CF INDUSTRIES HOLDINGS, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Amounts and disclosures applicable to June 30, 2006 and 2005 are unaudited)

1. Background and Basis of Presentation

We are one of the largest manufacturers and distributors of nitrogen and phosphate fertilizer products in North America. Our operations are organized into two business segments: the nitrogen fertilizer business and the phosphate fertilizer business. Our principal products in the nitrogen fertilizer business are ammonia, urea and urea ammonium nitrate solution (UAN). Our principal products in the phosphate fertilizer business are diammonium phosphate (DAP) and monoammonium phosphate (MAP). Our core market and distribution facilities are concentrated in the midwestern U.S. grain-producing states. Our principal customers are cooperatives and independent fertilizer distributors.

Our principal assets include:

- the largest nitrogen fertilizer complex in North America (Donaldsonville, Louisiana);
- a 66% economic interest in the largest nitrogen fertilizer complex in Canada (which we operate in Medicine Hat, Alberta, through Canadian Fertilizers Limited (CFL), a consolidated variable interest entity);
- one of the largest integrated ammonium phosphate fertilizer complexes in the United States (Plant City, Florida);
- the most-recently constructed phosphate rock mine and associated beneficiation plant in the United States (Hardee County, Florida); and
- an extensive system of terminals, warehouses and associated transportation equipment located primarily in the midwestern United States.

All references to CF Holdings, the Company, we, us and our refer to CF Industries Holdings, Inc. and its subsidiaries, including CF Industries, Inc. after the reorganization transaction described below, except where the context makes clear that the reference is only to CF Holdings itself and not its subsidiaries. All references to CF Industries refer to CF Industries, Inc. and its subsidiaries, except where the context makes clear that the reference is only to CF Industries itself and not its subsidiaries.

CF Holdings was formed in April 2005 to hold the existing business of CF Industries. Prior to August 17, 2005, CF Industries operated as a cooperative and was owned by eight regional agricultural cooperatives. On August 16, 2005, we completed our initial public offering of common stock (IPO). We sold 47,437,500 shares of our common stock in the IPO and received net proceeds, after deducting underwriting discounts and commissions, of approximately \$715.4 million. In connection with the IPO, we consummated a reorganization transaction in which CF Industries ceased to be a cooperative and became our wholly-owned subsidiary. In the reorganization transaction, all of the equity interests in CF Industries were cancelled in exchange for all of the proceeds of the IPO and 7,562,499 shares of our common stock. We did not retain any of the proceeds from the IPO. The reorganization transaction did not result in a new basis of accounting for the Company.

The accompanying unaudited interim financial statements have been prepared on the same basis as our audited consolidated financial statements for the year ended December 31, 2005 and in accordance with accounting principles generally accepted in the United States for interim financial reporting. In the opinion of management, these statements reflect all adjustments, consisting only of normal and recurring

adjustments that are necessary for the fair representation of the information for the periods presented. These statements should be read in conjunction with our audited financial statements and related disclosures in our Form 10-K filed with the United States Securities and Exchange Commission (SEC) on March 20, 2006. Operating results for any period presented apply to that period only and are not necessarily indicative of results for any future period.

Certain prior-year amounts have been reclassified to conform to the current year's presentation.

On the consolidated balance sheet as of December 31, 2004, amounts owed to and due from product exchange counterparties were reclassified from a net amount in inventory to current assets and current liabilities. On the unaudited consolidated statement of cash flows for the six months ended June 30, 2005, corresponding adjustments have been made to inventory and product exchanges net. These reclassifications had no impact on previously reported net income (loss) or cash flow from operations.

2. Summary of Significant Accounting Policies

For a discussion of the Company's significant accounting policies, refer to our Form 10-K filed with the SEC on March 20, 2006.

3. New Accounting Standards

Following are summaries of recently issued accounting pronouncements that are either currently applicable or may become applicable to our consolidated financial statements.

- Emerging Issues Task Force (EITF) Issue No. 04-13 *Accounting for Purchases and Sales of Inventory with the Same Counterparty*. This EITF Issue addresses exchanges of inventory with a counterparty in the same line of business and examines the conditions under which such transactions should be viewed as a single nonmonetary transaction and whether such transactions should be recognized at fair value or recorded amounts. The Issue is effective for new arrangements entered into in reporting periods beginning after March 15, 2006. The adoption of EITF Issue No. 04-13 did not impact our financial statements.
- EITF Issue No. 06-03 *How Sales Tax Collected from Customers and Remitted to Governmental Authorities Should be Presented in the Income Statement (That is, Gross versus Net Presentation)*. This EITF Issue clarifies that the presentation of taxes collected from customers and remitted to governmental authorities on a gross (included in revenues and costs) or net (excluded from revenues) basis is an accounting policy decision that should be disclosed pursuant to Accounting Principles Board (APB) Opinion No. 22 *Disclosure of Accounting Policies*. The Issue is effective for reporting periods beginning after December 15, 2006. We have not yet determined the impact of this Issue on our consolidated financial statements.
- Financial Accounting Standards Board (FASB) Interpretation (FIN) No. 48 *Accounting for Uncertainty in Income Taxes*. This Interpretation clarifies the accounting for uncertainty in income taxes recognized in accordance with Statement of Financial Accounting Standards (SFAS) No. 109 *Accounting for Income Taxes*. The Interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. It also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Interpretation is effective for fiscal years beginning after December 15, 2006. We have not yet determined the impact of this Interpretation on our consolidated financial statements.
- SFAS No. 155 *Accounting for Certain Hybrid Financial Instruments*. This standard amends the guidance in SFAS No. 133 *Accounting for Derivative Instruments and Hedging Activities*, and SFAS No. 140 *Accounting for Transfers and Servicing of Financial Assets and Extinguishments*

of Liabilities. This statement allows financial instruments that have embedded derivatives to be accounted for as a whole (eliminating the need to bifurcate the derivative from its host) as long as the entire instrument is valued on a fair value basis. This statement also clarifies other specific SFAS No. 133 and SFAS No. 140 related issues. This statement will generally be effective for all financial instruments acquired or issued after the beginning of the first fiscal year that begins after September 15, 2006. We have not yet determined the impact of this statement on our consolidated financial statements.

- SFAS No. 156 *Accounting for Servicing of Financial Assets - An Amendment of FASB Statement No. 140 Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities.* This statement requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in certain situations. This statement is effective as of the beginning of the first fiscal year that begins after September 15, 2006. We have not yet determined the impact of this statement on our consolidated financial statements.

4. Net Earnings Per Share

Prior to the consummation of our August 2005 IPO, CF Holdings did not have any activities or operations. Therefore, with the exception of stockholders' equity and per share amounts, management believes that the current financial statements of CF Holdings are comparable to the historical financial statements of CF Industries. The weighted average shares outstanding and net earnings per share information is presented on an actual and pro forma basis giving effect to the IPO and related reorganization transaction assuming that they had occurred as of December 31, 2004.

The net earnings per share and pro forma net earnings per share were computed as follows:

	Three months ended June 30,		Six months ended June 30,	
	Actual 2006	Pro forma 2005	Actual 2006	Pro forma 2005
	(in millions, except per share amounts)			
Net earnings available to common shareholders	\$ 42.6	\$ 42.9	\$ 18.0	\$ 65.2
Basic and diluted weighted average common shares outstanding	55.0	55.0	55.0	55.0
Basic and diluted net earnings per common share	\$ 0.77	\$ 0.78	\$ 0.33	\$ 1.18

5. Pension and Other Postretirement Benefits

CF Industries and its Canadian subsidiary both maintain noncontributory, defined-benefit pension plans. The U.S. pension plan is a closed plan. We also provide group insurance to our retirees. Until age 65, retirees are eligible to continue to receive the same Company-subsidized medical coverage provided to active employees. When a retiree reaches age 65, medical coverage ceases.

