Yes  No

Edgar Filing: STERLING BANCORP - Form 10-Q/A

As of July 31, 2004 there were 15,175,580 shares of common stock,  
\$1.00 par value, outstanding.

---

## STERLING BANCORP

**Explanatory Note**

This Amendment No. 1 on Form 10-Q/A includes restated unaudited consolidated financial statements for the three months and six months ended June 30, 2004 and 2003 which supersede the Company's previously issued unaudited consolidated financial statements for those interim periods. For information regarding the restatement, see Note 2 to our unaudited consolidated financial statements contained herein. This Amendment No. 1 also includes related changes to the disclosures in Management's Discussion and Analysis of Financial Condition and Results of Operations and Controls and Procedures. Except as otherwise specifically noted, all information contained herein is as of June 30, 2004 and does not reflect any events or changes that have occurred subsequent to that date. For the convenience of readers, this Amendment No. 1 restates in its entirety the Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2004 (except that certain exhibits that were previously filed with that Form 10-Q have been incorporated herein by reference to that Form 10-Q).

STERLING BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

1. The consolidated financial statements include the accounts of Sterling Bancorp ( the parent company ) and its subsidiaries, principally Sterling National Bank and its subsidiaries ( the bank ), after elimination of material intercompany transactions. The term the Company refers to Sterling Bancorp and its subsidiaries. The consolidated financial statements as of and for the interim periods ended June 30, 2004 and 2003 are unaudited; however, in the opinion of management, all adjustments, consisting of normal recurring accruals, necessary for a fair presentation of such periods have been made. Certain reclassifications have been made to prior period amounts to conform to the current presentation. The interim consolidated financial statements should be read in conjunction with the Company s annual report on Form 10-K for the year ended December 31, 2004. The Company effected a six-for-five stock split on December 8, 2004, a five-for-four stock split on September 10, 2003 and paid stock dividends as follows: 20% on December 9, 2002; 10% on December 10, 2001; 10% on December 11, 2000; and 5% on December 14, 1999. Fractional shares were cashed-out and payments were made to shareholders in lieu of fractional shares. All capital and share amounts as well as basic and diluted average number of shares outstanding and earnings per average common share information for all reporting periods have been restated to reflect the effect of the stock splits and stock dividends.
2. The consolidated financial statements for the three and six months periods ended June 30, 2004 and 2003 have been restated to correct the accounting for employee benefits expense so as to comply with Accounting Principles Board ( APB ) Opinion No. 12, as amended by Financial Accounting Standards Board ( FASB ) Statement of Financial Accounting Standards ( SFAS ) No. 106, *Employers Accounting for Postretirement Benefits Other Than Pensions*, and FASB Technical Bulletin 85-4, *Accounting for Purchases of Life Insurance*, and, accordingly, these consolidated financial statements supersede the Company s previously issued unaudited consolidated financial statements for the three and six months ended June 30, 2004 and 2003. The adjustment to the accounting for employee benefits expense involved (a) the expensing of premiums paid for split-dollar life insurance policies on the lives of certain executive officers of the Company, (b) the expensing of the Company s obligations to pay future premiums on split-dollar life insurance policies issued as part of a transaction in which an executive officer relinquishes his right to receive pension payments in exchange for the insurance policy, and (c) the crediting of increases in the cash surrender values of these various policies. These changes comprise the restatement adjustments for employee benefits expense set forth below. The Company also restated certain other less significant items. Accordingly, the restated consolidated financial statements for the three and six months ended June 30, 2004 and 2003 also correct the accounting for (i) other income and unrealized holding (losses) gains (and thus other comprehensive (loss) income) so as to comply with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (changes to other income relate to the recognition of earnings on assets held in a trust established by the Company and changes to unrealized holding (losses) gains relate to the inclusion of unrealized holding (losses) gains on assets held in the trust), (ii) occupancy expense so as to comply with SFAS No. 13, *Accounting for Leases* (changes required to properly straight-line rent incentives), (iii) income tax benefit arising from the exercise of non qualified stock options and the vesting of restricted stock so as to comply with SFAS No. 109, *Accounting for Income Taxes* (changes relate to the amounts credited directly to capital surplus), and (iv) minimum pension liability adjustment (and thus other comprehensive (loss) income) so as to comply with SFAS No. 87, *Employers Accounting for Pensions* (changes relate to the timing of adjustments).

Other comprehensive (loss) income as restated	\$ (5,160,483)	\$ 119,474	\$ (3,678,934)	\$ (354,117)

[1] Restated to reflect the effect of the six-for-five stock split in the form of a stock dividend effected on December 8, 2004; see Note 1 above.

At December 31, 2003, other assets increased \$1,079,000, accrued expenses and other liabilities increased \$1,002,000, capital surplus decreased \$1,214,000 (which includes a reduction of \$3,031,000 for the effect of the six-for-five stock split), retained earnings decreased \$1,585,000, and accumulated other comprehensive loss increased \$155,000. At June 30, 2004, other assets increased \$847,000, accrued expenses and other liabilities increased \$988,000, capital surplus decreased \$634,000 (which includes a reduction of \$3,031,000 for the effect of the of six-for-five stock split), retained earnings decreased \$2,994,000, and accumulated other comprehensive loss increased \$455,000.

