Form 10-Q
August 05, 2016

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

**x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the Quarterly Period Ended June 30, 2016

OR

**“ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number 0-18279

The Community Financial Corporation

(Exact name of registrant as specified in its charter)

Maryland 52-1652138
(State of other jurisdiction of (I.R.S. Employer

incorporation or organization) Identification No.)

3035 Leonardtown Road, Waldorf, Maryland 20601
(Address of principal executive offices) (Zip Code)

(301) 645-5601

(Registrant's telephone number, including area code)

Not applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer
Non-accelerated Filer Smaller Reporting Company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of July 29, 2016, the registrant had 4,657,028 shares of common stock outstanding.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 1 – BASIS OF PRESENTATION

The consolidated financial statements of The Community Financial Corporation (the “Company”) and its wholly owned subsidiary, Community Bank of the Chesapeake (the “Bank”), and the Bank’s wholly owned subsidiary, Community Mortgage Corporation of Tri-County, included herein are unaudited.

The consolidated financial statements reflect all adjustments consisting only of normal recurring accruals that, in the opinion of management, are necessary to present fairly the Company’s financial condition, results of operations, and cash flows for the periods presented. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. The Company believes that the disclosures are adequate to make the information presented not misleading. The balances as of December 31, 2015 have been derived from audited financial statements. There have been no significant changes to the Company’s accounting policies as disclosed in the 2015 Annual Report. The results of operations for the three and six months ended June 30, 2016 are not necessarily indicative of the results of operations to be expected for the remainder of the year or any other period. Certain previously reported amounts have been restated to conform to the 2016 presentation.

These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes included in the Company’s 2015 Annual Report.

NOTE 2 – NATURE OF BUSINESS

The Company provides a variety of financial services to individuals and businesses through its offices in Southern Maryland and Fredericksburg, Virginia. Its primary deposit products are demand, savings and time deposits, and its primary lending products are commercial and residential mortgage loans, commercial loans, construction and land development loans, home equity and second mortgages and commercial equipment loans.

The Bank conducts business through its main office in Waldorf, Maryland, and eleven branch offices in Waldorf, Bryans Road, Dunkirk, Leonardtown, La Plata, Charlotte Hall, Prince Frederick, Lusby, California, Maryland; and Fredericksburg, Virginia. The Company maintains five loan production offices (“LPOs”) in Annapolis, La Plata, Prince Frederick and Leonardtown, Maryland; and Fredericksburg, Virginia. The Leonardtown and Fredericksburg LPOs are co-located with branches. The Company’s second branch in Fredericksburg opened in April 2016.

The Company sold its King George, Virginia branch building and equipment to a credit union. The Company's 2015 third quarter operating results reflect the financial impact of the transaction. The Company recorded an impairment of \$426,000 during the third quarter of 2015. The transaction closed on January 28, 2016.

NOTE 3 – INCOME TAXES

The Company files a consolidated federal income tax return with its subsidiaries. Deferred tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws and when it is considered more likely than not that deferred tax assets will be realized. It is the Company's policy to recognize accrued interest and penalties related to unrecognized tax benefits as a component of tax expense.

NOTE 4 - ACCUMULATED OTHER COMPREHENSIVE GAIN (LOSS)

The following tables present the components of comprehensive gain (loss) for the three and six months ended June 30, 2016 and 2015. The Company's "other comprehensive" gain (loss) was solely related to securities for the three and six months ended June 30, 2016 and 2015.

(dollars in thousands)	Three Months Ended June 30, 2016			Three Months Ended June 30, 2015		
	Before Tax	Tax Effect	Net of Tax	Before Tax	Tax Effect	Net of Tax

Reclassification adjustments	(30)	(10)	(20)	-	-	-
Other comprehensive gain	\$ 111	\$ 45	\$ 66	\$ (330)	\$ (130)	\$ (200)

(dollars in thousands)	Six Months Ended June 30, 2016			Six Months Ended June 30, 2015		
	Before Tax	Tax Effect	Net of Tax	Before Tax	Tax Effect	Net of Tax
Net unrealized holding gains arising during period	\$ 535	\$ 210	\$ 325	\$ 129	\$ 51	\$ 78
Reclassification adjustments	(30)	(10)	(20)	-	-	-
Other comprehensive gain (loss)	\$ 505	\$ 200	\$ 305	\$ 129	\$ 51	\$ 78

The following table presents the changes in each component of accumulated other comprehensive loss, net of tax, for the three and six months ended June 30, 2016 and 2015.

(dollars in thousands)	Three Months Ended June 30, 2016	Three Months Ended June 30, 2015	Six Months Ended June 30, 2016	Six Months Ended June 30, 2015
	Net Unrealized Gains And Losses	Net Unrealized Gains And Losses	Net Unrealized Gains And Losses	Net Unrealized Gains And Losses
Beginning of period	\$ (12)	\$ (100)	\$ (251)	\$ (378)
Other comprehensive gains (losses), net of tax before reclassifications	86	(200)	325	78
Amounts reclassified from accumulated other comprehensive income	(20)	-	(20)	-
Net other comprehensive gain (loss)	66	(200)	305	78
End of period	\$ 54	\$ (300)	\$ 54	\$ (300)

NOTE 5 - EARNINGS PER SHARE (“EPS”)

Basic earnings per common share represent income available to common shareholders, divided by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect additional common shares that would have been outstanding if dilutive potential common shares had been issued. Potential common shares that may be issued by the Company relate to outstanding stock options and are determined using the treasury stock method. At June 30, 2016 and 2015, there were 21,011 and 87,436 options, respectively, which were excluded from the calculation as their effect would be anti-dilutive, because the exercise price of the options were greater than the average market price of the common shares. The Company has not granted any stock options since 2007 and all options outstanding at June 30, 2016 were anti-dilutive. Unvested restricted stock is excluded from the calculation of basic earnings per share. At June 30, 2016 and 2015 there were 42,881 and 37,048 unvested shares of restricted stock.

Basic and diluted earnings per share have been computed based on weighted-average common and common equivalent shares outstanding as follows:

(dollars in thousands)	Three Months Ended		Six Months Ended	
	June 30, 2016	2015	June 30, 2016	2015
Net Income	\$1,738	\$1,711	\$3,346	\$3,532
Less: dividends paid and accrued on preferred stock	-	-	-	(23)
Net income available to common shareholders	\$1,738	\$1,711	\$3,346	\$3,509
Average number of common shares outstanding	4,590,444	4,650,153	4,592,563	4,653,763
Dilutive effect of common stock equivalents	27,350	37,048	28,636	37,048
Average number of shares used to calculate diluted EPS	4,617,794	4,687,201	4,621,199	4,690,811

NOTE 6 - STOCK-BASED COMPENSATION

The Company has stock-based incentive arrangements to attract and retain key personnel. In May 2015, the 2015 Equity Compensation Plan (the “Plan”) was approved by shareholders, which authorizes the issuance of restricted stock, stock appreciation rights, stock units and stock options to the Board of Directors and key employees. Compensation expense for service-based awards is recognized over the vesting period. Performance-based awards are recognized based on a vesting schedule and the probability of achieving goals specified at the time of the grant. The 2015 Plan replaced the 2005 Equity Compensation Plan.

Stock-based compensation expense totaled \$79,000 and \$159,000 for the three and six months ended June 30, 2016 and \$68,000 and \$122,000 for the three and six months ended June 30, 2015. Stock-based compensation expense consisted of the vesting of grants of restricted stock.

All outstanding options are fully vested and the Company has not granted any stock options since 2007. The fair value of the Company’s outstanding employee stock options is estimated on the date of grant using the Black-Scholes option pricing model. The Company estimates expected market price volatility and expected term of the options based on historical data and other factors.

The exercise price for options granted is set at the discretion of the committee administering the Plan, but is not less than the market value of the shares as of the date of grant. An option’s maximum term is 10 years and the options vest at the discretion of the committee.

The following tables below summarize outstanding and exercisable options at June 30, 2016 and December 31, 2015.

(dollars in thousands, except per share amounts)	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted-Average Contractual Life Remaining In Years
Outstanding at January 1, 2016	21,211	\$ 27.70	\$ -	
Forfeited	(200)	27.70		
Outstanding at June 30, 2016	21,011	\$ 27.70	\$ -	1.0
Exercisable at June 30, 2016	21,011	\$ 27.70	\$ -	1.0

(dollars in thousands, except per share amounts)	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted-Average Contractual Life Remaining In Years
Outstanding at January 1, 2015	87,436	\$ 23.60	\$ -	
Expired	(66,225)	22.29		
Outstanding at December 31, 2015	21,211	\$ 27.70	\$ -	1.5
Exercisable at December 31, 2015	21,211	\$ 27.70	\$ -	1.5

Options outstanding are all currently exercisable and are summarized as follows:

Shares Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price
June 30, 2016		
21,011	1 year	\$ 27.70

The aggregate intrinsic value of outstanding stock options and exercisable stock options was \$0 at June 30, 2016 and December 31, 2015, respectively because all options outstanding were anti-dilutive.

The Company granted restricted stock and stock units in accordance with the Plan. The vesting period for outstanding granted restricted stock is between three and five years. As of June 30, 2016, unrecognized stock compensation expense was \$1.0 million. The following tables summarize the unvested restricted stock awards outstanding at June 30, 2016 and December 31, 2015, respectively.

	Restricted Stock Number of Shares	Weighted Average Grant Date Fair Value
Nonvested at January 1, 2016	37,048	\$ 19.83
Granted	22,403	20.75
Vested	(15,912)	20.09
Cancelled	(658)	20.31
Nonvested at June 30, 2016	42,881	\$ 20.21

Restricted Stock

	Number of Shares	Weighted Average Grant Date Fair Value
Nonvested at January 1, 2015	29,472	\$ 20.83
Granted	28,040	18.63
Vested	(20,464)	19.62
Nonvested at December 31, 2015	37,048	\$ 19.83

NOTE 7 - GUARANTEED PREFERRED BENEFICIAL INTEREST IN JUNIOR SUBORDINATED DEBENTURES (“TRUPs”)

On June 15, 2005, Tri-County Capital Trust II (“Capital Trust II”), a Delaware business trust formed, funded and wholly owned by the Company, issued \$5.0 million of variable-rate capital securities in a private pooled transaction. The variable rate is based on the 90-day LIBOR rate plus 1.70%. The Trust used the proceeds from this issuance, along with the \$155,000 for Capital Trust II’s common securities, to purchase \$5.2 million of the Company’s junior subordinated debentures. The interest rate on the debentures and the trust preferred securities is variable and adjusts quarterly. These capital securities qualify as Tier I capital and are presented in the Consolidated Balance Sheets as “Guaranteed Preferred Beneficial Interests in Junior Subordinated Debentures.” Both the capital securities of Capital Trust II and the junior subordinated debentures are scheduled to mature on June 15, 2035, unless called by the Company.

On July 22, 2004, Tri-County Capital Trust I (“Capital Trust I”), a Delaware business trust formed, funded and wholly owned by the Company, issued \$7.0 million of variable-rate capital securities in a private pooled transaction. The variable rate is based on the 90-day LIBOR rate plus 2.60%. The Trust used the proceeds from this issuance, along with the Company’s \$217,000 capital contribution for Capital Trust I’s common securities, to purchase \$7.2 million of the Company’s junior subordinated debentures. The interest rate on the debentures and the trust preferred securities is variable and adjusts quarterly. These debentures qualify as Tier I capital and are presented in the Consolidated Balance Sheets as “Guaranteed Preferred Beneficial Interests in Junior Subordinated Debentures.” Both the capital securities of Capital Trust I and the junior subordinated debentures are scheduled to mature on July 22, 2034, unless called by the Company.

NOTE 8 – SUBORDINATED NOTES

On February 6, 2015 the Company issued \$23.0 million of unsecured 6.25% fixed to floating rate subordinated notes due February 15, 2025 (“subordinated notes”). On February 13, 2015, the Company used proceeds of the offering to redeem all \$20 million of the Company’s outstanding preferred stock issued under the Small Business Lending Fund (“SBLF”) program. The subordinated notes qualify as Tier 2 regulatory capital and replaced SBLF Tier 1 capital. The subordinated notes are not listed on any securities exchange or included in any automated dealer quotation system and there is no market for the notes. The notes are unsecured obligations and are subordinated in right of payment to all existing and future senior debt, whether secured or unsecured. The notes are not guaranteed obligations of any of the Company’s subsidiaries.

Interest will accrue at a fixed per annum rate of 6.25% from and including the issue date to but excluding February 15, 2020. From and including February 15, 2020 to but excluding the maturity date interest will accrue at a floating rate equal to the three-month LIBOR plus 479 basis points. Interest is payable on the notes on February 15 and August 15 of each year, commencing August 15, 2015, through February 15, 2020, and thereafter February 15, May 15, August 15 and November 15 of each year through the maturity date or earlier redemption date.

The subordinated notes may be redeemed in whole or in part on February 15, 2020 or on any scheduled interest payment date thereafter and upon the occurrence of certain special events. The redemption price is equal to 100% of the principal amount of the subordinated notes to be redeemed plus accrued and unpaid interest to the date of redemption. Any partial redemption will be made pro rata among all holders of the subordinated notes. The subordinated notes are not subject to repayment at the option of the holders. The subordinated notes may be redeemed at any time, if (1) a change or prospective change in law occurs that could prevent the Company from deducting interest payable on the notes for U.S. federal income tax purposes, (2) a subsequent event occurs that precludes the notes from being recognized as Tier 2 Capital for regulatory capital purposes, or (3) the Company is required to register as an investment company under the Investment Company Act of 1940, as amended.

NOTE 9 - OTHER REAL ESTATE OWNED (“OREO”)

OREO assets are presented net of valuation allowances. The Company considers OREO as classified assets for regulatory and financial reporting. An analysis of OREO activity follows.

(dollars in thousands)	Six Months Ended June 30,		Year Ended December 31,
	2016	2015	2015
Balance at beginning of year	\$ 9,449	\$ 5,883	\$ 5,883
Additions of underlying property	2,718	1,556	5,436
Disposals of underlying property	(3,445)	(643)	(1,206)
Valuation allowance	(262)	(374)	(664)
Balance at end of period	\$ 8,460	\$ 6,422	\$ 9,449

During the six months ended June 30, 2016, additions of \$2.7 million consisted of \$577,000 for a residential property and \$2.1 million for a deed in lieu of foreclosure on an improved commercial office building with multiple tenants. The commercial office building was taken into OREO at fair value of the loan during the three months ended March 31, 2016 and had a ratified contract for its sale. That contract was voided during the second quarter of 2016. The Company plans to manage the property until its sale and will recognize miscellaneous rental income during the ownership and management of the property. During the six months ended June 30, 2015, additions of \$1.6 million consisted of \$784,000 for five residential properties, \$378,000 for three residential lots and \$400,000 for a commercial building.

The Company recognized net losses on OREO disposals of \$443,000 for the six months ended June 30, 2016. Disposals for the six months ended June 30, 2016 consisted of properties with the following carrying values; \$106,000 for three residential lots, \$166,000 for one residential property, \$875,000 for three commercial properties and \$2.2 million for an apartment and condominium property. The Bank provided financing for the apartment and condominium purchase which was transferred from OREO to loans during the second quarter of 2015. The transaction qualified for full accrual sales treatment under ASC Topic 360-20-40 “Property Plant and Equipment – Derecognition”. The Company disposed of two residential properties and two finished residential lots at a loss of \$18,000 for the six months ended June 30, 2015.

Additions to the valuation allowances of \$262,000 and \$374,000 were taken to adjust properties to current appraised values for the six months ended June 30, 2016 and 2015, respectively. OREO carrying amounts reflect management’s estimate of the realizable value of these properties incorporating current appraised values, local real estate market conditions and related costs. Expenses applicable to OREO assets include the following.

