Noncash Activities

Loans transferred to Other Real Estate	\$ 293	\$ 63
--	--------	-------

The accompanying notes are an integral part of these financial statements.

FRANKLIN FINANCIAL SERVICES CORPORATION and SUBSIDIARIES

UNAUDITED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Basis of Presentation

The consolidated financial statements include the accounts of Franklin Financial Services Corporation (the Corporation), and its wholly-owned subsidiaries, Farmers and Merchants Trust Company of Chambersburg (the Bank) and Franklin Future Fund Inc. Farmers and Merchants Trust Company of Chambersburg is a commercial bank that has one wholly-owned subsidiary, Franklin Financial Properties Corp. Franklin Financial Property Corp. holds real estate assets that are leased by the Bank. Franklin Future Fund Inc. is a non-bank investment company. The activities of non-bank entities are not significant to the consolidated totals. All significant intercompany transactions and account balances have been eliminated.

In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the consolidated financial position, results of operations, and cash flows as of March 31, 2013, and for all other periods presented have been made.

Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted. It is suggested that these consolidated financial statements be read in conjunction with the audited consolidated financial statements and notes thereto included in the Corporation's 2012 Annual Report on Form 10-K. The consolidated results of operations for the period ended March 31, 2013 are not necessarily indicative of the operating results for the full year. Management has evaluated subsequent events for potential recognition and/or disclosure through the date these consolidated financial statements were issued.

The consolidated balance sheet at December 31, 2012 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by GAAP for complete consolidated financial statements.

For purposes of reporting cash flows, cash and cash equivalents include cash and due from banks, interest-bearing deposits in other banks and federal funds sold. Generally, federal funds are purchased and sold for one-day periods.

Earnings per share are computed based on the weighted average number of shares outstanding during each period end. A reconciliation of the weighted average shares outstanding used to calculate basic earnings per share and diluted earnings per share follows:

(Dollars and shares in thousands, except per share data)	For the Three Months Ended March 31	
	2013	2012
Weighted average shares outstanding (basic)	4,112	4,041
Impact of common stock equivalents	6	-
Weighted average shares outstanding (diluted)	4,118	4,041
Anti-dilutive options excluded from calculation	58	108
Net income	\$1,551	\$1,369
Basic earnings per share	\$0.38	\$0.34
Diluted earnings per share	\$0.38	\$0.34

Note 2. Recent Accounting Pronouncements

Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. ASU 2013-02 “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income,” requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. The amendments are effective prospectively for reporting periods beginning after December 15, 2012. The Corporation adopted this ASU at March 31, 2013.

Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. The objective of this ASU is to address the limitation of ASU 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities*. This ASU clarifies that the scope of ASU 2011-11 applies to derivatives accounted for in accordance with Topic 815, Derivatives and Hedging, which includes bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements. It also applies to securities borrowing and lending transactions that are offset in accordance with Section 210-20-45 or Section 215-10-45 or subject to an enforceable master netting arrangement or similar agreement. This Update will provide users of financial statements with comparable information as it relates to certain reconciling differences between financial statements prepared in accordance with U.S. GAAP and those prepared in accordance with International Financial Reporting Standards. This update requires that the gross amounts of the asset and offsetting liabilities be disclosed in the notes to the financial statements. The provisions of this ASU are effective for fiscal years beginning on or after January 1, 2013 and interim periods within those annual periods, the same effective date as Update 2011-11. The required disclosures are to be retrospectively applied for all comparative periods presented. The Corporation adopted this ASU at March 31, 2013.

Testing Indefinite-Lived Intangible Assets for Impairment. In July, 2012, the FASB issued ASU 2012-02, "Testing Indefinite-Lived Intangible Assets for Impairment." Similar to ASU 2011-08, "Intangibles – Goodwill and Other (Topic 250) – Testing Goodwill for Impairment", ASU 2012-20 addresses the growing cost and complexity of performing an analysis to evaluate indefinite-lived intangible assets (other than goodwill) for impairment. Rather than requiring a purely quantitative impairment test, the ASU provides entities with the option to first examine qualitative factors, such as economic conditions and cash flow trends, to make this determination. Entities are required by the guidance to consider both positive and negative impacts of such factors before determining whether it is more-likely-than-not (i.e. greater than 50% probability) that the indefinite-lived asset is impaired. It should be noted that the qualitative portion of the analysis is optional for all issuers. This ASU is effective for impairment tests performed during fiscal years beginning after September 15, 2012, and may be early adopted if the entity's financial statements for the most recent fiscal or interim period have not yet been issued. The Corporation adopted this ASU in 2012.

Note 3. Accumulated Other Comprehensive Loss

The components of accumulated other comprehensive loss included in shareholders' equity are as follows:

	March 31, 2013	December 31, 2012
(Dollars in thousands)		
Net unrealized gains on securities	\$ 2,720	\$ 2,542
Tax effect	(925)	(864)
Net of tax amount	1,795	1,678
Net unrealized losses on derivatives	(921)	(1,103)
Tax effect	313	375
Net of tax amount	(608)	(728)

Accumulated pension adjustment	(7,576)	(7,576)
Tax effect	2,576	2,576
Net of tax amount	(5,000)	(5,000)
Total accumulated other comprehensive loss	\$ (3,813)	\$ (4,050)

Note 4. Guarantees

The Corporation does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Generally, all letters of credit, when issued, have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The Bank generally holds collateral and/or personal guarantees supporting these commitments. The Bank had \$21.4 million and \$28.2 million of standby letters of credit as of March 31, 2013 and December 31, 2012, respectively. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding guarantees. The amount of the liability as of March 31, 2013 and December 31, 2012 for guarantees under standby letters of credit issued was not material.

Note 5. Investments

The composition of the investment portfolio is virtually unchanged since year-end 2012. Municipal securities and U.S. Agency mortgage-backed securities continue to comprise the greatest portion of the portfolio at 45% and 38% of the portfolio respectively. The Bank invested \$11.6 million during the first quarter divided almost equally between municipal and U.S. Agency mortgage-backed securities.

The investment portfolio had a net unrealized gain of \$2.7 million at the end of the quarter. The municipal bond sector shows the largest net unrealized gain, while the trust-preferred sector has the largest net unrealized loss. The portfolio averaged \$136.5 million for the year with a yield of 2.21% compared to an average of \$126.9 million and a yield of 2.85% for the same period in 2012. The Bank expects the yield on the portfolio to continue to decline as higher yielding bonds pay-down or mature and reinvestment yields remain low.

The equity portfolio is comprised of bank stocks and the Bank and the Corporation each maintain separate equity portfolios. The municipal bond portfolio is well diversified geographically (issuers from within 27 states) and is comprised primarily of general obligation bonds (69%). Most municipal bonds have credit enhancements in the form of private bond insurance or other credit support. The largest geographic municipal bond exposure is to nineteen issuers in the state of Texas with a fair value of \$9.8 million and eleven issuers in the state of Pennsylvania with a fair value of \$6.5 million. The municipal bond portfolio contains \$56.7 million of bonds rated A or higher, \$637 thousand rated lower than A (but above noninvestment grade), and \$2.9 million that are not rated by Moody's rating agency. No municipal bonds are rated below investment grade. The Bank holds one variable rate corporate bond in the financial services sector and it is rated A3 by Moody's.

The trust preferred investments are comprised of seven single issuer trust preferred securities with an amortized cost of \$5.9 million and a fair value of \$4.9 million. The Bank has six private-label mortgage backed securities (PLMBS) with an amortized cost of \$2.4 million and a fair value of \$2.4 million.

The amortized cost and estimated fair value of investment securities available for sale as of March 31, 2013 and December 31, 2012 is as follows:

(Dollars in thousands)	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
March 31, 2013				
Equity securities	\$ 2,104	\$ 217	\$ (122)	\$ 2,199
U.S. Government agency securities	12,448	137	(10)	12,575
Municipal securities	57,647	2,833	(242)	60,238

Edgar Filing: FRANKLIN FINANCIAL SERVICES CORP /PA/ - Form 10-Q

Corporate debt securities	1,004	-	(5)	999
Trust preferred securities	5,911	-	(994)	4,917
Agency mortgage-backed securities	50,536	1,025	(101)	51,460
Private-label mortgage-backed securities	2,407	29	(37)	2,399
Asset-backed securities	55	-	(10)	45
	\$ 132,112	\$ 4,241	\$ (1,521)	\$ 134,832

(Dollars in thousands)

	Amortized	Gross	Gross	Fair
December 31, 2012	cost	unrealized	unrealized	value
		gains	losses	
Equity securities	\$ 2,104	\$ 92	\$ (255) \$ 1,941
U.S. Government agency securities	12,657	156	(4) 12,809

Asset-backed securities	59	-	(13) 46
	\$ 130,785	\$ 4,271	\$ (1,728) \$ 133,328

At March 31, 2013 and December 31, 2012, the fair value of investment securities pledged to secure public funds, trust balances, repurchase agreements, deposit and other obligations totaled \$129.0 million and \$119.8 million, respectively.

The amortized cost and estimated fair value of debt securities at March 31, 2013, by contractual maturity are shown below. Actual maturities may differ from contractual maturities because of prepayment or call options embedded in the securities.

(Dollars in thousands)	Amorized cost	Fair value
Due in one year or less	\$ 2,435	\$2,450
Due after one year through five years	13,999	14,770
Due after five years through ten years	21,233	22,302
Due after ten years	39,398	39,252
	77,065	78,774
Mortgage-backed securities	52,943	53,859
	\$ 130,008	\$ 132,633

The following table provides additional detail about trust preferred securities as of March 31, 2013:

Impairment:

The investment portfolio contained 63 securities with \$33.5 million of temporarily impaired fair value and \$1.5 million in unrealized losses. The unrealized loss position is less than at year-end 2012, but the number of impaired securities is unchanged. The trust preferred sector continues to show the largest unrealized loss at \$1.0 million on seven securities, a slight improvement from the prior-year end.

For securities with an unrealized loss, Management applies a systematic methodology in order to perform an assessment of the potential for other-than-temporary impairment. In the case of debt securities, investments considered for other-than-temporary impairment: (1) had a specified maturity or repricing date; (2) were generally expected to be redeemed at par, and (3) were expected to achieve a recovery in market value within a reasonable period of time. In addition, the Bank considers whether it intends to sell these securities or whether it will be forced to sell these securities before the earlier of amortized cost recovery or maturity. Equity securities are assessed for other-than-temporary impairment based on the length of time of impairment, dollar amount of the impairment and general market and financial conditions relating to specific issues. The impairment identified on debt and equity securities and subject to assessment at March 31, 2013, was deemed to be temporary and required no further adjustments to the financial statements, unless otherwise noted.