Edgar Filing: CF Industries Holdings, Inc. - Form 10-Q

Net pension/retiree medical expense included the following components:

	Pension Plans		Six Months Ended		Retiree Medical		Six Months Ended	
	Three Months Ended June 30, 2006	2005	June 30, 2006	2005	Three Months Ended June 30, 2006	2005	June 30, 2006	2005
	(in millions)							
Service cost for benefits earned during the period	\$ 1.8	\$ 1.9	\$ 3.5	\$ 3.3	\$ 0.3	\$ 0.3	\$ 0.6	\$0.6
Interest cost on projected benefit obligation	3.2	3.1	6.3	6.0	0.3	0.4	0.8	0.9
Expected return on plan assets	(3.5)	(3.5)	(6.9)	(6.9)				
Amortization of transition obligation					0.1	0.1	0.2	0.2
Amortization of prior service cost	0.1	0.1	0.1	0.1				
Actuarial loss	0.7	0.6	1.3	0.8	0.1	0.1	0.2	0.2
Net expense	\$ 2.3	\$ 2.2	\$ 4.3	\$ 3.3	\$ 0.8	\$ 0.9	\$ 1.8	\$ 1.9

In addition to our qualified defined benefit pension plans, we also maintain nonqualified supplemental pension plans for highly compensated employees as defined under federal law and a closed plan in which no current employees are eligible to participate. We recognized expense for these plans of \$0.5 million and \$0.1 million, respectively, for the three months ended June 30, 2006 and 2005, and \$0.7 million and \$0.2 million, respectively, for the six months ended June 30, 2006 and 2005.

6. Income Taxes

The income tax provisions recorded for the three and six months ended June 30, 2006 were determined in accordance with the requirements of APB Opinion No. 28 *Interim Financial Reporting* and FASB Interpretation No. 18 *Accounting for Income Taxes in Interim Periods*.

7. Inventories

Inventories consist of the following:

	June 30, 2006	December 31, 2005
	(in millions)	
Fertilizer	\$ 143.6	\$ 196.1
Spare parts, raw materials and supplies	59.0	55.0
	\$ 202.6	\$ 251.1

8. Asset Retirement Obligations

We account for asset retirement obligations (AROs) in accordance with SFAS No. 143 *Accounting for Asset Retirement Obligations*. An ARO is a legal obligation associated with the retirement of long-lived assets that results from the acquisition, construction, development or normal operation of such assets.

In 2005, FASB Interpretation (FIN) No. 47 *Accounting for Conditional Asset Retirement Obligations* (conditional AROs) was issued. FIN No. 47 provided guidance regarding when an entity would have sufficient information to reasonably estimate the fair value of an ARO. In the fourth quarter of 2005, we adopted FIN No. 47 and recorded a \$4.6 million (\$2.8 million, after taxes) cumulative effect of a change in accounting principle.

The AROs related to our phosphogypsum stack systems in Florida are subject to financial assurance requirements. The purpose of these requirements is to assure the State of Florida that sufficient funds will be available for the ultimate closure and post-closure care requirements for these AROs.

In March 2006, we established an escrow account for the benefit of the Florida Department of Environmental Protection as a means of taking advantage of a safe harbor provision in a 2005 amendment to Florida's regulations pertaining to financial assurance requirements for closure of phosphogypsum stacks, and contributed \$11.1 million to this account. The balance in this account is reported at fair value on our consolidated balance sheet.

Over the next ten years, we expect to contribute to the escrow account between \$2 million and \$8 million annually based upon the required funding formula, the present value of our estimated liability as defined in the regulations and an assumed rate of return of 4% on invested funds. The amount that will have accumulated in the account by the end of the ten-year period, including investment earnings, is currently expected to be approximately \$85 million. After the initial ten years, contributions to the account are expected to average approximately \$0.4 million annually for the following 17 years. The balance in the account is projected to be approximately \$170 million by 2032. The annual contributions to the account are based on predetermined funding requirements as prescribed by the State of Florida; therefore, contributions to the account will differ from amounts recognized as expense in our financial statements. Ultimately, the cash in the escrow account will be used to complete settlement of the AROs related to our phosphogypsum stack systems.

9. Credit Agreement

Our senior secured revolving credit facility (the credit facility) with JPMorgan Chase provides up to \$250 million, subject to a borrowing base, for working capital and general corporate purposes, including up to \$50 million for the issuance of letters of credit. As of June 30, 2006, there was \$164.5 million of available credit, based on the borrowing base, and there were no loans or letters of credit outstanding under the credit facility.

The credit facility is guaranteed by CF Holdings and certain of the domestic subsidiaries of CF Industries (the Loan Parties). The credit facility is secured by substantially all of the personal property and assets, both tangible and intangible, of the Loan Parties, 100% of the equity interests of each Loan Party's direct and indirect domestic subsidiaries other than immaterial subsidiaries, 65% of the equity interests of each Loan Party's first-tier foreign subsidiaries and the real property located in Donaldsonville, Louisiana.

10. Derivative Financial Instruments

We use natural gas in the manufacture of nitrogen fertilizer products. Because natural gas prices are volatile, our Natural Gas Acquisition Policy includes the objective of providing protection against significant adverse natural gas price movements. We manage the risk of changes in gas prices through the use of physical gas supply contracts and derivative financial instruments covering periods not exceeding three years. The derivative instruments that we currently use are primarily swaps. These contracts reference primarily NYMEX futures contract prices, which represent fair value at any given time. The contracts are traded in months forward and settlements are scheduled to coincide with anticipated gas purchases during those future periods. We use derivative instruments primarily to lock in a substantial portion of our margin on sales under the forward pricing program. We also establish natural gas derivative positions that are associated with anticipated natural gas requirements unrelated to our forward pricing program.

Until the fourth quarter of 2005, we designated our gas derivatives as cash flow hedges, whereby the derivatives were recorded at fair value on the balance sheet as assets and liabilities with any changes in fair

Edgar Filing: CF Industries Holdings, Inc. - Form 10-Q

value recorded initially in other comprehensive income (OCI). Unrealized gains or losses on effective cash flow hedges were deferred in OCI until the inventory manufactured with the hedged natural gas was sold and released to cost of sales.

During the second half of 2005, volatility in the natural gas environment increased our uncertainty regarding future operating rates and required that we increase our flexibility in product sourcing decisions. This increased flexibility in sourcing reduced our ability to predict future natural gas requirements with a high degree of probability and led us to discontinue hedge accounting beginning in the fourth quarter of 2005. Changes in the fair value of the derivatives not designated as hedges are recorded in cost of sales as the changes occur. We continue to use natural gas derivatives primarily as an economic hedge of gas price risk, but without the application of hedge accounting for financial reporting purposes.

For the three months ended June 30, 2006, we recorded directly to cost of sales net derivative losses of \$14.3 million, consisting of \$26.0 million in realized losses partially offset by \$11.7 million of unrealized mark-to-market gains. For the six months ended June 30, 2006, we recorded directly to cost of sales derivative losses of \$55.6 million, consisting of \$47.3 million in realized losses and \$8.3 million of unrealized mark-to-market losses. Cash flows related to natural gas derivatives are reported as cash flows from operating activities.

At June 30, 2006 we had unrealized losses on open positions of \$13.6 million on 19.5 million MMBtus of gas, primarily in swaps contracts. At December 31, 2005, we had unrealized losses of \$0.5 million on 14.1 million MMBtus of gas, primarily in swaps.

11. Other Comprehensive Income (Loss)

Stockholders' equity includes accumulated other comprehensive loss, which consists of the following components:

	Foreign Currency Translation Adjustment (in millions)	Unrealized Gain on Securities	Unrealized Gain (Loss) on Derivatives	Minimum Pension Liability Adjustment	Accumulated Other Comprehensive Loss
Balance at December 31, 2005	\$ (2.9)	\$ 0.1	\$ 4.7	\$ (9.3)	\$ (7.4)
Net change	1.0	0.1	(3.4)		(2.3)
Balance at June 30, 2006	\$ (1.9)	\$ 0.2	\$ 1.3	\$ (9.3)	\$ (9.7)

The unrealized gain or loss on derivatives is related to natural gas derivatives prior to the time that hedge accounting was discontinued in the fourth quarter of 2005. The amount shown as net change in OCI was reclassified into earnings in the first half of 2006. The balance at June 30, 2006 is expected to be reclassified into earnings during 2006. See Note 10 for additional information on derivatives.