3. At June 30, 2004, the Company has a stock-based employee compensation plan, which is described more fully in Note 1 and Note 15 of the Company's annual report on Form 10-K for the year ended December 31, 2004. The Company accounts for this plan under the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations. No stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. In accordance with SFAS No. 148, the following table illustrates the effect on net income and earnings per average common share if the Company had applied the fair value recognition provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, to the stock-based employee compensation plans.

Three Months Ended June 30,	2004 [1]	2003 [1]

## Edgar Filing: STERLING BANCORP - Form 10-Q/A

5. SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, established standards for the way that public business enterprises report and disclose selected information about operating segments in interim financial statements provided to stockholders.

The Company provides a broad range of financial products and services, including commercial loans, asset-based financing, factoring and accounts receivable management services, trade financing, equipment leasing, corporate and consumer deposit services, commercial and residential mortgage lending and brokerage, trust and estate administration and investment management services. The Company's primary source of

# Edgar Filing: STERLING BANCORP - Form 10-Q/A

## STERLING BANCORP AND SUBSIDIARIES

### Notes to Consolidated Financial Statements

(Unaudited)

earnings is net interest income, which represents the difference between interest earned on interest-earning assets and the interest incurred on interest-bearing liabilities. The Company's 2004 year-to-date average interest-earning assets were 55.0% loans (corporate lending was 72.9% and real estate lending was 24.2% of total loans, respectively) and 44.1% investment securities and money market investments. There are no industry concentrations exceeding 10% of loans, gross, in the corporate loan portfolio. Approximately 68% of loans are to borrowers located in the metropolitan New York area. In order to comply with the provisions of SFAS No. 131, the Company has determined that it has three reportable operating segments: corporate lending, real estate lending and company-wide treasury.

The following tables provide certain information regarding the Company's operating segments for the three-and six-month periods ended June 30, 2004 and 2003:

	<u>Corporate Lending</u>	<u>Real Estate Lending</u>	<u>Company-wide Treasury</u>	<u>Totals</u>

[1] Represents operations not considered to be a reportable segment and/or general operating expenses of the Company.

[2] Restated; see Note 2 above

6. On December 31, 2003, the Company adopted FASB Interpretation No. 46R ( FIN 46R ), *Consolidation of Variable Interest Entities*, which clarified certain provisions of a previously released interpretation. Under the provisions of FIN 46R, Sterling deconsolidated the issuer trust and accounts for its investment in the trust as an asset, its junior subordinated debentures as long-term debt and the interest paid on those debentures as interest expense. As a result of the adoption of FIN 46R, the Company's prior period presentations have been restated to conform to the current presentation.

The Company previously disclosed in its financial statements for the quarter ended March 31, 2004, that it expected to contribute approximately \$1,000,000 to the defined benefit pension plan in 2004. As of June 30, 2004, the expected contribution remained \$1,000,000. No contribution has been made as of June 30, 2004.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following commentary presents management's discussion and analysis of the financial condition and results of operations of Sterling Bancorp (the parent company), a financial holding company under the Gramm-Leach-Bliley Act of 1999, and its subsidiaries, principally Sterling National Bank (the bank). Throughout this discussion and analysis, the term the Company refers to Sterling Bancorp and its subsidiaries. This discussion and analysis should be read in conjunction with the consolidated financial statements and supplemental data contained elsewhere in this quarterly report and the Company's annual report on Form 10-K for the year ended December 31, 2004. As described in Note 2 to the consolidated financial statements, the financial statements have been restated. Certain reclassifications have been made to prior years' financial data to conform to current financial statement presentations. All capital and share amounts as well as basic and diluted average number of shares outstanding and earnings per average common share information for all periods have been restated to reflect the effect of the six-for-five stock split effected on December 8, 2004 and all prior stock splits and stock dividends.

**OVERVIEW**

The Company provides a broad range of financial products and services, including business and consumer loans, commercial and residential mortgage lending and brokerage, asset-based financing, factoring/accounts receivable management services, deposit services, trade financing, equipment leasing, trust and estate administration, and investment management services. The Company has operations in New York, Virginia and North Carolina and conducts business throughout the United States. The general state of the U.S. economy and, in particular, economic and market conditions in the metropolitan New York area have a significant impact on loan demand, the ability of borrowers to repay these loans and the value of any collateral securing these loans and may also affect deposit levels. Accordingly, future general economic conditions are a key uncertainty that management expects will materially affect the Company's results of operations.

For the three months ended June 30, 2004, the bank's average earning assets represented approximately 97.5% of the Company's average earning assets. Loans represented 54.3% and investment securities represented 45.3% of the bank's average earning assets for the second quarter of 2004.

For the six months ended June 30, 2004, the bank's average earning assets represented approximately 97.5% of the Company's average earning assets. Loans represented 53.9% and investment securities represented 45.2% of the bank's average earning assets for the first six months of 2004.

The Company's primary source of earnings is net interest income, and its principal market risk exposure is interest rate risk. The Company is not able to predict market interest rate fluctuations, and its asset-liability management strategy may not prevent interest rate changes from having a material adverse effect on the Company's results of operations and financial condition.

Although management endeavors to minimize the credit risk inherent in the Company's loan portfolio, it must necessarily make various assumptions and judgments about the collectibility of the loan portfolio based on its experience and evaluation of economic conditions. If such assumptions or judgments prove to be incorrect, the current allowance for loan losses may not be sufficient to cover loan losses and additions to the allowance may be necessary, which would have a negative impact on net income.

