**STEWART & STEVENSON SERVICES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS**

Note 1 - Basis of Presentation

The accompanying consolidated condensed financial statements of Stewart & Stevenson Services, Inc. and Subsidiaries (collectively, the Company) have been prepared in accordance with Rule 10-01 of Regulation S-X for interim financial statements required to be filed with the Securities and Exchange Commission and do not include all information and footnotes required by generally accepted accounting principles for complete financial statements. However, the information furnished herein reflects all normal recurring adjustments, which are, in the opinion of management, necessary for a fair statement of the results for the interim periods. The results of operations for the three and six months ended August 2, 2003 are not necessarily indicative of the results that will be realized for the fiscal year ending January 31, 2004.

The Company's fiscal year begins on February 1 of the year stated and ends on January 31 of the following year. For example, the Company's Fiscal 2003 commenced on February 1, 2003 and ends on January 31, 2004. The Company reports results on the fiscal quarter method with each quarter comprising approximately 13 weeks.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended January 31, 2003.

The accompanying consolidated condensed financial statements for Fiscal 2002 and related notes contain certain reclassifications to conform with the presentation used in Fiscal 2003.

Note 2 - Comprehensive Income

Total comprehensive income (loss) is as follows (*in thousands*):

	Three Months Ended		Six Months Ended	
	August 2, 2003	August 3, 2002	August 2, 2003	August 3, 2002
Net earnings (loss)	\$ 3,070	\$ (6,447)	\$ 3,905	\$ (6,330)
Unrealized gain (loss) on forward contracts, net of tax	(132)	397	(98)	284
Currency translation gain (loss), net of tax	(287)	(1,239)	(178)	(1,472)
Comprehensive income (loss)	\$ 2,651	\$ (7,289)	\$ 3,629	\$ (7,518)

Note 3 - Segment Information

The Company modified its internal organization structure in 2003. The modifications made were as follows:

The Utilities Equipment business has been removed from the Airline Products segment and identified as a separate reporting segment. The Utilities Equipment business, which manufactures mobile railcar movers, snowblowers and off-road seismic vehicles, has been consolidated with Distributed Energy Solutions and Petroleum Equipment in the newly formed Engineered Products Division.

Certain business operations, which were exited in 2002, have been reclassified from Other Business Activities to the Power Products segment. This business operation consisted primarily of sales of gas compression equipment.

The marketing services and transportation/logistics business units were reclassified from the Power Products segment to Other Business Activities. These business units provide services to both internal customers and external unaffiliated customers.

Interest and investment income has been removed from segment operating profit (loss) measurements.

The corresponding segment information for Fiscal 2002 has been restated to conform to the new business segment presentation. Intercompany sales have been eliminated in all periods presented.

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

Financial information relating to industry segments with a reconciliation to earnings from continuing operations before income taxes is as follows (in thousands except percentages):

Consolidated	2.7%	3.9%	2.8%	4.0%

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

Selling and administrative expenses in Fiscal 2003 include costs associated with restructuring activities, primarily related to the consolidation of manufacturing operations in the Engineered Products Division and severance and other costs related to the elimination of certain positions in the Power Products and Corporate segments. A summary of restructuring costs incurred for the three and six months ended August 2, 2003 follows (*in thousands*):

	Three Months Ended August 2, 2003	Six Months Ended August 2, 2003
Power Products	\$	\$ 282
Engineered Products:		
Petroleum Equipment	194	367
Distributed Energy Solutions	442	967
Utilities Equipment	289	548
Corporate	1,325	1,737
Total restructuring costs incurred	\$ 2,250	\$ 3,901
Severance costs included in restructuring	\$ 1,300	\$ 2,000

As of August 2, 2003, \$1.8 million of restructuring costs were accrued and expected to be paid in future periods.

Note 4 Recent Accounting Pronouncements

In June 2001, the Financial Accounting Standard Board (FASB) issued Statement Of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets. SFAS No. 142 requires that the balance sheet valuation of goodwill and other intangible assets be evaluated for impairment at least annually. Further, it requires that amortization of goodwill cease beginning with the Company's Fiscal 2002. The Company implemented SFAS No. 142 effective February 1, 2002 and, accordingly, net goodwill balances as of such date were tested for impairment by comparing the fair value of each reporting unit to its carrying value. Fair value was determined using discounted estimated future cash flows and market multiples of earnings estimates. Significant estimates used in the methodologies included estimates of future earnings, future growth rates, weighted average cost of capital and market valuation multiples for each reporting unit. Based upon these impairment tests performed upon adoption of SFAS No. 142, the Company recognized, as a cumulative effect of a change in accounting principle in the first quarter of Fiscal 2002, a charge of \$3.7 million, or \$0.13 per diluted share, net of tax benefit of \$1.8 million. This impairment charge primarily related to the Airline Products segment.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities, which requires companies to recognize costs associated with plant closings or other exit or disposal activities when incurred. Previous guidance required recognition of such costs as a liability as of the date an entity commits to an exit plan. SFAS No. 146 is effective for exit or disposal activities that are initiated after December 31, 2002. Adoption of the new standard impacts the timing of liability recognition related to future exit or disposal activities, but will not have a material effect on the ultimate costs associated with such activities.

In November 2002, the FASB issued Interpretation (FIN) No. 45, Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others, which requires a guarantor to recognize, at the inception of a guarantee, a liability for the fair value of the obligations undertaken in issuing the guarantee. FIN No. 45 also expands the disclosures required to be made by a guarantor about its obligation under certain guarantees that it has issued. The recognition provisions of FIN No. 45 do not apply to product warranties. Initial recognition and measurement provisions of FIN No. 45 are applicable on a prospective basis to guarantees issued after December 31, 2002. Adoption of the new standard did not have a material effect on the Company's consolidated financial statements.

In January 2003, the FASB issued FIN No. 46, Consolidation of Variable Interest Entities, which requires that a company that controls another entity through interests other than voting interests should consolidate such controlled entity. FIN No. 46 applies to variable interest entities created after January 31, 2003, and is effective for interim periods beginning after June 15, 2003 for existing variable interest entities. As the Company has no material exposures to special purpose entities or other off-balance sheet arrangements, the adoption of FIN No. 46 is not expected to have a material effect on the Company's consolidated financial statements.

