From the CEO and CFO

Cemig's CEO, Mr. Djalma Bastos de Moraes, makes the following comments: The exceptional results that we present for the first quarter of 2012 reflect the success of our Long-term Strategic Plan, and of the strategy that is linked to it. By focusing on the long term, this Plan enables Cemig to present growing results, with a balanced portfolio of businesses, and with low risk. We do not cease to do our homework, growing in a balanced fashion across all our sectors, with our focus on operational excellence. The results show that we are on the right path and in particular that the decisions taken in the last few years are having the effect we intend: constantly adding value to our businesses, and making Cemig a company with continuously increasing strength and solidity, led by efficient corporate management.

Cemig's Chief Finance and Investor Relations Officer, Luiz Fernando Rolla, comments as follows: In this first quarter we have continued to generate consistent, robust cash flow as a result of our operations and, as intended, add value to our businesses. Our Ebitda in 1Q12 is R\$ 1.4 billion, 11% more than in the first quarter of 2011 benefiting from our policy of maintaining high levels of operational efficiency. This excellence is evidenced by our net income, of R\$ 631 million in the first 3 months of this year, 20% more than in 1Q11. We are now operating at a new level of results, which reflects the correctness of our strategy of growing through acquisitions and new projects, within the process of consolidation of the Brazilian electricity sector. Our solid cash position of R\$ 2.2 billion provides the basis for execution of our Strategic plan, dividend policy and

debt management, and also the execution of planned investments, including those associated with acquisition opportunities. The excellent results we present today show that we continue to add value, both continuously and sustainably, for all our shareholders and all our other shareholders.

The economic context

Brazil's strong consumer market, and its industrial sector based strongly on exportation of basic products, have caused the country now to be seen as an economic highlight in the world scenario. In the last four years Brazilian GDP growth has exceeded the world average (with the exception of 2011, when its growth was 2.7%, after the strong expansion of 7.5% in 2010). Estimates for the next three years indicate annual Brazilian GDP growth of 5.3%, compared to an expected worldwide growth rate of 3.7%.

Unemployment in Brazil remained low in the first quarter of the year at 6.2% compared to most of the world's mature economies. This figure is strengthened by the fact that Brazil's economically active population has grown in recent years to a total of more than 24.1 million people.

In spite of its strong economic activity, Brazil's Expanded Consumer Price Index (*Índice de Preços ao Consumidor Amplo*, or IPCA), the Central Bank's main reference figure for inflation, posted 12-month inflation of 5.24% at the end of the first quarter of 2012. Since 2004, the 12-month inflation rate had been within the targets of between 2.5% and 6.5% established for the ends of each year by the National Monetary Council (*Conselho Monetário Nacional*, or CMN).

With the low level of unemployment, and inflation under control, the Brazilian worker's average real income has been growing vigorously, which has made it possible for the lowest income groups to progress upward. The Brazilian worker's average monthly wage at the end of first quarter 2012 was R\$ 1,728.40, an increase of 3.5% at the margin, and

Table of Contents

5.6% in relation to the same date a year before. These facts, together with the strong expansion of total lending in the Brazilian economy to a total close to 50% of GDP at the end of 2011 have consolidated the strength of the country's consumer market.

To support continuing Brazilian economic growth, the federal government has been investing in infrastructure through its Second Accelerated Growth Program (*Programa de Aceleração do Crescimento 2, or PAC 2*), which is expected to arrange for investment of R\$ 1.1 trillion in the energy sector: R\$ 461.6 billion by 2014, and R\$ 626.9 billion after that date. There are projects in development for 76 new generation plants, to deliver new generation capacity totaling 26,252 MW. A further 21 transmission lines and 19 substations are under construction as part of the Program. The National Electricity Research Company (*Empresa de Pesquisa Energética, EPE*) expects total electricity consumption in Brazil to grow at an annual rate of 4.5%, to a total of 736,000 GWh in 2021.

Brazilian electricity consumption in the first quarter of 2012 was 111,820 GWh, 3.9% more than in 1Q11. Consumption increased year-on-year in all the types of user, led by the Commercial category, with an increase of 6.3% YoY. Consumption by industry in 1Q12 was up 2.3% YoY, and residential consumption was up 3.6%. Overall YoY growth of the other consumer categories was 5.8%. Measured year-on-year in the month of March alone, consumption was 6.1% higher than a year before.

