2. Legal provisions, basis of preparation and other information, continued:

(b) Basis of consolidation:

(b.1) The current Interim Condensed Consolidated Financial Statements for the three-months period ended March 31, 2012 have been prepared according to the Compendium of Accounting Standards, Chapter C-2 issued by the Superintendency of Banks and Financial Institutions and the International Financial Reporting Standard N°34 (NIC 34) Intermediate Financial Information .

According to NIC 34, the intermediate financial information is prepared solely with the intention of updating the content of the last annual Consolidated Financial Statements, putting emphasis on the new activities, events and circumstances occurred during the three months period after period end and not duplicating the previous published information in the last Consolidated Financial Statements. Therefore, the current Financial Statements do not include all the complete information required for the Consolidated Financial statements according to the international accounting standards and international financial information agreed upon by the IASB, reason by which for a suitable understanding of the information that is included in these Financial Statements, they must be read along with the annual Consolidated Financial statements of Banco de Chile, corresponding to the annual exercise ended December 31, 2011.

b.2) The following table details the entities in which the Bank directly or indirectly owns a controlling interest and that are therefore consolidated in these financial statements:

2. Summary of Significant Accounting Principles, continued:

(c) Use of estimates and judgment

Preparing financial statements requires management to make judgments, estimations and assumptions that affect the application of accounting policies and the valuation of assets, liabilities, income and expenses presented. Real results could differ from these estimated amounts. Details on the use of estimates and judgment and their effect on the amounts recognized in the financial statement are included in the following notes:

1. Goodwill valuation (Note 15);

- 2. Useful lives of property and equipment and intangible assets (Notes 15 y 16);
- 3. Income taxes and deferred taxes (Note 17);
- 4. Provisions (Note 24);
- 5. Commitments and contingencies (Note 26);
- 6. Provision for loan losses (Note 32);
- 7. Impairment of other financial assets (Note 35);
- 8. Fair value of financial assets and liabilities (Note 39).

During the three months period ended March 31, 2012 there have been no significant changes to estimations made when preparing the Bank s 2011 Annual Financial Statements, other than those indicated in these Interim Condensed Consolidated Financial Statements.

d) Reclassification:

For comparative purposes, certain line items of the March 2011 Interim Condensed Consolidated Financial Statements have been reclassified.

e) Comparison of the Information:

The information contained in these financial statements corresponding to year 2011 is presented, unique and exclusively, to compare with the information regarding the period of three months ended March 31, 2012.

3. New Accounting Pronouncements:

The following is a summary of new standards, interpretations and improvements to the International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) but which have not come into effect as of March 31, 2012, as per the following detail:

IAS 1 Presentation of Financial Statements

The amendments to IAS 1 published by the IASB on June 16, 2011 require entities to group items presented in OCI on the basis of whether they are potentially recycled to profit or loss (ie reclassification adjustments). The amendments do not address which items are presented in OCI or which and when items are recycled through profit or loss, but reaffirm that items in OCI and profit or loss should be presented as either a single statement or two consecutive statements. Entities are required to apply amendments in the annual periods beginning on or after *July 1, 2012*, or earlier. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

IAS 19 Employee Benefits

The amendments to IAS 19 published by the IASB on June 16, 2011 eliminate the option to defer recognition of gains and losses (the corridor method), streamline the presentation of changes in assets and liabilities arising from defined benefit plans and enhance the disclosure requirements for defined benefit plans. Entities are required to apply amendments in the annual periods beginning on or after *January 1, 2013*, or earlier. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

IAS 27 Separate Financial Statements

This standard amended in May 2011, and supersedes IAS 27 (2008). The scope of this standard is restricted from this change only separate financial statements, as the concept related to the definition of control and consolidation were removed and included in IFRS 10. Entities are required to apply amendments in the annual periods beginning on or after *January 1, 2013*, and early adoption is permitted in conjunction with IFRS 10, IFRS 11 and IFRS 12 and the amendment to IAS 28. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

New Accounting Pronouncements, continued:

