PRESS RELEASE

ANORMED REPORTS FISCAL 2006 THIRD QUARTER RESULTS AND ANNOUNCES MOZOBIL $^{\rm TM}$ PHASE III RECRUITMENT REACHES 50%

For Immediate Release

February 7, 2006

Vancouver, British Columbia - AnorMED Inc. (AMEX:AOM, TSX:AOM) today reported financial results for its third fiscal quarter ended December 31, 2005. AnorMED recorded a net loss of \$11,403,000 (\$0.34 per common share) in this quarter. This is in comparison to the net loss incurred in the previous fiscal quarter ended September 30, 2005 of \$9,255,000 (\$0.29 per common share).

Our contract research and development expenditures, \$9,181,000 in this third fiscal quarter, were 36% higher than the previous quarter and were 110% higher than the third quarter of the last fiscal year. The Phase III clinical trials for MOZOBIL are a significant portion of the increase due primarily to increased recruitment in our ongoing Phase III trials. AMD070 costs were also higher with the initiation of the XACT Phase II trial. Costs for manufacturing of drug substance and ongoing analytical work on drug product for MOZOBIL and AMD070 also contributed to increased costs during the quarter. We are continuing to manufacture drug product for AMD070, and are conducting analytical work on drug product for both AMD070 and MOZOBIL, and ongoing preclinical long-term toxicology studies for AMD070; therefore, we expect our research and development expenditures to continue to increase into the fourth quarter of this fiscal year.

General and administrative expenses increased by 23% over the previous quarter and by 50% over the comparable third quarter of last year. In November 2005 we received SEC approval to list and trade our common shares on the AMEX. This registration process resulted in non-recurring accounting and legal fees. In addition, we expect to incur a higher level of expenditure in these same areas, as well as in increased investor relations costs and insurance premiums, to maintain our U.S. registration, and to comply with the additional regulatory requirements of both Canada and the U.S. Business development activities increased this quarter as a result of travel and other expenses associated with discussions of potential strategic partnerships for the implementation of our development and commercial plans for MOZOBIL. Marketing expenditures will also increase as pre-commercialization activities for MOZOBIL in North America and Europe progress.

Interest income of \$437,000 for this quarter rose by 12% in comparison to the second quarter due to the receipt of net proceeds of \$32 million from our December financing and rising interest rates in both Canada and the U.S. Income from investments increased over 20% from the third quarter of Fiscal 2005 as a result of higher interest rates and higher average cash balances.

Capital expenditures of \$483,000 were incurred during the quarter that were substantially higher than those made during the second quarter of \$268,000 and during the third quarter of Fiscal 2005 of \$93,000. In preparation for our future NDA filing, we entered into an agreement in the previous quarter with a supplier to install and validate an Electronic Database Management System (EDMS) so that we can electronically file our regulatory submissions with the FDA. In addition to the EDMS, expenditures were made on office renovations, computers and office equipment during the period.

Cash, cash equivalents, and short-term investments were \$72,105,000, as at December 31, 2005, as compared to \$49,245,000 at September 30, 2005. The Company's cash reserves are primarily held in investments with maturities less than 90 days, due to the relatively higher yields that continued to be available during the quarter for short-term maturities. The current cash on hand, as well as expected interest income, supplemented by contractual payments on existing licensing agreements, is estimated to be sufficient to fund the Company's operations into calendar 2007.

Stem Cell Transplant

At the American Society of Hematology (ASH) meeting in Atlanta, Georgia December 10-13, 2005, we presented 6 oral and 6 poster presentations including new clinical data from the MOZOBIL clinical program. All the data presented continues to support the potential of MOZOBIL as a new standard of care for stem cell mobilization in cancer patients undergoing stem cell transplant. Data reported at ASH included new clinical results from the Compassionate Use Program (CUP), a Phase II study in Hodgkin's disease and an investigator sponsored study in allogeneic transplant. In addition, compelling retrospective data reported by the Mayo Clinic at ASH showed that the type of cells collected using MOZOBIL may positively impact patient outcome and survival.

Recruitment into the Phase III trials for MOZOBIL continues to make steady progress. To date, 148 out of 300 non-Hodgkin's lymphoma (NHL) patients and 162 out of 300 multiple myeloma (MM) patients have entered into the Phase III trials. Currently, 34 sites are recruiting NHL patients and 34 sites, including a site in Germany, are recruiting MM patients. We are maintaining our goal to complete Phase III enrollment and three month follow up by the end of calendar year 2006.

