Cash paid during the period for interest	\$ 9,295	\$ 14,485

Supplemental disclosure of non-cash investing and financing activities:

For the nine months ended September 30, 2003 and 2002, the Company incurred unrealized holding losses associated with its investments available for sale totaling approximately \$1.2 million and \$166,000, respectively. These amounts have been reported as decreases in stockholders' equity.

In connection with the acquisition of certain assets of @Track Communications, Inc. on March 18, 2002, the Company issued a note payable for \$12.0 million. Such amount has been allocated to the fair value of the assets purchased.

During the nine months ended September 30, 2003, the Company transferred \$5.1 million of equipment under an operating lease from inventory to property and equipment.

See accompanying notes to condensed consolidated financial statements.

**AETHER SYSTEMS, INC.**

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE (1) ORGANIZATION, DESCRIPTION OF THE BUSINESS AND BASIS OF PRESENTATION**

**(a) ORGANIZATION AND DESCRIPTION OF THE BUSINESS**

Aether Systems, Inc. ( the Company or Aether ) provides the services, software and support necessary for businesses to extend critical information to virtually any wireless or mobile environment. The Company develops, deploys and manages wireless solutions built on industry standard technology referred to as Aether Fusion and backed by the Company s expertise in wireless hosting, software and services.

The Company operates in three business segments: enterprise mobility solutions, mobile government, and transportation.

**(b) BASIS OF PRESENTATION**

The condensed consolidated financial statements include the accounts of Aether Systems, Inc. and its subsidiaries. The condensed consolidated balance sheet as of September 30, 2003 and the condensed consolidated statements of operations and other comprehensive loss for the three and nine months ended September 30, 2003 and 2002, and the condensed consolidated statements of cash flows for the nine months ended September 30, 2003 and 2002, have been prepared by the Company, without audit. In the opinion of management, all adjustments have been made, which include normal recurring adjustments necessary to present fairly the condensed consolidated financial statements. Operating results for the three and nine - month periods ended September 30, 2003 are not necessarily indicative of the operating results for the full year. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. The Company believes that the disclosures provided are adequate to make the information presented not misleading. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in the Company s Annual Report for the year ended December 31, 2002 on Form 10-K.

**NOTE (2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**(a) INVESTMENTS AVAILABLE FOR SALE**

Investments available for sale consist of highly liquid investments in United States Government Agency-sponsored securities with original maturities greater than one year. In prior periods, management had classified these investments as current assets, based on its intention to liquidate such investments within a 12-month period to fund debt repurchases or for other strategic alternatives. In view of market conditions

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

that have resulted in an increase in the trading price of the Company's outstanding 6% convertible subordinated notes and the Company's ongoing evaluation of strategic alternatives, in the third quarter, management concluded it no longer had an intention to liquidate such investments within a 12-month period. Accordingly, as of September 30, 2003, investments available for sale (totaling approximately \$245.2 million) have been reclassified from short-term investments to non-current assets.

Maturities of debt securities classified as available for sale were as follows at September 30, 2003 (in thousands):

<b>(IN THOUSANDS)</b>	<b>Fair Value</b>	
Due after one year through two years	\$	25,295
Due after two years through three years		199,869
Due after three years through four years		20,019
Total	\$	245,183

### (b) USE OF ESTIMATES

The preparation of condensed consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the condensed consolidated financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates. Estimates are used in accounting for, among other things, long-term contracts, allowances for uncollectible receivables, inventory obsolescence and warranty reserves, recoverability of long-lived assets and investments, depreciation and amortization, employee benefits, restructuring accruals, taxes and contingencies. Estimates and assumptions are reviewed periodically and the effects of revisions are reflected in the condensed consolidated financial statements in the period they are determined to be necessary.

## (c) ACCOUNTS RECEIVABLE

Accounts receivable consists of the following:

(IN THOUSANDS)	September 30, 2003		December 31, 2002	
Billed	\$	26,886	\$	26,155
Unbilled		5,679		4,322
Allowance for doubtful accounts		(6,216)		(7,689)
Total Accounts Receivable	\$	26,349	\$	22,788

The Company believes all unbilled accounts receivable included above will be billed within the next twelve months. In addition, the Company has unbilled accounts receivable of approximately \$520,000 relating to a long-term contract. This amount will not be billed in the next twelve months and is included in other non-current assets.

## (d) IMPAIRMENTS

Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually. Intangible assets with estimable useful lives are amortized over their respective estimated useful lives to their estimated residual values. Long lived assets, such as property and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset.

In connection with the adoption of SFAS No. 142, Goodwill and Other Intangibles on January 1, 2002, the Company was required to perform a transitional impairment analysis and reflect the changes as of January 1, 2002. The Company completed its analysis in the third quarter of 2002 and recorded a charge through cumulative effect of change in accounting principle of \$129.3 million. Impairment charges for the three months ended September 30, 2002 were \$62.5 million of which \$49.5 million relates to intangible assets obtained in connection with acquisitions made in 2000, with the remainder relating to long-lived assets, including software, computer equipment, other tangible assets. The impairment of intangibles and other assets for the nine months ended September 30, 2002 was \$64.9 million and included an additional impairment related to the sale of the French subsidiary of our non-US operation, Aether Systems Ltd (formerly Sila Communications Ltd). During the third quarter of 2003 the Company performed its annual impairment test, which indicated that the Company's goodwill was not impaired.

## (e) STOCK OPTIONS AND WARRANTS

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

The Company applies the intrinsic-value-based method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations including FASB Interpretation No. 44, Accounting for Certain Transactions Involving Stock Compensation, an interpretation of APB Opinion No. 25, issued March 2000, to account for its fixed-plan stock options and restricted stock granted to employees. Under this method, compensation expense is recorded on the date of grant only if the current market price of the underlying stock exceeded the exercise price. SFAS No. 123, Accounting for Stock-Based Compensation, established accounting and disclosure requirements using a fair-value-based method of accounting for stock-based employee compensation plans. As allowed by SFAS No. 123, the Company has elected to continue to apply the intrinsic-value-based method of accounting described above, and has adopted only the disclosure requirements of SFAS No. 123. The following table illustrates the effect on net income if the fair-value-based method had been applied to all outstanding and unvested awards in each period:

Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

(IN THOUSANDS, EXCEPT PER SHARE DATA)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2003	2002	2003	2002
Net loss as reported	\$ (9,907)	\$ (96,906)	\$ (37,064)	\$ (301,301)
Add stock-based employee compensation expense included in reported net income	341	1,318	1,471	5,709
Deduct total stock-based employee compensation expense determined under fair-value-based method for all awards	(5,308)	(69,377)	(15,361)	(253,099)
Pro forma net loss	\$ (14,874)	\$ (164,965)	\$ (50,954)	\$ (548,691)
Pro forma net loss per share	\$ (0.35)	\$ (3.92)	\$ (1.20)	\$ (13.04)

(f) EARNINGS PER SHARE

Basic net income (loss) per share is computed by dividing net income (loss) available to common stockholders for the period by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share is computed by dividing the net income (loss) for the period by the weighted average number of common and dilutive common equivalent shares outstanding during the period. As of September 30, 2003 and September 30, 2002, options to purchase approximately 6.0 million and 6.6 million shares of common stock were outstanding. As the Company has had a net loss in each of the periods presented, basic and diluted net loss per share are the same.

(g) RECLASSIFICATIONS

Certain fiscal year 2002 amounts have been reclassified to conform to the current year presentation, including the reclassification of engineering services revenue and cost of engineering service revenue to software and related services revenue and cost of software and related services revenue, respectively. None of these reclassifications had a material effect on the Company's financial statements.

(h) RECENT ACCOUNTING PRONOUNCEMENTS

i) SFAS No. 145

In April 2002, the FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections. SFAS No. 145 rescinded FASB No. 4 and 64 in relation to reporting gains and losses from extinguishment of debt. The Statement amended SFAS No. 4 and 64 and requires gains and losses from extinguishment of debt to be classified as extraordinary items only if they meet the criteria in Opinion 30. Applying the provisions of Opinion 30 differentiates between normal recurring operations of a company and transactions that are unusual or infrequent in nature. In connection with the adoption of SFAS No. 145, the Company reclassified \$3.0 and \$31.3 million of extraordinary gains from early extinguishment of debt to other income (expense) for the three and nine months ended September 30, 2002, respectively.

(ii) Financial Interpretation No. 45

In November 2002, the FASB issued FASB Interpretation No. 45, Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. Interpretation No. 45 discusses the necessary disclosures to be made by a guarantor in its financial statements about its obligations under certain guarantees that it has issued. It also discusses that the guarantor must recognize a liability, at fair value at the inception of the guarantee, for the obligation incurred in issuing the guarantee.

The Company has certain guarantees disclosable under FIN 45 as follows:

The Company has guaranteed the payment of sublease rentals to our landlord on certain properties the Company sublet. The maximum guarantee on these properties is approximately \$1.4 million.

In the Company's Mobile Government segment, the Company may have to pay liquidated damages in some cases if the Company's sub-contractors do not perform on time. In addition, the Company sometimes indemnifies certain of its customers against damages, if any, they might incur as a result of a claim brought against them related to third party software imbedded in the Company's products. The Company is unable to estimate the maximum exposure of such indemnifications due to the inherent uncertainty and the varying nature of the contractual terms.

