### Description of the Business

Hong Xiang is engaged in the extraction and production of crude oil. Its current operations are in a portion of the Jilin Quinan Oil Field which is located southwest of Quinan City in the Jilin Province of the Peoples Republic of China. The area in which Hong Xiang conducts operations is one of the portions of the Quinan Oil Field which, in 1999, was designated by the Jilin Petroleum Group for cooperative exploration and production. Hong Xiang has taken over an exclusive 20 year contract to produce oil from the designated portion of the Jilin Quinan Oil Field. Hong Xiang currently subcontracts all oil well drilling activities to third parties but has retained direct responsibility for well logging, drill-stem testing and core sampling. All crude oil produced from the production site is currently sold to the Jilin Refinery of PetroChina.

The designated portion of the Jilin Quinan oil field in which Hong Xiang currently has the exclusive right to produce oil, is an area of approximately 8 square miles (approximately 20.7 square kilometers). The proven oil bearing area includes approximately 4.2 square miles (10.9 square kilometers), which contains proven oil reserves of approximately 3.55 million tons.

As of April, 2004, Hong Xiang has drilled 22 development wells and has 20 operating wells which are currently producing approximately 900 tons of oil per month. The ability of Hong Xiang to implement its business strategies will hinge on its ability to raise additional capital to fund its future exploration, drilling, development, and acquisition activities. However, the current development plan is to drill and put into production a total of approximately 61 wells in order to increase monthly production to approximately 3,800 tons. The full development plan calls for a total of 102 wells to be drilled and put into production over a period of approximately 4 years.

The estimated capital investment required to fully develop the area in which Hong Xiang has exclusive rights is approximately \$23 million, and there is no assurance that Hong Xiang will be able to obtain the capital needed to fully implement its development plan.

As the Company's capital resources increase, it intends to seek to acquire additional extraction rights in other portions of the Quinan oil field or in other newly discovered areas.