(dollars in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015

Valuation allowance	\$ 7	\$ 249	\$ 262	\$ 374

At June 30, 2016, certain asset-backed securities with an amortized cost of \$21.5 million were pledged to secure certain customer deposits. At June 30, 2016, asset-backed securities with an amortized cost of \$1.0 million were pledged as collateral for advances from the Federal Home Loan Bank (“FHLB”) of Atlanta.

At June 30, 2016, 99% of the asset-backed securities and agency bond portfolio was rated AAA by Standard & Poor's or the equivalent credit rating from another major rating agency. AFS securities issued by GSEs had an average life of 3.68 years and average duration of 3.46 years and are guaranteed by their issuer as to credit risk. HTM securities issued by GSEs or U.S. government agencies had an average life of 3.80 years and average duration of 3.53 years and are guaranteed by their issuer as to credit risk.

At December 31, 2015, certain asset-backed securities with an amortized cost of \$21.4 million were pledged to secure certain deposits. At December 31, 2015, asset-backed securities with an amortized cost of \$1.9 million were pledged as collateral for advances from the Federal Home Loan Bank ("FHLB") of Atlanta.

At December 31, 2015, 99% of the asset-backed securities and agency bond portfolio was rated AAA by Standard & Poor's or the equivalent credit rating from another major rating agency. AFS securities issued by GSEs had an average life of 4.39 years and average duration of 4.04 years and are guaranteed by their issuer as to credit risk. HTM securities issued by GSEs or U.S. government agencies had an average life of 5.07 years and average duration of 4.58 years and are guaranteed by their issuer as to credit risk.

Management believes that AFS securities with unrealized losses will either recover in market value or be paid off as agreed. The Company intends to, and has the ability to, hold these securities to maturity. Management believes that the losses are the result of general perceptions of safety and creditworthiness of the entire sector and a general disruption of orderly markets in the asset class.

Management has the ability and intent to hold the HTM securities with unrealized losses until they mature, at which time the Company will receive full value for the securities. Because management's intention is not to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost basis, which may be maturity, management considers the unrealized losses in the held-to-maturity portfolio to be temporary.

No charges related to other-than-temporary impairment were made during for the six months ended June 30, 2016 and the year ended December 31, 2015.

During the six months ended June 30, 2016 the Company recognized net gains on the sale of securities of \$39,000. The Company sold three AFS securities with aggregate carrying values of 2.4 million and one HTM security with a carrying value of \$698,000, recognizing gains of \$31,000 and \$8,000, respectively. During the six months ended June 30, 2015, the Company sold one HTM security with a carrying value of \$68,000 and recognized a loss of \$1,000.

The sale of HTM securities was permitted under ASC 320 “Investments - Debt and Equity Securities.” ASC 320 permits the sale of HTM securities for certain changes in circumstances. The Company will dispose of HTM securities using the safe harbor rule that allows for the sale of HTM securities that have principal payments paid down to less than 15% of original purchased par. ASC 320 10-25-15 indicates that a sale of a debt security after a substantial portion of the principal has been collected is equivalent to holding the security to maturity. In addition, the Company may dispose of HTM securities under ASC 320-10-25-6 due to a significant deterioration in the issues’ creditworthiness.

AFS Securities

Gross unrealized losses and estimated fair value by length of time that the individual AFS securities have been in a continuous unrealized loss position at June 30, 2016 were as follows:

June 30, 2016 (dollars in thousands)	Less Than 12 Months		More Than 12 Months		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Losses
Asset-backed securities issued by GSEs	\$4,475	\$ 25	\$13,300	\$ 177	\$17,775	\$ 202

At June 30, 2016, the AFS investment portfolio had an estimated fair value of \$39.8 million, of which \$17.8 million of the securities had some unrealized losses from their amortized cost. The securities with unrealized losses were CMOs issued by GSEs.

AFS securities issued by GSEs are guaranteed by the issuer. Total unrealized losses on the asset-backed securities issued by GSEs were \$202,000 of the portfolio amortized cost of \$35.4 million. AFS asset-backed securities issued by GSEs with unrealized losses had an average life of 3.94 years and an average duration of 3.67 years. Management believes that the securities will either recover in market value or be paid off as agreed.

Gross unrealized losses and estimated fair value by length of time that the individual AFS securities have been in a continuous unrealized loss position at December 31, 2015 were as follows:

December 31, 2015 (dollars in thousands)	Less Than 12 Months		More Than 12 Months		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Losses
Asset-backed securities issued by GSEs	\$4,658	\$ 28	\$17,344	\$ 529	\$22,002	\$ 557

At December 31, 2015, the AFS investment portfolio had an estimated fair value of \$35.1 million, of which \$22.0 million of the securities had some unrealized losses from their amortized cost. The securities with unrealized losses were CMOs issued by GSEs.

AFS securities issued by GSEs are guaranteed by the issuer. Total unrealized losses on the asset-backed securities issued by GSEs were \$557,000 of the portfolio amortized cost of \$31.2 million. AFS asset-backed securities issued by GSEs with unrealized losses had an average life of 4.45 years and an average duration of 4.04 years. Management believes that the securities will either recover in market value or be paid off as agreed.

HTM Securities

Gross unrealized losses and estimated fair value by length of time that the individual HTM securities have been in a continuous unrealized loss position at June 30, 2016 were as follows:

June 30, 2016 (dollars in thousands)	Less Than 12 Months		More Than 12 Months		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Losses
Asset-backed securities issued by GSEs	2,886	9	12,916	84	15,802	93
Callable GSE Agency Bonds	3,001	2	-	-	3,001	2
U.S. SBA Debentures	1,014	1	-	-	1,014	1
Asset-backed securities issued by other	-	-	884	91	884	91

\$6,901 \$ 12 \$13,800 \$ 175 \$20,701 \$ 187

At June 30, 2016, the HTM investment portfolio had an estimated fair value of \$109.2 million, of which \$20.7 million of the securities had some unrealized losses from their amortized cost. Of these securities, \$19.8 million were asset-backed securities or bonds issued by GSEs and debentures issued by U.S. government agencies. The remaining \$884,000 were asset-backed securities issued by others.

HTM securities issued by GSEs are guaranteed by the issuer and HTM U.S. government agency securities and bonds are guaranteed by the full faith and credit of the U.S. government. Total unrealized losses on the asset-backed securities or bonds issued by GSEs and debentures issued by U.S. government agencies were \$96,000 of the portfolio amortized cost of \$106.8 million. The securities with unrealized losses had an average life of 2.93 years and an average duration of 2.77 years. Management believes that the securities will either recover in market value or be paid off as agreed. The Company intends to, and has the ability to, hold these securities to maturity.

HTM asset-backed securities issued by others are collateralized mortgage obligation securities. The securities have credit support tranches that absorb losses prior to the tranches that the Company owns. The Company reviews credit support positions on its securities regularly. Total unrealized losses on the asset-backed securities issued by others were \$91,000 of the portfolio amortized cost of \$975,000. HTM asset-backed securities issued by others with unrealized losses have an average life of 1.72 years and an average duration of 1.44 years.

Gross unrealized losses and estimated fair value by length of time that the individual HTM securities have been in a continuous unrealized loss position at December 31, 2015 were as follows:

December 31, 2015 (dollars in thousands)	Less Than 12 Months		More Than 12 Months		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Losses
Asset-backed securities issued by GSEs	\$36,337	\$ 346	\$16,431	\$ 495	\$52,768	\$ 841
Asset-backed securities issued by other	-	-	992	100	992	100
	\$36,337	\$ 346	\$17,423	\$ 595	\$53,760	\$ 941

At December 31, 2015, the HTM investment portfolio had an estimated fair value of \$109.3 million, of which \$53.8 million of the securities had some unrealized losses from their amortized cost. Of these securities, \$52.8 million were asset-backed securities issued by GSEs and the remaining \$992,000 were asset-backed securities issued by others.

HTM securities issued by GSEs are guaranteed by the issuer. Total unrealized losses on the asset-backed securities issued by GSEs were \$841,000 of the portfolio amortized cost of \$107.6 million. HTM asset-backed securities issued by GSEs with unrealized losses had an average life of 5.42 years and an average duration of 4.78 years. Management believes that the securities will either recover in market value or be paid off as agreed. The Company intends to, and has the ability to, hold these securities to maturity.

HTM asset-backed securities issued by others are collateralized mortgage obligation securities. The securities have credit support tranches that absorb losses prior to the tranches that the Company owns. The Company reviews credit support positions on its securities regularly. Total unrealized losses on the asset-backed securities issued by others were \$100,000 of the portfolio amortized cost of \$1.1 million. HTM asset-backed securities issued by others with unrealized losses have an average life of 4.04 years and an average duration of 3.29 years.

Credit Quality of Asset-Backed Securities and Agency Bonds

The tables below present the Standard & Poor's ("S&P") or equivalent credit rating from other major rating agencies for AFS and HTM asset-backed securities issued by GSEs and others or bonds issued by U.S. government agencies at June 30, 2016 and December 31, 2015 by carrying value. The Company considers noninvestment grade securities rated BB+ or lower as classified assets for regulatory and financial reporting. GSE asset-backed securities and GSE agency bonds with S&P AA+ ratings were treated as AAA based on regulatory guidance.

June 30, 2016

December 31, 2015

Credit Rating	Amount	Credit Rating	Amount
(dollars in thousands)			
AAA	\$142,075	AAA	\$138,267
BB	453	BB	518
B+	522	B+	-
CCC+	-	CCC+	575

	1,005,068	100.00 %	918,894	100.00 %
Less:				
Deferred loan fees and premiums	447	0.04 %	1,154	0.13 %
Allowance for loan losses	9,106	0.91 %	8,540	0.93 %
	9,553		9,694	
	\$ 995,515		\$ 909,200	

At June 30, 2016 and December 31, 2015, the Bank's allowance for loan losses totaled \$9.1 million and \$8.5 million, respectively or 0.91% and 0.93%, respectively, of loan balances. Management's determination of the adequacy of the allowance is based on a periodic evaluation of the portfolio with consideration given to the overall loss experience, current economic conditions, size, growth and composition of the loan portfolio, financial condition of the borrowers and other relevant factors that, in management's judgment, warrant recognition in providing an adequate allowance.

Deferred loan fees and premiums include net deferred fees paid by customers of \$2.6 million and \$2.6 million at June 30, 2016 and December 31, 2015, respectively offset by net deferred premiums paid for the purchase of residential first mortgages of \$2.2 million and \$1.4 million at June 30, 2016 and December 31, 2015.

The Company separated residential rentals into a new loan portfolio segment beginning in the second quarter of 2016. Residential rentals include income producing properties secured by 1-4 family units and apartment buildings. The Company's decision to segregate the residential rental portfolio for financial reporting and valuation purposes was based on the growth and size of the portfolio and risk characteristics unique to residential rental properties.

Risk Characteristics of Portfolio Segments

The Company manages its credit products and exposure to credit losses (credit risk) by the following specific portfolio segments (classes), which are levels at which the Company develops and documents its allowance for loan loss methodology. These segments are:

Commercial Real Estate (“CRE”)

Commercial and other real estate projects include office buildings, retail locations, churches, other special purpose buildings and commercial construction. Commercial construction balances were 6.5% and 6.1% of the CRE portfolio at June 30, 2016 and December 31, 2015, respectively. The Bank offers both fixed-rate and adjustable-rate loans under these product lines. The primary security on a commercial real estate loan is the real property and the leases that produce income for the real property. Loans secured by commercial real estate are generally limited to 80% of the lower of the appraised value or sales price at origination and have an initial contractual loan payment period ranging from three to 20 years.

Loans secured by commercial real estate are larger and involve greater risks than one-to four-family residential mortgage loans. Because payments on loans secured by such properties are often dependent on the successful operation or management of the properties, repayment of such loans may be subject to a greater extent to adverse conditions in the real estate market or the economy.

Residential First Mortgages

Residential first mortgage loans are generally long-term loans, amortized on a monthly basis, with principal and interest due each month. The contractual loan payment period for residential loans typically ranges from ten to 30 years. The Bank's experience indicates that real estate loans remain outstanding for significantly shorter time periods than their contractual terms. Borrowers may refinance or prepay loans at their option, without penalty. The Bank's residential portfolio has both fixed-rate and adjustable-rate residential first mortgages.

The annual and lifetime limitations on interest rate adjustments may limit the increases in interest rates on these loans. There are also credit risks resulting from potential increased costs to the borrower as a result of repricing of adjustable-rate mortgage loans. During periods of rising interest rates, the risk of default on adjustable-rate mortgage loans may increase due to the upward adjustment of interest cost to the borrower. The Bank's adjustable rate residential first mortgage portfolio was \$30.9 million or 3.1% of total gross loans of \$1.0 billion at June 30, 2016 compared to \$18.9 million or 2.1% of gross loans of \$918.9 million at December 31, 2015.

Residential Rentals

Residential rental mortgage loans are amortizing, with principal and interest due each month. The loans are secured by income-producing 1-4 family units and apartments. As of June 30, 2016 and December 31, 2015, \$88.0 million and \$80.8 million, respectively, were 1-4 family units and \$12.2 million and \$12.4 million, respectively, were apartment buildings. Loans secured by residential rental properties are generally limited to 80% of the lower of the appraised value or sales price at origination and have an initial contractual loan payment period ranging from three to 20 years. The primary security on a residential rental loan is the property and the leases that produce income.

Loans secured by residential rental properties involve greater risks than 1-4 family residential mortgage loans. Although, there are similar risk characteristics shared with commercial real estate loans, the balances for the loans secured by residential rental properties are generally smaller. Because payments on loans secured residential rental properties are often dependent on the successful operation or management of the properties, repayment of these loans may be subject to a greater extent to adverse conditions in the rental real estate market or the economy than similar owner occupied properties.

Construction and Land Development

The Bank offers loans for the construction of one-to-four family dwellings. Generally, these loans are secured by the real estate under construction as well as by guarantees of the principals involved. In addition, the Bank offers loans to acquire and develop land, as well as loans on undeveloped, subdivided lots for home building.

A decline in demand for new housing might adversely affect the ability of borrowers to repay these loans. Construction and land development loans are inherently riskier than providing financing on owner-occupied real estate. The Bank's risk of loss is affected by the accuracy of the initial estimate of the market value of the completed project as well as the accuracy of the cost estimates made to complete the project. In addition, the volatility of the real estate market has made it increasingly difficult to ensure that the valuation of land associated with these loans is accurate. During the construction phase, a number of factors could result in delays and cost overruns. If the estimate of construction costs proves to be inaccurate, the Bank may be required to advance funds beyond the amount originally committed to permit completion of the development. If the estimate of value proves to be inaccurate, a project's value might be insufficient to assure full repayment. As a result of these factors, construction lending often involves the disbursement of substantial funds with repayment dependent, in part, on the success of the project rather than the ability of the borrower or guarantor to repay principal and interest. If the Bank forecloses on a project, there can be no assurance that the Bank will be able to recover all of the unpaid balance of, and accrued interest on, the loan as well as related foreclosure and holding costs.

Home Equity and Second Mortgage Loans

The Bank maintains a portfolio of home equity and second mortgage loans. These products contain a higher risk of default than residential first mortgages as in the event of foreclosure, the first mortgage would need to be paid off prior to collection of the second mortgage. This risk has been heightened as the market value of residential property has declined.

Commercial Loans

The Bank offers commercial loans to its business customers. The Bank offers a variety of commercial loan products including term loans and lines of credit. Such loans are generally made for terms of five years or less. The Bank offers both fixed-rate and adjustable-rate loans under these product lines. When making commercial business loans, the Bank considers the financial condition of the borrower, the borrower's payment history of both corporate and personal debt, the projected cash flows of the business, the viability of the industry in which the consumer operates, the value of the collateral, and the borrower's ability to service the debt from income. These loans are primarily secured by equipment, real property, accounts receivable, or other security as determined by the Bank.

