Note 1 – Business Organization, Nature of Operations and Basis of Presentation

BioRestorative Therapies, Inc. (together with its subsidiaries, “BRT” or the “Company”) develops therapeutic products and medical therapies using cell and tissue protocols, primarily involving adult stem cells. BRT’s website is at www.biorestorative.com. BRT is currently pursuing a Disc/Spine Program. Its lead cell therapy candidate, brtxDISC™ (Disc Implanted Stem Cells), is a product formulated from autologous (or a person’s own) cultured mesenchymal stem cells collected from the patient’s bone marrow. The product is intended to be used for the non-surgical treatment of protruding and bulging lumbar discs in patients suffering from chronic lumbar disc disease. BRT is also engaging in research efforts with respect to a platform technology utilizing brown adipose (fat) for therapeutic purposes and has labeled this initiative its ThermoStem® Program. Through the program, BRT is developing an allogeneic cell-based therapy to target obesity and metabolic disorders using brown adipose (fat) derived stem cells to generate brown adipose tissue (“BAT”). BAT is intended to mimic naturally occurring brown adipose depots that regulate metabolic homeostasis in humans. Further, BRT has developed an ingredient derived from human adult stem cells, which can be used by third party companies in the development of their own skin care products. The ingredient was developed pursuant to BRT’s brtx-C Cosmetic Program. BRT’s Stem Pearls® brand offers plant stem cell-based cosmetic skincare products that are available for purchase online at www.stempearls.com.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information. Accordingly, they do not include all of the information and disclosures required by GAAP for annual financial statements. In the opinion of management, such statements include all adjustments (consisting only of normal recurring items) which are considered necessary for a fair presentation of the condensed consolidated financial statements of the Company as of September 30, 2015 and for the three and nine months ended September 30, 2015 and 2014. The results of operations for the three and nine months ended September 30, 2015 are not necessarily indicative of the operating results for the full year ending December 31, 2015 or any other period. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related disclosures of the Company as of December 31, 2014 and for the year then ended, which were filed with the Securities and Exchange Commission on Form 10-K on March 31, 2015.

Effective January 1, 2015, the Company changed its state of incorporation from the State of Nevada to the State of Delaware pursuant to a plan of conversion, dated December 22, 2014 (the “Plan of Conversion”). Pursuant to the Plan of

Conversion, the Company also adopted new bylaws, which became effective on January 1, 2015.

Effective July 7, 2015, pursuant to authority granted by the stockholders of the Company, the Company implemented a 1-for-20 reverse split of the Company's issued and outstanding common stock (the "Reverse Split") and a reduction in the number of shares of common stock authorized to be issued by the Company from 200,000,000 to 30,000,000. All share and per share information has been retroactively adjusted to reflect the Reverse Split for all periods presented, unless otherwise indicated.

Note 2 – Going Concern and Management Plans

As of September 30, 2015, the Company had a working capital deficiency and a stockholders' deficiency of \$5,080,425 and \$3,776,160, respectively. During the three and nine months ended September 30, 2015, the Company incurred net losses of \$1,623,835 and \$4,804,254, respectively. These conditions raise substantial doubt about the Company's ability to continue as a going concern.

The Company's primary source of operating funds since inception has been equity and debt financings. The Company intends to continue to raise additional capital through debt and equity financings. There is no assurance that these funds will be sufficient to enable the Company to fully complete its development activities or attain profitable operations. If the Company is unable to obtain such additional financing on a timely basis or, notwithstanding any request the Company may make, the Company's debt holders do not agree to convert their notes into equity or extend the maturity dates of their notes, the Company may have to curtail its development, marketing and promotional activities, which would have a material adverse effect on the Company's business, financial condition and results of operations, and ultimately the Company could be forced to discontinue its operations and liquidate.

Note 2 – Going Concern and Management Plans - Continued

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with GAAP, which contemplate continuation of the Company as a going concern and the realization of assets and satisfaction of liabilities in the normal course of business. The carrying amounts of assets and liabilities presented in the financial statements do not necessarily purport to represent realizable or settlement values. The unaudited condensed consolidated financial statements do not include any adjustment that might result from the outcome of this uncertainty.