Under FIN 45, the Company's product warranties are considered guarantees. The following table provides the changes in the Company's product warranties:

Warranty liability balance at December 31, 2002	\$	788
Liabilities accrued for warranties issued during the three months ended March 31, 2003		925
Warranty claims paid during the three months ended March 31, 2003		(134)
Liabilities accrued for warranties issued during the three months ended June 30, 2003		299
Warranty claims paid during the three months ended June 30, 2003		(326)
Liabilities accrued for warranties issued during the three months ended September 30, 2003 (reversal of warranty accrual from prior periods)		(194)
Warranty claims paid during the three months ended September 30, 2003		(320)
Warranty liability balance at September 30, 2003	\$	1,038

(iii) Financial Interpretation No. 46

In January 2003, the FASB issued Interpretation No. 46, Consolidation of Variable Interest Entities, an interpretation of ARB No. 51. This interpretation addresses the consolidation by business enterprises of variable interest entities as defined in the interpretation. The interpretation applies immediately to variable interests in variable interest entities created or obtained after January 31, 2003. Since January 31, 2003, the Company has not entered into any arrangements that it believes are variable interest entities. For arrangements entered into prior to January 31, 2003, the Company is required to adopt the provisions of FIN 46 at the beginning of the first quarter of fiscal 2004. (In October 2003, FIN 46 was amended to change its effective date from the beginning of the third quarter of fiscal 2003 to the beginning of the first quarter of fiscal 2004.) The Company does not expect the application of this interpretation to have a material effect on its financial statements.

(iv) EITF 00-21

In November 2002, the Emerging Issues Task Force issued its final consensus on Revenue Arrangements with Multiple Deliverables. This guidance is effective for revenue arrangements entered into in fiscal periods beginning after June 15, 2003. EITF 00-21 discusses criteria necessary to determine when an arrangement may be viewed to have separate units of accounting (and thus revenue) and when an arrangement should be viewed as a single unit of accounting. The Company adopted EITF 00-21 and it did not have a material effect on the Company's financial statements.

(v) EITF 03-5

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

In July 2003, the Emerging Issues Task Force issued a final consensus on EITF 03-5, Applicability of AICPA Statement of Position 97-2, Software Revenue Recognition, to Non-Software Deliverables in an Arrangement Containing More-Than-Incidental Software. This guidance is effective immediately and discusses the criteria for determining whether non-software deliverables in software arrangements are considered to be software-related and, therefore, included within the scope of SOP 97-2. The adoption of EITF 03-5 did not have a material effect on the Company's financial statements.

(vi) SFAS No. 150

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. The Statement establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. The Statement is effective immediately for financial instruments entered into or modified after May 31, 2003. Since May 31, 2003, the Company has not entered into any financial instruments that it believes would be subject to the provisions of SFAS No. 150. The adoption of this statement did not have a material impact on the consolidated financial statements.

**NOTE (3) ASSET PURCHASES AND SALES**

On March 15, 2002, the Company expanded its products, services, and customer base in the transportation and logistics market through the acquisition of certain assets and licenses from @Track. @Track was a leading provider of wireless-based vehicle fleet management and intelligent mobile-asset-tracking solutions. The purchase consideration (excluding approximately \$800,000 of purchase related expenses) was \$15.0 million consisting of \$3.0 million in cash and a \$12.0 million note payable. The note bore interest at an annual rate of 5.75% and was repaid in three equal, monthly cash installments from May 2002 through July 2002. This acquisition has been accounted for under the purchase method of accounting and, accordingly, the assets acquired and liabilities assumed have been recorded at their estimated fair value as of the acquisition date. The allocation of the purchase price for this acquisition, which was determined based on a third party appraisal, is summarized as follows:

Current assets	\$	1,153
Property and equipment		636
Identifiable intangibles		2,815
Goodwill		11,196
Total consideration	\$	15,800

The following summary, prepared on a pro forma basis, presents the results of the Company's operations as if the @Track asset purchase had been completed as of January 1, 2002:

(IN THOUSANDS, EXCEPT PER SHARE DATA)	Nine months ended September 30, 2002 (UNAUDITED)	
Revenue	\$	93,300
Net loss	\$	(300,419)
Net loss per share - basic and diluted	\$	(7.14)

The unaudited pro forma results of operations are not necessarily indicative of what actually would have occurred if the @Track asset purchase had taken place as of January 1, 2002, nor are they a projection of the Company's results of operations for any future period.

In April 2003, the Company purchased intellectual property relating to the design and manufacturing of certain hardware used in the Company's transportation segment. The purchase consideration was \$2.3 million, which has been recorded as intangible assets in the accompanying condensed consolidated balance sheet.

In June 2003, the Company disposed of an asset held for sale. In connection with this disposal, the Company recorded a loss on disposal of assets of approximately \$838,000.

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

In August 2003, the Company disposed of the Arizona Network Operations Center and received cash proceeds of \$1.4 million. A loss on disposal of these assets of approximately \$272,000 was recorded.

### **NOTE (4) RESTRUCTURING CHARGES**

On January 1, 2003, the Company adopted SFAS No. 146, which requires that a liability for a cost associated with an exit or disposal activity be recognized when incurred at fair value. The Company recorded a charge to earnings in the first three quarters of 2003 of \$4.1 million (including adjustments of approximately \$313,000). The charge reflected primarily fees incurred in terminating a contract, closing a facility and workforce reductions of 84 employees. Employee separation benefits under the restructuring plan include severance, medical, and other benefits. As of September 30, 2003, the accrued liability related to all restructuring activities was \$25.3 million, the majority of which related to outstanding lease obligations. In October and November 2003, the Company settled substantially all of these outstanding lease obligations through payment of \$22.4 million. The remaining obligations are expected to be paid ratably over the next two years.

During the first three quarters of 2002, Aether continued its expense reduction plan in an effort to achieve operational efficiencies and reduce planned expenses. These efforts resulted in the further consolidation of excess facilities and elimination of positions. As a result of this restructuring plan, the Company recorded a charge to earnings in the first nine months of 2002 of \$24.0 million (including adjustments of approximately \$5.3 million). The charge related mainly to a workforce reduction of over 277 positions and the closing or consolidation of three facilities. Employee separation benefits of \$4.3 million under the restructuring plan include severance, medical, and other benefits. Facility closure and other costs of \$19.7 million include expected losses on subleases, brokerage commissions, asset impairment charges, contract termination costs and other costs.

Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

The calculation of the restructuring accrual related to expected losses on subleases required the Company to make estimates concerning: (1) the expected length of time to sublease the facility; (2) the expected rental rates on subleases; and, (3) estimated brokerage expenses associated with executing the sublease. The Company uses the assistance of independent real estate brokerage firms in developing these estimates and the Company's estimates may be impacted by future economic trends.

A roll-forward of the restructuring accrual is as follows:

	Employee Separation Benefits	Facility Closure Costs and Other	Total
Total restructuring liability as of December 31, 2001	\$ 1,602	\$ 26,215	\$ 27,817
<b>2002 Restructuring:</b>			
First quarter	2,690	6,491	9,181
Adjustments made during the first quarter	941	2,434	3,375
Second quarter	110	2,348	2,458
Adjustments made during the second quarter	(27)	594	567
Third quarter	587	6,522	7,109
Adjustments made during the third quarter		1,335	1,335
Fourth quarter	1,280	8,651	9,931
Adjustments made during the fourth quarter	21	3,767	3,788
Total restructuring charge for period ending December 31, 2002	\$ 5,602	\$ 32,142	\$ 37,744
Second quarter reclassification from other accruals		774	774
Third quarter non-cash charges		(6,522)	(6,522)
Fourth quarter non-cash charges		1,903	1,903
Cash payments	(6,781)	(22,483)	(29,264)
Total restructuring liability as of December 31, 2002	\$ 423	\$ 32,029	\$ 32,452
<b>2003 Restructuring:</b>			
First quarter	\$ 526	\$	\$ 526
Second quarter	592	2,146	2,738
Adjustments made during the second quarter	(360)		(360)
Third quarter	226	624	850
Adjustments made during the third quarter	47		47
Total restructuring charge for period ending September 30, 2003	\$ 1,031	\$ 2,770	\$ 3,801
Cash payments	(1,400)	(9,529)	(10,929)
Total restructuring liability as of September 30, 2003	\$ 54	\$ 25,270	\$ 25,324

**NOTE (5) RELATED PARTY TRANSACTIONS**

In the ordinary course of business, the Company has entered into sales arrangements with entities in which the Company has equity interests or entities that have an equity interest in the Company. For the three and nine months ended September 30, 2003, the Company recorded revenue from these related parties aggregating approximately \$320,000 and \$736,000, respectively. For the three and nine months ended September 30, 2002, the Company recorded revenue from these related parties aggregating approximately \$146,000 and \$1.3 million, respectively. As of September 30, 2003 and December 31, 2002, the Company had gross accounts receivable from these related entities aggregating approximately \$52,000 and \$227,000, respectively.

During 2003, the Company received services from Huber Oros (benefit coordination services) and Kirkland & Ellis LLP (legal services). These service providers are considered related parties because in the case of Huber Oros, he is related to a member of senior management of the Company and in the case of Kirkland & Ellis LLP, a member of the Company's Board of Directors is a partner at the firm. For the three and nine months ended September 30, 2003, these expenses were approximately \$26,000 and \$83,000, respectively for Huber Oros, and were approximately \$387,000 and \$437,000, respectively for Kirkland & Ellis LLP.

During 2002, the Company received services from Huber Oros (benefit coordination services), Reuters (market data information), and AOL Time Warner (advertising). Reuters and AOL Time Warner were stockholders of the Company in 2002. For the three and nine months ended September 30, 2002, these expenses were approximately \$39,000 and \$133,000, respectively for Huber Oros, were approximately \$184,000 and \$473,000, respectively for Reuters, and were approximately \$920,000 and \$4.6 million, respectively for AOL Time Warner.

**NOTE (6) LEGAL PROCEEDINGS**

Aether is among the hundreds of defendants that are named in the putative class action lawsuits filed in the United States District Court for the Southern District of New York relating to allegedly fraudulent initial public offering practices, which are being coordinated before Judge Shira A. Scheindlin under the caption In Re Initial Public Offering Securities Litigation, 21 MC 92 (S.D.N.Y.) (SAS). The court has consolidated the actions by issuer, and, accordingly, there are approximately 310 consolidated actions before Judge Scheindlin, including the consolidated action against Aether.