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure, which amends SFAS No. 123, Accounting for Stock-Based Compensation, by providing alternative methods of transition for a voluntary change to the fair value method of accounting for stock options and other stock-based employee compensation. As permitted under SFAS No. 123, the Company continues to use the intrinsic value method of accounting prescribed by APB No. 25, Accounting for Stock Issued to Employees, to account for its stock-based compensation programs. Accordingly, no compensation expense is recognized when the exercise price of an employee stock option is equal to or greater than the market price of the Company's common stock on the grant date.

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

The following pro forma data are calculated as if compensation expense for the Company's stock option plans was determined based on the fair value at the grant date for awards under these plans, amortized to expense on a pro rata basis over the option vesting period, in accordance with the methodology prescribed by SFAS No. 123, Accounting for Stock-Based Compensation:

(In thousands, except per share data)	Three Months Ended		Six Months Ended	
	August 2, 2003	August 3, 2002	August 2, 2003	August 3, 2002
Net earnings (loss):				
As reported	\$ 3,070	\$ (6,447)	\$ 3,905	\$ (6,330)
Pro forma compensation expense, determined under fair value method, net of tax	(443)	(503)	(682)	(1,003)
Pro forma	\$ 2,627	\$ (6,950)	\$ 3,223	\$ (7,333)
Basic earnings (loss) per share:				
As reported	\$ 0.11	\$ (0.23)	\$ 0.14	\$ (0.22)
Pro forma	0.09	(0.24)	0.11	(0.26)
Diluted earnings (loss) per share:				
As reported	\$ 0.11	\$ (0.22)	\$ 0.14	\$ (0.22)
Pro forma	0.09	(0.24)	0.11	(0.25)

For purposes of the pro forma disclosures, the fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model.

Note 5 - Commitments and Contingencies

As a custom packager of power systems, the Company issues bid and performance guarantees in the form of performance bonds or standby letters of credit. As of August 2, 2003 and January 31, 2003, performance type letters of credit totaled approximately \$9.4 million and \$5.7 million, respectively. In addition, the Company had contingent performance indemnities of approximately \$6.7 million as of August 2, 2003 and January 31, 2003.

The Company has provided certain guarantees in support of its customers' financing of purchases from the Company in the form of debt guarantees. Pursuant to such guarantees, once the customer has satisfied its debt obligation to the lender, the Company's guarantee is released. Should a customer fail to meet its obligation to the lender, the lender could require the Company to satisfy such obligation, in which case the Company would have some legal recourse against the customer. The amount of such guarantees is approximately \$0.6 million and \$0.9 million as of August 2, 2003 and January 31, 2003, respectively.

The Company leases certain facilities and equipment from third parties under operating lease arrangements of varying terms whose annual rentals are less than 1% of consolidated sales.

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

The Company's government contract operations are subject to U.S. government investigations of business practices and cost classifications from which legal or administrative proceedings can result. Based on government procurement regulations, under certain circumstances a contractor can be fined, as well as suspended or debarred from government contracting. In that event, the Company would also be unable to sell equipment or services to customers that depend on loans or financial commitments from the Export Import Bank, Overseas Private Investment Corporation and similar government agencies during a suspension or debarment.

During Fiscal 1998, the U.S. Customs Service detained a medium tactical vehicle that was being shipped by the Company for display in a European trade show. The Company has been advised that the U.S. Customs Service and the Department of Justice are investigating potential violations by the Company of laws relating to the export of controlled military vehicles, weapons mounting systems and firearms. Such investigation could result in the filing of criminal, civil or administrative sanctions against the Company and/or individual employees and could result in a suspension or debarment of the Company from receiving new contracts or subcontracts with agencies of the U.S. government or the benefit of federal assistance payments.

The Company is a defendant in a suit brought under the *qui tam* provision of the False Claims Act, United States of America, *ex rel. Werner Stebner v. Stewart & Stevenson Services, Inc. and McLaughlin Body Co.*, Civil Action No. H-96-3363, in the United States District Court for the Southern District of Texas, Houston Division. The plaintiff's complaint seeks penalties and damages in an unspecified amount. The suit alleges that the Company made false statements and certifications in connection with claims for payment for Family of Medium Tactical Vehicles delivered to the U.S. Army starting in 1995, and the suit alleges that the vehicles were substandard because of corrosion problems. The suit was filed under seal in 1996, and following an investigation by the Justice Department, the United States declined to intervene in the suit, which was unsealed on August 29, 2000. The case is set for trial in

January 2004. The Company believes the claims in the suit are without merit and is vigorously defending the suit. Nevertheless, an unexpected outcome in the suit could have a material adverse impact on the Company's results of operations, consolidated financial position and liquidity.

The Company is a defendant in a suit brought by several subsidiaries of Diamond Offshore Drilling, Inc. (collectively, Diamond Offshore) on May 30, 2002, arising out of claims relating to a marine riser manufactured by the Company and purchased by Diamond Offshore for use on its Ocean Baroness semi-submersible drilling rig, Cause No. 2002-27831; *Diamond Offshore International Corporation, Diamond Offshore Company, Diamond Offshore Services Company, Diamond Offshore (USA), Inc., Diamond Offshore International Limited, and Diamond Offshore Drilling, Ltd. v. Stewart & Stevenson Services, Inc.*; in the District Court of Harris County, Texas 125th Judicial District Court (the Baroness Litigation). The suit was filed following a separation of the marine riser during deep water drilling operations and seeks to recover damages that are not specified in the complaint.

In a separate transaction on or about September 13, 2001, Diamond Offshore contracted with the Company for a marine riser for use on its Ocean Rover semi-submersible drilling rig. The Company was fulfilling this contract, when, on August 19, 2002, Diamond offshore amended its petition in the Baroness Litigation to seek a declaration that Diamond Offshore has no further contractual obligations to the Company. On August 21, 2002, before being served with Diamond Offshore's amended petition in the Baroness Litigation, the Company filed a separate lawsuit against Diamond Offshore seeking to recover damages, including attorneys' fees (the Rover Litigation). On August 30, 2002, the Court transferred the Rover Litigation to the 125th Judicial Court where the Baroness Litigation is pending. The two cases have been consolidated into one lawsuit in the 125th Judicial Court. The Company is vigorously prosecuting its claims against Diamond Offshore and defending the claims asserted against it by Diamond Offshore in this lawsuit.

It is presently impossible to determine the ultimate outcome of these matters or whether the resolution will have a material adverse effect on the Company's results of operations, consolidated financial position or liquidity, though the Company has recorded reserves that it believes are adequate for certain estimated legal fees associated with such matters as of the balance sheet date.