IAS 28 Investments in Associates and Joint Venture

The objective of IAS 28 (as amended in May 2011) is to prescribe the accounting for investments in associates and to set out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. Entities are required to apply amendments in the annual periods beginning on or after *January 1, 2013*, and early adoption is permitted in conjunction with IFRS 10, IFRS 11 and IFRS 12 and the amendment to IAS 27. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

IAS 32 Financial Instruments: Presentation

The amendments, issued in December 2011, address inconsistencies in current practice when applying the offsetting criteria IAS 32. The amendments are effective for annual periods beginning on or after *January 1, 2014* and allow adoption prior to that date. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

IFRS 1 First-time Adoption of International Financial Reporting Standards

In March, 2012, IASB issued amendments to IFRS 1, dealing with loans received from governments at a below market rate of interest, give first-time adopters of IFRSs relief from full retrospective application of IFRSs when accounting for these loans on transition. The amendments are mandatory for annual periods beginning on or after January 1, 2013. Earlier application is permitted. Banco de Chile and its subsidiaries are evaluating that the adoption of this standard will have not impact on its consolidated financial statements.

IFRS 7 Financial Instruments: Disclosures

In December 2011, amended the required disclosures to include information that will enable users of an entity s financial statements to evaluate the effect or potential effect of netting arrangements, including rights of set-off associated with the entity s recognized financial assets and recognized financial liabilities, on the entity s financial position. An entity shall apply those amendments for annual periods beginning on or after *January 1, 2013*. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

IFRS 9 Financial Instruments: Financial liabilities

On October 28, 2010, IASB published the requirements for classifying and measuring financial liabilities were added to IFRS 9. Most of the added requirements were carried forward unchanged from IAS 39. However, the requirements related to the fair value option for financial liabilities were changed to address the issue of own credit risk in response to consistent feedback from users of financial statements and others that the effects of changes in a liability s credit risk ought not to affect profit or loss unless the liability is held for trading.

The mandatory effective date to annual periods beginning on or after January 1, 2015.

New Accounting Pronouncements, continued:

IFRS 9 Financial Instruments: Recognition and Measurement

In November 2009, the IASB issued IFRS 9, Financial Instruments, the first step in its project to replace IAS 39, Financial Instruments: Recognition and Measurement . IFRS 9 introduces new requirements for classifying and measuring financial assets that are in the scope of the application of IAS 39. This new regulation requires that all financial assets be classified in function of the entity s business model for the management of financial assets and of the characteristics of the contractual cash flows of financial assets. A financial asset shall be measured at amortized cost if two criteria are fulfilled: (a) the objective of the business model is to maintain a financial asset to receive contractual cash flows, and (b) contractual cash flows represent principal and interest payments. Should a financial asset not comply with the aforementioned conditions, it will be measured at fair value. In addition, this standard allows a financial asset that fulfills the criteria to be valued at amortized cost to be designated at fair value with changes in income under the fair value option, as long as this significantly reduces or eliminates an accounting asymmetry. Likewise, IFRS 9 eliminates the requirement of separating embedded derivatives from the host financial assets. Therefore, it requires that a hybrid contract be classified entirely in amortized cost or fair value.

IFRS 9 is effective for annual periods commencing as of *January 1, 2015*, and allows adoption prior to that date. IFRS 9 must be applied retroactively, however if it is adopted before January 1, 2012, there is no need to reformulate comparative periods.

Banco de Chile and its subsidiaries are assessing the possible impact of adoption of these changes on the financial statements, however, that impact will depend on the assets maintained by the institution as of the adoption date. It is not practicable to quantify the effect on the issuance of these financial statements. To date, neither of these regulations has been approved by the Superintendency of Banks, event that is required for their application.

New Accounting Pronouncements, continued:

IFRS 10 Consolidated Financial Statement

In May 2011 the IASB issued IFRS 10 establishes a new definition of control applies to all entities including special purpose entities or structured entities as they are now referred to in the new standards. The changes introduced by IFRS 10 will require management to exercise significant judgment to determine which entities are controlled, and therefore are required to be consolidated by a parent.