There is intense competition in all areas in which the Company conducts its business. The Company competes with banks and other financial institutions, including savings and loan associations, savings banks, finance companies and credit unions. Many of these competitors have substantially greater resources and lending limits and provide a wider array of banking services. To a limited extent, the Company also competes with other providers of financial services, such as money market mutual funds, brokerage firms, consumer finance companies and insurance companies. Competition is based on a number of factors, including prices, interest rates, service, availability of products, and geographic location.

The Company regularly evaluates acquisition opportunities and conducts due diligence activities in connection with possible acquisitions. As a result, acquisition discussions, and in some cases negotiations, regularly take place and future acquisitions could occur.

### **INCOME STATEMENT ANALYSIS**

Net interest income, which represents the difference between interest earned on interest-earning assets and interest incurred on interest-bearing liabilities, is the Company's primary source of earnings. Net interest income can be affected by changes in market interest rates as well as the level and composition of assets, liabilities and shareholders' equity. Net interest spread is the difference between the average rate earned, on a tax-equivalent basis, on interest-earning assets and the average rate paid on interest-bearing liabilities. The net yield on interest-earning assets ( net interest margin ) is calculated by dividing tax equivalent net interest income by average interest-earnings assets. Generally, the net interest margin will exceed the net interest spread because a portion of interest-earning assets are funded by various noninterest-bearing sources, principally noninterest-bearing deposits and shareholders' equity. The increases (decreases) in the components of interest income and interest expense, expressed in terms of fluctuation in average volume and rate, are provided in the Rate/Volume Analysis shown on pages 29 and 30. Information as to the components of interest income and interest expense and average rates is provided in the Average Balance Sheets shown on pages 27 and 28.

### **Comparisons of the Three Months Ended June 30, 2004 and 2003**

The Company reported net income for the three months ended June 30, 2004 of \$6.6 million, representing \$0.34 per share, calculated on a diluted basis, compared to \$5.8 million, or \$0.31 per share calculated on a diluted basis, for the second

## Edgar Filing: STERLING BANCORP - Form 10-Q/A

quarter of 2003. This increase reflects continued growth in both net interest income and noninterest income and a lower provision for income taxes, which more than offset increases in the provision for loan losses and noninterest expenses.

### *Net Interest Income*

Net interest income on a tax equivalent basis, increased to \$19.2 million for the second quarter of 2004 from \$18.8 million for the 2003 period, due to higher average earning assets outstanding coupled with lower average cost of funding partially offset by a lower yield on earning assets and higher average interest-bearing deposit balances. The net interest margin, on a tax equivalent basis, was 4.75% for the second quarter of 2004 compared to 5.31% for 2003. The decrease in the net interest margin was primarily the result of the impact of the lower interest rate environment in 2004, partially offset by the impact of an increase in average investment securities and loan outstandings.

Total interest income, on a tax-equivalent basis, aggregated \$23.7 million for the second quarter of 2004, up from \$23.3 million for the 2003 period. The tax-equivalent yield on interest-earning assets was 5.91% for the second quarter of 2004 compared to 6.62% for the 2003 period.

Interest earned on the loan portfolio amounted to \$15.4 million for the second quarter of 2004, unchanged from a year ago. Average loan balances amounted to \$901.2 million, an increase of \$67.0 million from an average of \$834.2 million in the prior year period. The increase in the average loans (across virtually all segments of the Company's loan portfolio), primarily due to the Company's business development activities and the ongoing consolidation of banks in the Company's marketing area, accounted for the increase in interest earned on loans. The decrease in the yield on the loan portfolio to 7.02% for the second quarter of 2004 from 7.64% for 2003 was primarily attributable to the mix of outstanding balances on average among the components of the loan portfolio and the lower interest rate environment in 2004.

Interest earned on the securities portfolio, on a tax-equivalent basis, increased to \$8.3 million for the second quarter of 2004 from \$7.9 million in the prior year period. Average outstandings increased to \$717.2 million from \$593.7 million in the prior year period. The average life of the securities portfolio was approximately 3.9 years at June 30, 2004 compared to 2.9 years at June 30, 2003, reflecting the impact of purchases made in the third and fourth quarters of 2003 and the first quarter of 2004. The decrease in yields on the securities portfolio reflects the impact of purchases made during the lower rate environment on average in the 2004 period and of the principal prepayments primarily in the third and fourth quarters of 2003.

Total interest expense was \$4.5 million for the second quarter of 2004, unchanged from the 2003 period. An increase in average balances for interest-bearing deposits was partially offset by lower rates paid for those balances.

Interest expense on deposits increased to \$2.4 million for the second quarter of 2004 from \$2.3 million for the 2003 period due to an increase in average balance

partially offset by a decrease in the cost of those funds. Average interest-bearing deposit balances increased to \$798.3 million for the second quarter of 2004 from \$676.2 million in the 2003 period primarily as a result of branching initiatives and other business development activities. Average rate paid on interest-bearing deposits was 1.20%, 17 basis points lower than the prior year period. The decrease in average cost of deposits reflects the lower interest rate environment during 2004.