The following table reflects temporary impairment in the investment portfolio (excluding restricted stock), aggregated by investment category, length of time that individual securities have been in a continuous unrealized loss position and the number of securities in each category as of March 31, 2013 and December 31, 2012:

Total temporarily impaired securities	\$16,822	\$ (252)	22	\$14,991	\$ (1,476)	41	\$31,813	\$ (1,728)	63

The trust preferred portfolio contains the largest unrealized loss in the portfolio. At March 31, 2013 this sector contained seven securities with a fair value of \$4.9 million and an unrealized loss of \$1.0 million, representing a slight improvement over year-end 2012. The trust-preferred securities held by the Bank are single entity issues, not pooled trust preferred securities. Therefore, the impairment review of these securities is based only on the issuer and the security cannot be impaired by the performance of other issuers as if it was a pooled trust-preferred bond. All of the Bank's trust preferred securities are single issue, variable rate notes with long maturities (2027 – 2028). None of these bonds have suspended or missed a dividend payment. At March 31, 2013, the Bank believes it will be able to collect all interest and principal due on these bonds and no other-than-temporary-impairment charges were recorded. See the Trust Preferred Securities table for additional information.

The PLMBS sector shows a gross unrealized loss of \$37 thousand, an improvement over the \$123 thousand unrealized loss at December 31, 2012. These bonds were all rated AAA at time of purchase, but have since experienced rating declines. Some have experienced increased delinquencies and defaults, while others have seen the credit support increase as the bonds paid-down. The Bank monitors the performance of the PLMBS investments on a regular basis and reviews delinquencies, default rates, credit support levels and various cash flow stress test scenarios. In determining the credit related loss, Management considers all principal past due 60 days or more as a loss. If additional principal moves beyond 60 days past due, it will also be considered a loss. As a result of the analysis on PLMBS it was determined that no impairment charge was required at quarter end. The Bank has recorded \$490 thousand of cumulative impairment charges on this portfolio. Management continues to monitor these securities and it is possible that additional write-downs may occur if current loss trends continue. The Bank is currently participating in a class-action lawsuit against one PLMBS servicer that centers on defective warranties and representations made as part of the underwriting process. See the PLMBS table above for additional information.

The Bank held \$3.1 million of restricted stock at March 31, 2013. Except for \$30 thousand, this investment represents stock in FHLB Pittsburgh. The Bank is required to hold this stock to be a member of FHLB and it is carried at cost of \$100 per share. FHLB Pittsburgh has repurchased \$521 thousand of its capital stock during the quarter. FHLB stock is evaluated for impairment primarily based on an assessment of the ultimate recoverability of its cost. As a government sponsored entity, FHLB has the ability to raise funding through the U.S. Treasury that can be used to support its operations. There is not a public market for FHLB stock and the benefits of FHLB membership (e.g., liquidity and low cost funding) add value to the stock beyond purely financial measures. Management intends to remain a member of the FHLB and believes that it will be able to fully recover the cost basis of this investment.

Note 6. Loans

The Bank reports its loan portfolio based on the primary collateral of the loan. It further classifies these loans by the primary purpose, either consumer or commercial. The Bank's mortgage loans include long-term loans to individuals and businesses secured by mortgages on the borrower's real property. Construction loans are made to finance the purchase of land and the construction of residential and commercial buildings thereon, and are secured by mortgages on real estate. Commercial loans are made to businesses of various sizes for a variety of purposes including construction, property, plant and equipment, and working capital. Commercial loans also include loans to government municipalities. Commercial lending is concentrated in the Bank's primary market, but also includes purchased loan participations. Consumer loans are comprised of installment, home equity and unsecured personal lines of credit.

A summary of loans outstanding, by primary collateral, at the end of the reporting periods is as follows:

(Dollars in thousands)	March 31, 2013	December 31, 2012	Change

	9	\$ 5,146	\$ 5,361	\$ 5,309

Note 8. Pensions

The components of pension expense for the periods presented are as follows:

(Dollars in thousands)	Three Months Ended March 31	
	2013	2012
Components of net periodic cost:		
Service cost	\$ 114	\$ 115
Interest cost	179	179
Expected return on plan assets	(312)	(197)
Recognized net actuarial loss	159	171
Net period cost	\$ 140	\$ 268

The Bank expects its pension expense to decrease to approximately \$560 thousand in 2013 compared to \$1.1 million in 2012. The Bank contributed \$6.8 million to its pension plan in 2012 and does not expect to contribute any

additional amounts in 2013.

Contributions are intended to provide not only for the benefits attributed to service to date but also for those expected to be earned in the future. However, due to the low rate environment, the funding status of the pension plan, and the Bank's excess cash position earning a low return, the Bank made an additional contribution, above the required minimum contribution, of \$6.0 million to the pension plan in December 2012. This action brought the plan to a fully funded status and will significantly reduce future pension expense. In 2012, the Bank changed the source of the discount rate used to calculate the benefit obligation, to the Citigroup Above Median Pension Discount Curve from the Citigroup Pension Discount Curve and Liability Index. The new curve represents bonds that are more like the pension plan assets in terms of duration and quality, and generally results in a higher discount rate.

Note 9. Mortgage Servicing Rights

Activity pertaining to mortgage servicing rights and the related valuation allowance follows:

(Dollars in thousands)	Three Months Ended March 31	
	2013	2012
Cost of mortgage servicing rights:		
Beginning balance	\$ 458	\$ 730
Originations	-	-
Amortization	(74)	(54)
Ending balance	\$ 384	\$ 676
Valuation allowance:		
Beginning balance	\$ (223)	\$ (362)
Valuation charges	-	-
Valuation reversals	24	61
Ending balance	\$ (199)	\$ (301)
Mortgage servicing rights cost	\$ 384	\$ 676
Valuation allowance	(199)	(301)
Carrying value	\$ 185	\$ 375
Fair value	\$ 185	\$ 375

Note 10. Fair Value Measurements and Fair Values of Financial Instruments

Management uses its best judgment in estimating the fair value of the Corporation's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Corporation could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective year-ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates maybe different than the amounts reported at each year-end.

FASB ASC Topic 820, "Financial Instruments", requires disclosure of the fair value of financial assets and liabilities, including those financial assets and liabilities that are not measured and reported at fair value on a recurring and nonrecurring basis. The Corporation does not report any nonfinancial assets at fair value. FASB ASC Topic 820 establishes a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities

(Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC Topic 820 are as follows:

Level 1: Valuation is based on unadjusted, quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market. There may be substantial differences in the assumptions used for securities within the same level. For example, prices for U.S. Agency securities have fewer assumptions and are closer to level 1 valuations than the private label mortgage backed securities that require more assumptions and are closer to level 3 valuations.

Level 3: Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Corporation's assumptions regarding what market participants would assume when pricing a financial instrument.

An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The following methods and assumptions were used to estimate the fair values of the Corporation's financial instruments at March 31, 2013 and December 31, 2012.

Cash and Cash Equivalents: For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment securities: The fair value of investment securities is determined in accordance with the methods described under FASB ASC Topic 820 as discussed below.

Restricted stock: The carrying value of restricted stock approximates its fair value based on redemption provisions for the restricted stock.

Loans held for sale: The fair value of loans held for sale is determined by the price set between the Bank and the purchaser prior to origination. These loans are usually sold at par.

Net loans: The fair value of fixed-rate loans is estimated for each major type of loan (e.g. real estate, commercial, industrial and agricultural and consumer) by discounting the future cash flows associated with such loans using rates currently offered for loans with similar terms to borrowers of comparable credit quality. The model considers scheduled principal maturities, repricing characteristics, prepayment assumptions and interest cash flows. The discount rates used are estimated based upon consideration of a number of factors including the treasury yield curve, expense and service charge factors. For variable rate loans that reprice frequently and have no significant change in credit quality, carrying values approximate the fair value.

Accrued Interest Receivable: The carrying amount is a reasonable estimate of fair value.

Mortgage servicing rights: The fair value of mortgage servicing rights is based on observable market prices when available or the present value of expected future cash flows when not available. Assumptions such as loan default rates, costs to service, and prepayment speeds significantly affect the estimate of future cash flows. Mortgage servicing rights are carried at the lower of cost or fair value.

Deposits, Securities sold under agreements to repurchase and Long-term debt: The fair value of demand deposits, savings accounts, and money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-rate certificates of deposit and long-term debt is estimated by discounting the future cash flows using rates approximating those currently offered for certificates of deposit and borrowings with similar remaining maturities. Other borrowings consist of a line of credit with the FHLB at a variable interest rate and securities sold under agreements to repurchase, for which the carrying value approximates a reasonable estimate of the fair value.

Accrued interest payable: The carrying amount is a reasonable estimate of fair value.

Derivatives: The fair value of the interest rate swaps is based on other similar financial instruments and is classified as Level 2.

The following information regarding the fair value of the Corporation's financial instruments should not be interpreted as an estimate of the fair value of the entire Corporation since a fair value calculation is only provided for a limited portion of the Corporation's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Corporation's disclosures and those of other companies may not be meaningful.

The fair value of the Corporation's financial instruments are as follows:

(Dollars in thousands)	March 31, 2013		Level 1	Level 2	Level 3
	Carrying Amount	Fair Value			
Financial assets:					
Cash and cash equivalents	\$111,787	\$111,787	\$111,787	\$-	\$-

Recurring Fair Value Measurements

For financial assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy used at March 31, 2013 and December 31, 2012 are as follows:

(Dollars in Thousands)	Fair Value at March 31, 2013			
	Level 1	Level 2	Level 3	Total
Asset Description				
Equity securities	\$2,199	\$-	\$ -	\$2,199
Obligations of U.S. Government agencies	-	12,575	-	12,575
Obligations of state and political subdivisions	-	60,238	-	60,238
Corporate debt securities	-	999	-	999
Trust Preferred Securities	-	4,917	-	4,917
Agency mortgage-backed securities	-	51,460	-	51,460
Private-label mortgage-backed securities	-	2,399	-	2,399
Asset-backed securities	-	45	-	45
Total assets	\$2,199	\$132,633	\$ -	\$134,832
Liability Description				
Interest rate swaps	\$-	\$922	\$ -	\$922
Total liabilities	\$-	\$922	\$ -	\$922

(Dollars in Thousands)	Fair Value at December 31, 2012			
	Level 1	Level 2	Level 3	Total
Asset Description				
Equity securities	\$1,941	\$-	\$ -	\$1,941
Obligations of U.S. Government agencies	-	12,809	-	12,809
Obligations of state and political subdivisions	-	61,216	-	61,216
Corporate debt securities	-	994	-	994
Trust Preferred Securities	-	4,830	-	4,830
Agency mortgage-backed securities	-	49,066	-	49,066
Private-label mortgage-backed securities	-	2,426	-	2,426
Asset-backed securities	-	46	-	46
Total assets	\$1,941	\$131,387	\$ -	\$133,328
Liability Description				
Interest rate swaps	\$-	\$1,103	\$ -	\$1,103
Total liabilities	\$-	\$1,103	\$ -	\$1,103

The Corporation used the following methods and significant assumptions to estimate the fair values for financial assets measured at fair value on a recurring basis.

