See accompanying notes to financial statements.

KESTREL ENERGY, INC.**NOTES TO FINANCIAL STATEMENTS**

1. Basis of Presentation

These condensed financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Company's Annual Report on Form 10-KSB for the fiscal year ended June 30, 2004.

In the opinion of management, the accompanying interim unaudited financial statements contain all the adjustments necessary to present fairly the financial position of the Company as of March 31, 2005, the results of operations for the periods shown in the statements of operations, and the cash flows for the periods shown in the statements of cash flows. All adjustments made are of a normal recurring nature.

2. Property and Equipment

The Company follows the successful efforts method of accounting for its oil and gas activities. Accordingly, costs associated with the acquisition, drilling and equipping of successful exploratory wells are capitalized. Geological and geophysical costs, delay and surface rentals and drilling costs of unsuccessful exploratory wells are charged to expense as incurred. Costs of drilling development wells, both successful and unsuccessful, are capitalized. Upon the sale or retirement of oil and gas properties, the cost thereof and the accumulated depreciation or depletion are removed from the accounts and any gain or loss is credited or charged to operations.

Proved oil and gas properties are assessed for impairment on a well-by-well basis or a field-by-field basis where unitized. If the net capitalized costs of proved properties exceeds the estimated undiscounted future net cash flows from the property, a provision for impairment is recorded to reduce the carrying value of the property to its estimated fair value.

3. Asset Retirement Obligation

In 2001, FASB issued SFAS No. 143, "Accounting for Asset Retirement Obligations." SFAS No. 143 addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. This statement requires companies to record the present value of obligations associated with the retirement of tangible long-lived assets in the period in which it is incurred. The liability is capitalized as part of the related long-lived asset's carrying amount. Over time, accretion of the liability is recognized as an operating expense and the capitalized cost is depreciated over the expected useful life of the related asset. The Company's asset retirement obligations relate primarily to the plugging, dismantlement, removal, site reclamation and similar activities of its oil and gas properties. Prior to adoption of this statement, such obligations were accrued ratably over the productive lives of the assets through its depreciation, depletion and amortization for oil and gas properties without recording a separate liability for such amounts.

The amounts recognized upon adoption are based upon numerous estimates and assumptions, including future retirement costs, future recoverable quantities of oil and gas, future inflation rates and the credit-adjusted risk-free interest rate. Changes in asset retirement obligations during the year were:

Asset retirement obligations as of July 1, 2004	\$ 177,126
Liabilities incurred	¾
Liabilities settled	¾
Accretion expense (included in depreciation, depletion and amortization)	5,358
Asset retirement obligations as of March 31, 2005	\$ 182,484

4. Notes Payable

On January 24, 2003, the Company borrowed \$400,000 from R&M Oil and Gas, Ltd., ("R&M") of which Timothy L. Hoops, one of the Company's directors and its President and CEO, is a partner. That loan was originally due on January 31, 2005, bears interest at 12.5% per annum and is secured by the Company's oil and gas interests in Grady County, Oklahoma. In the event of a default under the terms of the R&M loan, and the sale of the collateral securing the loan, the Company would receive any remaining proceeds after payment to R&M of its expenses in connection with such sale(s) and any indebtedness due and payable to R&M under the loan. The proceeds from the R&M loan were used to retire the outstanding debt to Samson Exploration N.L. (a related party) at that time and reduce the Company's accounts payable position. The R&M loan was approved unanimously by the Board of Directors with Mr. Hoops abstaining. On October 13, 2004, the R&M loan was extended to January 31, 2007 under the same terms and conditions.

On May 5, 2003, the Company entered into a Line of Credit Agreement with Barry D. Lasker, the Company's former President and CEO, for a maximum loan to the Company of \$200,000. Under the terms of the agreement, all outstanding amounts were due on May 4, 2005 and bore interest at 10% per annum. The initial proceeds of the loan consisted of \$40,000 cash and the conversion to debt of approximately \$152,000 of unpaid wages and unreimbursed business expenses owed to Mr. Lasker by the Company. The Lasker loan was secured by the Company's oil and gas interests in Campbell County, Wyoming. On February 5, 2004, Mr. Lasker assigned the \$200,000 Lasker Loan to Samson Exploration N.L. (a related party) and Mr. Lasker was paid in full. The terms and conditions of the Samson loan are a continuance of the terms and conditions of the Lasker loan. The Samson loan, originally due on May 4, 2005, has been extended until May 4, 2006 under the same terms and conditions.

