This Report on Form 6-K contains a news release dated 11 November 2014 entitled Vodafone announces results for the six months ended 30 September 2014

Vodafone announces results for the six months ended 30 September 2014

11 November 2014

Highlights

- H1 Group revenue up 8.9% to £20.8 billion; organic service revenue down 2.8%* to £19.1 billion
- Q2 Group organic service revenue down 1.5%* compared to -4.2%* in Q1 due to improved commercial performance and reduced impact of mobile termination rate (MTR) cuts
- Improved service revenue performance in all key markets in Q2: Germany -3.4%*, Italy -9.7%*; UK -3.0%*, Spain -9.3%*, India 13.2%*; and Vodacom 0.3%*
- H1 EBITDA down 10%* to £5.9 billion; organic EBITDA margin down 2.1* percentage points; reported margin 28.4%
- Free cash flow² break even (£0.0 billion) reflecting Project Spring investments; total capex £3.9 billion, up £1.6 billion year-on-year
- Full year guidance: EBITDA now £11.6 billion to £11.9 billion, free cash flow remains positive. Guidance excludes Ono
- Additional £5.5 billion deferred tax assets recognised
- Net debt of £21.8 billion (or £18.6 billion including Verizon loan notes) including £5.8 billion in relation to Ono
- Interim dividend per share of 3.60 pence, up 2.0%

Six months ended 30 September 2014 £m	Reported %	Change	Organic* %

- Strong momentum on £19 billion Project Spring investment programme: mobile network deployment 40% complete; European 4G coverage up to 59%; 10.5 million 4G customers across the Group
- 16.1 million Vodafone Red customers; European contract base penetration 26%; ARPU dilution on Vodafone Red migrations continues to stabilise
- H1 Group data traffic up 77% year-on-year, accelerating to +80% in Q2, driven by 4G in Europe and 3G in India
- Unified communications capabilities strengthening: completion of Ono acquisition, ongoing integration of KDG, fibre build progress in Italy, Spain, Portugal and Ireland. Consumer launches announced in Netherlands and UK
- Fixed: 11.2 million broadband customers including 1.6 million from Ono; organic growth 0.2 million in Q2, fixed now represents 23.7% of service revenue in Europe
- Enterprise: strong performance in strategic segments: Q2 service revenue up 1%* in Vodafone Global Enterprise and 24%* in machine-to-machine

Vittorio Colao, Group Chief Executive, commented:

We have made encouraging progress during the quarter. There is growing evidence of stabilisation in a number of our European markets, supported by improvements in our commercial execution and very strong demand for data. Our two year, £19 billion investment programme is well underway, and customers are beginning to see the benefits: in wider 3G and 4G data coverage, improved voice quality and reliability, and increased access to next generation fixed line services. Customers are showing an increasing propensity to trade up to bigger data allowances as a result of the 4G experience. In India, growth has accelerated, stimulated by investment in our 3G network. Our unified communications strategy continues to advance, with accelerating customer growth, further progress on fibre deployment, and the ongoing integration of recent acquisitions.

Our markets continue to be highly competitive, and regulatory and macroeconomic risks remain. However, we are not yet half way through our investment programme, and there is still much more we will do to build a differentiated service for customers and improve perception. Today in Europe, only 6% of our customers are using 4G. In the next 18 months, we will reach 90% 4G coverage in Europe, giving us a great opportunity to increase penetration, stimulate data usage and grow customer spend. At the same time, we remain committed to shareholder returns, as the growth in the interim dividend demonstrates.

Notes:

* All amounts in this document marked with an * represent organic growth which presents performance on a comparable basis, both in terms of merger and acquisition activity and movements in foreign exchange rates. See page 38 for Use of non-GAAP financial information .

1 Adjusted operating profit has been redefined to exclude amortisation of customer bases and brand intangible assets of £637 million for the six months ended 30 September 2014 (2013: £125 million).

2 Free cash flow for the six months ended 30 September 2014 excludes £167 million of restructuring costs (2013: £107 million), a £365 million UK pensions contribution payment, £359 million of Verizon Wireless tax dividends received after the completion of the disposal, £328 million of interest paid on the settlement of the Piramal option, £116 million of KDG incentive scheme payments that vested upon acquisition and a £100 million (2013: £100 million) payment in respect of the Group's historic UK tax settlement.

3 Six months ended 30 September 2014 includes the recognition of £5,468 million of deferred tax assets in respect of tax losses in Luxembourg. Six months ended 30 September 2013 included the recognition of a deferred tax asset in respect of tax losses in Germany (£1,838 million) and Luxembourg (£16,069 million) and the estimated tax liability related to the rationalisation and reorganisation of our non-US assets prior to the disposal of our stake in Verizon Wireless (£3,016 million).

4 Adjusted earnings per share from continuing operations excludes the results and related tax charge of the Group's former investment in Verizon Wireless in the prior period and the recognition of deferred tax assets in both periods.

CHIEF EXECUTIVE'S STATEMENT

Financial review of the half year

The Group's emerging markets business continues to deliver strong organic growth, reflecting the combination of increasing demand for mobile voice and data services, with leading network quality and distribution reach, effective marketing strategies, and innovative services such as mobile money transfer. European market conditions remain challenging mainly due to continued competitive headwinds and the difficult macroeconomic conditions, leading to an overall fall in organic service revenue. However, signs of improvement in our commercial execution, a more stable competitive environment in some markets, and the early benefits of our Project Spring investment programme particularly in India, have led to a stabilisation of revenue quarter-on-quarter in several markets and an improved year-on-year revenue trend in the second quarter.

Group

Revenue for the first half fell 3.0%* to £20.8 billion. Group service revenue was £19.1 billion, reflecting a 2.8%* decrease on an organic basis comprising -4.2%* in Q1 and -1.5%* in Q2. Excluding the impact of MTR cuts, organic service revenue declined 2.9%* and 0.9%* respectively, with the improvement reflecting better trends in both our European and AMAP regions.

EBITDA fell 10.0%* to £5.9 billion. The Group EBITDA margin fell 0.9 percentage points to 28.4% (or -2.1* percentage points on an organic basis). This reduction reflected the impact of continued revenue declines in Europe, particularly in Spain, Germany and Italy, which offset broadly stable margins in AMAP.

Adjusted operating profit decreased to £1.8 billion from £2.5 billion in the prior period as higher reported EBITDA was offset by higher amortisation and depreciation, mainly due to the acquisition of KDG and the consolidation of Vodafone Italy.

The adjusted effective tax rate for the first half was 30.6% and includes the impact from foreign exchange losses. Excluding this impact the adjusted effective tax rate would be 29.5%. We recognised an additional deferred tax asset of £5.5 billion (2014: £14.9 billion) which takes our total deferred tax assets to £25.4 billion.

Adjusted earnings per share¹ of 2.63 pence fell 46.5% mainly reflecting the Group's lower adjusted operating profit over the period.

Free cash flow² was £0.0 billion, down £1.9 billion from the same period last year as lower payments for taxation were offset by lower dividends received from associates and investments and higher capital expenditure (£3.9 billion compared to £2.3 billion last year) associated with the Project Spring investment programme.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

Net debt as at 30 September 2014 was £21.8 billion, (or £18.6 billion taking into account the Verizon loan notes) compared to £13.7 billion at 31 March 2014. Net debt includes the impact of the acquisitions of Ono in July 2014 for £5.8 billion and Cobra Automotive in August 2014 for £0.2 billion.

The Board is recommending an interim dividend per share of 3.60 pence, up 2.0% year-on-year, in line with our intention to increase the full year dividend per share annually.

Europe

Service revenue declined 6.5%* in H1, reflecting ongoing pressures from competition, regulation and weak economies. However, trends are showing signs of stabilisation, with Q2 service revenue growth of -5.0%* (Q1: -7.9%) reflecting sequential improvements in almost all European markets.

Mobile service revenue declined 7.3%* (Q1: -9.0%*; Q2: -5.6%*). The main factors behind this improvement include the growth of our contract customer base over recent quarters (aided by lower churn), the benefits to ARPU of 4G and increased data usage, a more stable pricing environment in some markets, and a weak prior period.

Revenue from fixed services declined 2.5%* (Q1: -2.8%*; Q2: -2.1%*), with growth in Spain, Italy and Portugal offset by continued declines in Germany and the UK. KDG continued to grow strongly, driven in part by 108,000 broadband net additions. Fixed revenue in Europe now accounts for 23.7% of total service revenue (compared to 18.1% in the prior year).