These actions were filed on behalf of persons and entities that acquired Aether common stock after the initial public offering on October 20, 1999. Among other things, the complaints claim that prospectuses, dated October 20, 1999, March 17, 2000, and September 27, 2000 and issued by Aether in connection with the public offerings of common stock, allegedly contained untrue statements of material fact or omissions of material fact in violation of securities laws because, inter alia, the prospectuses allegedly failed to disclose that the offerings' underwriters had solicited and received additional and excessive fees, commissions and benefits beyond those listed in the arrangements with certain of their customers which were designed to maintain, distort and/or inflate the market price of the Company's common stock in the aftermarket. The actions seek unspecified monetary damages and rescission. Aether believes the claims are without merit and is vigorously contesting these actions.

Initial motions to dismiss the case were filed and the court held oral argument on the motions to dismiss on November 1, 2002. On February 19, 2003, the court issued an Opinion and Order on defendants' motions to dismiss, which granted the motions in part and denied the motions in part. As to Aether Systems, the motion to dismiss the claims against it was denied in its entirety. Discovery is now commencing against the

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

underwriter defendants. The plaintiffs voluntarily dismissed without prejudice the officer and director defendants of Aether. On June 26, 2003, the Plaintiffs' Executive Committee in this case announced a proposed settlement with the issuers. The proposed settlement provides that the cases against the more than 300 issuers who had IPO's between 1998 and 2000 will end. Aether has agreed to support the settlement. Under the terms of the proposed settlement, Aether would not incur any material financial or other liability. The proposed settlement would not involve the cases against the 55 investment bank underwriter defendants, which would continue. Final approval of the proposed settlement will be required by the Court following notice to class members and a fairness hearing. There can be no assurance such approval will be granted.

Aether is also a party to other legal proceedings in the normal course of business. Based on our evaluation of these matters and discussions with counsel, the Company believes that liabilities arising from these matters will not have a material adverse effect on the consolidated results of its operations or financial position.

**NOTE (7) SEGMENT INFORMATION**

The Company's operating segments include Enterprise Mobility Solutions, Transportation, and Mobile Government.

The Enterprise Mobility Solutions (EMS) Segment is focused on providing integrated wireless data solutions to enterprises with product development emphasis on field service, sales force automation, distribution and delivery management, and mail and messaging access.

The Transportation Segment's main products are MobileMax, a vehicle location and messaging solution for long-haul trucks, and a number of asset monitoring products, including GeoLogic, TrailerMax and 20/20v. The MobileMax product has least-cost-routing capability made possible by multi-mode technology (terrestrial and satellite connectivity) to deliver two-way data and dispatch messaging and automatic, instantly communicated information on each vehicle - typically trucks.

The Mobile Government Segment, provides wireless data solutions for public safety operations. The Company's products have both law enforcement and asset tracking. The Company's public safety solutions are integrated into 47 different state databases as well as local and federal databases to deliver real-time information in seconds without having to involve dispatch or other resources. The Company's products in this area are the PacketCluster family of products, the handheld version of PacketCluster Patrol called PocketBlue, the FireRMS family of products for fire and rescue companies, and the handheld application for this community, PocketRescue.

Corporate and Other consists mainly of corporate assets. The Company does not allocate corporate assets to the Segments for internal reporting purposes.

During the third quarter of 2003, certain Logistics projects that were previously reported as part of the Transportation segment were reorganized as part of the EMS Segment's Logistics offering. Accordingly, the comparative data in the table below has been reclassified to include these projects in the EMS Segment for all fiscal periods.

The Company began to report its financial results by segment as of the first quarter of 2000. The Company's reportable segments have changed each year. In the future, the Company's reportable segments may continue to change as the operating structure, business and the market in which we operate evolves.

Segment detail is summarized as follows:

<b>THREE MONTHS ENDED SEPTEMBER 30, 2003</b>	<b>Enterprise Mobility Solutions</b>	<b>Transportation</b>	<b>Mobile Government</b>	<b>Corporate &amp; Other</b>	<b>Total</b>
Revenue	\$ 13,502	\$ 8,284	\$ 5,407	\$	\$ 27,193

## **ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)**

You should read the following description of our financial condition and results of operations in conjunction with our Consolidated Financial Statements and Notes thereto included in Item 1 of Part I of this Quarterly Report on Form 10-Q, as well as the Audited Financial Statements and Notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2002 contained in our 2002 Annual Report on Form 10-K.

### **OVERVIEW**

We provide wireless and mobile workforce automation solutions that are designed to make people more productive and their organizations more profitable. We provide the technology and services necessary for businesses and government agencies to extend existing and future applications and data from the desktop to almost any wireless or mobile device.

Our market strategy is to develop, deploy and manage mobile and wireless solutions built on industry standard technology referred to as Aether Fusion and backed by expertise in wireless hosting, software and services.

Our operating strategy is to maintain and grow our existing customer base while managing scalable infrastructure to increase gross margins. Profitability in the short term is our key financial goal. Accordingly, we have aggressively managed costs and reduced operating expenses over the last several quarters. We plan to continue to focus on streamlining operations, as needed, and on efficiently managing expenses in the effort to achieve profitability. However, the Company does not expect to realize significant expense reductions in its existing operations in future quarters. At the same time, we are actively exploring various strategic alternatives that we believe would enhance our ability to become profitable more quickly and thereby reduce our consumption of cash to fund operating losses, as well as realize value from our substantial accumulated net operating losses. Strategies that the Company is considering include, among others, selling selected assets or businesses that we do not believe contribute (or contribute sufficiently) to long-term shareholder value, completing strategic acquisitions to complement our existing businesses, seeking additional joint venture and alliance opportunities with customers or strategic partners, completing acquisitions of new lines of business, and pursuing new strategies for investing our cash balances. There can be no assurance that we will be able to effect any of these alternatives on favorable terms or at all. It is possible that our business will change significantly as a result of pursuing one or more of these strategies. In addition, certain of these strategies may affect our operating results in the near term, which effect could be negative if there is an extended evaluation of possible alternatives.

In the first quarter of 2002, we expanded our products, services, and customer base in the transportation market through the acquisition of certain assets and licenses from @Track Communications, Inc. ( @Track ). @Track was a leading provider of wireless-based vehicle fleet management and intelligent mobile-asset-tracking solutions.

In the first quarter of 2003, we signed two agreements with EDS to implement two initiatives that had been under discussion for several months. Under an alliance agreement, we began working with EDS to develop and deliver wireless and mobile solutions based on Aether technologies and EDS services. Under a managed services agreement, EDS began to manage on a fee-for-services basis some of our internal information technology (IT) operations and customer care services. In the second quarter of 2003, we initiated discussions with EDS about a potential restructuring of the managed services agreement to reduce or defer a portion of the fees that EDS charges us and the services that EDS provides

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

to us. As a result of these discussions, Aether and EDS agreed mutually to terminate the managed services agreement effective June 30, 2003 and to continue the alliance arrangement. The contract termination costs are included in the restructuring charges for the quarter ended June 30, 2003 and all amounts relating to the termination were paid as of June 30, 2003. We cannot predict what impact, if any, the termination of the managed services agreement will have on its ongoing business relationship with EDS.

On July 1, 2003, we launched one of the first products resulting from our development effort in EMS, Aether 20/20 Delivery . Based on our Fusion technology foundation, 20/20 Delivery is a wireless logistics application that provides complete visibility into the supply chain, from package and vehicle tracking to driver management and communication. On July 1, 2003, we announced one of the first customers for 20/20 Delivery , Corporate Express, Inc., that will be deploying 20/20 Delivery to its entire fleet of 1,600 trucks.

On October 20, 2003, we announced a series of new technology enhancements to Aether MobileMax, our wireless communications and tracking solution for the transportation industry. MobileMax now features Text-To-Voice technology, Handheld Access via a PDA, Wireless Driver E-Mail, and an entirely Web-based host. These enhancements are intended to address a wide variety of fleet issues, including driver safety and convenience, process automation, and system management flexibility. We anticipate that the Web-based host application will also make MobileMax more attractive to small and medium fleets. Driver e-mail provides an additional private communication option for truckers. The interface with handheld devices, combined with our multi-mode network, are intended to allow us to better address the needs of less-than-load (LTL), pick-up and delivery (P&D), and private carriers.

## CRITICAL ACCOUNTING POLICIES

Our critical accounting policies are as follows:

Revenue recognition;

Estimating the valuation allowance for sales returns and doubtful accounts;

Estimating the realizable value of our inventory;

Restructuring accruals

### (a) REVENUE RECOGNITION

We derive our revenue from three sources: (i) subscriber revenue, (ii) software and related services, and (iii) device sales. As described below, significant management judgments and estimates must be made and used in connection with the revenue recognized in any accounting period. If we made different judgments or utilized different estimates, the amount and timing of our revenue might have differed materially from that reported.

We have decided to report engineering services revenue together with software and related services revenue because engineering services now largely support software development efforts (and related services) and represent a small portion of Aether's overall revenue.

#### i.) Subscriber revenue

We derive subscriber revenue from the provision of real-time access to business information integrated into existing wireless communication platforms, and from the provision of comprehensive business solutions designed to meet the mobile management needs of truckload, less-than-load and private carriers. For all sales, we obtain signed binding contracts with our subscribers. Contracts with our EMS wireless data subscribers are generally for a one-year period and include a termination penalty if cancelled by the subscriber before the one-year period expires. These contracts are generally renewable at the option of the subscriber for additional one-year periods or otherwise continue on a monthly basis until cancelled by the subscriber.

Contracts with our transportation subscribers are generally for three- to five-year periods and include a termination penalty if cancelled by the subscriber before the term of the contract expires. The contracts are generally renewable at the option of the subscriber for additional periods or otherwise continue on a monthly basis until cancelled by the subscriber.