In 2001, the Company received from the United States Environmental Protection Agency (the EPA) a Request for Information under Section 104(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, for information pertaining to the R&H Oil Company Site in San Antonio, Texas (the Site). Information provided to the Company by the EPA indicates that the Company may have sent waste oils to the Site for recycling in the late 1980s, and that such waste oils may potentially account for between one and two percent of the volume of total wastes received by the oil recycler at the Site. Since the Company expects to receive a claim for cleanup and other costs related to this site, it has established additional reserves in Fiscal 2002, which it believes to be adequate at this time. As additional facts are developed and definitive remediation plans and necessary regulatory approvals for implementation of remediation are established, changes in these and other factors may result in actual costs exceeding the current environmental reserves. While uncertainties are inherent in the final outcome of these environmental matters, and it is presently impossible to determine the actual costs that ultimately may be incurred, management currently believes that the resolution of such uncertainties should not have a material adverse effect on the Company's results of operations, consolidated financial position or liquidity.

From time to time, the Company is subject to various environmental remediation requirements at certain of its facilities. The Company believes that the exposure associated with such requirements will not have a material adverse impact on the Company's results of operations, consolidated financial position or liquidity.

The Company is also a defendant in a number of lawsuits relating to contractual, product liability, personal injury and warranty matters normally incident to the Company's business. No individual case, or group of cases presenting substantially similar issues of law or fact, are expected to have a material effect on the manner in which the Company conducts its business or on its consolidated financial position or liquidity. The

Company maintains certain insurance policies that provide coverage for product liability and personal injury cases. The Company has established reserves that it believes to be adequate based on current evaluations. Nevertheless, an unexpected outcome in such cases could have a material adverse impact on the results of operations in the period it occurs. Moreover, future adverse developments in such cases could require material changes in the recorded reserve amounts.

Note 6 Government Contracting

The U.S. government is one of the Company's key customers. As such, decreased government spending or termination of significant government programs could adversely affect the Company's business. The Company's Tactical Vehicle Systems segment depends largely on U.S. government expenditures. In recent years, government contracts in this segment have accounted for substantial percentages of the Company's annual revenues and operating income. The Company is currently in the fifth production year of its second multi-year contract with the U.S. Department of the Army (U.S. Army) for production of the Family of Medium Tactical Vehicles (FMTV). In the fourth quarter of Fiscal 2002, the U.S. Army exercised an option to award a sixth program year to the current contract, which begins in October 2003 and is expected to be completed by September 2004. The funding of the FMTV contract is subject to the inherent uncertainties of Congressional appropriations. As is typical of multi-year defense contracts that may be canceled or adjusted by the government, the FMTV contract must be funded annually by the U.S. Army and may be terminated at

any time for the convenience of the government. If the FMTV contract is terminated, other than for the Company's default (in which event there could be serious adverse consequences and claims against the Company), it provides for termination charges that will reimburse the Company for certain allowable costs but not necessarily for all costs incurred.

In April 2003, the U.S. Army awarded the Company the FMTV A1 Competitive Rebuy (A1CR) production contract. The A1CR contract includes production of nearly 11,000 FMTV trucks and trailers over a five-year period, with an option for 12,000 additional vehicles. Production under the A1CR contract is expected to begin in October 2004, after completion of the current FMTV contract. The Company's profit margins on the A1CR contract are expected to be lower than historical margin levels for the current FMTV contract.

Major contracts for military systems are performed over extended periods of time and are subject to changes in scope of work and delivery schedules. Pricing negotiations on changes and settlement of claims often extend over prolonged periods of time. The Company's ultimate profitability on such contracts may depend on the eventual outcome of an equitable settlement of contractual issues with the U.S. government.

Note 7 - Discontinued Operations

During the fourth quarter of Fiscal 2001, the Company determined that the Petroleum Equipment segment's blowout preventer and controls, valve and drilling riser business was not strategically aligned with the Company's core competencies. The Company announced its intention to sell this business and, consequently, these activities were reclassified for reporting purposes for all periods shown as discontinued operations. These discontinued operations generated the following sales and operating losses in the three- and six-month periods ended August 2, 2003 and August 3, 2002:

(In thousands)	Three Months Ended		Six Months Ended	
	August 2, 2003	August 3, 2002	August 2, 2003	August 3, 2002
Sales	942	5,248	1,380	15,183
Operating loss	(442)	(8,152)	(1,692)	(9,848)
Operating loss, net of taxes	(158)	(5,503)	(982)	(6,600)

Additionally, the Company recognized a loss from the disposal of such discontinued operations in the second quarter of Fiscal 2002 of \$8.3 million (\$5.6 million, net of tax).

When the transaction consummated on September 13, 2002, the Company sold certain assets and retained certain contracts and related assets as well as the receivables and certain liabilities of the business, including warranty responsibility for products sold before closing as well as warranty responsibility for retained contracts to be completed. In some cases, the Company has agreements with customers on commitments to support its products, including retained warranties and contracts.

Note 8 Inventories

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

Summarized below are the components of inventories by segment excluding discontinued operations, net of customer deposits:

(In thousands)	August 2, 2003	January 31, 2003
Tactical Vehicle Systems	\$ 6,631	\$ 7,444
Power Products	150,055	141,649
Engineered Products Division:		
Distributed Energy Solutions	35,871	44,514
Petroleum Equipment	6,754	12,314
Utilities Equipment	12,375	10,018
Airline Products	25,951	28,468
Other Business Activities	23	9
	237,660	244,416
Excess of current cost over LIFO values	(43,401)	(42,785)
Total Inventories	\$ 194,259	\$ 201,631

The Company's inventory classifications correspond to its reportable segments. The Power Products segment's inventory consists primarily of industrial equipment, equipment under modification, used equipment available for sale or rent and parts held in the Company's distribution network for resale. As a custom packager of power systems and other equipment to customer specifications, the Tactical Vehicle Systems, Distributed Energy Solutions, Petroleum Equipment, Utilities Equipment and Airline Products segments' inventory consists of both work-in-process, which includes purchased and manufactured components in various stages of assembly, and on-hand parts and equipment to support service and future sales.

An actual valuation of inventory under the last-in-first-out (LIFO) method can be made only at the end of each fiscal year based on the inventory levels and costs at that time. Accordingly, interim LIFO calculations are based on management's estimates of expected year-end inventory levels and costs. Interim results are subject to the final year-end LIFO inventory valuation.

Note 9 Earnings Per Share

The following table is a reconciliation of the numerators and denominators used in the calculation of basic and diluted earnings per share as presented on the Consolidated Condensed Statements of Earnings.