These new standard is effective for annual periods beginning on or after *January 1, 2013*. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

IFRS 11 Joint Arrangements

In May 2011 the IASB issued IFRS 11 replaces IAS 31 Interest in Joint Ventures and SIC-13 Jointly-Controlled Entities- Non-monetary Contributions by Ventures.

IFRS 11 eliminated the option to record the value of investment in a joint venture using proportionate consolidation or recognize its assets and liabilities its relative shares of those items, if any. The new standards require to use the equity method.

These new standard is effective for annual periods beginning on or after *January 1, 2013*. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

IFRS 12 Disclosure of Interests in Other Entities

On May 12, 2011 the IASB issued IFRS 12 which replaces the requirements previously included in IAS 27, IAS 31 and IAS 28. This new standard is aimed at concentrating on a single regulatory body disclosure of subsidiaries, joint agreements, associates and structured entities. The new disclosures will help users of its financial statement evaluate the nature and risks associated with interests in other entities and the

effects of those interests on its financial statements.

These new standard is effective for annual periods beginning on or after *January 1, 2013*. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

IFRS 13 Fair Value Measurement

In May 2011, the IASB issued IFRS 13 Fair Value Measurement. This new standard establishes a new definition of Fair Value that converges with the generally accepted accounting principles in United States (US GAAP). This new regulation does not change when an entity must or may use fair value, but changes the way how to measure the fair value of financial assets and liabilities and non-financial.

These new standard is effective for annual periods beginning on or after *January 1, 2013*. To date, Banco de Chile and its subsidiaries are evaluating the possible impact that the adoption of this standard will have on its consolidated financial statements.

6. Segment Reporting, continued:

The financial information used to measure the performance of the Bank s business segments is not necessarily comparable with similar information from other financial institutions because it is based on internal reporting policies. The accounting policies used to prepare the Bank s operating segment information are similar as those described in Summary of Significant Accounting Principles . The Bank obtains the majority of its income from: interest, revaluations and fees, discounted the credit cost and expenses. Management is mainly based on these concepts in its evaluation of segment performance and decision-making regarding goals, allocation of resources for each unit individually. Although the results of the segments reconcile with those of the Bank at total level, it is not thus necessarily concerning the different concepts, since the management is measured and controls in individual form and additionally applies the following criteria:

• The net interest margin of loans and deposits is measured on an individual transaction and individual client basis, stemming from the difference between the effective customer rate and the related Bank s fund transfer price in terms of maturity, re-pricing and currency.

• The internal performance profitability system considers capital allocation in each segment in accordance to the Basel guidelines.

• Operating expenses are distributed at each area level. The Bank allocates all of its indirect operating costs to each business segment by utilizing a different cost driver in order to allocate such costs to the specific segment.

The Bank did not enter into transactions with a particular customer or third party that exceed 10% or more of its total income during the three-month period ended March 31, 2012 and 2011.

Transfer pricing between operating segments are on an arm s length basis in a manner similar to transactions with third parties.

Taxes are managed at a corporate level and are not allocated to business segments.

In order to be comparable, the figures have been adjusted for March 2011, following the same criteria used today. These changes are detailed as follows:

1. The distribution of capital and income to operating segments. Under the new criteria, the assignation of capital considers risk-weighted assets and the amounts provided by treasury.

2. Income from maturity mismatches and currency (excluding those related to trading instruments and available for sale) have been allocated to business segments taking into account the volume of loans and deposits balances managed by each business.

(b) Fair value Hedges:

The Bank uses cross-currency swaps and interest rate swaps to hedge its exposure to changes in the fair value of the hedged elements attributable to interest rates. The aforementioned hedge instruments change the effective cost of long-term issuances from a fixed interest rate to a variable interest rate, decreasing the duration and modifying the sensitivity to the shortest segments of the curve.