Investment securities: Level 1 securities represent equity securities that are valued using quoted market prices from nationally recognized markets. Level 2 securities represent debt securities that are valued using a mathematical model based upon the specific characteristics of a security in relationship to quoted prices for similar securities.

Interest rate swaps: The interest rate swaps are valued using a discounted cash flow model that uses verifiable market environment inputs to calculate the fair value. This method is not dependent on the input of any significant judgments or assumptions by Management.

Nonrecurring Fair Value Measurements

For financial assets measured at fair value on a nonrecurring basis, the fair value measurements by level within the fair value hierarchy used at March 31, 2013 and December 31, 2012 are as follows:

(Dollars in Thousands)

Asset Description	Fair Value at March 31, 2013			
	Level 1	Level 2	Level 3	Total
Impaired loans (1)	\$ -	\$ -	\$ 8,262	\$ 8,262
Other real estate owned (1)	-	-	5,420	5,420
Mortgage servicing rights	-	-	185	185
Total assets	\$ -	\$ -	\$ 13,867	\$ 13,867

(Dollars in Thousands)

Asset Description	Fair Value at December 31, 2012			
	Level 1	Level 2	Level 3	Total
Impaired loans (1)	\$ -	\$ -	\$ 9,235	\$ 9,235
Other real estate owned (1)	-	-	5,127	5,127
Mortgage servicing rights	-	-	235	235
Total assets	\$ -	\$ -	\$ 14,597	\$ 14,597

(1) *Includes assets directly charged-down to fair value during the year-to-date period.*

The Corporation used the following methods and significant assumptions to estimate the fair values for financial assets measured at fair value on a nonrecurring basis.

Impaired loans: Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria.

Other real estate: The fair value of other real estate, upon initial recognition, is estimated using Level 2 inputs within the fair value hierarchy based on observable market data and Level 3 inputs based on customized discounting criteria. In connection with the measurement and initial recognition of the foregoing assets, the Corporation recognizes charge-offs through the allowance for loan losses.

Mortgage servicing rights: The fair value of mortgage servicing rights, upon initial recognition, is estimated using a valuation model that calculates the present value of estimated future net servicing income. The model incorporates Level 3 assumptions such as cost to service, discount rate, prepayment speeds, default rates and losses.

The Corporation did not record any liabilities at fair value for which measurement of the fair value was made on a nonrecurring basis at March 31, 2013. For financial assets and liabilities measured at fair value on a recurring basis, there were no transfers of financial assets or liabilities between Level 1 and Level 2 during the period ending March 31, 2013.

The following table presents additional quantitative information about Level 3 assets measured at fair value on a nonrecurring basis:

(Dollars in Thousands)	Quantitative Information about Level 3 Fair Value Measurements at March 31, 2013			
	Asset Description	Fair Value	Valuation Technique	Unobservable Input
Impaired loans (1)	\$8,262	Appraisal	Appraisal Adjustments (2) Cost to sell	0% - 100% (18.2%) 5% - 15% (6.5%)
Other real estate owned (1)	5,420	Appraisal	Appraisal Adjustments (2) Cost to sell	8% (8%)
Mortgage servicing rights	185	Discounted Cash Flow (3)		
at December 31, 2012				
Impaired loans (1)	\$9,235	Appraisal	Appraisal Adjustments (2) Cost to sell	0% - 100% (11%) 5% - 25% (7%)
Other real estate owned (1)	5,127	Appraisal	Appraisal Adjustments (2) Cost to sell	8% (8%)
Mortgage servicing rights	235	Discounted Cash Flow (3)		

(1) Includes assets directly charged-down to fair value during the year-to-date period.

(2) Qualitative adjustments are discounts specific to each asset and are made as needed.

(3) Valuation and inputs are determined by a third-party pricing service without adjustment.

Note 11. Financial Derivatives

The Board of Directors has given Management authorization to enter into additional derivative activity including interest rate swaps, caps and floors, forward-rate agreements, options and futures contracts in order to hedge interest rate risk. The Bank is exposed to credit risk equal to the positive fair value of a derivative instrument, if any, as a positive fair value indicates that the counterparty to the agreement is financially liable to the Bank. To limit this risk, counterparties must have an investment grade long-term debt rating and individual counterparty credit exposure is limited by Board approved parameters. Management anticipates continuing to use derivatives, as permitted by its Board-approved policy, to manage interest rate risk.

Information regarding the interest rate swaps as of March 31, 2013 follows:

(Dollars in thousands)		Amount Expected to be Expensed into Earnings within the next 12 Months		
Notional Amount	Maturity Date	Interest Rate		
		Fixed	Variable	
\$ 10,000	5/30/2013	3.60%	0.09 %	\$ 59
\$ 10,000	5/30/2015	3.87%	0.09 %	\$ 379

Fair Value of Derivative Instruments in the Consolidated Balance Sheets were as follows as of March 31, 2013 and December 31, 2012:

Fair Value of Derivative Instruments

(Dollars in thousands)		Balance Sheet	
Date	Type	Location	Fair Value
March 31, 2013	Interest rate contracts	Other liabilities	\$ 922
December 31, 2012	Interest rate contracts	Other liabilities	\$ 1,103

The Effect of Derivative Instruments on the Statement of Income for the Three Months Ended March 31, 2013 and 2012 follows:

Derivatives in ASC Topic 815 Cash Flow Hedging Relationships

(Dollars in thousands)

Date / Type	Amount of Gain or (Loss) Recognized in OCI net of tax on Derivative (Effective Portion)	Location of Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Amount of Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Location of	Amount of Gain or (Loss) Recognized in Income on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing)

March 31, 2013	\$ 120	Interest Expense	\$ (180) Other income (expense)	\$ -
March 31, 2012	\$ 139	Interest Expense	\$ (181) Other income (expense)	\$ -

Interest Rate Swap Agreements ("Swap Agreements")

The Bank has entered into interest rate swap agreements as part of its asset/liability management program. The swap agreements are free-standing derivatives and are recorded at fair value in the Corporation's consolidated statements of condition. The Bank is party to master netting arrangements with its financial institution counterparties; however, the Bank does not offset assets and liabilities under these arrangements for financial statement presentation purposes. The master netting arrangements provide for a single net settlement of all swap agreements, as well as collateral, in the event of default on, or termination of, any one contract. Collateral, in the form of marketable securities, is posted by the counterparty with net liability positions in accordance with contract thresholds.

Securities Sold Under Agreements to Repurchase ("Repurchase Agreements")

The Bank enters into agreements under which it sells securities subject to an obligation to repurchase the same or similar securities. Under these arrangements, the Bank may transfer legal control over the assets but still retain effective control through an agreement that both entitles and obligates the Bank to repurchase the agreements. As a

result, these repurchase agreements are accounted for as collateralized financing arrangements (i.e., secured borrowings) and not as a sale and subsequent repurchase of securities. The obligation to repurchase the securities is reflected as a liability in the Corporation's consolidated statements of condition, while the securities underlying the repurchase agreements remain in the respective investment securities asset accounts. In other words, there is no offsetting or netting of the investment securities assets with the repurchase agreement liabilities. In addition, as the Bank does not enter into reverse repurchase agreements, there is no such offsetting to be done with repurchase agreements.

The following table presents the liabilities subject to an enforceable master netting arrangement or repurchase agreements as of March 31, 2013 and December 31, 2012. As of these dates, all of the Bank's swap agreements with institutional counterparties were in a liability position. Therefore, there were no assets to be recognized in the consolidated statements of condition. The swap agreements we have with our commercial banking customers are not subject to an enforceable master netting arrangement, and therefore, are excluded from this table.

(Dollars in thousands)	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Statements of Condition	Net Amounts	Gross Amounts Not Offset in the		
			of Liabilities Presented in the Statements of Condition	Financial Instruments	Cash Collateral Pledged	Net Amount
March 31, 2013	\$ 922	\$ -	\$ 922	\$ 922	\$ -	\$ -
December 31, 2012	\$ 1,103	\$ -	\$ 1,103	\$ 1,103	\$ -	\$ -

Note 12. Reclassification

Certain prior period amounts may have been reclassified to conform to the current year presentation. Such reclassifications did not affect reported net income.

Management's Discussion and Analysis of Results of Operations and Financial Condition

For the Three Months Ended March 31, 2013 and 2012

Forward Looking Statements

Certain statements appearing herein which are not historical in nature are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements refer to a future period or periods, reflecting management's current views as to likely future developments, and use words such as "may," "will," "expect," "believe," "estimate," "anticipate," or similar terms. Because forward-looking statements involve certain risks, uncertainties and other factors over which the Corporation has no direct control, actual results could differ materially from those contemplated in such statements. These factors include (but are not limited to) the following: general economic conditions, changes in interest rates, changes in the Corporation's cost of funds, changes in government monetary policy, changes in government regulation and taxation of financial institutions, changes in the rate of inflation, changes in technology, the intensification of competition within the Corporation's market area, and other similar factors.

Critical Accounting Policies

Management has identified critical accounting policies for the Corporation to include Allowance for Loan Losses, Mortgage Servicing Rights, Financial Derivatives, Temporary Investment Impairment and Stock-based Compensation. There were no changes to the critical accounting policies disclosed in the 2012 Annual Report on Form 10-K in regards to application or related judgments and estimates used. Please refer to Item 7 of the Corporation's 2012 Annual Report on Form 10-K for a more detailed disclosure of the critical accounting policies.

Results of Operations

Year-to-Date Summary

At March 31, 2013, total assets were \$1.054 billion, an increase of \$26.8 million from December 31, 2012. Net loans decreased to \$735.2 million and total deposits increased to \$902.2 million. The Corporation reported net income for the first three months of 2013 of \$1.6 million. This is a 13.3% increase versus net income of \$1.4 million for the same period in 2012. Total revenue (interest income and noninterest income) decreased \$1.0 million year-over-year. Interest income decreased \$849 thousand, while interest expense decreased by \$725 thousand, resulting in a \$124 thousand

decrease in net interest income. The provision for loan losses was \$803 thousand for the period, \$1.1 million less than in 2012. Noninterest income decreased 7.0% with nearly all categories of fee income declining from the prior year. Noninterest expense increased 8.2% due to increases in salary and benefits expense. Diluted earnings per share increased to \$.38 in 2013 from \$.34 in 2012.