Subscriber revenue is recognized monthly as the service is provided. Activation fees are deferred and recognized ratably over the expected life of the customer relationship which is typically the length of the customer contract.

ii.) Software and related services revenue

Software and related services revenue is generated from licensing software and providing services, including engineering services, maintenance and technical support, training and consulting. Software revenue consists of fees for licenses of our software products. We recognize the revenue when the license agreement is signed, the license fee is fixed and determinable, delivery of the software has occurred, and when we estimate that collection of the fees is probable. At the time of the transaction, we assess whether the fee associated with such transaction is fixed and determinable and whether or not collection is reasonably assured. If a significant portion of a fee is due after our normal payment terms (that is, on extended payment terms), we account for the fee as not being fixed and determinable. In these cases, we recognize revenue as the fees become due. We assess collection based on a number of factors, including past transaction history with the customer and credit worthiness of the customer. We do not request collateral from our customers. If we determine that collection of a fee is not reasonably assured, we defer the fee and recognize revenue at the time it becomes reasonably assured, which is generally upon receipt of cash. If we assessed collectibility differently, the timing and amount of our revenue recognition may have differed materially from that reported.

Revenue from licensing software that requires significant customization and modification is recognized using the percentage of completion method. Revenue on the percentage-of-completion method is recognized based on hours incurred in relation to total estimated hours. If we anticipate that we will lose money on a contract, losses are recognized as soon as they become known and estimable. Considerable judgment may be required in determining estimates to complete a project including the scope of work to be completed and reliance on the customer or other vendors to fulfill some tasks. If we made different judgments or utilized different estimates of the total amount of work we expect to be required to customize or modify the software, the timing of our revenue recognition from period to period, and our margins in the reporting period, may have differed materially from that reported.

Service revenues consist principally of engineering services, maintenance and technical support. These include unspecified when-and-if available product updates and customer telephone support services. The service revenues are recognized ratably over the term of the service period. Other service revenues are recognized as the related services are provided. In situations where we host software for a customer and the customer has the option to take possession of the software at any time during the hosting period without significant penalty and we believe it is feasible for the customer to either run the software on its own hardware or contract with another party unrelated to us to host the software, the software element is accounted for as a separate element, in accordance with SOP 97-2. Otherwise, such amounts are recognized ratably over the hosting period. If our assessment of this feasibility were different, the timing of our revenue recognition may have differed materially from that reported.

iii.) Device revenue

We derive device revenue on the sale of wireless devices used to provide our services. We have assessed the interoperability of the types of hardware that we sell, and when customers can obtain similar equipment from other parties to receive services we offer, or customers can use equipment purchased from us with services provided by other service providers, we recognize equipment revenue, including the related shipping, installation and activation services, when collectibility is probable and the equipment and related services are provided to the customer. When the equipment is not deemed to be interoperable (i.e., it can only be used by a customer to acquire our services), the equipment revenue, including the related shipping and activation fees, and related cost are deferred and recognized over the shorter of the life of the equipment or the estimated term of the subscriber. In these situations, we allocate amounts to the device and subscriber categories based on the relative fair values. When we sell hardware and software, and the hardware is considered essential to the functionality of the software, we account for the two elements as one unit of accounting. In reporting revenues, we allocate amounts between software and device revenue based on their relative fair values. If we allocated the respective fair values of the software and hardware differently, the timing of our revenue recognition may have differed materially from that reported.

iv.) Revenue from multiple element arrangements

For arrangements with multiple elements, we allocate revenue to each component of the arrangement using the residual value method. This means that we defer revenue from the total fees associated with the arrangement equivalent to the fair value of the element(s) of the arrangement that has (have) not yet been delivered. The fair value of any undelivered elements is established by using historical evidence specific to Aether. For instance, the fair values for maintenance and technical support are based on our separate sales of renewals to other customers or upon the renewal rates quoted in the contracts and the fair value of services, such as training, is based on our separate sales of these services on a standalone basis to other customers. If we allocated the respective fair values of the elements differently, the timing of our revenue recognition may have differed materially from that reported.

(b) ALLOWANCE FOR SALES RETURNS AND DOUBTFUL ACCOUNTS

The preparation of financial statements requires us to make estimates and assumptions that affect the reported amount of assets and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Specifically, we must make estimates of potential product returns and the valuation of our accounts receivable. We analyze historical returns, current economic trends, and changes in customer demand and acceptance of our products when evaluating the adequacy of our allowance for sales returns. We recorded provisions for sales returns of approximately \$268,000 and \$217,000 during the nine months ended September 30, 2003 and 2002, respectively. We analyze historical bad debts, customer concentrations, customer credit-worthiness, and current economic trends when evaluating the adequacy of the allowance for doubtful accounts. As a result, we recorded bad debt expense of \$1.2 million and \$3.8 million during the first nine months of 2003 and 2002, respectively, which is recorded in selling and marketing expense in the accompanying Condensed Consolidated Statement of Operations. The decline in bad debt expense is primarily attributable to improved historical bad debts and a decline in credit concentrations in higher-risk customers. As of September 30, 2003, our net accounts receivable balance was \$26.3 million, net of allowance for sales returns and doubtful accounts of \$6.2 million. As of December 31, 2002, our net accounts receivable balance was \$22.8 million, net of allowance for sales returns and doubtful accounts of \$7.7 million. If we had used different estimates and assumptions related to the amount of sales returns we would receive, and about the collectibility of our accounts receivable, our provisions for sales returns and allowance for doubtful accounts may have differed materially from that reported.

(c) VALUATION OF INVENTORY

Inventory, net of allowance for obsolete and slow-moving inventory, consists of finished goods such as handheld computers, pagers, wireless modems, and accessories and is stated at the lower of cost or market. Cost is determined using a standard costing method, which approximates the first-in, first-out method. Our inventory is subject to rapid technological changes that could have an adverse impact on its realization in future periods. In addition, there are a limited number of suppliers of our inventory. We estimate the value of our inventory based on our consideration of the following: (1) quantities and composition of inventory held; (2) sales prices of competing vendors; (3) projected unit sales and unit pricing over subsequent twelve month period; and (4) evaluation of remaining inventory purchase commitments. If our projections were different, our margins on device sales may have differed materially from that reported. If our estimates of projected units sales and unit pricing are less than actual results, we may be required to record additional impairment charges in the future.

(d) ESTIMATION OF RESTRUCTURING ACCRUALS

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

On January 1, 2003, we adopted SFAS No. 146, which requires that a liability for a cost associated with an exit or disposal activity be recognized when incurred at fair value. Since 2001, we have implemented multiple restructuring plans that have resulted in charges being recorded to earnings. The calculation of the restructuring accrual related to expected losses on subleases required us to make estimates concerning: (1) the expected length of time to sublease the facility; (2) the expected rental rates on subleases; and, (3) estimated brokerage expenses associated with executing the sublease. We use the assistance of independent real estate brokerage firms in developing these estimates and our estimates may be impacted by future economic trends. If the actual results differ from our estimates, we may be required to adjust our restructuring accrual related to expected losses on subleases, including recording additional losses.

We recorded a charge to earnings in the first three quarters of 2003 of \$4.1 million. The charge reflected primarily fees incurred in terminating a contract, closing a facility and workforce reductions of 84 employees. Employee separation benefits under the restructuring plan include severance, medical, and other benefits. As of September 30, 2003, the accrued liability related to all restructuring activities was \$25.3 million, the majority of which related to outstanding lease obligations. In October and November 2003, the Company settled substantially all of these outstanding lease obligations through payment of \$22.4 million. The remaining obligations are expected to be paid ratably over the next two years.

During the first three quarters of 2002, Aether continued its expense reduction plan in an effort to improve operational efficiencies and to reduce planned expenses. These efforts resulted in the further consolidation of excess facilities and elimination of positions. As a result of this restructuring plan, we recorded a charge to earnings in the first three quarters of 2002 of \$24.0 million (including adjustments of approximately \$5.3 million). The charge related mainly to a workforce reduction of over 277 positions and the closing or consolidation of three facilities. Employee separation benefits of \$4.3 million under the restructuring plan included severance, medical, and other benefits. Facility closure and other costs of \$19.7 million included expected losses on subleases, brokerage commissions, asset impairment charges, contract termination costs and other costs.

For discussion of recent accounting pronouncements relevant to the Company, see Note 2(h) to the Company's condensed consolidated financial statements.

**COMPARISON OF RESULTS FOR THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2003 AND 2002**

(a) **SUBSCRIBER REVENUE**

Subscriber revenue consists of monthly per-subscriber service fees, monthly per-subscriber exchange fees for access to financial information from the securities exchanges and markets, monthly fees for providing access to our network operations center, and the amortization over the life of the expected customer relationship of nonrefundable activation fees.

Subscriber revenue decreased to \$16.8 million for the three months ended September 30, 2003 from \$18.8 million for the three months ended September 30, 2002. Of the decrease, approximately \$3.2 million resulted from the previously reported process of seeking to convert Highway Master subscribers (acquired during 2002 from @Track Communications, Inc.) to our MobileMax product line. Highway Master subscriber revenue decreased \$4.0 million, offset somewhat by a \$0.8 million increase in MobileMax subscriber revenue. As expected, certain Highway Master customers have not elected to convert to MobileMax. Those customers who do convert typically enter longer term, multi-year contracts with lower monthly fees than they were paying for Highway Master service. The MobileMax product's revenue model is a lower yet more consistent monthly fee, as compared to the more variable model of Highway Master. The Company expects a majority of the Highway Master conversion process to be completed by the end of this year and that a significant portion of the remaining Highway Master customers will convert to MobileMax, although the Company can not assure this result. Subscriber decreases for financial and custom applications was another driver in the overall decline in subscriber revenue. These decreases were offset by a \$1.7 million increase in Blackberry by Aether subscriber revenue as a result of subscriber growth and, to a lesser extent, a price increase to the Blackberry by Aether customer base. Our total number of subscribers for all of our services has decreased to approximately 102,000 at September 30, 2003 from approximately 109,000 at September 30, 2002. This decrease is primarily due to the departure of subscribers from the Highway Master product line partially offset by increases in subscribers to Blackberry by Aether and MobileMax.