Commercial loans are made on the basis of the borrower's ability to make repayment from the cash flows of the borrower's business. As a result, the availability of funds for the repayment of commercial loans may depend substantially on the success of the business itself.

Consumer Loans

Consumer loans consist of loans secured by automobiles, boats, recreational vehicles and trucks. The Bank also makes home improvement loans and offers both secured and unsecured personal lines of credit. Consumer loans entail greater risk from other loan types due to being secured by rapidly depreciating assets or the reliance on the borrower's continuing financial stability.

Commercial Equipment Loans

These loans consist primarily of fixed-rate, short-term loans collateralized by a commercial customer's equipment. When making commercial equipment loans, the Bank considers the same factors it considers when underwriting a commercial business loan. Commercial loans are of higher risk and typically are made on the basis of the borrower's ability to make repayment from the cash flows of the borrower's business. As a result, the availability of funds for the repayment of commercial loans may depend substantially on the success of the business itself. In the case of business failure, collateral would need to be liquidated to provide repayment for the loan. In many cases, the highly specialized nature of collateral equipment would make full recovery from the sale of collateral problematic.

Non-accrual and Past Due Loans

Non-accrual loans as of June 30, 2016 and December 31, 2015 were as follows:

(dollars in thousands)	June 30, 2016		Non-accrual Only Loans	Number of Loans	Total Non-accrual Loans	Total Number of Loans

	\$10,740	36	\$ 693	2	\$ 11,433	38

Non-accrual loans (90 days or greater delinquent and non-accrual only loans) decreased \$1.2 million from \$11.4 million or 1.24% of total loans at December 31, 2015 to \$10.2 million or 1.02% of total loans at June 30, 2016. Non-accrual only loans are loans classified as non-accrual due to customer operating results or payment history. In accordance with the Company's policy, interest income is recognized on a cash basis for these loans.

The Company had 33 non-accrual loans at June 30, 2016 compared to 38 non-accrual loans at December 31, 2015. Non-accrual loans at June 30, 2016 included \$7.7 million, or 75% of non-accrual loans, attributed to 17 loans representing six customer relationships classified as substandard. Non-accrual loans at December 31, 2015 included \$8.1 million, or 71% of non-accrual loans, attributed to 19 loans representing six customer relationships classified as substandard. Of these loans at June 30, 2016 and December 31, 2015, \$3.6 million and \$3.8 million, respectively, represented a residential development project. During the second quarter of 2014, the Company deferred the collection of principal and interest on this project. The project is currently being built out with the support of private equity funds which have been used for vertical construction that has significantly improved the collateral value and the viability of the project. The Company's loans remain classified as troubled debt restructures ("TDRs") and non-accrual. In addition, at June 30, 2016 and December 31, 2015, the Company had three TDR loans totaling \$1.6 million and \$1.7 million, respectively, classified as non-accrual. These loans are classified solely as non-accrual loans for the calculation of financial ratios.

Non-accrual loans on which the recognition of interest has been discontinued, which did not have a specific allowance for impairment, amounted to \$9.5 million and \$10.5 million at June 30, 2016 and December 31, 2015, respectively. Interest due but not recognized on these balances at June 30, 2016 and December 31, 2015 was \$974,000 and \$953,000, respectively. Non-accrual loans with a specific allowance for impairment on which the recognition of interest has been discontinued amounted to \$682,000 and \$902,000 at June 30, 2016 and December 31, 2015, respectively. Interest due but not recognized on these balances at June 30, 2016 and December 31, 2015 was \$83,000 and \$34,000, respectively.

Past due loans as of June 30, 2016 and December 31, 2015 were as follows:

TDRs, included in the impaired loan schedules above, as of June 30, 2016 and December 31, 2015 were as follows:

(dollars in thousands)	June 30, 2016		December 31, 2015	
	Dollars	Number of Loans	Dollars	Number of Loans
Commercial real estate	\$9,715	8	\$ 9,839	8
Residential first mortgages	556	2	881	3
Residential rentals	230	1	2,058	5
Construction and land development	4,370	4	4,283	4
Commercial loans	1,141	7	1,384	8
Commercial equipment	118	2	123	2
Total TDRs	\$16,130	24	\$ 18,568	30
Less: TDRs included in non-accrual loans	(5,252)	(5)	(5,435)	(7)
Total accrual TDR loans	\$10,878	19	\$ 13,133	23

At June 30, 2016, the Company had 19 accruing TDRs totaling \$10.9 million compared to 23 accruing TDRs totaling \$13.1 million as of December 31, 2015. The Company had specific reserves of \$968,000 on seven TDRs totaling \$3.3 million at June 30, 2016 and specific reserves of \$1.3 million on nine TDRs totaling \$3.6 million at December 31, 2015. At June 30, 2016, \$8.1 million or 74% of accruing TDRs related to one customer relationship. The \$8.1 million in TDRs is for eight loans with two construction and land development loans totaling \$724,000, one commercial loan of \$197,000 and five commercial real estate loans totaling \$7.1 million. The loans in this relationship have been classified as TDRs since the fourth quarter of 2014 and have performed according to the terms of their restructured agreements with all required payments made timely. They presently remain classified as TDRs due to below market rates of interest negotiated at the time the loans were restructured to obtain additional collateral. The Company has a strong collateral position in this relationship and as of June 30, 2016 has specific reserves of \$470,000 on the relationship.

At June 30, 2016 and December 31, 2015, non-accrual TDRs included \$3.6 million and \$3.8 million, respectively, related to a residential development project. During the second quarter of 2014, the Company deferred the collection of principal and interest on this project. The project is currently being built out with the support of private equity funds which have been used for vertical construction that has significantly improved the collateral value and the viability of the project. In addition, at June 30, 2016 and December 31, 2015, the Company had three TDR loans totaling \$1.6 million and \$1.7 million, respectively, classified as non-accrual. These loans are classified solely as non-accrual loans for the calculation of financial ratios. There were no TDRs added during the six months ended June 30, 2016.

Interest income in the amount of \$253,000 and \$508,000 was recognized on TDR loans for the six months ended June 30, 2016 and the year ended December 31, 2015, respectively.

Allowance for Loan Losses

The following tables detail activity in the allowance for loan losses at and for the three and six months ended June 30, 2016 and 2015, respectively. An allocation of the allowance to one category of loans does not prevent the Company from using that allowance to absorb losses in a different category.

By Internally Assigned Grade	\$ 31,342	\$ 31,840
By Payment Activity	594	964
Total Classified	\$ 31,936	\$ 32,804

Management uses a risk scale to assign grades to commercial real estate, residential rentals, construction and land development, commercial loans and commercial equipment loans. Commercial loan relationships with an aggregate exposure to the Bank of \$750,000 or greater are risk rated. Residential first mortgages, home equity and second mortgages and consumer loans are monitored on an ongoing basis based on borrower payment history. Consumer loans and residential real estate loans are classified as unrated unless they are part of a larger commercial relationship that requires grading or are troubled debt restructures or nonperforming loans with an Other Assets Especially Mentioned or higher risk rating due to a delinquent payment history

Home equity and second mortgages and consumer loans are evaluated for creditworthiness in underwriting and are monitored based on borrower payment history. Residential first mortgages are evaluated for creditworthiness during credit due diligence before being purchased. Residential first mortgages, home equity and second mortgages and consumer loans are classified as unrated unless they are part of a larger commercial relationship that requires grading or are troubled debt restructures or nonperforming loans with an Other Assets Especially Mentioned (“OAEM”) or higher risk rating due to a delinquent payment history.

Management regularly reviews credit quality indicators as part of its individual loan reviews and on a monthly and quarterly basis. The overall quality of the Bank’s loan portfolio is assessed using the Bank’s risk grading scale, the level and trends of net charge-offs, nonperforming loans and delinquencies, the performance of troubled debt restructured loans and the general economic conditions in the Company’s geographical market. This review process is assisted by frequent internal reporting of loan production, loan quality, concentrations of credit, loan delinquencies and nonperforming and potential problem loans. Credit quality indicators and allowance factors are adjusted based on management’s judgment during the monthly and quarterly review process. Loans subject to risk ratings are graded on a scale of one to ten. The Company considers loans classified substandard, doubtful and loss as classified assets for regulatory and financial reporting.

Ratings 1 thru 6 - Pass

Ratings 1 thru 6 have asset risks ranging from excellent low risk to adequate. The specific rating assigned considers customer history of earnings, cash flows, liquidity, leverage, capitalization, consistency of debt service coverage, the nature and extent of customer relationship and other relevant specific business factors such as the stability of the industry or market area, changes to management, litigation or unexpected events that could have an impact on risks.

Rating 7 - OAEM (Other Assets Especially Mentioned) – Special Mention

These credits, while protected by the financial strength of the borrowers, guarantors or collateral, have reduced quality due to economic conditions, less than adequate earnings performance or other factors which require the lending officer to direct more than normal attention to the credit. Financing alternatives may be limited and/or command higher risk interest rates. OAEM loans are the first adversely classified assets on the Bank’s watch list. These relationships will be reviewed at least quarterly.

Rating 8 - Substandard

Substandard assets are assets that are inadequately protected by the sound worth or paying capacity of the borrower or of the collateral pledged. These assets have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified substandard. The loans may have a delinquent history or combination of weak collateral,

weak guarantor strength or operating losses. When a loan is assigned to this category the Bank may estimate a specific reserve in the loan loss allowance analysis. These assets listed may include assets with histories of repossessions or some that are non-performing bankruptcies. These relationships will be reviewed at least quarterly.

Rating 9 - Doubtful

Doubtful assets have many of the same characteristics of Substandard with the exception that the Bank has determined that loss is not only possible but is probable and the risk is close to certain that loss will occur. When a loan is assigned to this category the Bank will identify the probable loss and the loan will receive a specific reserve in the loan loss allowance analysis. These relationships will be reviewed at least quarterly.

Rating 10 – Loss

Once an asset is identified as a definite loss to the Bank, it will receive the classification of “loss”. There may be some future potential recovery; however it is more practical to write off the loan at the time of classification. Losses will be taken in the period in which they are determined to be uncollectable.

NOTE 12 - REGULATORY

As of December 31, 2015, the Bank was a member of the Federal Reserve System and its primary federal regulator was the Federal Reserve Board. On April 18, 2016, Community Bank of the Chesapeake, cancelled its stock in the Federal Reserve Bank of Richmond. This terminated its status as a member of the Federal Reserve System. As of that date, the Bank's primary regulator became the Federal Deposit Insurance Corporation ("FDIC") and is subject to regulation, supervision and regular examination by the Maryland Commissioner of Financial Regulation (the "Commissioner") and the FDIC.

The Company will continue to be subject to regulation, examination and supervision by the Federal Reserve Board under the Bank Holding Company Act of 1956, as amended (the "BHCA"), and the regulations of the Federal Reserve Board.

On January 1, 2015, the Company and Bank became subject to the new Basel III Capital Rules with full compliance with all of the final rule's requirements phased in over a multi-year schedule, to be fully phased-in by January 1, 2019. In July 2013, the final rules were published (the "Basel III Capital Rules") establishing a new comprehensive capital framework for U.S. banking organizations. The rules implement the Basel Committee's December 2010 framework known as "Basel III" for strengthening international capital standards as well as certain provisions of the Dodd-Frank Act. The Basel III Capital Rules substantially revise the risk-based capital requirements applicable to bank holding companies and depository institutions compared to the previous U.S. risk-based capital rules. The Basel III Capital Rules define the components of capital and address other issues affecting the numerator in banking institutions' regulatory capital ratios. The Basel III Capital Rules also address risk weights and other issues affecting the denominator in banking institutions' regulatory capital ratios and replace the existing risk-weighting approach with a more risk-sensitive approach. The Basel III Capital Rules also implement the requirements of Section 939A of the Dodd-Frank Act to remove references to credit ratings from the federal banking agencies' rules.

The rules include a new common equity Tier 1 capital to risk-weighted assets minimum ratio of 4.5%, raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0%, require a minimum ratio ("Min. Ratio") of Total Capital to risk-weighted assets of 8.0%, and require a minimum Tier 1 leverage ratio of 4.0%. A new capital conservation buffer ("CCB") is also established above the regulatory minimum capital requirements. This capital conservation buffer will be phased-in beginning January 1, 2016 at 0.625% of risk-weighted assets and increase each subsequent year by an additional 0.625% until reaching its final level of 2.5% on January 1, 2019. Strict eligibility criteria for regulatory capital instruments were also implemented under the final rules. The final rules also revise the definition and calculation of Tier 1 capital, Total Capital, and risk-weighted assets.

As of June 30, 2016 and December 31, 2015, the Company and Bank were well-capitalized under the regulatory framework for prompt corrective action under the new Basel III Capital Rules. Management believes, as of June 30,

2016 and December 31, 2015, that the Company and the Bank met all capital adequacy requirements to which they were subject.

The Company's and the Bank's actual regulatory capital amounts and ratios are presented in the following table.

Regulatory Capital and Ratios (dollars in thousands)	The Company		The Bank	
	June 30, 2016	December 31, 2015	June 30, 2016	December 31, 2015
Common Equity	\$ 102,366	\$ 99,783	\$ 133,802	\$ 132,571
Preferred Stock -SBLF	-	-	-	-
Total Stockholders' Equity	102,366	99,783	133,802	132,571
AOCI Losses (Gains)	(54)	251	(54)	251
Common Equity Tier 1 Capital	102,312	100,034	133,748	132,822
TRUPs	12,000	12,000	-	-
Tier 1 Capital	114,312	112,034	133,748	132,822
Allowable Reserve for Credit Losses and Other Tier 2 Adjustments	9,106	8,540	9,106	8,540
Subordinated Notes	23,000	23,000	-	-
Tier 2 Capital	\$ 146,418	\$ 143,574	\$ 142,854	\$ 141,362
Risk-Weighted Assets ("RWA")	\$ 1,022,208	\$ 984,614	\$ 1,019,246	\$ 982,347
Average Assets ("AA")	\$ 1,211,618	\$ 1,118,843	\$ 1,208,718	\$ 1,116,576

**2019
Regulatory
Min. Ratio +
CCB ⁽¹⁾**

Common Tier 1 Capital to RWA ⁽²⁾	7.00 %	10.01 %	10.16 %	13.12 %	13.52 %
Tier 1 Capital to RWA	8.50	11.18	11.38	13.12	13.52
Tier 2 Capital to RWA	10.50	14.32	14.58	14.02	14.39
Tier 1 Capital to AA (Leverage)	<i>n/a</i>	9.43	10.01	11.07	11.90

⁽¹⁾ These are the fully phased-in ratios as of January 1, 2019 that include the minimum capital ratio ("Min. Ratio") + the capital conservation buffer ("CCB"). The phase-in period is more fully described in the footnote above.

⁽²⁾ The Common Tier 1 ratio became effective for regulatory reporting purposes when the Company and the Bank became subject to the new Basel III Capital Rules during the three months ended March 31, 2015.

NOTE 13 - FAIR VALUE MEASUREMENTS

The Company adopted FASB ASC Topic 820, “*Fair Value Measurements*” and FASB ASC Topic 825, “*The Fair Value Option for Financial Assets and Financial Liabilities*”, which provides a framework for measuring and disclosing fair value under generally accepted accounting principles. FASB ASC Topic 820 requires disclosures about the fair value of assets and liabilities recognized in the balance sheet in periods subsequent to initial recognition, whether the measurements are made on a recurring basis (for example, available for sale investment securities) or on a nonrecurring basis (for example, impaired loans).

FASB ASC Topic 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC Topic 820 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The Company utilizes fair value measurements to record fair value adjustments to certain assets and to determine fair value disclosures. Securities available for sale are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis such as loans held for investment and certain other assets. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets.