(In thousands, except per share data)	Three Months Ended		Six Months Ended	
	August 2, 2003	August 3, 2002	August 2, 2003	August 3, 2002
Numerator:				
Earnings available to common shareholders				
From continuing operations	\$ 3,228	\$ 4,607	\$ 4,887	\$ 9,503
From discontinued operations	(158)	(11,054)	(982)	(12,151)
From cumulative effect of change in accounting principle				(3,682)
Net earnings (loss)	\$ 3,070	\$ (6,447)	\$ 3,905	\$ (6,330)
Denominator:				
Denominator for basic earnings per share				
Weighted average shares outstanding	28,522	28,483	28,507	28,469
Effect of dilutive securities:				
Employee and director stock options	445	271	297	292
Denominator for diluted earnings per share -				
Adjusted weighted average shares outstanding	28,967	28,754	28,804	28,761
Basic earnings (loss) per share:				
From continuing operations	\$ 0.11	\$ 0.16	\$ 0.17	\$ 0.33
From discontinued operations		(0.39)	(0.03)	(0.43)
From cumulative effect of change in accounting principle				(0.13)
Net earnings (loss) per share	\$ 0.11	\$ (0.23)	\$ 0.14	\$ (0.22)
Diluted earnings (loss) per share:				
From continuing operations	\$ 0.11	\$ 0.16	\$ 0.17	\$ 0.33

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

From discontinued operations			(0.38)		(0.03)		(0.42)
From cumulative effect of change in accounting principle							(0.13)
Net earnings (loss) per share	\$	0.11	\$	(0.22)	\$	0.14	\$ (0.22)
Number of shares under anti-dilutive stock options outstanding		1,255		1,396		1,255	1,361

Note 10 Warranty Costs

Based on historical experience and contract terms, the Company provides for the estimated cost of product and service warranties at the time of sale or, in some cases, when specific warranty problems are identified. Accrued warranty costs are adjusted periodically to reflect actual experience. Certain warranty and other related claims involve matters of dispute that ultimately are resolved by negotiation, arbitration or litigation. Occasionally, a material warranty issue can arise that is beyond the Company's historical experience. The Company provides for any such warranty issues as they become known and estimable.

A summary of warranty activity for the three and six months ended August 2, 2003 follows (*in thousands*):

	Three Months Ended		Six Months Ended	
	August 2, 2003		August 2, 2003	
Accrued warranty costs - Beginning of period	\$	4,795	\$	6,073
Payments for completed warranty obligations		(1,401)		(3,912)
Warranty accrual for current period production		1,683		2,916
Adjustments to warranty accrual		280		280
Accrued warranty costs - End of period	\$	5,357	\$	5,357

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion should be read in conjunction with the attached condensed consolidated financial statements and notes thereto, and with our Form 10-K and notes thereto for the fiscal year ended January 31, 2003. The following discussion contains forward-looking statements. In connection therewith, please see the Cautionary Statements contained in our Form 10-K and the heading labeled "Factors That May Affect Future Results" below, which identify important factors that could cause actual results to differ materially from those predicted or implied in the forward-looking statements.

Our fiscal year begins on February 1 of the year stated and ends on January 31 of the following year. For example, our Fiscal 2003 commenced on February 1, 2003 and ends on January 31, 2004. We report results on the fiscal quarter method with each quarter comprising approximately 13 weeks. The second quarter of Fiscal 2003 commenced on May 4, 2003 and ended on August 2, 2003, and the second quarter of Fiscal 2002 commenced on May 5, 2002 and ended on August 3, 2002.

RESULTS OF OPERATIONS

Sales for the second quarter of Fiscal 2003 increased \$27.8 million, or 10%, from the second quarter of Fiscal 2002. This increase in sales was driven largely by higher sales in the Petroleum Equipment segment. For the first half of Fiscal 2003, sales increased \$17.9 million, or 3%, from the first half of 2002. This increase is also attributable to the higher sales in the Petroleum Equipment segment, as well as increased sales in the Airline Products, Distributed Energy Solutions, and Utilities Equipment segments. The sales increases in these segments in the first half of the year were partially offset by a decrease in Power Products segment sales.

Gross profit decreased \$1.2 million to \$40.7 million in the second quarter of Fiscal 2003 from the second quarter of Fiscal 2002, and decreased \$4.1 million to \$81.5 million in the first half of Fiscal 2003 from the first half of Fiscal 2002. Gross profit margin decreased to 13.5% in the first half of Fiscal 2003 compared to 14.6% for the same period of 2002. The decline in gross profit margin for the second quarter and first half of Fiscal 2003 are primarily attributable to the change in segment sales mix, as margin rates in the segments experiencing the largest sales increases are generally lower than the company average. Additionally, in comparing Fiscal 2003 year-to-date results to Fiscal 2002, gross profit margins have deteriorated within the Power Products segment, primarily as a result of lower sales volume.

Selling and administrative expenses increased by \$1.5 million, or 4.1%, to \$36.5 million in the second quarter of Fiscal 2003 from the second quarter of Fiscal 2002, and increased by \$1.3 million, or 1.9%, to \$71.8 million in the first half of Fiscal 2003 from the first half of Fiscal 2002. Selling and administrative expenses in Fiscal 2003 include costs associated with restructuring activities, primarily related to the consolidation of manufacturing operations in the Engineered Products Division and severance and other costs related to the elimination of certain positions in the Power Products and Corporate segments. A summary of restructuring costs incurred for the three and six months ended August 2, 2003 follows (*in thousands*):

	Three Months Ended August 2, 2003		Six Months Ended August 2, 2003	
Total restructuring costs incurred	\$	2,250	\$	3,901
Severance costs included in restructuring		1,300		2,000

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

As of August 2, 2003, \$1.8 million of restructuring costs were accrued and expected to be paid in future periods. In addition, we expect to incur \$0.5 million to \$1.0 million of additional restructuring expenses in Fiscal 2003 to complete the Engineering Products Division consolidation. Excluding costs related to restructuring activities, selling and administrative expenses as a percentage of sales declined to 11.3% for the six months ended August 2, 2003, compared to 12.1% for the corresponding period of Fiscal 2002. This improvement is primarily attributable to expense reductions resulting from changes to our defined benefit plans and other cost reduction efforts.

During the first quarter of Fiscal 2003, we decided to freeze the benefits earned under our defined benefit pension plan, defined benefit supplemental executive retirement plan and our postretirement medical plan effective July 1, 2003. These changes are expected to reduce pension and postretirement benefits expense by over \$5.0 million in Fiscal 2003. The first quarter 2003 operating results included a one-time non-cash write-off of \$2.4 million of previously unamortized prior service costs (pension curtailment expense).