Subscriber revenue increased to \$53.5 million for the nine months ended September 30, 2003 from \$51.0 million for the nine months ended September 30, 2002. The increase is primarily due to a \$6.4 million increase in revenue from Blackberry by Aether subscribers, arising from subscriber growth and, to a lesser extent, a price increase to our Blackberry by Aether customer base effective August 2003. MobileMax subscriber revenue also increased, offset somewhat by a \$4.5 million decrease in Highway Master and by a decline in financial and custom application subscribers. Subscriber revenue in the current quarter and for the first nine months of 2003 has benefited from significant growth in Blackberry by Aether subscribers. The subscriber base in the future may not grow at the rates we have experienced in the past.

Research in Motion Limited ( RIM ) sells us the subscriber devices that we resell to our Blackberry by Aether customers and certain of our other data service customers. According to press reports and RIM news releases, in the spring and summer of 2003, a federal district court awarded substantial money damages against RIM and granted (and then immediately stayed, pending appeal) an injunction against RIM that would prohibit RIM from selling various Blackberry devices, software or services, in the United States. The case involves claims that RIM's BlackBerry technology infringes the patents of another company, NTP, Inc. RIM has said it is appealing this decision, and the U.S. Patent and Trademark Office ( PTO ) is reexamining the validity of certain of NTP's patent claims. We cannot assess the likelihood that RIM will succeed in any appeal or that the PTO will narrow or find any of these patent claims invalid, or that RIM will be able to negotiate a license with the company that holds the patents at issue. Ultimately, RIM might be prohibited from selling Blackberry devices or might raise its prices to offset licensing fees or damage payments. Either result could have a negative impact upon our revenues and earnings. This litigation is not presently having an impact on our business. We also are aware of one other company (in addition to NTP, Inc.) that has claimed that the RIM subscriber devices we resell may infringe its patent rights. RIM has filed suit against this company, disputing any such claims.

(b) COST OF SUBSCRIBER REVENUE

Cost of subscriber revenue consists primarily of airtime costs, financial data costs, and securities exchange and market fees. Our airtime costs are determined by agreements we have with several wireless carriers. Typically, we have one-year contracts to buy data network capacity either for an agreed amount of kilobytes at a flat fee or on a cents-per-kilobyte basis. Cost of subscriber revenue excludes depreciation on, and operating costs of, our network operations center and certain costs of customer fulfillment and customer care. These costs are included in operating expenses. Cost of subscriber revenue was \$10.2 million for the three months ended September 30, 2003, and for the three months ended September 30, 2002. Cost of subscriber revenue remained relatively flat primarily due to a decrease in subscribers for the Highway Master product line discussed above offset by an increase in Blackberry by Aether costs due to subscriber growth and, to a lesser extent, an airtime price increase effective July 2003 (which was passed through to subscribers beginning in August 2003). The increase in MobileMax subscribers also contributed to offset the decline in Highway Master costs.

Cost of subscriber revenue decreased to \$28.4 million for the nine months ended September 30, 2003, from \$28.7 million for the nine months ended September 30, 2002. The slight decrease in subscriber cost is primarily due to the decrease in number of Highway Master, financial and custom application subscribers, offset somewhat by subscriber increases for Blackberry by Aether and MobileMax. Additionally, the Blackberry by Aether cost of revenue was favorably impacted \$1.5 million by a one-time reduction related to the renegotiation of an airtime contract in the second quarter.

(c) SOFTWARE AND RELATED SERVICES REVENUE

We derive revenue from the licensing of software products such as our PacketCluster, PocketBlue and FireRMS software suites most often used by our federal, state and local government customers. We also derive revenue from the licensing of other software products including elements of the Aether Fusion platform, formerly sold as AIM, and the ScoutWare software suite, as well as from the e-Mobile software suite. Additionally, we receive revenue from engineering services, which consists of amounts billed to our customers for engineering time on an hourly basis or fixed fees on a per project basis. Software and related services revenue decreased to \$6.3 million for the three months ended September 30, 2003, from \$6.9 million for three months ended September 30, 2002. The decrease between periods is primarily due to a decrease in legacy software sales and custom engineering work partially offset by an increase in 20/20 D software sales and customization. Software and related services revenue decreased to \$18.1 million for the nine months ended September 30, 2003, from \$20.9 million for the nine months ended September 30, 2002. The decrease between periods is primarily due to a decrease in legacy software sales and custom engineering partially offset by an increase in 20/20 D software sales and customization and PacketCluster software suite sales.

(d) COST OF SOFTWARE AND RELATED SERVICES REVENUE

Cost of software and related services revenue consists of costs of licensing, including royalty payments and personnel costs. Cost of software and related services revenue decreased to \$1.5 million for the three months ended September 30, 2003 from \$2.5 million for the three months ended September 30, 2002. Cost of software and related services revenue decreased to \$4.0 million for the nine months ended September 30, 2003 from \$8.0 million for the nine months ended September 30, 2002. The decrease between periods was primarily due to the decrease in costs associated with legacy software sales and custom engineering.

(e) DEVICE SALES

We derive device revenue on the sale of wireless devices used to provide our services. Device revenue relating to our transportation segment is recognized ratably over the shorter of the life of the equipment or the estimated term of the customer relationship. Revenue from device sales decreased to \$4.1 million for the three months ended September 30, 2003 from \$6.1 million for the three months ended September 30, 2002. The decrease was primarily due to a decline in the volume of Blackberry by Aether units sold. Revenue from device sales decreased to \$12.6 million for the nine months ended September 30, 2003 from \$15.2 million for the nine months ended September 30, 2002. The decrease was primarily due to a decline in the volume of Blackberry by Aether units sold, offset somewhat by an increase in MobileMax hardware revenue.

(f) COST OF DEVICE SALES

Cost of device sales consists of the cost of the hardware from the hardware manufacturer or wholesaler. Cost of device revenue relating to our transportation segment is recognized ratably over the shorter of the life of the equipment or the estimated term of the customer relationship. Cost of devices decreased to \$4.0 million for the three months ended September 30, 2003 from \$5.7 million for the three months ended September 30, 2002. The decrease in cost is primarily due to the decreased volume of Blackberry by Aether units sold, partially offset by an increase in repair costs for MobileMax units. Cost of devices decreased to \$12.2 million for the nine months ended September 30, 2003 from \$13.6 million for the nine months ended September 30, 2002. The decrease in cost is primarily due to the decreased volume of Blackberry by Aether units sold, partially offset by an increase in repair costs for MobileMax units.

(g) RESEARCH AND DEVELOPMENT EXPENSES

Research and development expenses consist primarily of cash compensation and related costs for engineers engaged in research and development activities and, to a lesser extent, costs of materials relating to these activities. We expense research and development costs as we incur them. Research and development expenses decreased to \$3.6 million for the three months ended September 30, 2003 from \$5.7 million for the three months ended September 30, 2002. The decrease was primarily due to lower personnel costs of \$2.1 million as a result of reductions in the workforce. The personnel decrease was offset slightly by increases in outside services and travel.

Research and development expenses decreased to \$12.3 million for the nine months ended September 30, 2003 from \$21.3 million for the nine months ended September 30, 2002. The decrease from 2002 to 2003 was primarily due to a \$7.7 million decrease in personnel costs as a result of our reduction in work force. The remainder of the decrease was from moderate declines in outside services, recruiting, software, travel, facility, telecommunications and other expenses. For more information on our restructuring efforts, refer to the section entitled Estimation of Restructuring Accruals above.

(h) GENERAL AND ADMINISTRATIVE EXPENSES

General and administrative expenses consist primarily of cash compensation and related costs for general corporate personnel, along with rent, network operations costs, and general support costs. General and administrative expenses decreased to \$8.3 million for the three months ended September 30, 2003 from \$14.0 million for the three months ended September 30, 2002. Personnel costs decreased \$2.3 million as a result of our reduction in workforce and a reduction to the accrual for employee incentive compensation. Facility and telecommunications expenses decreased approximately \$1.2 million as a result of reduced staffing leading to consolidation and elimination of leased space and telecommunications infrastructure. Approximately \$1.1 million of the remaining decrease was the result of reducing accruals (primarily for outside services and taxes) to the level currently believed payable.

General and administrative expenses decreased to \$30.9 million for the nine months ended September 30, 2003 from \$47.0 million for the nine months ended September 30, 2002. The decrease from 2002 to 2003 was primarily due to a \$7.8 million decrease in personnel costs as a result of our reduction in workforce. Facility and telecommunication expenses decreased \$4.0 million based on the elimination of leased facilities and telecommunications infrastructure. Travel decreased \$1.0 million. Most other expense categories also decreased, including those for professional fees, software, insurance and taxes, some of which were impacted by the approximately \$1.1 million of third quarter accrual reduction. For more information on our restructuring efforts, refer to the section entitled "Estimation of Restructuring Accruals" above.

(i) **SELLING AND MARKETING EXPENSES**

Selling and marketing expenses consist primarily of advertising and promotions, sales and marketing personnel, bad debt expense and travel and entertainment. Selling and marketing expenses decreased to \$3.3 million for the three months ended September 30, 2003, from \$6.2 million for the three months ended September 30, 2002. The decrease in selling and marketing expenses was primarily due to a \$1.2 million reduction in personnel expenses, a \$1.2 million decrease in advertising and approximately \$400,000 in lower bad debt expense.

Selling and marketing expenses decreased to \$10.1 million for the nine months ended September 30, 2003 from \$25.3 million for the nine months ended September 30, 2002. The decrease in selling and marketing expenses from 2002 to 2003 was due primarily to decreased spending of approximately \$5.9 million on advertising, \$5.2 million in reductions in personnel costs and \$2.2 million in decreased bad debt expense. Outside services and travel also decreased significantly. A large portion of the decreased advertising expense relates to terminating the AOL advertising commitment that was responsible for \$4.4 million of the advertising expense for the nine months ended September 2002. The decline in bad debt expense is primarily attributable to improved historical bad debts and a decline in credit concentrations in higher-risk customers. For more information on our restructuring efforts, refer to the section entitled "Estimation of Restructuring Accruals" above.

