Cash paid for interest	\$ 1,015	\$	2,136
Net cash refunded for income taxes	\$ (3,309)	\$	(3,553)

Dividends of approximately \$3.2 million have been declared by the Company s Board of Directors, but not paid, as of March 31, 2011.

For the three months ended March 31, 2011, and 2010, \$222.8 million, and \$104.6 million, respectively, are included as additions to oil and gas properties and accounts payable and accrued expenses. These oil and gas property additions are reflected in cash used in investing activities in the periods that the payables are settled.

Table of Contents

SM ENERGY COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Note 1 The Company and Business

SM Energy Company (SM Energy or the Company) is an independent energy company engaged in the acquisition, exploration, exploitation, development, and production of crude oil, natural gas, and natural gas liquids (NGLs) in North America, with a focus on oil and liquids-rich resource plays.

Note 2 Basis of Presentation and Significant Accounting Policies

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of SM Energy have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and the instructions to Form 10-Q and Regulation S-X. They do not include all information and notes required by generally accepted accounting principles for complete financial statements. However, except as disclosed herein, there has been no material change in the information disclosed in the notes to consolidated financial statements included in SM Energy s Annual Report on Form 10-K for the year ended December 31, 2010 (the 2010 Form 10-K). In the opinion of management, all adjustments, consisting of normal recurring accruals that are considered necessary for a fair presentation of the interim financial information, have been included. Operating results for the periods presented are not necessarily indicative of expected results for the full year. In connection with the preparation of its condensed consolidated financial statements, the Company evaluated subsequent events after the balance sheet date of March 31, 2011, through the filing date of this report.

Other Significant Accounting Policies

The accounting policies followed by the Company are set forth in Note 1 to the Company s consolidated financial statements in the 2010 Form 10-K, and are supplemented throughout the notes to condensed consolidated financial statements in this report. It is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and notes included in the 2010 Form 10-K. As discussed in Note 10 Derivative Financial Instruments, as of January 1, 2011, the Company elected to discontinue cash flow hedge accounting on a prospective basis.

Recently Issued Accounting Standards

There are no new significant accounting standards applicable to SM Energy that have been issued but not yet adopted as of the quarter ended March 31, 2011.

Note 3 Divestitures and Assets Held for Sale

Rockies Divestiture

In January 2011 the Company completed the divestiture of certain non-strategic assets located in its Rocky Mountain region that were classified as assets held for sale at December 31, 2010. Total cash received, before marketing costs and Net Profits Interest Bonus Plan (Net Profits Plan) payments, was \$44.4 million. The final sale price is subject to post-closing adjustments and is expected to be finalized during the second quarter of 2011. The estimated gain on this divestiture is approximately \$26.1 million and may be impacted by post-closing adjustments mentioned above. The Company determined that the sale

8

Table of Contents

did not qualify for discontinued operations accounting under financial statement presentation authoritative guidance.

Assets Held for Sale

Assets are classified as held for sale when the Company commits to a plan to sell the assets and there is reasonable certainty that the sale will take place within one year. Upon classification as held for sale, long-lived assets are no longer depreciated or depleted and a measurement for impairment is performed to expense any excess of carrying value over fair value less costs to sell. Subsequent changes to estimated fair value less the cost to sell will impact the measurement of assets held for sale for assets for which fair value is determined to be less than the carrying value of the assets.

As of March 31, 2011, the accompanying condensed consolidated balance sheets (accompanying balance sheets) include \$122.8 million in book value of assets held for sale, net of accumulated depletion, depreciation and amortization. The corresponding asset retirement obligation liability of \$122,000 is also separately presented. The above assets held for sale and asset retirement obligation liability amounts include amounts for certain assets located in Pennsylvania, the Company s Mid-Continent region, as well as the Company s gathering assets in its South Texas & Gulf Coast region. The Company began marketing these Pennsylvania and Mid-Continent region assets in the third quarter of 2010 and the South Texas & Gulf Coast region assets in the first quarter of 2011. The Company determined that these planned asset sales do not qualify for discontinued operations accounting under financial statement presentation authoritative guidance.

Note 4 Income Taxes

Income tax benefit (expense) for the three-month periods ended March 31, 2011, and 2010, differs from the amounts that would be provided by applying the statutory U.S. federal income tax rate to income (loss) before income taxes as a result of the estimated effect of the domestic production activities deduction, percentage depletion, the effect of state income taxes, and other permanent differences.

The provision for income taxes consists of the following:

	For the Three Months Ended March 31,					
		2011		2010		
		(in tho	usands)			
Current portion of income tax (expense):						
Federal	\$	(6,944)	\$	(9,975)		
State		(175)		(332)		
Deferred portion of income tax benefit (expense)		18,174		(64,608)		
Total income tax benefit (expense)	\$	11,055	\$	(74,915)		
Effective tax rate		37.4%		37.3%		

A change in the Company s effective tax rate between reported periods will generally reflect differences in its estimated highest marginal state tax rate due to changes in the composition of income from Company activities among state tax jurisdictions. The rate is also impacted period to period by estimates for the domestic production activities deduction, percentage depletion, and for potential permanent state tax items which affect the presented periods differently due to oil and gas price variability and the impact of non-core asset sales.