*Provision for Loan Losses*

Based on management's continuing evaluation of the loan portfolio (discussed under *Asset Quality* below), the provision for loan losses for the second quarter of 2004 increased to \$2.5 million from \$2.2 million for the prior year period. Factors affecting the level of provision for loan losses included the growth in the loan portfolios, changes in general economic conditions and the amount of nonaccrual loans.

*Noninterest Income*

Noninterest income increased to \$8.5 million for the second quarter of 2004 from \$8.1 million in the 2003 period, primarily due to increased income from mortgage banking, principally the result of a change in the mix of loans sold due to a broader array of loan products and an increased focus on higher margin mortgage loans, and from factoring activities. Partially offsetting these increases were lower revenues from fees for deposit and various other services and from bank-owned life insurance programs.

*Noninterest Expenses*

Noninterest expenses increased \$1.2 million for the second quarter of 2004 when compared to the 2003 period. The increase was primarily due to investments in the Sterling franchise, including the new branches, with higher expenses related to salaries and employee benefits and professional fees.

*Provision for Income Taxes*

The provision for income taxes decreased to \$2.4 million for the second quarter of 2004 from \$3.7 million in the 2003 period. The lower provision for taxes in the second quarter of 2004 was due to the resolution of certain state tax issues for tax years 1999-2001.

**Comparisons of the Six Months Ended June 30, 2004 and 2003**

The Company reported net income for the six months ended June 30, 2004 of \$11.8 million, representing \$0.61 per share, calculated on a diluted basis, compared to \$11.6 million, or \$0.61 per share calculated on a diluted basis, for the first six months of 2003. This increase reflects continued growth in both net interest income and noninterest income and a lower provision for income taxes, which more than offset increases in the provision for loan losses and noninterest expenses.

*Net Interest Income*

Net interest income on a tax equivalent basis, increased to \$38.5 million for the first six months of 2004 from \$37.3 million for the 2003 period, due to higher average

earning assets outstanding coupled with lower average cost of funding partially offset by a lower yield on earning assets and higher average interest-bearing deposit balances. The net interest margin, on a tax equivalent basis, was 4.87% for the first six months of 2004 compared to 5.43% for 2003. The decrease in the net interest margin was primarily the result of the impact of the lower interest rate environment in 2004, partially offset by the impact of an increase in average investment securities and loan outstandings.

Total interest income, on a tax-equivalent basis, aggregated \$47.5 million for the first six months of 2004, up from \$46.2 million for the 2003 period. The tax-equivalent yield on interest-earning assets was 6.04% for the first six months of 2004 compared to 6.76% for the 2003 period.

Interest earned on the loan portfolio amounted to \$30.5 million for the first six months of 2004, up \$0.4 million from a year ago. Average loan balances amounted to \$881.9 million, an increase of \$63.3 million from an average of \$818.6 million in the prior year period. The increase in the average loans (across virtually all segments of the Company's loan portfolio), primarily due to the Company's business development activities and the ongoing consolidation of banks in the Company's marketing area, accounted for the increase in interest earned on loans. The decrease in the yield on the loan portfolio to 7.22% for the first six months of 2004 from 7.77% for 2003 was primarily attributable to the mix of outstanding balances on average among the components of the loan portfolio and the lower interest rate environment in 2004.

Interest earned on the securities portfolio, on a tax-equivalent basis, increased to \$16.9 million for the first six months of 2004 from \$16.0 million in the prior year period. Average outstandings increased to \$706.2 million from \$580.9 million in the prior year period. The average life of the securities portfolio was approximately 3.9 years at June 30, 2004 compared to 2.9 years at June 30, 2003, reflecting the impact of purchases made in the third and fourth quarters of 2003 and the first quarter of 2004. The decrease in yields on the securities portfolio reflects the impact of purchases made during the lower rate environment on average in the 2004 period and of the principal prepayments primarily in the third and fourth quarters of 2003.

Total interest expense increased to \$9.1 million for the first six months of 2004 from \$8.9 million for the 2003 period, primarily due to higher average balances for interest-bearing deposits partially offset by lower rates paid for those balances and for borrowed funds.

Interest expense on deposits increased to \$4.8 million for the first six months of 2004 from \$4.5 million for the 2003 period due to an increase in average balance partially offset by a decrease in the cost of those funds. Average interest-bearing deposit balances increased to \$796.2 million for the first six months of 2004 from \$665.8 million in the 2003 period primarily as a result of branching initiatives and other business development activities. Average rate paid on interest-bearing deposits was 1.22% which was 15 basis points lower than the prior year period. The decrease in average cost of deposits reflects the lower interest rate environment during 2004.

*Provision for Loan Losses*

Based on management's continuing evaluation of the loan portfolio (discussed under *Asset Quality* below), the provision for loan losses for the first six months of 2004 increased to \$4.9 million from \$4.0 million for the prior year period. Factors affecting the level of provision for loan losses included the growth in the loan portfolios, changes in general economic conditions and the amount of nonaccrual loans.

*Noninterest Income*

Noninterest income increased to \$16.8 million for the first six months of 2004 from \$15.6 million in the 2003 period, primarily due to increased income from mortgage banking, principally the result of a change in the mix of loans sold due to a broader array of loan products and an increased focus on higher margin mortgage loans, and from factoring activities, and gains on sales of available for sale securities. Partially offsetting these increases were lower revenues from fees for deposit and various other services and from bank-owned life insurance programs.