(j) **DEPRECIATION AND AMORTIZATION**

Depreciation and amortization expenses consist primarily of the amortization of intangible assets obtained in connection with our acquisitions. Depreciation and amortization expenses also include depreciation expenses arising from equipment purchased for our data centers and other property and equipment purchases. Depreciation and amortization decreased to \$3.7 million for the three months ended September 30, 2003, from \$10.0 million for the three months ended September 30, 2002. Depreciation and amortization decreased to \$12.1 million for the nine months ended September 30, 2003 from \$31.3 million for the nine months ended September 30, 2002. The decrease results primarily from reduced carrying value of our amortizable intangible assets. That carrying value was reduced in connection with the impairment charges we recorded during 2002, including the impairment charges related to the cumulative effective of change in accounting principle resulting from our adoption of SFAS No. 142 on January 1, 2002.

(k) **OPTION AND WARRANT EXPENSE**

Option and warrant expense consists of expenses recorded to account for the difference on the date of grant between the fair market value and the exercise price of stock options issued to employees (which, when granted at an exercise price equal to fair market value on the grant date, is zero), restricted stock granted to employees and the fair value of equity-based awards to non-employees. Because of grants of restricted stock under our restricted stock plan, on which we recognize expense equal to the fair market value of the stocks as it vests, we expect to continue to have substantial option and warrant expense. Option and warrant expense decreased to approximately \$341,000 for the three months ended September 30, 2003 from \$1.3 million for the three months ended September 30, 2002. Option and warrant expense decreased to \$1.5 million for the nine months ended September 30, 2003 from \$5.7 million for the nine months ended September 30, 2002. The decrease for 2003 was primarily due to the canceling of the options and forfeiture of restricted stock grants of persons whose positions were eliminated as part of our restructuring efforts. For more information on our restructuring efforts refer to the section entitled "Estimation of Restructuring Accruals" above. We expect the amount of option and warrant expense will fluctuate over time as the market price of our stock fluctuates, because of our use of

restricted stock grants as a form of employee compensation.

(1) IMPAIRMENT OF INTANGIBLES AND OTHER

Impairment of intangibles and other assets consists of the amount of goodwill, and other intangibles and tangible assets, written down in the period. Impairment charges for the three and nine months ended September 30, 2003 were approximately \$20,000 and \$2.7 million primarily related to additional write down of assets held for sale and tangible assets, determined in accordance with SFAS No. 144. Impairment charges for the three months ended September 30, 2002 were \$62.5 million of which \$49.5 million relates to intangible assets obtained in connection with acquisitions made in 2000, with the remainder relating to long-lived assets, including software, computer equipment, other tangible assets. We, with the assistance of third party appraisers, determined the fair value of these assets based on a combination of quoted market prices and a cost approach methodology. The impairment of intangibles and other assets for the nine months ended September 30, 2002 was \$64.9 million and included an additional impairment related to the sale of the French subsidiary of our non-US operation, Aether Systems Ltd (formerly Sila Communications Ltd).

(m) **RESTRUCTURING CHARGE**

On January 1, 2003, we adopted SFAS No. 146, which requires that a liability for a cost associated with an exit or disposal activity be recognized when incurred at fair value. We recorded a charge to earnings for the three and nine months ended September 30, 2003 of approximately \$897,000 and \$3.8 million, respectively, related mainly to fees incurred in terminating a contract, closing a facility and workforce reductions. Employee separation benefits under the restructuring plan include severance, medical, and other benefits. As of September 30, 2003, the accrued liability related to the restructuring was \$25.3 million. For more information on the restructuring charges, refer to the section entitled "Estimation of Restructuring Accruals" above.

(n) **LOSS ON DISPOSAL OF ASSETS**

Loss on disposal of assets was approximately \$272,000 and \$1.1 million for the three and nine months ended September 30, 2003. The loss on disposal of assets for the three months ended September 30, 2003 relates primarily to the disposal of the Arizona Network Operations Center. The loss on disposal of assets for the nine months ended September 30, 2003 consists of the loss on the sale of an asset classified as an asset held for sale and the disposal of the Arizona Network Operations Center.

(o) **INTEREST INCOME**

Interest income consists primarily of interest income from cash equivalents and short-term investments and interest earned through the leasing of hardware to customers. Interest income decreased to \$1.5 million for the three months ended September 30, 2003 from \$3.4 million for the three months ended September 30, 2002. Interest income decreased to \$5.7 million for the nine months ended September 30, 2003 from \$9.0 million for the nine months ended September 30, 2002. The decrease from 2003 to 2002 was primarily due to the Company's decreasing cash balance, as well as the impact of lower interest rates. The decrease in interest income was partially offset by interest income on leases for our Mobile Messaging product line. We expect interest income to continue to decline as our cash balance declines.

(p) **INTEREST EXPENSE**

Interest expense consists primarily of debt service and amortization of loan fees on our outstanding convertible subordinated notes payable. Interest expense decreased to \$2.6 million for the three months ended September 30, 2003 from \$3.6 million for the three months ended September 30, 2002. Interest expense decreased to \$7.8 million for the nine months ended September 30, 2003 from \$13.3 million for the nine months ended September 30, 2002. The decrease for 2003 as compared to 2002 was primarily a result of the debt buy-backs in 2002, which lowered the outstanding aggregate principal amount of our convertible subordinated notes payable. During 2002, we bought back \$135.6 million face value of our convertible subordinated notes payable, of which \$83.2 million was repurchased through the end of the third quarter of 2002. Interest expense also was higher in the first half of 2002 because of accrued interest during 2002 on a \$5.2 million forward sale contract arrangement that was settled in June 2002.

(q) **GAIN ON EXTINGUISHMENT OF DEBT**

The gain on extinguishment of debt consists of the gain realized upon our repurchase of a portion of our convertible subordinated notes payable. There was no gain on extinguishment of debt in 2003. We had previously presented an extraordinary gain of \$3.0 million and \$31.3 million for the three and nine months ended September 30, 2002, respectively, relating to the repurchase of \$83.2 million of our convertible subordinated notes payable. This amount was reclassified to other income (expense) from continuing operations as a result of our adoption of SFAS No. 145.

(r) EQUITY IN LOSSES OF INVESTMENTS

Equity in losses of investments consists of our proportionate share of the net losses of businesses in which we have invested, which are recorded under the equity method of accounting. Equity in losses of investments were \$1.1 million for the three months ended September 30, 2002. There were no equity losses of investments for the three months ended September 30, 2003. Equity in losses of investments decreased to \$92,000 for the nine months ended September 30, 2003 from \$4.7 million for the nine months ended September 30, 2002. The decrease results primarily from the fact that we had written off a substantial portion of these investments prior to January 1, 2003. As of June 30, 2003 we have written off all of the remaining book value of these investments and we do not expect to record any additional equity in losses of investments.

(s) INVESTMENT LOSSES, INCLUDING IMPAIRMENTS, NET

Investment losses including impairments consist of the loss taken on investments where the decline in market value was deemed to be other than temporary. Investment losses also include amounts related to the decline in the fair value of derivative instruments, offset by realized gains from the sales of investments. For the three months ended September 30, 2003, we recorded a net gain of \$87,000, which consisted primarily of realized gains associated with the sale of certain investments. For the three months ended September 30, 2002 we recorded a net charge of \$3.7 million, which consisted primarily of impairment charges related to our investments. For the nine months ended September 30, 2003, we recorded a net charge of approximately \$37,000, which consisted primarily of impairment charges related to our investments partially offset by gains on certain investments. For the nine months ended September 30, 2002, we recorded a net charge of \$13.8 million, which included \$13.5 million in impairment charges related to our investments. The remainder of the net charges in the first half of 2002 related to net gains and losses from changes in the fair value of warrants related to our investments.

(t) MINORITY INTEREST

Minority interest reflects the portion of net income or losses of Aether Systems Ltd allocated to Reuters during 2002. During the fourth quarter of 2002, we purchased from Reuters their 40% interest in Aether Systems Ltd. Because we now own 100% of Aether Systems Ltd, we will no longer allocate any portion of Aether Systems Ltd's net income or loss to Reuters and will not show any minority interest. All of our subsidiaries are now wholly owned. Minority interest was approximately (\$154,000) and approximately (\$45,000) for the three and nine months ended September 30, 2002, respectively.

(u) CUMULATIVE EFFECT OF CHANGE IN ACCOUNTING PRINCIPLE

In connection with the adoption of SFAS No. 142 on January 1, 2002, we were required to perform a transitional impairment analysis. We completed our analysis in the third quarter of 2002 and recorded a charge through cumulative effect of change in accounting principle of \$129.3 million. As such, our condensed consolidated financial statements for the three months ended September 30, 2002 have been adjusted to reflect this change in the quarter ended March 31, 2002.

(v) ESCROW SETTLEMENT, NET

Escrow settlement, net, was \$(47,000) and \$2.3 million for the three and nine months ended September 30, 2002. These amounts represent an escrow settlement of \$2.6 million related to our purchase of RTS Wireless completed in November of 2000 partially offset by various expenses related to the settlement.

**SEGMENT RESULTS**

Aether's operating segments include Enterprise Mobility Solutions, Transportation, and Mobile Government.

The Enterprise Mobility Solutions (EMS) Segment is focused on providing integrated wireless data solutions to enterprises with product development emphasis on field service, sales force automation, distribution and delivery management, and mail and messaging access.

Comparing the three months ended September 30, 2002 to the three months ended September 30, 2003, EMS revenue decreased \$1.4 million, with a \$1.1 million decrease in EMS domestic operations and a \$241,000 revenue decrease in EMS international operations. The decrease in EMS domestic operations was driven by declines in hardware and software revenues of \$1.5 million and \$371,000, respectively. These declines were offset somewhat by a \$690,000 increase in subscriber revenue due to growth of wireless email subscribers and a price increase. The decrease in EMS international operations is a result of declining financial application subscribers. EMS's gross profit for the quarter decreased \$849,000 from the comparable quarter of 2002. Subscriber and hardware gross profit decreased \$865,000 and \$232,000, respectively. These decreases were offset somewhat by a \$248,000 increase in software gross profit, primarily attributable to 20/20D license and customization revenue.