Under FASB ASC Topic 820, the Company groups assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine the fair value. These hierarchy levels are:

Level 1 inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the entity has the ability to access at the measurement date.

Level 2 inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with the Company's monthly or quarterly valuation process.

There were no transfers between levels of the fair value hierarchy and the Company had no Level 3 fair value assets or liabilities for the six months ended June 30, 2016 and the year ended December 31, 2015, respectively.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value:

Securities Available for Sale

Investment securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities issued by GSEs, municipal bonds and corporate debt securities. Securities classified as Level 3 include asset-backed securities in less liquid markets.

Loans Receivable

The Company does not record loans at fair value on a recurring basis, however, from time to time, a loan is considered impaired and an allowance for loan loss is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan are considered impaired. Management estimates the fair value of impaired loans using one of several methods, including the collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows. Impaired loans not requiring a specific allowance represent loans for which the fair value of expected repayments or collateral exceed the recorded investment in such loans. At June 30, 2016 and December 31, 2015, substantially all of the impaired loans were evaluated based upon the fair value of the collateral. In accordance with FASB ASC 820, impaired loans where an allowance is established based on the fair value of collateral (loans with impairment) require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the loan as nonrecurring Level 3.

Premises and Equipment Held For Sale

Premises and equipment are adjusted to fair value upon transfer of the assets to held for sale. Subsequently, premises and equipment held for sale are carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised value of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price (e.g., contracted sales price) or a current appraised value, the Company records the assets as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the asset at nonrecurring Level 3.

Other Real Estate Owned

OREO is adjusted to fair value upon transfer of the loans to foreclosed assets. Subsequently, OREO is carried at the lower of carrying value and fair value. Fair value is based upon independent market prices, appraised value of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the foreclosed asset at nonrecurring Level 3.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

The tables below present the recorded amount of assets as of June 30, 2016 and December 31, 2015 measured at fair value on a recurring basis.

(dollars in thousands)	June 30, 2016			
Description of Asset	Fair Value	Level 1	Level 2	Level 3
Available for sale securities				
Asset-backed securities issued by GSEs				
CMOs	\$32,721	\$ -	\$32,721	\$ -
MBS	2,557	-	2,557	-
Corporate equity securities	37	-	37	-
Bond mutual funds	4,522	-	4,522	-
Total available for sale securities	\$39,837	\$ -	\$39,837	\$ -

(dollars in thousands)	December 31, 2015			
Description of Asset	Fair Value	Level 1	Level 2	Level 3
Available for sale securities				

Asset-backed securities issued by GSEs

CMOs	\$30,664	\$ -	\$30,664	\$ -
MBS	26	-	26	-
Corporate equity securities	39	-	39	-
Bond mutual funds	4,387	-	4,387	-
Total available for sale securities	\$35,116	\$ -	\$35,116	\$ -

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The Company may be required to measure certain assets at fair value on a nonrecurring basis in accordance with U.S. GAAP. These include assets that are measured at the lower of cost or market that were recognized at fair value below cost at the end of the period. Assets measured at fair value on a nonrecurring basis as of June 30, 2016 and December 31, 2015 are included in the tables below.

(dollars in thousands)	June 30, 2016			
Description of Asset	Fair Value	Level 1	Level 2	Level 3
Loans with impairment				
Commercial real estate	\$1,822	\$ -	\$1,822	\$ -
Residential first mortgages	465	-	465	-
Residential rentals	186		186	
Construction and land development	33	-	33	-
Commercial equipment	28	-	28	-
Total loans with impairment	\$2,534	\$ -	\$2,534	\$ -
Other real estate owned	\$8,460	\$ -	\$8,460	\$ -

(dollars in thousands)	December 31, 2015			
Description of Asset	Fair Value	Level 1	Level 2	Level 3
Loans with impairment				
Commercial real estate	\$1,765	\$ -	\$1,765	\$ -
Residential first mortgages	469	-	469	-
Residential rentals	141	-	141	
Construction and land development	33	-	33	-
Commercial loans	50	-	50	-
Total loans with impairment	\$2,458	\$ -	\$2,458	\$ -
Premises and equipment held for sale	\$2,000	\$ -	\$2,000	\$ -
Other real estate owned	\$9,449	\$ -	\$9,449	\$ -

Loans with impairment had unpaid principal balances of \$3.8 million and \$4.0 million at June 30, 2016 and December 31, 2015, respectively, and include impaired loans with a specific allowance.

NOTE 14 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. Therefore, any aggregate unrealized gains or losses should not be interpreted as a forecast of future earnings or cash flows. Furthermore, the fair values disclosed should not be interpreted as the aggregate current value of the Company.

Valuation Methodology

Investment securities - Fair values are based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

FHLB and FRB stock - Fair values are at cost, which is the carrying value of the securities.

Investment in bank owned life insurance ("BOLI") – Fair values are at cash surrender value.

Loans receivable - For conforming residential first-mortgage loans, the market price for loans with similar coupons and maturities was used. For nonconforming loans with maturities similar to conforming loans, the coupon was adjusted for credit risk. Loans that did not have quoted market prices were priced using the discounted cash flow method. The discount rate used was the rate currently offered on similar products. Loans priced using the discounted cash flow method included residential construction loans, commercial real estate loans and consumer loans.

Loans held for sale – Fair values are derived from secondary market quotations for similar instruments or the estimated fair value of loans held for sale based on the terms of the related sale commitments. There were no loans held for sale at June 30, 2016 and December 31, 2015.

Savings, NOW and money market deposits - The fair value of checking accounts, saving accounts and money market accounts were the amount payable on demand at the reporting date.

Time deposits - The fair value was determined using the discounted cash flow method. The discount rate was equal to the rate currently offered on similar products.

Long-term debt and short-term borrowings - These were valued using the discounted cash flow method. The discount rate was equal to the rate currently offered on similar borrowings.

Guaranteed preferred beneficial interest in junior subordinated securities ("TRUPs") - These were valued using discounted cash flows. The discount rate was equal to the rate currently offered on similar borrowings.

Subordinated notes - These were valued using discounted cash flows. The discount rate was equal to the rate currently offered on similar borrowings.

Off-balance sheet instruments - The Company charges fees for commitments to extend credit. Interest rates on loans for which these commitments are extended are normally committed for periods of less than one month. Fees charged on standby letters of credit and other financial guarantees are deemed to be immaterial and these guarantees are expected to be settled at face amount or expire unused. It is impractical to assign any fair value to these commitments.

The Company's estimated fair values of financial instruments are presented in the following tables.

June 30, 2016		Fair Value Measurements			
Description of Asset (dollars in thousands)	Carrying Amount	Fair Value	Level 1	Level 2	Level 3
Assets					
Investment securities - AFS	\$39,837	\$39,837	\$ -	\$39,837	\$ -

At June 30, 2016 and December 31, 2015, the Company had outstanding loan commitments and standby letters of credit of \$73.2 million and \$73.5 million, respectively and \$20.0 million and \$21.4 million, respectively. Additionally, customers had \$135.4 million and \$128.1 million available and unused on lines of credit at June 30, 2016 and

December 31, 2015, respectively. Based on the short-term lives of these instruments, the Company does not believe that the fair value of these instruments differs significantly from their carrying values.

The fair value estimates presented herein are based on pertinent information available to management as of June 30, 2016 and December 31, 2015, respectively. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date and, therefore, current estimates of fair value may differ significantly from the amount presented herein.

NOTE 15 – NEW ACCOUNTING STANDARDS

Financial Accounting Standards Board (“FASB”) Accounting Standards Update (“ASU”). ASU 2014-09 - *Revenue from Contracts with Customers (Topic 606)*; ASU 2016-08 - *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)*; ASU No. 2016-10 - *Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing*. ASU 2014-09 states that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This update affects entities that enter into contracts with customers to transfer goods or services or enter into contracts for the transfer of nonfinancial assets, unless those contracts are within the scope of other standards. ASU 2016-08 was issued to clarify certain principal versus agent considerations within the implementation guidance of ASC Topic 606. ASU 2016-10 was issued to clarify ASC Topic 606 related to (i) identifying performance obligations; and (ii) the licensing implementation guidance. The effective date for the ASUs is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted, but not before the original effective date of December 15, 2016. The adoption of this guidance is not expected to have a material impact on the Company’s consolidated financial statements.

ASU 2015-05 - *Customer’s Accounting for Fees Paid in a Cloud Computing Arrangement*. ASU 2015-05 provides guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The new guidance does not change the accounting for a customer’s accounting for service contracts. ASU No. 2015-05 is effective for interim and annual reporting periods beginning after December 15, 2015 and did not have a material impact on the Company’s consolidated financial statements.

ASU 2015-16 - *Business Combinations (Topic 805) – Simplifying the Accounting for Measurement-Period Adjustments*. ASU 2015-16 requires that an acquirer recognize adjustments to estimated amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendments require that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the estimated amounts, calculated as if the accounting had been completed at the acquisition date. The amendments also require an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the estimated amounts had been recognized as of the acquisition date. The amendments should be applied prospectively to adjustments to provisional amounts that occur after the effective date with earlier application permitted for financial statements that have not been issued. ASU 2015-16 was effective January 1, 2016 and did not have an impact on the Company’s consolidated financial statements.

ASU 2016-01 - *Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. ASU 2016-1, among other things, (i) requires equity investments, with certain

exceptions, to be measured at fair value with changes in fair value recognized in net income, (ii) simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment, (iii) eliminates the requirement for public business entities to disclose the methods and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet, (iv) requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes, (v) requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments, (vi) requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balance sheet or the accompanying notes to the financial statements and (viii) clarifies that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale. ASU 2016-1 will be effective on January 1, 2018 and the Company is evaluating its impact on the consolidated financial statements and will monitor developments and additional guidance.

ASU 2016-02 - *Leases (Topic 842)*. ASU 2016-02 requires lessees to recognize a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. ASU 2016-02 does not significantly change lease accounting requirements applicable to lessors; however, certain changes were made to align, where necessary, lessor accounting with the lessee accounting model and ASC Topic 606, "Revenue from Contracts with Customers." ASU 2016-02 will be effective on January 1, 2019 and will require transition using a modified retrospective approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The Company is evaluating the potential impact of ASU 2016-02 on the consolidated financial statements.

ASU 2016-05 - *Derivatives and Hedging (Topic 815) Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships*. ASU 2016-05 clarifies that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument under ASC Topic 815 does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. ASU 2016-05 will be effective on January 1, 2017 and is not expected to have a significant impact on the consolidated financial statements.

ASU 2016-09 - *Improvements to Employee Share-Based Payment Accounting*. ASU 2016-09 is intended to simplify how share-based payments are accounted for and presented in the financial statements. The key provisions include: (i) a company will no longer record excess tax benefits and certain tax deficiencies in additional paid-in capital (“APIC”). Instead all excess tax benefits and tax deficiencies will be reported as income tax expense or benefit in the income statement, and APIC pools will be eliminated. The guidance also eliminates the requirement that excess tax benefits be realized before companies can recognize them. In addition, the guidance requires companies to present excess tax benefits as an operating activity on the statement of cash flows rather than as a financing activity; (ii) a company can increase the amount of withholding to cover income taxes on awards and still qualify for the exception to liability classification for shares used to satisfy the employer’s statutory income tax withholding obligation. The new guidance will also require an employer to classify the cash paid to a tax authority when shares are withheld to satisfy its statutory income tax withholding obligation as a financing activity on its statement of cash flows (current guidance did not specify how these cash flows should be classified); and (iii) a company can elect an accounting policy election for the impact of forfeitures on the recognition of expense for share-based payment awards. Forfeitures can be estimated, as required today, or recognized when they occur. ASU No. 2016-09 is effective for interim and annual reporting periods beginning after December 15, 2016. Early adoption is permitted, but all of the guidance must be adopted in the same period. The Company is evaluating the potential impact of ASU 2016-09 on the consolidated financial statements.

ASU 2016-13 - *Measurement of Credit Losses on Financial Instruments*. In June 2016, the FASB issued ASU No. 2016-13. This ASU significantly changes how entities will measure credit losses for most financial assets and certain other instruments that aren’t measured at fair value through net income. The standard will replace today’s “incurred loss” approach with an “expected loss” model. The new model, referred to as the current expected credit loss (“CECL”) model, will apply to: (1) financial assets subject to credit losses and measured at amortized cost, and (2) certain off-balance sheet credit exposures. This includes, but is not limited to, loans, leases, held-to-maturity securities, loan commitments, and financial guarantees. The CECL model does not apply to available-for-sale (“AFS”) debt securities. For AFS debt securities with unrealized losses, entities will measure credit losses in a manner similar to what they do today, except that the losses will be recognized as allowances rather than reductions in the amortized cost of the securities. As a result, entities will recognize improvements to estimated credit losses immediately in earnings rather than as interest income over time, as they do today. The ASU also simplifies the accounting model for purchased credit-impaired debt securities and loans. ASU 2016-13 also expands the disclosure requirements regarding an entity’s assumptions, models, and methods for estimating the allowance for loan and lease losses. In addition, entities will need to disclose the amortized cost balance for each class of financial asset by credit quality indicator, disaggregated by the year of origination. ASU No. 2016-13 is effective for interim and annual reporting periods beginning after December 15, 2019; early adoption is permitted for interim and annual reporting periods beginning after December 15, 2018. Entities will apply the standard’s provisions as a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective (i.e., modified retrospective approach). The Company is currently evaluating the provisions of ASU No. 2016-13 to determine the potential impact the new

standard will have on the Company's Consolidated Financial Statements.

Item 2 - Management's Discussion and Analysis ("MD&A") of Financial Condition and Results of Operations

FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements that are based on assumptions and may describe future plans, strategies and expectations of The Community Financial Corporation (the "Company") and Community Bank of the Chesapeake (the "Bank"). These forward-looking statements are generally identified by use of the words "believe," "expect," "intend," "anticipate," "estimate," "project" or similar expressions.

The Company and the Bank's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors that could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, changes in interest rates, national and regional economic conditions, legislative and regulatory changes, monetary and fiscal policies of the U.S. government, including policies of the U.S. Treasury and the Federal Reserve Board, the quality and composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Company and the Bank's market area, changes in real estate market values in the Company and the Bank's market area, changes in relevant accounting principles and guidelines and cyber security risks. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, the Company does not undertake, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.

Additional factors that may affect the Company's results are discussed in Part I of the Company's Annual Report on Form 10-K for the year ended December 31, 2015 (the "Form 10-K") that was filed with the Securities and Exchange Commission.

Critical Accounting Policies

Critical accounting policies are defined as those that involve significant judgments and uncertainties and could potentially result in materially different results under different assumptions and conditions. The Company considers its determination of the allowance for loan losses, the valuation of foreclosed real estate (OREO) and the valuation of deferred tax assets to be critical accounting policies.

The Company's Consolidated Financial Statements are prepared in accordance with accounting principles generally accepted in the United States of America and the general practices of the United States banking industry. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the financial statements. Accordingly, as this information changes, the financial statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a

greater reliance on the use of estimates, assumptions and judgments and, as such, have a greater possibility of producing results that could be materially different than originally reported.

Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available. When these sources are not available, management makes estimates based upon what it considers to be the best available information.

Allowance for Loan Losses

The allowance for loan losses is an estimate of the losses that exist in the loan portfolio. The allowance is based on two principles of accounting: (1) Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 450 “Contingencies,” which requires that losses be accrued when they are probable of occurring and are estimable and (2) FASB ASC 310 “Receivables,” which requires that losses be accrued when it is probable that the Company will not collect all principal and interest payments according to the contractual terms of the loan. The loss, if any, is determined by the difference between the loan balance and the value of collateral, the present value of expected future cash flows and values observable in the secondary markets.