Table of Contents

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and in various states. With few exceptions, the Company is no longer subject to U.S. federal or state income tax examinations by these tax authorities for years before 2007. During the first quarter of 2010, the Internal Revenue Service initiated an audit of the Company for the 2006 tax year as a result of a net operating loss carryback from the Company s 2008 tax year. The audit was successfully concluded in the second quarter of 2010 with no changes to Company reported amounts. During the first quarter of 2011, the Company received an anticipated \$5.5 million refund from its 2006 tax year net operating loss carryback claim. The Company s remaining refundable income tax balance at March 31, 2011, reflects an additional net operating loss carryback claim to the 2006 tax year from filing a revised income tax return for the 2009 tax year prior to the extended return due date. In the fourth quarter of 2010, the Internal Revenue Service began an audit of the Company s 2009 tax year. The audit is still in progress at March 31, 2011.

Note 5 Long-Term Debt

3.50% Senior Convertible Notes Due 2027

On April 4, 2007, the Company issued \$287.5 million in aggregate principal amount of 3.50% Senior Convertible Notes Due 2027 (the 3.50% Senior Convertible Notes). The 3.50% Senior Convertible Notes mature on April 1, 2027, unless converted prior to maturity, redeemed, or purchased by the Company.

Holders of the 3.50% Senior Convertible Notes may elect to surrender all or a portion of their notes for conversion under certain circumstances, including during a calendar quarter if the closing price of the Company s common stock was more than 130 percent of the conversion price of \$54.42 per share for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter. As of December 31, 2010, the 3.50% Senior Convertible Notes were not convertible. Since the closing price of the Company s common stock was more than the conversion trigger price of \$70.75 per share for at least 20 trading days in the 30 consecutive trading days ending on the last trading day in the quarter ended March 31, 2011, the holders of the 3.50% Senior Convertible Notes have the right to convert all or a portion of their notes during the second quarter ending June 30, 2011. If holders elect to convert all or a portion of their notes, they will receive cash, or shares of the Company s common stock, or any combination thereof as may be elected by the Company under the indenture for the 3.50% Senior Convertible Notes. Based on the secondary market trading price of the 3.50% Senior Convertible Notes, the estimated fair value of the notes was approximately \$410 million as of March 31, 2011.

6.625% Senior Notes Due 2019

On February 7, 2011, the Company issued \$350.0 million in aggregate principal amount of 6.625% Senior Notes Due 2019 (the 6.625% Senior Notes). The 6.625% Senior Notes were issued at par and mature on February 15, 2019. The Company received net proceeds of approximately \$341.4 million after deducting fees of approximately \$8.6 million, which will be amortized as deferred financing costs over the life of the 6.625% Senior Notes. The net proceeds were used to repay borrowings under the Company s credit facility, with the remainder to be used for the Company s ongoing capital expenditure program and general corporate purposes.

Prior to February 15, 2014, the Company may redeem up to 35 percent of the aggregate principal amount of the 6.625% Senior Notes with the net cash proceeds of one or more equity offerings at a redemption price of 106.625% of the principal amount thereof, plus accrued and unpaid interest.

Table of Contents

The Company may also redeem all or, from time to time, a part of the 6.625% Senior Notes on or after February 15, 2015, at the prices set forth below, expressed as a percentage of the principal amount redeemed, plus accrued and unpaid interest:

2015	103.313%
2016	101.656%
2017 and thereafter	100.000%

The 6.625% Senior Notes are unsecured senior obligations and rank equal in right of payment with all of the Company s existing and any future unsecured senior debt and are senior in right of payment to any future subordinated debt. There are no subsidiary guarantors of the 6.625% Senior Notes. The Company is also subject to certain covenants under its 6.625% Senior Notes that limit the payment of dividends on its common stock to \$6.5 million in any given calendar year during the eight year term of the notes. The Company is in compliance with all covenants under its 6.625% Senior Notes as of March 31, 2011, and through the filing date of this report.

Additionally, on February 7, 2011, the Company entered into a registration rights agreement that provides holders of the 6.625% Senior Notes certain registration rights for the 6.625% Senior Notes under the Securities Act of 1933, as amended (the Securities Act). Pursuant to the registration rights agreement, the Company will file an exchange offer registration statement with the Securities and Exchange Commission (the SEC) with respect to an offer to exchange the 6.625% Senior Notes for substantially identical notes that are registered under the Securities Act. Under certain circumstances, in lieu of a registered exchange offer, the Company has agreed to file a shelf registration statement relating to the resale of the 6.625% Senior Notes. If the exchange offer is not completed on or before February 7, 2012, or the shelf registration statement, if required, is not declared effective within the time periods specified in the registration rights agreement, then the Company has agreed to pay additional interest with respect to the 6.625% Senior Notes in an amount not to exceed one percent of the principal amount of the 6.625% Senior Notes until the exchange offer is completed or the shelf registration statement is declared effective. The estimated fair value of the 6.625% Senior Notes was approximately \$357 million as of March 31, 2011.

Note 6 Earnings per Share

Basic net income or loss per common share of stock is calculated by dividing net income or loss available to common stockholders by the basic weighted-average common shares outstanding for the respective period. The Company s earnings per share calculations reflect the impact of any repurchases of shares of common stock made by the Company.

Diluted net income or loss per common share of stock is calculated by dividing adjusted net income or loss by the number of diluted weighted-average common shares outstanding, which includes the effect of potentially dilutive securities. Potentially dilutive securities for this calculation consist of unvested restricted stock units (RSUs), in-the-money outstanding options to purchase the Company s common stock, contingent Performance Share Awards (PSAs), and shares into which the 3.50% Senior Convertible Notes are convertible.