We also continue to develop our Phase II program to address other segments of the transplant market including evaluating the potential of MOZOBIL in combination with different therapies and patient populations, such as with Rituxan. We have recently initiated a small standard Phase I safety study in renal patients required for the New Drug Application. In addition, investigator sponsored studies are ongoing to evaluate MOZOBIL as a single agent in allogeneic transplantation and the Compassionate Use Program continues to provide MOZOBIL to cancer patients who fail to collect enough stem cells for transplant using standard regimens.

HIV Entry Inhibitor

On November 29, 2005, we initiated patient enrollment in a new AnorMED funded and driven Phase Ib/IIa study in HIV patients termed XACT. This new trial involves two sites; one in the U.S. and the other in the U.K. It is an open label dose-escalation/de-escalation study designed to look at preliminary activity and safety of AMD070 in HIV patients. We plan to report preliminary data from this study in the first quarter of 2006 and proof of principle in the fall. Also, our in house research program continues to make progress in the identification of HIV entry inhibitors targeting the CCR5 receptor. Selection of a lead for clinical development is planned for the first quarter of calendar 2006.

Financing

In December 2005 we completed a bought deal financing for gross proceeds of \$34.5M. The net proceeds will be used to fund Phase II and Phase III trials for MOZOBIL, for the ongoing development of AMD070 and CCR5 HIV entry inhibitors as well as for general corporate purposes.

Other updates

We recently announced that certain shareholders that are controlled by Felix J. Baker and Julian C. Baker, have filed a requisition for a special meeting of AnorMED shareholders, for the purpose of replacing the Board of Directors with a new slate proposed by them. Felix Baker is a Director of AnorMED. On February 3, 2006 AnorMED announced its intention to hold a Special Meeting of the Shareholder to be held on April 11, 2006 in Vancouver, BC. In addition, AnorMED's Board of Directors has adopted a Shareholder Rights Plan.

Upcoming Kev Events

•

Report preliminary activity and safety of AMD070 in HIV patients

•

Report preclinical data on AMD070 at the Keystone Cell Biology of Virus Entry, Replication and Pathogenesis meeting February 24 - March 1, 2006 in Santa Fe, New Mexico

•

Report clinical data from ongoing Phase II trials with MOZOBIL at the Bone Marrow Transplant Tandem Meeting, February 16-20, 2006 in Honolulu, Hawaii and at the European Bone Marrow Transplant Meeting March 19-22, 2006 in Hamburg, Germany

•

Complete Phase III recruitment for MOZOBIL in stem cell transplant

•

Initiate patient enrollment into Phase I safety study of MOZOBIL in cardiac patients

•

Receive milestone payments from Shire contingent upon additional European approvals for FOSRENOL

•

Select lead CCR5 HIV inhibitor candidate

•

Complete XACT study and submit AMD070 safety and activity data to the World AIDS Conference August 13-18, 2006 and/or the Interscience Conference on Antimicrobial Agents and Chemotherapy September 27-30, 2006

The Company has a product in Phase III development, a product in Phase II development and a research program focused on a novel class of compounds that target specific chemokine receptors known to be involved in a variety of diseases including HIV. Additional information on AnorMED Inc. is available on the Company's website www.anormed.com.

Note: Certain of the statements contained in this press release may contain forward-looking statements within the meaning of applicable securities laws, including the Ontario Securities Act, Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934. Statements regarding strategy, future operations, future financial position, future revenues, projected costs, prospects and plans and objectives of management are forward-looking statements. The words "anticipates, "believes", "budgets", "could", estimates", expects," forecasts", "intends", "may", "plans", "projects", "schedule", "should", "will", "would", "maintaining" and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. Plans, intentions or expectations disclosed in any forward-looking statements should not be read as guarantees of future results or events, and will not necessarily be accurate indications of whether or the times at or by which such results or events will be achieved. Forward-looking statement involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Investors are referred to the discussion of such risks, uncertainties and other factors in AnorMED's Final Short Form Prospectus dated December 1, 2005 filed on SEDAR with Canadian securities regulatory authorities and in Exhibit 99.1 to AnorMED's Report on Form 6-K filed with the U.S. Securities and Exchange Commission on December 23, 2005. Except as required by law, AnorMED expressly disclaims any intention and undertakes no obligation to update any forward-looking statements as conditions change.