Key performance ratios as of, or for the three months ended March 31, 2013 and 2012 are listed below:

	March 31,			
	2013		2012	
Performance measurements				
Return on average assets*	0.60	%	0.55	%
Return on average equity*	6.85	%	6.33	%

Allowance for loan losses as a % of loans	1.47	%	1.24	%
Net charge-offs/average loans*	0.13	%	1.14	%
Trust assets under management (fair value)	\$547,212		\$503,336	

* Annualized

(1) Excludes goodwill, intangibles and intangible amortization expense, net of tax

(2) Noninterest expense / tax equivalent net interest income plus noninterest income less net securities gains

(3) Total shareholders' equity less goodwill and intangibles / shares outstanding

(4)Total shareholders' equity less goodwill and intangibles / total assets less goodwill and intangibles

GAAP versus Non-GAAP Presentations – The Corporation supplements its traditional GAAP measurements with Non-GAAP measurements. The Non-GAAP measurements include Return on Average Tangible Assets, Return on Average Tangible Equity, Tangible Book Value and Tangible Common Equity ratio. As a result of merger transactions, intangible assets (primarily goodwill, core deposit intangibles and customer list) were created. The Non-GAAP disclosures are intended to eliminate the effects of the intangible assets and allow for better comparisons to periods when such assets did not exist. However, not all companies use the same calculation methods for the same non-GAAP measurements and therefore may not be comparable. The following table shows the adjustments made between the GAAP and NON-GAAP measurements:

GAAP Measurement	Calculation
Return on Average Assets	Net Income / Average Assets
Return on Average Equity	Net Income / Average Equity
Book Value	Total Shareholders' Equity / Shares Outstanding
Common Equity Ratio	Total Shareholders' Equity / Total Assets
Non- GAAP Measurement	Calculation
Return on Average Tangible Assets	Net Income plus Intangible Amortization (net of tax) / Average Assets less Average Intangible Assets

Tangible Common Equity Ratio	Total Shareholders' Equity less Intangible Assets / Total Assets less Intangible Assets

Comparison of the three months ended March 31, 2013 to the three months ended March 31, 2012:

Net Interest Income

The most important source of the Corporation's earnings is net interest income, which is defined as the difference between income on interest-earning assets and the expense of interest-bearing liabilities supporting those assets. Principal categories of interest-earning assets are loans and securities, while deposits, securities sold under agreements to repurchase (Repos), short-term borrowings and long-term debt are the principal categories of interest-bearing

liabilities. Demand deposits enhance net interest income because they are noninterest-bearing deposits. For the purpose of this discussion, balance sheet items refer to the average balance for the year and net interest income is adjusted to a fully taxable-equivalent basis. This tax-equivalent adjustment facilitates performance comparisons between taxable and tax-free assets by increasing the tax-free income by an amount equivalent to the Federal income taxes that would have been paid if this income were taxable at the Corporation's 34% Federal statutory rate.

Tax equivalent net interest income for the first quarter of 2013 decreased \$114 thousand quarter over quarter. Average interest-earning assets increased \$33.0 million from 2012, but the yield on these assets decreased by 45 basis points. The average balance of investment securities increased \$9.6 million while average loans decreased \$7.4 million (1.0%) quarter over quarter. Average mortgage loans increased \$18.0 million, but the increase was offset by a decrease in the average balance of commercial loans and consumer loans. Average commercial loans decreased \$13.4 million, as commercial loans continue to run-off. Average consumer loans, including home equity loans, decreased \$11.9 million, as consumers continue to borrow less.

Interest expense was \$1.2 million for the first quarter, a decrease of \$725 thousand from the 2012 total of \$2.0 million. Average interest-bearing liabilities increased \$24.0 million to \$830.8 million for 2013 from an average balance of \$806.8 million in 2012. The average cost of these liabilities decreased from .98% in 2012 to .61% in 2013. Average interest-bearing deposits increased \$63.5 million, due to increases in interest checking and savings accounts (\$36.1 million), and money management deposits (\$46.6 million). The cost of interest-bearing deposits decreased from .83% to .58%. Securities sold under agreements to repurchase (Repos) decreased \$5.2 million on average over the prior year quarter while the average rate remained constant at .15% in both years. The average balance of long-term debt decreased by \$34.4 million, primarily due to \$33.1 million of prepayments on seven Federal Home Loan Bank of Pittsburgh (FHLB) advances in 2012.

The changes in the balance sheet and interest rates resulted in an decrease in tax equivalent net interest income of \$114 thousand to \$8.3 million in 2013 compared to \$8.4 million in 2012. The Bank's net interest margin decreased from 3.57% in 2012 to 3.45% in 2013. The decrease in the net interest margin is the result of a decrease in the rate on interest-earning assets of 45 basis points, while the yield on interest-bearing liabilities only decreased 37 basis points. Tax equalized net interest income decreased \$114 thousand during the quarter, due to a \$408 thousand decrease from lower rates, which was partially offset by a \$294 thousand increase volume.

The following table presents average balances, tax-equivalent (T/E) interest income, and yields earned or rates paid on the assets or liabilities. All nontaxable interest income has been adjusted to a tax-equivalent basis using a tax rate of 34%.

(Dollars in thousands)	For the Three Months Ended March 31,

Provision for Loan Losses

For 2013, the Bank recorded net charge-offs of \$239 thousand compared to \$2.1 million in 2012. The charge-offs were more than offset by the first quarter provision expense of \$803 thousand and as a result, the allowance for loan losses (ALL) increased \$564 thousand over year-end 2012. For more information refer to the Loan Quality and Allowance for Loan Losses discussion in the Financial Condition section.

Noninterest Income

For the first quarter of 2013, noninterest income decreased \$179 thousand from the same period in 2012. Investment and trust service fees increased due to higher recurring asset management fees. Loan service charges decreased as mortgage production declined in 2013 compared to 2012. Mortgage banking fees decreased, as 2013 had an impairment charge of \$8 thousand compared to a reversal of previously recorded impairment charges of \$61 thousand in the prior year. Deposit service charges decreased due to lower retail and commercial overdraft fees. Other service charges and fees decreased primarily due to decreases in ATM fees, while debit card income increased. Other income decreased as 2012 contained a nonrecurring insurance recovery on a prior period loss. No securities gains or other than temporary impairment charges were recorded during either period.

The following table presents a comparison of noninterest income for the three months ended March 31, 2013 and 2012:

(Dollars in thousands)	March 31		Change	
	2013	2012	Amount	%
Noninterest Income				
Investment and trust services fees	\$1,019	\$967	\$52	5.4
Loan service charges	250	272	(22)	(8.1)
Mortgage banking activities	(22)	47	(69)	(146.8)
Deposit service charges and fees	436	474	(38)	(8.0)
Other service charges and fees	221	235	(14)	(6.0)
Debit card income	285	275	10	3.6
Increase in cash surrender value of life insurance	152	167	(15)	(9.0)
Other real estate owned	-	38	(38)	(100.0)
Other	43	88	(45)	(51.1)
Total noninterest income	\$2,384	\$2,563	\$(179)	(7.0)

Noninterest Expense

Noninterest expense for the first quarter of 2013 increased \$572 thousand compared to the same period in 2012. The increase in salaries and benefits was primarily due to annual salary adjustments (\$89 thousand) and health insurance expense (\$426 thousand), but these increases were partially offset by a \$128 thousand decrease in pension expense. Health insurance expense in 2012 included a credit of \$334 thousand, due to lower claims expense during the quarter from the Bank's participation in a self-insured health insurance plan. Occupancy and equipment expense increased due to a new branch in Mechanicsburg that opened in the 4th quarter of 2012. Advertising increased due to direct mail costs, while, legal and professional, data processing fees and shares tax expense remained relatively flat year over year. ATM/debit card processing increased from start-up costs incurred by the Bank to begin printing debit cards in house. Other expenses increased due to increases in loan collection expenses.

The following table presents a comparison of noninterest expense for the three months ended March 31, 2013 and 2012:

(Dollars in thousands)	March 31		Change	
	2013	2012	Amount	%
Noninterest Expense				
Salaries and benefits	\$4,214	\$3,796	\$418	11.0

FDIC insurance	245	261	(16)	(6.1)
ATM/debit card processing	181	151	30	19.9
Other	808	771	37	4.8
Total noninterest expense	\$7,582	\$7,010	\$572	8.2

Provision for Income Taxes

For the first quarter of 2013 the Corporation recorded a Federal income tax expense of \$308 thousand compared to \$218 thousand for the same quarter in 2012. Pre-tax income was higher in 2013, due to less provision for loan loss expense, which resulted in higher tax expense. As a result, the effective tax rate increased year over year to 16.6% for the first quarter of 2013 compared to 13.7% for 2012. All taxable income for the Corporation is taxed at a rate of 34%.

Financial Condition

Summary:

At March 31, 2013, assets totaled \$1.054 billion, an increase of \$26.8 million from the 2012 year-end balance of \$1.027 billion. Investment securities increased \$1.5 million, while net loans decreased \$8.0 million. Deposits were up \$27.7 million in the first quarter of 2013 due primarily to increases in money management deposits. Shareholders' equity increased \$1.3 million during the first three months as retained earnings increased approximately \$853 thousand, other comprehensive loss improved \$237 thousand and the Corporation's Dividend Reinvestment Plan (DRIP) added an additional \$192 thousand in new capital.

Cash and Cash Equivalents:

Cash and cash equivalents totaled \$111.8 million at March 31, 2013 an increase of \$34.0 million from the prior year-end balance of \$77.8 million. The increase is due to large inflows of deposits as well as slow loan growth opportunities. The funds are invested in interest-bearing deposit accounts, primarily at the Federal Reserve.

Investment Securities:

The composition of the investment portfolio is virtually unchanged since year-end 2012. Municipal securities and U.S. Agency mortgage-backed securities continue to comprise the greatest portion of the portfolio at 45% and 38% of the portfolio respectively. The Bank invested \$11.6 million during the first quarter divided almost equally between municipal and U.S. Agency mortgage-backed securities.

The investment portfolio had a net unrealized gain of \$2.7 million at the end of the quarter. The municipal bond sector shows the largest net unrealized gain, while the trust-preferred sector has the largest net unrealized loss. The portfolio averaged \$136.5 million for the year with a yield of 2.21% compared to an average of \$126.9 million and a yield of 2.85% for the same period in 2012. The Bank expects the yield on the portfolio to continue to decline as higher yielding bonds pay-down or mature and reinvestment yields remain low.

The equity portfolio is comprised of bank stocks and the Bank and the Corporation each maintain separate equity portfolios. The municipal bond portfolio is well diversified geographically (issuers from within 27 states) and is comprised primarily of general obligation bonds (69%). Most municipal bonds have credit enhancements in the form of private bond insurance or other credit support. The largest geographic municipal bond exposure is to nineteen issuers in the state of Texas with a fair value of \$9.8 million and eleven issuers in the state of Pennsylvania with a fair value of \$6.5 million. The municipal bond portfolio contains \$56.7 million of bonds rated A or higher, \$637 thousand rated lower than A (but above noninvestment grade), and \$2.9 million that are not rated by Moody's rating agency. No municipal bonds are rated below investment grade. The Bank holds variable rate corporate bond in the financial services sector and it is rated A3 by Moody's.

