trapped in coal seams at shallow depths. It is different from other resources because it is both generated and stored within the actual coalbeds themselves. It is also an attractive resource because it occurs within coal, which is the most abundant fuel in the United States. Coal acts like a sponge, storing up to six times the amount of natural gas found in conventional reservoirs.

Over the past 20 years, coalbed methane production has increased steadily due to its abundance, relatively low cost of drilling at shallow depths, improved technology and the growing demand for natural gas.

The success of recent coalbed methane projects has been largely due to improved drilling and completion techniques, better hydraulic fracture designs and significant cost reductions as a result of highly dependable gas content and reservoir performance analysis. Also spurring the growth of this sector is the growing shortage of quality domestic conventional natural gas projects and production declines from existing conventional reservoirs.

#### Location of the Coos Bay Basin Exploration Prospect

The Coos Bay Basin is located along the Pacific coast in southwestern Oregon approximately 200 miles south of the Columbia River and 80 miles north of the California border. The onshore portion of the Coos Bay Basin is elliptical in outline covering over 250 square miles.

Based on existing data, it is estimated that up to 100,000 acres in the Coos Bay Basin are potentially prospective for coal bed methane and conventional natural gas production. The Leases acquired by us include oil and gas leases, lease option agreements or other exploration commitments covering over 60,000 net oil and gas acres within the primary Coos Bay Basin Exploration Prospect area of mutual interest.

Year-round access is excellent via logging and fire control roads maintained by the United States Forest Service and timber industry. Numerous potential drill site locations have already been constructed as timber recovery staging areas, and are available to be utilized in the initial testing phase of our planned 2004 drill program.

The Coos Bay Basin is a structural basin formed by folding and faulting that preserves a portion of coal-bearing sediments deposited on an extensive, middle Eocene-age, swampy coastal plain. The coal-bearing sandstones and siltstones of the Upper Eocene Coaledo formation are estimated to form a section approximately 6,600 feet thick. The Basin has multiple seams of coal, many of which contain coalbed methane. However, the state of Oregon has to date produced no commercial quantities of coalbed methane gas.

#### Natural Gas Market

The Port of Coos Bay and surrounding area is one of the largest population centers on the west coast not currently served by natural gas. A project to bring natural gas into the region via pipeline has recently been completed and is now operational. The local distribution company serving this market has already constructed mains and many services in the area. It is anticipated that this pipeline will provide a ready market for gas from the Coos Bay Basin project. The pipeline will be connected to the Northwest Pipeline system, allowing access to the potentially lucrative Pacific Northwest markets.

#### Plan of Operations

#### Land Acquisition

We currently lease approximately 60,000 acres in the Coos Bay Basin and have identified approximately 30,000 to 40,000 additional acres falling within the Coos Bay Basin Prospect. Our objective is to achieve a land lease position of 80,000 to 100,000 acres, although there is no assurance that we can reach that goal.

#### Exploration of the Coos Bay Project

We are planning an aggressive drilling and exploration program in the Coos Bay Basin. Based on existing raw data, which provides substantial subsurface information, we began a core hole drilling program in November of 2004. These core holes will be drilled at depths ranging from 1,000 to 4,000 feet. It is expected to take approximately four months to complete the coring program. If commercial gas resource estimates can be verified, production testing should follow with full pilot test well programs in mid to late 2005.

#### Estimated timeline over the next twelve months

January 2005 to April 2005	-Bulk of additional land acquisitions completed within the area of mutual interest.
November 2004 to February 2005	-Complete multi-hole coring program.
March 2005 to April 2005	-Assess coring program results.

Late Summer to Fall of 2005 -Potentially commence pilot well drilling and testing.

The continuation of our business is dependent upon obtaining further financing, a successful program of acquisition, positive results of exploration, and, finally, achieving a profitable level of operations. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of our current stockholders.