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

EMS revenue decreased \$2.4 million for the nine months ended September 30, 2003 from the same nine month period of 2002. The decrease consisted of declines in EMS's domestic and international operations of \$1.7 million and \$729,000, respectively. The international decline was primarily in the subscriber category due to a decrease in international financial application subscribers. On the domestic side, decreases in software and hardware of \$4.0 million and \$3.5 million, respectively, were offset somewhat by a \$5.8 million increase in subscriber revenue primarily due to growth in wireless email subscribers. EMS's gross profit for the nine-month period increased \$1.8 million over 2002. Subscriber and hardware gross profit increased \$3.1 million and \$287,000, respectively, offset somewhat by a \$1.6 million decrease in software gross profit. Most of the increase in subscriber gross profit is related to a \$1.0 million termination fee recognized in the first quarter of 2003 (with no related cost of revenue) and a \$1.5 million favorable airtime cost of revenue adjustment recognized in the second quarter of 2003. We do not anticipate the recurrence of similar events in the future; accordingly, the increase in gross profits in the first nine months of 2003 is not likely to be indicative of future results. The remainder of the subscriber gross profit increase is due to a net increase in subscriber growth. The decrease in software gross profit is primarily due to a decrease in billable engineering projects, which typically generate high gross margins.

In our Transportation Segment, our main products are MobileMax, a vehicle location and messaging solution for long-haul trucks, and a number of asset monitoring products, including GeoLogic, TrailerMax and 20/20v. Our MobileMax product has least-cost-routing capability made possible by multi-mode technology (terrestrial and satellite connectivity) to deliver two-way data and dispatch messaging and automatic, instantly communicated information on each vehicle - typically trucks.

Comparing the three months ended September 30, 2002 to the three months ended September 30, 2003, Transportation revenue decreased \$3.2 million. This decrease is primarily due to the loss of Highway Master subscribers, offset somewhat by an increase in Mobile Max subscribers. Gross profit for the quarter decreased \$1.5 million primarily from the decrease in Highway Master revenue.

Transportation revenue decreased \$2.0 million for the nine months ended September 30, 2003 from the same nine month period of 2002, primarily due to the decline in Highway Master subscribers, offset somewhat by an increase in Mobile Max revenue. Gross profit for the nine-month period decreased \$2.0 million primarily due to the decrease in Highway Master subscriber revenue and a decrease in MobileMaxTM hardware gross profit resulting from a temporary shortage of refurbished devices that forced the Company to issue new devices for warranty repairs.

In our Mobile Government Segment, we are a service provider in the area of wireless data solutions for public safety. We have products for both law enforcement and asset tracking. Our public safety solutions are integrated into 47 different state databases as well as local and federal databases to deliver real-time information in seconds without having to involve dispatch or other resources. Our products in this area are the PacketCluster family of products, the handheld version of PacketCluster Patrol called PocketBlue, the FireRMS family of products for fire and rescue companies, and the handheld application for this community, PocketRescue.

Mobile Government revenue increased \$84,000 from the three months ended September 30, 2002 to the three months ended September 30, 2003, with increases in hardware and subscriber revenue more than offsetting a \$163,000 decline in software revenue. Gross profit increased \$458,000 primarily due to an increase in hardware revenue gross profit, reflective of a one-time unfavorable adjustment to hardware costs in the third quarter of 2002.

Mobile Government revenue increased \$1.6 million for the nine months ended September 30, 2003 from the same nine-month period of 2002, primarily due to software and subscriber revenue increases of \$1.2 and \$335,000, respectively. Gross profit for the nine-month period increased

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

\$3.1 million, primarily due to the increase in software revenue and more effective tracking and management of the various project cost components of our business.

Corporate and Other consists mainly of corporate assets. We do not allocate corporate assets to the Segments for internal reporting purposes.

During the third quarter of 2003, certain Logistics projects that were previously reported as part of the Transportation segment were reorganized as part of the EMS Segment's Logistics offering. Accordingly, the comparative data in the table below has been restated to include these projects in the EMS Segment for all fiscal periods.

We began to report our financial results by segment as of the first quarter of 2000. Our reportable segments have changed each year. In the future, our reportable segments may continue to change as our operating structure, business and the market in which we operate evolves.

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

Segment detail is summarized as follows:

THREE MONTHS ENDED SEPTEMBER 30, 2003	Enterprise Mobility Solutions	Transportation	Mobile Government	Corporate & Other	Total
Revenue	\$ 13,502	\$ 8,284	\$ 5,407	\$	\$ 27,193
Gross Profit	\$ 4,541	\$ 3,023	\$ 3,957	\$	\$ 11,521

THREE MONTHS ENDED SEPTEMBER 30, 2002	Enterprise Mobility Solutions	Transportation	Mobile Government	Corporate & Other	Total
Revenue	\$ 14,878	\$ 11,510	\$ 5,323	\$	\$ 31,711
Gross Profit	\$ 5,390	\$ 4,539	\$ 3,499	\$	\$ 13,428

### LIQUIDITY AND CAPITAL RESOURCES

Since 1999, we have financed our operations primarily from the proceeds of public offerings and private placements of our equity and debt securities. Through September 30, 2003, we have raised aggregate net proceeds of approximately \$1.5 billion, net of underwriters' discounts, including the issuance of \$310.5 million of 6% convertible subordinated notes, in March 2000. As of September 30, 2003, we had approximately \$32.7 million in cash and short-term investments and working capital of approximately \$20.1 million. At June 30, 2003 and December 31, 2002, cash and short-term investments were \$301.4 million and \$324.4 million and working capital was \$303.0 million and \$335.2 million, respectively. The significant change in cash and short-term investments as of September 30, 2003 results from a change during the third quarter of 2003 in management's intention with regard to the liquidation of investments with maturities of more than 12 months. In view of market conditions that have resulted in an increase in the trading price of the Company's outstanding 6% convertible subordinated notes and the Company's ongoing evaluation of strategic alternatives (as discussed above under the heading "Overview"), in the third quarter management concluded it no longer had an intention to liquidate such investments within a 12-month period to fund debt repurchases or other strategic activities. Accordingly, while the types of investments have not changed, such investments (totaling approximately \$245.2 million) have been reclassified as of September 30, 2003 from short-term investments to non-current assets. If such reclassification had been made as of June 30, 2003 or as of December 31, 2002, cash and short-term investments would have been \$111.3 million and \$68.6 million, respectively. The aggregate outstanding balance of our convertible subordinated notes, including accrued and unpaid interest, was \$155.1 million as of September 30, 2003.

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

Our operations have never generated positive cash flow. Net cash used in operating activities was \$32.0 million and \$87.6 million for the nine months ended September 30, 2003 and 2002, respectively. The principal use of cash in each of these periods was to fund our losses from operations. The amount of cash used in operating activities has declined significantly as we have reduced our operating expenses, through our restructuring efforts.

The amount of cash provided by or used in our investing activities fluctuates primarily based on the timing of our sales and purchases of investments available for sale. In managing our cash balances, we buy and sell investments available for sale primarily to maximize returns based upon current market conditions. Accordingly, we may sell an investment to realize a gain (or limit a loss) in response to changes in market conditions. In the first nine months of both 2003 and 2002, we used only a small portion of our cash to purchase assets used in the operations of our business. Accordingly, our investing activities have not materially increased or decreased the aggregate amount of cash and short-term investments that we have to meet our liquidity needs.

Net cash provided by investing activities was \$11.0 million for the nine months ended September 30, 2003. Net cash used in investing activities was \$335.6 million for the nine months ended September 30, 2002. For the nine months ended September 30, 2003, we used \$1.2 million for the purchase of property and equipment and \$2.4 million for the purchase of intellectual property. Additionally, we received a net of \$9.4 million from the sales and purchases of short-term and non-current investment instruments (primarily United States Government Agency-sponsored securities) and approximately \$5.8 million from sales of certain property and equipment. For the nine months ended September 30, 2002, we used \$4.6 million for the purchase of property and equipment, a net of \$330.9 million for the purchases and sales of short-term and non-current investment instruments (primarily United States Government Agency-sponsored securities) and \$3.6 million in acquisition-related activities. As discussed above, prior to September 30, 2003, we classified investments having final maturities in excess of one year as short-term based upon our intention to liquidate the investments within twelve months. As of September 30, 2003, we have reclassified these investments to non-current assets.

Net cash used by financing activities was \$15.8 million for the nine months ended September 30, 2003. For the nine months ended September 30, 2003, financing activities included the investment of approximately \$16.8 million of cash in certificates of deposit, which are used as collateral against certain letters of credit established to support facility leases and the performance of certain customer contracts. This amount is reported on our balance sheet as restricted cash. Net cash used in financing activities was approximately \$63.3 million for the nine months ended September 30, 2002. For the nine months ended September 30, 2002, cash used in financing activities related primarily to the repurchase of a portion of our convertible subordinated notes.

Our major source of liquidity has been the cash generated from our securities, offerings and placements, as discussed above. We continue to use such proceeds to fund our operating activities. Other liquidity requirements include interest payments on our outstanding convertible subordinated notes, payments for restructuring activities and payments under contingent contractual obligations summarized in the contractual obligation table below. Given the current amounts of our cash, short-term and non-current investments, we believe we have substantial flexibility to continue operations and still have funds available for our operating and capital requirements for at least the next twelve months.

#### CONTRACTUAL OBLIGATIONS

Our contractual obligations have not changed materially since last reported.

The following table describes all of our contractual commitments, including our future minimum lease payments.

