Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form SD

x Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from 1 January to 31 December 2013.

Introduction

Vodafone Group Plc (**Vodafone** or the **Company**) is one of the world's largest communications companies, with revenues of £38.3 billion in the financial year ended 31 March 2014. Vodafone provides a wide range of services, including voice, messaging, data and fixed broadband, to over 433 million customers in nearly 30 countries. Vodafone is listed on the NASDAQ Stock Market LLC (**NASDAQ**) and files reports with the U.S. Securities and Exchange Commission (the **SEC**) under Section 13(a) of the U.S. Securities Exchange Act of 1934 (the **Exchange Act**).

Vodafone uses electronic equipment in its operations and sells products, such as mobile phones, tablets and other devices, to customers. Vodafone does not manufacture these products itself, but does purchase them from suppliers and, in some cases, contracts to manufacture products that it sells to customers.

Electronic products have numerous components that may contain cassiterite, columbite-tantalite (coltan), wolframite and/or gold, and the metals derived from these minerals tin, tantalum, tungsten and gold respectively (each, a **3TG** metal). These metals come from many different smelters and refiners. Both the smelters/refiners and the mines from which minerals are originally sourced are several tiers away from Vodafone in the supply chain. As a user of these necessary conflict minerals (as such term is defined in SEC Form SD) in its manufactured products, Vodafone is subject to certain reporting requirements under Rule 13p-1 under the Exchange Act (the **Rule**).

Vodafone's policy with respect to the sourcing of conflict minerals can be found at:
http://www.vodafone.com/content/dam/sustainability/pdfs/vodafone_conflict_minerals_policy.pdf.

Section 1 Conflict Minerals Disclosures

In accordance with its policy, Vodafone has concluded that, during the 2013 calendar year, it has contracted to manufacture products containing conflict minerals and has determined that the use of these minerals is necessary to the functionality or production of these products.

In accordance with the Rule, Vodafone carried out a due diligence process, including a reasonable country of origin inquiry (**RCOI**), to determine whether the conflict minerals in its in-scope products (as defined below) were or were not DRC conflict free (as defined by the requirements of Form SD).

An analysis was conducted of procurement spend to identify those spend categories likely to include products that contain 3TG metals and whether such products were likely to be ones that Vodafone contracts to manufacture and are therefore covered by the Rule (**in-scope products**).

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form SD

Through this analysis, Vodafone identified three types of product-related spend categories that it considered likely to include in-scope products: (i) selected handsets; (ii) connected home devices (i.e. routers, modems, femto cells); and (iii) datacards (i.e. mobile broadband dongles). Vodafone then performed an analysis of individual purchase orders within these product-related spend categories to identify which were likely to include in-scope products.

Through this applicability assessment, Vodafone identified 53 in-scope products (including handsets, mobile broadband dongles, set-top boxes, femto cells and machine-to-machine (M2M) tracker devices)

that were purchased or technically accepted (the point at which Vodafone operating companies can begin ordering products from suppliers and selling them to customers) by the Company during the year ended 31 December 2013. These 53 in-scope products were sourced from 12 suppliers.

These in-scope suppliers were surveyed using the Conflict Minerals Reporting Template (the **CFSI Template**) developed by the Conflict Free Sourcing Initiative. Through the RCOI described above, all 12 (100%) of the suppliers of in-scope products have provided responses to the template.

Based on the RCOI, Vodafone is unable to determine that conflict minerals contained in in-scope products did not originate in covered countries (as defined in Form SD) and are not from recycled or scrap sources. Details of the due diligence activities performed are provided in the Conflict Minerals Report provided as an exhibit to this Form SD.

In accordance with the Rule, this Form SD and the associated Conflict Minerals Report have been made publicly available. See Vodafone's Group website: http://www.vodafone.com/content/index/investors/investor_information/press_regulatory/sec_filings.

Section 2 Exhibits

Exhibit 1.02 Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form SD.

Signature

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.
