Item 3.02 Unregistered Sales of Equity Securities.

As previously reported on Form 8-K, on April 22, 2005, Amtech Systems, Inc. (the Company) completed a private placement of 540,000 shares of Series A Convertible Preferred Stock, par value \$.01 per share (the Preferred Stock). At the close of business on March 20, 2006, the Company's common stock, par value \$.01 per share (the Common Stock), had an average trading price for the thirty trading days ending on that date in excess of \$5.50 per share and an average trading volume for such thirty trading days in excess of 20,000 shares per day. Also at that date, a registration statement covering reoffers and resales of Common Stock issuable upon conversion of the Preferred Stock had been effective for such thirty trading days, and the registration statement remains in effect. As a result, in accordance with its terms, the Preferred Stock automatically converted into 540,000 shares of the Company's Common Stock at the close of trading on March 20, 2006. In addition, as permitted under the terms of the Preferred Stock, the Company may, at its option, issue shares of Common Stock on or before April 4, 2006 in satisfaction of dividends in the amount of \$73,380.82 that accrued on the Preferred Stock through March 20, 2006. Accrual of dividends on the Preferred Stock ceased as of that date. If the Company elects to pay the accrued dividends with Common Stock, the number of shares of Common Stock issued will be calculated by dividing the amount of the accrued dividends by the average trade price of the Common Stock for the ten trading days ending on or about March 27, 2006.
