Ad Hoc Notice

August 02, 2012

**Moscow, Russian Federation Mobile TeleSystems OJSC ( MTS NYSE: MBT), the leading telecommunications operator in Russia and the CIS, announces that the Prosecutor's General Office of Uzbekistan and the State Agency for Communications and Information of Uzbekistan (the SACI ) are preparing to bring groundless charges of engaging in activity without a license and illegal activities of the branches without individual licenses against Uzdunrobota FE LLC ( Uzdunrobota , MTS-Uzbekistan ), MTS's wholly owned subsidiary in Uzbekistan . These charges contradict official documents, including documents issued earlier to Uzdunrobota by the SACI.**

In the Company's opinion, these unsubstantiated and contradictory allegations cannot serve as a basis for the General Prosecutor's Office public claim of enormous damages allegedly incurred by the Republic of Uzbekistan as a result of Uzdunrobota's operations in the country. These allegations cannot be used by the authorities to later charge Company with any financial or tax claims.

At Company's disposal are official documents issued by the SACI confirming that the SACI was fully aware of the legal structure of Uzdunrobota when the Company was issued a license in 2004. The documents confirm that the license agreement applied to all branches (filials) of Uzdunrobota irrespective of their legal form prior to MTS's acquisition of the controlling stake in Uzdunrobota in 2004.

1. Uzdunrobota was established in 1991. Prior to November 1997, a 55% stake was owned by SACI. From November 1997 to March 2002, the SACI held a 49% stake in Uzdunrobota. In March 2002, ownership of the stake was transferred to the State Property Committee of Uzbekistan.

2. As expressly set out in the licensing agreement signed between Uzdunrobota and the SACI in 2004, 12 branches (filials) of Uzdunrobota were established before 1997, at a time when the SACI held a controlling stake in Uzdunrobota. Three more branches (filials) were established at a time when the SACI held a 49% stake in Uzdunrobota prior to MTS's acquisition of a controlling stake. Since the MTS's acquisition of Uzdunrobota, the filial structure has remained. Therefore, the SACI, which granted a license to Uzdunrobota in 2004, had itself created and further authorized the use by the Company of the aforementioned business structure. Furthermore the SACI must have been familiar with the Company's filial structure, their legal forms and the business structure applied by the Company.

3. A licensing agreement issued by the SACI to Uzdunrobota in 2004 directly states that the license, during its tenor, applies to all branches of Uzdunrobota irrespective of the time when these branches were established. To emphasize this fact, a list of branches (filials) in question was attached to the license agreement as an addendum. Similar provisions are present in the conditions of license agreements issued to the company in 2002 and 2003.

## Edgar Filing: MOBILE TELESYSTEMS OJSC - Form 6-K

4. In 2001, the SACI, writing in an official letter to Uzdurobota, confirmed that, in accordance with the laws of Uzbekistan, the single Uzdurobota's license applied to and covers the operations of all of the branches of the company.

5. All licensing agreements between the SACI and Uzdurobota were signed by Mr. Abdullah Aripov, General Director of the SACI at that time, who currently serves as Deputy Prime Minister of Uzbekistan.

Audits of Uzdurobota with respect to compliance with the licensing requirements have been conducted by the State Inspection for Communications (SIC) for many years, and they have also confirmed that the license extends to all of the regional branches of Uzdurobota. According to the information available in the market, other companies active in Uzbekistan also operate under similar structures and under one license.

In the Company's opinion, the on-going audits of MTS-Uzbekistan's financial and operating activities conducted in gross violation of Uzbekistan law, the illegal suspension of Uzdurobota's license, application of tactics of intimidation against Uzdurobota's employees, including their detainment and arrests, and the seizure of assets prior to the official completion of any investigation, are parts of an unwarranted attack on MTS's legitimate investments and are being orchestrated by certain influential entities in Uzbekistan as a prelude toward the seizure and expropriation of the Company's assets in the country.
