- (1) Senior floating-rate interests often require prepayments from excess cash flows or permit the borrower to repay at their election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, it is anticipated that the senior floating-rate interests will have an expected average life of approximately two to four years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London-Interbank Offered Rate ( LIBOR ), and secondarily the prime rate offered by one or more major United States banks (the Prime Rate ) and the certificate of deposit ( CD ) rate or other base lending rates used by commercial lenders.
- (2) Security valued at fair value using methods determined in good faith by or at the direction of the Trustees.
- (3) This Senior Loan will settle after July 31, 2008, at which time the interest rate will be determined.
- (4) Unfunded or partially unfunded loan commitments. The Fund may enter into certain credit agreements whereby all or a portion of which may be unfunded. The Fund is obligated to fund these commitments at the borrower's discretion.
- (5) All or a portion of this security was on loan at period-end. As of July 31, 2008, the value of the securities loaned and the value of the collateral amounted to \$92,982,999 and \$94,650,201, respectively.