The Company s 3.50% Senior Convertible Notes have a net-share settlement right whereby the Company has the option to irrevocably elect, by notice to the trustee under the indenture for the notes, to settle the Company s obligation to deliver shares of the Company s common stock, in the event that holders of the notes elect to convert all or a portion of their notes, by delivering cash in an amount equal to each \$1,000 principal amount of notes surrendered for conversion and, if applicable, at the Company s option, shares of common stock or cash, or any combination of common stock and cash, for the amount of conversion value in excess of the principal amount. For accounting purposes, the treasury stock method is used to measure the potentially dilutive impact of shares associated with this conversion feature. During the first quarter of

Table of Contents

2011, shares of the Company s common stock traded at an average quarterly closing price that exceeded the \$54.42 conversion price. This would have resulted in the 3.50% Senior Convertible Notes having a dilutive impact on the Company s first quarter 2011 diluted earnings per share calculation. However, the Company recorded a loss from continuing operations for the three months ended March 31, 2011, and as a result all potentially dilutive shares became anti-dilutive. The 3.50% Senior Convertible Notes were not dilutive for the three months ended March 31, 2010, or for any reporting period prior to March 31, 2011, in which they have been outstanding.

The PSAs represent the right to receive, upon settlement of the PSAs after the completion of the three-year performance period, a number of shares of the Company s common stock that may range from zero to two times the number of PSAs granted on the award date. The number of potentially dilutive shares related to PSAs is based on the number of shares, if any, which would be issuable at the end of the respective reporting period, assuming that date was the end of the contingency period. For additional discussion on PSAs, please refer to Note 8 Compensation Plans under the heading *Performance Share Awards Under the Equity Incentive Compensation Plan*.

For accounting purposes, the treasury stock method is used to measure potentially dilutive securities. When there is a loss from continuing operations, all potentially dilutive shares become anti-dilutive. There were no dilutive securities for the three months ended March 31, 2011, as the Company recorded a loss from continuing operations for this period. Unvested RSUs, contingent PSAs, and in-the-money options had a dilutive impact for the three-month period ended March 31, 2010.

The following table sets forth the calculation of basic and diluted earnings per share:

	or the Three Month 2011 a thousands, except	2010
Net income (loss)	\$ (18,503)	\$ 126,178
Basic weighted-average common shares outstanding	63,447	62,792
Add: dilutive effect of stock options, unvested RSUs, and contingent PSAs		1,585
Add: dilutive effect of 3.50% senior convertible notes		
Diluted weighted-average common shares outstanding	63,447	64,377
Basic net income (loss) per common share	\$ (0.29)	\$ 2.01
Diluted net income (loss) per common share	\$ (0.29)	\$ 1.96

Note 7 Commitments and Contingencies

During the first quarter of 2011, the Company entered into a hydraulic fracturing services contract. The total commitment is \$180.0 million over a two year term commencing January 1, 2011; provided however, the Company s liability upon early termination of this contract does not exceed \$24.0 million.

Subsequent to March 31, 2011, the Company entered into a natural gas gathering and services agreement whereby it is subject to certain natural gas gathering through-put commitments during the ten year contract term, commencing July 1, 2013. The Company may be required to make periodic deficiency payments for any shortfalls in delivering the minimum volume commitments. In the event that no gas is delivered pursuant to the agreement, the aggregate deficiency payments will total approximately \$513.4 million over the ten year term of the contract. If a shortfall

in the minimum volume commitment arises, the Company can arrange for third party gas to be delivered into the gathering system and applied to its minimum commitment.

Table of Contents

The Company is subject to litigation and claims that have arisen in the ordinary course of its business. The Company accrues for such items when a liability is both probable and the amount can be reasonably estimated; however, the Company currently has no such accruals. In the opinion of management, adverse results in any such pending litigation and claims will not have a material effect on the results of operations, the financial position, or cash flows of the Company.

The Company is currently a defendant in litigation regarding an overriding royalty interest in less than one percent of the Company s net acreage in the Eagle Ford shale play in South Texas. The Texas District Court has issued an order granting plaintiffs motion for summary judgment, but the Company believes that the summary judgment order is incorrect under the governing agreements and applicable law, and the Company intends to appeal and continue to contest the litigation. If the plaintiffs were to ultimately prevail, the overriding royalty interest would reduce the Company s net revenue interest in the affected acreage. The Company does not currently believe that an unfavorable ultimate outcome is probable, nor that if the plaintiffs prevail there would be a material adverse effect on the financial position of the Company. Under the Company s current view of facts and circumstances of the case, no accrual has been made for any loss.

Note 8 Compensation Plans

Cash Bonus Plan

During the first three months of 2011 and 2010, the Company paid \$21.6 million and \$7.7 million for cash bonuses earned in the 2010 and 2009 performance years, respectively. Within the general and administrative expense and exploration expense line items in the accompanying condensed consolidated statements of operations (accompanying statements of operations) was \$3.8 million and \$3.1 million of accrued cash bonus plan expense related to the specific performance year for the three-month periods ended March 31, 2011, and 2010, respectively.

Performance Share Awards Under the Equity Incentive Compensation Plan

PSAs are the primary form of long-term equity incentive compensation for the Company. The PSA factor is based on the Company s performance after completion of a three-year performance period. The performance criteria for the PSAs are based on a combination of the Company s annualized total shareholder return (TSR) for the performance period and the relative measure of the Company s TSR compared with the annualized TSR of an index comprised of certain peer companies for the performance period. PSAs are recognized as general and administrative and exploration expense over the vesting period of the award.

Total stock-based compensation expense related to PSAs for the three-month periods ended March 31, 2011, and 2010, was \$4.3 million and \$3.6 million, respectively. As of March 31, 2011, there was \$18.0 million of total unrecognized compensation expense related to unvested PSAs that is being amortized through 2013.