12. Contingencies

Litigation

From time to time we are subject to ordinary, routine legal proceedings related to the usual conduct of our business, including proceedings regarding public utility and transportation rates, environmental matters, taxes and permits relating to the operations of our various plants and facilities. Based on the information available as of the date of this filing, we believe that the ultimate outcome of these matters will not have a material adverse effect on our consolidated financial position or results of operations.

Environmental

Edgar Filing: CF Industries Holdings, Inc. - Form 10-Q

In December 2004 and January 2005, the United States Environmental Protection Agency (EPA) inspected our Plant City, Florida phosphate fertilizer complex to evaluate the facility's compliance with the

10

Resource Conservation and Recovery Act (RCRA), the federal statute that governs the generation, transportation, treatment, storage and disposal of hazardous wastes. This inspection was undertaken as a part of a broad enforcement initiative commenced by the EPA to evaluate whether mineral processing and mining facilities, including, in particular, all wet process phosphoric acid production facilities, are in compliance with RCRA, and the extent to which such facilities' waste management practices have impacted the environment.

By letter dated September 27, 2005, EPA Region 4 issued to the Company a Notice of Violation (NOV) and Compliance Evaluation Inspection Report. The NOV and Compliance Evaluation Inspection Report alleged a number of violations of RCRA, including violations relating to recordkeeping, the failure to properly make hazardous waste determinations as required by RCRA, and alleged treatment of sulfuric acid waste without a permit. The most significant allegation in the NOV is that the Plant City facility's reuse of phosphoric acid process water (which is otherwise exempt from regulation as a hazardous waste) in the production of ammoniated phosphate fertilizer, and the return of this process water to the facility's process water recirculating system, have resulted in the disposal of hazardous waste into the system without a permit. The Compliance Evaluation Inspection Report indicates that as a result, the entire process water system, including all pipes, ditches, cooling ponds and gypsum stacks, could be regulated as hazardous waste management units under RCRA.

Several of our competitors have received NOV's making this same allegation. This particular recycling of process water is common in the industry and, the Company believes, was authorized by the EPA in 1990. The Company also believes that this allegation is inconsistent with recent case law governing the scope of the EPA's regulatory authority under RCRA. If the EPA's position is eventually upheld, the Company could incur material expenditures in order to modify its practices, or it may be required to comply with regulations applicable to hazardous waste treatment, storage or disposal facilities. If the Company is required to comply with such obligations, it could incur material capital and operating expenditures or may be required to cease operation of the water recirculating system if it is determined that it does not meet RCRA standards. This would cause a significant disruption of the operations of the Plant City facility.

The NOV indicated that the Company is liable for penalties up to the statutory maximum (for example, the statutory maximum per day of noncompliance for each violation that occurred after March 15, 2004 is \$32,500 per day). Although penalties of this magnitude are rarely, if ever, imposed, the Company is at risk of incurring substantial civil penalties with respect to these allegations. In order to obtain an order or judgment for civil penalties, the EPA will have to bring a civil or administrative enforcement proceeding against the Company. The EPA has referred this matter to the United States Department of Justice (DOJ) for enforcement. The Company has entered into discussions with the DOJ; however, the Company does not know if this matter will be resolved prior to the commencement of litigation by the United States.

In connection with the RCRA enforcement initiative, the EPA collected samples of soil, groundwater and various waste streams at the Plant City facility. The analysis of the split samples collected by the Company during the EPA's inspection did not identify hazardous waste disposal issues impacting the site. The EPA's sampling results appear to be consistent with the Company's results. Pursuant to a 1992 consent order with the State of Florida, the Company captures and reuses groundwater that has been impacted as a result of the former operation of an unlined gypsum stack at the site. Although the Company believes that it has fully evaluated and is remediating the impacts resulting from its historic activities, we do not know whether the EPA will require us to undertake additional environmental investigations at this facility. In addition, we understand that the EPA may decide to inspect our Bartow, Florida property, where we formerly manufactured phosphoric acid. The EPA has requested and the Company has provided copies of existing monitoring data for this facility. Depending on the conclusions that the EPA reaches after reviewing this data, the EPA may require that an investigation of environmental conditions be undertaken at the Bartow facility.

We are subject to a variety of environmental laws and regulations in all jurisdictions in which we operate. When it is probable that environmental liabilities exist and when reasonable estimates of such liabilities can be made, we have established associated reserves. These estimated liabilities are subject to change as additional information becomes available regarding the magnitude and timing of possible cleanup costs, the relative expense and effectiveness of alternative clean-up methods, and other possible liabilities associated with such situations. However, based on the information available as of the date of this filing, we believe that any additional costs that may be incurred as more information becomes available will not have a material adverse effect on the Company's financial position, although such costs could have a material effect on the Company's results of operations or cash flows in a particular period.

13. Segment Disclosures

We are organized and managed based on two segments, which are differentiated primarily by their products, the markets they serve and the regulatory environments in which they operate. The two segments are the nitrogen and phosphate fertilizer businesses.

Segment data for sales, cost of sales and gross margin for the three and six months ended June 30, 2006 and 2005, and assets at June 30, 2006 and December 31, 2005 are as follows. Other assets include amounts attributable to the corporate headquarters and unallocated corporate assets.

	Nitrogen (in millions)	Phosphate	Consolidated
Operating Results			
Three Months Ended June 30, 2006

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

You should read the following discussion and analysis in conjunction with the consolidated financial statements and related notes included in Item 8, Financial Statements and Supplementary Data, of our 2005 Annual Report on Form 10-K as well as Item 1, Financial Statements, in this Form 10-Q. All references to CF Holdings, we, us and our refer to CF Industries Holdings, Inc. and its subsidiaries, including CF Industries, Inc. except where the context makes clear that the reference is only to CF Holdings itself and not its subsidiaries.

Overview

We are one of the largest manufacturers and distributors of nitrogen and phosphate fertilizer products in North America. Our operations are organized into two business segments: the nitrogen fertilizer business and the phosphate fertilizer business. Our principal products in the nitrogen fertilizer business are ammonia, urea and urea ammonium nitrate solution, or UAN. Our principal products in the phosphate fertilizer business are diammonium phosphate, or DAP, and monoammonium phosphate, or MAP. Our core market and distribution facilities are concentrated in the midwestern U.S. grain-producing states. Our principal customers are cooperatives and independent fertilizer distributors.

Our principal assets include:

- the largest nitrogen fertilizer complex in North America (Donaldsonville, Louisiana);
- a 66% economic interest in the largest nitrogen fertilizer complex in Canada (which we operate in Medicine Hat, Alberta through Canadian Fertilizers Limited (CFL), a consolidated variable interest entity);
- one of the largest integrated ammonium phosphate fertilizer complexes in the United States (Plant City, Florida);
- the most-recently constructed phosphate rock mine and associated beneficiation plant in the United States (Hardee County, Florida); and
- an extensive system of terminals, warehouses and associated transportation equipment located primarily in the midwestern United States.

CF Holdings was formed in 2005 to hold the existing business of CF Industries, Inc. Prior to the consummation of our initial public offering in August 2005, CF Industries, Inc. operated as a cooperative and was owned by eight regional agricultural cooperatives.

Executive Summary

We reported net earnings of \$42.6 million in the second quarter of 2006 compared to net earnings of \$42.9 million in the second quarter of 2005. Our results for the second quarter of 2006 included a favorable \$11.7 million net mark-to-market adjustment on natural gas derivatives.

Our gross margin increased \$5.6 million to \$101.2 million in the second quarter of 2006 compared to \$95.6 million in the second quarter of 2005. The improvement in gross margin resulted from higher average selling prices and favorable mark-to-market adjustments on natural gas derivatives, partially offset by increases in raw material costs (primarily natural gas), higher nitrogen purchased product costs and lower fertilizer sales volume.