Compared to the corresponding periods of Fiscal 2002, net interest expense decreased \$0.4 million to \$0.1 million in the second quarter of Fiscal 2003 and by \$0.3 million to \$0.9 million in the first half of Fiscal 2003. The decrease in interest expense is primarily attributable to the payment of \$30.0 million on long-term borrowings in May 2003. Additionally, the second quarter of Fiscal 2003 included \$0.3 million of interest income resulting from the completion of a federal income tax audit of certain prior years.

The net income tax provision decreased in the Fiscal 2003 periods compared to the corresponding periods in Fiscal 2002 as a result of the lower current year earnings. The effective tax rate was 29.3% in the first half of Fiscal 2003 compared to 34.0% for the corresponding

period in 2002. The decline in effective tax rate is primarily a result of certain state tax benefits and tax credits in Fiscal 2003 being a larger proportion of the pre-tax earnings than in Fiscal 2002.

Discontinued operations generated an after-tax loss of \$0.2 million in the second quarter of Fiscal 2003 and \$1.0 million in the first half of Fiscal 2003, compared to \$5.5 million and \$6.6 million in the corresponding periods in Fiscal 2002, respectively. These losses primarily represent costs associated with retained contracts, warranty and legal claims and obligations associated with our discontinued blowout preventer and controls, valve and drilling riser business, which was sold during Fiscal 2002. In addition, in the second quarter of Fiscal 2002, we recognized a loss from disposal of this business of \$5.6 million, net of tax, resulting from the sale of these operations.

In the first quarter of Fiscal 2002, we recognized, as a cumulative effect of a change in accounting principle, a charge of \$3.7 million net of tax, or \$0.13 per diluted share, upon adoption of new accounting standards related to the valuation of goodwill and other intangible assets.

SEGMENT DATA

We report financial results in six business segments based on distinct product and customer types. Three of these segments have been combined in Fiscal 2003 into the Engineered Products Division. This division includes the Petroleum Equipment, Distributed Energy Solutions and Utilities Equipment business segments. The remaining three segments include Tactical Vehicle Systems, Power Products and Airline Products. Businesses not otherwise classified are shown as Other Business Activities. This classification includes the marketing services and transportation/logistics organizations, which provide services to both affiliated and unaffiliated customers. Intercompany sales have been eliminated.

The following table represents sales and operating profit (loss) by business segment (*in thousands*):

	Three Months Ended		Six Months Ended	
	August 2, 2003	August 3, 2002	August 2, 2003	August 3, 2002
Sales				
Tactical Vehicle Systems	\$ 108,365	\$ 105,405	\$ 219,342	\$ 220,866
Power Products	126,825	133,522	251,175	282,798
Engineered Products Division:				
Petroleum Equipment	34,779	8,792	57,839	15,310
Distributed Energy Solutions	20,033	17,832	33,102	29,615
Utilities Equipment	3,436	1,803	6,024	3,387
Airline Products	18,352	15,353	32,596	28,070
Other Business Activities	1,061	2,328	2,545	4,659
Total Sales	\$ 312,851	\$ 285,035	\$ 602,623	\$ 584,705
Operating Profit (Loss)				
Tactical Vehicle Systems	\$ 17,283	\$ 15,577	\$ 35,066	\$ 30,491
Power Products	(5,196)	332	(8,047)	3,607

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

Engineered Products Division:				
Petroleum Equipment	1,625	(1,527)	2,233	(2,091)
Distributed Energy Solutions	(2,990)	(2,052)	(6,972)	(4,253)
Utilities Equipment	(923)	(569)	(1,815)	(1,488)
Airline Products	(712)	(993)	(2,704)	(3,207)
Other Business Activities	(527)	221	(1,048)	174
Total Operating Profit	8,560	10,989	16,713	23,233
Corporate expenses, net	(3,850)	(3,683)	(6,520)	(7,578)
Pension curtailment expense			(2,400)	
Interest and investment income	559	374	1,059	712
Interest expense	(693)	(837)	(1,936)	(1,969)
Earnings from continuing operations before income taxes	\$ 4,576	\$ 6,843	\$ 6,916	\$ 14,398

Tactical Vehicle Systems

The Tactical Vehicle Systems segment, which manufactures tactical vehicles for the U.S. Army and others, recorded sales of \$108.4 million in the second quarter of Fiscal 2003 compared to \$105.4 million a year ago. The increase in sales was due to higher truck

volumes while the level of service and other revenue was relatively unchanged. For the first half, segment sales were \$219.3 million in Fiscal 2003, down slightly from \$220.9 million in Fiscal 2002. The segment delivered 1,275 trucks and 258 trailers in the first six months of Fiscal 2003, compared to 1,177 trucks and 262 trailers in the first six months of Fiscal 2002. By comparison, the Fiscal 2003 quantities included a lower proportion of large vehicles, which have higher unit sales prices. Operating profit for the second quarter of Fiscal 2003 increased to \$17.3 million (15.9% operating margin) from \$15.6 million (14.8% operating margin) in the second quarter of Fiscal 2002. For the first half of Fiscal 2003, operating profit increased to \$35.1 million (16.0% operating margin) from \$30.5 million in Fiscal 2002 (13.8% operating margin). The increased operating profit for the second quarter and the first half of Fiscal 2003 is driven by increased productivity, a favorable product mix and lower costs associated with bid and proposal activities in the Fiscal 2003 period compared to the comparable period in Fiscal 2002.

Production under the A1CR contract is expected to begin in October 2004, after completion of the current FMTV contract. Our profit margins on the A1CR contract are expected to be lower than historical margin levels for the current FMTV contract. Actual future margins of this segment will be dependent upon a number of factors including our ability to achieve efficiencies and other materials and labor cost control measures, the actual quantities and variations of vehicles purchased by the U.S. Army under the A1CR contract, the potential for additional contracts, bid and proposal activities and other factors. The operating margin this segment will achieve in total may also be impacted by additional sales to other allied governments and the level of engineering and service provided.