The trust preferred investments are comprised of seven single issuer trust preferred securities with an amortized cost of \$5.9 million and a fair value of \$4.9 million. The Bank has six private-label mortgage backed securities (PLMBS) with an amortized cost of \$2.4 million and a fair value of \$2.4 million.

The amortized cost and estimated fair value of investment securities available for sale as of March 31, 2013 and December 31, 2012:

(Dollars in thousands)	Amortized	Gross	Gross	Fair

		\$ 2,407	\$2,399	\$ (8)				\$ 490

The investment portfolio contained 63 securities with \$33.5 million of temporarily impaired fair value and \$1.5 million in unrealized losses. The unrealized loss position is less than at year-end 2012, but the number of impaired securities is unchanged. The trust preferred sector continues to show the largest unrealized loss at \$1.0 million on

seven securities, a slight improvement from the prior-year end.

For securities with an unrealized loss, Management applies a systematic methodology in order to perform an assessment of the potential for “other-than-temporary” impairment. In the case of debt securities, investments considered for “other-than-temporary” impairment: (1) had a specified maturity or repricing date; (2) were generally expected to be redeemed at par, and (3) were expected to achieve a recovery in market value within a reasonable period of time. In addition, the Bank considers whether it intends to sell these securities or whether it will be forced to sell these securities before maturity. Equity securities are assessed for other-than-temporary impairment based on the length of time of impairment, dollar amount of the impairment and general market and financial conditions relating to specific issues. Accordingly, the impairments identified on debt and equity securities and subjected to the assessment at March 31, 2013 were deemed to be temporary and required no further adjustment to the financial statements, unless otherwise noted.

The following table reflects temporary impairment in the investment portfolio (excluding restricted stock), aggregated by investment category, length of time that individual securities have been in a continuous unrealized loss position and the number of securities in each category as of March 31, 2013 and December 31, 2012:

(Dollars in thousands)	March 31, 2013

The trust preferred portfolio contains the largest unrealized loss in the portfolio. At March 31, 2013 this sector contained seven securities with a fair value of \$4.9 million and an unrealized loss of \$1.0 million, representing a slight improvement over year-end 2012. The trust-preferred securities held by the Bank are single entity issues, not pooled trust preferred securities. Therefore, the impairment review of these securities is based only on the issuer and the security cannot be impaired by the performance of other issuers as if it was a pooled trust-preferred bond. All of the Bank's trust preferred securities are single issue, variable rate notes with long maturities (2027 – 2028). None of these bonds have suspended or missed a dividend payment. At March 31, 2013, the Bank believes it will be able to collect all interest and principal due on these bonds and no other-than-temporary-impairment charges were recorded. See the Trust Preferred Securities table for additional information.

The PLMBS sector shows a gross unrealized loss of \$37 thousand, an improvement over the \$123 thousand unrealized loss at December 31, 2012. These bonds were all rated AAA at time of purchase, but have since experienced rating declines. Some have experienced increased delinquencies and defaults, while others have seen the credit support increase as the bonds paid-down. The Bank monitors the performance of the PLMBS investments on a regular basis and reviews delinquencies, default rates, credit support levels and various cash flow stress test scenarios. In determining the credit related loss, Management considers all principal past due 60 days or more as a loss. If additional principal moves beyond 60 days past due, it will also be considered a loss. As a result of the analysis on PLMBS it was determined that no impairment charge was required at quarter end. The Bank has recorded \$490 thousand of cumulative impairment charges on this portfolio. Management continues to monitor these securities and it is possible that additional write-downs may occur if current loss trends continue. The Bank is currently participating in a class-action lawsuit against one PLMBS servicer that centers on defective warranties and representations made as part of the underwriting process. See the PLMBS table above for additional information.

The following table represents the cumulative credit losses on securities recognized in earnings as of March 31, 2013.

(Dollars in thousands)	Three Months Ended March 31, 2013
Balance of cumulative credit losses on securities, January 1, 2013	\$ 490
Additions for credit losses recorded which were not previously recognized as components of earnings	-
Balance of cumulative credit losses on securities, March 31, 2013	\$ 490

The Bank held \$3.1 million of restricted stock at March 31, 2013. Except for \$30 thousand, this investment represents stock in FHLB Pittsburgh. The Bank is required to hold this stock to be a member of FHLB and it is carried at cost of \$100 per share. FHLB Pittsburgh has repurchased \$521 thousand of its capital stock during the quarter. FHLB stock is evaluated for impairment primarily based on an assessment of the ultimate recoverability of its cost. As a government sponsored entity, FHLB has the ability to raise funding through the U.S. Treasury that can be used to support its operations. There is not a public market for FHLB stock and the benefits of FHLB membership (e.g., liquidity and low cost funding) add value to the stock beyond purely financial measures. Management intends to remain a member of the FHLB and believes that it will be able to fully recover the cost basis of this investment.

Loans:

Residential real estate: This category is comprised of consumer purpose loans secured by residential real estate and to a lesser extent, commercial purpose loans secured by residential real estate. The consumer purpose category represents traditional residential mortgage loans and home equity products (primarily junior liens and lines of credit). Total residential real estate loans increased over 2012 as the result of an increase in residential first lien mortgages. The Bank retained more consumer mortgages in its portfolio. The loans that were retained were identified as part of a selective retention program designed to hold mortgages the Bank believes will have a shorter than average life. The Bank expects to continue the selective retention program throughout 2013 and expects to see this balance continue to increase in 2013. In the first quarter of 2013, the Bank originated \$9.7 million in mortgages, including approximately \$2.6 million for a fee through a third party brokerage agreement. The Bank does not originate or hold any loans that would be considered sub-prime or Alt-A, and does not generally originate mortgages outside of its primary market area.

Home equity lending has continued to be slow and the Bank has seen both the fixed rate loan product and the variable rate line product continue to decline in 2013. Many consumers have seen equity in their homes disappear or have been reluctant to borrow due to uncertainty in the economy. Despite low rates, the Bank expects that home equity lending will not pick up significantly until the overall economy improves.

Commercial purpose loans in this category represent loans made for various business needs, but are secured with residential real estate. In addition to the real estate collateral, it is possible that additional security is provided by personal guarantees or UCC filings. These loans are underwritten as commercial loans and are not originated to be sold.

Residential real estate construction: The largest component of this category represents loans to residential real estate developers (\$10.5 million), while loans for individuals to construct personal residences totaled \$3.9 million at March 31, 2013. The Bank's exposure to residential construction loans is concentrated primarily in south central Pennsylvania. Real estate construction loans, especially land development loans, frequently provide an interest reserve in order to assist the developer during the development stage when minimal cash flow is generated. All real estate construction loans are underwritten in the same manner, regardless of the use of an interest reserve. At March 31, 2013, the Bank had \$10.4 million in residential real estate construction loans funded with an interest reserve and capitalized \$11 thousand of interest from these reserves on active projects. Real estate construction loans are monitored on a regular basis by either an independent third party inspector or the assigned loan officer depending on loan amount or complexity of the project. This monitoring process includes at a minimum, the submission of invoices and AIA documents of costs incurred by the borrower, on-site inspections, and a signature by the assigned loan officer for disbursement of funds.

Commercial loans and commercial real estate: Loans in this category include commercial, industrial, farm, agricultural, and municipal government loans. Collateral for these loans may include commercial real estate, farm real estate, equipment or other business assets. Total commercial loans decreased to \$527.2 million from \$530.6 million at the end of 2012. The largest sectors (by collateral) in the commercial real estate category are: land development (\$54.6 million), hotels and motels (\$42.8 million), farm land (\$41.5 million), office buildings (\$41.3 million) and shopping centers (\$25.5 million). Commercial loans decreased by 2.4% compared to year end. Of the \$3.9 million decrease, \$1.8 million was a pay-off for a loan in nonaccrual. The largest sectors (by industry) in the commercial loan category are: manufacturing (\$25.0 million), retail trade (\$15.8 million) and construction (\$15.8 million). The Bank is very active in its market in pursuing commercial lending opportunities, but supplements in-market growth with purchased loan participations. The Bank purchases commercial loan participations in an effort to increase its commercial lending and diversify its loan mix, both geographically and by industry sector. Purchased loans are originated primarily within the south central Pennsylvania market and are purchased from only a few select counter parties. These loans usually represent an opportunity to participate in larger credits that are not available in market, with the benefit of lower origination and servicing costs. In the first quarter of 2013, the Bank purchased \$1.7 million of loan participations and commitments. At March 31, 2013, the Bank held \$196.4 million in purchased loan participations in its portfolio compared to \$142.9 million at year-end 2012.

Consumer loans decreased \$625 thousand due primarily to regular payments and maturities. The consumer portfolio will continue to run-down, as consumers are unwilling to increase their debt.

The following table a summary of loans outstanding, by primary collateral as of:

(Dollars in thousands)	March 31, 2013	December 31, 2012	Change	
			Amount	%
Residential Real Estate 1-4 Family				
Consumer first liens	\$ 97,331	\$ 93,790	\$3,541	3.8
Consumer junior liens and lines of credit	34,152	35,494	(1,342)	(3.8)
Total consumer	131,483	129,284	2,199	1.7
Commercial first lien	56,569	60,809	(4,240)	(7.0)
Commercial junior liens and lines of credit	6,506	6,794	(288)	(4.2)
Total	63,075	67,603	(4,528)	(6.7)
Total residential real estate 1-4 family	194,558	196,887	(2,329)	(1.2)
Residential real estate - construction				
Consumer purpose	3,856	3,255	601	18.5
Commercial purpose	10,476	12,177	(1,701)	(14.0)
Total residential real estate construction	14,332	15,432	(1,100)	(7.1)
Commercial, industrial and agricultural real estate	364,439	363,874	565	0.2
Commercial, industrial and agricultural	162,808	166,734	(3,926)	(2.4)
Consumer	10,027	10,652	(625)	(5.9)
	746,164	753,579	(7,415)	(1.0)
Less: Allowance for loan losses	(10,943)	(10,379)	(564)	5.4
Net Loans	\$ 735,221	\$ 743,200	\$ (7,979)	(1.1)
Included in the loan balances are the following:				
Net unamortized deferred loan costs	\$ 351	\$ 456		
Unamortized discount on purchased loans	\$ (123)	\$ (129)		
Loans pledged as collateral for borrowings and commitments from:				
FHLB	\$ 588,349	\$ 657,684		
Federal Reserve Bank	109,854	112,613		
	\$ 698,203	\$ 770,297		

Loan Quality:

Management utilizes a risk rating scale ranging from 1 (Prime) to 9 (Loss) to evaluate loan quality. This risk rating scale is used primarily for commercial purpose loans. Consumer purpose loans are identified as either a pass or substandard rating. Substandard consumer loans are loans that are 90 days or more past due and still accruing. Loans rated 1 – 4 are considered pass credits. Loans that are rated 5 are pass credits, but have been identified as credits that are likely to warrant additional attention and monitoring. Loans rated 6 (Other Assets Especially Mentioned - OAEM) or worse begin to receive enhanced monitoring and reporting by the Bank. Loans rated 7 (Substandard) or 8 (Doubtful) exhibit the greatest financial weakness and present the greatest possible risk of loss to the Bank. Nonaccrual loans are rated no better than 7. The following factors represent some of the factors used in determining the risk rating of a borrower: cash flow, debt coverage, liquidity, management, and collateral. Risk ratings, for pass credits, are generally reviewed annually for term debt and at renewal for revolving or renewing debt. The Bank monitors loan quality by reviewing four measurements: (1) loans rated 6 (OAEM) or worse (collectively “watch list”), (2) delinquent loans, (3) other real estate owned (OREO), and (4) net-charge-offs. Management compares trends in these measurements with the Bank’s internally established targets, as well as its national peer group.