Below is a detail of the hedged elements and hedge instruments under fair value hedges as of March 31, 2012 and 2011:

(c) Cash flow Hedges:

(c.1) From the year 2011, the Bank uses cross currency swaps to hedge the risk from variability of cash flows attributable to changes in the interest rates of bonds and foreign exchange of bonds issued abroad in Mexican pesos to rate TIIE (Interbank Interest Rate Balance) plus 0.6 percentage points. The cash flows of the cross currency swaps equal the cash flows of the hedged items, which modify uncertain cash flows to known cash flows derived from a fixed interest rate.

Additionally, these cross currency swap contracts used to hedge the risk from variability of the Unidad de Fomento (CLF) in assets flows denominated in CLF until a nominal amount equal to the portion notional of the hedging instrument CLF, whose readjustment daily impact the item interest revenue of the financial statements.

(c.2) Below is an estimate of the periods in which the estimated cash flows, that includes the interest and the capital amount, of the hedged item(s) are expected to be generated:

13. Investment Securities, continued:

Instruments issued by the Chilean Government and Central Bank include instruments with agreements to repurchase sold to clients and financial institutions, totaling MCh\$9,381 as of March 31, 2012 (MCh\$5,596 in 2011). The agreements to repurchase have an average maturity of 4 days as of March 31, 2012 (11 days in 2011).

In instruments issued abroad are included mainly bank bonds and shares.

As of March 31, 2012, the portfolio of financial assets available-for-sale includes a net unrealized gain of MCh\$12,726 (net unrealized gain of MCh\$9,120 in 2011), recorded in other comprehensive income within equity.

During 2012 and 2011, there is no evidence of impairment of financial assets available-for-sale.

Realized gains and losses are calculated as the proceeds from sales less the cost (specific identification method) of the investments identified as available for sale. In addition, any unrealized gain or loss previously recognized in equity for these investments is reversed and recorded in the Consolidated Statements of Income.

Gross profits and losses realized on the sale of available-for-sale investments as of March 31, 2012 and 2011 are shown in Note 30 Net Financial Operating Income .

Gross profits and losses realized and unrealized on the sale of available for sale investments for the three-month period ended March 31, 2012 and 2011 and December 31, 2011 are as follows:

| Others | (0.57) | (791) | (0.08) | (115) |
| Effective rate and income tax expense | 10.92 | 14,849 | 14.50 | 19,830 |

The effective rate for income tax for the period ended March 31, 2012 is 10.92% (14.50% in March 2011). The increase between the periods is mainly due to effect of changes in tax rate.

^{*} According to the Law No. 20,455 issued in 2010 and the instructions of the Circular No. 63 of September 30, 2010, issued by the Chilean Internal Revenue Service (SII) is temporarily changed the tax rates of the first category according to the following:

| Year | Rate |
|------------------|-------|
| 2011 | 20.0% |
| 2012 | 18.5% |
| 2013 hereinafter | 17.0% |

The effect on deferred tax results for this rate change signified a charge to income for the period 2012 by MCh\$1,242 (charge of MCh\$1,426 in March 2011).

(*) These correspond to property and equipment to be given under a finance lease.

(**) Assets received in lieu of payment are assets received as payment of customers past-due debts. The assets acquired must at no time exceed, in the aggregate, 20% of the Bank s effective equity. These assets represent 0.07% (0.04 in

2011) of the Bank s effective equity.

The assets awarded at judicial sale are assets that have been acquired as payment of debts previously owed towards the Bank. The assets awarded at judicial sales are not subject to the aforementioned requirement. These properties are assets available for sale. For most assets, the sale is expected to be completed within one year from the date on which the asset was received or acquired. If the asset in question is not sold within the year, it must be written off.

The provision for assets received in lieu of payment is recorded as indicated in the Compendium of Accounting Standards, which indicate to recognize a provision for the difference between the initial value plus any additions and its realizable value when the former is greater

(***) This item mainly includes simultaneous operations carried out by the subsidiary Banchile Corredores de Bolsa S.A.

