The Corporation s investment objectives as well as the nature and risk of its investment transactions are set forth in the Corporation s registration statement.

Security Valuation Investments in securities traded on national security exchanges are valued at the last reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Short-term investments (excluding purchased options) are valued at amortized cost. Purchased and written options are valued at the last quoted asked price.

Security Transactions and Investment Income Investment transactions are accounted for on the trade date. Gain or loss on sales of securities and options is determined on the basis of identified cost. Dividend income and distributions to shareholders are recognized on the ex-dividend date, and interest income is recognized on the accrual basis.

Stock appreciation rights are exercisable beginning not less than two years after the date of grant and extend over the period during which the option is exercisable.