Watch list loans exhibit financial weaknesses that increase the potential risk of default or loss to the Bank. However, inclusion on the watch list, does not by itself, mean a loss is certain. The watch list includes both performing and nonperforming loans. Watch list loans totaled \$88.9 million at quarter-end compared to \$104.3 million at the prior year end. The watch list is comprised of \$23.3 million rated 6, \$62.9 million rated 7 and \$2.8 million rated 8. The balance of loans rate 6 or 7 has declined since year-end 2012. The loan, rated 8, represents one loan of a total \$8.1 million relationship (see the Significant Nonaccrual table, Credit 7) and is secured by land for a residential real estate development. When initially rated an 8 at September 30, 2012, there was not sufficient collateral to support the entire \$8.1 million relationship and the doubtful balance represented the potential collateral shortage. The Bank has secured additional collateral to fully secure the loan, but has maintained the 8 rating. The Bank has no loans rated 9 (Loss). The Bank’s Loan Management Committee reviews these loans and risk ratings on a quarterly basis in order to proactively identify and manage problem loans. In addition, a committee meets monthly to discuss possible workout strategies for OREO and all credits rated 7 or worse. Management also tracks other commercial loan risk measurements including high loan to value loans, concentrations, participations and policy exceptions and reports these to the Credit Risk Oversight Committee of the Board of Directors. The Bank also uses a third-party consultant to assist with internal loan review with a goal of reviewing 60% of commercial loans each year. The FDIC defines certain supervisory loan-to-value lending limits. The Bank’s internal loan-to-value limits are all equal to, or have a lower loan-to-value limit, than the supervisory limits. At March 31, 2013, the Bank had loans of \$28.8 million that exceeded the supervisory limit.

Delinquent loans are a result of borrowers’ cash flow and/or alternative sources of cash being insufficient to repay loans. The Bank’s likelihood of collateral liquidation to repay the loans becomes more probable the further behind a borrower falls, particularly when loans reach 90 days or more past due. Management monitors the performance status of loans by the use of an aging report. The aging report can provide an early indicator of loans that may become severely delinquent and possibly result in a loss to the Bank. See Note 7 in the accompanying financial statements for a note that presents the aging of payments in the loan portfolio.

Nonaccruing loans generally represent Management's determination that the borrower will be unable to repay the loan in accordance with its contractual terms and that collateral liquidation may or may not fully repay both interest and principal. It is the Bank's policy to evaluate the probable collectability of principal and interest due under terms of loan contracts for all loans 90-days or more, nonaccrual loans, or impaired loans. Further, it is the Bank's policy to discontinue accruing interest on loans that are not adequately secured and in the process of collection. Upon determination of nonaccrual status, the Bank subtracts any current year accrued and unpaid interest from its income, and any prior year accrued and unpaid interest from the allowance for loan losses. Management continually monitors the status of nonperforming loans, the value of any collateral and potential of risk of loss. Nonaccrual loans are rated no better than 7 (Substandard).

The following table presents a summary of nonperforming assets:

(Dollars in thousands)	March 31, 2013		December 31, 2012	
	Balance	% of Loan Segment	Balance	% of Loan Segment
Nonaccrual loans				
Residential Real Estate 1-4 Family				
First liens	\$ 3,501	2.3	\$ 3,584	2.3
Junior liens and lines of credit	705	1.7	758	1.8
Total	4,206	2.2	4,342	2.2
Residential real estate - construction				
Commercial, industrial and agricultural real estate	554	3.9	557	3.6
Commercial, industrial and agricultural	26,760	7.3	28,659	7.9
Consumer	2,800	1.7	2,836	1.7
Consumer	-	-	-	-
Total nonaccrual loans	34,320		36,394	
Loans past due 90 days or more and not included above				
Residential Real Estate 1-4 Family				
First liens	51		120	
Junior liens and lines of credit	211		112	
Total	262		232	
Residential real estate - construction				
Commercial, industrial and agricultural real estate	-		-	
Commercial, industrial and agricultural	-		-	
Commercial, industrial and agricultural	62		315	
Consumer	14		16	
Total loans past due 90 days or more and still accruing	338		563	
Total nonaccrual and loans past due 90 days or more	34,658		36,957	
Repossessed assets				
Other real estate owned	-		-	
Other real estate owned	5,420		5,127	
Total nonperforming assets	\$ 40,078		\$ 42,084	
Nonaccrual loans to total gross loans	4.60	%	4.83	%
Nonperforming loans to total gross loans	4.64	%	4.90	%
Nonperforming assets to total assets	3.80	%	4.10	%
Allowance for loan losses to nonperforming loans	31.57	%	28.08	%

Loan quality has improved slightly during the first quarter of 2013, as measured by the balance of nonperforming loans (nonaccrual and loans past due 90-days or more). Nonperforming loans have decreased by \$2.3 million with the majority of the decrease coming in the commercial real estate sector. During the first quarter, two large credits were moved off of nonaccrual. One credit for \$1.8 million paid-off and a second credit for \$2.5 million was returned to accrual status. However, these were partially offset by the addition of a new credit for \$2.7 million (Credit 10, Significant Nonaccrual table) to nonaccrual during the quarter. The nonaccrual table identifies the most significant loans in

nonaccrual status. These ten nonaccrual loans account for 81% of the total nonaccrual balance. Also included in the nonaccrual total is \$6.9 million of loans classified as troubled debt restructurings (TDR). A TDR loan is maintained on nonaccrual status until a satisfactory repayment history is established. All of the Bank's TDR loans are in compliance with the modified terms and it is likely that some will be able to be returned to performing status in 2013. It is possible that other nonaccrual loans could be removed from nonaccrual status in 2013. However, it is also possible that other loans may become delinquent and nonperforming loans could remain at a high level due to lengthy workout periods on these loans. All loans on the watch list that are not on nonaccrual or past due 90 days more are considered potential problem loans. Potential problem loans at March 31, 2013 totaled \$54.3 million compared to \$67.3 million at year-end 2012.

The following table provides information on the most significant nonaccrual loans as of March 31, 2013.

(Dollars in thousands)	Balance	ALL Reserve	Nonaccrual Date	Collateral	Location	Last Appraisal(1)
Credit 1 - commercial real estate development	\$3,421	\$ -	Dec-10	1st lien on 92 acres undeveloped commercial real estate	PA	Jan-13 \$3,718
Credit 2 - construction	1,001	-	Aug-11	1st lien on commercial and residential properties and 70 acres of farmland	PA	Oct-11 \$1,280
Credit 3 - live theater productions	2,387	-	Sep-11	1st liens on commercial real estate - performance theaters and business assets	MO & PA	Feb-12 \$4,887
Credit 4 - residential real estate development	2,577	-	Mar-12	1st and 2nd liens on commercial real estate, residential real estate and business assets	PA	Dec-12 \$5,028
Credit 5 - residential real estate development	2,069	-	Jun-12	1st lien residential development land - 75 acres	WV	Jun-12 \$2,550
				2nd lien residential real estate	PA	
Credit 6 - residential real estate development	1,614	-	Apr-12	1st and 2nd liens on residential real estate	PA	May-12 \$2,003
Credit 7 - residential real estate development	8,050	-	Sep-12	1st lien residential real estate development -376 acres and other commercial and residential properties	PA	Mar-13 \$9,910
Credit 8 - warehousing	2,167	-	Oct-12	1st lien on commercial refrigerated warehouse	PA	Dec-11 \$5,995
Credit 9 - agriculture	1,886	-	Oct-12	1st lien on farmland	PA	Aug-12 \$2,666
Credit 10 - agriculture/food production	2,745	820	Mar-13	Liens on land, commercial and residential real estate and business assets	PA	Dec-12 \$4,319
	\$27,917	\$ 820				

(1) Appraisal value, as reported, does not reflect the pay-off of any senior liens or the cost to liquidate the collateral, but does reflect only the Bank's share of the collateral if it is a participated loan.

Credit 1 has been charged down by \$3.1 million since being placed on nonaccrual due to declining appraisal values, including a write-down of \$167 thousand in the first quarter of 2013, due to a reduced appraisal value. This credit is part of a participated loan and it is likely that the lead bank will begin foreclosure action in 2013. Credit 2 is in the process of foreclosure. Credit 3 is a TDR that is performing in accordance with the modified terms. This credit is part of a shared national credit and it is unlikely to return to accrual status until approved by the lead regulatory agency. Credit 4 is a TDR that is performing in accordance with the modified terms and is on nonaccrual until a satisfactory repayment history is established. Credit 5 was written down by \$259 thousand in 2012 and foreclosure action has been initiated on this credit. Credit 6 is exploring external financing to pay off its loan and is considering restructuring options from the Bank, but it is unknown if these efforts will be successful. Credit 7 has provided additional real estate collateral and is in the process of negotiation with the Bank for a possible loan restructuring. Credit 8 is a participated loan and the Bank is in discussion with the lead bank on a workout strategy. Credit 9 is a TDR and is performing in accordance with its modified terms. Credit 10 is a new nonaccrual loan in 2013.

In addition to monitoring nonaccrual loans, the Bank also closely monitors impaired loans and troubled debt restructurings (TDR). A loan is considered to be impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Nonaccrual loans (excluding consumer purpose loans) and TDR loans are considered impaired. In addition, the Bank reviews all other loans rated 7 or worse for impaired status. Impaired loans totaled \$39.2 million at quarter-end compared to \$39.4 million at year-end 2012. See Note 7 in the accompanying financial statements for a note that reports on impaired loans.