Table of Contents

-----**Cemig s consolidated electricity market**

The figures we report for Cemig s market include the sale of electricity by: Cemig D, Cemig GT consolidated (Cemig GT plus Cachoeirão, Pipoca and the proportionate holdings in the Parajuru, Morgado and Volta do Rio wind farms); the subsidiaries and affiliates (Horizontes, Ipatinga, Sá Carvalho, Barreiro, Cemig PCH, Rosal and Capim Branco); and Light (in proportion to Cemig s holding).

This includes: sales of electricity to both captive and free consumers, in the concession area of Minas Gerais State and outside the state; the sales of electricity to other agents of the electricity sector in the Free and Regulated Markets; the sales under the Proinfa program to encourage alternative electricity sources; and the sales on the CCEE (the wholesale market) eliminating transactions between companies of the Cemig group.

Electricity consumption in Cemig s concession area in 1Q12 was 3.5% higher than in 1Q11. This reflects a constant increase in Cemig s total number of clients which reached a total of 11,547,000 consumers in 1Q12, 3.1% more than in 1Q11. Of this total, Cemig D serves 7.384 million consumers, an increase of 3.6% in 12 months; Light serves 4.163 million, an increase of 2.3% in 12 months; Cemig GT has 300 clients, 12.1% more than at the end of 1Q11; and the subsidiary and affiliate companies have 22 clients.

This growth can be seen in detail in the separate consumer categories, as follows:

Table of Contents

Residential:

Residential consumption represented 15.8% of the total electricity transacted by Cemig in 1Q12. The growth of 4.1% over 12 months is associated with: (i) connection of new consumers, and (ii) the increase in consumption of goods and services by families, due to the improving conditions of the Brazilian economy, with the vigor of the employment market being maintained, and growth in total real wages associated with expansion of the supply of credit.

Industrial:

Consumption by Free Consumer clients represented 33.1% of the total volume of electricity transacted by Cemig in 1Q12, which is 1.6% less than in 1Q11. The reduction basically reflects lower industrial activity in the state than in the previous period.

Commercial:

This total volume of electricity transacted with this user group accounted for 10.8% of Cemig's total in 1Q12, and was 10.8% more than the volume transacted in 1Q11. This growth reflects the strong domestic consumer market, especially final consumption by families and individuals.

Rural:

Consumption by rural consumers was 5.7% greater in 1Q12 than 1Q11, with new first-time connections of 131,224 rural properties in the period.

Table of ContentsOther consumer categories:

The total of other types of consumption in 2011 by public authorities, public illumination, public services, and Cemig's own consumption was 9.1% higher than in 1Q11, and represented 5.7% of Cemig's total transactions in electricity in the quarter.

This chart shows the breakdown of the Cemig Group's sales to final consumers:

Table of Contents

----- **The electricity market of Cemig GT**

The consolidated total of electricity sold by Cemig GT means the total of: sales to Free Clients both in the state of Minas Gerais and outside it; sales under the Proinfra program to encourage new energy sources; and wholesale sales in the Regulated and Free Markets, and on the CCEE (Electricity Trading Chamber).

This total expanded by 2.4% from 1Q11 to 1Q12, reflecting Cemig's increasing efforts on sales of electricity in the period.

Gross revenue from retail supply of electricity in 1Q12 was R\$ 1.16 billion, compared to R\$ 989.0 million in 1Q11, an increase of 17.4%.

This result primarily reflects electricity sold to Free Consumers 1.9% higher by volume, and the effect of adjustments to supply contracts, most of which are indexed to the variation in the IGP-M inflation index.

Although the volume of electricity sold to other concession holders was 0.6% lower YoY, revenue from energy sold to other concession holders totaled R\$ 387.7 million in 1Q12, compared to R\$ 345.2 million in 1Q11 a year-on-year increase of 12.3%.

