EARNINGS RELEASE

FOR IMMEDIATE RELEASE

SILICOM REPORTS FIRST QUARTER 2004 RESULTS

KFAR SAVA, Israel April 21, 2004 Silicom Ltd. (NASDAQ:SILCF) today reported financial results for the first quarter ended March 31, 2004.

Revenues for the first quarter of 2004 were \$848,000 compared to \$1,325,000 for the first quarter of 2003. Net loss for the quarter was (\$402,000), or (\$0.10) per share, compared to (\$223,000), or (\$0.05) per share, for the first quarter of 2003.

Commenting on the results, Shaikhe Orbach, President and CEO, said, "Our first quarter results reflect the timing lag between the phase out of legacy product lines, whose sales continue to decline, and the slow but growing ramp up of sales of our new product lines. In late 2002 we announced a new line of Multi Port Gigabit Ethernet Adapters. During the last few months, after long sales cycles lasting about a year, we have started to secure design wins with initial orders for products within this line. We expect a similar process with the new TOE/ iSCSI product line that was announced last week. Despite these long sales cycles and the amount of time required for sales to ramp to volume quantities, as each design win produces orders which continuously accumulate one on top of the other we believe that sales of both new lines will eventually compensate for decreasing sales of our legacy products and will become a key driver in the company growth.

Mr. Orbach concluded, "Overall, we are encouraged with our progress as demonstrated by the design wins we have been able to secure as well as with the current status of our marketing efforts. Such progress confirms the technological excellence and market need for our new high-end products. Customers of many types are viewing our adapters as an easy way to achieve an immediate performance gain in their high-traffic networks while reducing network congestion, simplifying network management, providing the highest possible server throughput, and minimizing CPU utilization. We believe each of the design wins and initial orders we announced may lead to others, and continue introducing our products to additional potential customers.

Silicom Ltd. is an industry-leading provider of communications connectivity solutions and advanced enabling technologies, making it the preferred time-to-market and performance partner to many of the industry's significant players. With core expertise in high performance, innovative technologies for networking and operating systems, the Company develops high-performance networking solutions for manufacturers of storage, Internet traffic management, security, and other types of server-based systems characterized by multi-port high-performance environments. Silicom also offers an extensive range of PC Cards, PCI cards and USB products. For more information, please visit: www.silicom.co.il.

Statements in this press release which are not historical data are forward-looking statements which involve known and unknown risks, uncertainties, or other factors not under the Company's control, which may cause actual results, performance, or achievements of the Company to be materially different from the results, performance, or other expectations implied by these forward-looking statements. These factors include, but are not limited to, those detailed in the Company's periodic filings with the Securities and Exchange Commission. The Company disclaims any duty to update such statements.
