STRUCTURED PRODUCTS GROUP**Example 1: The Portfolio Return is greater than zero.**

In this example, the levels of all four Components increase relative to their Initial Component Levels on the related Observation Dates. This example illustrates how holders of the Notes would benefit from the increase in the Observation Level of each Component relative to its respective Initial Component Level on each related Observation Date.

	SPX	SX5E	NKY	SBR
Initial Component Level	1,460.00	4,250.00	18,000.00	2,150.00
April [], 2012 Observation Value	1,659.76	5,464.54	20,989.71	2,648.69

Average Observation Level as % of Initial Component Level	146.33%	162.39%	139.05%	223.63%

On the Final Valuation Date, the Index Performance for SPX would be 46.33%, the Index Performance for SX5E would be 62.39%, the Index Performance for NKY would be 39.05%, and the Index Performance for SBR would be 123.63%, each as calculated pursuant to the below formula:

In this example, using the formula below, the Portfolio Return would be greater than zero.

Portfolio Return

The Cash Settlement Value, using the formula below, would equal \$1,678.50.

Cash Settlement Value

BEAR, STEARNS & CO. INC.

STRUCTURED PRODUCTS GROUP**Example 2: The Portfolio Return might be less than zero.**

In this example, the Observation Levels of all four Components decrease relative to their Initial Component Levels on the related Observation Dates. As a result, the Portfolio Return would be less than zero, and holders of the Notes would therefore have received only the principal amount of each Note at maturity.

	SPX	SX5E	NKY	SBR
Initial Component Level	1,460.00	4,250.00	18,000.00	2,150.00

Average Observation Level as % of Initial Component Level	81.45%	79.09%	85.47%	86.41%

On the Final Valuation Date, the Index Performance for SPX would be -18.55%, the Index Performance for SX5E would be -20.91%, the Index Performance for NKY would be -14.53%, and the Index Performance for SBR would be -13.59%, each as calculated pursuant to the below formula:

Index Performance

In this example, using the formula below, the Portfolio Return would be less than zero.

Portfolio Return

Since the Portfolio Return would be less than zero, the Cash Settlement Value for each Note would be the principal amount of \$1,000.

STRUCTURED PRODUCTS GROUP**Example 3: Some Components move higher while others move lower.**

In this example, the Observation Levels for some of the Components increase relative to the initial Component Levels for those Components, while the Observation Levels for other of the Components decrease relative to the Initial Component Levels for those Components.

SELECTED RISK CONSIDERATIONS

- **No current income**—We will not pay any interest on the Notes. The yield on the Notes therefore may be less than the overall return you would earn if you purchased a conventional debt security at the same time and with the same maturity.
- **No interest, dividend or other payments**—You will not receive any interest, dividend payments or other distributions on the stocks underlying the Components; nor will such payments be included in the calculation of the Cash Settlement Value you will receive at maturity.
- **Not exchange-listed**—The Notes will not be listed on any securities exchange and we do not expect a trading market to develop, which may affect the price that you receive for your Notes upon any sale prior to maturity. If you sell the Notes prior to maturity, you may receive less, and possibly significantly less, than your initial investment in the Notes.
- **Liquidity**—Because the Notes will not be listed on any securities exchange, we do not expect a trading market to develop, and, if such a market were to develop, it may not be liquid. Our subsidiary, Bear, Stearns & Co. Inc. has advised us that they intend under ordinary market conditions to indicate prices for the Notes on request. However, we cannot guarantee that bids for outstanding Notes will be made in the future; nor can we predict the price at which those bids will be made. In any event, Notes will cease trading as of the close of business on the Maturity Date.
- **The Components may not move in tandem**—At a time when the level of one or more of the Components increases, the level of one or more of the other Components may decline. Therefore, in calculating the Portfolio Return, increases in the level of one or more of the Components may be moderated, or wholly offset, by lesser increases or declines in the level of one or more of the other Components.