A loan is considered a troubled debt restructuring (TDR) if the creditor (the Bank), for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. The Bank reviews all loans rated 5 or worse when it is providing a loan restructure, modification or new credit facility to determine if the action is a TDR. If a TDR loan is placed on nonaccrual status, it remains on nonaccrual status for at least six months to ensure performance. All TDR loans are in compliance with their modified terms. The largest TDR loans that remain on nonaccrual status are referenced as credits 3, 4 and 9 on the Significant Nonaccrual table. All of the TDR loans are commercial purpose loans except for three consumer purpose real estate secured loans totaling \$321 thousand. See Note 6 in the accompanying financial statements for a note that identifies TDR loans in the portfolio.

The Bank holds \$5.4 million of other real estate owned (OREO), comprised of eleven properties compared to \$5.1 million and ten properties at December 31, 2012. The largest property (\$2.8 million, property 2, OREO table below) was added in 2012 and represents a failed residential real estate development in central Pennsylvania. This property was written-down by \$800 thousand in December 2012. During 2013, the Bank has incurred no loss on the sale of, or write-down on OREO property.

The following table provides additional information on significant other real estate owned properties:

March 31, 2013					
(Dollars in thousands)	Date			Location	Last
	Acquired	Balance	Collateral		Appraisal
Property 1	2011	\$ 1,970	unimproved and improved real estate for residential development on four separate tracts totaling 150 acres	PA	Nov-12 \$2,141
Property 2	2012	2,758	1st, 2nd, and 3rd liens residential development land - four tracts with 294 acres	PA	Aug-12 \$3,292
		\$ 4,728			

At March 31, 2013, the Bank had \$410 thousand of residential properties in the process of foreclosure compared to \$121 thousand at the end of 2012.

Allowance for Loan Losses:

Management performs a monthly evaluation of the adequacy of the allowance for loan losses (ALL). The ALL is determined by segmenting the loan portfolio based on the loan's collateral. The Bank further classifies the portfolio based on the primary purpose of the loan, either consumer or commercial. When calculating the ALL, consideration is given to a variety of factors in establishing this estimate including, but not limited to, current economic conditions, diversification of the loan portfolio, delinquency statistics, results of internal loan reviews, historical charge-offs, the adequacy of the underlying collateral (if collateral dependent) and other relevant factors. The Bank begins enhanced monitoring of all loans rated 6 (OAEM) or worse, and obtains a new appraisal or asset valuation for any loan rated 7 (substandard) or worse. Management, at its discretion, may determine that additional adjustments to the appraisal or valuation are required. Valuation adjustments will be made as necessary based on factors, including, but not limited to: the economy, deferred maintenance, industry, type of property/equipment, age of the appraisal, etc. and the knowledge Management has about a particular situation. In addition, the cost to sell or liquidate the collateral is also estimated and deducted from the valuation in order to determine the net realizable value to the Bank. When determining the allowance for loan losses, certain factors involved in the evaluation are inherently subjective and require material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans. Management monitors the adequacy of the allowance for loan losses on an ongoing basis and reports its adequacy quarterly to the Credit Risk Oversight Committee of the Board of Directors. Management believes that the allowance for loan losses at March 31, 2013 is adequate.

The analysis for determining the ALL is consistent with guidance set forth in generally accepted accounting principles (GAAP) and the Interagency Policy Statement on the Allowance for Loan and Lease Losses. The analysis has two components, specific and general allocations. The specific component addresses specific reserves established for impaired loans. A loan is considered to be impaired when, based on current information and events, it is probable that the Bank will be unable to collect all interest and principal payments due according to the originally contracted terms of the loan agreement. Collateral values discounted for market conditions and selling costs are used to establish specific allocations for impaired loans. It is possible that as a result of the credit analysis, a specific reserve is not required for an impaired loan. For impaired loans with balances less than \$100 thousand and consumer purpose loans, a specific reserve analysis is not performed and these loans are added to the general allocation pool. The increase in impaired loans with a specific allowance established is due primarily to the addition of Credit 10 (Significant Nonaccrual table) in 2013. See Note 7 in the accompanying financial statements for a table that reports impaired loans and the specific reserve established for impaired loans.

The general allocation component addresses the reserves established for pools of homogenous loans. The general component includes a quantitative and qualitative analysis. When calculating the general allocation, the Bank segregates its loan portfolio into the following sectors based primarily on the type of supporting collateral: residential real estate, commercial, industrial or agricultural real estate; commercial and industrial (C&I non-real estate), and consumer. The residential real estate sector is further segregated by first lien loans, junior liens and home equity products, and residential real estate construction. The historical loss experience factor was .99% of gross loans at March 31, 2013 compared to 1.05% at December 31, 2012. The quantitative analysis uses the Bank's eight quarter rolling historical loan loss experience adjusted for factors derived from current economic and market conditions that have been determined to have an effect on the probability and magnitude of a loss. The qualitative analysis utilizes a risk matrix that incorporates qualitative and environmental factors such as: loan volume, management, loan review process, credit concentrations, competition, and legal and regulatory issues. These factors are each risk rated from minimal to high risk and in total can add up to a maximum qualitative factor of 37.5 basis points. At quarter-end, this factor was 21.5 basis points, unchanged from December 31, 2012. These factors are determined on the basis of Management's observation, judgment and experience.

Real estate appraisals and collateral valuations are an important part of the Bank's process for determining potential loss on collateral dependent loans and thereby have a direct effect on the determination of loan reserves, charge-offs and the calculation of the allowance for loan losses. As long as the loan remains a performing loan, no further updates to appraisals are required. If a loan or relationship migrates to risk rating of 7 or worse, an evaluation for impairment status is made based on the current information available at the time of downgrade and a new appraisal or collateral valuation is obtained. We believe this practice complies with the regulatory guidance dated December 12, 2010.

In determining the allowance for loan losses, Management, at its discretion, may determine that additional adjustments to the fair value obtained from an appraisal or collateral valuation are required. Adjustments will be made as necessary based on factors, including, but not limited to the economy, deferred maintenance, industry, type of property or equipment etc., and the knowledge Management has about a particular situation. In addition, the cost to sell or liquidate the collateral is also estimated and deducted from the valuation in order to determine the net realizable value to the Bank. If an appraisal is not available, Management may make its best estimate of the real value of the collateral or use last known market value and apply appropriate discounts. If an adjustment is made to the collateral

valuation, this will be documented with appropriate support and reported to the Loan Management Committee.

The following table shows the loans that were evaluated for the allowance for loan losses under a specific reserve (individually) and those that were evaluated under a general reserve (collectively), and the amount of the allowance established in each category as of March 31, 2013:

(Dollars in thousands)	Residential Real Estate 1-4 Family			Commercial Industrial & Agricultural	Commercial Industrial & Agricultural		Consumer Total
	First Liens	Junior Liens & Lines of Credit	Construction	Real Estate			
March 31, 2013							
Loans evaluated for allowance:							
Individually	\$ 3,227	\$ 429	\$ 554	\$ 31,481	\$ 2,799	\$ -	\$ 38,490
Collectively	150,673	40,229	13,778	332,958	160,009	10,027	707,674
Total	\$ 153,900	\$ 40,658	\$ 14,332	\$ 364,439	\$ 162,808	\$ 10,027	\$ 746,164
Allowance established for loans evaluated:							
Individually	\$ 59	\$ -	\$ -	\$ 354	\$ 735	\$ -	\$ 1,148
Collectively	914	296	837	6,328	1,237	183	9,795
Allowance at March 31, 2013	\$ 973	\$ 296	\$ 837	\$ 6,682	\$ 1,972	\$ 183	\$ 10,943

During the first quarter of 2013, \$803 thousand was added to the allowance for loan losses (ALL) through the provision for loan loss expense. This is a sizable reduction from the provision expense of \$2.0 million for the same period in 2012 that was driven by one charge-off of \$1.6 million on a nonperforming commercial real estate loan (Credit 1 Significant Nonaccrual table). The ALL as a percentage of loans was 1.47% at March 31, 2013.

Charged-off loans usually result from: (1) a borrower being legally relieved of loan repayment responsibility through bankruptcy, (2) insufficient collateral sale proceeds to repay a loan; or (3) the borrower and/or guarantor does not own other assets that, if sold, would generate sufficient sale proceeds to repay a loan.

The Bank recorded net loan charge-offs of only \$239 thousand for the first quarter compared to \$2.2 million for the first quarter of 2012. The large 2012 first quarter charge-off discussed previously is the primarily reason for the reduction in net charge-offs. See Note 7 in the accompanying financial statements for additional information on the allowance for loan loss.

The following table presents an analysis of the allowance for loan losses for the periods ended:

(Dollars in thousands)	Residential Real Estate 1-4 Family			Commercial Industrial & Agricultural Real Estate	Commercial Industrial & Agricultural	Consumer	Total
	First Liens	Junior Liens & Lines of Credit	Construction				
Allowance at December 31, 2012	\$ 913	\$ 306	\$ 899	\$ 6,450	\$ 1,620	\$ 191	\$10,379

Net loans charged-off as a percentage of the provision for loan losses			29.76	% 87.44	% 111.08	%	
Allowance as a percentage of loans			1.47	% 1.38	% 1.24	%	
Net charge-offs			\$ 239	\$ 4,569	\$ 2,166		

Deposits:

Total deposits increased \$27.7 million during the first three months of 2013 to \$902.2 million. Non-interest bearing deposits decreased \$8.6 million, while savings and interest-bearing checking increased \$36.8 million and time deposits decreased \$400 thousand. The decrease in non-interest bearing checking accounts occurred primarily in commercial checking accounts (\$4.6 million) and municipal checking accounts (\$3.5 million). The Bank's Money Management product increased \$19.4 million due primarily to an increase in commercial deposits. Retail time deposits decreased since year-end, as customers moved funds to more liquid accounts. As of March 31, 2013, the Bank had \$5.1 million in CDARS reciprocal time deposits included in brokered time deposits and this product accounted for the increase in brokered time deposits.

(Dollars in thousands)	March 31, 2013	December 31, 2012	Change	
			Amount	%
Noninterest-bearing checking	\$ 114,990	\$ 123,623	\$(8,633)	(7.0)
Interest-bearing checking	149,704	135,454	14,250	10.5
Money management	399,479	380,079	19,400	5.1
Savings	60,286	57,165	3,121	5.5
Total interest-bearing checking and savings	609,469	572,698	36,771	6.4
Retail time deposits	125,458	127,861	(2,403)	(1.9)
Brokered time deposits	52,261	50,258	2,003	4.0
Total time deposits	177,719	178,119	(400)	(0.2)
Total deposits	\$ 902,178	\$ 874,440	\$27,738	3.2
Overdrawn deposit accounts reclassified as loans	\$ 95	\$ 128		

Borrowings:

The balance of securities sold under agreements to repurchase, which are accounted for as collateralized financings, decreased \$2.8 million from year-end. The Bank is transitioning customers from this product to a deposit sweep product, which provides full FDIC coverage. This will free-up collateral that was required to cover these balances and will increase the Bank's liquidity. The long-term debt from the FHLB decreased due to scheduled amortization and maturities.