Subsequent to September 30, 2015, the Company has raised an aggregate of \$637,500 and \$150,000 through private equity financing and debt financing, respectively, and \$405,000 and \$65,002 of debt and accrued interest, respectively, has been exchanged for or converted into common stock. The Company currently expects to be able to fund its operations through December 2015. While there can be no assurance that it will be successful, the Company is in active negotiations to raise additional capital. As of the filing date of this report, the Company has notes payable with an aggregate principal balance of \$646,703 which are past due. The Company is currently in the process of negotiating extensions or discussing conversions to equity with respect to these notes. However, there can be no assurance that the Company will be successful in extending or converting these notes. See Note 8 – Subsequent Events for additional details.

Note 3 – Summary of Significant Accounting Policies

Principles of Consolidation

The unaudited condensed consolidated financial statements of the Company include the accounts of Stem Cell Cayman Ltd. (“Cayman”) and Stem Pearls, LLC. All significant intercompany transactions have been eliminated in the consolidation.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the periods. The Company's significant estimates and assumptions include the recoverability and useful lives of long-lived assets, the fair value of the Company's stock, stock-based compensation, warrants issued in connection with notes payable and the valuation allowance related to the Company's deferred tax assets. Certain of the Company's estimates, including the carrying amount of the intangible assets, could be affected by external conditions, including those unique to the Company and general economic conditions. It is reasonably possible that these external factors could have an effect on the Company's estimates and could cause actual results to differ from those estimates.

Concentrations and Credit Risk

Two pharmaceutical clients comprised substantially all of the Company's revenue during the three and nine months ended September 30, 2015. See Revenue Recognition – Research and Development Agreements below.

Revenue Recognition

Research and Development Agreements

The Company's policy relating to research and development agreements is to recognize research and development revenues associated with such agreements either (a) on a straight-line basis over the term of the agreement, or (b) in accordance with the milestone method of revenue recognition, depending on the nature of the contract terms, subject to potential acceleration upon achievement of contractually specified deliverables.

On February 11, 2015, the term of the March 19, 2014 research and development agreement with a Japanese pharmaceutical company was extended by three months to June 19, 2015. During the three and nine months ended September 30, 2015, the Company recognized revenue of \$0 and \$100,000, respectively, upon achievement of specified deliverables (milestone method). During the nine months ended September 30, 2015, the final deliverable pursuant the research and development agreement was completed and delivered. Through September 30, 2015, \$250,000 had been received under the agreement and had been recognized as revenue.

Other

The Company's policy is to recognize product sales when the risk of loss and title to the product transfers to the customer, after taking into account potential returns. The Company recognizes sublicensing and royalty revenue when all of the following have occurred: (i) persuasive evidence of an arrangement exists, (ii) the service is completed without further obligation, (iii) the sales price to the customer is fixed or determinable, and (iv) collectability is reasonably assured.

Edgar Filing: BioRestorative Therapies, Inc. - Form 10-Q

Net Loss Per Common Share

Basic loss per common share is computed by dividing net loss by the weighted average number of vested common shares outstanding during the period. Diluted loss per common share is computed by dividing net loss by the weighted average number of vested common shares outstanding, plus the impact of common shares, if dilutive, resulting from the exercise of outstanding stock options and warrants, plus the conversion of convertible notes.

The following securities are excluded from the calculation of weighted average dilutive common shares because their inclusion would have been anti-dilutive:

Note 3 – Summary of Significant Accounting Policies - Continued

Stock-Based Compensation

The Company measures the cost of services received in exchange for an award of equity instruments based on the fair value of the award. For employees, the fair value of the award is measured on the grant date and for non-employees, the fair value of the award is generally re-measured on vesting dates and interim financial reporting dates until the service period is complete. The fair value amount is then recognized over the period during which services are required to be provided in exchange for the award, usually the vesting period. Since the shares underlying the Company's 2010 Equity Participation Plan (the "Plan") were registered on May 27, 2014, the Company estimates the fair value of the awards granted under the Plan based on the market value of its freely tradable common stock as reported on the OTCQB market. The fair value of the Company's restricted equity instruments was estimated by management based on observations of the cash sales prices of both restricted shares and freely tradable shares. Awards granted to directors are treated on the same basis as awards granted to employees.