On June 8, 2004, the Company borrowed \$50,000 from VP with an 8% interest rate which is to be paid on repayment of the loan. This is an unsecured loan due on demand, for which no demand has yet been made. On July 13, 2004, the Company borrowed \$60,000 from VP with an 8% interest rate. This loan was repaid in full on August 31, 2004, including all accrued interest with a total of \$60,753.79 in cash.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

During the Quarter the Company has continued its drive to cut costs and maximize revenues. We are pleased to show continued improvement in our bottom line and we can now look to the future with a sound asset base and two excellent high reward-potential projects under our belt. In addition, the development of our Hilight coalbed methane (CBM) play in Campbell County, Wyoming has continued to provide us with a steady increase in reserves and revenues.

This report contains forward-looking statements. We use words such as "anticipate", "believe", "expect", "future", "may", "will", "should", "plan", "intend", and similar expressions to identify forward-looking statements. These statements are based on our beliefs and the assurances we made using information currently available to us. Because these statements reflect our current views concerning future events, these statements involve risks, uncertainties and assumptions. Our actual results could differ materially from the results discussed in the forward-looking statements. Some, but not all, of the factors that may cause these differences include those discussed in the risk factors in the Company's report on Form 10-KSB for the fiscal year ended June 30, 2004. You should not place undue reliance on these forward-looking statements. You should also remember that these statements are made only as of the date of this report and future events may cause them to be less likely to prove to be true.

LIQUIDITY AND CAPITAL RESOURCES

At March 31, 2005, the Company had working capital of \$467,346. This compares to the Company's working capital deficit of \$439,824 as of June 30, 2004. The increase in working capital of \$907,170 was primarily the result of the extensions of the loans from R&M Oil & Gas, Ltd. ("R&M") and Samson Exploration N.L. ("Samson"), which returned them to the status of long-term loans. The R&M loan was originally due on January 31, 2005 and has been extended to January 31, 2007 under the same terms and conditions. The Samson loan, originally due on May 4, 2005, has been extended until May 4, 2006 also under the same terms and conditions.

Net cash provided by operating activities was \$180,468 for the nine months ended March 31, 2005, an increase of \$98,976 from cash used by operating activities during the same period of 2004. This increase in cash provided by operating activities resulted primarily from higher profit margins (oil and gas sales less lease operating expenses) from the Company's oil and gas production activities.

Net cash used by investing activities was \$102,302 for the nine months ended March 31, 2005, versus cash used of \$141,925 for the same period in 2004. The Company had capital expenditures totaling \$104,177 during the nine-months ended March 31, 2005, versus \$141,925 during the same period of 2004, to maintain and enhance the Company's production on several of its core properties. The Company received \$1,875 in proceeds from the sale of the Dale 1-33 in Campbell County, Wyoming.

Net cash provided by financing activities was \$23,780 for the nine-months ended March 31, 2005. During the quarter ended March 31, 2005, there were 40,000 shares issued under the Company's stock option plan, which provided the Company with \$23,780 in proceeds. There was no cash used or provided by financing activities for the nine months ended March 31, 2004.

RESULTS OF OPERATIONS

The Company reported net income of \$146,522 and \$254,006 for the three and nine-month periods ended March 31, 2005, compared to net losses of \$23,569 and \$144,972 during the comparable periods of 2004. The Company's results for the quarter and nine months ended March 31, 2005 improved \$170,091 and \$398,978, respectively, as compared to 2004, on the strength of higher oil and gas prices and an increased level of gas production.

The Company's oil and gas revenues for the three months ended March 31, 2005 were \$533,910 compared to \$343,183 during the same period of 2004, an increase of \$190,727 or 56%. The increase in revenues was primarily the result of higher oil and gas prices and higher gas production received during the quarter. Oil production levels were fairly consistent between the two quarters. The Company's revenues for the nine-month period ended March 31, 2005 were \$1,525,874 as compared to \$1,082,630 during the same period in 2004, an increase of \$443,244, or 41%. The increase in revenues was primarily the result of higher oil and gas prices received during the period and an increase in gas volumes. Once again, oil production levels were not materially different between the two nine-month periods.

The Company's total expenses for the third quarter ended March 31, 2005 increased \$30,102, or 8%, to \$398,361 as compared to \$368,259 a year ago. The increase in overall expenses is primarily due to higher lease operating expense offset by lower exploration, depreciation and general and administrative expense. For the nine months ended March 31, 2005, total expenses decreased \$1,897, or less than 1%, to \$1,277,709 as compared to \$1,279,606 a year ago. The decrease in expense was again primarily due to higher lease operating and exploration expense offset by lower abandoned property, depreciation and general and administrative expense.

Exploration expenses for the quarter ended March 31, 2005 decreased by \$5,534 to \$8,898, or 4%, from \$14,432 a year ago. For the nine months ended March 31, 2005, exploration expenses increased \$16,820, or 59%, to \$45,175 versus \$28,355 a year ago. The increase in exploration expenses reflects a higher level of exploration activities in the current year as the Company currently maintains and enhances its properties.

