PETACH-TIKVA, Israel, Nov 22, 2005 (BUSINESS WIRE) -- Eltek Ltd., the leading Israeli manufacturer of advanced circuitry solutions, today announced its financial results for the third quarter and nine months ended September 30, 2005.

million (\$22.8 million) compared with revenues of NIS 90.0 million (\$19.6 million) for the comparable period in 2004.

Net income for the nine-month period ended September 30, 2005 was NIS 3.0 million (\$644,000), or NIS 0.80 per NIS 1 par value of shares (\$0.10 per share or \$0.17 per NIS 1 par value of share), compared with a net loss of NIS 7.8 million (\$1.7 million) or NIS (1.85) per NIS 1 par value of shares (or \$(0.24) per share) for the same period in 2004.

"We are pleased to report our fourth consecutive quarter of profitability. Our sustained quarterly momentum continues to be driven by the growing demand for Eltek's flex - rigid PCBs used for the most demanding applications in many industries," said Arie Reichart, President and Chief Executive Officer of Eltek.

"I am particularly encouraged by our penetration into the U.S. market. During the third quarter we made initial deliveries to new U.S. customers and we expect that shipments to these customers will increase in Q4 2005 and into 2006. In addition, we have succeeded in passing qualifications by other major U.S. manufacturers. These developments in the strategic U.S. flex-rigid PCB market, coupled with a prospective sales pipeline including new potential customers, lead us to expect further improvement in our results in 2006."

Amnon Shemer, CFO of Eltek commented: "During the third quarter we saw continued improvement in the financial metrics of our business. In the third quarter of 2005 our gross margin improved to 21.0%, from 11.1% in fiscal 2004 and 18.0% in the second quarter of 2005. Our operating income increased to \$480,000 in the third quarter from \$241,000 in the second quarter, and an operating loss of \$120,000 in the third quarter of 2004.

Mr. Shemer continued, "In order to meet increasing demand, we have begun to invest in new advanced manufacturing equipment to increase our high end production capacity. These investments are financed by new bank loans, reflecting their confidence in our business model and cash generation capabilities. The successful installation and integration of the new equipment will enable us to establish a strong manufacturing base for continued growth going forward."