----- The electricity market of Cemig D

The concession area of Cemig Distribuição S.A. (Cemig D) covers 567,478 km², approximately 97% of the territory of Minas Gerais State. Cemig D has four electricity distribution concessions in Minas Gerais, under four concession contracts for the Western, Eastern, Northern and Southern areas of the State. These contracts have an expiry date of February 18, 2016, and a clause providing for their extension by the concession-granting power for a further 20 (twenty) years, upon application by the concession holder.

The total of electricity sold by Cemig D in 1Q12 was 1.9% lower than in 1Q11. The main factor in this comparison is consumption 14.9% lower year-on-year by the Industrial consumer category in the captive market, reflecting migration by captive consumers to the free market over the period. If adjusted for these clients that migrated to the free market in the period, Cemig D's volume of sales to the Industrial category would have been 0.5% higher year-on-year.

The following are some comments on the figures for the main consumer categories:

Table of Contents

Residential:

Residential consumption represents 36.6% of the total energy sold by Cemig D in 1Q12, and was 0.1% higher than in 1Q11. The relative stability of the figure is associated with the cooling of the rate of growth of Brazilian economic activity.

Industrial:

Electricity used by captive industrial clients was 17.1% of the volume sold by Cemig D in 1Q12, and totaled 14.9% less than in 1Q11 the main factor being the migration of captive clients to the status of free clients over the period: adjusted for this migration to the Free Market, the volume sold to industrial clients would have been 0.5% higher YoY.

Commercial and Services:

The volume of electricity sold to this consumer category accounted for 23.0% of the electricity sold by Cemig D in 1Q12, and was 3.7% higher than in 1Q11.

Rural:

Rural consumption is was 5.6% higher year-on-year, with the connection of 123,546 new rural properties added in the 12-month period. These consumers accounted for 10.9% of the total electricity consumption.

Table of ContentsOther consumer categories:

The total of the other types of consumption in 1Q12 by public authorities, public illumination, public services, and Cemig's own consumption was 4.9% higher than in 1Q11.

Revenue from wholesale electricity sales

The volume of electricity sold to other concession holders in 1Q12 was 1.3% higher than in 1Q11, and average price in these sales was 15.6% higher, at R\$ 123.61/MWh in 2012, compared to R\$ 106.95/MWh in 2011. As a result, revenue from wholesale supply to other concession holders was 17.1% higher

year-on-year, at R\$ 427,100 in 1Q12, than in 1Q11 (R\$ 364,724). Volume of electricity sold to other concession holders in 1Q12 totaled 3,455,316 MWh, compared to 3,410,217 in 1Q11.

Table of Contents

Revenue from use of the electricity Distribution Systems (TUSD)

The revenue from the TUSD (Tariff for Use of the Distribution System), received by Cemig D and Light, was 2.1% higher in 1Q12, at R\$ 496,529, compared to R\$ 486,107 in 1Q11. This revenue comes from charges made to Free Consumers on energy sold by other agents of the electricity sector, and its increase arises from a higher volume of transport of energy for free consumers, a consequence of the recovery of industrial activity and of migration of captive clients to the free market.

Revenue from use of the transmission grid

For the older concessions, the Revenue for use of the transmission grid refers to the tariff charged to agents in the electricity sector, including Free Consumers connected to the high voltage network, for use of that part of the National transmission Grid that is owned by the Company, less the amounts received that are used for amortization of the financial asset.

For the new concessions, it includes the portion received from agents of the electricity sector relating to operation and maintenance of the transmission lines, and also the adjustment to present value of the transmission financial asset constituted, primarily, during the period of construction of the transmission facilities. The rates used for updating of the asset correspond to the remuneration on capital applied to the undertakings, and these vary in accordance with the model of undertaking and the investing company's cost of capital.

Revenue from use of the transmission network in 1Q12 was R\$ 382,110, 20.4% higher than in 1Q11 (R\$ 317,368). This variation mainly reflects the increase in the Company's transmission assets arising from the new acquisitions made in 2011 principally of Abengoa, acquired through semi's subsidiary

Taesá. The transmission revenue aggregated by Taesa, in

Table of Contents

proportion to Cemig's stake, was R\$ 132,382 in 1Q12, compared to R\$ 89,149 in 1Q11.