Shareholders' Equity:

Total shareholders' equity increased \$1.3 million to \$92.9 million at March 31, 2013, compared to \$91.6 million at the end of 2012. The increase in retained earnings from the Corporation's net income of \$1.6 million was partially offset by the cash dividend of \$698 thousand. The Corporation's dividend payout ratio is 45.0% for the first quarter of 2013 compared to 79.6% in 2012.

As part of its quarterly dividend decision, the Corporation considers current and future income projections, dividend yield, payout ratio, and current and future capital ratios. In January 2013, the Board of Directors declared a \$.17 per share regular quarterly dividend for the first quarter of 2013. This compares to a regular quarterly cash dividend of \$.27 paid in the first quarter of 2012.

In addition, the Corporation considers how dividend decisions may affect the Dividend Reinvestment Plan (DRIP), which has raised \$193 thousand in new capital this year with 12,632 new shares purchased. The Corporation continually explores other sources of capital as part of its capital management plan for the Corporation and the Bank. The Corporation did not repurchase any shares of the Corporation's common stock during the first three months of 2013.

Capital adequacy is currently defined by regulatory agencies through the use of several minimum required ratios. At March 31, 2013, the Corporation was well capitalized as defined by the banking regulatory agencies. Regulatory capital ratios for the Corporation and the Bank are shown below:

(Dollars in thousands)	March 31, 2013		December 31, 2012	Regulatory Ratios			
				Well Capitalized		Minimum	
Total Risk-based Capital Ratio							
Franklin Financial Services Corporation	13.06	%	12.60	%	8.00	%	N/A
Farmers & Merchants Trust Company	12.67	%	12.22	%	8.00	%	10.00 %
Tier 1 Risk-based Capital Ratio							
Franklin Financial Services Corporation	11.80	%	11.36	%	4.00	%	N/A
Farmers & Merchants Trust Company	11.40	%	10.97	%	4.00	%	6.00 %
Tier 1 Leverage Ratio							
Franklin Financial Services Corporation	8.40	%	8.29	%	4.00	%	N/A
Farmers & Merchants Trust Company	8.10	%	7.99	%	4.00	%	5.00 %

Economy

The Corporation's primary market area includes Franklin, Fulton, Cumberland and Huntingdon County, PA. This area is diverse in demographic and economic makeup. County populations range from a low of approximately 15,000 in Fulton County to over 238,000 in Cumberland County. Unemployment in the Bank's market area has remained virtually unchanged over the past year and ranges from a low of 6.9% in Cumberland County to high of 10.6% in Fulton County. The market area has a diverse economic base and local industries include, warehousing, truck & rail shipping centers, light and heavy manufacturers, health-care, higher education institutions, farming and agriculture, and a varied service sector. The Corporation's primary market area is located in south central Pennsylvania and provides easy access to the major metropolitan markets on the east coast via trucking and rail transportation. Because of this, warehousing and distribution companies continue to find the area attractive. The local economy is not overly dependent on any one industry or business and Management believes that the Bank's primary market area continues to be well suited for growth as the recession eases.

The following provides selected economic data for the Bank's primary market:

Economic Data

	March 31, 2013		December 31, 2012	
Unemployment Rate (seasonally adjusted)				
Market area range (1)	7.5 - 12.5	%	6.7% - 10	%
Pennsylvania	8.8	%	7.9	%
United States	8.3	%	9.0	%
Housing Price Index - year over year change				
PA, nonmetropolitan statistical area	0.3	%	-3.3	%
United States	0.4	%	-4.5	%
Franklin County Building Permits - year over year change				
Residential, estimated	5.9	%	-34.3	%
Multifamily, estimated	410.7	%	-73.4	%

(1) Franklin, Cumberland, Fulton and Huntingdon Counties

Unlike many companies, the assets and liabilities of the Corporation are financial in nature. As such, interest rates and changes in interest rates may have a more significant effect on the Corporation's financial results than on other types of industries. Because of this, the Corporation watches the actions of the Federal Reserve Open Market Committee (FOMC) as it makes decisions about interest rate changes. The FOMC continues to hold short-term rates at historic lows. The FOMC recently announced that it would hold short-term rates at the current levels until the unemployment rate falls to 6.5% and the inflation rate does not go above 2.5%. With the current unemployment rate hovering just under 8%, it is expected that the low rate environment will be ongoing well beyond 2013. A continued period of low rates will continue to have negative effects on the Bank's net interest margin as assets continue to be booked or repriced at lower rates, and liabilities rates can not be lowered significantly.

Liquidity

The Corporation must meet the financial needs of the customers that it serves, while providing a satisfactory return on the shareholders' investment. In order to accomplish this, the Corporation must maintain sufficient liquidity in order to respond quickly to the changing level of funds required for both loan and deposit activity. The goal of liquidity management is to meet the ongoing cash flow requirements of depositors who want to withdraw funds and of borrowers who request loan disbursements. The Bank regularly reviews its liquidity position by measuring its projected net cash flows (in and out) at a 30 and 90-day interval. The Bank stresses this measurement by assuming a level of deposit out-flows that have not historically been realized. In addition to this forecast, other funding sources are reviewed as a method to provide emergency funding if necessary. The objective of this measurement is to identify the amount of cash that could be raised quickly without the need to liquidate assets. The Bank also stresses its liquidity position utilizing different longer-term scenarios. The varying degrees of stress create pressure on deposit flows in its local market, reduce access to wholesale funding and limit access of funds available through brokered deposit channels. In addition to stressing cash flow, specific liquidity risk indicators are monitored to help identify risk areas. This analysis will help identify and quantify the potential cash surplus/deficit over a variety of time horizons to ensure the Bank has adequate funding resources. Assumptions used for liquidity stress testing are subjective. Should an evolving liquidity situation or business cycle present new data, potential assumption changes will be considered. The Bank believes it can meet all anticipated liquidity demands.

Historically, the Corporation has satisfied its liquidity needs from earnings, repayment of loans and amortizing investment securities, maturing investment securities, loan sales, deposit growth and its ability to access existing lines of credit. All investment securities are classified as available for sale; therefore, securities that are not pledged as collateral for borrowings are an additional source of readily available liquidity, either by selling the security or, more preferably, to provide collateral for additional borrowing. At March 31, 2013, the Bank had approximately \$129 million (fair value) in its investment portfolio pledged as collateral for deposits and Repos. Another source of available liquidity for the Bank is a line of credit with the FHLB. At March 31, 2013, the Bank had approximately \$35 million available on this line of credit and \$16 million of unsecured lines of credit at correspondent banks.

In December 2011, FHLB notified the Bank it was being placed on full collateral delivery status. This status means that the Bank's ability to borrow from FHLB is reduced to the value of the collateral physically delivered to FHLB. Prior to this change, the Bank's borrowing capacity was determined by the value of all real estate loan collateral pledged to FHLB. This status is determined by an internal scorecard developed by the FHLB in its sole discretion. The Bank quickly responded to this request and delivered additional collateral above what was required by FHLB. At March 31, 2013, the Bank had an excess borrowing capacity of \$65.4 million, which includes the amount available on the line of credit. However, this amount is well below the available capacity prior to the collateral delivery requirement. The Bank expects that it will remain on collateral delivery status throughout.

The FHLB system has always been a major source of funding for community banks. The capital level of the Pittsburgh FHLB, and the entire FHLB system, has been strained due to the declining value of mortgage related assets. The Pittsburgh FHLB has already implemented steps to improve its capital position that included a suspension of its dividend and an end to its practice of redeeming members' stock. Both of these actions are not favorable to the Bank. There are no indicators that lead the Bank to believe the FHLB will discontinue its lending function. If that were to occur, it would have a negative effect on the Bank and it is unlikely that the Bank could replace the level of FHLB funding in a short time. Another action that may be considered by FHLB to increase its capital is to have a capital call on its member banks. This would require the member banks to invest more capital into the FHLB when most banks would prefer not make such an investment.

The Bank has established credit at the Federal Reserve Discount Window and as of quarter-end had the ability to borrow approximately \$53 million.

Off Balance Sheet Commitments

The Corporation's financial statements do not reflect various commitments that are made in the normal course of business, which may involve some liquidity risk. These commitments consist mainly of unfunded loans and letters of credit made under the same standards as on-balance sheet instruments. Because these instruments have fixed maturity dates, and because many of them will expire without being drawn upon, they do not generally present any significant liquidity risk to the Corporation. Unused commitments and standby letters of credit totaled \$211.6 million and \$223.6 million, respectively, at March 31, 2013 and December 31, 2012.

The Corporation has entered into various contractual obligations to make future payments. These obligations include time deposits, long-term debt, operating leases, deferred compensation and pension payments. These amounts have not changed materially from those reported in the Corporation's 2012 Annual Report on Form 10-K.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There were no material changes in the Corporation's exposure to market risk during the three months ended March 31, 2013. For more information on market risk refer to the Corporation's 2012 Annual Report on Form 10-K.

Item 4. Controls and Procedures

Evaluation of Controls and Procedures

The Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon the evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that as of March 31, 2013, the Corporation's disclosure controls and procedures are effective. Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

The management of the Corporation is responsible for establishing and maintaining adequate internal control over financial reporting. The Corporation's internal control system is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Part II – OTHER INFORMATION

Item 1. Legal Proceedings

The nature of the Corporation's business generates a certain amount of litigation involving matters arising in the ordinary course of business. However, in management's opinion, there are no proceedings pending to which the Corporation is a party or to which our property is subject, which, if determined adversely to the Corporation, would be material in relation to our shareholders' equity or financial condition. In addition, no material proceedings are pending or are known to be threatened or contemplated against us by governmental authorities or other parties.

Item 1A. Risk Factors

There were no material changes in the Corporation's risk factors during the three months ended March 31, 2013. For more information, refer to the Corporation's 2012 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Defaults by the Company on its Senior Securities

None

Item 4. Mine Safety Disclosures

Not Applicable

Item 5. Other Information

None

Item 6. Exhibits

Exhibits

3.1 Articles of Incorporation of the Corporation. (Filed as Exhibit 3.1 to Annual Report on Form 10-K for the year ended December 31, 2005 and incorporated herein by reference.)

3.2 Bylaws of the Corporation. (Filed as Exhibit 99 to Current Report on Form 8-K filed on December 20, 2004 and incorporated herein by reference.)