Our net sales increased 6% to \$664.8 million in the second quarter of 2006 compared to \$626.7 million in the second quarter of 2005. The increase reflected higher average selling prices that were partially offset by lower fertilizer sales volume. A 155,000 ton decrease in fertilizer sold during the second quarter of 2006

Edgar Filing: CF Industries Holdings, Inc. - Form 10-Q

resulted in total sales volume of 2.6 million tons in the second quarter of 2006 compared to 2.7 million tons in the second quarter of 2005.

We paid cash dividends of \$1.1 million in the second quarter of 2006.

Net earnings of \$18.0 million for the six months ended June 30, 2006 were \$47.2 million less than the \$65.2 million of net earnings for the comparable period of 2005. The decline in net earnings was primarily due to historically high natural gas prices and weaker conditions for nitrogen fertilizers, both impacting mainly the first quarter of 2006.

The following significant items affected our reported results for the six months ended June 30, 2006 and our financial position as of June 30, 2006:

Hurricane activity in the Gulf of Mexico region during the latter portion of 2005 significantly affected the domestic fertilizer industry. These hurricanes caused substantial damage to the natural gas production and distribution facilities in the region, affecting the supply and price of natural gas, the primary raw material used to produce nitrogen fertilizers. By the end of the first quarter of 2006, natural gas prices had moderated, returning to approximately pre-hurricane levels. These storms also affected the availability of barges used to transport urea and DAP/MAP on the Mississippi River and adversely affected sulfur supplies by causing refinery closures and transportation disruptions.

In the fourth quarter of 2005, we ceased classifying natural gas derivatives as cash flow hedges as defined in SFAS No. 133 *Accounting for Derivatives and Hedging Activities*. As a result, realized and unrealized gains or losses related to our derivatives are now recognized in operations as they occur. Cash flow hedges existing at the time we discontinued hedge accounting were de-designated as cash flow hedges. As of December 31, 2005, there was a remaining unrealized gain of \$7.9 million (\$4.7 million, net of taxes) in other comprehensive income relating to gains on cash flow hedges occurring prior to de-designation of these hedges. Approximately \$2.2 million (\$1.3 million, net of taxes) of the total \$7.9 million unrealized gain was recognized in cost of sales during the second quarter of 2006 as the related transactions were recognized in the statement of operations. We recognized a favorable \$11.7 million net mark-to-market adjustment on natural gas derivatives in cost of sales (including the \$2.2 million gain previously discussed). Despite our change in accounting treatment, the execution and attendant economic consequences of our hedging activities have not changed, in that derivatives are still being used to lock in a substantial portion of our margin on forward pricing program (FPP) sales. We also establish natural gas derivative positions that are associated with anticipated natural gas requirements unrelated to our FPP. However, because of our change in accounting treatment, gains or losses on natural gas hedges may not be realized in the same period as the FPP sale to which they relate. See Note 10 to our unaudited consolidated financial statements included in this Form 10-Q for further discussion of derivative financial instruments.

Results of Operations

The following table presents our consolidated results of operations:

	Three months ended June 30,			Six months ended June 30,		2006 v. 2005
	2006	2005	2006 v. 2005	2006	2005	
	<i>(in millions, except per share amounts)</i>					
Net sales	\$ 664.8	\$ 626.7	\$ 38.1	\$ 1,065.3	\$ 1,086.0	\$ (20.7)

Basic and diluted weighted average common shares outstanding	55.0	55.0	(1)	55.0	55.0	(1)
Basic and diluted net earnings per share	\$ 0.77	\$ 0.78	(1) \$ (0.01)	\$ 0.33	\$ 1.18	(1) \$ (0.85)

(1) Represents the pro forma basic and diluted net earnings per share calculations as if the weighted average number of common shares issued in our initial public offering were outstanding as of December 31, 2004. See Note 4 of our unaudited consolidated financial statements in this Form 10-Q for further information regarding pro forma net earnings per share.

Second Quarter of 2006 Compared to the Second Quarter of 2005***Consolidated Operating Results***

During the second quarter of 2006, the domestic nitrogen fertilizer industry benefited from a firm international market. Our phosphate fertilizer business continued to benefit from relatively balanced industry supply/demand conditions during the second quarter of 2006, as the impact of lower demand was offset by domestic production cutbacks. Our total gross margin increased by approximately \$5.6 million, or 6%, to \$101.2 million for the second quarter of 2006 compared to \$95.6 million for the same period in 2005, due largely to higher average selling prices for nitrogen fertilizers, partially offset by increases in raw material costs (primarily natural gas), higher purchased nitrogen product costs and lower fertilizer sales volume. The net earnings of \$42.6 million for the second quarter of 2006 included a favorable pre-tax net mark-to-market adjustment of \$11.7 million on natural gas derivatives. There were no mark-to-market adjustments recorded directly to cost of sales in the prior period as hedge accounting was still being applied.

Net Sales

Our net sales increased 6% to \$664.8 million in the second quarter of 2006 compared to \$626.7 million in the second quarter of 2005, due to higher average selling prices for nitrogen and phosphate fertilizers that were partially offset by a decrease in nitrogen and phosphate fertilizer sales volumes. Nitrogen and phosphate fertilizer prices for the second quarter of 2006 averaged 13% and 9% higher, respectively, than the prices for similar products in the comparable period of 2005. Our total sales volume decreased 6% to 2.6 million tons in the second quarter of 2006 versus 2.7 million tons in the second quarter of 2005. Nitrogen fertilizer sales volume decreased 93,000 tons, or 4%, to 2.0 million tons in the second quarter of 2006 compared to 2.1 million tons in the comparable period of 2005, due primarily to lower UAN sales. Our total level of phosphate fertilizer sales of 554,000 tons in the second quarter of 2006 was 62,000 tons, or 10%, lower compared to the 616,000 tons sold during the same period in 2005, primarily due to reduced export demand.

Cost of Sales

Total cost of sales of our nitrogen fertilizers averaged \$220 per ton in the second quarter of 2006 compared to \$193 per ton in the second quarter of 2005, an increase of 14%, primarily due to higher natural gas prices and higher purchased product costs, partially offset by a favorable mark-to-market adjustment on natural gas derivatives. Phosphate fertilizer cost of sales averaged \$212 per ton in the second quarter of 2006 compared to \$199 per ton in the second quarter of the prior year, an increase of 7%, mainly due to higher ammonia and sulfur costs.

During the second quarter of 2006, we sold approximately 1.0 million tons of fertilizer under our forward pricing program, representing approximately 41% of our total fertilizer sales volume for the quarter. In the comparable period of 2005, we sold approximately 1.6 million tons of fertilizer under this program, representing approximately 58% of our total fertilizer sales volume for the period.

Selling, General and Administrative Expenses

Selling, general and administrative expenses of \$14.3 million for the second quarter of 2006 approximated the level in the corresponding quarter of the prior year. Selling, general and administrative expenses increased in the second quarter of 2006 related to increased compensation expense associated with our share-based awards. On a year-over-year basis, this increase was offset by the absence in 2006 of expense recorded in the second quarter of 2005 associated with our initial public offering and expenses related to investigating an investment opportunity in the Republic of Trinidad and Tobago. There was no expense for share-based awards in the prior period.

Other Operating Net

Other operating net decreased to \$1.6 million in the second quarter of 2006 from \$1.7 million in the same period of 2005. The decrease was due primarily to higher litigation expense recorded in 2005, partially offset by a \$0.3 million adjustment in the second quarter of 2006 to the asset retirement obligations (AROs) at our closed Bartow facility. For a detailed explanation of the accounting for AROs at Bartow, please refer to Note 9 to our audited consolidated financial statements included in our 2005 Annual Report on Form 10-K.

Interest Net

Interest net swung to \$1.3 million of net interest income in the second quarter of 2006 from \$1.0 million of net interest expense in the second quarter of 2005. Interest expense decreased 71% to \$1.5 million in 2006 from \$5.2 million in 2005, due to the full repayment of our term notes, out of our cash and short-term investments, in the third quarter of 2005. This decrease was partially offset by the

Edgar Filing: CF Industries Holdings, Inc. - Form 10-Q

recording, in the second quarter of 2006, of \$1.0 million of interest expense related to a Canadian tax matter. Interest income decreased to \$2.8 million in 2006 from \$4.2 million in 2005, as higher average rates of investment return were more than offset by lower average balances of invested cash.