The allowance for loan loss balance is an estimate based upon management's evaluation of the loan portfolio. The allowance is comprised of a specific and a general component. The specific component consists of management's evaluation of certain classified and non-accrual loans and their underlying collateral. Management assesses the ability of the borrower to repay the loan based upon all information available. Loans are examined to determine a specific allowance based upon the borrower's payment history, economic conditions specific to the loan or borrower and other factors that would impact the borrower's ability to repay the loan on its contractual basis. Depending on the assessment of the borrower's ability to pay and the type, condition and value of collateral, management will establish an allowance amount specific to the loan.

Management uses a risk scale to assign grades to commercial real estate, residential rentals, construction and land development, commercial loans and commercial equipment loans. Commercial loan relationships with an aggregate exposure to the Bank of \$750,000 or greater are risk rated. Residential first mortgages, home equity and second mortgages and consumer loans are monitored on an ongoing basis based on borrower payment history. Consumer loans and residential real estate loans are classified as unrated unless they are part of a larger commercial relationship that requires grading or are troubled debt restructures or nonperforming loans with an Other Assets Especially Mentioned or higher risk rating due to a delinquent payment history.

The Company's commercial loan portfolio is periodically reviewed by regulators and independent consultants engaged by management.

In establishing the general component of the allowance, management analyzes non-impaired loans in the portfolio including changes in the amount and type of loans. This analysis reviews trends by portfolio segment in charge-offs, delinquency, classified loans, loan concentrations and the rate of portfolio segment growth. Qualitative factors also include an assessment of the current regulatory environment, the quality of credit administration and loan portfolio management and national and local economic trends. Based upon this analysis a loss factor is applied to each loan category and the Bank adjusts the loan loss allowance by increasing or decreasing the provision for loan losses.

Management has significant discretion in making the judgments inherent in the determination of the allowance for loan losses, including the valuation of collateral, assessing a borrower's prospects of repayment and in establishing loss factors on the general component of the allowance. Changes in loss factors have a direct impact on the amount of the provision and on net income. Errors in management's assessment of the global factors and their impact on the portfolio could result in the allowance not being adequate to cover losses in the portfolio, and may result in additional provisions. At June 30, 2016 and December 31, 2015, the allowance for loan losses was \$9.1 million and \$8.5 million, respectively, or 0.91% and 0.93%, respectively, of total loans. An increase or decrease in the allowance could result in a charge or credit to income before income taxes that materially impacts earnings.

For additional information regarding the allowance for loan losses, refer to Notes 1 and 6 of the Consolidated Financial Statements as presented in the Company's Form 10-K for the year ended December 31, 2015 and the discussion in this MD&A.

Other Real Estate Owned ("OREO")

The Company maintains a valuation allowance on its other real estate owned. As with the allowance for loan losses, the valuation allowance on OREO is based on FASB ASC 450 "Contingencies," as well as the accounting guidance on impairment of long-lived assets. These statements require that the Company establish a valuation allowance when it has determined that the carrying amount of a foreclosed asset exceeds its fair value. Fair value of a foreclosed asset is measured by the cash flows expected to be realized from its subsequent disposition. These cash flows are reduced for the costs of selling or otherwise disposing of the asset.

Management must make significant assumptions in estimating the timing and amount of cash flows from the sale of OREO. For example, in cases where the real estate acquired is undeveloped land, management must gather the best available evidence regarding the market value of the property, including appraisals, cost estimates of development and broker opinions. Due to the highly subjective nature of this evidence, as well as the limited market, long time periods involved and substantial risks, cash flow estimates are subject to change. Errors regarding any aspect of the costs or proceeds of developing, selling or otherwise disposing of foreclosed real estate could result in the allowance being inadequate to reduce carrying costs to fair value and may require an additional provision for valuation allowances.

For additional information regarding OREO, refer to Notes 1 and 8 of the Consolidated Financial Statements as presented in the Company's Form 10-K for the year ended December 31, 2015.

Deferred Tax Assets

The Company accounts for income taxes in accordance with FASB ASC 740, "Income Taxes," which requires that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax bases of recorded assets and liabilities. FASB ASC 740 requires that deferred tax assets be reduced by a valuation allowance if it is more likely than not that some portion or the entire deferred tax asset will not be realized.

The Company periodically evaluates the ability of the Company to realize the value of its deferred tax assets. If the Company were to determine that it was not more likely than not that the Company would realize the full amount of the deferred tax assets, it would establish a valuation allowance to reduce the carrying value of the deferred tax asset to the amount it believes would be realized. The factors used to assess the likelihood of realization are the Company's forecast of future taxable income and available tax-planning strategies that could be implemented to realize the net deferred tax assets.

Failure to achieve forecasted taxable income might affect the ultimate realization of the net deferred tax assets. Factors that may affect the Company's ability to achieve sufficient forecasted taxable income include, but are not limited to, the following: increased competition, a decline in net interest margin, a loss of market share, decreased demand for financial services and national and regional economic conditions.

The Company's provision for income taxes and the determination of the resulting deferred tax assets and liabilities involve a significant amount of management judgment and are based on the best information available at the time. The Company operates within federal and state taxing jurisdictions and is subject to audit in these jurisdictions.

For additional information regarding income taxes and deferred tax assets, refer to Notes 1 and 12 in the Consolidated Financial Statements as presented in the Company's Form 10-K for the year ended December 31, 2015.

OVERVIEW

Community Bank of the Chesapeake (the "Bank") is headquartered in Southern Maryland with branches located in Maryland and Virginia. The Bank is a wholly owned subsidiary of The Community Financial Corporation. The Bank conducts business through its main office in Waldorf, Maryland, and 11 branch offices in Waldorf, Bryans Road, Dunkirk, Leonardtown, La Plata, Charlotte Hall, Prince Frederick, Lusby, California, Maryland; and Central Park and downtown Fredericksburg, Virginia. The Company opened its second branch in downtown Fredericksburg, Virginia in April 2016. In addition, the Company maintains five loan production offices ("LPOs") in La Plata, Prince Frederick, Leonardtown and Annapolis, Maryland; and Fredericksburg, Virginia. The Leonardtown and Fredericksburg LPOs are co-located with branches.

During 2015, the Company made a number of strategic decisions to meet its longer-term objectives of increased profitability and increase shareholder value. The Company continued to execute its plans to improve asset quality and to increase transaction deposits. For additional information regarding 2015 strategic initiatives and results see the overview section and the operations discussion in the MD&A as presented in the Company's Form 10-K for the year ended December 31, 2015.

In 2016, the Company's initiatives are to grow the loan portfolio by at least 10% and control expenses. Due to the low interest rate environment and the effects on net interest margin, the Company continues its restructuring of operations to reduce costs. In the first quarter of 2016, the Company completed a redesign of the entire branch system. This redesign, combined with the closure of the King George facility allowed the Company to reduce branch employees by 15% from 73 at March 31, 2015 to 62 at March 31, 2016. The Company is focused on reducing expenses by streamlining internal processes and FTEs as well as by reviewing vendor relationships. The Company is cautiously optimistic that these cost cutting efforts and its continued asset growth will create operating leverage and increase both its return on average assets and return on equity over the next year. During the first quarter of 2016, the Company identified annualized savings of \$1.2 million, primarily from reductions in staffing due to employee attrition and retirement.

The current year initiative to reduce costs picked up momentum during the second quarter of 2016. The Company's efficiency ratio improved to 68.33% during the second quarter from 70.68% for the previous quarter. The rate of expense growth was controlled at 0.7% compared to the prior quarter. In the first six months of 2016, loan growth was very strong. Average loans outstanding grew by \$77.9 million in the first six months and end of period gross loans have increased \$86.2 million, or 18.8% on an annualized basis, from \$918.9 million at December 31, 2015 to \$1.05 billion at June 30, 2016. The significant increase in loan volume resulted net interest income growing faster than operating expenses. The Company has a strong pipeline heading into the second half of the year and is optimistic that continued loan growth, paired with the expense reduction initiative, should increase operating leverage during the second half of 2016.

Economy

The U.S. economy continued to grow slowly throughout 2015 and 2014. Gross domestic product grew at an annual rate of one percent during the fourth quarter of 2015, which was half of the growth posted during the third quarter of 2015. It appears that an economic slowdown may be a possibility during 2016. The Federal Reserve has indicated through its survey of the Board of Governors that up to four rate increases are planned for 2016. This may depend on whether a further softening in the economy continues. The Federal Reserve is more likely to raise interest rates if inflationary factors present themselves, which appears unlikely at this point. During the first half of 2016, due to a number of world events and market disruptions, many economists reduced their forecasts for 2016 rate hikes from four down to two. The Federal Reserve has signaled during the second quarter that two rate hikes are likely.

Medium-term market interest rates have fallen since the fourth quarter of 2015, with the ten year U.S. Treasury rate as of July 15, 2016 ending at 1.60%. This is down from 2.27% at December 31, 2015. The five year U.S. Treasury rate as of July 15, 2016 was 1.15%. This is down from 1.76% at December 31, 2015. These lower medium-term interest rates are due to economic weaknesses in the world economy. Assuming treasury rates remain depressed in the 5 to 10 year range, there will be more negative pressure on the re-pricing of the loan portfolio and the pricing of new loans. The downward trend in treasury rates had a positive impact on local deposit pricing through the second quarter of 2016. The Company is optimistic that interest-earning asset growth will offset the negative impacts of lower asset yields in the current interest rate environment.

The impact of slower economic growth on the Southern Maryland, Annapolis, Maryland and Fredericksburg, Virginia areas has been moderated by the presence of federal government agencies and defense facilities. Further, the private sector that supports the Bank's footprint has continued to grow at a pace faster than other parts of the country. In addition, the Bank's market expansion has enabled the Company to grow the loan portfolio and has produced sustainable organic growth in deposits during 2014 and 2015. Even through the difficult economic environment, the Bank's capital levels and asset quality have remained strong.

For additional information regarding the local economy and its impact on the Company's business refer to the Business Section in the Company's Form 10-K for the year ended December 31, 2015 under the caption "Market Area" (*Part I, Item 1. Business Section – Market Area*).

^(a) Non-accrual loans include all loans that are 90 days or more delinquent and loans that are non-accrual due to the operating results or cash flows of a customer. Non-accrual loans can include loans that are current with all loan payments. Interest and principal are recognized on a cash-basis in accordance with the Bank's policy if the loans are not impaired or there is no impairment.

^(b) At June 30, 2016 and December 31, 2015, the Bank had total TDRs of \$16.1 million and \$18.6 million, respectively, with three TDR relationships totaling \$5.3 million and \$5.4 million, respectively, in non-accrual status. These loans are classified as non-accrual loans for the calculation of financial ratios.

COMPARISON OF RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED JUNE 30, 2016 AND 2015

Earnings Summary

Consolidated net income available to common shareholders of \$1.7 million for the three months ended June 30, 2016 increased \$27,000 compared to the three months ended June 30, 2015. Earnings per common share (diluted) at \$0.38 increased \$0.01 from \$0.37 per common share (diluted) for the three months ended June 30, 2015. This is attributable to an increase in net interest income of \$862,000, partially offset by increases to the provision for loan losses of \$172,000, noninterest expense of \$404,000, income tax expense of \$74,000 and decreased noninterest income of \$185,000.

The Company's return on average assets was 0.57% for the three months ended June 30, 2016 compared to 0.63% for the three months ended June 30, 2015. The Company's return on average common stockholders' equity was 6.79% compared to 6.88% for the same comparative period.

Net Interest Income

The primary component of the Company's net income is its net interest income, which is the difference between income earned on assets and interest paid on the deposits and borrowings used to fund them. Net interest income is affected by the difference between the yields earned on the Company's interest-earning assets and the rates paid on interest-bearing liabilities, as well as the relative amounts of such assets and liabilities. Net interest income, divided by average interest-earning assets, represents the Company's net interest margin.

Net interest income increased \$862,000 to \$9.9 million for the three months ended June 30, 2016 compared to \$9.0 million for the three months ended June 30, 2015. The net interest margin was 3.52% for the three months ended June 30, 2016, an eight basis point decrease from 3.60% for the three months ended June 30, 2015. The decrease in net interest margin was largely the result of lower yields on loans and slightly higher funding costs.

The following table shows the components of net interest income and the dollar and percentage changes for the periods presented.

(dollars in thousands)	Three Months Ended June 30,		\$ Change	% Change
	2016	2015		
Interest and Dividend Income				

Edgar Filing: COMMUNITY FINANCIAL CORP /MD/ - Form 10-Q

Loans, including fees	\$ 11,170	\$ 10,373	\$ 797	7.7	%
Taxable interest and dividends on investment securities	752	560	192	34.3	%
Interest on deposits with banks	6	2	4	200.0	%
Total Interest and Dividend Income	11,928	10,935	993	9.1	%
Interest Expenses					
Deposits	1,182	1,042	140	13.4	%
Short-term borrowings	49	12	37	308.3	%
Long-term debt	802	848	(46)	(5.4)	%
Total Interest Expenses	2,033	1,902	131	6.9	%
Net Interest Income (NII)	\$ 9,895	\$ 9,033	\$ 862	9.5	%

Interest and dividend income increased by \$993,000 to \$11.9 million for the three months ended June 30, 2016 compared to \$10.9 million for the three months ended June 30, 2015, primarily due to increased income from the growth in the average balance of loans and investments and increased investment yields. Interest and dividend income on loans increased \$1.1 million due to growth of \$91.8 million in the average balance of loans from \$874.9 million for the three months ended June 30, 2015 to \$966.7 million for the three months ended June 30, 2016. Interest and dividend income on investments increased \$196,000 during the second quarter of 2016 compared to the same period in the prior year as average interest-earning investment balances increased \$27.0 million and average yields increased from 1.73% to 1.93%. Average loan yields declined 12 basis points from 4.74% for the three months ended June 30, 2015 to 4.62% for the three months ended June 30, 2016, which resulted in a decrease in interest and dividend income of \$264,000.

Interest expense increased \$131,000 to \$2.0 million for the three months ended June 30, 2016 compared to \$1.9 million for the three months ended June 30, 2015, due primarily to an increase in the average balances of interest-bearing liabilities and a slight change in the composition of interest-bearing liabilities between the comparable periods. During the three months ended June 30, 2016, interest expense increased \$142,000 due to larger average balances of interest-bearing transaction deposit accounts, time deposits and short-term borrowings compared to the same quarter of 2015. Additionally, interest expense increased \$60,000 due to increased rates on interest-bearing deposit accounts and debt. These increases to interest expense were partially offset by a reduction in interest expense of \$71,000 due to an \$11.8 million decrease in average long-term debt balances from the comparable period to \$58.8 million for the three months ended June 30, 2016. As a result of the change in the composition of debt, the average rate paid on debt declined from 2.80% for the three months ended June 30, 2015 to 2.66% for the comparable period in 2016.

The Company continued to make progress in controlling overall deposit costs by increasing transaction deposits as a percentage of overall deposits. Average transaction accounts as a percentage of average total deposits increased from 55.6% for the three months ended June 30, 2015 to 57.3% for the three months ended June 30, 2016. Deposit costs at 0.49% were the same for the three months ended June 30, 2016 and 2015, respectively. Average transaction deposits, which include savings, money market, interest-bearing demand and noninterest bearing demand accounts, for the three months ended June 30, 2016 increased \$81.6 million or 17.2% to \$556.0 million compared to \$474.4 million for the comparable period in 2015. The increase in average transaction deposits included growth in average noninterest bearing demand deposits of \$26.3 million from \$115.9 million for the three months ended June 30, 2015 to \$142.2 million for the three months ended June 30, 2016.

The following table presents information on average balances and rates for deposits.

