BUHRMANN REPORTS IMPROVEMENT OF RESULTS IN THIRD QUARTER

Operating profit (EBITAE) from ongoing operations increased 33% at constant exchange rates; up 23.5% at actual rates including negative currency effects

Positive trend in added value growth fuelled by continued successful execution of key strategic initiatives regarding private brands, facility products and preferred suppliers

Total organic sales up 1%; Global office products organic sales up 2%

Net profit* per share (fully diluted) increased to EUR 0.14; net profit* up to EUR 29.4 million

CEO s STATEMENT

Commenting on third quarter performance, Buhrmann President and CEO Frans Koffrie said: We are pleased with the results we have delivered in the third quarter of 2004. Our sustained and strong competitive position as a single-source supplier with a clear focus on business-to-business distribution has allowed us to expand our business, especially in the large accounts market segment. It is encouraging to see a gradual improvement in office products sales in North America. Furthermore, the overall positive trend in added value growth has been boosted by the continuing implementation of our strategic initiatives. We are confident that the implementation of these initiatives will allow us to continue growing sales and earnings.

STRATEGIC INITIATIVES FUEL INCREASE IN PROFITABILITY

Strong private brand and facility product sales, a continued concentration on sourcing from preferred suppliers and increased productivity gave rise to the 25% increase, at constant exchange rates, in third quarter operating profit (EBITAE) of our global office products operations.

Global office products sales increased 2% at constant exchange rates, reflecting improving sales in North America as well as the weak market conditions in a number of European countries. As a result

of the strategic initiatives, the added value of our global office products operations increased by 5% at constant exchange rates. Operating profit (EBITAE) as a percentage of net sales of our global office products operations improved to 4.4% from 3.6% a year ago. The return on capital employed for global office products increased from 22.9% in Q3 2003 to 30.3%.

ROLL-OUT OF PRIVATE BRANDS AND FACILITY PRODUCTS WELL UNDER WAY

Over the last year we have introduced a new range of 1,600 private brand products in North America, where private brands account for 18% of our office products sales. In Europe sales of private brands now account for 22% of our office products sales. In addition, the Office Products North America Division continued to achieve double-digit growth in sales of facility products, broadening our assortment.

INCREASED SALES TO LARGE ACCOUNT CUSTOMERS

We see the spend on office products per white-collar worker stabilising in North America. Sales to our existing large account customers further increased as a result of our successful initiative to extend the product range. While our cost-saving procurement solutions and broad product offering allow us to continue to meet and exceed requirements of large institutions in particular, we continue to improve our marketing, sales and service models for the mid-market. Mid-market sales are currently below our expectations, but we are confident that the investments we are making will help us drive sales.

LOOKING AHEAD

Profitable sales growth remains our key priority. We believe that our strategic initiatives are making an important difference in this respect and we are encouraged by the successes we have already achieved this year.

We see continued, steady improvement in market conditions in North America, while in Europe we expect to see the positive results of measures to enhance the performance of our organisation over time.

We expect continued available positive cash flow in the fourth quarter of 2004 and we accordingly reiterate our forecast that full year 2004 available cash flow will be positive.

At the current exchange rates, we expect amortisation of goodwill of about EUR 45 million, and depreciation of about EUR 85 million for the full year. The effective tax rate for 2004 on earnings before tax, amortisation of goodwill and exceptional items (EBTAE) is expected to be below 10%. Capital expenditure will be around EUR 70 million for 2004.

Note to editors

* Earnings before Interest, Tax, Amortisation (of goodwill) and Exceptional items (see also the remarks under Accounting Policies)

Sales of our global office products operations were 1.8% higher at constant exchange rates, reflecting the positive trend in sales in both the North American Division and the European/Australian Divisions. While our customers benefit from the competitive pricing, the success of our private brands and preferred suppliers initiatives is also reflected in the significant increase in added value. As we continue to drive efficiency throughout the supply chain and help our customers to reduce procurement costs, the increased usage of our eCommerce solutions has helped to grow the proportion of sales processed through the Internet to 36% of our global office products sales.