*Noninterest Expenses*

Noninterest expenses increased \$2.6 million for the first six months of 2004 when compared to the 2003 period. The increase was primarily due to investments in the Sterling franchise, including the new branches, with higher expenses related to salaries and employee benefits, advertising and marketing, and professional fees.

*Provision for Income Taxes*

The provision for income taxes decreased to \$6.0 million for the first six months of 2004 from \$7.4 million in the 2003 period. The lower provision for taxes in the 2004 period was due to the resolution, during the second quarter of 2004, of certain state tax issues for tax years 1999-2001.

**BALANCE SHEET ANALYSIS**

*Securities*

The Company's securities portfolios are comprised of principally U.S. government and U.S. government corporation and agency guaranteed mortgage-backed securities along with other debt and equity securities. At June 30, 2004, the Company's portfolio of securities totaled \$696.1 million, of which U.S. government corporation and agency guaranteed mortgage-backed securities and collateralized mortgage obligations having an average life of approximately 3.9 years amounted to \$625.1 million. The Company has the intent and ability to hold to maturity securities classified as *held to maturity*. These securities are carried at cost, adjusted for amortization of premiums and accretion of discounts. The gross unrealized gains and losses on *held to maturity* securities were \$3.6 million and \$7.4 million, respectively. Securities classified as *available for sale* may be sold in the future, prior to maturity. These securities are carried at market value. Net aggregate unrealized gains or losses on these securities are included in a valuation allowance account and are shown net of taxes, as a component of shareholders' equity.

*Available for sale* securities included gross unrealized gains of \$2.5 million and gross unrealized losses of \$5.9 million. Given the generally high credit quality of the portfolio, management expects to realize all of its investment upon the maturity of such instruments and thus believes that any market value impairment is temporary.

Edgar Filing: STERLING BANCORP - Form 10-Q/A

The following table presents information regarding securities available for sale:

<u>June 30, 2004</u>	<u>Gross Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Market Value</u>
U.S. Treasury securities	\$ 2,499,735	\$	\$ (204)	\$ 2,499,531

*Loan Portfolio*

A management objective is to maintain the quality of the loan portfolio. The Company seeks to achieve this objective by maintaining rigorous underwriting standards coupled with regular evaluation of the creditworthiness of and the designation of lending limits for each borrower. The portfolio strategies include seeking industry and loan size diversification in order to minimize credit exposure and the origination of loans in markets with which the Company is familiar.

The Company's commercial and industrial loan portfolio represents approximately 59% of all loans. Loans in this category are typically made to small and medium-sized businesses and range between \$25,000 and \$10 million. Sources of repayment are from the borrower's operating profits, cash flows and liquidation of pledged collateral. Based on underwriting standards, loans may be secured in whole or in part by collateral such as liquid assets, accounts receivable, equipment, inventory, and real property. The Company's real estate loan portfolio, which represents approximately 22% of all loans, is secured by mortgages on real property located principally in the states of New York and Virginia. The Company's leasing portfolio, which consists of finance leases for various types of business equipment, represents approximately 17% of all loans. The collateral securing any loan may vary in value based on market conditions.

The following table sets forth the composition of the Company's loans held for sale and loans held in portfolio:

	June 30,			
	2004		2003	
	Balances	(% of Gross)	Balances	(% of Gross)
<b>Domestic</b>				
Commercial and industrial	\$ 560,257	59.1%	\$ 489,525	56.2%
Equipment lease financing	158,033	16.7	135,903	15.6
Real estate - mortgage	212,234	22.4	211,215	24.2
Real estate - construction	2,341	0.2	2,393	0.3
Installment - individuals	14,729	1.6	11,754	1.4
Loans to depository institutions			20,000	2.3
Loans, net of unearned discounts	\$ 947,594	100.0%	\$ 870,790	100.0%

*Asset Quality*

Intrinsic to the lending process is the possibility of loss. In times of economic slowdown, the risk of loss inherent in the Company's portfolio of loans may be increased. While management endeavors to minimize this risk, it recognizes that loan losses will occur and that the amount of these losses will fluctuate depending on the risk characteristics of the loan portfolio which in turn depend on current and expected economic conditions, the financial condition of borrowers, the realization of collateral, and the credit management process.

Management views the allowance for loan losses as a critical accounting policy due to its subjectivity. The allowance for loan losses is maintained through the