General and administrative costs for the three months ended March 31, 2005 decreased \$27,921, or 20%, to \$115,229 as compared to \$143,150 for the same period a year ago. The Company's general and administrative expenses for the nine months ended March 31, 2005 decreased \$76,849, or 15%, to \$443,431 from \$520,280. These decreases were primarily attributable to a decrease in salary and insurance expense.

Interest expense and loan fees for the three-month period ended March 31, 2005 decreased \$1,033, or 6%, to \$15,298 from \$16,331 a year ago. For the nine months ended March 31, 2005, interest expense increased \$1,420 or 3%, to \$53,286 from \$51,866 a year ago.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company believes the following critical accounting policies affect our most significant judgments and estimates used in the preparation of our Financial Statements.

Recent Accounting pronouncements

In December 2004, the FASB issued SFAS 123(R), "Share-Based Payment," which is a revision of SFAS No. 123, Accounting for Stock-Based Compensation. SFAS 123(R) is effective for public companies for interim or annual periods beginning after June 15, 2005, supersedes APB Opinion 25, Accounting for Stock Issued to Employees, and amends SFAS 95, Statement of Cash Flows.

SFAS 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro-forma disclosure is no longer an alternative. The new standard will be effective for the company, beginning August 1, 2005. The Company has not yet completed their evaluation but expects the adoption to have an effect on the financial statements similar to the pro-forma effects reported above.

In December 2004, the FASB issued SFAS 153, Exchanges of Nonmonetary Assets, which changes the guidance in APB 29, Accounting for Nonmonetary Transactions. This Statement amends APB 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. SFAS 153 is effective during fiscal years beginning after June 15, 2005. The Company does not believe the adoption of SFAS 153 will have a material impact on the Company's financial statements.

The Securities and Exchange Commission has issued Staff Accounting Bulletin (SAB) No. 106 regarding the application of SFAS 143, "Accounting for Asset Retirement Obligations," on oil and gas producing entities that use the full cost accounting method. It states that after adoption of SFAS 143, the future cash outflows associated with settling asset retirement obligations that have been accrued on the balance sheet should be excluded from the present value of estimated future net cash flows used for the full cost ceiling test calculation. SAB No. 106 will be effective for the Company once the Company has proved reserves and will exclude the future cash flows from settling asset retirement obligations in its ceiling test computation upon having proved reserves.

Property and Equipment

The Company follows the successful efforts method of accounting for its oil and gas activities. Accordingly, costs associated with the acquisition, drilling and equipping of successful exploratory wells are capitalized. Geological and geophysical costs, delay and surface rentals and drilling costs of unsuccessful exploratory wells are charged to expense as incurred. Costs of drilling development wells, both successful and unsuccessful, are capitalized. Upon the sale or retirement of oil and gas properties, the cost thereof and the accumulated depreciation or depletion are removed from the accounts and any gain or loss is credited or charged to operations.

Proved oil and gas properties are assessed for impairment on a well-by-well basis or a field-by-field basis where unitized. If the net capitalized costs of proved properties exceeds the estimated undiscounted future net cash flows from the property, a provision for impairment is recorded to reduce the carrying value of the property to its estimated

fair value.

Pipeline and facilities are stated at original cost. Depreciation of pipeline and facilities is provided on a straight-line basis over the estimated useful life of the pipeline of twenty years.

9

Furniture and equipment are depreciated using the straight-line method over estimated lives ranging from three to seven years.

Management periodically evaluates capitalized costs of unproved properties and provides for impairment, if necessary, through a charge to operations.

Asset retirement obligations

We recognize the future cost to plug and abandon wells over the estimated useful life of the wells in accordance with the provision of SFAS No.143. SFAS No.143 requires that we record a liability for the present value of the asset retirement obligation increase to the carrying value of the related long-lived asset. We amortize the amount added to the oil and gas properties and recognize accretion expense in connection with the discount liability over the remaining lives of the respective gas wells. Our liability estimate is based on our historical experience in plugging and abandoning wells, estimated well lives based on engineering studies, external estimates as to the cost to plug and abandon wells in the future and federal and state regulatory requirements. The liability is discounted using a credit-adjusted risk-free rate. Revisions to the liability could occur due to changes in well lives, or if federal and state regulators enact new requirements on the plugging and abandonment of wells.

ITEM 3. Controls and Procedures

Disclosure Controls and Procedures

At the end of the period reported on in this report, the Company carried out an evaluation, under the supervision and participation of the Company's Chief Executive and Principal Financial Officer (the "Officer") of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-14. Based upon that evaluation, the Officer concluded that the Company's disclosure controls and procedures are effective in all material respects, with respect to the recording, processing, summarizing and reporting, within the time periods specified in the SEC's rules and forms, of information required to be disclosed by the Company in the reports the Company files or submits under the Exchange Act.

Internal Controls

There were no significant changes made in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation described above.