Table of Contents

A summary of the status and activity of PSAs for the three-month period ended March 31, 2011, is presented in the following table:

	PSAs	Weighted- Average Grant- Date Fair Value
Non-vested, at January 1, 2011	1,110,666	\$ 39.48
Granted		\$
Vested (1)	(6,844)	\$ 37.30
Forfeited	(16,319)	\$ 37.71
Non-vested and outstanding, at March 31, 2011	1,087,503	\$ 39.52

⁽¹⁾ The number of awards vested assume a multiplier of one. The final number of shares vested may vary depending on the ending three-year multiplier, which ranges from zero to two.

Restricted Stock Unit Incentive Program Under the Equity Incentive Compensation Plan

Total RSU compensation expense for the three-month periods ended March 31, 2011, and 2010, was \$1.1 million, and \$1.8 million, respectively. As of March 31, 2011, there was \$5.1 million of total unrecognized compensation expense related to unvested RSU awards that is being amortized through 2013.

During the first three months of 2011, the Company settled 27,714 RSUs that relate to awards granted in 2008 through the issuance of shares of the Company s common stock in accordance with the terms of the RSU awards. As a result, the Company issued a net of 18,836 shares of common stock associated with these grants. The remaining 8,878 shares were withheld to satisfy income and payroll tax withholding obligations that occurred upon delivery of the shares underlying those RSUs.

A summary of the status and activity of RSUs for the three-month period ended March 31, 2011, is presented in the following table:

	RSUs	Weighted-Average Grant-Date Fair Value
Non-vested, at January 1, 2011	333,359 \$	31.16
Granted	6,778 \$	58.93
Vested	(27,714) \$	37.84
Forfeited	(4,338) \$	29.10
Non-vested and outstanding, at March 31, 2011	308,085 \$	31.20

Table of Contents

Stock Option Grants Under Prior Stock Option Plans

The following table summarizes stock option activity for the three months ended March 31, 2011:

	Options	Weighted- Average Exercise Price		Aggregate Intrinsic Value
Outstanding, beginning of period	920,765	\$	13.11	\$ 42,192,057
Exercised	(288,540)	\$	12.20	
Forfeited		\$		
Outstanding, end of period	632,225	\$	13.52	\$ 38,357,544
Vested, end of period	632,225	\$	13.52	\$ 38,357,544
Exercisable, end of period	632,225	\$	13.52	\$ 38,357,544

As of March 31, 2011, there was no unrecognized compensation expense related to stock option awards.

Net Profits Plan

Under the Company s Net Profits Plan, all oil and gas wells that were completed or acquired during a year were designated within a specific pool. Key employees recommended by senior management and designated as participants by the Compensation Committee of the Company s Board of Directors (Board) and employed by the Company on the last day of that year became entitled to payments under the Net Profits Plan after the Company had received net cash flows returning 100 percent of all costs associated with that pool. Thereafter, ten percent of future net cash flows generated by the pool are allocated among the participants and distributed at least annually. The portion of net cash flows from the pool to be allocated among the participants increases to 20 percent after the Company has recovered 200 percent of the total costs for the pool, including payments made under the Net Profits Plan at the ten percent level. In December 2007 the Board discontinued the creation of new pools under the Net Profits Plan. Consequently, the 2007 Net Profits Plan pool was the last pool established by the Company. All pools are currently fully vested.

Cash payments made or accrued under the Net Profits Plan that have been recorded as either general and administrative expense or exploration expense are detailed in the table below:

	1	For the Three Months Ended March 31,			
		2011		2010	
		(in thousands)			
General and administrative expense	\$	5,330	\$	6,934	
Exploration expense		477		591	
Total	\$	5,807	\$	7,525	

Additionally, the Company accrued cash payments under the Net Profits Plan of \$4.3 million and \$18.2 million for the three-month periods ended March 31, 2011, and 2010, respectively, as a result of divestiture proceeds. The cash payments are accounted for as a reduction of the gain on divestiture activity in the accompanying statements of operations.

The Company records changes in the present value of estimated future payments under the Net Profits Plan as a separate line item in the accompanying statements of operations. The change in the estimated

15

Table of Contents

liability is recorded as a non-cash expense or benefit in the current period. The amount recorded as an expense or benefit associated with the change in the estimated liability is not allocated to general and administrative expense or exploration expense because it is associated with the future net cash flows from oil and gas properties in the respective pools rather than results being realized through current period production. The table below presents the estimated allocation of the change in the liability if the Company did allocate the adjustment to these specific functional line items based on the current allocation of actual distributions made by the Company. As time progresses, less of the distributions relate to prospective exploration efforts as more of the distributions are made to employees that have terminated employment and do not provide ongoing exploration support to the Company.

	For the Three Months Ended March 31, 2011 2010			
	(in thousands)			
General and administrative expense (benefit)	\$ 13,028	\$	(25,132)	
Exploration expense (benefit)	1,167		(2,140)	
Total	\$ 14,195	\$	(27,272)	

During the first quarter of 2011, the Company made the decision to cash out several Net Profits Plan pools associated with the Panterra Petroleum partnership acquired in 1999 through a \$2.6 million direct payment, and as a result, the Company reduced its Net Profits Plan liability. This cash out is expected to be paid in the second quarter of 2011 and is included in accounts payable and accrued expenses at March 31, 2011. There is no impact on the accompanying statements of operations for the three months ended March 31, 2011, related to these settlements.

Note 9 Pension Benefits

Pension Plans

The Company has a non-contributory pension plan covering substantially all employees who meet age and service requirements (the Pension Plan). The Company also has a supplemental non-contributory pension plan covering certain management employees (the Pension Plan).