(b) Chilean Central Bank

Debts to the Central Bank of Chile include credit lines for the renegotiation of loans and other Central Bank borrowings. These credit lines were provided by the Central Bank of Chile for the renegotiation of loans due to the need to refinance debt as a result of the economic recession and crisis of the banking system in the early 1980s.

The outstanding amounts owed to the Central Bank of Chile under these credit lines are as follows:

(b) Distributable income:

For purposes of Law No. 19,396 (in particular Articles 24, 25 and 28 of such law) and the Central Bank Contract, Banco de Chile s distributable net income will be determined by subtracting or adding to net income the correction of the value of the paid-in capital and reserves according to the variation of the Consumer Price Index between November of the fiscal year prior to the one in which the calculation is made and November of the fiscal year in which the calculation is made. The difference between net income and distributable net income shall be registered in a reserve account since the first day of the fiscal year following the date when the calculation is made. This reserve account cannot be distributed or capitalized. Provisional article four shall be in force until the obligation of Law No. 19,396 owed by Sociedad Matriz del Banco de Chile S.A., directly or through its subsidiary SAOS has been fully paid. The distributable income for the period 2012 ascend to Ch\$102,007 millions.

The above described agreement was subject to the consideration of the Council of the Central Bank of Chile, and such entity approved, in ordinary meeting that took place on December 3, 2009.

(c) Approval and payment of dividends:

At the Ordinary Shareholders Meeting held on March 22, 2012 the Bank s shareholders agreed to distribute and pay dividend N° 200 amounting to Ch\$2.984740 per common share of Banco de Chile, with charge to net income for the year ended December 31, 2011.

At the Ordinary Shareholders Meeting held on March 17, 2011 the Bank s shareholders agreed to distribute and pay dividend N° 199 amounting to Ch2.937587 per common share of Banco de Chile, with charge to net income for the year ended December 31, 2010.

(d) Provision for minimum dividends:

The Board of Directors established a minimum dividend distribution policy, where the Bank has to record a provision of 70% of net income as. Accordingly, the Bank recorded a liability under the line item Provisions for an amount of MCh\$71,405 (MCh\$75,947 in 2011) against Retained earnings .

27. Equity, continued:

(e) Earnings per share:

i. Basic earnings per share:

Basic earnings per share are determined by dividing the net income attributable to the Bank shareholders in a period by the weighted average number of shares outstanding during the period.

ii. Diluted earnings per share:

Diluted earnings per share are determined in the same way as Basic Earnings, but the weighted average number of outstanding shares is adjusted to take into account the potential diluting effect of stock options, warrants, and convertible debt.

The following table shows the income and share data used in the calculation of EPS:

| | March 2012 | March 2011 |
|---|----------------|----------------|
| Basic earnings per share: | | |
| | | |
| Net profits attributable to ordinary equity holders of the bank (in millions) | 121,161 | 116,885 |
| Weighted average number of ordinary shares | 86,942,514,973 | 82,551,699,423 |
| Dividend per shares (in Chilean pesos) | 1.39 | 1.42 |
| | | |
| Diluted earnings per share: | | |
| | | |
| Net profits attributable to ordinary equity holders of the bank (in millions) | 121,161 | 116,885 |
| Weighted average number of ordinary shares | 86,942,514,973 | 82,551,699,423 |
| Assumed conversion of convertible debt | | |
| Adjusted number of shares | 86,942,514,973 | 82,551,699,423 |
| Diluted earnings per share (in Chilean pesos) | 1.39 | 1.42 |

As of March 31, 2012 and 2011, the Bank did not have any instruments that could lead to a dilution of its ordinary shares.

(f). Other comprehensive income:

The cumulative translation adjustment is generated from the Bank s translation of its investments in foreign companies, as it records the effects of foreign currency translation for these items in equity.

The fair market value adjustment for available-for-sale instruments is generated by fluctuations in the fair value of that portfolio, with a charge or credit to equity, net of deferred taxes.