Minority Interest

Amounts reported as minority interest represent the interest of the 34% minority holder of CFL's common and preferred shares. The increase in the second quarter of 2006 was due to improved CFL operating results, reflecting stronger market conditions for nitrogen fertilizers.

Income Taxes

The income tax provision for the second quarter of 2006 was recorded based upon our estimated annual effective tax rate, which includes applicable federal, foreign and state taxes. Our estimated effective tax rate decreased to 39.4% for the second quarter of 2006 from 39.7% in the comparable period in 2005. The net decrease was primarily due to the impact of lower state income taxes, partially offset by higher net non-deductible expenses.

Six Months Ended June 30, 2006 Compared to Six Months Ended June 30, 2005

Consolidated Operating Results

For the six months ended June 30, 2006, the domestic nitrogen fertilizer industry was impacted negatively by high natural gas prices during the first quarter of the year, but benefited from a firm international market and declining natural gas prices during the second quarter. Our phosphate fertilizer business was affected positively during the first six months of 2006 by relatively balanced industry supply/demand conditions. Our total gross margin decreased by approximately \$72.4 million, or 48%, with a gross margin of \$78.5 million for the six months ended June 30, 2006 compared to a gross margin of \$150.9 million for the same period in 2005, due largely to weaker market conditions for nitrogen fertilizers, caused by increased costs due to higher gas prices experienced in the first quarter of 2006. The net earnings of \$18.0 million for the six months ended June 30, 2006 included a pre-tax charge of \$8.3 million for unrealized mark-to-market losses on natural gas derivatives. There were no mark-to-market adjustments recorded directly to cost of sales in the prior period as hedge accounting was still being applied.

Net Sales

Our net sales for the six months ended June 30, 2006 of \$1.1 billion was 2%, or \$20.7 million lower than sales for the six months ended June 30, 2005, due to a decrease in fertilizer sales volume that was partially offset by higher average selling prices for nitrogen and phosphate fertilizers. Our total sales volume decreased 13% to 4.2 million tons for the six months ended June 30, 2006 versus 4.9 million tons for the six months ended June 30, 2005, primarily due to lower nitrogen fertilizer sales volume. Nitrogen fertilizer sales volume decreased 596,000 tons, or 16%, to 3.2 million tons for the six months ended June 30, 2006 compared to 3.8 million tons in the comparable period of 2005, due primarily to less favorable market conditions than were experienced in the prior period. Our total level of phosphate fertilizer sales of 1.0 million tons for the six months ended June 30, 2006 was 5%, or 60,000 tons lower than the amount sold in the same period of 2005 primarily due to lower export demand. Nitrogen and phosphate fertilizer prices for the six months ended June 30, 2006 averaged 14% and 10% higher, respectively, than the prices for similar products in the comparable period of 2005.

Edgar Filing: CF Industries Holdings, Inc. - Form 10-Q

Cost of Sales

Total cost of sales of our nitrogen fertilizers averaged \$240 per ton for the six months ended June 30, 2006 compared to \$190 per ton in a comparable period of 2005, an increase of 26%, primarily due to higher natural gas prices, higher purchased product costs and unrealized mark-to-market losses on natural gas derivatives. Phosphate fertilizer cost of sales averaged \$213 per ton for the six months ended June 30, 2006 compared to \$196 per ton in the comparable period of the prior year, an increase of 9%, mainly due to higher ammonia and sulfur costs.

During the first six months of 2006, we sold approximately 1.8 million tons of fertilizer under our forward pricing program, representing approximately 42% of our total fertilizer sales volume for the period. In the comparable period of 2005, we sold approximately 2.9 million tons of fertilizer under this program, representing approximately 59% of our total fertilizer sales volume for the period.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased 8% to \$27.3 million for the six months ended June 30, 2006 compared to \$25.3 million in the comparable period of 2005. For 2006, the increase was largely due to additional administrative expenses associated with being a publicly held company. A year-over-year increase in expense for the six months ended June 30, 2006 related to share-based compensation was offset by expenses recorded in the comparable period of 2005 related to our initial public offering and expenses related to investigating an investment opportunity in the Republic of Trinidad and Tobago. There was no expense for share-based awards in the prior period.

Other Operating Net

Other operating net increased to \$3.1 million for the six months ended June 30, 2006 from \$2.5 million in the same period of 2005. The increase was due primarily to \$1.0 million of adjustments to the asset retirement obligations (AROs) at our closed Bartow facility recorded in the first six months of 2006, partially offset by a favorable variance in adjustments to our litigation reserve. For a detailed explanation of the accounting for AROs at Bartow, please refer to Note 9 to our audited consolidated financial statements included in our 2005 Annual Report on Form 10-K.

Interest Net

Interest net swung to \$3.5 million of net interest income for the six months ended June 30, 2006 from \$2.8 million of net interest expense in the same period of 2005. Interest expense decreased 81% to \$2.0 million in 2006 from \$10.5 million in 2005, due to the full repayment of our term notes, out of our cash and short-term investments, in the third quarter of 2005. This decrease was partially offset by the recording of \$1.0 million of interest expense in the second quarter of 2006 related to a Canadian tax matter. Interest income decreased to \$5.5 million in 2006 from \$7.7 million in 2005 as higher average rates of return were more than offset by lower average balances of invested cash.

Minority Interest

Amounts reported as minority interest represent the interest of the 34% minority holder of CFL's common and preferred shares. The increase for the six months ended June 30, 2006 was due to CFL operating results. The improvement in CFL operating results reflects stronger market conditions for nitrogen fertilizers primarily in the second quarter of 2006.

Income Taxes

The income tax provision for the six months ended June 30, 2006 was recorded based upon our estimated annual effective tax rate, which includes applicable federal, foreign and state taxes. Our

Edgar Filing: CF Industries Holdings, Inc. - Form 10-Q

estimated effective tax rate decreased to 39.0% for the six months ended June 30, 2006 from 39.6% in the comparable period in 2005. The net decrease was primarily due to the impact of lower state income taxes, partially offset by higher net non-deductible expenses.

Segment Review

Our business is organized and managed internally based on two segments, the nitrogen fertilizer business and the phosphate fertilizer business, which are differentiated primarily by their products, the markets they serve and the regulatory environments in which they operate.

Nitrogen Fertilizer Business

The following table presents summary operating data for our nitrogen fertilizer business:

	Three months ended June 30,			Six months ended June 30,		
	2006	2005	2006 v. 2005	2006	2005	2006 v. 2005
	(in millions, except as noted)					
Net sales	\$ 536.2	\$ 496.0	\$ 40.2	\$ 822.0	\$ 853.3	\$ (31.3)

(1) Includes the cost of natural gas purchases and realized gains and losses on natural gas derivatives.

(2) Total production at Donaldsonville and Medicine Hat, including the 34% interest of Westco, our joint venture partner in CFL.

(3) Gross ammonia production, including amounts subsequently upgraded on-site into urea and/or UAN.

Second Quarter of 2006 Compared to the Second Quarter of 2005

Net Sales. Nitrogen fertilizer net sales increased \$40.2 million to \$536.2 million in the second quarter of 2006 compared to \$496.0 million in the second quarter of 2005, due to higher average selling prices which were partially offset by lower sales volume. Ammonia, urea and UAN sales prices increased by 29%, 2% and 3%, respectively, in the second quarter of 2006 compared to prices in the same period of the prior year. The increase in ammonia prices in the second quarter of 2006 resulted from the influence of higher North American natural gas prices and relatively firm international markets. Nitrogen fertilizer sales volume decreased 4% to 2.0 million tons in the second quarter of 2006 compared to 2.1 million tons in the comparable period of 2005. Ammonia sales volumes decreased by 10% in the second quarter of 2006 due primarily to lower sales from our Tampa terminal resulting from U.S. Agri-Chemicals ceasing phosphate operations in the fourth quarter of 2005. Urea sales in the in the second quarter of 2006 were 15% higher due primarily to increased sales to certain non-agricultural customers. The 17% decrease in UAN sales compared to sales in the second quarter of 2005 was due primarily to less corn acreage planted and reduced fertilizer demand in response to higher prices.