Power Products

The Power Products segment, which is responsible for marketing and aftermarket support of a wide range of industrial equipment, recorded sales of \$126.8 million in the second quarter of Fiscal 2003, a decline from \$133.5 million in the corresponding period in Fiscal 2002. Sales in the first half of Fiscal 2003 were \$251.2 million, down from \$282.8 million recorded in the first half of Fiscal 2002. The decline in sales was primarily driven by lower equipment sales volume along with declines in rental, parts and service sales, which is largely attributable to overall weakness in the markets we serve. The segment generated an operating loss of \$5.2 million in the second quarter and \$8.0 million in the first half of Fiscal 2003, compared to an operating profit of \$0.3 million in the second quarter and \$3.6 million in the first half of Fiscal 2002. The decrease in operating profit compared to Fiscal 2002 was primarily driven by the lower sales volume, an unfavorable customer mix within the equipment, parts, and service sales, combined with higher operating expenses.

Second quarter and first half sales in Fiscal 2003 have decreased in all categories from the same periods in Fiscal 2002 reflecting the overall weakness in the economy. Compared to the last six months of Fiscal 2002, however, parts and services sales have increased in the first six months of Fiscal 2003. Additionally, leading economic indicators in the key markets we serve, including U.S. rig count and truck tonnage indices, have improved in recent months. In future periods, the general conditions of the economy as well as the composition of sales within this segment will continue to have a significant impact on the operating profit.

Engineered Products

The Engineered Products Division was formed in 2003, consisting of the Petroleum Equipment, Distributed Energy Solutions and Utilities Equipment businesses.

The Petroleum Equipment segment manufactures equipment for the well servicing industry. Sales in this segment increased by \$26.0 million to \$34.8 million in the second quarter of Fiscal 2003 and increased by \$42.5 million to \$57.8 million in the first half of Fiscal 2003 from the corresponding periods in Fiscal 2002. The increase in sales for this segment was attributable to increased volume of equipment sales both

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

domestically and internationally, as capital spending in the oil service industry has increased significantly over 2002 levels. Operating profit in this segment increased by \$3.2 million in the second quarter of Fiscal 2003 and \$4.3 million in the first half of Fiscal 2003 from the corresponding periods in Fiscal 2002. The improvement in operating profit is primarily attributable to the sales volume growth partially offset by higher operating expenses attributable to the consolidation of Engineered Products Division manufacturing operations. Operating profit margin levels are anticipated to remain stable in the near term.

The Distributed Energy Solutions segment primarily packages engine generator sets, performs power plant installations on a turnkey basis and services power plant operations. Sales for this segment increased \$2.2 million to \$20.0 million in the second quarter of Fiscal 2003 and increased \$3.5 million to \$33.1 million in first half of Fiscal 2003, compared to the corresponding periods in Fiscal 2002. This segment posted a second quarter operating loss of \$3.0 million in Fiscal 2003, compared to a \$2.1 million operating loss in the second quarter of Fiscal 2002. For the first six months, this segment's operating loss was \$7.0 million in Fiscal 2003, compared to \$4.3 million in Fiscal 2002. This increased loss is primarily attributable to certain low margin contracts that were completed during Fiscal 2003 that allowed us to reduce equipment inventory in this segment. Additionally, operating profit in this segment includes expenses of \$0.4 million in the second quarter and \$1.0 million in the first half of Fiscal 2003 related to the consolidation of manufacturing operations.

The Utilities Equipment segment, which manufactures mobile railcar movers, snowblowers and off-road seismic vehicles, generated a \$1.6 million sales increase to \$3.4 million in the second quarter of Fiscal 2003 and a \$2.6 million increase to \$6.0 million in the first

half of Fiscal 2003 from the corresponding periods in Fiscal 2002. The sales growth is primarily attributable to a contract awarded in December 2002 to provide off-road seismic vehicles for Input/Output, Inc. Production under this contract began during the second quarter of Fiscal 2003. This segment posted a second quarter operating loss of \$0.9 million in Fiscal 2003, compared to a \$0.6 million loss in Fiscal 2002. For the first half, this segment's operating loss was \$1.8 million, compared to \$1.5 million in Fiscal 2002. This segment's operating loss in Fiscal 2003 includes \$0.3 million of expenses in the second quarter and \$0.5 million of expenses in the first six months related to the consolidation of manufacturing operations in the Engineered Products Division.

Airline Products

The Airline Products segment, which manufactures airline ground support products, recognized a sales increase of \$3.0 million to \$18.4 million in the second quarter of Fiscal 2003 and a \$4.5 million increase to \$32.6 million in the first half of Fiscal 2003 compared to the respective corresponding periods in Fiscal 2002. The increasing sales are primarily attributable to increased sales volume to government and package carrier customers, as well as sales of products in the DAVCO product line, which was acquired in December 2002. Operating loss for this segment was reduced to \$0.7 million in the second quarter of Fiscal 2003 and \$2.7 million in the first half of Fiscal 2003, compared to \$1.0 million in the second quarter and \$3.2 million in the first half of Fiscal 2002. The reduction in operating loss results primarily from the sales volume growth. Order backlog is \$2.5 million at the end of the second quarter, a \$1.5 million increase from the end of Fiscal 2002.

UNFILLED ORDERS

Unfilled orders consist of written purchase orders and signed contracts. These unfilled orders are generally subject to cancellation or modification due to customer relationships or other conditions. Purchase options are not included in unfilled orders until exercised. Unfilled orders as of August 2, 2003 and January 31, 2003 were as follows:

	August 2, 2003	January 31, 2003
	(In millions)	
Tactical Vehicle Systems	\$ 627.1	\$ 659.5
Power Products	45.8	38.7
Engineered Products Division		
Petroleum Products	35.2	64.6
Distributed Energy Solutions	30.0	42.5
Utilities Equipment	5.1	0.7
Airline Products	2.5	1.0
	\$ 745.7	\$ 807.0

Unfilled orders of the Tactical Vehicle Systems segment consist principally of production authorized and appropriated by the U.S. Congress under contracts awarded by the U.S. Army Tank-Automotive and Armament Command (TACOM) to manufacture medium tactical vehicles and trailers.

LIQUIDITY AND CAPITAL RESOURCES

Our sources of cash liquidity include cash and cash equivalents, cash from operations, amounts available under credit facilities and other external sources of funds. We believe that these sources are sufficient to fund the current requirements of working capital, capital expenditures, dividends and other financial commitments.

