-

Item 1.01. Entry into a Material Definitive Agreement

On December 15, 2008, Dynavax Technologies Corporation ("Dynavax") and GlaxoSmithKline ("GSK") executed a Research and Development Collaboration and License Agreement (the "Collaboration Agreement") to form a worldwide strategic alliance to discover, develop, and commercialize novel inhibitors of Toll-like Receptors (TLRs) for the treatment of immuno-inflammatory diseases. Under the terms of the Collaboration Agreement, Dynavax will receive an initial payment of \$10 million for which GSK will receive an exclusive option over four programs targeting autoimmune and inflammatory diseases such as lupus, psoriasis and rheumatoid arthritis.

Under the Collaboration Agreement, Dynavax is to conduct research and early clinical development in up to four programs and is eligible to receive future potential development and commercialization milestones totaling approximately \$200 million per program. GSK can exercise its exclusive option to license each program upon achievement of proof-of-concept or earlier upon certain circumstances. After exercising its option, GSK will carry out further development and commercialization of these products. Dynavax will receive tiered, up to double-digit royalties on sales and has retained an option to co-develop and co-promote one specified product. The initial research term of the Collaboration Agreement is five years, subject to extension under certain circumstances.

The foregoing summary of the Collaboration Agreement is not complete and is qualified in its entirety by reference to the agreement which will be filed with the Dynavax Annual Report on Form 10-K for the year ending December 31, 2008.

Item 8.01. Other Events

See Items 1.01