Organic EBITDA fell 16.3%* and the EBITDA margin reduced to 28.3%, representing a decrease of 0.4 percentage points, or 3.0* percentage points on an organic basis. This reflects the decline in revenue, increased customer investment and the cost impact of Project Spring, partly offset by a reduction in other operating expenses.

AMAP

Organic service revenue in the AMAP region, which accounts for 30.5% of total service revenue, increased by 5.7%*, with continued strong growth in most markets. The region continues to benefit from strong customer growth, increased usage of voice and data services, and effective marketing and pricing strategies. In the first half the customer base increased by 11 million to 313 million, and voice and data usage increased 9% and 110% respectively. During the period the pace of service revenue growth improved from 4.7%* in Q1 to 6.8%* in Q2, particularly driven by India, Turkey and Egypt. The contribution from data services increased notably, with the number of data users up 29% compared to last year, to 103 million.

CHIEF EXECUTIVE'S STATEMENT

Organic EBITDA increased 5.3%* and the EBITDA margin was 30.2%. The EBITDA margin fell 0.3 percentage points on both a reported and organic basis, as increased operating costs from Project Spring and inflationary pressures offset the scale benefits of continued revenue growth.

Strategic and commercial progress

Project Spring

Our two year programme to invest £19 billion to accelerate and extend our network and service differentiation in our key markets is progressing well. We are on track to meet our planned network deployment targets, with 21,000 4G sites and 38,000 new high capacity backhaul sites, added since last September. As a result the 4G network in Europe now covers 59% of the population, up from 32% a year ago, and 82% of data sessions take place at speeds greater than 3 Mbps. Over the same period in India we added approximately 12,400 3G sites and now provide 3G coverage across 89% of targeted urban areas. In the fixed business we have also deployed high speed next generation network technology to pass a further 1.6 million households in Europe. In terms of customer service, 26% of the targeted 8,000 stores across the Group have been refurbished so far, and our investments in IT and digital platforms have helped to improve the customer experience and reduce call centre call volumes.

Our investment in the network is delivering clear improvements in network quality. Dropped call rates across Europe have reduced 0.19 percentage points year-on-year to 0.71% and the average call set up success rate improved from 98.8% to 99.7%. Independent network tests in 20 Vodafone European and AMAP markets show that we have the best or equal-best networks for 3G data in 15 markets and for voice in 18 markets.

Our Project Spring investment programme is also delivering further innovation and enhancement to services. High Definition voice technology, for exceptionally clear mobile calls, is now live in 15 markets; 4G carrier aggregation, which bonds together multiple spectrum blocks to increase mobile data speeds significantly is live in the UK, Spain, the Netherlands and the Czech Republic, and will be operational in more European markets by March 2015; and Voice over LTE (VoLTE), which reduces call set up times and provides more stable and high quality calls using 4G technology, is currently being trialled in several European markets. Innovation is also taking place in our fixed business. In Germany, for example, KDG, has started to deploy its high speed 200 Mbps cable broadband product as an addition to the standard 100 Mbps offer.

Consumer

The take-up of data services continues to grow, and data traffic growth on our networks is accelerating. We now have 165 million data users across the Group, driving a 77% year-on-year growth in data usage in H1 (59% in Europe and 110% in AMAP). In India alone we now have 57 million data users, of which 14 million are using 3G.

Our 10.5 million 4G customers across the Group use, on average, 2 to 3 times the amount of data as compared with 3G customers driven by the improved user experience offered by 4G data connections. As a result 4G now accounts for 21% of data traffic in our

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

European markets, compared to 16% a year ago. We continue to enhance our 4G propositions with a mixture of attractive music, sport and TV content to increase adoption and usage. We now have content deals in 10 markets and 4G customers that buy content services typically use significantly more data than those without bundled content.

Our Vodafone Red plans, which offer unlimited calls and texts combined with generous data allowances, are now used by 16.1 million customers, with 3.9 million added in H1. Our Vodafone Red plans account for around half of service revenue in the consumer contract segment in Europe and typically lead to both higher data and voice usage as compared to standard plans, and the ARPU dilution from customers migrating to Red plans continues to stabilise. During the last quarter we launched Vodafone Red across India, taking the number of Vodafone markets to 21. We also introduced Vodafone Red + plans, which enable several customers to share one large data plan across a number of devices, in the UK and New Zealand, with more markets to follow later in the year.

Our transition from a predominantly mobile company to a unified communications provider is well advanced. Our fixed broadband customer base grew to around 11.2 million (10.5 million in Europe) at the end of the period, including 1.6 million customers gained from the acquisition of Ono in Spain in July 2014, making us one of the largest fixed broadband providers in Europe. Fixed service revenue across the Group now accounts for 18.7% of total service revenue.

The process of integrating KDG in Germany and Ono in Spain remains on track. In Germany cross-selling of fixed and mobile services and joint marketing of integrated plans is underway, the migration of DSL customers to cable has begun, and network integration has commenced. In Spain cross-selling started in August, the migration of DSL customers to fibre has commenced, and from 1 September one common leadership team manages both the fixed and mobile businesses.

Our fibre deployment plans in Italy, Spain, Portugal and Ireland are progressing. We have recently launched a combined fixed broadband and TV service in the Netherlands, and are announcing today our plans to launch residential broadband services in the UK in Spring 2015, leveraging the infrastructure acquired with Cable & Wireless Worldwide (CWW). Taking into account our wholesale agreements we have access to fibre passing 42 million homes across Europe, representing 29% of households, of which 4.4 million households actively use our fibre services.

CHIEF EXECUTIVE'S STATEMENT

During the last quarter, we announced the acquisition of an additional 73% of the share capital of Hellas Online (HOL) for a total cash consideration of 72.7 million (£57 million), taking our interest to 91%. HOL is a leading provider of fixed broadband and telephony services in Greece and will accelerate our unified communications strategy in the Greek market. The transaction is expected to complete in the fourth quarter of the 2014 calendar year, following which Vodafone Greece will extend a mandatory takeover offer for the remaining shares in HOL. The purchase price implies an enterprise value for 100% of HOL of 311 million (£242 million).

We continue to drive adoption of a range of innovative consumer services to differentiate our offerings and deliver commercial benefits including incremental revenue and lower churn:

- Our money transfer service, M-Pesa, which operates principally in emerging markets, now serves 18.5 million active customers, up 16% on last year. During the period the M-Pesa product portfolio was enhanced with the introduction of our savings and loans proposition (M-Pawa), in partnership with the Commercial Bank of Africa, and our merchant proposition (Lipa Kwa M-Pesa), both in Tanzania.
- Our mobile payment service for European markets, Vodafone Wallet, expanded to the UK and Italy, taking the number of markets to five.
- Two million customers now take our mobile security services to protect against viruses and harmful websites in two markets Italy and Portugal.

Enterprise

In Enterprise we continue to focus on strategic growth areas, as corporate customers look to mobility to improve the productivity of their workforces and to enhance the value of services they provide to their own customers. Revenue at Vodafone Global Enterprise, which provides services to multinational companies, rose 1%* in Q2, supported by a number of significant contract wins including new services for British Gas, Aviva and Robert Bosch. In machine-to-machine, in which we are a global market leader, revenue growth was 24%*. The acquisition of Cobra Automotive Technologies, which was completed in August, expands our M2M capability beyond connectivity and significantly strengthens our telematics and application services capabilities.

We are also executing on our plans to become a key unified communications provider to businesses. 24% of our Enterprise service revenue in Europe is now from fixed line, as we invest in and enhance the platforms acquired with CWW to take services such as Cloud & Hosting and IP-VPN into new geographical markets. Vodafone One Net, our cloud-based integrated fixed and mobile platform for small and medium sized companies, is now used by 3.6 million customers, representing an increase of 11% year-on-year.

Organisational efficiency

We continue to use the benefits of our global reach and scale to standardise and simplify the way we do business to both improve our cost efficiency and improve customer service. We continue to centralise procurement within the Group; 15,000 employees work in lower cost shared service centres, as compared to 13,500 in March 2014; and the number of customers now using our MyVodafone mobile self-care app increased by 68% to 9.8 million, which helps to reduce calls made to call centres and in turn customer care costs.

Outlook and guidance³

The overall performance of the Group in the first half of the current financial year has been in line with our expectations. Competitive, macroeconomic and regulatory pressures, particularly in Europe, continue. However, we are seeing some signs of stabilisation in our commercial performance and operating trends, and some markets are beginning to demonstrate the early benefits of our Project Spring investment programme.

We anticipate that our investments will begin to translate into further improvements in network performance and customer perception over the coming quarters. In the medium term, this will become more consistently evident in key operational metrics such as churn and ARPU; and subsequently into revenue, profitability and cash flow.