Components of Net Periodic Benefit Cost for Both Plans

The following table presents the components of the net periodic benefit cost for both the Qualified Pension Plan and the Nonqualified Pension Plan:

For the Three Months Ended March 31, 2010 (in thousands)

2011

Edgar Filing: SM Energy Co - Form 10-Q

Service cost	\$ 848	\$ 848
Interest cost	280	280
Expected return on plan assets that reduces periodic pension costs	(159)	(159)
Amortization of net actuarial loss	91	91
Net periodic benefit cost	\$ 1,060	\$ 1,060

Prior service costs are amortized on a straight-line basis over the average remaining service period of active participants. Gains and losses in excess of ten percent of the greater of the benefit obligation or the market-related value of assets are amortized over the average remaining service period of active participants.

1 au	ı	OI.	\sim	wiito

Contributions

The Company is required to contribute \$6.3 million to its Qualified Pension Plan for the 2011 plan year. The Company has made a \$2.9 million contribution as of March 31, 2011.

Note 10 Derivative Financial Instruments

To mitigate a portion of the exposure to potentially adverse market changes in oil, gas, and NGL prices and the associated impact on cash flows, the Company has entered into various derivative commodity contracts. The Company s derivative contracts in place include swap and collar arrangements for oil, natural gas, and NGLs. As of March 31, 2011, and through the filing date of this report, the Company has commodity derivative contracts in place through the fourth quarter of 2013 for a total of approximately 8 million Bbls of anticipated crude oil production, 44 million MMBtu of anticipated natural gas production, and 2 million Bbls of anticipated NGL production.

The Company s oil, natural gas, and NGL derivatives are measured at fair value and are included in the accompanying balance sheets as derivative assets and liabilities. The Company derives internal valuation estimates taking into consideration the counterparties credit ratings, the Company s credit rating, and the time value of money. These valuations are then compared to the respective counterparties mark-to-market statements. The considered factors result in an estimated exit-price that management believes provides a reasonable and consistent methodology for valuing derivative instruments. The derivative instruments utilized by the Company are not considered by management to be complex, structured, or illiquid. The oil, natural gas, and NGL derivative markets are highly active. The fair value of oil, natural gas, and NGL commodity derivative contracts was a net liability of \$132.9 million and \$52.3 million at March 31, 2011, and December 31, 2010, respectively.

Discontinuance of Cash Flow Hedge Accounting

Prior to January 1, 2011, the Company designated its commodity derivative contracts as cash flow hedges, whose unrealized changes in fair value were recorded to accumulated other comprehensive loss (AOCL), to the extent the hedges were effective. As of January 1, 2011, the Company elected to de-designate all of its commodity derivative contracts that had been previously designated as cash flow hedges at December 31, 2010. As a result, subsequent to December 31, 2010, the Company recognizes all gains and losses from changes in commodity derivative fair values immediately in earnings rather than deferring any such amounts in AOCL.

At December 31, 2010, AOCL included \$18.6 million (\$11.8 million, net of income tax) of unrealized losses, representing the change in fair value of the Company's open commodity derivative contracts designated as cash flow hedges as of that balance sheet date, less any ineffectiveness recognized. As a result of discontinuing hedge accounting on January 1, 2011, such fair values at December 31, 2010 were frozen in AOCL as of the de-designation date and reclassified into earnings as the original derivative transactions settle. During the three months ended March 31, 2011, \$1.4 million (\$927,000, net of income tax) of derivative losses relating to de-designated commodity hedges were reclassified from AOCL into earnings. As of March 31, 2011, AOCL included \$17.2 million (\$10.9 million, net of income tax) of unrealized losses on commodity derivative contracts that had been previously designated as cash flow hedges. The Company expects to reclassify into earnings from AOCL after-tax net losses of \$11.7 million related to de-designated commodity derivative contracts during the next twelve months.

Table of Contents

The following table details the fair value of derivatives recorded in the accompanying balance sheets, by category:

	As of March 31, 2011						
	Derivative Assets			Derivative			
	Balance Sheet	Fa	ir Value	Balance Sheet	F	air Value	
			(in tho	usands)			
Commodity Contracts	Current Assets	\$	33,571	Current Liabilities	\$	(114,228)	
Commodity Contracts	Noncurrent Assets		12,325	Noncurrent Liabilities		(64,574)	
Derivatives not designated as hedging							
instruments		\$	45,896		\$	(178,802)	

	As of December 31, 2010						
	Derivati	ve Assets		Derivative Liabilities			
	Balance Sheet	Fa	ir Value	Balance Sheet	F	air Value	
			(in tho	usands)			
Commodity Contracts	Current Assets	\$	43,491	Current Liabilities	\$	(82,044)	
Commodity Contracts	Noncurrent Assets		18,841	Noncurrent liabilities		(32,557)	
Derivatives designated as hedging							
instruments		\$	62,332		\$	(114,601)	

18

The following table summarizes the unrealized and realized gain and loss from derivative cash settlements and changes in fair value of derivative contracts as presented in the accompanying statements of operations.