We have a \$150 million unsecured revolving credit facility, which matures on January 31, 2004. No borrowings were outstanding under the facility at any time during Fiscal 2003 or Fiscal 2002. The revolving credit facility has a \$25 million sub facility, which may be used for letters of credit. Approximately \$9.7 million in letters of credit under the revolving credit facility were outstanding at August 2, 2003. Pursuant to covenant limitations of the revolving credit facility, approximately \$75.3 million was available for borrowing at August 2, 2003. A commitment fee ranging from 20 to 50 basis points is paid on the daily average unused balance based on our leverage ratio. Borrowings outstanding would bear interest at several options, including LIBOR plus 75 to 175 basis points based on our leverage ratio, the prime rate, or a competitive bid among the banks. Based on the first option (LIBOR plus 75 to 175 basis points based on our leverage ratio), the borrowing rate would have been approximately 1.94% as of August 2, 2003. We intend to negotiate an extension of the revolving credit facility on similar terms and conditions prior to its expiration in January 2004. There can be no assurance that we will be able to successfully negotiate such an extension or, if we do, that such extension will include similar terms and conditions, rates of interest and covenants. Although no borrowings are currently outstanding under the revolving

credit facility, failure to negotiate a new facility on terms acceptable to us could restrict our future ability to make acquisitions and fund working capital, capital expenditures, common stock dividends or other financial obligations.

During the first six months of Fiscal 2003, we entered into separate letter of credit facilities with financial institutions totaling \$12.5 million, to allow us to issue letters of credit that extend beyond January 31, 2004 as necessary. Approximately \$3.3 million letters of credit under these facilities were outstanding as of August 3, 2003.

In addition, we have \$25 million in senior notes outstanding as of August 2, 2003. The senior notes are unsecured and were issued pursuant to an agreement containing a covenant, which imposes a debt to total capitalization requirement. The senior notes, which bear interest at a rate of 7.38%, are due and payable in May 2006. Additionally, \$30.0 million of such senior notes were paid when due in May 2003.

The revolving credit facility and the senior notes mentioned above were issued pursuant to agreements containing covenants that restrict indebtedness, guarantees, sales of assets, rentals and other items. Additional covenants in the revolving credit facility require us to maintain a minimum tangible net worth and interest coverage. Since these requirements are calculated from earnings and cash flow, our ability to declare and pay dividends could be restricted indirectly. Based on our financial condition as of August 2, 2003, the restrictions imposed by our debt instruments do not currently restrict our ability to declare and pay dividends.

In addition, our international subsidiaries had foreign currency bank notes payable totaling \$2.5 million and \$1.5 million at August 2, 2003 and January 31, 2003, respectively. Such notes payable consist of renewable, secured loans for the purpose of financing our South American operations. These loans are denominated in local currency (Colombian Pesos and Venezuelan Bolivars) and are secured by letters of credit issued by us and principally bear market-based variable rates of interest. We use foreign denominated debt to offset the impact of foreign currency exchange rate fluctuations on our South American operations.

We have additional banking relationships, which provide uncommitted borrowing arrangements. In the event that any acquisition of additional operations, growth in existing operations, settlements of lawsuits or disputes, changes in inventory levels, accounts receivable, tax payments or other working capital items create a permanent need for working capital or capital expenditures in excess of the existing cash and cash equivalents and committed lines of credit, we may seek to borrow under other long-term financing instruments or seek additional equity capital.

As of August 2, 2003, we had net working capital of \$303.0 million, compared to \$302.2 million at January 31, 2003. Total current assets at August 2, 2003 were \$503.8 million, including \$80.4 million of cash and cash equivalents. Total current liabilities at August 2, 2003 were \$200.7 million, including \$71.6 million of billings in excess of costs incurred on uncompleted contracts.

Net cash provided by continuing operations was \$13.2 million for the first six months of Fiscal 2003, compared to \$43.2 million for the corresponding period in Fiscal 2002. This decrease is primarily attributable to working capital and other operating accounts, which provided cash of \$23.2 million during the first six months of Fiscal 2002, but used cash of \$2.9 million during the first six months of Fiscal 2003. Working capital consumed cash during the first six months of Fiscal 2003, primarily as a result of the increased number of Petroleum Equipment projects in progress. Working capital provided cash during the first six months of Fiscal 2002 as a result of increased customer advances in the Tactical Vehicle Systems segment and a reduction in accounts receivable in other segments due to the slowdown in business activity.

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

Cash usage for investing activities in the first half of 2003 declined by \$4.1 million to \$11.4 million from the comparable period in 2002, which included significant investment in a fabrication facility at the Tactical Vehicle Systems plant in Sealy, Texas.

Net cash usage in financing activities in 2003 increased by \$27.6 million for the first half of Fiscal 2003 compared to the corresponding period in 2002. The increase is primarily attributable to the repayment of \$30 million in senior notes, which were due on May 30, 2003.

FACTORS THAT MAY AFFECT FUTURE RESULTS

Forward-Looking Statements

This filing contains forward-looking statements that are based on management's current expectations, estimates, and projections. These statements are not guarantees of future performance and involve a number of risks, uncertainties, and assumptions and are made pursuant to the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. Many factors, including those discussed more fully elsewhere in this release and in the Company's filings with the Securities and Exchange Commission, particularly its latest annual report on Form 10-K, as well as others, could cause results to differ materially from those stated. Specific important factors that could cause actual results, performance, or achievements to differ materially from such forward-looking statements include risk of competition, risks relating to technology, risks of general economic conditions, risks of oil and gas industry economic conditions, risks of airline industry economic conditions, risks as to terrorist attacks on the U.S. and their impact on the U.S. economy,

risks relating to personnel, risks of dependence on government and failure to obtain new government contracts, inherent risks of government contracts, risks of claims and litigation, risks of product defects, risks as to foreign sales and global trade matters, risks as to cost controls, risks as to information technology, risks as to acquisitions, risks as to currency fluctuations, risks as to environmental and safety matters, risks as to distributorships, risks as to licenses, and credit risks, all as more specifically outlined in the Company's latest annual report on Form 10-K. In addition, such forward-looking statements could be affected by general industry and market conditions and growth rates, general domestic and international conditions including interest rates, inflation and currency exchange rates and other future factors. Actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our quantitative and qualitative disclosures about market risk for changes in interest rates and foreign exchange risk are incorporated by reference in Item 7A of our Annual Report on Form 10-K for the year ended January 31, 2003 and have not materially changed since that report was filed, except as disclosed in Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations herein.

Item 4. Controls and Procedures

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

Within 90 days before the date of this report on Form 10-Q, under the supervision and with the participation of our management, including our Chief Executive Officer (our principal executive officer) and our Chief Financial Officer (our principal financial officer), we evaluated the effectiveness of our disclosure controls and procedures (as defined under Rule 13a-14(c) of the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer believe that our disclosure controls and procedures are effective to ensure that information we are required to disclose in the reports that we file or submit under the Exchange Act fairly represents, in all material respects, our financial condition, results of operations and cash flows.