We now expect EBITDA for the 2015 financial year to be in the range of £11.6 billion to £11.9 billion, and free cash flow to be positive, after all capex. Guidance excludes Ono.

Notes:

* All amounts in this document marked with an * represent organic growth which presents performance on a comparable basis, both in terms of merger and acquisition activity and movements in foreign exchange rates.

1 Adjusted earnings per share from continuing operations excludes the results and related tax charge of the Group's former investment in Verizon Wireless in the prior period and the recognition of deferred tax assets in both periods.

2 Free cash flow for the six months ended 30 September 2014 excludes £167 million of restructuring costs (2013: £107 million), a £365 million UK pensions contribution payment, £359 million of Verizon Wireless tax dividends received after the completion of the disposal, £328 million of interest paid on the settlement of the Piramal option, £116 million of KDG incentive scheme payments that vested upon acquisition and a £100 million (2013: £100 million) payment in respect of the Group's historic UK tax settlement.

1 Statutory basis prepared in accordance with IFRS accounting principles, including the results of the Group's joint ventures using the equity accounting basis and the profit contribution from Verizon Wireless to 2 September 2013 as discontinued operations.

2 Six months ended 30 September 2014 includes the recognition of £5,468 million of deferred tax assets in respect of tax losses in Luxembourg. Six months ended 30 September 2013 included the recognition of a deferred tax asset in respect of tax losses in Germany (£1,838 million) and Luxembourg (£16,069 million) and the estimated tax liability related to the rationalisation and reorganisation of our non-US assets prior to the disposal of our stake in Verizon Wireless (£3,016 million).

3 See page 38 for Use of non-GAAP financial information and page 45 for Definition of terms .

4 Adjusted operating profit has been redefined to exclude amortisation of customer bases and brand intangible assets of £637 million for the six months ended 30 September 2014 (2013: £125 million).

5 The adjusted effective tax rate for the six months ended 30 September 2013 has been restated to exclude the results and related tax expense of Verizon Wireless and to show the adjusted tax rate as calculated on the same basis as the current year.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

6 Adjusted earnings per share from continuing operations excludes the results and related tax charge of the Group's former investment in Verizon Wireless in the prior period and the recognition of deferred tax assets in both periods.

7 Free cash flow for the six months ended 30 September 2014 excludes £167 million of restructuring costs (2013: £107 million), a £365 million UK pensions contribution payment, £359 million of Verizon Wireless tax dividends received after the completion of the disposal, £328 million of interest paid on the settlement of the Piramal option, £116 million of KDG incentive scheme payments that vested upon acquisition and a £100 million (2013: £100 million) payment in respect of the Group's historic UK tax settlement.

GUIDANCE

Please see page 38 for Non-GAAP financial information , page 45 for Definitions of terms and page 46 for Forward-looking statements .

2015 financial year guidance

	Original guidance £bn	Updated guidance £bn
EBITDA	11.4-11.9	11.6-11.9
Free cash flow	Positive	Positive

We now expect EBITDA to be in the range of £11.6 billion to £11.9 billion. We expect free cash flow to be positive after all capex, before the impact of M&A, spectrum purchases and restructuring costs. Total capex over the two years to March 2016 is expected to be around £19 billion, after which we anticipate capital intensity normalising to a level of 13-14% of annual revenue. Guidance excludes Ono.

Assumptions

We have based guidance for the 2015 financial year on our current assessment of the global macroeconomic outlook and assume foreign exchange rates of £1: 1.21, £1:INR 105.8 and £1:ZAR 18.4. It excludes the impact of licences and spectrum purchases, material one-off tax-related payments, restructuring costs and any fundamental structural change to the Eurozone. It also assumes no material change to the current structure of the Group.

Actual foreign exchange rates may vary from the foreign exchange rate assumptions used. A 1% change in the euro to sterling exchange rate would impact EBITDA by £60 million and have no material impact on free cash flow. A 1% change in the Indian Rupee to sterling exchange rate would impact EBITDA by £10 million and free cash flow by £5 million. A 1% change in the South African Rand to sterling exchange rate would impact EBITDA by £15 million and free cash flow by £5 million.

FINANCIAL RESULTS

Revenue

Group revenue increased by 8.9% to £20.8 billion and service revenue increased 9.2% to £19.1 billion. Reported growth rates reflect the acquisitions of Kabel Deutschland (KDG) in October 2013 and of Grupo Corporativo Ono, S.A. (Ono) in July 2014, as well as the consolidation of Italy after we increased our ownership to 100% in February 2014.

In Europe, service revenue declined by 6.5%* as growing demand for 4G and data services continues to be offset by challenging competitive and macroeconomic pressures and the impact of MTR cuts.

In AMAP, service revenues increased by 5.7%* driven by continued strong growth in India, Turkey, Ghana and Qatar, good growth in Vodacom and Egypt, partially offset by declines in New Zealand.

EBITDA and operating profit

Group EBITDA increased 5.5% to £5.9 billion primarily driven by higher revenue partly offset by higher operating costs. On an organic basis, EBITDA fell 10.0%* and the Group's EBITDA margin fell 0.9 percentage points to 28.4% (or -2.1* percentage points on an organic basis), reflecting the impact of continued revenue declines in Europe, which offset broadly stable margins in AMAP.

Operating profit decreased to £0.9 billion from £2.2 billion in the prior period as higher EBITDA was offset by higher amortisation and depreciation, mainly due to the acquisition of KDG and the consolidation of Vodafone Italy.

Discontinued operations

On 2 September 2013 the Group announced it had reached an agreement with Verizon Communications Inc. to dispose of its US group whose principal asset was its 45% interest in Verizon Wireless. The Group ceased recognising its share of results in Verizon Wireless on 2 September 2013, and classified its investment as a held for sale asset and the results as a discontinued operation. The transaction completed on 21 February 2014.

Net financing costs

	Six months ended 30 September	
	2014	2013
	£m	£m
		

Note:

1 Comprises foreign exchange rate differences reflected in the income statement in relation to certain intercompany balances.

Net financing costs before interest on settlement of tax issues increased by 24% primarily due to recognition of net foreign exchange losses and net mark-to-market losses offset by the impact of lower average net debt levels following the disposal of the Group's investment in Verizon Wireless and the acquisition of Ono.

FINANCIAL RESULTS

Taxation

Six months ended 30 September	
2014	2013
£m	£m

Note:

1 See Earnings per share on page 11.

The adjusted effective tax rate for the six months ended 30 September 2014 was 30.6%. The rate is higher than expected due to the impact from foreign exchange losses for which we are unable to take a tax deduction. Excluding this impact the adjusted effective tax rate would be 29.5%. This is in line with our expectation for the year and our tax rate is expected to remain in the high twenties over the medium term.

This tax rate does not include the impact of the recognition of an additional £3,341 million deferred tax asset in respect of the Group's historic tax losses in Luxembourg. The losses have been recognised as a consequence of the financing arrangements for the acquisition of Ono. The rate also excludes the use of Luxembourg losses in the half year (£272 million) and an additional asset in the year of £2,127 million arising from the revaluation of investments based upon the local GAAP financial statements.

The adjusted effective tax rate for the six months ended 30 September 2013 has been restated to exclude the results and related tax expense of Verizon Wireless and to show the adjusted tax rate as calculated on the same basis as the current year. The rate excludes the recognition of an additional deferred tax asset in respect of the Group's historic tax losses in Germany of

£1,838 million (year ended 31 March 2014: £1,916 million) and Luxembourg of £16,069 million (year ended 31 March 2014: £17,402 million), the estimated US tax liability of £3,016 million (year ended 31 March 2014: £2,210 million) relating to the rationalisation and reorganisation of our non-US assets prior to the disposal of our interest in Verizon Wireless and excludes the use of Luxembourg losses in the half year (£232 million).

FINANCIAL RESULTS

Earnings per share

Adjusted earnings per share from continuing operations, which excludes the results and related tax charge of the Group's former investment in Verizon Wireless in the prior period and the recognition of deferred tax assets in both periods, was 2.63 pence, a decrease of 46.5% year-on-year, reflecting the Group's lower adjusted operating profit over the same period.

Basic earnings per share decreased to 20.48 pence (2013: 67.73 pence) due to the prior period impact of the disposal of the Group's investment in Verizon Wireless and the recognition of a higher deferred tax assets in the prior period compared to the current period, as described above, both of which have been excluded from adjusted earnings per share.

