Item 8.01 Other Events.

On October 19, 2010, XsunX, Inc., a Colorado corporation (the “Company”) released news (the “Press Release”) providing progress information of the Company’s efforts to develop a new hybrid manufacturing technology for the mass production of Copper Indium Gallium (di) Selenide (CIGS) thin film solar cells. The Press Release provides information regarding the Company’s successful fabrication of thin-film CIGS cells based upon the Company’s CIGSolar technology that surpass 14 fourteen percent (14%+) conversion efficiency. A copy of the Press Release is attached hereto as Exhibit 99.1 and is hereby incorporated by reference into this Item 8.01.

On October 20, 2010, the Chief Executive Office for XsunX, Inc., a Colorado corporation (the “Company”) was interviewed by Stock Hideout, a discussion forum, and answered questions related to the Company’s plans and efforts to develop and market a new hybrid manufacturing technology for the mass production of Copper Indium Gallium (di) Selenide (CIGS) thin film solar cells. The Company’s response to the interview questions provides a comparative summary outline of the Company’s CIGSolar technology to other CIGS technologies, product goals, and business development objectives. A copy of the questions and answers is attached hereto as Exhibit 99.2 and is hereby incorporated by reference into this Item 8.01.

Item Financial Statements and Exhibits.