-18-

There are no assurances that we will be able to obtain further funds required for our continued operations. As noted herein, we are pursuing various financing alternatives to meet our immediate and long-term financial requirements. There can be no assurance that additional financing will be available when needed or, if available, that it can be obtained on commercially reasonable terms. If we are not able to obtain the additional financing on a timely basis, we will be unable to conduct our operations as planned, and we will not be able to meet our other obligations as they become due. In such event, we will be forced to scale down or perhaps even cease our operations. Further, there can be no assurance that our exploration will result in any commercial findings of oil and gas, or any findings at all.

#### Results of Operations

The results of operations include the results of Torrent and its wholly owned subsidiary, Methane, for the nine months ended December 31, 2004 and Torrent and its wholly owned subsidiary, Catalyst, for the nine months ended December 31, 2003. During the nine months ended December 31, 2004, Torrent performed all of the administrative operations while the subsidiary, Methane, holds the interests in the leases and operates the Coos Bay project.

For the Three Months Ended December 31, 2004 Compared to the Three Months Ended December 31, 2003

#### Operating Expenses

. Operating expenses rose considerably between the periods due to our increased activity compared to the prior period when we had no operations. During the three months ended December 31, 2004, we continued drilling on the first three core holes in our multi-hole program in Coos Bay Basin of Oregon. Operating expenses consisted of consulting fees, investor relation's expenses, accounting and legal fees, stock based compensation and other general corporate expenses.

Operating expenses were \$1,054,377 for the three months ended December 31, 2004, compared with \$32,724 for the three months ended December 31, 2003. A significant portion of the increase in expenditures was due to investor relation's expenses of \$465,000 for the three months ended December 31, 2004. Investor relations expenses consisted of fees of \$450,000 for a mail distribution pursuant to an agreement to provide a shareholder awareness program and \$15,000 pursuant to an agreement for public and investor relations at \$5,000 per month.

We recorded \$105,081 for accretion expenses related to the beneficial conversion feature on the Series B preferred shares. We are accreting the preferred stock discount over a nine month period commencing October 1, 2004.

Consulting fees were \$40,100 for the three months ended December 31, 2004, compared with \$20,520 for the three months ended December 31, 2003. During the current period, the consulting services related to the ongoing administration of our new office in Oregon for our Coos Bay project. During the comparative period in 2003, consultants were engaged to sustain our minimum operations.

Net Loss for the Period.

We recorded a net loss of \$1,053,514 for the three months ended December 31, 2004, compared with a net loss of \$32,724 for the three months ended December 31, 2003.

For the Nine Months Ended December 31, 2004 Compared to the Nine Months Ended December 31, 2003

#### Operating Expenses

. Operating expenses were \$2,172,366 for the nine months ended December 31, 2004, compared with \$94,386 for the nine months ended December 31, 2003 when we had no operations. A significant portion of the increase was attributable to the recording of \$821,049 in stock based compensation during the nine months ended December 31, 2004, compared with no such expense for the nine months ended December 31, 2003. The stock based compensation expense consisted of a charge of \$659,049 relating to the granting of 1,340,000 stock options to consultants and directors during the current period and a charge of \$162,000 relating to the issuance of 300,000 shares of our common stock pursuant to an investor relations agreement to provide an investor awareness program for a period of one year.

-19-

Insurance expenses were \$47,569 for the nine months ended December 31, 2004 compared to no such expense for the nine months ended December 31, 2003. We were required to have pollution liability coverage and a drilling permit bond in order to secure certain leases and commence the drill core program.

Shareholder relation expenses were \$85,463 during the nine months ended December 31, 2004 and consisted of costs associated with disseminating press releases, costs of the transfer agent and the costs of designing and maintaining of our website, [www.torrentenergy.com](http://www.torrentenergy.com). This compares with \$3,599 in shareholder relations expenses for the comparative period in 2003 when we were relatively inactive.

Legal and accounting costs rose during the periods primarily as a result of increased legal fees to negotiate and close several financings and the acquisition of certain oil and gas leases. As a result, our legal and accounting costs rose to \$75,997 for the nine months ended December 31, 2004, compared to \$13,261 for the nine months ended December 31, 2003 primarily for audit fees.

During the nine months ended December 31, 2004, we investigated a potential oil and gas property acquisition and made a \$100,000 deposit and spent \$3,310 on technical due diligence. We have since decided not to purchase the property and have written off the deposit for accounting purposes but continue to seek repayment of our deposit.