Cost of Sales. Total cost of sales of our nitrogen fertilizers averaged \$220 per ton in the second quarter 2006 compared to \$193 per ton in the second quarter 2005, an increase of 14%, largely due to higher natural gas prices and higher purchased product costs, partially offset by a favorable mark-to-market adjustment on natural gas derivatives. The overall weighted average cost of natural gas supplied to our Donaldsonville facility and CFL's Medicine Hat facility increased by 9% in the second quarter of 2006 versus the cost in the comparable period of 2005. Purchased product costs were approximately \$16.8 million higher in the second quarter of 2006 than in the second quarter of 2005 due to the overall increase in nitrogen fertilizer prices previously discussed as well as additional quantities purchased. We recognized a favorable net \$11.7 million mark-to-market adjustment on natural gas derivatives in the second quarter of 2006. See the Overview section of this discussion and analysis for additional information about the impact of accounting for our natural gas derivatives.

During the second quarter of 2006, we sold approximately 1.0 million tons of nitrogen fertilizers under our forward pricing program, representing approximately 49% of our nitrogen fertilizer sales volume for the quarter. In the comparable period of 2005, we sold approximately 1.4 million tons of nitrogen fertilizers under this program, representing approximately 66% of our nitrogen fertilizer sales volume for the period.

Six Months Ended June 30, 2006 Compared to the Six Months Ended June 30, 2005

Net Sales. Nitrogen fertilizer net sales decreased \$31.3 million to \$822.0 million for the six months ended June 30, 2006 compared to \$853.3 million for the six months ended June 30, 2005, due to lower sales volume which was partially offset by higher average selling prices. Nitrogen fertilizer sales volume decreased 16% to 3.2 million tons in the first six months of 2006 compared to 3.8 million tons in the comparable period of 2005. Ammonia, urea and UAN sales volumes decreased by 27%, 5% and 20%, respectively, for the six months ended June 30, 2006 compared to the same period of the prior year. Ammonia sales volumes decreased due primarily to fewer corn acres planted as well as lower sales from our Tampa terminal due to U.S. Agri-Chemicals ceasing phosphate operations in the fourth quarter of 2005. The decrease in UAN sales compared to sales for the six months ended June 30, 2005 was due primarily to less corn acreage planted and reduced demand in the southern portion of the country due to drought conditions. Ammonia, urea and UAN sales prices increased by 32%, 8% and 9%, respectively, for the six months ended June 30, 2006 compared to prices in the same period of the prior year. The increase in nitrogen fertilizer prices in 2006 resulted from the influence of higher North American natural gas prices and strong international markets.

Cost of Sales. Total cost of sales of our nitrogen fertilizers averaged \$240 per ton for the six months ended June 30, 2006, compared to \$190 per ton for the same period in 2005, an increase of 26%, largely

due to higher natural gas prices, higher purchased product costs and unrealized mark-to-market losses on natural gas derivatives. The overall weighted average cost of natural gas supplied to our Donaldsonville facility and CFL's Medicine Hat facility increased by 16% for the six months ended June 30, 2006 versus the cost in the comparable period of 2005. The increase was due primarily to tight market conditions for natural gas, mainly in the first quarter of 2006, caused in part by the residual impacts of Hurricane Katrina and Hurricane Rita. Purchased product costs were approximately \$42.3 million higher in 2006 than in the same period of 2005 due to the overall increase in nitrogen fertilizer prices previously discussed as well as an increase in the amount of sales volume represented by purchased products. We recognized \$8.3 million of unrealized mark-to-market losses on derivatives in 2006 as an increase in cost of sales due to our discontinuation of hedge accounting and the decline in natural gas market prices that occurred during the year. See the Overview section of this discussion and analysis for additional information about the impact of accounting for our natural gas derivatives.

During the first six months of 2006, we sold approximately 1.6 million tons of nitrogen fertilizers under our forward pricing program, representing approximately 50% of our nitrogen fertilizer sales volume for the period. In the comparable period of 2005, we sold approximately 2.6 million tons of nitrogen fertilizers under this program, representing approximately 68% of our nitrogen fertilizer sales volume for the period.

Phosphate Fertilizer Business

The following table presents summary operating data for our phosphate fertilizer business:

	Three months ended June 30,			Six months ended June 30,		
	2006	2005	2006 v. 2005	2006	2005	2006 v. 2005
	<i>(in millions, except as noted)</i>					
Net sales	\$ 128.6	\$ 130.7	\$ (2.1)	\$ 243.3	\$ 232.7	\$ 10.6
Cost of sales	117.4	122.7	(5.3)	221.9	216.2	5.7
Gross margin	\$ 11.2	\$ 8.0	\$ 3.2	\$ 21.4	\$ 16.5	\$ 4.9
Gross margin percentage	8.7	% 6.1	%	8.8	% 7.1	%
Tons of product sold (000s)	554	616	(62)	1,043	1,103	(60)
Sales volume by product (000s)						
DAP	452	503	(51)	862	890	(28)
MAP	102	113	(11)	181	213	(32)
Domestic vs export sales of DAP/MAP (000s)						
Domestic	369	383	(14)	745	717	28
Export	185	233	(48)	298	386	(88)
Average selling price per ton by product						
DAP	\$ 232	\$ 210	\$ 22	\$ 233	\$ 210	\$ 23
MAP	232	221	11	235	217	18
Depreciation, depletion and amortization	\$ 8.4	\$ 7.8	\$ 0.6	\$ 17.4	\$ 15.2	\$ 2.2
Capital expenditures	\$ 7.5	\$ 4.4	\$ 3.1	\$ 14.9	\$ 13.9	\$ 1.0
Production volume by product (000s)						
Phosphate rock	969	800	169	1,867	1,591	276
Sulfuric acid	652	665	(13)	1,309	1,240	69
Phosphoric acid as P ₂ O ₅	262	264	(2)	513	477	36
DAP/MAP	527	525	2	1,030	948	82

Second Quarter of 2006 Compared to the Second Quarter of 2005

Net Sales. Phosphate fertilizer net sales decreased 2% to \$128.6 million in the second quarter of 2006 compared to \$130.7 million in the second quarter of 2005 due to lower sales volume, which was partially offset by higher average selling prices. Average phosphate fertilizer prices in the second quarter of 2006 increased by 9% compared to prices in the second quarter of 2005. Our total level of phosphate fertilizer sales of 554,000 tons in the second quarter of 2006 was 62,000 tons, or 10%, lower than in the comparable period in 2005. Sales of DAP/MAP to domestic customers was 14,000 tons lower in the second quarter of 2006 compared to sales in the prior period due to lower demand caused by less acreage planted and lower application rates. The 48,000 ton decrease in sales of DAP/MAP to export customers was primarily due to reduced demand in key overseas markets.

Cost of Sales. Phosphate cost of sales averaged \$212 per ton in the second quarter of 2006 compared to \$199 per ton in the second quarter of 2005. The 7% increase was mainly due to higher ammonia and sulfur costs. Ammonia prices increased by 7% in the second quarter of 2006 compared to the second quarter of 2005, reflecting stronger global market conditions. Sulfur costs increased by 16% in the second quarter of 2006 compared to the second quarter of 2005, reflecting the residual impact of supply disruptions that occurred in 2005 due to hurricane activity.

During the second quarter of 2006, we sold approximately 51,000 tons of phosphate fertilizers under our forward pricing program, representing approximately 9% of our phosphate fertilizer sales volume for the quarter. In the comparable period of 2005, we sold approximately 179,000 tons of phosphate fertilizers under this program, representing approximately 29% of our phosphate fertilizer sales volume for the period.