----- Taxes and charges applied to revenue

Deductions from operational revenues in 1Q12 totaled R\$ 1,915,811, which was 16.3% more than in 1Q11 (R\$ 1,647,650). The main variations in these deductions from revenue, between the two years, are as follows:

The Fuel Consumption Account - CCC

The deduction for the CCC charge was R\$ 196,684 in 1Q12, compared to R\$ 157,302 in 1Q11, an increase of 25.0%. This charge is for the costs of operation of the thermal plants in the national grid and in the isolated systems. It is prorated between electricity concession holders, on a basis set by an Aneel Resolution.

This is a non-controllable cost: in the distribution activity, the difference between the amounts used as a reference for calculation of tariffs and the cost actually incurred is compensated for in the next tariff adjustment. For the portion relating to transmission services the Company charges the CCC amount to Free Consumers on their invoices and passes it on to Eletrobrás.

CDE - Energy Development Account

The deduction from revenue for the CDE charge was R\$ 151,606 in 1Q12, compared to R\$ 122,855 in 1Q11, an increase of 23.4%. These payments are specified by a Resolution issued by the regulator, Aneel. This is a non-controllable cost: in the distribution activity, the difference between the amounts used as a reference for calculation of tariffs and the cost actually incurred is compensated for in the next tariff adjustment. For the portion related

Table of Contents

to transmission services the Company merely acts as a channel for the CDE amount, charging it to Free Consumers on their invoices and paying it on to Eletrobrás.

The other deductions from revenue are taxes, calculated as a percentage of amounts invoiced. Hence their variations are substantially proportional to the changes in revenue.

----- Operational costs and expenses

(Excluding Financial revenues (expenses))

Operational costs and expenses (excluding Net financial revenue (expenses)) in 1Q12 totaled R\$ 2,945,062, 15.7% more than in 1Q11 (R\$ 2,546,147). This is mainly due to increases in the costs of Electricity bought for resale, and Outsourced services. There is more information in Explanatory Note 23 to the consolidated quarterly financial statements.

The following paragraphs outline the main variations in expenses:

Electricity bought for resale

The expense on electricity bought for resale in 1Q12 was R\$ 1,147,089, 6.6% more than in 1Q11 (R\$ 1,075,760). The increase in cost arises from the increase in Cemig's percentage equity interest in Light, and from the distribution activity. This is a non-controllable cost: in the distribution activity, the difference between the amounts used as a reference for calculation of tariffs and the cost actually incurred is compensated for in the next tariff adjustment. There is more information in Explanatory Note 23 to the consolidated quarterly financial statements.

Charges for use of the transmission grid

The expense on charges for use of the transmission grid in 1Q12 was R\$ 241,458, 27.3% more than in 1Q11 (R\$ 189,614).

Table of Contents

This expense refers to the charges, set by an Aneel Resolution, payable by electricity distribution and generation agents for use of the facilities that are components of the national grid. This is a non-controllable cost: in the distribution activity, the difference between the amounts used as a reference for calculation of tariffs and the cost actually incurred is compensated for in the next tariff adjustment.

Personnel

Personnel expenses in 1Q12 were R\$ 341,665 in 1Q12, 21.17% more than in 1Q11 (R\$ 281,967). The difference is primarily due to the salary increase of 8.2% given to employees in November 2011.

Employees and managers profit shares

The expense on employees and managers profit shares in 1Q12 was R\$ 55,888, compared to R\$ 23,022 in 1Q11. The amount provisioned in 1Q12 refers to the part of the profit shares arising from the collective work agreement of November 2011 that is to be paid in the 2012 business year. The total amount agreed was in fact paid in April, 2012.

Table of Contents

Post-retirement obligations

Expenses on post-retirement obligations totaled R\$ 33,498 in 1Q12, 8.5% more than in 1Q11 (R\$ 30,888). This expense represents the updating of the obligation, calculated in accordance with an actuarial opinion prepared by external consultants.

Operational provisions

Operational provisions totaled R\$ 97,395 in 1Q12, compared to R\$ 41,068 in 1Q11, an increase of 137.2%. This change mainly arises from a provision of R\$ 27,036 constituted in 1Q12, for civil actions concerning consumer relationships reflecting re-evaluations of the chances of loss in numerous legal proceedings, based on the opinion of the Company's legal advisers. There is more information in Explanatory Note 20 to the consolidated quarterly financial statements.