Subsequent Events

The Company evaluates events that have occurred after the balance sheet date but before the financial statements are issued. Based upon the evaluation, the Company did not identify any recognized or non-recognized subsequent events that would have required adjustment or disclosure in the condensed consolidated financial statements, except as disclosed in Note 8.

Note 4 – Accrued Expenses and Other Current Liabilities

Warrant and Option Valuation

The Company has computed the fair value of warrants and options granted using the Black-Scholes option pricing model. Option forfeitures are estimated at the time of valuation and reduce expense ratably over the vesting period. This estimate will be adjusted periodically based on the extent to which actual option forfeitures differ, or are expected to differ, from the previous estimate, when it is material. The Company estimated forfeitures related to option grants at annual rates ranging from 0% to 5% for options granted during the three and nine months ended September 30, 2015 and 2014. The expected term used for warrants and options issued to non-employees is the contractual life and the expected term used for options issued to employees is the estimated period of time that options granted are expected to be outstanding. The Company utilizes the “simplified” method to develop an estimate of the expected term of “plain vanilla” employee option grants. Since the Company’s stock has not been publicly traded for a sufficiently long period of time, the Company is utilizing an expected volatility figure based on a review of the historical volatilities, over a period of time, equivalent to the expected life of the instrument being valued, of similarly positioned public companies within its industry. The risk-free interest rate was determined from the implied yields from U.S. Treasury zero-coupon bonds with a remaining term consistent with the expected term of the instrument being valued.

Overview

We develop therapeutic products and medical therapies using cell and tissue protocols, primarily involving adult (non-embryonic) stem cells. We are currently pursuing our Disc/Spine Program with our initial therapeutic product being called brtxDISC (Disc Implanted Stem Cells). We have obtained a license to use technology for adult stem cell treatment of disc and spine conditions, including protruding and bulging lumbar discs. The technology is an advanced stem cell injection procedure that may offer relief from lower back pain, buttock and leg pain, and numbness and tingling in the legs and feet. We are also developing our ThermoStem Program. This pre-clinical program involves the use of brown fat in connection with the cell-based treatment of type 2 diabetes and obesity as well as hypertension, other metabolic disorders and cardiac deficiencies. A United States patent related to the ThermoStem Program issued in September 2015.

We are developing a patented curved needle device, or CND, that is a needle system to allow access to difficult to locate regions for the delivery or removal of fluids and other substances. We also offer stem cell derived cosmetic and skin care products.

We have relocated our offices to Melville, New York where we have established a new laboratory facility in order to increase our capabilities for the further development of possible cellular-based treatments, products and protocols, stem cell-related intellectual property and translational research applications.

As of September 30, 2015, our accumulated deficit was \$30,204,280, our stockholders' deficiency was \$3,776,160 and our working capital deficiency was \$5,080,425. While we have recently generated a modest amount of revenue, our losses have principally been operating expenses incurred in research and development, marketing and promotional activities in order to commercialize our products and services, plus costs associated with meeting the requirements of being a public company. We expect to continue to incur substantial costs for these activities over at least the next year.

Based upon our working capital deficiency as of September 30, 2015 and our forecast for continued operating losses, we require equity and/or debt financing to continue our operations. As of September 30, 2015, our outstanding debt of \$1,740,703, together with interest at stated rates ranging between 1% and 15% per annum, was due on various dates through March 2016. Subsequent to September 30, 2015, we have received aggregate private equity and debt financing of \$637,500 and \$150,000, respectively, and \$405,000 and \$65,002 of debt and accrued interest, respectively, has been exchanged for or converted into common stock. Giving effect to the above actions, we currently have notes payable aggregating \$646,703 which are past due. Based upon our working capital deficiency and outstanding debt, we expect to be able to fund our operations through December 2015. We are currently in the process of negotiating extensions or discussing conversions to equity with respect to these notes. We are currently considering several different financing alternatives to support our operations thereafter. If we are unable to obtain such additional financing on a timely basis or, notwithstanding any request we may make, our debt holders do not agree to convert their notes into equity or extend the maturity dates of their notes, we may have to curtail our development, marketing and promotional activities, which would have a material adverse effect on our business, financial condition and results of operations, and ultimately we could be forced to discontinue our operations and liquidate. See “Liquidity and Capital Resources” below.