	Ended Ma	hree Months arch 31, 2011 ousands)
Cash settlement (gain) and loss:		
Oil contracts	\$	6,730
Gas contracts		(1,727)
NGL contracts		1,414
Total cash settlement loss		6,417
Unrealized loss on changes in fair value:		
Oil contracts		67,367
Gas contracts		4,260
NGL contracts		10,385
Total net unrealized loss on change in fair value		82,012
Total unrealized and realized derivative loss	\$	88,429

Table of Contents

The following table details the effect of derivative instruments on other comprehensive income (loss) and the accompanying statements of operations (net of income tax):

	Derivatives	Location on Consolidated Statements of Operations	For t	l	nths Ende 1, usands)	ed March 2010	
Amount of (gain) loss reclassified							
from AOCL to realized hedge gain	Commodity						
(loss)	Contracts	Realized hedge gain (loss)	\$	927	\$	(1	1,945)

The realized net hedge loss for the three-month period ended March 31, 2011, is comprised of realized cash settlements on commodity derivative contracts that were previously designated as cash flow hedges, whereas the realized net hedge gain for the three-month period ended March 31, 2010, is comprised of realized cash settlements on all commodity derivative contracts. Realized hedge gains or losses from the settlement of oil, natural gas, and NGL derivatives previously designated as cash flow hedges are reported in the total operating revenues and other income section of the accompanying statements of operations. The Company realized a net hedge loss of \$1.4 million and a net hedge gain of \$2.6 million from its oil, natural gas, and NGL derivative contracts for the three-month periods ended March 31, 2011, and 2010, respectively.

As noted above, effective January 1, 2011, the Company elected to de-designate all of its commodity derivative contracts that had been previously designated as cash flow hedges at December 31, 2010, and as such no new gains or losses are deferred in AOCL at March 31, 2011. The following table details the effect of derivative instruments on other comprehensive income (loss) and the accompanying balance sheets (net of income tax):

	Derivatives	Location on Consolidated Balance Sheets	For the Three Months Ended March 31, 2010 (in thousands)
Amount of (gain) loss on derivatives recognized in OCI during the period (effective portion)	Commodity Contracts	AOCL	\$ (33,702)

Table of Contents

The Company has no derivatives designated as cash flow hedges at March 31, 2011. The following table details the ineffective portion of derivative instruments classified as cash flow hedges on the accompanying statements of operations for the three month period ended March 31, 2010

Derivatives Qualifying as Cash Flow Hedges Location on Consolidated Statements of Operations

Gain Recognized in Earnings (Ineffective Portion) For the Three Months Ended March 31, 2010 (in thousands)

Unrealized and realized derivative

Commodity contracts (gain) loss \$ (7,735)

Credit Related Contingent Features

As of March 31, 2011, through the filing date of this report, all of the Company s derivative counterparties were members of the Company s credit facility bank syndicate. The Company s credit facility is secured by liens on substantially all of the Company s oil and gas assets; therefore such counterparties do not currently require the Company to post collateral in instances where the Company is in a liability position under its derivative instruments. No collateral was posted as of March 31, 2011, nor through the filing date of this report.

Convertible Note Derivative Instruments

The contingent interest provision of the 3.50% Senior Convertible Notes is an embedded derivative instrument. As of March 31, 2011, and December 31, 2010, the fair value of this derivative was determined to be immaterial.

Note 11 Fair Value Measurements

The Company follows fair value measurement authoritative guidance for all assets and liabilities measured at fair value. That guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the measurement date. Market or observable inputs are the preferred sources of values, followed by assumptions based on hypothetical transactions in the absence of market inputs. The hierarchy for grouping these assets and liabilities is based on the significance level of the following inputs:

• Level 1 quoted prices in active markets for identical assets or liabilities

- Level 2 quoted prices in active markets for similar assets and liabilities, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations whose inputs are observable or whose significant value drivers are observable
- Level 3 significant inputs to the valuation model are unobservable

20

Table of Contents

The following is a listing of the Company s financial assets and liabilities that are measured at fair value on a recurring basis and where they are classified within the hierarchy as of March 31, 2011:

	Level 1	Level 2 (in thousands)		Level 3	
Assets:					
Derivatives	\$	\$	45,896	\$	
<u>Liabilities:</u>					
Derivatives	\$	\$	178,802	\$	
Net Profits Plan	\$	\$		\$ 147,403	

The following is a listing of the Company s financial assets and liabilities that are measured at fair value on a recurring basis and where they are classified within the hierarchy as of December 31, 2010:

	Level 1	Level 2 (in thousands)		Level 3	
Assets:					
Derivatives	\$	\$ 62,332	\$		
<u>Liabilities:</u>					
Derivatives	\$	\$ 114,601	\$		
Net Profits Plan	\$	\$	\$	135,850	

Both financial and non-financial assets and liabilities are categorized within the hierarchy based on the lowest level of input that is significant to the fair value measurement. The following is a description of the valuation methodologies used by the Company as well as the general classification of such instruments pursuant to the hierarchy. There were no nonfinancial assets or liabilities measured at fair value on a nonrecurring basis at March 31, 2011, or December 31, 2010.

Derivatives

The Company uses Level 2 inputs to measure the fair value of oil, natural gas, and NGL commodity derivatives. Fair values are based upon interpolated data. The Company derives internal valuation estimates taking into consideration the counterparties credit ratings, the Company s credit rating, and the time value of money. These valuations are then compared to the respective counterparties mark-to-market statements. The considered factors result in an estimated exit-price that management believes provides a reasonable and consistent methodology for valuing derivative instruments.

Generally, market quotes assume that all counterparties have near zero, or low, default rates and have equal credit quality. However, an adjustment may be necessary to reflect the credit quality of a specific counterparty to determine the fair value of the instrument. The Company monitors the credit ratings of its counterparties and may ask counterparties to post collateral if their ratings deteriorate. In some instances the Company will attempt to novate the trade to a more stable counterparty.

Valuation adjustments are necessary to reflect the effect of the Company s credit quality on the fair value of any liability position with a counterparty. This adjustment takes into account any credit enhancements, such as collateral margin that the Company may have posted with a counterparty, as well as any letters of credit between the parties. The methodology to determine this adjustment is consistent with how the Company evaluates counterparty credit risk, taking into account the Company s credit rating, current credit facility margins, and any change in such margins since the last measurement date. All of the Company s derivative counterparties are members of SM Energy s credit facility bank syndicate.