The related parties of companies and their subsidiaries include entities of the company s corporate group; corporations which are the company s parent company, associated companies, subsidiaries, associates; directors, managers, administrators, main executives or receivers of the company on their own behalf or in representation of persons other than the company, and their respective spouses or family members up to the second degree of consanguinity or affinity, as well as any entity directly or indirectly controlled through any of them, the partnerships or companies in which the aforementioned persons are owners, directly or through other individuals or corporations, of 10% or more of their capital or directors, managers, administrators or main executives; any person that on their own or with others with whom they have a joint action agreement can designate at least one member of the company s management or controls 10% or more of the capital or of the voting capital, if dealing with a public corporation; those that establish the company s bylaws, or with a sound basis identify the directors committee; and those who have held the position of director, manager, administrator, main executive or receiver within the last eighteen months.

Article 147 of the Companies Act, states that a public corporation can only enter into transactions with related parties when the objective is to contribute to the company s interests, when terms of price, terms and conditions are commensurate to those prevailing in the market at the time of their approval and comply with the requirements and procedures stated in the same standard.

Moreover, article 84 of the General Banking Law establishes limits for loans granted to related parties and prohibits the granting of loans to the Bank s directors, managers and general representatives.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities:

(a) Financial instruments measured at fair value

The Bank and its subsidiaries determine the fair value of financial instruments by taking into account:

1. The price of the financial instruments observed in the market, whether derived from observations or using modeling.

- 2. The credit risk presented by the issuer of a debt instrument.
- 3. The liquidity conditions and depth of the respective markets.
- 4. Whether the position is an asset or liability to the Bank (in the case of derivatives, if the future cash flow is received or paid).

Based on an analysis of these factors, the Bank classifies the financial instruments in its portfolio into one of three levels:

Level 1: Observable prices in active markets for the specific type of instrument or transaction to be measured.

Level 2: Valuation techniques based on observable factors. This category includes instruments valued using: Quoted prices for similar instruments, either in active or less active markets. Other valuation techniques when all significant inputs are directly or indirectly observable based on market data.

Level 3: Valuation techniques that use significant unobservable factors. This category includes all instruments where the valuation technique includes factors that are not based on observable data and the unobservable factors can have a significant effect on the valuation of the instrument. This category contains instruments that are valued based on quoted prices for similar instruments that require adjustments or significant unobservable assumptions to reflect the differences between them.

Valuation of Financial Instruments

The Bank s accounting policy for measuring fair value is discussed in Note 2(e).

The Bank has established a control framework for measuring fair values. This framework includes a Product Control Function, which is independent from key management and reports directly to the Financial Control Manager. The product control area is generally responsible for independently verifying the results of trading and investment transactions as well as all fair value measurements. These controls include: verifying factors to determine observable prices and valuation models used; a review and approval process for new models and changes to models affecting the product control (result) and the Bank s Market Risk.

39. Fair Value of Financial Assets and Liabilities, continued:

Derivatives

With the exception of currency futures, for which prices are directly observable on active market and, therefore, are classified as Level 1, the Bank classifies derivative instruments as Level 2.

Within Level 2, valuations are performed using simple net present value calculations for all instruments without options. Options are valued using well-known, widely accepted valuation models.

The most frequently applied valuation techniques include forward pricing and swap models using present value calculations. The models incorporate various inputs, including the credit quality of counterparties, foreign exchange rates and interest rate curves.

Investments in Financial Instruments

Debt instruments are valued using the internal rate of return, used to discount all cash flows of the respective instrument. The valuation calculations for debt instruments built into the Bank systems are those used by the Santiago Stock Exchange or Bloomberg, as appropriate.

Part of the portfolio of available-for-sale financial instruments, which are instruments that are not actively quoted, is valued using valuation techniques for which there are no relevant observable data from active markets and, therefore, they are classified as Level 3. These assets are valued based on the prices of assets with similar characteristics, taking into account the market, currency, type of instrument, liquidity, duration, issuer risk and cash flow structure, among other factors.