provision for loan losses, which is a charge to operating earnings. The adequacy of the provision and the resulting allowance for loan losses is determined by a management evaluation process of the loan portfolio, including identification and review of individual problem situations that may affect the borrower's ability to repay, review of overall portfolio quality through an analysis of current charge-offs, delinquency and nonperforming loan data, estimates of the value of any underlying collateral, an assessment of current and expected economic conditions and changes in the size and character of the loan portfolio. Other data utilized by management in determining the adequacy of the allowance for loan losses includes, but is not limited to, the results of regulatory reviews, the amount of, trend of and/or borrower characteristics on loans that are identified as requiring special attention as part of the credit review process, and peer group comparisons. The impact of this other data might result in an allowance which will be greater than that indicated by the evaluation process previously described. The allowance reflects management's evaluation both of loans presenting identified loss potential and of the risk inherent in various components of the loan portfolio, including loans identified as impaired as required by SFAS No. 114. Thus, an increase in the size of the portfolio or in any of its components could necessitate an increase in the allowance even though there may not be a decline in credit quality or an increase in potential problem loans. A significant change in any of the evaluation factors described above could result in future additions to the allowance. At June 30, 2004, the ratio of the allowance to loans held in portfolio, net of unearned discounts, was 1.66% and the allowance was \$15.0 million. At such date, the Company's nonaccrual loans amounted to \$2.8 million; \$848 thousand of such loans was judged to be impaired within the scope of SFAS No. 114. Based on the foregoing, as well as management's judgment as to the current risks inherent in loans held in portfolio, the Company's allowance for loan losses was deemed adequate to absorb all reasonably anticipated losses on specifically known and other possible credit risks associated with the portfolio as of June 30, 2004. Net losses within loans held in portfolio are not statistically predictable and changes in conditions in the next twelve months could result in future provisions for loan losses varying from the level taken in the first six months of 2004. Potential problem loans, which are loans that are currently performing under present loan repayment terms but where known information about possible credit problems of borrowers causes management to have serious doubts as to the ability of the borrowers to continue to comply with the present repayment terms, aggregated \$1.1 million at June 30, 2004.

## Edgar Filing: STERLING BANCORP - Form 10-Q/A

### Deposits

A significant source of funds for the Company continues to be deposits, consisting of demand (noninterest-bearing), NOW, savings, money market and time deposits (principally certificates of deposit).

The following table provides certain information with respect to the Company's deposits:

	June 30,			
	2004		2003	
	(\$ in thousands)			
	Balances	% of Total	Balances	% of Total
<b>Domestic</b>				
Demand	\$ 444,343	35.4%	\$ 385,144	36.2%
NOW	134,964	10.7	120,323	11.3
Savings	31,672	2.5	27,880	2.6
Money market	204,868	16.3	164,514	15.4
Time deposits	436,939	34.8	364,183	34.2
	1,252,786	99.7	1,062,044	99.7
<b>Foreign</b>				
Time deposits	3,000	0.3	3,000	0.3
	3,000	0.3	3,000	0.3
<b>Total deposits</b>	<b>\$ 1,255,786</b>	<b>100.0%</b>	<b>\$ 1,065,044</b>	<b>100.0%</b>

Fluctuations of balances in total or among categories at any date may occur based on the Company's mix of assets and liabilities as well as on customers' balance sheet strategies. Historically, however, average balances for deposits have been relatively stable. Information regarding these average balances is presented on pages 27 and 28.

The Company does not have any off-balance sheet arrangements that are reasonably likely to have a material current or future effect on the Company's financial condition, revenues, expenses, results of operations, liquidity or regulatory capital.

### CAPITAL

The Company and the bank are subject to risk-based capital regulations which quantitatively measure capital against risk-weighted assets, including certain off-balance sheet items. These regulations define the elements of the Tier 1 and Tier 2 components of Total Capital and establish minimum ratios of 4% for Tier 1 capital and 8% for Total Capital for capital adequacy purposes. Supplementing these regulations is a leverage requirement. This requirement establishes a minimum leverage ratio (at least 3% to 5%) which is calculated by dividing Tier 1 capital by adjusted quarterly average assets (after deducting goodwill). Information regarding the Company's and the bank's risk-based capital is presented on page 28. In addition, the bank is subject to the Federal Deposit Insurance Corporation Improvement Act of 1981 (FDICIA) which imposes a number of mandatory supervisory measures. Among other matters, five capital categories, ranging from well capitalized to critically under capitalized, are used by regulatory agencies

to determine a bank's deposit insurance premium, approval of applications authorizing institutions to increase their asset size or otherwise expand business activities or acquire other institutions. Under FDICIA, a well capitalized bank must maintain minimum leverage, Tier 1 and Total Capital ratios of 5%, 6% and 10%, respectively. The Federal Reserve Board applies comparable tests for holding companies such as the Company. At June 30, 2004, the Company and the bank exceeded the requirements for well capitalized institutions.

#### **CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

Certain statements contained in this quarterly report, including but not limited to, statements concerning future results of operations or financial position, borrowing capacity and future liquidity, future investment results, future credit exposure, future loan losses and plans and objectives for future operations, and other statements contained herein regarding matters that are not historical facts, are forward-looking statements as defined in the Securities Exchange Act of 1934. These statements are not historical facts but instead are subject to numerous assumptions, risks and uncertainties, and represent only our belief regarding future events, many of which, by their nature, are inherently uncertain and outside our control. Any forward-looking statements we may make speak only as of the date on which such statements are made. Our actual results and financial position may differ materially from the anticipated results and financial condition indicated in or implied by these forward-looking statements.