In the event that we fail to cause the appointment and election of the investor to our Board of Directors within 30 days of the closing, the investor shall have a right to require us to repurchase the Shares for the purchase price paid by the investors (\$4.00 per Share) and the Warrant shall be deemed cancelled. In the event that the Board of Directors fails to adopt a certain resolution relating to corporate opportunities or any time proposes to or does rescind, revoke or modify such resolution, the investor shall have a right to cause us to repurchase the Shares for a purchase price per Share equal to the greater of (a) \$4.00 or (b) the average of the closing prices of our common stock on the five trading days immediately preceding the date of the repurchase.

In the event that, prior to the maturity date, we receive any proceeds from a public equity offering or monies in payment of an accounts receivable, then, we shall be obligated to prepay the principal and interest on a dollar-for-dollar basis to the extent of such monies so received, but not to exceed the outstanding principal and interest balance of the note. The note is secured by a security interest in a patent held by us associated with its brown fat program.

Based upon our working capital deficiency and stockholders' deficiency of \$5,080,425 and \$3,776,160, respectively, as of September 30, 2015, we require additional equity and/or debt financing to continue our operations. These conditions raise substantial doubt about our ability to continue as a going concern.

As of September 30, 2015, our outstanding debt of \$1,740,703, together with interest at stated rates ranging between 1% and 15% per annum, was due on various dates through March 2016. Subsequent to September 30, 2015, we have received aggregate private equity and debt financing of \$637,500 and \$150,000, respectively, and \$405,000 and \$65,002 of debt and accrued interest, respectively, has been exchanged for or converted into common stock. Giving effect to the above actions, we currently have notes payable aggregating \$646,703 which are past due. As of the date of filing, our outstanding debt was as follows:

Maturity Date	Principal Amount
Past Due	\$646,703
QE 12/31/15	504,000
QE 3/31/16	310,000
	\$1,460,703

Based upon our working capital deficiency, outstanding debt and forecast for continued operating losses we expect that the cash we currently have available will fund our operations through December 2015. Thereafter, we will need to raise further capital, through the sale of additional equity or debt securities, to support our future operations and to repay our debt (unless, if requested, the debt holders agree to convert their notes into equity or extend the maturity dates of their notes). Our operating needs include the planned costs to operate our business, including amounts required to fund working capital and capital expenditures. Our future capital requirements and the adequacy of our available funds will depend on many factors, including our ability to successfully commercialize our products and services, competing technological and market developments, and the need to enter into collaborations with other companies or acquire other companies or technologies to enhance or complement our product and service offerings.

We may be unable to raise sufficient additional capital when we need it or raise capital on favorable terms. Debt financing may require us to pledge certain assets and enter into covenants that could restrict certain business activities or our ability to incur further indebtedness, and may contain other terms that are not favorable to our stockholders or us. If we are unable to obtain adequate funds on reasonable terms, we may be required to significantly curtail or discontinue operations or obtain funds by entering into financing agreements on unattractive terms.

Our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplate our continuation as a going concern and the realization of assets and satisfaction of liabilities in the normal course of business. The carrying amounts of assets and liabilities presented in the financial statements do not necessarily purport to represent realizable or settlement values. The financial statements do not include any adjustment that might result from the outcome of this uncertainty.

During the nine months ended September 30, 2015 and 2014, our sources and uses of cash were as follows:

Net Cash Used in Operating Activities

We experienced negative cash flow from operating activities for the nine months ended September 30, 2015 and 2014 in the amounts of \$2,068,004 and \$2,593,593, respectively. The net cash used in operating activities for the nine months ended September 30, 2015 was primarily due to cash used to fund a net loss of \$4,804,254, adjusted for net non-cash expenses in the aggregate amount of \$1,354,756 partially offset by \$1,381,494 of net cash provided by changes in the levels of operating assets and liabilities, primarily as a result of increases in accrued interest, expenses and other current liabilities and accounts payable. The net cash used in operating activities for the nine months ended September 30, 2014 was primarily due to cash used to fund a net loss of \$4,103,269, adjusted for non-cash expenses in the aggregate amount of \$1,427,453 partially offset by \$82,223 of net cash provided by changes in the levels of operating assets and liabilities, primarily as a result of increases in accrued interest, expenses and other current liabilities and deferred revenues, partially offset by a decrease in accounts payable.