21

Table of Contents

The methods described above may result in a fair value estimate that may not be indicative of net realizable value or may not be reflective of future fair values and cash flows. While the Company believes that the valuation methods utilized are appropriate and consistent with accounting authoritative guidance and with other marketplace participants, the Company recognizes that third parties may use different methodologies or assumptions to determine the fair value of certain financial instruments that could result in a different estimate of fair value at the reporting date.

Net Profits Plan

The Net Profits Plan is a standalone liability for which there is no available market price nor principal market, nor does it have market participants. The inputs available for this instrument are unobservable and are therefore classified as Level 3 inputs. The Company employs the income approach, which converts expected future cash flow amounts to a single present value amount. This technique uses the estimate of future cash payments, expectations of possible variations in the amount and/or timing of cash flows, the risk premium, and nonperformance risk to calculate the fair value. There is a direct correlation between realized oil and gas commodity prices driving net cash flows and the Net Profits Plan liability. Generally, higher commodity prices result in a larger Net Profits Plan liability and vice versa.

The Company records the estimated fair value of the long-term liability for estimated future payments under the Net Profits Plan based on the discounted value of estimated future payments associated with each individual pool. The calculation of this liability is a significant management estimate. For those pools currently in payout, a discount rate of 12 percent is used to calculate this liability. A discount rate of 15 percent is used to calculate the liability for pools that have not reached payout. These rates are intended to represent the best estimate of the present value of expected future payments under the Net Profits Plan.

The Company s estimate of its liability is highly dependent on commodity prices, cost assumptions, and the discount rates used in the calculations. The Company continually evaluates the assumptions used in this calculation in order to consider the current market environment for oil and gas prices, costs, discount rates, and overall market conditions. The Net Profits Plan liability is determined using price assumptions of five one-year strip prices with the fifth year s pricing then carried out indefinitely. The average price is adjusted for realized price differentials and to include the effects of the forecasted production covered by derivatives contracts in the relevant periods. The non-cash expense associated with this significant management estimate is highly volatile from period to period due to fluctuations that occur in the crude oil, natural gas, and NGL commodity markets.

If the commodity prices used in the calculation changed by five percent, the liability recorded at March 31, 2011, would differ by approximately \$11 million. A one percentage point change in the discount rate would change the liability by approximately \$7 million. Actual cash payments to be made to participants in future periods are dependent on realized actual production, realized commodity prices, and costs associated with the properties in each individual pool of the Net Profits Plan. Consequently, actual cash payments are inherently different from the amounts estimated.

No published market quotes exist on which to base the Company s estimate of fair value of the Net Profits Plan liability. As such, the recorded fair value is based entirely on management estimates that are described within this footnote. While some inputs to the Company s calculation of fair value on the Net Profits Plan s future payments are from published sources, others, such as the discount rate and the expected future cash flows, are derived from the Company s own calculations and estimates.

Table of Contents

The following table reflects the activity for the Net Profits Plan liability measured at fair value using Level 3 inputs:

	For the Three Months Ended March 31,		
	2011 2010		2010
	(in thousands)		
Beginning balance	\$ 135,850	\$	170,291
Net increase (decrease) in liability (a)	24,285		(1,536)
Settlements (a)(b)(c)	(12,732)		(25,736)
Transfers in (out) of Level 3			
Ending balance	\$ 147,403	\$	143,019

- (a) Net changes in the Net Profits Plan liability are shown in the Change in Net Profits Plan liability line item of the accompanying statements of operations.
- (b) Settlements represent cash payments made or accrued under the Net Profits Plan. Settlements for the three months ended March 31, 2011, and 2010 include \$4.3 million and \$18.2 million, respectively, of cash payments related to divestitures.
- (c) During the first quarter of 2011, the Company made the decision to cash out several Net Profits Plan pools associated with the Panterra Petroleum partnership acquired in 1999, through a \$2.6 million direct payment, and as a result, the Company reduced its Net Profits Plan liability. This cash out payment is expected to be paid in the second quarter of 2011 and is included in accounts payable and accrued expenses at March 31, 2011. There is no impact on the accompanying consolidated statements of operations for the three months ended March 31, 2011, related to these settlements.

3.50% Senior Convertible Notes

Based on the secondary market trading price of the 3.50% Senior Convertible Notes, the estimated fair value of the notes was approximately \$410 million and \$351 million as of March 31, 2011, and December 31, 2010, respectively. The fair value of the embedded contingent *interest derivative on the 3.50%* Senior Convertible Notes was zero as of March 31, 2011, and December 31, 2010.

Please refer to Note 5 Long-Term Debt for the estimated fair value of the 6.625% Senior Notes.

Proved Oil and Gas Properties

Proved oil and gas property costs are evaluated for impairment and reduced to fair value when there is an indication that the carrying costs may not be recoverable. The Company uses Level 3 inputs and the income valuation technique, which converts future amounts to a single present value amount, to measure the fair value of proved properties through an application of discount rates and price forecasts selected by the Company s management. The calculation of the discount rate is a significant management estimate based on the best information available and estimated to be 12 percent for the three months ended March 31, 2011. Management believes that the discount rate is representative of current market conditions and reflects the following factors: estimate of future cash payments, expectations of possible variations in the amount and/or

timing of cash flows, the risk premium, and nonperformance risk. The price forecast is based on New York Mercantile Exchange (NYMEX) strip pricing, adjusted for basis differentials, for the first five years. Future operating costs are also adjusted as deemed appropriate for these estimates.

There were no proved oil and gas properties measured at fair value within the accompanying balance sheets at March 31, 2011, or December 31, 2010.