(dollars in thousands)	For the Three Months Ended June 30,

(1) Average balance includes non-accrual loans

The following table sets forth certain information regarding changes in interest income and interest expense of the Bank for the periods indicated. For each category of interest-earning asset and interest-bearing liability, information is provided on changes attributable to (1) changes in volume (changes in volume multiplied by old rate); and (2) changes in rate (changes in rate multiplied by old volume). Changes in rate-volume (changes in rate multiplied by the change in volume) have been allocated to changes due to volume.

Provision for Loan Losses

The following table shows the dollar and percentage changes for the provision for loan losses for the periods presented.

(dollars in thousands)	Three Months Ended June 30,			
	2016	2015	\$ Change	% Change
Provision for loan losses	\$ 564	\$ 392	\$ 172	43.9 %

The provision for loan losses increased \$172,000 to \$564,000 for the three months ended June 30, 2016 compared to \$392,000 for the three months ended June 30, 2015. Net charge-offs for the quarter decreased \$207,000 from \$256,000 for the three months ended June 30, 2015 to \$49,000 for the three months ended June 30, 2016.

Improvements to baseline charge-off factors for the periods used to evaluate the adequacy of the allowance as well as improvements in some qualitative factors, such as reductions in classified assets and delinquency, were offset by increases in other qualitative factors, such as increased loan growth. The improvement in the base-line charge-off factors reflects more favorable loan loss experience during the five-year period ended June 30, 2016 than for the comparable period ended. Overall, these changes resulted in a higher provision for loan losses for the comparable periods. The specific allowance is based on management's estimate of realizable value for particular loans and has decreased as specific credits have been resolved through a return to performance, charge-offs and additions to OREO.

See further discussion of the provision under the caption "Asset Quality" in the Comparison of Financial Condition section of Management's Discussion and Analysis.

Noninterest Income

The following table shows the components of noninterest income and the dollar and percentage changes for the periods presented.

(dollars in thousands)	Three Months Ended June 30,			
	2016	2015	\$ Change	% Change
Noninterest Income				
Loan appraisal, credit, and miscellaneous charges	\$ 102	\$ 90	\$ 12	13.3 %
Gain on sale of asset	4	1	3	300.0 %
Net losses on sale of OREO	(448)	(18)	(430)	2388.9 %
Net gains on sale of investment securities	39	-	39	n/a
Income from bank owned life insurance	198	205	(7)	(3.4)%
Service charges	882	677	205	30.3)%
Gain on sale of loans held for sale	-	7	(7)	(100.0)%

Total Noninterest Income	\$ 777	\$ 962	\$ (185)	(19.2)%
--------------------------	--------	--------	-----------	----------

Noninterest income decreased by \$185,000 to \$777,000 for the three months ended June 30, 2016 compared to \$962,000 for the three months ended June 30, 2015. During the second quarter of 2016, the Company recognized losses of \$448,000 on the disposition of \$2.8 million in OREO compared to \$18,000 in OREO losses recognized for the comparable period. The OREO losses were partially offset by increases of \$205,000 in service charges and \$40,000 from miscellaneous and other income sources compared to same three months in the prior year. Service charge income has increased primarily due to increased transaction account volume and wealth services.

Noninterest Expense

The following tables show the components of noninterest expense and the dollar and percentage changes for the periods presented.

(dollars in thousands)	Three Months Ended June 30,				
	2016	2015	\$ Change	% Change	
Compensation and Benefits	\$ 4,197	\$ 3,888	\$ 309	7.9	%
OREO Valuation Allowance and Expenses	105	334	(229)	(68.6)%

Advertising	156	183	(27)	(14.8)%
Data processing expense	580	507	73	14.4	%
Professional fees	380	272	108	39.7	%
Depreciation of furniture, fixtures, and equipment	206	204	2	1.0	%
Telephone communications	46	39	7	17.9	%
Office supplies	29	31	(2)	(6.5)%
FDIC Insurance	184	190	(6)	(3.2)%
OREO valuation allowance and expenses	105	334	(229)	(68.6)%
Other	773	635	138	21.7	%
Total Noninterest Expense	\$ 7,292	\$ 6,888	\$ 404	5.9	%

For the three months ended June 30, 2016, noninterest expense increased 5.9%, or \$404,000, to \$7.3 million from \$6.9 million for the comparable period in 2015. The Company's 2015 total growth in salary and benefit costs was 3.2%. Total growth of salary and benefits in the first six months of 2016 was \$316,000 or 3.9%. Salary and benefit costs have increased from the comparable period as incentive compensation has increased due to interest-earning asset growth as well as higher self-insured health insurance claims. The Company's efficiency ratio and noninterest expense as a percentage of average assets for the three months ended June 30, 2016 and 2015 were 68.33% and 2.41%, respectively, and 68.91% and 2.54%, respectively.

Noninterest expense of \$7.3 million for the second quarter of 2016 increased \$52,000, or 0.7%, from the first quarter of 2016. The current quarter increase was primarily the result of increases in operating expenses of \$203,000 compared to the prior quarter, of which approximately \$100,000 related to the timing of planned advertising

campaigns. The Company's compensation and benefits increased slightly in the second quarter of 2016 compared to the prior quarter due to higher self-insured health insurance claims.

Income Tax Expense

For the three months ended June 30, 2016 and 2015, the Company recorded income tax expense of \$1.1 million and \$1.0 million, respectively. The Company's effective tax rates for the three months ended June 30, 2016 and 2015 were 38.28% and 36.98%, respectively. The increase in the effective tax rate was the result of tax-exempt income being relatively lower to total income for the three months ended June 30, 2016 compared to the three months ended June 30, 2015.

COMPARISON OF RESULTS OF OPERATIONS FOR THE SIX MONTHS ENDED JUNE 30, 2016 AND 2015

Earnings Summary

Consolidated net income available to common shareholders of \$3.3 million or \$0.72 per common share (diluted) for the six months ended June 30, 2016 decreased \$163,000 or \$0.03 per common share (diluted) compared to the six months ended June 30, 2015. The decrease is attributable to increases to the provision for loan losses of \$421,000, noninterest expense of \$701,000 and decreased noninterest income of \$297,000. These decreases to net income were partially offset by increased net interest income of \$1.2 million and reductions in income tax expense of \$41,000 and preferred dividends of \$23,000.

Additionally, it is important to note that consolidated net income reflects the impact of the 2015 subordinated debt offering that replaced SBLF preferred stock. During the first six months of 2016, interest expense increased \$143,000 due to the larger first quarter 2016 average balance of the subordinated notes issued in February 2015.

The Company's return on average assets was 0.57% for the six months ended June 30, 2016 compared to 0.66% for the three months ended June 30, 2015. The Company's return on average common stockholders' equity was 6.58% compared to 7.10% for the same comparative period.

Net Interest Income

The primary component of the Company's net income is its net interest income, which is the difference between income earned on assets and interest paid on the deposits and borrowings used to fund them. Net interest income is affected by the difference between the yields earned on the Company's interest-earning assets and the rates paid on interest-bearing liabilities, as well as the relative amounts of such assets and liabilities. Net interest income, divided by average interest-earning assets, represents the Company's net interest margin.

Net interest income increased \$1.2 million to \$19.3 million for the six months ended June 30, 2016 compared to \$18.1 million for the six months ended June 30, 2015. The net interest margin was 3.51% for the six months ended June 30, 2016, a 12 basis point decrease from 3.63% for the six months ended June 30, 2015. The decrease in net interest margin was largely the result of lower yields on loans, slightly higher funding costs and a full quarter of interest expense in the three months ended March 31, 2016 on the \$23.0 million 6.25% subordinated notes issued during February 2015.

The following table shows the components of net interest income and the dollar and percentage changes for the periods presented.

(dollars in thousands)	Six Months Ended June 30,		\$ Change	% Change	
	2016	2015			
Interest and Dividend Income					
Loans, including fees	\$ 21,715	\$ 20,550	\$ 1,165	5.7	%
Taxable interest and dividends on investment securities	1,515	1,107	408	36.9	%
Interest on deposits with banks	10	6	4	66.7	%
Total Interest and Dividend Income	23,240	21,663	1,577	7.3	%
Interest Expenses					
Deposits	2,277	2,030	247	12.2	%
Short-term borrowings	87	21	66	314.3	%
Long-term debt	1,588	1,516	72	4.7	%
Total Interest Expenses	3,952	3,567	385	10.8	%
Net Interest Income (NII)	\$ 19,288	\$ 18,096	\$ 1,192	6.6	%

Interest and dividend income increased by \$1.6 million to \$23.2 million for the six months ended June 30, 2016 compared to \$21.7 million for the six months ended June 30, 2015, primarily due to increased income from the growth in the average balance of loans and investments and increased investment yields. Interest and dividend income on loans increased \$1.8 million due to growth of \$78.9 million, or 9.1%, in the average balance of loans from \$864.0 million for the six months ended June 30, 2015 to \$942.9 million for the six months ended June 30, 2016. Interest and dividend income on investments increased \$412,000 during the first six months of 2016 compared to the same period in the prior year as average interest-earning investment balances increased \$24.1 million and average yields increased from 1.69% to 1.96%. Average loan yields declined 15 basis points from 4.76% for the six months ended June 30, 2015 to 4.61% for the six months ended June 30, 2016, which resulted in a decrease in interest and dividend income of \$653,000.

Interest expense increased \$385,000 to \$4.0 million for the six months ended June 30, 2016 compared to \$3.6 million for the six months ended June 30, 2015, due primarily to an increase in the average balances of interest-bearing liabilities. During the six months ended June 30, 2016, interest expense increased \$378,000 due to larger average balances of interest-bearing transaction deposit accounts, time deposits, short-term borrowings and subordinated notes compared to the same period of 2015. Additionally, interest expense increased \$211,000 due to increased rates on interest-bearing deposit accounts and debt. These increases to interest expense were partially offset by a reduction in interest expense of \$204,000 due to a \$16.2 million decrease in average long-term debt balances from the comparable period to \$55.4 million for the six months ended June 30, 2016. The average rate paid on debt, which includes long-term debt, trust preferred junior subordinated debentures (“TRUPS”), subordinated notes, and short-term borrowings, increased from 2.63% for the six months ended June 30, 2015 to 2.69% for the six months ended June 30, 2016. Interest expense for the six months ended June 30, 2016 was \$148,000 greater than the comparable period as a result of the timing of the funding of the subordinated notes in February 2015.

The Company continued to make progress in controlling overall deposit costs by increasing transaction deposits as a percentage of overall deposits. Average transaction accounts as a percentage of average total deposits increased from 55.2% for the six months ended June 30, 2015 to 57.2% for the six months ended June 30, 2016. Deposit costs at 0.48% were the same for the six months ended June 30, 2016 and 2015, respectively. Average transaction deposits, which include savings, money market, interest-bearing demand and noninterest bearing demand accounts, for the six months ended June 30, 2016 increased \$74.6 million, or 16.0%, to \$541.2 million compared to \$466.6 million for the comparable period in 2015. The increase in average transaction deposits included growth in average noninterest bearing demand deposits of \$23.6 million, or 20.7%, from \$114.0 million for the six months ended June 30, 2015 to \$137.6 million for the six months ended June 30, 2016.

The following table presents information on average balances and rates for deposits.

Provision for Loan Losses

The following table shows the dollar and percentage changes for the provision for loan losses for the periods presented.

(dollars in thousands)	Six Months Ended June 30,			
	2016	2015	\$ Change	% Change
Provision for loan losses	\$ 991	\$ 570	\$ 421	73.9 %

The provision for loan losses increased \$421,000 to \$991,000 for the six months ended June 30, 2016 compared to \$570,000 for the six months ended June 30, 2015. Net charge-offs for the first six months increased \$131,000 from \$294,000 for the six months ended June 30, 2015 to \$425,000 for the six months ended June 30, 2016. Improvements to baseline charge-off factors for the periods used to evaluate the adequacy of the allowance as well as improvements in some qualitative factors, such as reductions in classified assets and delinquency, were offset by increases in other qualitative factors, such as increased loan growth. The improvement in the base-line charge-off factors reflects more favorable loan loss experience during the five-year period ended June 30, 2016 than for the comparable period ended. Overall, these changes resulted in a higher provision for loan losses for the comparable periods. The specific allowance is based on management's estimate of realizable value for particular loans and has decreased as specific credits have been resolved through a return to performance, charge-offs and additions to OREO.

See further discussion of the provision under the caption "Asset Quality" in the Comparison of Financial Condition section of Management's Discussion and Analysis.

Noninterest Income

The following table shows the components of noninterest income and the dollar and percentage changes for the periods presented.

(dollars in thousands)	Six Months Ended June 30,			
	2016	2015	\$ Change	% Change
Noninterest Income				
Loan appraisal, credit, and miscellaneous charges	\$ 163	\$ 148	\$ 15	10.1 %
Gain on sale of asset	4	19	(15)	(78.9)%
Net losses on sale of OREO	(443)	(18)	(425)	2361.1 %
Net gains (losses) on sale of investment securities	39	(1)	40	(4000.0)%
Income from bank owned life insurance	394	410	(16)	(3.9)%
Service charges	1,470	1,262	208	16.5 %
Gain on sale of loans held for sale	-	104	(104)	(100.0)%

Total Noninterest Income	\$ 1,627	\$ 1,924	\$ (297)	(15.4)%
--------------------------	----------	----------	-----------	----------

Noninterest income decreased by \$297,000 to \$1.6 million for the six months ended June 30, 2016 compared to \$1.9 million for the six months ended June 30, 2015. Noninterest income decreased due to the Company's exit from residential loan originations during the second quarter of 2015 and as a result, there were no gains on residential loans held for sale in the six months ended June 30, 2016 compared to \$104,000 for the six months ended June 30, 2015. During the first six months of 2016, the Company recognized losses of \$443,000 on the disposition of \$3.4 million in OREO compared to \$18,000 in OREO losses recognized for the comparable period. The decreases to noninterest income were partially offset by increases of \$208,000 in service charges and \$24,000 from miscellaneous and other income sources compared to same six months in the prior year. Service charge income has increased primarily due to increased transaction account volume and wealth services.

Noninterest Expense

The following tables show the components of noninterest expense and the dollar and percentage changes for the periods presented.

(dollars in thousands)	Six Months Ended June 30,				
	2016	2015	\$ Change	% Change	
Compensation and Benefits	\$ 8,349	\$ 8,033	\$ 316	3.9	%

Operating Expenses	5,777	5,245	532	10.1	%
Total Noninterest Expense	\$ 14,532	\$ 13,831	\$ 701	5.1	%

(dollars in thousands)	Six Months Ended June 30,				
	2016	2015	\$ Change	% Change	
Noninterest Expense					
Salary and employee benefits	\$ 8,349	\$ 8,033	\$ 316	3.9	%
Occupancy expense	1,225	1,235	(10)	(0.8)%
Advertising	219	286	(67)	(23.4)%
Data processing expense	1,134	1,025	109	10.6	%
Professional fees	805	567	238	42.0	%
Depreciation of furniture, fixtures, and equipment	402	405	(3)	(0.7)%
Telephone communications	90	85	5	5.9	%
Office supplies	72	70	2	2.9	%
FDIC Insurance	427	388	39	10.1	%
OREO valuation allowance and expenses	406	553	(147)	(26.6)%
Other	1,403	1,184	219	18.5	%
Total Noninterest Expense	\$ 14,532	\$ 13,831	\$ 701	5.1	%

For the six months ended June 30, 2016, noninterest expense increased 5.1%, or \$701,000, to \$14.5 million from \$13.8 million for the comparable period in 2015. The Company's 2015 total growth in salary and benefit costs was 3.2%. Total growth of salary and benefits in the first six months of 2016 was \$316,000 or 3.9%. Salary and benefit costs have increased from the comparable period as incentive compensation has increased due to interest-earning asset growth as well as higher self-insured health insurance claims. The Company's efficiency ratio and noninterest expense as a percentage of average assets for the six months ended June 30, 2016 and 2015 were 69.48% and 2.46%, respectively, and 69.09% and 2.57%, respectively.