Net Cash Used in by Investing Activities

During the nine months ended September 30, 2015, \$360,466 of cash was used to purchase fixed assets and \$75,000 was used to retain the exclusivity of our disc/spine license. During the nine months ended September 30, 2014, \$1,526 of cash was used to purchase laboratory equipment and \$980 of cash was provided by proceeds received from the sale of fixed assets.

Net Cash Provided by Financing Activities

Net cash provided by financing activities during the nine months ended September 30, 2015 and 2014 was \$2,424,465 and \$2,767,011, respectively. During the nine months ended September 30, 2015, \$1,071,515 of net proceeds were from debt financings and \$1,361,000 of proceeds were from equity financings. During the nine months ended September 30, 2014, \$592,010 of proceeds were from debt financings and \$2,175,001 of proceeds were from equity financings (including \$80,000 of proceeds received in connection with the exercise of common stock purchase warrants).

Critical Accounting Policies and Estimates

There are no material changes from the critical accounting policies set forth in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of our Form 10-K for the year ended December 31, 2014 filed with the Securities and Exchange Commission on March 31, 2015. Please refer to that document for disclosures regarding the critical accounting policies related to our business.

Item 3: Quantitative and Qualitative Disclosures About Market Risk

Not applicable.

Item 4: Controls and Procedures

Disclosure Controls and Procedures

Disclosure controls are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), such as this Quarterly Report, is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including the Principal Executive and Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Internal controls are procedures which are designed with the objective of providing reasonable assurance that (1) our transactions are properly authorized, recorded and reported; and (2) our assets are safeguarded against unauthorized or improper use, to permit the preparation of our condensed consolidated financial statements in conformity with United States generally accepted accounting principles.

In connection with the preparation of this Quarterly Report on Form 10-Q for the quarter ended September 30, 2015, management, with the participation of our Principal Executive and Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e) and 15d-15(e)). Based upon that evaluation, our Principal Executive and Financial Officer concluded that, as of the end of the period covered by this Quarterly Report on Form 10-Q, our disclosure controls and procedures were effective.

Changes in Internal Controls

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f)) during the quarter ended September 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations of the Effectiveness of Control

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations of any control system, no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

Not applicable.

Item 1A. Risk Factors.

Not applicable. See, however, Item 7 (“Management’s Discussion and Analysis of Financial Condition and Results of Operations - Factors That May Affect Future Results and Financial Condition”) of our Annual Report on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission on March 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

During the three months ended September 30, 2015, we issued the following securities in transactions not involving any public offering. For each of the following transactions, we relied upon Section 4(a)(2) of the Securities Act of 1933, as amended, as transactions by an issuer not involving any public offering. For each such transaction, we did not use general solicitation or advertising to market the securities, the securities were offered to a limited number of persons, the investors had access to information regarding us (including information contained in our Annual Report on Form 10-K for the year ended December 31, 2014, in some cases our Quarterly Reports on Form 10-Q for the periods ended March 31, 2015 and June 30, 2015, and Current Reports on Form 8-K filed with the Securities and Exchange Commission and press releases made by us), and we were available to answer questions from prospective investors. We reasonably believe that each of the investors is an accredited investor. The proceeds were used to reduce our working capital deficit.

Date Issued	Common Stock	Warrants			Purchaser(s)	Consideration (1)

7/2/15	5,000	1,250	\$ 15.00	5	(2) \$ 30,000

9/9/15	16,667	8,333	10.00	5	(2) \$ 100,000	

The value of the non-cash consideration was estimated to be the fair value of our restricted common stock. Since (1) our shares are thinly traded in the open market, the fair value of our equity instruments was estimated by management based on observations of the cash sales prices of both restricted shares and freely tradable shares.