Notes:

- 1 Six months ended 30 September 2014 includes the recognition of £5,468 million of deferred tax assets in respect of tax losses in Luxembourg. Six months ended 30 September 2013 includes the recognition of a deferred tax asset in respect of tax losses in Germany (£1,838 million) and Luxembourg (£16,069 million) and the estimated tax liability related to the rationalisation and reorganisation of our non-US assets prior to the disposal of our stake in Verizon Wireless (£3,016 million).
- 2 Discontinued operations represent the results and related tax charge of our US group whose principal asset was its 45% interest in Verizon Wireless, the disposal of which was announced on 2 September 2013 and completed on 21 February 2014.
- 3

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

On 19 February 2014, we announced a 6 for 11 share consolidation effective on 24 February 2014. This had the effect of reducing the number of shares in issue from 52,821,751,216 ordinary shares (including 4,351,833,492 ordinary shares held in Treasury) as at the close of business on 18 February 2014 to 28,811,864,298 new ordinary shares in issue immediately after the share consolidation on 24 February 2014. Prior year comparatives have been restated.

FINANCIAL RESULTS

Revenue increased 18.6%. M&A activity, including KDG, Ono and the consolidation of Vodafone Italy, contributed a 31.0 percentage point positive impact, while foreign exchange rate movements contributed a 5.3 percentage point negative impact. On an organic basis service revenue declined 6.5%*, driven primarily by a challenging operating environment in many markets, continued competition and the impact of MTR cuts.

EBITDA increased 17.1%, including a 39.1 percentage point positive impact from M&A activity and a 5.7 percentage point adverse impact from foreign exchange rate movements. On an organic basis EBITDA decreased 16.3%*, resulting from a reduction in organic service revenue in most markets, partially offset by increased cost efficiencies.

Note:

* All amounts in this document marked with an * represent organic growth which presents performance on a comparable basis, both in terms of merger and acquisition activity and movements in foreign exchange rates. See page 38 for Use of non-GAAP financial information .

Germany

Service revenue in H1 decreased 4.2%* excluding KDG, but increased quarter-on-quarter in local currency.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

Mobile service revenue declined 4.6%* due mainly to the impact of price reductions implemented in the previous year. However, ARPU continued to stabilise quarter-on-quarter. The contract customer base continued to grow, driven by improved commercial performance and continued focus on Vodafone Red and 4G where we had over 3.8 million customers and 2.3 million customers respectively at 30 September 2014. The roll-out of 4G services continued with a focus on urban areas, with overall outdoor population coverage of 71% as at 30 September 2014, and we continued to make significant further improvements to our voice and data networks.

Fixed line revenue decreased 2.9%* excluding KDG. KDG maintained its strong growth and contributed £752 million to service revenue and £338 million to EBITDA.

EBITDA declined 16.4%*, with a 4.5* percentage point decline in EBITDA margin, driven by lower service revenue and a higher level of customer investment.

Italy

Service revenue decreased 13.0%* as improving trends in both mobile and fixed line, led by higher prices and improvements in the enterprise segment, were offset by the continuing effects of last year's summer prepaid price war, the difficult macroeconomic environment, and the negative impact of MTR cuts effective from July 2013.

Mobile service revenue declined 15.4%* due to the lower prepaid customer base and lower ARPU following last year's price cuts. Although there has been some recovery in prices, the consumer mobile market remains very competitive. Enterprise continued its strong commercial performance, with service revenue close to flat in Q2. Customer take-up of Vodafone Red, which had over 1.5 million customers at 30 September 2014, has continued to increase, leading to improved churn in the contract segment. 4G outdoor population coverage reached 64% at 30 September 2014.

Fixed line revenue grew 1.7%*, with continued broadband revenue growth, supported by further broadband customer additions, partially offset by declining fixed line voice usage. Vodafone Italy now offers fibre services in 8 cities and is continuing to progress on its own fibre build plans, with around 600 street cabinets connected to Vodafone fibre at 30 September 2014.

FINANCIAL RESULTS

EBITDA declined 21.7%*, with a 3.5%* percentage point decline in EBITDA margin. The impact of lower service revenue was only partially offset by lower direct costs and customer investment, and strong efficiency improvements delivered on operating expenses, which fell 3.1%*.

UK

Service revenue decreased 3.1%* as consumer service revenue growth was offset by declines in fixed line and enterprise.

Mobile service revenue declined 0.5%*. We delivered strong growth in the consumer contract segment due to positive contract customer additions, continued good traction for ARPU accretive 4G plans bundled with content, and increased customer take-up of Vodafone Red plans, which was offset by pricing pressures in the fixed and enterprise segments. The roll-out of 4G services continued, with outdoor population coverage reaching over 48% and nearly 1.4 million 4G customers as at 30 September 2014.

Organic fixed line revenue (which includes the UK portion of CWW and carrier services) decreased 10.4%* as a result of low conversion of the sales pipeline and lower fixed termination rates. The sales pipeline continues to grow, supporting future revenue trends.

During the period we acquired 139 Phones 4U stores which will all be rebranded as Vodafone stores in November 2014 and signed a new multi-year distribution agreement with Dixons Carphone.

EBITDA declined 8.1%*, with a 0.9* percentage point decline in the EBITDA margin, driven by the lower service revenue and higher customer investment.

Spain

Service revenue decreased 12.4%* excluding Ono as a result of continued intense convergence price competition, macroeconomic pressure and an MTR cut from July 2013.

Mobile service revenue declined 14.8%* as a result of price reductions, a change in mix towards mid-tier handsets and increased SIM-only take-up. New tariffs with content have been launched to stabilize the ARPU trend in recent quarters. Despite the competitive environment, we continued to reduce customer churn as a result of an improved customer experience and the continued take-up of Vodafone Red plans, with over 1.8 million customers at 30 September 2014. In Q2, we achieved contract net

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

additions growth for the first time in 3 years. We had over 1.7 million 4G customers as at 30 September 2014, with overall 4G outdoor population coverage of 63%.

Fixed line revenue grew 10.1%* excluding Ono, supported by strong net broadband customer additions. We now have more than 0.8 million homes covered by our joint fibre network with Orange. Following the acquisition of Ono on 23 July 2014, Ono contributed £199 million to service revenue and £86 million to EBITDA. The integration of Vodafone Spain and Ono continues to progress with the cross-selling of products already underway.

EBITDA declined 43.0%*, with a 7.8* percentage point decline in EBITDA margin, driven by lower service revenue, partially offset by lower direct costs and customer investment as well as lower operating expenses, which fell 2.9%*.

Other Europe

Service revenue declined 3.2%* due to price competition, the challenging macroeconomic environment and MTR cuts. Service revenue declined 2.2%*, 4.0%* and 4.7%* in the Netherlands, Portugal and Greece respectively. However, in every market apart from Portugal and Malta, the service revenue trend improved in Q2 from Q1. In the Netherlands, we now have nationwide 4G coverage, continue to grow the mobile contract base, and ARPU is stabilizing. In Portugal mobile service revenue continues to decline due to intense converged price competition while, in fixed line, revenue continues to grow, and we now have 1.2m households connected with fibre. In Greece the revenue trend is improving due to customer base growth and ARPU stabilisation.

EBITDA declined 4.2%*, with a 0.3* percentage point increase in EBITDA margin, driven by lower revenues, partially offset by lower direct costs, customer investment and operating expenses.

FINANCIAL RESULTS

Revenue declined 7.2% as a result of a 13.7 percentage point adverse impact from foreign exchange rate movements, particularly with regards to the Indian rupee, the South African rand and the Turkish lira. On an organic basis service revenue grew 5.7%* driven by a higher customer base, increased customer voice usage and demand for data and strong commercial execution, partially offset by the impact of MTR reductions.

EBITDA decreased 8.2%, including a 13.2 percentage point adverse impact from foreign exchange rate movements. On an organic basis, EBITDA grew 5.3%* driven by strong growth in India, Turkey, Qatar and Ghana, and an improved performance in Egypt.

Note:

* All amounts in this document marked with an * represent organic growth which presents performance on a comparable basis, both in terms of merger and acquisition activity and movements in foreign exchange rates. See page 38 for Use of non-GAAP financial information .

India

Service revenue increased 11.7%*, driven by continued customer growth, strong data usage and improved voice pricing. Mobile customers increased by 7.3 million during the first half of the financial year giving a closing customer base of 173.8 million at 30 September 2014.

Data usage grew 94.6%, primarily driven by mobile internet customer growth. At 30 September 2014 active data customers totalled 57.2 million, including 13.6 million 3G customers and 33.9 million smartphone users representing 19.5% penetration of the total customer base.