Income Tax Expense

For the six months ended June 30, 2016 and 2015, the Company recorded income tax expense of \$2.0 million and \$2.1 million, respectively. The Company's effective tax rates for the six months ended June 30, 2016 and 2015 were 37.95% and 37.14%, respectively. The increase in the effective tax rate was the result of tax-exempt income being

relatively lower to total income for the six months ended June 30, 2016 compared to the six months ended June 30, 2015.

COMPARISON OF FINANCIAL CONDITION AT JUNE 30, 2016 AND DECEMBER 31, 2015**Assets**

Total assets at June 30, 2016 were \$1.23 billion, an increase of \$90.1 million, or 16.1% on an annualized basis, compared to total assets of \$1.14 billion at December 31, 2015. The increase in total assets was primarily attributable to growth in loans. Net loans increased \$86.3 million, or 19.1% on an annualized basis, from \$909.2 million at December 31, 2015 to \$995.5 million at June 30, 2016, mainly due to increases in loans for commercial real estate and residential first mortgages, offset in part, by a reduction in commercial loans. The differences in allocations between the cash and investment categories reflect operational needs.

The following table shows the Company's assets and the dollar and percentage changes for the periods presented.

(dollars in thousands)	June 30, 2016 (Unaudited)	December 31, 2015	\$ Change	% Change

	9,553			9,694		
	\$ 995,515			\$ 909,200		

The Company separated residential rentals into a new loan portfolio segment beginning in the second quarter of 2016. Residential rentals include income producing properties that are 1-4 family units and apartment buildings. The Company's decision to segregate the residential rental portfolio for financial reporting was based on the growth and size of the portfolio and risk characteristics unique to residential rental properties. Residential rentals were previously included in the residential first mortgage and commercial real estate mortgage portfolios. See Note 11 - Loans in the notes to the consolidated financial statements for additional information on risk characteristics of the residential rental portfolio.

Asset Quality

The following tables show asset quality ratios at June 30, 2016 and December 31, 2015.

(dollars in thousands, except per share amounts)	(Unaudited)		\$ Change	% Change
	June 30, 2016	December 31, 2015		
ASSET QUALITY				
Total assets	\$ 1,233,401	\$ 1,143,332	\$ 90,069	7.9 %

Other real estate owned (OREO)	8,460	9,449	(989)	(10.5)
Non-accrual loans, OREO and TDRs	29,562	34,015	(4,453)	(13.1)
ASSET QUALITY RATIOS				
Classified assets to total assets	3.35	% 3.79	%	
Classified assets to risk-based capital	28.25	30.19		
Allowance for loan losses to total loans	0.91	0.93		
Allowance for loan losses to NPLs	95.45	79.52		
Past due loans (PDLs) to total loans	0.08	0.10		
Nonperforming loans (NPLs) to total loans	0.95	1.17		
Loan delinquency to total loans	1.03	1.27		
Non-accrual loans to total loans	1.02	1.24		
Non-accrual loans and TDRs to total loans	2.10	2.67		
Non-accrual loans and OREO to total assets	1.51	1.83		
Non-accrual loans, OREO and TDRs to total assets	2.40	2.98		

^(a) Non-accrual loans include all loans that are 90 days or more delinquent and loans that are non-accrual due to the operating results or cash flows of a customer. Non-accrual loans can include loans that are current with all loan payments. Interest and principal are recognized on a cash-basis in accordance with the Bank's policy if the loans are not impaired or there is no impairment.

^(b) At June 30, 2016 and December 31, 2015, the Bank had total TDRs of \$16.1 million and \$18.6 million, respectively, with three TDR relationships totaling \$5.3 million and \$5.4 million, respectively, in non-accrual status. These loans are classified as non-accrual loans for the calculation of financial ratios.

The Company has been working to reduce classified loans by using approaches that maximize the Company's contractual rights with each individual customer relationship. The objective is to move non-performing or substandard credits that are not likely to become performing or passing credits in a reasonable timeframe off the balance sheet. The Company is encouraging existing classified customers to obtain financing with other lenders or enforcing its contractual rights. Management believes this strategy is in the best long-term interest of the Company. As a result of these efforts, non-accrual loans and OREO to total assets decreased 32 basis points from 1.83% at December 31, 2015 to 1.51% at June 30, 2016. Non-accrual loans, OREO and TDRs to total assets decreased 58 basis points from 2.98% at December 31, 2015 to 2.40% at June 30, 2016.

Management considers classified assets to be an important measure of asset quality. Classified assets have been trending downward the last several years as a percentage of total assets and risk-based regulatory capital and in total dollars from a high point of greater than \$81.9 million at September 30, 2011 to \$41.4 million as of June 30, 2016 representing a decline of nearly 50%. During the fourth quarter of 2015, the Company reduced classified loans \$3.5 million to \$32.8 million. Of the fourth quarter 2015 reduction in classified loans, \$2.7 million was transferred to OREO. These properties consisted of a 21 unit apartment building and 11 condo units. The Company disposed of \$3.4 million of OREO properties during the first six months of 2016, including the aforementioned properties. During the three months ended March 31, 2016, the Company took a deed in lieu of foreclosure on a \$2.1 million improved commercial office building with multiple tenants and a ratified contract for its sale. That contract was voided during the second quarter. The Company plans to manage the property until its sale and will recognize miscellaneous rental income during its ownership and management of the property. There is no expected loss from the eventual disposal of this property based on current appraised values, the current rent roll and rents of similar space in the area.

The following is a breakdown of the Company's classified and special mention assets at June 30, 2016 and December 31, 2015, 2014, 2013, 2012 and 2011, respectively:

Classified Assets and Special Mention Assets

(dollars in thousands)	As of 6/30/2016	As of 12/31/2015	As of 12/31/2014	As of 12/31/2013	As of 12/31/2012	As of 12/31/2011

Total classified assets as a percentage of Risk Based Capital	28.25 %	30.19 %	39.30 %	43.11 %	59.02 %	83.89 %

The allowance for loan losses was 0.91% of gross loans at June 30, 2016 and 0.93% at December 31, 2015. There was an increase in the general component of the allowance due to changes to general allowance factors that reflect changes in historical loss, loan growth, delinquency rates and general economic conditions. Management's determination of the adequacy of the allowance is based on a periodic evaluation of the portfolio with consideration given to: overall loss experience; current economic conditions; size, growth and composition of the loan portfolio; financial condition of the borrowers; current appraised values of underlying collateral and other relevant factors that, in management's judgment, warrant recognition in determining an adequate allowance. Improvements to baseline charge-off factors for the periods used to evaluate the adequacy of the allowance as well as improvements in some qualitative factors, such as reductions in classified assets and delinquency, were offset by increases in other qualitative factors, such as increased loan growth. The specific allowance is based on management's estimate of realizable value for particular loans. Management believes that the allowance is adequate.

The Company increased its general allowance as a percentage of gross loans three basis points from 0.75% at December 31, 2015 to 0.78% at June 30, 2016. The following is a breakdown of the Company's general and specific allowances as a percentage of gross loans at June 30, 2016 and December 31, 2015, respectively.

(dollar in thousands)	June 30, 2016	% of Gross Loans	December 31, 2015	% of Gross Loans
General Allowance	\$ 7,883	0.78	% \$ 6,932	0.75
Specific Allowance	1,223	0.13	% 1,608	0.17
Total Allowance	\$ 9,106	0.91	% \$ 8,540	0.93

The most important weighted factor in the Company's allowance for loan loss methodology is the charge-off history of the loan portfolio. The historical loss experience factor is tracked over various time horizons for each portfolio segment. It is weighted as the most important factor of the general component of the allowance and has decreased as the Bank's charge-off history has improved. The following table provides a five-year trend and the current year to date and comparable year to date of the prior year of net charge-offs as a percentage of average loans.

(dollars in thousands)	Six Months Ended June 30,		Years Ended December 31,										
	2016	2015	2015	2014	2013	2012	2011						
Average loans	\$ 942,880	\$ 863,955	\$ 874,186	\$ 819,381	\$ 741,369	\$ 719,798	\$ 671,242						
Net charge-offs	425	294	1,374	2,309	1,049	1,937	4,101						
Net charge-offs to average loans	0.09	% 0.07	% 0.16	% 0.28	% 0.14	% 0.27	% 0.61	%					

Non-accrual loans (90 days or greater delinquent and non-accrual only loans) decreased \$1.2 million from \$11.4 million or 1.24% of total loans at December 31, 2015 to \$10.2 million or 1.02% of total loans at June 30, 2016. Non-accrual only loans are loans classified as non-accrual due to customer operating results or payment history. In accordance with the Company's policy, interest income is recognized on a cash basis for these loans. The Company had 33 non-accrual loans at June 30, 2016 compared to 38 non-accrual loans at December 31, 2015. Non-accrual loans at June 30, 2016 included \$7.7 million, or 75% of non-accrual loans, attributed to 17 loans representing six customer relationships classified as substandard. Non-accrual loans at December 31, 2015 included \$8.1 million, or 71% of non-accrual loans, attributed to 19 loans representing six customer relationships classified as substandard. Of these loans at June 30, 2016 and December 31, 2015, \$3.6 million and \$3.8 million, respectively, represented a residential development project. During the second quarter of 2014, the Company deferred the collection of principal and interest on this project. The project is currently being built out with the support of private equity funds which have been used for vertical construction that has significantly improved the collateral value and the viability of the project. The loans remain classified as troubled debt restructures ("TDRs") and non-accrual. In addition, at June 30, 2016 and December 31, 2015, the Company had three TDR loans totaling \$1.6 million and \$1.7 million, respectively, classified as non-accrual. These loans are classified solely as non-accrual loans for the calculation of financial ratios.

Loan delinquency (90 days or greater delinquent and 31-89 days delinquent) decreased \$1.3 million from \$11.7 million, or 1.27% of loans, at December 31, 2015 to \$10.4 million, or 1.03% of loans, at June 30, 2016. Loans 31-89 days delinquent decreased \$127,000 from \$948,000, or 0.10% of total loans, at December 31, 2015 to \$821,000, or 0.08% of total loans, at June 30, 2016.

At June 30, 2016, the Company had 19 accruing TDRs totaling \$10.9 million compared to 23 accruing TDRs totaling \$13.1 million as of December 31, 2015. The Company had specific reserves of \$968,000 on seven TDRs totaling \$3.3 million at June 30, 2016 and specific reserves of \$1.3 million on nine TDRs totaling \$3.6 million at December 31, 2015. At June 30, 2016, \$8.1 million or 74% of accruing TDRs of \$10.9 million relate to one customer relationship. The \$8.1 million in TDRs is for eight loans with two construction and land development loans totaling \$724,000, one commercial loan of \$197,000 and five commercial real estate loans totaling \$7.1 million. The loans in this relationship have been classified as TDRs since the fourth quarter of 2014 and have performed according to the terms of their restructured agreements with all required payments made timely. They presently remain as TDRs due to below market rates of interest negotiated at the time of the restructure to obtain additional collateral. The Company has a strong collateral position in this relationship and as of June 30, 2016 has specific reserves of \$470,000 on the relationship.

The following is a breakdown by loan classification of the Company's TDRs at June 30, 2016 and December 31, 2015.

(dollars in thousands)	June 30, 2016		December 31, 2015	
	Dollars	Number of Loans	Dollars	Number of Loans
Commercial real estate	\$9,715	8	\$ 9,839	8
Residential first mortgages	556	2	881	3
Residential rentals	230	1	2,058	5
Construction and land development	4,370	4	4,283	4
Commercial loans	1,141	7	1,384	8
Commercial equipment	118	2	123	2
Total TDRs	\$16,130	24	\$ 18,568	30
Less: TDRs included in non-accrual loans	(5,252)	(5)	(5,435)	(7)
Total accrual TDR loans	\$10,878	19	\$ 13,133	23

The OREO balance was \$8.5 million at June 30, 2016, a decrease of \$989,000 compared to \$9.4 million at December 31, 2015. This decrease consisted of additions of \$2.7 million offset by valuation allowances of \$262,000 to adjust properties to current appraised values and \$3.4 million in disposals. OREO carrying amounts reflect management's estimate of the realizable value of these properties incorporating current appraised values, local real estate market conditions and related costs.

At June 30, 2016, 99%, or \$142.1 million of the asset-backed securities and agency bond portfolio was rated AAA by Standard & Poor's or the equivalent credit rating from another major rating agency compared to 99%, or \$138.3 million, at December 31, 2015. Debt securities are evaluated quarterly to determine whether a decline in their value is OTTI. No OTTI charge was recorded for the six months ended June 30, 2016 and year ended December 31, 2015, respectively. Classified securities decreased \$118,000 from \$1.1 million at December 31, 2015 to \$975,000 at June 30, 2016.

Gross unrealized losses on HTM and AFS securities decreased from \$1.5 million at December 31, 2015 to \$389,000 at June 30, 2016 (see Note 10 in Consolidated Financial Statements). Gross unrealized losses at June 30, 2016 and December 31, 2015 for AFS securities were \$202,000 and \$557,000, respectively, of amortized cost of \$39.8 million and \$35.5 million, respectively. Gross unrealized losses at June 30, 2016 and December 31, 2015 for HTM securities were \$187,000 and \$941,000, respectively, of amortized cost of \$107.8 million and \$109.4 million, respectively. The change in unrealized losses was the result of changes in interest rates, while credit risks remained stable. The Bank holds over 96% of its AFS and HTM securities as asset-backed securities of GSEs, GSE agency bonds or U.S. government obligations. The Company intends to, and has the ability to, hold both AFS and HTM securities with unrealized losses until they mature, at which time the Company will receive full value for the securities. The Company believes that the AFS and HTM securities with unrealized losses will either recover in market value or be paid off as agreed.

Liabilities

The following table shows the Company's liabilities and the dollar and percentage changes for the periods presented.

	June 30, 2016	December 31, 2015	\$ Change	% Change	
(dollars in thousands)	(Unaudited)				
Deposits					
Non-interest-bearing deposits	\$ 142,365	\$ 142,771	\$(406)	(0.3)%	
Interest-bearing deposits	851,110	764,128	86,982	11.4 %	
Total deposits	993,475	906,899	86,576	9.5 %	
Short-term borrowings	28,000	36,000	(8,000)	(22.2)%	
Long-term debt	65,588	55,617	9,971	17.9 %	

Guaranteed preferred beneficial interest in junior subordinated debentures (TRUPs)	12,000	12,000	-	0.0	%
Subordinated notes - 6.25%	23,000	23,000	-	0.0	%
Accrued expenses and other liabilities	8,972	10,033	(1,061)	(10.6)	%
Total Liabilities	\$ 1,131,035	\$ 1,043,549	\$ 87,486	8.4	%

Deposits and Borrowings

Deposits increased by 19.1% on an annualized basis or \$86.6 million, to \$993.5 million at June 30, 2016 compared to \$906.9 million at December 31, 2015. Between 2012 and 2016, the Company increased transaction deposits, including noninterest bearing deposits, to lower its overall cost of funds. Transaction deposits have increased from 44.9% of total deposits at December 31, 2011 to 57.2% of total deposits at June 30, 2016.