Gas purchased for resale

The cost of gas purchased for resale was R\$ 100,444 in 1Q12, 61.1% more than in 1Q11 (R\$ 62,366), reflecting the increase in the volume of gas purchased, to meet the requirements of higher sales of gas by Gasmig in 2012, due in turn to increased industrial activity.

Table of Contents

----- **Financial revenues (expenses)**

In 1Q12 the company reported net financial expenses of R\$ 262,080, compared to net financial expenses of R\$ 282.819 million in 1Q011. The main factors in this financial result are:

· Increase in revenue arising from foreign exchange variations: R\$ 26,136 in 1Q12, compared to R\$ 5,752 in 1Q11. This higher value reflects the large volume of financing indexed to the US dollar, and comparison of the increase in the exchange rate in 1Q12 with the increase in the exchange rate in 1Q11.

· Revenue from monetary updating of escrow payments into court in legal proceedings: R\$ 9,562 in 1Q12, from updating of a tax credit upon final judgment in favor of Cemig in a legal action concerning the Donations and Death Duties tax (*Impostos sobre Transmissão Causa Mortis e Doação*, or ITCD).

· A lower expense on Monetary variation on loans and financings in Brazilian currency: R\$ 33,387 in 1Q12, compared to R\$ 50,964 in 1Q11. This reduction arises, substantially, from the lower inflation rates posted by the IPCA and the IGP M indices over the first quarter of 2012 of 1.5% and 0.6%, respectively, compared to 2.3% and 2.4%, respectively, in 2Q11.

For a breakdown of financial revenues and expenses, please see Explanatory Note 24 to the consolidated quarterly financial statements.

Table of Contents----- **Income tax and Social Contribution tax**

In 1Q12, Cemig posted expenses on income tax and the Social Contribution tax of R\$ 309,063, equal to 32.86% of the pre-tax profit of R\$ 940,451. In 1Q11, Cemig posted expenses on income tax and the Social Contribution tax of R\$ 250,492, equal to 32.25% of the pre-tax profit of R\$ 776,643. These effective rates are reconciled with the nominal rates in Note 8 to the consolidated quarterly financial statements.

----- **EBITDA**

(Method of calculation not reviewed by external auditors)

Cemig sEbitda in 1Q12 was 11.44% by higher than in 1Q11.

EBITDA - R\$ 000	Dec. 31, 2012	Dec. A1, 2011	Change, %
Profit (loss) for the period	631,388	526,151	20.00
+ Provision for income tax and Social Contribution tax	309,063	250,492	23.38
+ Financial revenue (expenses)	262,080	282,819	(7.33)
+ Amortization and depreciation	237,551	232,797	2.04
= EBITDA	1,440,082	1,292,259	11.44

The higher Ebitda in 1Q12 than in 1Q11 primarily reflects Revenue 15.1% higher, partially offset by Operational costs and expenses (excluding Depreciation and amortization) 17.0% higher. The higher

----- Profit and loss accounts, by activity

Operational costs and expenses in 1Q12 than in 1Q11 are reflected in Ebitda margin, which was 35.8% in 1Q11, and 34.7% in 1Q11.

i Consolidated net revenue in the quarter, excluding construction revenue, was R\$ 1.767 billion, up 4.7% from 1Q11. Revenue was higher year-on-year in all the segments of Light's business.

i Consolidated Ebitda in 1Q12 was R\$ 433.8 million, at the same level as in 1Q11. Ebitda margin in 1Q12 was 24.6% compared to 25.8% in 1Q11.

i Net profit in the quarter was R\$ 140.1 million, 15.8% lower than the 1Q11 net profit of R\$ 166.3 million, mainly affected by the increase in financial expenses arising from the higher level of leverage contracted for the purposes of the Company's growth.

i Non-technical losses in the quarter were 41.3% of the low-voltage invoiced market (on the Aneel criterion), 0.9 percentage points higher than at December 2011, mainly due to a change in the criterion for treatment of clients with long-term delinquency.

At the end of the quarter Light s net debt was R\$ 3.439 billion, 1.7% more than at the end of December 2011. Net debt / Ebitdawas 2.8x.
