## Section 1 – Conflict Minerals Disclosure

### Item 1.01 Conflict Minerals Disclosure and Report

This Specialized Disclosure Form (“Form SD”) of Allot Communications Ltd. (the “Company”) is filed pursuant to Rule 13p-1 (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended, for the reporting period of January 1, 2013 to December 31, 2013.

The Rule requires disclosure of certain information when a company manufactures or contracts to manufacture products for which the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals are gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, which are limited to tantalum, tin and tungsten (the “Conflict Minerals”) that originated in the Democratic Republic of the Congo (“DRC”) and certain adjoining countries (the “Covered Countries”).

In accordance with the Rule, the Company has concluded in good faith that during the year ended December 31, 2013:

- Certain of the Company’s operations manufactured, or contracted to manufacture, products (the “Covered Products”) for which the Conflict Minerals are necessary to the functionality or production of those products.
- Based on the Company’s good faith reasonable country of origin inquiry regarding the Conflict Minerals, which was designed to determine whether any of the Conflict Minerals originated in the Covered Countries and whether any of the Conflict Minerals may be from recycled or scrap sources, the Company had reason to believe that that the Conflict Minerals may have originated in the Covered Countries and that such Conflict Minerals may not be from recycled or scrap sources.
- Therefore, the Company proceeded to exercise due diligence with respect to the source and chain of custody of the Conflict Minerals and has filed this Form SD and the associated Conflict Minerals Report.