Details of the Company's deposit portfolio at June 30, 2016 and December 31, 2015 are presented below:

(dollars in thousands)	June 30, 2016		December 31, 2015	
	Balance	%	Balance	%
Noninterest-bearing demand	\$142,365	14.33 %	\$142,771	15.74 %
Interest-bearing:				
Demand	139,334	14.02 %	120,918	13.33 %
Money market deposits	237,372	23.89 %	219,956	24.25 %
Savings	48,670	4.90 %	47,703	5.26 %
Certificates of deposit	425,734	42.85 %	375,551	41.41 %
Total interest-bearing	851,110	85.67 %	764,128	84.26 %
Total Deposits	\$993,475	100.00 %	\$906,899	100.00 %
Transaction accounts	\$567,741	57.15 %	\$531,348	58.59 %

The Company uses both traditional brokered deposits and reciprocal brokered deposits. Traditional brokered deposits at June 30, 2016 and December 31, 2015 were \$119.7 million and \$49.1 million, respectively. Reciprocal brokered deposits at June 30, 2016 and December 31, 2015 were \$60.2 million and \$61.1 million, respectively. The reciprocal brokered deposits have many characteristics of core deposits and are used to maximize FDIC insurance available to customers. Long-term debt and short-term borrowings increased \$2.0 million from \$91.6 million at December 31, 2015 to \$93.6 million at June 30, 2016. The Company uses brokered deposits and other wholesale funding to supplement funding when loan growth exceeds core deposit growth and for asset-liability management purposes.

The Bank uses advances from the FHLB of Atlanta to supplement the supply of funds it may lend and to meet deposit withdrawal requirements. Advances from the FHLB are secured by the Bank's stock in the FHLB, a portion of the Bank's loan portfolio and certain investments. Generally, the Bank's ability to borrow from the FHLB of Atlanta is limited by its available collateral and also by an overall limitation of 30% of assets. Further, short-term credit facilities are available at the Federal Reserve Bank of Richmond and other commercial banks. Long-term debt consists of adjustable-rate advances with rates based upon LIBOR, fixed-rate advances, and convertible advances. At June 30, 2016 and December 31, 2015, 100% of the Bank's long-term debt was fixed for rate and term, as the conversion optionality of the advances have either been exercised or expired.

Stockholders' Equity

The following table shows the Company's equity and the dollar and percentage changes for the periods presented.

June 30, 2016 December 31, 2015

Edgar Filing: COMMUNITY FINANCIAL CORP /MD/ - Form 10-Q

(dollars in thousands)	(Unaudited)		\$ Change	% Change	
Common Stock at par of \$0.01	\$ 47	\$ 46	\$ 1	2.2	%
Additional paid in capital	47,007	46,809	198	0.4	%
Retained earnings	55,574	53,495	2,079	3.9	%
Accumulated other comprehensive gain (loss)	54	(251)) 305	(121.5)%
Unearned ESOP shares	(316) (316) -	0.0	%
Total Stockholders' Equity	\$ 102,366	\$ 99,783	\$ 2,583	2.6	%

During the six months ended June 30, 2016, stockholders' equity increased \$2.6 million to \$102.4 million. The increase in stockholders' equity was due to net income of \$3.3 million, net stock related activities related to stock-based compensation of \$176,000 and a current year increase in accumulated other comprehensive gain of \$305,000. These increases to capital were partially offset by quarterly common dividends paid of \$908,000 and repurchases of common stock of \$336,000. Common stockholders' equity of \$102.4 million at June 30, 2016 resulted in a book value of \$22.01 per common share compared to \$21.48 at December 31, 2015. The Company remains well-capitalized at June 30, 2016 with a Tier 1 capital to average assets ratio of 9.43%. Accumulated other comprehensive losses reversed to become gains during the first six months of 2016 due to market valuation adjustments of the Company's AFS asset-backed securities portfolio as a result of decreases in long-term interest rates.

LIQUIDITY AND CAPITAL RESOURCES

Capital Resources

The Company has no business other than holding the stock of the Bank and does not currently have any material funding requirements, except for the payment of dividends on common stock, and the payment of interest on subordinated debentures and subordinated notes.

The Company evaluates capital resources necessary to maintain adequate regulatory capital ratios. The Company and the Bank annually update a three-year strategic capital plan. In developing its plan, the Company considers the impact to capital of asset growth, income accretion, dividends, holding company liquidity, investment in markets and people and stress testing.

During the three months ended June 30, 2016 and the year ended December 31, 2015, the Company assessed using the new regulatory capital ratios that the Company meets the requirements specified in the Basel III rules upon full adoption of the phased-in requirements. The Bank elected to continue to exclude most accumulated other comprehensive income ("AOCI") from capital in its March 31, 2015 quarterly call report filing and, in effect, to retain the AOCI treatment under the prior capital rules.

Federal banking regulations require the Company and the Bank to maintain specified levels of capital. As of June 30, 2016 and December 31, 2015, the Company and Bank were well-capitalized under the regulatory framework for prompt corrective action under the new Basel III Capital Rules. Management believes, as of June 30, 2016 and December 31, 2015, that the Company and the Bank met all capital adequacy requirements to which they were subject. See Note 12 of the Consolidated Financial Statements.

Liquidity

Liquidity is defined as the ability to meet cash demands as they arise. Such needs can develop from loan demand, deposit withdrawals or acquisition opportunities. Potential obligations resulting from the issuance of standby letters of credit and commitments to fund future borrowings to loan customers are other factors affecting the Company's liquidity needs. Many of these obligations and commitments are expected to expire without being drawn upon; therefore the total commitment amounts do not necessarily represent future cash requirements affecting the Company's liquidity position.

Asset liquidity is provided by cash and assets which are readily marketable or which will mature in the near future. Liquid assets include cash, federal funds sold, and short-term investments in cash deposits with other banks. Liquidity is also provided by access to funding sources, which include core depositors and brokered deposits. Other sources of

funds include the Company's ability to borrow, such as purchasing federal funds from correspondent banks, sales of securities under agreements to repurchase and advances from the FHLB

The Company's principal sources of liquidity are cash on hand and dividends received from the Bank. The Bank is subject to various regulatory restrictions on the payment of dividends.

The Bank's principal sources of funds for investment and operations are net income, deposits, sales of loans, borrowings, principal and interest payments on loans, principal and interest received on investment securities and proceeds from the maturity and sale of investment securities. Its principal funding commitments are for the origination or purchase of loans, the purchase of securities and the payment of maturing deposits. Deposits are considered the primary source of funds supporting the Bank's lending and investment activities. The Bank also uses borrowings from the FHLB of Atlanta to supplement deposits. The amount of FHLB advances available to the Bank is limited to the lower of 30% of Bank assets or the amount supportable by eligible collateral including FHLB stock, loans and securities. In addition, the Bank has established lines of credit with the Federal Reserve Bank and commercial banks.

For additional information on these agreements, including collateral, see Note 11 of the Consolidated Financial Statements as presented in the Company's Form 10-K for the year ended December 31, 2015.

The Bank's most liquid assets are cash, cash equivalents and federal funds sold. The levels of such assets are dependent on the Bank's operating, financing and investment activities at any given time. The variations in levels of cash and cash equivalents are influenced by deposit flows and anticipated future deposit flows.

Cash and cash equivalents as of June 30, 2016 totaled \$13.0 million, an increase of \$1.9 million, or 16.9%, from the December 31, 2015 total of \$11.1 million. The increase in cash was primarily due to an increase in cash provided by financing activities which were partially offset by cash used in investing activities. The increase in the Bank's deposits and borrowings provided cash to fund loan growth. Changes to the level of cash and cash equivalents have minimal impact on operational needs as the Bank has substantial sources of funds available from other sources.

During the six months ended June 30, 2016, all financing activities provided \$87.3 million in cash compared to \$38.6 million in cash for the same period in 2015. The Bank was provided \$48.7 million more cash due to financing activities in the six months ended June 30, 2016 compared to the six months ended June 30, 2015 primarily due to increases in deposits of \$55.6 million and net increases of \$14.0 million in long-term debt partially offset by a decrease in short-term borrowings of \$18.0 million. In addition, cash decreased \$3.0 million due to the net proceeds received during the first quarter 2015 for the subordinated notes issued of \$23.0 million offset by the SBLF payoff of \$20 million.

During the six months ended June 30, 2016, all investing activities used \$90.0 million in cash compared to \$24.5 million in cash used for the same period in 2015. The increase in cash used of \$65.5 million was the result of a net increase in cash used of \$64.7 million from loan activities. The principal collected on loans declined \$14.0 million from \$117.6 million for the six months ended June 30, 2015 to \$103.6 million for the six months ended June 30, 2016. More cash was used to fund loans as loans originated or acquired increased \$50.7 million from \$143.3 million for the six months ended June 30, 2015 to \$194.0 million for the six months ended June 30, 2016. Additionally, there was an increase in cash used of \$2.9 million for securities transactions compared to the same period of 2015. This was primarily due to more investment purchases for the six months ended June 30, 2016 than the comparable period of 2015. The result of these securities activities was that the Bank was a net purchaser of securities of \$873,000 year to date 2016 compared to a net seller of securities of \$2.0 million for the six months ended June 30, 2015. Additionally, Additional cash of \$1.9 million was used to purchase equipment in the first six months of 2016 compared to the same period in 2015. These increases to cash used were partially offset by a net increase in cash provided of \$4.0 million from the sale of the King George branch premises and equipment and the sale of OREO.

Operating activities provided cash of \$4.6 million for the six months ended June 30, 2016 compared to \$6.5 million of cash provided for the same period of 2015. Cash decreased by \$1.9 million primarily due a decrease in accrued expenses and other liabilities and an increase in other assets for the six months ended June 30, 2016 compared with the six months ended June 30, 2015.

ITEM 3. Quantitative and qualitative Disclosure about Market Risk

Interest rate risk is defined as the exposure to changes in net interest income and capital that arises from movements in interest rates. Depending on the composition of the balance sheet, increasing or decreasing interest rates can negatively affect the Company's results of operations and financial condition.

The Company measures interest rate risk over the short and long term. The Company measures interest rate risk as the change in net interest income ("NII") caused by a change in interest rates over twelve and twenty-four months. The Company's NII simulations provide information about short-term interest rate risk exposure. The Company also measures interest rate risk by measuring changes in the values of assets and liabilities due to changes in interest rates. The economic value of equity ("EVE") is defined as the present value of future cash flows from existing assets, minus the present value of future cash flows from existing liabilities. EVE simulations reflect the interest rate sensitivity of assets and liabilities over a longer time period, considering the maturities, average life and duration of all balance sheet accounts.

The Board of Directors has established an interest rate risk policy, which is administered by the Bank's Asset Liability Committee ("ALCO"). The policy establishes limits on risk, which are quantitative measures of the percentage change in NII and EVE resulting from changes in interest rates. Both NII and EVE simulations assist in identifying, measuring, monitoring and controlling interest rate risk and are used by management and the ALCO Committee to ensure that interest rate risk exposure will be maintained within Board policy guidelines. The ALCO Committee reports quarterly to the Board of Directors. Mitigating strategies are used to maintain interest rate risk within established limits.

The Company's interest rate risk ("IRR") model uses assumptions which include factors such as call features, prepayment options and interest rate caps and floors included in investment and loan portfolio contracts. Additionally, the IRR model estimates the lives and interest rate sensitivity of the Company's non-maturity deposits. These assumptions have a significant effect on model results. The assumptions are developed primarily based upon historical behavior of Bank customers. The Company also considers industry and regional data in developing IRR model assumptions. There are inherent limitations in the Company's IRR model and underlying assumptions. When interest rates change, actual movements of interest-earning assets and interest-bearing liabilities, loan prepayments, and withdrawals of time and other deposits, may deviate significantly from assumptions used in the model.

The Company prepares a current base case and several alternative simulations at least quarterly. Current interest rates are shocked by +/- 100, 200, 300, and 400 basis points ("bp"). The Company may elect not to use particular scenarios that it determines are impractical in a current rate environment. It is management's goal to manage the portfolios of the Bank so that net interest income at risk over a twelve-month and twenty-four month period and the economic value of equity at risk do not exceed policy guidelines at the various interest rate shock levels.

Measures of net interest income at risk produced by simulation analysis are indicators of an institution's short-term performance in alternative rate environments. The below schedule estimates the changes in net interest income over a twelve month period for parallel rate shocks:

Estimated Changes in Net Interest Income

Change in Interest Rates: Policy Limit	+ 400 bp (25.00)%	+ 300 bp (20.00)%	+ 200 bp (15.00)%	+ 100 bp (10.00)%	- 100 bp (10.00)%	- 200 bp (15.00)%	- 300 bp (20.00)%	- 400 bp (25.00)%
June 30, 2016	(2.37)%	0.91 %	0.48 %	0.09 %	1.04 %	n/a	n/a	n/a

Measures of equity value at risk indicate the ongoing economic value of the Company by considering the effects of changes in interest rates on all of the Company's cash flows, and by discounting the cash flows to estimate the present value of assets and liabilities. The below schedule estimates the changes in the economic value of equity at parallel shocks:

Estimated Changes in Economic Value of Equity (EVE)

Change in Interest Rates: Policy Limit	+ 400 bp (40.00)%	+ 300 bp (30.00)%	+ 200 bp (20.00)%	+ 100 bp (10.00)%	- 100 bp (10.00)%	- 200 bp (20.00)%	- 300 bp (30.00)%	- 400 bp (40.00)%
June 30, 2016	(20.23)%	(10.48)%	(4.24)%	3.67 %	(1.76)%	n/a	n/a	n/a

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, management of the Company carried out an evaluation, under the supervision and with the participation of the Company's principal executive officer and principal financial officer, of the effectiveness of the Company's disclosure controls and procedures. Based on this evaluation, the Company's principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934, as amended, (1) is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (2) is accumulated and communicated to the Company's management, including its principal executive and financial officers as appropriate to allow timely decisions regarding required disclosure. It should be noted that the design of the Company's disclosure controls and procedures is based in part upon certain reasonable assumptions about the likelihood of future events, and there can be no reasonable assurance that any design of disclosure controls and procedures will succeed in achieving its stated goals under all potential future conditions, regardless of how remote, but the Company's principal executive and financial officers have concluded that the Company's disclosure controls and procedures are, in fact, effective at a reasonable assurance level. There were no changes in the Company's internal control over financial reporting during the quarter ended June 30, 2016 that have materially affected, or are reasonable likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1 - Legal Proceedings – The Company is not involved in any pending legal proceedings. The Bank is not involved in any pending legal proceedings other than routine legal proceedings occurring in the ordinary course of business. Such routine legal proceedings, in the aggregate, are believed by management to be immaterial to the financial condition and results of operations of the Company.

Item 1A - Risk Factors - In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item 1A- Risk Factors” in the Form 10-K that we filed with the Securities and Exchange Commission, which could materially affect our business, financial condition or future results. The risks described are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable

(b) Not applicable

On May 4, 2015, the Board of Directors approved a repurchase plan (“2015 repurchase plan”). The 2015 repurchase plan authorizes the repurchase of up to 250,000 shares of outstanding common stock. The 2015 repurchase plan will continue until it is completed or terminated by the Company’s Board of Directors. During the quarter ended (c) December 31, 2015, the 2015 repurchase plan began with the termination of the 2008 repurchase program. As of June 30, 2016, 212,257 shares were available to be repurchased under the 2015 repurchase program. The following schedule shows the repurchases during the three months ended June 30, 2016.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 1-30, 2016	-	\$ -	-	212,940
May 1-31, 2016	297	21.55	297	212,643
June 1-30, 2016	386	21.72	386	212,257

Total	683	\$ 21.64	683	212,257
-------	-----	----------	-----	---------

Item 3 - Default Upon Senior Securities - None

Item 4 – Mine Safety Disclosures – Not Applicable

Item 5 - Other Information - None

Item 6 - Exhibits

Exhibit 31 - Rule 13a-14(a) Certifications

Exhibit 32 - Section 1350 Certifications

Exhibit 101.0 - The following materials from the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2016, formatted in XBRL (Extensible Business Reporting Language): (i) the Consolidated Balance Sheets, (ii) the Consolidated Statements of Income, (iii) the Consolidated Statements of Comprehensive Income, (iv) the Consolidated Statements of Cash Flows; and (v) the Notes to the Consolidated Financial Statements.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