We continue to make good progress on several key initiatives. We have accelerated our Project Spring investment programme, with 3,145 3G sites added in Q2 (Q1: 2,305), taking 3G coverage in targeted urban areas to 89%. Vodafone Red was launched in India in August, attracting some 163,000 customers by the end of September. M-Pesa continues to expand rapidly, with over 79,000 sales agents and 2.1 million registered customers (Q1: 1.5 million), of which approximately 370,000 are active.

EBITDA grew 11.9%*, with EBITDA margins remaining stable, as higher service revenue and resulting economies of scale on costs were offset by higher acquisition costs.

Vodacom

Service revenue increased 0.2%* as growth in Vodacom's mobile operations outside South Africa were offset by the negative impact of MTR cuts in South Africa.

In South Africa, organic service revenue decreased 1.3%* as strong growth in data revenue of 21.6%* driven by higher active data customers and smartphone penetration was offset by intensifying price competition and a 4.2 percentage point negative impact of an MTR cut which took effect from 1 April 2014. We relaunched M-Pesa in South Africa in August with a segmented proposition offer.

Vodacom's mobile operations outside of South Africa delivered service revenue growth of 6.2%* mainly from continued customer base growth as we continue to invest in expanding our data and voice networks. M-Pesa continued to perform well across all of Vodacom's mobile operations outside of South Africa, with over 5 million customers actively using the service.

EBITDA declined 2.7%* with a 1.3* percentage point decrease in EBITDA margin, driven by the reduced MTRs, weaker currency and increased customer investment.

FINANCIAL RESULTS

On 14 April 2014, Vodacom announced the acquisition of the Vodacom customer base from Nashua Mobile, a mobile cellular service provider for South African mobile network operators. The transaction was approved by the Competition Commission on 29 September 2014. Customer migration will commence by the end of the 2014 calendar year.

We aim to complete the acquisition of Neotel by the end of the 2015 financial year, subject to regulatory approval.

Other AMAP

Service revenue increased 5.1%*, with growth in Turkey, Egypt, Qatar and Ghana which was partially offset by a decline in New Zealand.

Service revenue in Turkey increased 7.1%* reflecting continued strong growth in consumer contract and enterprise revenue, including higher ARPU and data usage, partly offset by a negative impact from voice and SMS MTR cuts. As at 30 September 2014 the total customer base in Turkey was 20.6 million, with continued acceleration in net additions largely driven by contract, Vodafone Red and higher smartphone penetration.

In Egypt service revenue increased 1.7%* as a result of an increase in data and voice usage and a more stable economic environment. Revenue increased 23.7%* in Qatar due to continued net customer additions and the success of segmented commercial offers. In Ghana, service revenue grew 19.1%*, driven by an increase in customers, higher data usage and re-pricing to mitigate the impact of the deteriorating economy.

EBITDA grew 9.8%* with a 0.6* percentage point improvement in EBITDA margin due to higher service revenue, the resulting economies of scale on costs and more efficient customer investment.

Notes:

- 1 Cash generated by operations, operating free cash flow and free cash flow have been redefined to exclude restructuring costs for the six months ended 30 September 2014 of £167 million (2013: £107 million). See also note 4 below.
- 2 Cash capital expenditure comprises the purchase of property, plant and equipment and intangible assets, other than licence and spectrum payments, during the period.
- 3 Acquisitions and disposals for the six months ended 30 September 2014 primarily includes a £2,945 million payment in relation to the acquisition of the entire share capital of Ono plus £2,858 million of associated net debt acquired, a £563 million payment in relation to the acquisition of the remaining 10.97% equity interest in Vodafone India and £131 million payment in relation to acquisition of the entire share capital of Cobra plus £40 million of associated debt acquired.
- 4 Other cash flows for the six months ended 30 September 2014 include £167 million of restructuring costs (2013: £107 million), a £365 million UK pensions contribution payment, £359 million of Verizon Wireless tax dividends received after the completion of the disposal, £328 million of interest paid on the settlement of the Piramal option, £116 million of KDG incentive scheme payments that vested on acquisition and a £100 million (2013: £100 million) payment in respect of the Group's historic UK tax settlement.

Cash generated by operations decreased by 12.9% to £4.9 billion, primarily driven by working capital movements which more than offset the higher EBITDA.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

Free cash flow decreased to £1 million compared to £1.9 billion in the prior period as lower payments for taxation were offset by higher cash capital expenditure and lower dividends received from associates and investments.

Capital expenditure increased £1.6 billion to £3.9 billion primarily driven by investments in the Group's networks as a result of Project Spring.

Payments for taxation decreased 72.0% to £0.4 billion and dividends received from associates and investments decreased £1.3 billion to £0.1 billion primarily as a result of the Group's disposal of its 45% interest in Verizon Wireless.

A foreign exchange gain of £0.8 billion was recognised on net debt due to favourable exchange rate movements resulting primarily from the weakening of the Euro and the Indian Rupee against Sterling.

LIQUIDITY AND CAPITAL RESOURCES

	4,894	
	(21,832)	

Notes:

- At 30 September 2014 US\$3,311 million was drawn under the US commercial paper programme and 1,953 million was drawn under the euro commercial paper programme.
- At 30 September 2014 the amount includes £1,476 million (31 March 2014: £1,185 million) in relation to cash received under collateral support agreements.
- Comprises mark-to-market adjustments on derivative financial instruments which are included as a component of trade and other receivables (30 September 2014: £2,798 million; 31 March 2014: £2,443 million) and trade and other payables (30 September 2014: £726 million; 31 March 2014: £881 million) and short-term investments primarily in index linked government bonds and a managed investment fund included as a component of other investments (30 September 2014; £2,822 million, 31 March 2014: £3,805 million).

The following table sets out the Group's undrawn committed bank facilities:

Maturity	30 September 2014 £m
	2,617
	3,006
	798
	6,421

Notes:

- Both facilities support US and euro commercial paper programmes of up to US\$15 billion and £5.0 billion, respectively.
- US\$155 million of this facility matures March 2016.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The Group's £3,562 million of commercial paper due to mature within one year is covered 1.8 times by £6,421 million in undrawn committed facilities. In addition, the Group has historically generated significant amounts of free cash flow which has been allocated to pay dividends, repay maturing borrowings and pay for discretionary spending.

The Group has a 30 billion euro medium-term note (EMTN) programme and a US shelf registration programme which are used to meet medium to long-term funding requirements. At 30 September 2014 the total amounts in issue under these programmes split by currency were US\$14.6 billion, 7.8 billion and £1.7 billion.

At 30 September 2014 the Group had bonds outstanding with a nominal value of £17.3 billion (31 March 2014: £17.0 billion). During the six months ended 30 September 2014 the Group issued a 1.75 billion bond which matures in September 2020 and a 1.0 billion bond that matures in September 2025.

Dividends

The directors have announced an interim dividend per share of 3.60 pence, representing a 2.0% increase over the prior financial year's interim dividend. The ex-dividend date for the interim dividend is 20 November 2014 for ordinary shareholders, the record date is 21 November 2014 and the dividend is payable on 4 February 2015. Dividend payments on ordinary shares will be paid directly into a nominated bank or building society account.

RISK FACTORS

There are a number of key factors and uncertainties that could have a significant effect on the Group's financial performance, including the following:

Network or IT systems failure

Major failures of, or malicious attacks on, our network or IT systems may result in service interruption and consequential customer and revenue loss.

Failure to protect customer information

We host increasing quantities and types of customer data in both our enterprise and consumer segments, and any failure to protect adequately this data could affect our reputation or lead to legal action.

Competition

We operate in an increasingly competitive environment, where all operators are looking to secure a growing share of the potential customer base. This may lead to lower future revenues and profitability.

Regulation

We are required to comply with an extensive range of regulatory requirements including the licensing, construction and operation of our networks and services. To the extent that we need to commit significant expenditure and resources to maintain such compliance, our business, financial condition and results of operation could be materially and adversely affected.

Converged and over-the-top (OTT) services

Several of our competitors offer converged services that we may not be able to replicate or provide at similar price points. Furthermore, recent advances in smartphone technology have been more focused on the type and quality of applications, operating systems and devices being offered, rather than the quality of services provided by operators. To the extent that consumers may in the future prefer to use applications and services offered by our competitors over those that we offer, notwithstanding the quality of our services, our revenues could be materially and adversely affected.

Weak economic conditions

Economic conditions in many markets, especially in Europe, continue to stagnate or show nominal levels of growth. Some markets remain impacted by austerity measures which could affect disposable incomes and may result in customers moving to lower-priced plans or giving up their mobile devices.