Contractual Obligations	Total	Payments due by period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-Term Debt Obligations	\$ 168,854(1)	\$ 9,295	\$ 159,559	\$	\$
Capital Lease Obligations	1,494	498	996		
Operating Lease Obligations	56,934(2)	7,734	23,194	20,954	5,052
Purchase Obligations	7,710	6,021	1,689		
Other Long-Term Liabilities Reflected on the Registrant's Balance Sheet under GAAP	(3)				

Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

<b>Total</b>	\$	234,992	\$	23,548	\$	185,438	\$	20,954	\$	5,052
--------------	----	---------	----	--------	----	---------	----	--------	----	-------

---

(1) Long-term debt obligations include interest of approximately \$13.9 million through March 2005.

(2) Facilities representing \$48.6 million of our minimum lease payments are available for sublease and facilities representing approximately \$507,000 of our minimum lease payments have been subleased. In October and November 2003 (after the end of the third quarter), we negotiated early buyouts of our largest facility lease, several capital leases and a telecommunications purchase obligation. These buyouts accounted for \$46.3 million, \$1.3 million and \$0.5 million of the operating lease, capital lease and purchase obligations, respectively.

(3) We do not have any other long-term liabilities requiring cash payment (deferred rent and deferred revenue do not require a cash outlay) that are not already included in the categories above. For instance, the entire long-term portion of our restructuring reserve relates to our operating lease obligations, which are already quantified in the third line of the above table.

## FORWARD-LOOKING STATEMENTS

This report contains statements that are considered forward-looking statements, as such term is used in the Securities Exchange Act of 1934, as amended. Such forward-looking statements typically include the words expect, anticipate, believe, will, intend, estimate, project and similar expressions. Forward-looking statements are based on our current expectations and assumptions, which are subject to risks and uncertainties. They are not guarantees of our future performance or results. Our actual performance and results could differ materially from what we project in forward-looking statements for a variety of reasons and circumstances, including particularly such risks and uncertainties. Risks and uncertainties that may affect our operations, financial conditions and financial results include, but are not limited to the followings: potential negative effects on our operations from workforce reductions, other restructuring activities, and the evaluation of strategic alternatives (including possible asset or business sales); the departure of key employees; potential liabilities for transmitting third party information, service disruption and system failures; our ability to alter our services to meet changing market demand and technologies; our dependence on wireless networks owned and controlled by third parties; our use of third-party intellectual property that may be subject to infringement claims; and the potential loss of significant customers. These and other risks and uncertainties are discussed in detail in our 2002 Annual Report on Form 10-K and should be reviewed carefully.

## ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We maintain instruments subject to interest rate and foreign currency exchange rate risk. We categorize all of our market risk sensitive instruments as non-trading or other instruments.

### (1) INTEREST RATE SENSITIVITY

Our cash and cash equivalents and short-term investments are exposed to interest rate risk. Our investment policy calls for investment in short-term, low risk instruments. At September 30, 2003, we had \$49.5 million invested in money market instruments and certificates of deposit. At September 30, 2003, we had \$245.2 million invested in United States Government Agency-sponsored securities, all of which have maturities of less than four years. A decline in market rates of interest could reduce the amount of interest income we receive from our invested cash, but also could increase the market value of investments we hold that bear higher interest rates. Conversely, if interest rates were to rise, our interest income from cash equivalents might increase and the value of our investments could decline. We believe that a 10% increase or decline in interest rates would not be material to our investment income our cash flows, or the value of our short-term investments.

We are exposed to market risk on our fixed rate convertible subordinated notes payable. The fair value of this fixed rate debt is sensitive to changes in interest rates. If market rates decline, the value of the notes payable is likely to increase, and the rate of interest we would be required to pay could be above current market rates of interest. If market rates rise, the fair value of the notes payable is likely to decline, and the interest rate on the notes could be lower than current market rates. Under our current policy, we do not use interest rate derivative instruments to manage our risk of interest rate fluctuations. Because the interest rate payable on our convertible subordinated notes payable is fixed at 6%, changes in market interest rates do not alter our cash flow obligations to service these notes. We have no other long-term debt obligations.

### (2) FOREIGN RATE SENSITIVITY

Since the formation of Aether Systems, Ltd and the commencement of U.S. sales to foreign countries, we have been exposed to foreign currency exchange risk. All sales from the U.S. to foreign countries have been denominated in U.S. dollars. Since the revenue and expenses of Aether Systems Ltd generally are denominated in local currencies, exchange rate fluctuations between such local currencies and the U.S. dollar will subject us to currency translation risk with respect to the reported results of Aether Systems Ltd as well as risks sometimes associated with international operations. The countries in which Aether Systems Ltd has operations have traditionally had relatively stable currencies. We do not hedge our foreign currency exposure. We believe that a 10% increase or decline in the exchange ratio of the British Pound to the US Dollar would not be material to cash and cash equivalent balances, interest income, or cash flows from consolidated operations.

#### ITEM 4. CONTROLS & PROCEDURES

We maintain a set of disclosure controls and procedures and internal control over financial reporting designed to provide us with reasonable assurance that information required to be disclosed in our filings under the Securities and Exchange Act of 1934 (the Exchange Act) is recorded, processed, summarized and disclosed in our filings within the time periods specified by the rules and regulations of the Securities and Exchange Commission (the SEC). Management of the Company does not expect that our disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud, as any control system is inherently limited by various factors and can provide only reasonable, and not absolute, assurance that the system's goals will be achieved. Limitations of a control system can include faulty assumptions as to the likelihood of future events, errors in judgment or simple mistakes, resource and cost constraints, and inadequacies that develop over time because of changes in conditions and/or deterioration in compliance with policies and procedures. In view of these limitations, any evaluation of disclosure controls and procedures or internal control over financial reporting can provide only reasonable, and not absolute, assurance that control deficiencies and instances of fraud if any within the Company have been detected.

As of the end of the third quarter of 2003, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. This evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer. Based upon our evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were adequate and effective and provide Aether with a reasonable level of assurance that material information required to be disclosed in filings with the SEC is accumulated and communicated to management in a timely manner.

In addition, we have reviewed our internal control over financial reporting and have seen no significant changes during the three months ended September 30, 2003 that have materially affected, or are reasonably likely to materially affect, Aether's internal control over financial reporting.

#### PART II OTHER INFORMATION

##### ITEM 1. LEGAL PROCEEDINGS

Aether is among the hundreds of defendants that are named in the putative class action lawsuits filed in the United States District Court for the Southern District of New York relating to allegedly fraudulent initial public offering practices, which are being coordinated before Judge Shira A. Scheindlin under the caption In Re Initial Public Offering Securities Litigation, 21 MC 92 (S.D.N.Y.) (SAS). The court has consolidated the actions by issuer, and, accordingly, there are approximately 310 consolidated actions before Judge Scheindlin, including the consolidated action against Aether.

These actions were filed on behalf of persons and entities that acquired Aether common stock after the initial public offering on October 20, 1999. Among other things, the complaints claim that prospectuses, dated October 20, 1999, March 17, 2000, and September 27, 2000 and issued by Aether in connection with the public offerings of common stock, allegedly contained untrue statements of material fact or omissions of material fact in violation of securities laws because, inter alia, the prospectuses allegedly failed to disclose that the offerings underwriters had solicited and received additional and excessive fees, commissions and benefits beyond those listed in the arrangements with certain of their customers which were designed to maintain, distort and/or inflate the market price of the Company's common stock in the aftermarket. The actions seek unspecified monetary damages and rescission. Aether believes the claims are without merit and is vigorously contesting these

actions.

Initial motions to dismiss the case were filed and the court held oral argument on the motions to dismiss on November 1, 2002. On February 19, 2003, the court issued an Opinion and Order on defendants' motions to dismiss, which granted the motions in part and denied the motions in part. As to Aether Systems, the motion to dismiss the claims against it was denied in its entirety. Discovery is now commencing against the underwriter defendants. The plaintiffs voluntarily dismissed without prejudice the officer and director defendants of Aether. On June 26, 2003, the Plaintiff's Executive Committee in this case announced a proposed settlement with the issuers. The proposed settlement provides that the cases against the more than 300 IPO's between 1998 and 2000 will end. Aether has agreed to support the settlement. Under terms of the proposed settlement, Aether would not incur any material financial or other liability. The proposed settlement would not involve the cases against the 55 investment bank underwriter defendants, which would continue. Final approval of the proposed settlement will be required by the Court following notice to class members and a fairness hearing. There can be no assurance such approval will be granted.

Aether is also a party to other legal proceedings in the normal course of business. Based on evaluation of these matters and discussions with counsel, the Company believes that liabilities arising from these matters will not have a material adverse effect on the consolidated results of its operations or financial position.

**ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS**

Not Applicable.

**ITEM 3. DEFAULT UPON SENIOR SECURITIES**

None.

**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

None.

**ITEM 5. OTHER INFORMATION**

In November 2003, Kendra VanderMeulen resigned from the Board of Directors. The Board has not filled the vacancy.

**ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K**

**Exhibits**

- 31.1 Certification pursuant to 17 C.F.R § 240.15d-14(a), as adopted pursuant to Section 302 of the Sarbnes-Oxley Act of 2002 for David S. Oros.
- 31.2 Certification pursuant to 17 C.F.R § 240.15d-14(a), as adopted pursuant to Section 302 of the Sarbnes-Oxley Act of 2002 for David C. Reymann.
- 32.1 Certifications pursuant to 18 U.S.C. § 1350, as adopted pursuant to Section 906 of the Sarbanes Oxley Act of 2002 for David S. Oros and David C. Reymann. \*

Report on Form 8-K

## Edgar Filing: AETHER SYSTEMS INC - Form 10-Q

The Company filed a current report on Form 8-K on August 13, 2003 pursuant to Item 7 (Financial Statements and Exhibits) and Item 12 (Results of Operations and Financial Condition) under Item 9 (Regulation FD Disclosure) with respect to the Company's financial results for the second quarter ended June 30, 2003.

The Company filed a current report on Form 8-K on August 19, 2003 pursuant to Item 7 (Financial Statements and Exhibits) and Item 12 (Results of Operations and Financial Condition) under Item 9 (Regulation FD Disclosure) with respect to the Company's earnings call for the second quarter ended June 30, 2003.
