Investor and Analyst Meetings and Rate Case Materials

Pinnacle West Capital Corporation (Pinnacle West) will be participating in various investor and analyst meetings from June 1, 2011 through June 3, 2011 and will be utilizing slides during those meetings. Copies of the slides are attached hereto as Exhibit 99.1.

As described under Item 8.01 below, Arizona Public Service Company (APS or the Company) will be filing an application and related schedules with the Arizona Corporation Commission (the ACC) on June 1, 2011. These materials are posted on an APS website at www.azenergyfuture.com. The information on this website is not incorporated by reference into this report.

Item 8.01 Other Events.

Retail Rate Case Filing with the Arizona Corporation Commission

On June 1, 2011, APS will file an application with the ACC for a net retail base rate increase of \$95.5 million. The Company will request that the increase become effective July 1, 2012. The request would increase the average retail customer bill approximately 6.6%. The filing is based on a test year ended December 31, 2010, adjusted as described below. APS expects the ACC to issue a procedural schedule during the next sixty days detailing the timeline for addressing the request.

The key financial provisions of the request will include:

- an increase in non-fuel base rates of \$194.1 million, before the reclassification into base rates of \$44.9 million of revenues related to solar generation projects collected through the Company's renewable energy surcharge (which will increase base rates) and \$143.5 million of lower fuel and purchased power costs currently addressed through the Power Supply Adjustor (the PSA) (which will decrease base rates);
- a rate base of \$5.7 billion, which approximates the ACC-jurisdictional portion of the book value of utility assets, net of accumulated depreciation and other credits, as of December 31, 2010, subject to certain adjustments, including plant additions under construction at the end of the test year that are currently in service or expected to be placed into service before the proposed rates are requested to become effective;
- the following proposed capital structure and costs of capital:

Edgar Filing: ARIZONA PUBLIC SERVICE CO - Form 8-K

	Capital Structure	Cost of Capital
Long-term debt	46.1%	6.38%
Common stock equity	53.9%	11.00%
Weighted-average cost of capital		8.87%

- a base rate for fuel and purchased power costs (Base Fuel Rate) of \$0.03242 per kilowatt-hour (kWh) based on estimated 2012 prices (a decrease from the current Base Fuel Rate of \$0.03757 per kWh).
-

The Company will propose that its PSA be modified to allow full pass-through of all fuel and purchased power costs, instead of the current 90/10 sharing provision. In addition, APS will propose two new recovery mechanisms that would adjust electricity rates annually between changes in retail base rates. The Efficiency and Infrastructure Account, a decoupling mechanism, would address recovery of the Company's fixed costs after reflecting implementation of ACC-mandated energy efficiency standards and renewable distributed generation. The Environmental and Reliability Account, a generation infrastructure adjustment mechanism, would allow recovery of the costs associated with generation investments related to new generation additions, generation efficiency projects and environmental compliance requirements.

On June 1, 2011, APS issued a press release announcing its filing with the ACC described above. A copy of the press release is attached hereto as Exhibit 99.2.