Six Months Ended June 30, 2006 Compared to the Six Months Ended June 30, 2005

Net Sales. Phosphate fertilizer net sales increased 5% to \$243.3 million for the six months ended June 30, 2006 compared to \$232.7 million in the comparable period of 2005, due primarily to higher average selling prices which were partially offset by lower fertilizer sales volume. Average phosphate fertilizer prices during the first six months of 2006 increased by 10% compared to prices in 2005. Our total level of phosphate fertilizer sales of 1.0 million tons in the first six months of 2006 was 60,000 tons, or 5%, lower than the 1.1 million tons sold in the first six months of 2005. Within our total phosphate fertilizer sales, sales of DAP/MAP to export customers decreased by 23%, totaling 298,000 tons for the six months ended June 30, 2006 compared to 386,000 tons for the six months ended June 30, 2005. The decrease in sales of DAP/MAP to export customers was primarily due to reduced demand in key overseas markets.

Cost of Sales. Phosphate cost of sales averaged \$213 per ton for the six months ended June 30, 2006 compared to \$196 per ton for the six months ended June 30, 2005. The 9% increase was mainly due to higher ammonia and sulfur costs. Ammonia prices increased by 21% during 2006 compared to the same period in 2005, reflecting stronger global market conditions. Sulfur costs increased by 17% for the six months ended June 30, 2006 compared to the comparable period of 2005, reflecting the lingering impact of supply disruptions that occurred in 2005 due to hurricane activity.

During the first six months of 2006, we sold approximately 177,000 tons of phosphate fertilizers under our forward pricing program, representing approximately 17% of our phosphate fertilizer sales volume for the period. In the comparable period of 2005, we sold approximately 312,000 tons of phosphate fertilizers under this program, representing approximately 28% of our phosphate fertilizer sales volume for the period.

Liquidity and Capital Resources

The primary sources of cash for working capital, capital expenditures and acquisitions are operating cash flow, which includes customer advances, and our senior secured revolving credit facility. Our primary uses of cash are operating costs, working capital needs, capital expenditures and dividends. Our working capital requirements are affected by several factors, including demand for our products, selling prices for our products, raw material costs, freight costs and seasonality factors inherent in the business.

Cash Balance and Other Liquidity

As of June 30, 2006, we had cash and cash equivalents of \$24.7 million, short-term investments of \$203.3 million and a \$70.1 million current liability attributable to customer advances related to cash deposits received under our forward pricing program. As of December 31, 2005, the comparable amounts were \$37.4 million, \$179.3 million and \$131.6 million, respectively. Short-term investments consist primarily of available-for-sale auction rate securities that are reported at fair value. We believe that our cash, cash equivalents and short-term investments, our operating cash flows and liquidity under our senior secured revolving credit facility are adequate to fund our cash requirements for the foreseeable future. As of June 30, 2006 and December 31, 2005, we had \$164.5 million and \$192.6 million available, respectively, under our revolving credit facility.

Debt

Notes payable, representing amounts owed by CFL to its minority interest holder with respect to advances, were \$4.4 million as of June 30, 2006 compared to \$4.2 million as of December 31, 2005. There were no outstanding borrowings or letters of credit under our \$250 million senior secured revolving credit facility as of June 30, 2006 or December 31, 2005.

Forward Pricing Program

We offer a FPP to our customers under which product may be ordered for future delivery, with a substantial portion of the sales proceeds generally being collected before the product is shipped, thereby reducing or eliminating the accounts receivable related to such sales. During the first six months of 2006, we sold approximately 1.8 million tons of fertilizer under our forward pricing program, representing approximately 42% of our total fertilizer sales volume for the period. In the comparable period of 2005, we sold approximately 2.9 million tons of fertilizer under this program, representing approximately 59% of our total fertilizer sales volume for the period. As of June 30, 2006 and December 31, 2005, we had approximately \$70.1 million and \$131.6 million, respectively, of customer advances on our consolidated balance sheet. As of June 30, 2006 and December 31, 2005, we had approximately 814,000 tons of product and 1.2 million tons of product, respectively, committed to be sold under the FPP. Most of this product was scheduled to ship within 150 days of June 30, 2006 and December 31, 2005, respectively.

While customer advances were a significant source of liquidity in the first six months of both 2006 and 2005, the level of sales under the FPP is affected by many factors, including current market conditions and our customers' perceptions of future market fundamentals. As of June 30, 2005, we had approximately 1.4 million tons of product committed to be sold under this program. The lower level as of June 30, 2006 reflects the uncertainty that exists in the fertilizer market, the higher natural gas prices experienced in the winter and the hesitancy of our customers to make commitments in this natural gas cost and fertilizer pricing environment.

There can be no assurance that we will transact the same percentage of our business under the FPP in the future. Should the level of participation decrease, there is a risk of increased volatility in the operating earnings of future periods. If the level of sales under the FPP were to decrease in the future, our cash received from customer advances would likely decrease, and our accounts receivable balances would likely

increase. Also, borrowing under our senior secured revolving credit facility could become necessary. Due to our relatively brief history with this program and the volatility inherent in our business, we cannot estimate the amount of future FPP sales activity.

Financial Assurance Requirements

In addition to various operational and environmental regulations related to our phosphate fertilizer business, we are also subject to financial assurance requirements. Previously, these financial assurance requirements were satisfied without the need for any advance expenditure of corporate funds if our financial statements met certain criteria, referred to as the financial tests. However, pursuant to a 2005 amendment to the Florida regulations governing financial assurance related to the closure of phosphogypsum stacks, we established an escrow account to meet such future obligations to take advantage of a safe harbor provision in the regulations. In March of 2006, we contributed \$11.1 million to the escrow account earmarked to cover the closure, long-term maintenance, and monitoring costs for our phosphogypsum stacks, as well as any costs incurred to manage the water contained in the stack system upon closure.

Additionally, Florida regulations require mining companies to demonstrate financial responsibility for wetland and other surface water mitigation measures in advance of any mining activities. We will be required to demonstrate financial responsibility for wetland and other surface water mitigation measures in advance of any mining activities, if and when we are able to expand our Hardee mining activities to areas not currently permitted. The demonstration of financial responsibility in Florida may be provided by passing a financial test. Based on current regulations, in the event we cannot meet the financial test, we will have the option to demonstrate financial responsibility with a cash deposit arrangement.

See Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity in our 2005 Annual Report on Form 10-K for additional information on financial assurance requirements.

Cash Flows

Operating Activities

Net cash generated from operating activities in the first six months of 2006 was \$62.9 million compared to \$133.0 million in the same period in 2005. The \$70.1 million decrease in cash provided by operating activities in 2006 was primarily due to a \$75.0 decrease in operating earnings, partially offset by \$8.3 million of unrealized losses on derivatives. Other major factors affecting cash flow during the first six months of 2006 were a \$61.5 million decrease in customer advances, a \$49.5 million decrease in inventories, a \$28.9 million increase in accounts receivable and a \$22.8 million decrease in accounts payable and accrued expenses. The decrease in customer advances was due to lower levels of forward sales on order as of June 30, 2006 as compared to December 31, 2005 as well as other seasonal factors. The decrease in inventories reflects lower per-unit nitrogen fertilizers manufacturing cost. The increase in accounts receivable was primarily due to less volume shipped under the FPP for which a substantial portion of the sales proceeds is generally received prior to shipment. The decrease in accounts payable and accrued expenses was primarily due to lower amounts owed for purchased product as of June 30, 2006 as compared to December 31, 2005.

Investing Activities

Net cash used in investing activities was \$58.3 million for the first six months of 2006 as compared to \$94.8 million used in the comparable period of 2005. Net purchases of short-term investments were \$24.0 million during the first six months of 2006 and \$61.6 million during the six months ended June 30, 2005. The level of short-term investments, generally auction rate securities that we liquidate over periods

ranging from three to twelve months, is dictated by our current cash position and estimated future liquidity requirements. Additions to property, plant and equipment-net were \$23.2 million for the first six months of 2006 and \$33.2 million for the comparable period of the prior year. The decrease in additions to property, plant and equipment-net in 2006 was due primarily to an \$11.9 million decrease in plant turnaround expenditures during 2006 as compared to the same period in 2005. As previously discussed, we contributed \$11.1 million in March of 2006 to our asset retirement obligation escrow account. The balance in this account is reported at fair value on our consolidated balance sheet.