Factors that could cause our actual results to differ materially from those in the forward-looking statements include, but are not limited to, the following: inflation, interest rates, market and monetary fluctuations; geopolitical development including acts of war and terrorism and their impact on economic conditions; the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System; changes particularly declines, in general economic conditions and in the local economies in which the Company operates; the financial condition of the Company's borrowers; competitive pressures on loan and deposit pricing and demand; changes in technology and their impact on the marketing of new products and services and the acceptance of these products and services by new and existing customers; the willingness of customers to substitute competitors' products and services for the Company's product and services; the impact of changes in the financial services laws and regulations (including laws concerning taxes, banking, securities and insurance); changes in accounting principles, policies and guidelines; the success of the Company at managing the risks involved in the foregoing as well as other risks and uncertainties detailed from time to time in press releases and other public filings. The foregoing list of important factors is not exclusive, and we will not update any forward-looking statement, whether written or oral, that may be made from time to time.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

**ASSET/LIABILITY MANAGEMENT**

The Company's primary earnings source is its net interest income; therefore the Company devotes significant time and has invested in resources to assist in the management of interest rate risk and asset quality. The Company's net interest income is affected by changes in market interest rates, and by the level and composition of interest-earning assets and interest-bearing liabilities. The Company's objectives in its asset/liability management are to utilize its capital effectively, to provide adequate liquidity and to enhance net interest income, without taking undue risks or subjecting the Company unduly to interest rate fluctuations.

The Company takes a coordinated approach to the management of its liquidity, capital and interest rate risk. This risk management process is governed by policies and limits established by senior management which are reviewed and approved by the Asset/Liability Committee. This committee, which is comprised of members of senior management, meets to review, among other things, economic conditions, interest rates, yield curve, cash flow projections, expected customer actions, liquidity levels, capital ratios and repricing characteristics of assets, liabilities and financial instruments.

*Market Risk*

Market risk is the risk of loss in a financial instrument arising from adverse changes in market indices such as interest rates, foreign exchange rates and equity prices. The Company's principal market risk exposure is interest rate risk, with no material impact on earnings from changes in foreign exchange rates or equity prices.

Interest rate risk is the exposure to changes in market interest rates. Interest rate sensitivity is the relationship between market interest rates and net interest income due to the repricing characteristics of assets and liabilities. The Company monitors the interest rate sensitivity of its balance sheet positions by examining its near-term sensitivity and its longer-term gap position. In its management of interest rate risk, the Company utilizes several financial and statistical tools including traditional gap analysis and sophisticated income simulation models.

A traditional gap analysis is prepared based on the maturity and repricing characteristics of interest-earning assets and interest-bearing liabilities for selected time bands. The mismatch between repricings or maturities within a time band is commonly referred to as the "gap" for that period. A positive gap (asset sensitive) where interest rate sensitive assets exceed interest rate sensitive liabilities generally will result in the net interest margin increasing in a rising rate environment and decreasing in a falling rate environment. A negative gap (liability sensitive) will generally have the opposite result on the net interest margin. However, the traditional gap analysis does not assess the relative sensitivity of assets and liabilities to changes in interest rates and other factors that could have an impact on interest rate sensitivity or net interest income. The Company utilizes the gap analysis to complement its income simulations modeling, primarily focusing on the longer-term structure of the balance sheet.

The Company's balance sheet structure is primarily short-term in nature with a substantial portion of assets and liabilities repricing or maturing within one year. The Company's gap analysis at June 30, 2004, presented on page 28, indicates that net interest income would increase during periods of rising interest rates and decrease during periods of falling interest rates, but, as mentioned above, gap analysis may not be an accurate predictor of net interest income.

As part of its interest rate risk strategy, the Company may use financial instrument derivatives to hedge the interest rate sensitivity of assets with the corresponding amortization reflected in the yield of the related balance sheet assets being hedged. The Company has written policy guidelines, approved by the Board of Directors, governing the use of financial instruments, including approved counterparties, risk limits and appropriate internal control procedures. The credit risk of derivatives arises principally from the potential for a counterparty to fail to meet its obligation to settle a contract on a timely basis.

The Company utilizes income simulation models to complement its traditional gap analysis. While the Asset/Liability Committee routinely monitors simulated net interest income sensitivity over a rolling two-year horizon, it also utilizes additional tools to monitor potential longer-term interest rate risk.

The income simulation models measure the Company's net interest income volatility or sensitivity to interest rate changes utilizing statistical techniques that allow the Company to consider various factors which impact net interest income. These factors include actual maturities, estimated cash flows, repricing characteristics, deposits growth/retention and, most importantly, the relative sensitivity of the Company's assets and liabilities to changes in market interest rates. This relative sensitivity is important to consider as the Company's core deposit base has not been subject to the same degree of interest rate sensitivity as its assets. The core deposit costs are internally managed and tend to exhibit less sensitivity to changes in interest rates than the Company's adjustable rate assets whose yields are based on external indices and generally change in concert with market interest rates.

The Company's interest rate sensitivity is determined by identifying the probable impact of changes in market interest rates on the yields on the Company's assets and the rates that would be paid on its liabilities. This modeling technique involves a degree of estimation based on certain assumptions that management believes to be reasonable. Utilizing this process, management projects the impact of changes in interest rates on net interest margin. The Company has established certain policy limits for the potential volatility of its net interest margin assuming certain levels of changes in market interest rates with the objective of maintaining a stable net interest margin under various probable rate scenarios. Management generally has maintained a risk position well within the policy limits. As of June 30, 2004, the model indicated the impact of a 200 basis point parallel and pro rata rise in rates over 12 months would approximate a 2.9% (\$2.2 million) increase in net interest income, while the impact of a 200 basis point decline in rates over the same period would approximate a 5.0% (\$3.8 million) decline from an unchanged rate environment.