There were no significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of such evaluation.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

During Fiscal 1998, the U.S. Customs Service detained a medium tactical vehicle that was being shipped by the Company for display in a European trade show. The Company has been advised that the U.S. Customs Service and the Department of Justice are investigating potential violations by the Company of laws relating to the export of controlled military vehicles, weapons mounting systems, and firearms. Such investigation could result in the filing of criminal, civil, or administrative sanctions against the Company and/or individual employees and could result in a suspension or debarment of the Company from receiving new contracts or subcontracts with agencies of the U.S. government or the benefit of federal assistance payments.

The Company is a defendant in a suit brought under the *qui tam* provision of the False Claims Act, United States of America, *ex rel. Werner Stebner v. Stewart & Stevenson Services, Inc. and McLaughlin Body Co.*, Civil Action No. H-96-3363, in the United States District Court for the Southern District of Texas, Houston Division. The plaintiff's complaint seeks penalties and damages in an unspecified amount. The suit alleges that the Company made false statements and certifications in connection with claims for payment for Family of Medium Tactical Vehicles delivered to the U.S. Army starting in 1995, and the suit alleges that the vehicles were substandard because of corrosion problems. The suit was filed under seal in 1996, and following an investigation by the Justice Department, the United States declined to intervene in the suit, which was unsealed on August 29, 2000. The case is set for trial in January 2004. The Company believes the claims in the suit are without merit and is vigorously defending the suit. Nevertheless, an unexpected outcome in the suit could have a material adverse impact on the Company's results of operations, consolidated financial position and liquidity.

The Company is a defendant in a suit brought by several subsidiaries of Diamond Offshore Drilling, Inc. (collectively, Diamond Offshore) on May 30, 2002, arising out of claims relating to a marine riser manufactured by the Company and purchased by Diamond Offshore for use on its Ocean Baroness semi-submersible drilling rig, Cause No. 2002-27831; *Diamond Offshore International Corporation, Diamond Offshore Company, Diamond Offshore Services Company, Diamond Offshore (USA), Inc., Diamond Offshore International Limited, and Diamond Offshore Drilling Ltd. v. Stewart & Stevenson Services, Inc.*; in the District Court of Harris County, Texas 125th Judicial District Court (the Baroness Litigation). The suit was filed following a separation of the marine riser during deep water drilling operations and seeks to recover damages that are not specified in the complaint.

In a separate transaction on or about September 13, 2001, Diamond Offshore contracted with the Company for a marine riser for use on its Ocean Rover semi-submersible drilling rig. The Company was fulfilling this contract, when, on August 19, 2002, Diamond Offshore

amended its petition in the Baroness Litigation to seek a declaration that Diamond Offshore has no further contractual obligations to the Company. On August 21, 2002, before being served with Diamond Offshore's amended petition in the Baroness Litigation, the Company filed a separate lawsuit against Diamond Offshore seeking to recover damages, including attorneys' fees (the Rover Litigation). On August 30, 2002, the Court transferred the Rover Litigation to the 125th Judicial Court where the Baroness Litigation is pending. The two cases have been consolidated into one lawsuit in the 125th Judicial Court. The Company is vigorously prosecuting its claims against Diamond Offshore and defending the claims asserted against it by Diamond Offshore in this lawsuit.

It is presently impossible to determine the ultimate outcome of these matters or whether the resolution will have a material adverse effect on the Company's results of operations, consolidated financial position or liquidity, though the Company has recorded reserves that it believes are adequate for certain estimated legal fees associated with such matters as of the balance sheet date.

In 2001, the Company received from the United States Environmental Protection Agency (EPA) a Request for Information under Section 104(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, for information pertaining to the R&H Oil Company Site in San Antonio, Texas (the Site). Information provided to the Company by the EPA indicates that the Company may have sent waste oils to the Site for recycling in the late 1980s, and that such waste oils may potentially account for between one and two percent of the volume of total wastes received by the oil recycler at the Site. Since the Company expects to receive a claim for cleanup and other costs related to this site, it has established additional reserves in Fiscal 2002, which it believes to be adequate at this time. As additional facts are developed and definitive remediation plans and necessary regulatory approvals for implementation of remediation are established, changes in these and other factors may result in actual costs exceeding the current environmental reserves. While uncertainties are inherent in the final outcome of these environmental matters, and it is presently impossible to determine the actual costs that ultimately may be incurred, management currently believes that the resolution of such uncertainties should not have a material adverse effect on the Company's results of operations, consolidated financial position or liquidity.

From time to time, the Company is subject to various environmental remediation requirements at certain of its facilities. The Company believes that the exposure associated with such requirements will not have a material adverse impact on the Company's results of operations, consolidated financial position or liquidity.

The Company is also a defendant in a number of lawsuits relating to contractual, product liability, personal injury and warranty matters normally incident to the Company's business. No individual case, or group of cases presenting substantially similar issues of law or fact, are expected to have a material effect on the manner in which the Company conducts its business or on its consolidated financial position or liquidity. The Company maintains certain insurance policies that provide coverage for product liability and personal injury cases. The Company has established reserves that it believes to be adequate based on current evaluations. Nevertheless, an unexpected outcome in such cases could have a material adverse impact on the results of operations in the period it occurs. Moreover, future adverse developments in such cases could require material changes in the recorded reserve amounts.

Item 6. Exhibits and Reports on Form 8-K.

- (a) The following exhibits are filed as part of this report pursuant to Item 601 of Regulation S-K.

Edgar Filing: STEWART & STEVENSON SERVICES INC - Form 10-Q

10.7 Contract Number DAAE07-03-C-S023 dated April 17, 2003 between Stewart & Stevenson Tactical Vehicle Systems, LP and the United States Department of Defense, U.S. Army Tank-Automotive and Armaments Command.

31.1 Chief Executive Officer Certification.

31.2 Chief Financial Officer Certification.

32.1 Informational Addendum to Report on Form 10-Q Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

(b) Form 8-K Report Date May 20, 2003 (Stewart & Stevenson Announces Fiscal 2003 First Quarter Earnings Release and Conference Call Schedule)

Items Reported - Item 7. Exhibits

Item 9. Regulation FD Disclosure

Form 8-K Report Date May 30, 2003 (Stewart & Stevenson Reports Fiscal 2003 First Quarter Results)

Items Reported - Item 7. Exhibits