Materials Inventory

Materials inventory is valued at the lower of cost or market. The Company uses Level 2 inputs to measure the fair value of materials inventory, which is primarily comprised of tubular goods. The Company uses third party market quotes and compares the quotes to the book value of the materials inventory. If the book value exceeds the quoted market price, the Company reduces the book value to the

Table of Contents

market price. The considered factors result in an estimated exit price that management believes provides a reasonable and consistent methodology for valuing materials inventory.

There were no materials inventory measured at fair value within the accompanying balance sheets at March 31, 2011, or December 31, 2010.

Asset Retirement Obligations

The income valuation technique is utilized by the Company to determine the fair value of the asset retirement obligation liability at the point of inception by applying a credit-adjusted risk-free rate to the undiscounted expected abandonment cash flows. The credit-adjusted risk-free rate takes into account the Company s credit risk, the time value of money, and the current economic state. Given the unobservable nature of the inputs, the initial measurement of the asset retirement obligation liability is deemed to use Level 3 inputs. There were no asset retirement obligations measured at fair value within the accompanying balance sheets at March 31, 2011, or December 31, 2010.

Refer to Note 10 Derivative Financial Instruments for more information regarding the Company s derivative instruments.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion and analysis contains forward-looking statements. Refer to Cautionary Information about Forward-Looking Statements at the end of this item for an explanation of these types of statements.

Overview of the Company, Highlights, and Outlook

General Overview

We are an independent energy company engaged in the acquisition, exploration, exploitation, development and production of crude oil, natural gas, and NGLs in onshore North America. Our assets include leading positions in the Eagle Ford shale and Bakken/Three Forks resource plays, as well as meaningful positions in the Granite Wash, Haynesville shale, and Woodford shale resource plays. We have developed our portfolio of properties with reserves, development drilling opportunities, and unconventional resource prospects onshore in North America, typically through early entrance into existing and emerging resource plays. We believe this approach allows for stable and predictable production and reserves growth. Furthermore, by entering these plays early, we believe that we can reduce costs and capture larger resource potential.

Our business strategy is to increase net asset value through attractive oil and gas investment activity, while maintaining a conservative capital structure and optimizing capital expenditures. We focus our efforts on the exploration for and development of onshore, lower-risk resource plays in onshore North America. We believe our inventory is well suited for growing reserves and production due to its predictable geology and lower-risk profile. Furthermore, our assets produce significant volumes of oil and NGLs that limit our exposure to the current lower natural gas price environment. Our strategy is based on the following:

- leveraging our core competencies in replicating resource play success in the drilling, completion, and development of oil and natural gas reserves;
- focusing on resource plays with low-risk geology and high liquids content;
- exploiting our legacy assets and optimizing our asset base;
- selectively acquiring leasehold positions in new and emerging resource plays; and

•	maintaining a strong balance sneet while funding the growth of our business.			

In the first quarter of 2011 we had the following financial and operational results:

- Our average daily production for the three months ended March 31, 2011, was 19.8 MBbls of oil, 241.5 MMcf of gas, and 6.8 MBbl of NGLs, for a record average equivalent production rate of 401.4 MMCFE per day, compared with 285.8 MMCFE per day for the comparable period in 2010. Please see additional discussion below under the caption *Production Results*.
- Costs incurred for oil and gas producing activities for the three months ended March 31, 2011, were \$290.7 million, compared with \$146.7 million for the same period in 2010. Please see additional discussion below under the caption *Cost Incurred*.
- We recorded a net loss for the quarter ended March 31, 2011, of \$18.5 million or (\$0.29) per diluted share, driven by an \$82.0 million non-cash unrealized derivative loss, compared to first quarter 2010 results of net income of \$126.2 million or \$1.96 per diluted share.

Oil, Gas, and NGL Prices

Our financial condition and the results of our operations are significantly affected by the prices we receive for oil, natural gas, and NGL production, which can fluctuate dramatically. Please refer to Comparison of Financial Results and Trends between the three months ended March 31, 2011, and 2010 for the realized price tables for the respective periods. Historically, we have reported our natural gas production as a single stream of rich gas measured at the well head. As a result, we have historically reported realized prices for our natural gas production that were higher than industry benchmarks due to the economic uplift associated with incremental value contained in the higher BTU content of our gas production stream. Beginning in the first quarter of 2011, we have changed our reporting for natural gas volumes to show natural gas and NGL production volumes consistent with title transfer for each product. Projected rapid production growth from our rich gas assets associated with plant product sales contracts necessitated a change in our production volume reporting. Prior period production volumes, revenues, and prices have not been reclassified to conform to the current presentation given the immateriality of the NGL volumes produced in prior periods. We sell the majority of our natural gas under contracts that use first-of-the-month index pricing, which means that gas produced in a given month is sold at the first-of-the-month price regardless of the spot price on the day the gas is produced. For assets where high BTU gas is sold at the wellhead, we also receive additional value for the higher energy content contained in the gas stream. Our NGL production is generally sold using contracts that pay us the monthly average of the posted Oil Price Information Service Mont Belvieu daily settlement prices, adjusting for processing, transportation, and location differentials. Our crude oil and condensate are sold using contracts that pay us either the average of the NYMEX WTI daily settlement price or the average of alternative posted prices for the periods in which the product is produced, adjusted for quality, transportation, and location differentials.

Table of Contents

The following table is a summary of commodity price data for the first quarters of 2011 and 2010 and the fourth quarter of 2010:

		For the Three Months Ended		
	Ma	rch 31, 2011	December 31, 2010	March 31, 2010
Crude Oil (per Bbl):				
Average NYMEX price	\$	94.46