The preceding sensitivity analysis does not represent a Company forecast and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions including: the nature and timing of interest rate levels including yield curve shape, pre-payments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, reinvestment/replacement of asset and liability cash flows, and others. While assumptions are developed based upon current economic and local market conditions, the Company cannot provide any assurances as to the predictive nature of these assumptions, including how customers' preferences or competitor influences might change.

Also, as market conditions vary from those assumed in the sensitivity analysis, actual results will also differ due to: pre-payment/refinancing levels likely deviating from those assumed, the varying impact of interest rate change caps or floors on adjustable rate assets, the potential effect of changing debt service levels on customers with adjustable rate loans, depositor early withdrawals and product preference changes, and other variables. Furthermore, the sensitivity analysis does not reflect actions that the Asset/Liability Committee might take in responding to or anticipating changes in interest rates.

#### *Liquidity Risk*

Liquidity is the ability to meet cash needs arising from changes in various categories of assets and liabilities. Liquidity is constantly monitored and managed at both the parent company and the bank levels. Liquid Assets consist of cash and due from banks, interest-bearing deposits in banks and Federal funds sold and securities available for sale. Primary funding sources include core deposits, capital market funds and other money market sources. Core deposits include domestic noninterest-bearing and interest-bearing retail deposits, which historically have been relatively stable. The parent company and the bank believe that they have significant unused borrowing capacity. Contingency plans exist which we believe could be implemented on a timely basis to mitigate the impact of any dramatic change in market conditions.

While the parent company generates income from its own operations, it also depends for its cash requirements on funds maintained or generated by its subsidiaries, principally the bank. Such sources have been adequate to meet the parent company's cash requirements throughout its history.

Various legal restrictions limit the extent to which the bank can supply funds to the parent company and its nonbank subsidiaries. All national banks are limited in the payment of dividends without the approval of the Comptroller of the Currency to an amount not to exceed the net profits as defined, for the year to date combined with its retained net profits for the preceding two calendar years.

At June 30, 2004, the parent company's short-term debt, consisting principally of commercial paper used to finance ongoing current business activities, was approximately \$36.2 million. The parent company had cash, interest-bearing deposits with banks and other current assets aggregating \$39.6 million. The parent company also has back-up credit lines with banks of \$24.0 million. Since 1979, the parent company has had no need to use the available back-up lines of credit.

## Edgar Filing: STERLING BANCORP - Form 10-Q/A

The following table sets forth information regarding the Company's obligations and commitments to make future payments under contract as of June 30, 2004:

Edgar Filing: STERLING BANCORP - Form 10-Q/A

STERLING BANCORP AND SUBSIDIARIES

Interest Rate Sensitivity

(Unaudited & Restated)

To mitigate the vulnerability of earnings to changes in interest rates, the Company manages the repricing characteristics of assets and liabilities in an attempt to control net interest rate sensitivity. Management attempts to confine significant rate sensitivity gaps predominantly to repricing intervals of a year or less so that adjustments can be made quickly. Assets and liabilities with predetermined repricing dates are classified based on the earliest repricing period. Amounts are presented in thousands.

	Repricing Date					Total
	3 Months or Less	More than 3 Months to 1 Year	More than 1 Year to 5 Years	Over 5 Years	Nonrate Sensitive	
<b>ASSETS</b>						
Interest-bearing deposits with other banks	\$ 2,161	\$	\$	\$	\$	\$ 2,161

Repricing Date

Net Interest Rate Sensitivity Gap						
Cumulative Gap June 30, 2004	\$ 124,098	\$ (12,354)	\$ (16,765)	\$ 547,508	\$	\$
Cumulative Gap June 30, 2003	\$ 185,460	\$ 106,959	\$ 61,010	\$ 504,625	\$	\$
Cumulative Gap December 31, 2003	\$ 230,662	\$ 77,756	\$ 46,397	\$ 595,450	\$	\$

[1] Historically, balances in non-maturity deposit accounts have remained relatively stable despite changes in levels of interest rates. Balances are shown in repricing periods based on management's historical repricing practices and run-off experience.

[2] Restated; see Note 2 on page 9.

**ITEM 4. CONTROLS AND PROCEDURES**

An evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this quarterly report. Based upon that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, had concluded that the design and operation of these disclosure controls and procedures were effective as of the end of the period covered by this report. However, based on a subsequent evaluation as of December 31, 2004 and the identification of a material weakness in the Company's internal control over financial reporting (relating to inadequate resources for controls over the accounting for Company-owned split-dollar life insurance policies on the lives of certain officers of the Company) described in Item 9A of the Company's annual report on Form 10-K for the fiscal year ended December 31, 2004, the Company's management, including the Chief Executive Officer and Chief Financial Officer, have concluded that, as of the end of the period covered by this quarterly report, the Company's disclosure controls and procedures were not effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms. For a discussion of the reasons and matters on which this conclusion was based, see Item 9A of the Company's annual report on Form 10-K for the fiscal year ended December 31, 2004. No changes in our internal control over financial reporting (as defined in Rule 13a-15(f) or 15d-15(f) under the Securities Exchange Act of 1934) occurred during our last fiscal quarter covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 4. Submission of Matters to a Vote of Security Holders

(a) The Annual Meeting of Shareholders of the Company was held on April 15, 2004.

(b) The following matters were submitted to a vote of the Shareholders of the Company:

(1) Election of Directors