#### Net Loss for the Period.

We recorded a net loss of \$2,171,340 for the nine months ended December 31, 2004, compared with a net loss of \$94,386 for the nine months ended December 31, 2003.

#### Liquidity and Capital Resources

Our cash on hand was \$105,807 as at December 31, 2004 compared to \$12,621 at March 31, 2004. Our working capital deficit increased to \$173,011 as at December 31, 2004, from \$15,261 as at March 31, 2004.

During the nine months ended December 31, 2004, we received net proceeds of \$769,025 from the issuance of common stock and net proceeds of \$1,440,000 (gross proceeds of \$1,650,000 less finders' fees of \$165,000 and legal fees of \$45,000) from the issuance of our preferred stock. This compares with no such capital proceeds during the nine months ended December 31, 2003 when we were inactive.

During the nine months ended December 31, 2004, we expended cash of \$1,121,565 on our Coos Bay project. This included \$305,562 in acquisition costs, including the \$300,000 cash payments to GHI, \$287,990 in lease costs to secure the oil and gas rights, \$42,388 for the purchase of existing seismic data in Coos Bay, drilling costs of \$434,915 for the drill-core program and \$50,710 for geological and geophysical consulting fees. During the comparative period, we made no such investments as we were inactive.

We are not required to make any further lease payments pursuant to our oil and gas leases, until after our next year end of March 31, 2005.

We will require additional financing in order to complete our stated plan of operations for the next twelve months. We believe that we will require additional financing to carry out our intended objectives during the next twelve months. There can be no assurance, however, that such financing will be available or, if it is available, that we will be able to structure such financing on terms acceptable to us and that it will be sufficient to fund our cash requirements until we can reach a level of profitable operations and positive cash flows. If we are unable to obtain the financing necessary to support our operations, we may be unable to continue as a going concern. We currently have no firm commitments for any additional capital.

READERS SHOULD REFER TO RISK FACTORS SET OUT IN THE PROSPECTUS WE FILED JANUARY 19, 2005 TO SEE RISK FACTORS THAT COULD AFFECT AND SUBSTANTIALLY ALTER OUR PLAN OF OPERATION AND IMPAIR OUR COMPANY.

-20-

### Item 3. Controls and Procedures

#### Evaluation of Disclosure Controls and Procedures:

As of December 31, 2004, the Company's management carried out an evaluation, under the supervision of the Company's Chief Executive Officer and the Chief Financial Officer of the effectiveness of the design and operation of the Company's system of disclosure controls and procedures pursuant to the Securities and Exchange Act, Rule 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective, as of the date of their evaluation, for the purposes of recording, processing, summarizing and timely reporting material information required to be disclosed in reports filed by the Company under the Securities Exchange Act of 1934.

#### Changes in internal controls:

There were no changes in internal controls over financial reporting, known to the Chief Executive Officer or Chief Financial Officer that occurred during the period covered by this report that has materially affected, or is likely to materially effect, the Company's internal control over financial reporting.

-21-

## Part II. Other Information

### Item 1. Legal Proceedings

We are not a party to any material legal proceedings and to our knowledge, no such proceedings are threatened or contemplated. However, we have threatened litigation for return of a \$100,000 deposit placed on an oil and gas

working interest prospect.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On January 27, 2005 we issued 600,000 shares to two investors pursuant to our Lease Purchase Agreement dated May 11, 2004. We issued these shares in reliance upon Rule 506 of Regulation D of the Securities Act of 1933.

Item 3. Default upon Senior Notes

Not applicable

Item 4. Submission of Matters to a Vote of Security Holders

Not applicable

Item 5. Other Information

None.

Item 6. Exhibits

(a)	Exhibit	Description
	3.1	Articles of Amendment filed with the Colorado Secretary of State on August 24, 2004. (3)
	10.1	Lease Purchase and Sale Agreement among Scarab Systems, Inc., Methane Energy Corp. and GeoTrends-Hampton International LLC dated on the 11th day of May, 2004. (1)