Health risks

Concerns have been expressed that the electromagnetic signals emitted by mobile handsets and base stations may pose health risks. While authorities, including the World Health Organization (WHO), agree that there is no convincing evidence that exposure to radio frequency fields from mobile devices and base stations operated within guideline limits will result in any adverse health effects, such concerns, to the extent that they result in unfavourable press coverage or affect public perception of our services in the markets in which we operate, could result in material adverse effects on our business, financial condition, results of operations and prospects.

Integration of acquired businesses

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The consideration that we pay for businesses that we acquire is based upon current and future expected cash flows that are expected to be generated from benefits and synergies resulting from being part of the Vodafone Group. If market conditions negatively impact the Group's future expected cash flows, or if we fail to deliver any expected integration benefits and synergies, then there may be an impairment of the carrying value of the acquired business.

Key suppliers

We depend on a limited number of suppliers for strategically important network and IT infrastructure and associated support services to operate and upgrade our networks and provide key services to our customers. Our operations could be materially and adversely impacted by the failure of any of our key suppliers.

Tax disputes

We operate in many jurisdictions around the world and have from time to time been involved in disputes with tax authorities on the amount of tax due. For example, we are currently involved in an ongoing tax dispute in India, where the Indian Government has introduced retrospective legislation that overturns a decision by the India Supreme Court which would have avoided adverse tax consequences for the Group.

Impairment assumptions

Any future revisions to the assumptions used in assessing the recoverability of goodwill, including discount rates, estimated future cash flows or anticipated changes in operations, could lead to the impairment of certain Group assets.

Currency related risks

The Group is subject to a range of currency risks primarily related to its operations in Europe, India and South Africa. In Europe, the Group faces a number of operational and financial risks resulting from the challenging economic conditions and we continue to review our policies and procedures to minimise the Group's economic exposure and to preserve our ability to operate in a range of potential conditions that may exist in the future. The main potential short-term financial statement impact of the current economic uncertainties is the potential impairment of non-financial and financial assets. We have performed impairment testing for each country in Europe as at 30 September 2014 and did not identify any required impairment changes. The significant areas of additional risk for the Group are investment risk, particularly in relation to the management of the counterparties holding our cash and liquid investments; trading risks primarily in relation to procurement and related contractual matters; and business continuity risks focused on cash management in the event of disruption to banking systems.

Further information in relation to these risk factors and uncertainties, which have not changed materially since 31 March 2014, can be found on pages 46 to 47 and on pages 196 to 200 of the Group's annual report for the year ended 31 March 2014, which is available at Vodafone.com/investor.

RESPONSIBILITY STATEMENT

We confirm that to the best of our knowledge:

- the unaudited condensed consolidated financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting ; and
- the interim management report includes a fair review of the information required by Disclosure and Transparency Rule 4.2.7R and Disclosure and Transparency Rule 4.2.8R.

Neither the Company nor the directors accept any liability to any person in relation to the half-year financial report except to the extent that such liability could arise under English law. Accordingly, any liability to a person who has demonstrated reliance on any untrue or misleading statement or omission shall be determined in accordance with section 90A and schedule 10A of the Financial Services and Markets Act 2000.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

1 Basis of preparation

The unaudited condensed consolidated financial statements for the six months ended 30 September 2014:

- were prepared in accordance with International Accounting Standard 34 Interim Financial Reporting (IAS 34);
- are presented on a condensed basis as permitted by IAS 34 and therefore do not include all disclosures that would otherwise be required in a full set of financial statements and should be read in conjunction with the Group s annual report for the year ended 31 March 2014;
- apply the same accounting policies, presentation and methods of calculation as those followed in the preparation of the Group s consolidated financial statements for the year ended 31 March 2014, which were prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board and were also prepared in accordance with IFRS adopted by the European Union (EU), the Companies Act 2006 and Article 4 of the EU IAS Regulations. Income taxes are accrued using the tax rate that is expected to be applicable for the full financial year, adjusted for certain discrete items which occurred in the interim period in accordance with IAS 34.
- include all adjustments, consisting of normal recurring adjustments, necessary for a fair statement of the results for the periods presented;
- do not constitute statutory accounts within the meaning of section 434(3) of the Companies Act 2006; and
- were approved by the Board of directors on 11 November 2014.

The information relating to the year ended 31 March 2014 is an extract from the Group s published annual report for that year, which has been delivered to the Registrar of Companies, and on which the auditors report was unqualified and did not contain any emphasis of matter or statements under section 498(2) or 498(3) of the UK Companies Act 2006.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

After reviewing the Group's budget for the remainder of the financial year, and longer term plans, the directors are satisfied that, at the time of approving the unaudited condensed consolidated financial statements, it is appropriate to continue to adopt a going concern basis of accounting.

The preparation of the condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the end of the reporting period, and the reported amounts of revenue and expenses during the reporting period. Actual results could vary from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

On 1 April 2014, the Group adopted certain new accounting policies where necessary to comply with amendments to IFRS, none of which had a material impact on the consolidated results, financial position or cash flows of the Group; further details are provided in the Group's annual report for the year ended 31 March 2014.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

2 Segmental analysis

The Group has a single group of related services and products being the supply of communications services and products. Revenue is attributed to a country or region based on the location of the Group company reporting the revenue.

Note:

1. The 'Other' segment primarily represents the results of partner markets and the net result of unallocated central Group costs.
2. Discontinued operations comprise our US group whose principal asset was a 45% interest in Verizon Wireless, which was sold on 21 February 2014. Refer to note 5 'Discontinued operations' for further details.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

3. During the year ended 31 March 2014 the Group changed its organisational structure, merging its Northern and Central Europe and Southern Europe regions into one Europe region and moved its Turkish operating company into the AMAP region given its emerging market characteristics. The table above presents prior year segmental information on this revised basis.

The Group's measure of segment profit, EBITDA, excludes depreciation, amortisation and loss on disposal of fixed assets and the Group's share of results in associates and joint ventures. A reconciliation of EBITDA to operating profit is shown below. For a reconciliation of operating profit to profit for the financial period, see the consolidated income statement on page 22.

	(37)
	(118)
	917

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

3 Impairment review

Impairment testing was performed as at 30 September 2014 and 30 September 2013. No impairment charge was recognised for the six months ended 30 September 2014 or for the six months ended 30 September 2013. The methodology adopted for impairment testing for the six months ended 30 September 2014 was consistent with that disclosed on page 106 and pages 114 to 117 of the Group's annual report for the year ended 31 March 2014.

The recoverable amounts of the Group's operations in Germany, Italy and Spain are not materially greater than their reported carrying value at 30 September 2014. Any adverse change in a key assumption underpinning the value in use calculation may, therefore, cause impairment losses to be recognised. The table below shows the key assumptions used in the value in use calculations at 30 September 2014.

	Assumptions used in value in use calculation					
	Germany		Italy		Spain ¹	
	%		%		%	
Pre-tax risk adjusted discount rate	7.8		10.6		10.0	
Long-term growth rate	0.5		1.0		1.9	
Budgeted EBITDA ²	2.7		(2.2)		(0.7)	
Budgeted capital expenditure ³	12.5	21.7	11.1	25.5	9.0	23.5

The changes in the following table to assumptions used in the impairment review would, in isolation, lead to an impairment loss being recognised for the six months ended 30 September 2014:

	Germany		Italy		Spain ¹	
	Increase 2pps	Decrease 2pps	Increase 2pps	Decrease 2pps	Increase 2pps	Decrease 2pps
	£bn	£bn	£bn	£bn	£bn	£bn
Pre-tax risk adjusted discount rate	(5.3)	-	(1.1)	-	(0.7)	-
Long-term growth rate	-	(4.9)	-	(1.0)	-	(0.6)
Budgeted EBITDA ²	-	(0.6)	-	(0.1)	-	-
Budgeted capital expenditure ⁴	(2.3)	-	-	-	(0.5)	-

Notes:

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

1. Excludes Grupo Corporativo Ono, S.A. acquired on 23 July 2014 (see note 8 for further details).
2. Budgeted EBITDA is expressed as the compound annual growth rates in the initial five years of the plans used for impairment testing.
3. Budgeted capital expenditure, which excludes licences and spectrum, is expressed as the range of capital expenditure as a percentage of revenue in the initial five years for all cash generating units of the plans used for impairment testing.
4. Budgeted capital expenditure, which excludes licences and spectrum, is expressed as a percentage of revenue in the initial five years of the plans used for impairment testing.