Financing Activities

Net cash used in financing activities was \$17.3 million and \$8.5 million in the first six months of 2006 and 2005, respectively. Distributions to minority interest were higher in 2006, as most of CFL's 2005 net earnings were distributed in the first quarter of 2006, whereas the majority of CFL's 2004 net earnings were distributed in 2004.

Obligations

Contractual Obligations

As of June 30, 2006, the annual amounts for purchase obligations for 2006 and 2007 are lower by \$176.2 million and \$42.1 million, respectively, as compared to the amounts shown in Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity in our 2005 Annual Report on Form 10-K. Of the \$176.2 million reduction for 2006, approximately \$120.6 million relates to the last six months of the year. These changes reflect primarily lower per unit prices for commitments to purchase natural gas, ammonia and sulfur for use in phosphate production and ammonia, urea and UAN purchased for resale in our markets, as well as lower quantities for commitments to purchase ammonia for resale. These commitments are based on spot prices as of June 30, 2006 and actual prices may differ.

Other Long-Term Obligations

Our accounts payable and accrued expenses and other liabilities on our consolidated balance sheet included balances related to asset retirement obligations. As of June 30, 2006 asset retirement obligations totaled \$70.1 million as compared to \$74.5 million as of December 31, 2005. The asset retirement obligations as of June 30, 2006 included the impact of the \$1.0 million adjustment to Bartow conditional asset retirement costs as discussed more fully in other operating-net in Results of Operations Six Months Ended June 30, 2006 Compared to Six Months Ended June 30, 2005 in this discussion and analysis. As of June 30, 2006, the cash required to settle the asset retirement obligations in 2006 is expected to be \$4.2 million. See Note 9 to our consolidated financial statements in Item 8, Financial Statements and Supplementary Data, of our 2005 Annual Report on Form 10-K for further discussion of asset retirement obligations.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Critical Accounting Policies and Estimates

We describe our significant accounting policies and estimates in Note 2 to our audited consolidated financial statements and related notes included in Item 8, Financial Statements and Supplementary Data, of our 2005 Annual Report on Form 10-K. We discuss our critical accounting estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2005 Annual Report on Form 10-K.

FORWARD LOOKING STATEMENTS

This Form 10-Q contains forward-looking statements that are not statements of historical fact and may involve a number of risks and uncertainties. These statements relate to analyses and other information that are based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to our future prospects, developments and business strategies.

We have used the words anticipate, believe, could, estimate, expect, intend, may, plan, predict, project, and similar terms and references to assumptions, to identify forward-looking statements in this Form 10-Q. These forward-looking statements are made based on our expectations and beliefs concerning future events affecting us and are subject to uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control, that could cause our actual results to differ materially from those matters expressed in or implied by these forward-looking statements. We do not undertake any responsibility to release publicly any revisions to these forward-looking statements to take into account events or circumstances that occur after the date of this report. Additionally, we do not undertake any responsibility to provide updates regarding the occurrence of any unanticipated events which may cause actual results to differ from those expressed or implied by the forward-looking statements contained in this report.

Important factors that could cause actual results to differ materially from our expectations are disclosed under Risk Factors and elsewhere in our Annual Report on Form 10-K. Such factors include, among others:

- the relatively expensive and volatile cost of North American natural gas;
- the cyclical nature of our business;
- our history of losses;
- the nature of our products as global commodities;
- intense global competition in the consolidating markets in which we operate;
- conditions in the U.S. agricultural industry;
- weather conditions;
- our inability to accurately predict seasonal demand for our products;
- the concentration of our sales to CF Industries, Inc.'s pre-IPO owners and other large customers;
- the impact of changing market conditions on our forward pricing program;
- the significant risks and hazards against which we may not be insured;
- unanticipated consequences related to future expansion of our business;
- our inability to expand our business, including due to the significant resources that could be required;
- potential liabilities and expenditures related to environmental and health and safety laws and regulations;
- our inability to obtain or maintain required permits and governmental approvals;
- acts of terrorism;
- difficulties in securing the raw materials we use;

- changes in global fertilizer supply and demand;

27

- loss of key members of management; and
- inability to meet financial reporting and other requirements as a public company.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are exposed to the impact of changes in interest rates, foreign currency exchange rates and commodity prices. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Quantitative and Qualitative Disclosures About Market Risk in our Annual report on Form 10-K for additional information on market risk.

Interest Rate Fluctuations

As of June 30, 2006, we had notes payable of approximately \$4 million that had a floating interest rate. A 100 basis point change in interest rates on our notes payable would result in a \$40,000 change in pretax income on an annual basis. The senior secured revolving credit facility bears a current market rate for interest such that we are subject to interest rate risk on borrowings under this facility. As of June 30, 2006, there were no loans outstanding under this credit facility.

Commodity Prices

We manage the risk of changes in natural gas prices through the use of physical gas supply contracts and derivative financial instruments covering periods not exceeding three years. As of June 30, 2006, approximately 19.5 million MMBtus of natural gas were hedged, most of which related to sales contracted to be sold through our forward pricing program as of June 30, 2006. As of December 31, 2005, approximately 14.1 million MMBtus of natural gas were hedged, most of which related to sales contracted to be sold through our forward pricing program as of December 31, 2005.

Through the third quarter of 2005, we recorded derivatives as assets and liabilities at their fair value on the balance sheet with an offset in other comprehensive income (loss). The gain or loss from these derivatives was deferred in other comprehensive income (loss) until the month after the hedged natural gas was used to manufacture inventoried products, which approximated the period of inventory turns of upgraded products and the release of the cost of the hedged gas to cost of sales. Ineffective hedge gains and losses, as defined in SFAS No. 133 *Accounting for Derivatives and Hedging Activities*, were recorded immediately in cost of sales.

Volatility in the natural gas market during the latter part of 2005 and our decision to supply FPP orders from sources other than production have reduced our ability to predict future natural gas requirements. Consequently, we no longer classify derivatives as cash flow hedges as defined in SFAS No. 133 *Accounting for Derivatives and Hedging Activities*. As a result, while the derivatives are still carried at their fair value on the balance sheet, unrealized gains or losses related to the derivatives are now recognized in operations as they occur. There is a probability of increased volatility in our operating earnings in future periods as a result of our discontinuance of hedge accounting, because mark-to-market adjustments on our derivatives directly impact operations as incurred.

ITEM 4. CONTROLS AND PROCEDURES.

(a) Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act and are effective in ensuring that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Internal Control Over Financial Reporting. There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended June 30, 2006 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

Our 2006 annual meeting of stockholders was held on May 10, 2006, for the purpose of (1) electing two members of the board of directors to serve until the 2009 annual meeting of stockholders and (2) ratifying the selection of KPMG LLP as our independent registered public accounting firm for 2006.

At the meeting, the following persons were elected to the board of directors, each for a term to expire at the 2009 annual meeting of stockholders:

Nominee	Number of Votes	
	For	Withheld
David R. Harvey	50,591,785	242,083
John D. Johnson	49,462,655	1,371,213

The stockholders ratified the appointment of KPMG LLP as our independent registered public accounting firm for the year 2006 with 50,798,078 votes cast for ratification, 31,050 votes cast against ratification, and 4,740 abstentions.

ITEM 5. OTHER INFORMATION.

On May 10, 2006, the Board of Directors of the Company authorized amendments to the Company's Non-Employee Director Compensation Policy. Pursuant to these amendments, the annual retainer paid to non-employee directors of the Company was increased from \$30,000 to \$40,000 and the additional annual retainer paid to the chairman of the Company's Audit Committee was increased from \$5,000 to \$10,000. The policy was amended to also provide an additional \$10,000 annual retainer to the Company's Lead Independent Director. The Policy is filed herewith as Exhibit 10.1 to this Quarterly Report on Form 10-Q.

ITEM 6. EXHIBITS.
