## Investment Strategy

Otter Creek is an opportunistic long-short hedge fund designed to generate absolute returns. While investment positions reflect an overriding macro-economic view, exposure levels tend to fall out from valuation-driven security selection. Our objective is to generate equity-like returns (4% to 6% over the risk-free rate) with significantly less risk (volatility) than equities. Otter Creek achieves this objective by:

- Managing a broad and diverse portfolio of long-term holdings that are identified through a forensic accounting approach to financial analysis
- Truly hedging with short positions and individual equity options
- Engaging in complementary opportunistic strategies, including closed-end fund arbitrage and investments at different points of the capital structure

PERFORMANCE GRAPH

The Performance Graph below compares Conseco's cumulative total shareholder return on its common stock for the period from December 31, 2003 through December 31, 2008 with the cumulative total return of the Standard & Poor's 500 Composite Stock Price Index (the S&P 500 Index) and the Dow Jones Life Insurance Index. The comparison for each of the periods assumes that \$100 was invested on December 31, 2003 in each of Conseco common stock, the stocks included in the S&P 500 Index and the stocks included in the Dow Jones Life Insurance Index and that all dividends were reinvested. The stock performance shown in this graph represents past performance and should not be considered an indication of future performance of Conseco's common stock.

#### Investment Borrowings

In the first quarter of 2007, one of the Company's insurance subsidiaries (Conseco Life) became a member of the Federal Home Loan Bank of Indianapolis ( FHLBI ). As a member of the FHLBI, Conseco Life has the ability to borrow on a collateralized basis from FHLBI. Conseco Life is required to hold a certain minimum amount of FHLBI common stock as a requirement of membership in the FHLBI, and additional amounts based on the amount of the borrowings. At December 31, 2008, the carrying value of the FHLBI common stock was \$22.5 million. Collateralized borrowings from the FHLBI totaled \$450.0 million as of December 31, 2008, and the proceeds were used to purchase fixed maturity securities. The borrowings are classified as investment borrowings in the accompanying consolidated balance sheet. The borrowings are collateralized by investments with an estimated fair value of \$504.6 million at December 31, 2008, which are maintained in a custodial account for the benefit of the FHLBI. Conseco Life recognized interest expense of \$21.9 million and \$16.7 million in 2008 and 2007, respectively, related to the borrowings.

The following summarizes the terms of the borrowings (dollars in millions):

	<b>Amount borrowed</b>	<b>Maturity date</b>	<b>Interest rate at December 31, 2008</b>
\$	54.0	May 2012	Variable rate - 2.153%
	37.0	July 2012	Fixed rate - 5.540%
	13.0	July 2012	Variable rate - 4.810%
	146.0	November 2015	Fixed rate - 5.300%
	100.0	November 2015	Fixed rate - 4.890%
	100.0	December 2015	Fixed rate - 4.710%

At December 31, 2008, investment borrowings consisted of: (i) collateralized borrowings of \$450.0 million; (ii) \$311.7 million of securities issued to other entities by a variable interest entity ( VIE ) which is consolidated in our financial statements as further discussed in the note to the consolidated financial statements entitled "Investment in a Variable Interest Entity"; and (iii) other borrowings of \$5.8 million.

At December 31, 2007, investment borrowings consisted of: (i) collateralized borrowings of \$450.0 million; (ii) \$452.3 million of securities issued to other entities by a VIE which is consolidated in our financial statements; and (iii) other borrowings of \$10.7 million.

#### 17. INVESTMENT IN A VARIABLE INTEREST ENTITY

The Company has an investment in a special purpose entity that is a variable interest entity under FIN 46 (R). The following is description of our significant investment in a variable interest entity:

Fall Creek CLO Ltd.

Fall Creek CLO Ltd. ( Fall Creek ) is a collateralized loan trust that was established to issue securities and use the proceeds to invest in loans and other permitted investments. The assets held by the trust are legally isolated and are not available to the Company. The liabilities of Fall Creek will be satisfied from the cash flows generated by the underlying loans, not from the assets of the Company. The investment borrowings were issued pursuant to an indenture between Fall Creek and a trustee. The investment borrowings of Fall Creek may become due and payable if certain threshold ratios (based on the entity's leverage and the market value of its assets) are not met for a specified period of time. During the first quarter of 2008, such threshold ratio was not met and the indenture was amended. As a result of the amendment, Fall Creek sold assets of \$90 million (which resulted in net realized investment losses of \$11.2 million), and paid down investment borrowings of \$88.0 million. Pursuant to the amendment, we committed to provide additional capital to Fall Creek for up to \$25 million (under defined circumstances) all of which was contributed in 2008. In addition, the indenture was amended and restated in November 2008, to change certain terms related to the investment borrowings, cease future reinvesting activities of Fall Creek, provide for an additional investment in Fall Creek and remove the provision related to threshold ratios. In conjunction with the amendment and restatement of the indenture, Fall Creek repaid \$17.5 million of investment borrowings and the Company purchased: (i) \$25.2 million of borrowings previously held by others; and (ii) \$9.7 million of newly issued borrowings of Fall Creek. Repayment of the remaining principal balance of the investment borrowings of Fall Creek is based on available cash flows from the assets and such borrowings mature in 2017. A \$10.0 million repayment was made in December 2008 based on such excess cash flows. The Company has no further commitments to Fall Creek. Also, in 2008, we recognized \$10.8 million of writedowns of investments held by Fall Creek resulting from declines in fair values that we concluded were other than temporary. The carrying value of our investment in Fall Creek was \$83.8 million and \$47.0 million at December 31, 2008 and 2007, respectively. The following tables provide supplemental information about the assets, liabilities, revenues and expenses