NORTH AMERICA DIVISION

HIGHER VOLUMES, BETTER MARGINS, HELPED BY ROLLOUT OF NEW PRIVATE BRANDS

Market conditions in North America are improving gradually and our competitive position continues to strengthen. Employment numbers are showing a positive trend in the service industry and government sector and demand for office space is on the rise. Across our customer base we note that spend on office supplies per white-collar worker has stabilised.

We are encouraged by the progress made in terms of driving sales and profitability. The Division's third quarter operating profit (EBITAE) increased by 21% at constant rates. Overall third quarter organic growth for the division was 3%, with organic sales for office products at the same level as last year. Adjusted for the private brands substitution effect, organic growth for office products was 2%, driven by increased sales to existing large account customers and new account wins. Our main margin enhancement initiatives, the private brands introduction and the preferred supplier programme, are progressing well. Sales of private branded products now represent 18% of the Division's total sales. In addition, the success of our current product line extension initiative is underlined by the continued double-digit sales increase in facility products.

Edgar Filing: BUHRMANN NV - Form 6-K

The implementation of our key strategic initiatives, detailed earlier in this release, is on schedule. Over the last 12 months we have introduced 1,600 private brand products to our offering. All our warehouses have been stocked with private brand products and we introduced our main 2005

catalogue, as well as our private brands catalogue in September. Customer visits to introduce the new items are now taking place as part of our conversion programme. In addition, the private brands initiative also helps us to consolidate the number of suppliers with whom we work as part of our preferred suppliers programme. As we remain committed to lowering our customers' total procurement costs, we also continue to focus on our eCommerce and eProcurement capabilities. In order to retain the customers we win in the mid-market segment and drive sales, we are investing in Integrated Sales Teams within our various divisions.

ASAP Software reported third quarter sales of EUR 168.0 million (USD 205.2 million), compared to EUR 163.6 million (USD 184.4 million) in 2003. Added value increased 17% at constant rates to EUR 15.8 million (USD 19.3 million). Operating profit (EBITAE) was EUR 5.4 million (USD 6.6 million) in the third quarter of 2004 versus EUR 4.5 million (USD 5.0 million) the previous year.

EUROPE/AUSTRALIA DIVISION INTERNAL MEASURES IMPROVE PROFITABILITY OF EUROPEAN OPERATIONS

Whilst the combined Office Products Europe and Australia Divisions reported a 1% decline in organic growth, operating profit (EBITAE) rose, resulting in a 43% increase to EUR 13.5 million.

Third quarter results of the Office Products Europe Division are encouraging, despite the fact that market conditions remained weak in a number of European countries, hampering our sales performance in some of our larger markets. Private brands now account for 22% of European office products sales. Internal measures are contributing to the improvement in the performance of the Division.

Weak copier and furniture sales in Germany and our withdrawal from unprofitable wholesale activities in the Benelux were the main factors causing the decline in third quarter sales in Europe. The office supplies activities in Germany continued to win market share. With the reorganisation of the copier operations on schedule, best practices employed by our successful Veenman document automation business are progressively being implemented in Germany.

Steadily improving sales through the quarter confirm the turnaround in the UK as a result of management actions. Elsewhere in Europe, notable improvements in performance were achieved in France and Ireland. Corporate Express France has extended its regional distribution network and is benefiting from its nationwide coverage, fulfilling a basic qualification for participation in large tender offers. In addition to other product lines, Corporate Express Ireland is reporting success in growing its furniture business.

General economic circumstances in Australia remain favourable. The company continued to leverage successfully its single-source supplier strategy.

GRAPHIC SYSTEMS

POSITIVE ORDER-INTAKE TREND WILL BENEFIT 2005 SALES AND EARNINGS

While macro-economic circumstances are still delaying a recovery, the lowest point of the cycle seems to have passed. The year-on-year comparison of the order intake improved in the third quarter, turning positive for the first time since March 2001. However, because of the longer production time needed for the newest models of Heidelberg printing presses, most recently ordered machines will not be ready for delivery in 2004. We therefore expect fourth quarter 2004 operating profit to be around break-even.