The recoverable amounts of the Group's operations in Czech Republic, Greece, Portugal and Romania are also not materially greater than their reported carrying value at 30 September 2014.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

4 Taxation

	Six months ended 30 September	
	2014	2013
	£m	£m
Overseas current tax expense/(credit):		
Current year	359	497
Adjustments in respect of prior years	(11)	(54)
United Kingdom corporation tax expense:1		
Current year	-	5
Adjustments in respect of prior years	-	13
Total current tax expense	348	461
Deferred tax on origination and reversal of temporary differences:		
Overseas deferred tax	(5,440)	(14,823)
United Kingdom deferred tax	(3)	165
Total deferred tax credit	(5,443)	(14,658)
Total income tax credit	(5,095)	(14,197)

Note:

1. Significant ongoing investments made by our UK business in expanding and improving its network and systems, £6 billion of spectrum payments to the UK government in 2000, £0.8 billion of spectrum payments in 2013 and UK interest costs impact the calculation of the UK tax charge.

Overseas deferred tax credit for the six months ended 30 September 2014 includes the recognition of tax losses in Luxembourg following the acquisition of Grupo Corporativo Ono, S.A. (£3,341 million) and losses arising from the write down of investments following the completion and approval of Luxembourg statutory accounts (£2,127 million).

Overseas deferred tax credit for the six months ended 30 September 2013 includes the recognition of a deferred tax asset in respect of tax losses in Germany (£1,838 million) and Luxembourg (£16,069 million) and the estimated tax liability related to the rationalisation and reorganisation of our non-US assets prior to the disposal of our stake in Verizon Wireless (£3,016 million).

The Group expects to use these losses in Luxembourg and Germany over period of between 10 and 60 years; the actual use of these losses, and the period over which they may be used, is dependent on many factors which may change, including the level of profitability in both Luxembourg and Germany, changes in tax law and changes to the structure of the Group. Further details about the Group's tax losses can be found in note 6 of the Group's consolidated financial statements for the year ended 31 March 2014.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

5 Discontinued operations

On 2 September 2013 the Group announced it had reached an agreement with Verizon Communications Inc. to dispose of its US group whose principal asset was its 45% interest in Verizon Wireless. The Group ceased recognising its share of results in Verizon Wireless on 2 September 2013, and classified its investment as a held for sale asset and the results as a discontinued operation. The transaction completed on 21 February 2014. The table below sets out all of the elements relating to this discontinued operation within the consolidated income statement.

Notes:

1. On 19 February 2014, we announced a 6 for 11 share consolidation effective on 24 February 2014. This had the effect of reducing the number of shares in issue from 52,821,751,216 ordinary shares (including 4,351,833,492 ordinary shares held in Treasury) as at the close of business on 18 February 2014 to 28,811,864,298 new ordinary shares in issue immediately after the share consolidation on 24 February 2014. Prior year comparatives have been restated.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

7 Equity dividends

8 Acquisitions

The aggregate cash consideration in respect of purchases in subsidiaries, net of cash acquired, is as follows:

	£m
Cash consideration paid:	
Grupo Corporativo Ono, S.A.	2,945
Other acquisitions completed during the period	136
	3,081
Net cash acquired	(145)
	2,936

Total goodwill on acquisitions was £1,572 million and included £1,439 million in relation to Ono and £133 million in relation to other acquisitions completed during the period.

Grupo Corporativo Ono, S.A. (Ono)

On 23 July 2014, the Group acquired the entire share capital of Ono for cash consideration of £2,945 million. The primary reason for acquiring the business was to create a leading integrated communications operator in Spain, offering customers unified communication services. The results of the acquired entity have been consolidated in the Group's income statement from 23 July 2014 and contributed £199 million of revenue and a loss of £89 million to the profit attributable to owners of the parent during the period.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The acquisition date fair values of the assets and liabilities acquired are provisional. These may be further adjusted as we gain a further understanding of the business. The provisional purchase price allocation is set out in the table below:

Notes:

1. Identifiable intangible assets of £779 million consisted of customer relationships of £710 million, brand of £33 million and software of £36 million.
2. The goodwill arising on acquisition is principally related to the synergies expected to arise following the integration of the Ono business. These principally relate to synergies expected to arise following integration of the respective networks, operating cost rationalisation and revenue synergies driven by the larger network footprint and incremental revenue streams from integrated services.
3. Transaction costs of £14 million were charged in the Group's consolidated income statement in the six months ended 30 September 2014.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

Pro-forma information

The following unaudited pro-forma summary presents the Group as if the acquisition of Ono had been completed on 1 April 2014. The pro-forma amounts include the results of Ono, application of Vodafone accounting policies, amortisation of the acquired intangible assets recognised on acquisition and interest expense on the increase in net debt as a result of the acquisition. The pro-forma information is provided for comparative purposes only and does not necessarily reflect the actual results that would have occurred, nor is it necessarily indicative of future results of operations of the combined companies.

Other acquisitions

During the six month period ended 30 September 2014 the Group completed a number of other acquisitions for an aggregate net cash consideration of £136 million, all of which was paid during the period. The aggregate fair values of goodwill, identifiable assets, and liabilities of the acquired operations were £133 million, £143 million and £140 million, respectively. In addition, the Group completed the acquisition of certain non-controlling interests for net cash consideration of £718 million.

During the six month period ended 30 September 2013 there were no material acquisitions.

9 Investment in associates and joint ventures

10

Reconciliation of net cash flow from operating activities

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

11 Related party transactions

The Group has a number of related parties including joint ventures and associates, pension schemes, directors and Executive Committee members. Related party transactions with the Group's joint ventures and associates primarily comprise fees for the use of products and services including network airtime and access charges, and cash pooling arrangements. No related party transactions have been entered into during the period which might reasonably affect any decisions made by the users of these unaudited condensed consolidated financial statements except as disclosed below.

In the six months ended 30 September 2014 the Group made contributions to defined benefit pension schemes of £384 million (six months ended 30 September 2013: £29 million) which included special contributions of £325 million to the Vodafone Group Pension Scheme and £40 million to the Cable & Wireless Worldwide Retirement Plan relating to past service representing accelerated funding amounts that would have been due for each scheme over the period to 31 March 2020.

In addition, £1.5 million of dividends were paid to Board members and executive committee members (six months ended 30 September 2013: £1.3 million). Dividends received from associates are disclosed in the consolidated statement of cash flows.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

12 Fair value of financial instruments

The table below sets out the valuation basis¹ of financial instruments held at fair value by the Group at 30 September 2014.

		2,822	2,822
		1,875	1,875
		837	837
		77	77
		9	9
		5,620	5,620
	19	-	19
		124	124
	19	124	143
	19	5,744	5,763
		499	499
		174	174
		53	53
		726	726

Notes:

1. There were no changes made during the year to valuation methods or the processes to determine classification and no transfers were made between the levels in the fair value hierarchy.
2. Level 1 classification comprises financial instruments where fair value is determined by unadjusted quoted prices in active markets for identical assets or liabilities.
3. Level 2 classification comprises where fair value is determined from inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. Fair values for unlisted equity securities are derived from observable quoted market prices for similar items. Derivative financial instrument fair values are present values determined from future cash flows discounted at rates derived from market sourced data.

Carrying value and fair value information¹

The fair value and carrying value of the Group's financial assets and financial liabilities held at amortised cost is set out in the table below:

	5,891	5,891
	586	586
	241	241
	3,260	3,260
	83	83
	10,061	10,061
	(416)	(417)
	(3,557)	(3,557)
	(6,466)	(6,467)
	(10,439)	(10,441)
	(17,187)	(17,685)
	(4,550)	(4,491)
	(21,737)	(22,176)
	(22,115)	(22,556)

Note:

1. The Group's trade and other receivables and trade and other payables are not shown in the table above. The carrying amounts of both categories approximate their fair values.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

13 Commitments and contingent liabilities

There have been no material changes to the Group's commitments or contingent liabilities during the period, except as disclosed below.

Vodafone India Services Private Limited (VISPL) tax claims

VISPL has been assessed to owe tax of approximately £240 million (plus interest of £190 million) in respect of (i) a transfer pricing margin charged for the international call centre of Hutchison prior to the 2007 transaction with Vodafone for Hutchison assets in India; (ii) the sale of the international call centre by VISPL to Hutchison and (iii) the alleged transfer of options held by VISPL for Vodafone India Limited (VIL) equity shares. The first two of the three heads of tax are subject to an indemnity by Hutchison under the Vodafone International Holdings BV (VIHBV) Tax Deed of Indemnity. The larger part of the potential claim is not subject to any indemnity. VISPL unsuccessfully challenged the merits of the tax demand in the statutory tax tribunal and the jurisdiction of the tax office to make the demand in the High Court. The Tax Appeal Tribunal has now heard the appeal and (i) a stay of the tax demand on a deposit of £20 million and (ii) a corporate guarantee by VIHBV for the balance remains in place pending a decision on the appeal which is expected during November 2014. If VISPL loses the appeal, its terms of the stay of demand may be revisited (and could be increased) while VISPL pursues further appeals in the High Court and the Supreme Court.