While machine sales decreased year-on-year, sales of services, supplies and spare parts increased. Capitalising on its leading position as a total solution provider to commercial printers, the Division has successfully increased sales volumes in printing supplies. In addition, higher service sales resulting from more efficient planning and control regarding these activities also contributed to the bottom-line result.

The transfer of the Digital Print activities to Nexpress was effectuated per the end of October, contributing to the reduction in working capital and the number of FTEs.

CASH FLOW AND FINANCING

At the end of the third quarter Buhrmann deconsolidated the remaining part of the outstanding 12¼% senior subordinated notes due 2009 and the cash required to fully redeem the bonds on 1 November 2004. The related exceptional financing costs were EUR 3.2 million, while the transaction also resulted in an exceptional tax gain of EUR 1.2 million.

Available cash flow generated in the third quarter was EUR 4.3 million. We incurred an outflow of working capital of EUR 27.6 million, partly related to an inventory build-up for the fourth quarter and the full launch of our North American private brands product range in September. Average working capital as a percentage of sales (on a rolling four-quarter basis) improved to 9.6% from 10.9% a year ago.

Interest cover (EBITDA / cash interest) on a rolling four-quarter basis improved to 4.0 times.

At 30 September, interest-bearing net debt amounted to EUR 857.9 million. Interest-bearing net debt as a percentage of equity was 55.3%.

HOLDINGS

The third quarter operating result (EBITAE) reported under Holdings was EUR 4.1 million negative (third quarter 2003: EUR 5.2 million negative).

OTHER INFORMATION

Safe Harbour Statement

Statements included in this press release, which are not historical facts are forward-looking statements made pursuant to the safe harbour provisions of the Private Securities Litigation Reform Act of 1995 and the Securities Exchange Act of 1934. Such forward-looking statements are made based upon management's expectations and beliefs concerning future events impacting Buhrmann and therefore involve a number of uncertainties and risks, including, but not limited to industry conditions, changes in product supply, pricing and customer demand, competition, risks in integrating new businesses, currency fluctuations and the other risks described from time to time in the Company's filings with the US Securities and Exchange Commission, including the Company's Annual Report on Form 20-F filed with the Securities and Exchange Commission on June 21, 2004. As a result, the actual results of operations or financial conditions of the Company could differ materially from those expressed or implied in such forward-looking statements. Shareholders and other readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. The Company undertakes no obligation to update publicly or revise any forward-looking statements.

Accounting policies

Exceptional items – during the course of a year, certain events take place that may be viewed as part of a company's normal business operations. These events however, have unique characteristics that set them apart from the company's standard day-to-day operations, these events may be so infrequent and of such a size that reporting them as exceptional items provides the opportunity to give a more operationally oriented view on the results of the business. Other events, such as restructurings are so large and impact the company's operations and cost structure so significantly, that reporting them as exceptional items aims to clarify the effect of these decisions on the results of operations. In order to increase transparency these events have been separately disclosed as exceptional results

Revenue recognition (for equipment sales of the Graphic Systems Division) – Following the release of the new Guideline for Annual Reporting on Revenue Recognition (270.2) from 2003 onwards the equipment sales are recorded after installation, instead of at delivery.

Organic growth rates exclude all factors that disturb a like-for-like comparison, such as: currency exchange rate movements, acquisitions, divestments, variations in the number of working days, the change- to a commission-based model at our ASAP Software subsidiary, and the change in the sales recognition of the Graphic Systems Division

Non-GAAP measures: Figures are often presented before exceptional items and where applicable before amortisation and impairment of goodwill. These figures are regarded by Buhrmann as key performance indicators increasing the transparency of the reporting.

The figures included in this report were not audited by the external accountant.