Extension of licences in Delhi, Mumbai and Kolkata: VIL and others v Union of India

We sought an extension of our existing licences in Delhi, Mumbai and Kolkata. That extension was denied by the Department of Telecommunications by order dated 21 March 2013. We appealed that decision to the Telecommunications Dispute Settlement Appellate Tribunal (TDSAT) and by its order dated 31 January 2014, the TDSAT denied the extension. The Supreme Court has agreed to hear our appeal on an expedited basis and a hearing has been scheduled for 26 November 2014. In the meantime, in order to maintain continuity of services, VIL sought and obtained spectrum in these cities.

British Telecom (Italy) v Vodafone Italy

The Italian Competition Authority concluded an investigation in 2007 when Vodafone Italy gave certain undertakings in relation to allegations that it had abused its dominant position in the wholesale market for mobile termination. In 2010, British Telecom (Italy) brought a civil damages claim against Vodafone Italy on the basis of the Competition Authority's investigation and Vodafone Italy's undertakings. British Telecom (Italy) seeks damages in the amount of 280 million for abuse of dominant position by Vodafone Italy in the wholesale fixed to mobile termination market for the period from 1999 to 2007. A court appointed expert delivered an opinion to the Court that the range of damages in the case should be in the region of 10 million to 25 million which was reduced in a further

supplemental report published in September 2014 to 8 million to 11 million. The expert's report will be considered by the Court before it gives judgment on the case.

FASTWEB v Vodafone Italy

The Italian Competition Authority concluded an investigation in 2007 when Vodafone Italy gave certain undertakings in relation to allegations it had abused its dominant position in the wholesale market for mobile termination. In 2010, FASTWEB brought a civil damages claim against Vodafone Italy on the basis of the Competition Authority's investigation and Vodafone Italy's undertakings. FASTWEB seeks damages in the amount of 360 million for abuse of dominant position by Vodafone Italy in the wholesale fixed to mobile termination market. A court appointed expert delivered an opinion to the Court that the range of damages in the case should be in the region of 0.5 million to 2.3 million. On 15 October 2014, the Court decided to reject FASTWEB's damages claim in its entirety.

Notes to the unaudited condensed financial statements

For the six months ended 30 September 2014

14 Other matters

Neotel Proprietary Limited (Neotel)

On 19 May 2014 Vodacom announced its intention to acquire 100% of Neotel, the second largest provider of fixed telecommunications services in South Africa, for a cash consideration equivalent to an enterprise value of R7.0 billion (£0.4 billion). Vodacom expects that the combination of Neotel with its existing fibre network, spectrum holdings and enterprise business will accelerate Vodacom's unified communications strategy, yielding substantial cost and capital expenditure synergies. The transaction remains subject to the fulfilment of a number of conditions precedent including applicable regulatory approvals (submissions have been made to both the Independent Communications Authority of South Africa (ICASA) and the Competition Commission of South Africa) and we aim to complete the acquisition by the end of the 2015 financial year.

Vodafone Fiji Limited

On 1 July 2014 Vodafone announced that it has sold its entire 49% shareholding in Vodafone Fiji Limited to the Fiji National Provident Fund for a cash consideration of FJ\$160 million (£51million).

Hellas Online SA (HOL)

On 22 August 2014 Vodafone announced that Vodafone Greece had agreed to acquire 72.7% of the share capital of HOL, a leading provider of broadband and fixed-line telephony in Greece, from the Intracom Group and World Equities Investments Holdings SA for a total cash consideration of 72.7 million (£57 million) (the Transaction). The Transaction builds on the successful track record of commercial cooperation between Vodafone Greece and HOL since 2009, when Vodafone Greece became an 18.5% shareholder, and accelerates Vodafone's unified communications strategy in Greece. The Transaction, which remains subject to a number of conditions, is expected to complete in the fourth quarter of the 2014 calendar year, following which Vodafone Greece will extend a mandatory takeover offer for the remaining shares in HOL. The purchase price implies an enterprise value for 100% of HOL of 311 million (£242 million).

Seasonality or cyclicity of interim operations

The Group's financial results have not, historically, been subject to significant seasonal trends.

INDEPENDENT REVIEW REPORT TO VODAFONE GROUP PLC

Report on the unaudited condensed consolidated financial statements

Our conclusion

We have reviewed the unaudited condensed consolidated financial statements, defined below, in the half-year financial report of Vodafone Group Plc for the six months ended 30 September 2014. Based on our review, nothing has come to our attention that causes us to believe that the unaudited condensed consolidated financial statements are not prepared, in all material respects, in accordance with International Accounting Standard 34 as issued by the International Accounting Standards Board and as adopted by the European Union, and the Disclosure and Transparency Rules of the United Kingdom's Financial Conduct Authority.

This conclusion is to be read in the context of what we say in the remainder of this report.

What we have reviewed

The unaudited condensed consolidated financial statements, which are prepared by Vodafone Group Plc, comprise:

- the consolidated statement of financial position as at 30 September 2014;
- the consolidated income statement and statement of comprehensive income for the period then ended;
- the consolidated statement of cash flows for the period then ended;
- the consolidated statement of changes in equity for the period then ended; and
- the explanatory notes to the unaudited condensed consolidated financial statements.

As disclosed in note 1, the financial reporting framework that has been applied in the preparation of the full annual financial statements of the group is applicable law and International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board and as adopted by the European Union.

The unaudited condensed consolidated financial statements included in the half-year financial report have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting, as issued by the International Accounting Standards Board and as adopted by the European Union, and the Disclosure and Transparency Rules of the United Kingdom's Financial Conduct Authority.

What a review of unaudited condensed consolidated financial statements involves

We conducted our review in accordance with International Standard on Review Engagements (UK and Ireland) 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by the Auditing Practices Board for use in the United Kingdom. A review of interim financial information consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures.

A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (UK and Ireland) and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We have read the other information contained in the half-year financial report and considered whether it contains any apparent misstatements or material inconsistencies with the information in the unaudited condensed consolidated financial statements.

Responsibilities for the unaudited condensed consolidated financial statements and the review

Our responsibilities and those of the directors

The half-year financial report, including the unaudited condensed consolidated financial statements, is the responsibility of, and has been approved by, the directors. The directors are responsible for preparing the half-year financial report in accordance with the Disclosure and Transparency Rules of the United Kingdom's Financial Conduct Authority.

Our responsibility is to express to the company a conclusion on the unaudited condensed consolidated financial statements in the half-year financial report based on our review. This report, including the conclusion, has been prepared for and only for the company for the purpose of complying with the Disclosure and Transparency Rules of the Financial Conduct Authority and for no other purpose. We do not, in giving this conclusion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Notes:

- 1 The maintenance and integrity of Vodafone Group Plc website is the responsibility of the directors; the work carried out by the auditors does not involve consideration of these matters and, accordingly, the auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the website.
- 2 Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

USE OF NON-GAAP FINANCIAL INFORMATION

In the discussion of the Group's reported financial position, operating results and cash flows, information is presented to provide readers with additional financial information that is regularly reviewed by management. However, this additional information presented is not uniformly defined by all companies including those in the Group's industry. Accordingly, it may not be comparable with similarly titled measures and disclosures by other companies. Additionally, certain information presented is derived from amounts calculated in accordance with IFRS but is not itself an expressly permitted GAAP measure. Such non-GAAP measures should not be viewed in isolation or as an alternative to the equivalent GAAP measure.

Organic growth

All amounts in this document marked with an * represent organic growth which presents performance on a comparable basis in terms of merger and acquisition activity and foreign exchange rates. While organic growth is neither intended to be a substitute for reported growth, nor is it superior to reported growth, we believe that the measure provides useful and necessary information to investors and other interested parties for the following reasons:

- it provides additional information on underlying growth of the business without the effect of certain factors unrelated to its operating performance;
- it is used for internal performance analysis; and
- it facilitates comparability of underlying growth with other companies (although the term organic is not a defined term under IFRS and may not, therefore, be comparable with similarly titled measures reported by other companies).

Further information on the use of non-GAAP financial information is outlined on pages 201 to 205 of the Group's annual report for the year ended 31 March 2014.

A summary of certain non-GAAP measures included in this results announcement, together with details of where additional information and reconciliation to the nearest equivalent GAAP measure can be found, is shown below.

See page 41 for a reconciliation of adjusted earnings to reported earnings.
