Table of Contents**HUTTIG BUILDING PRODUCTS, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(UNAUDITED)****1. BASIS OF PRESENTATION**

The unaudited interim consolidated financial statements of Huttig Building Products, Inc. (the Company or Huttig) were prepared in accordance with U.S. generally accepted accounting principles and reflect all adjustments (including normal recurring accruals) which, in the opinion of management, are considered necessary for the fair presentation of the results for the periods presented. These statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

The consolidated results of operations and resulting cash flows for the interim periods presented are not necessarily indicative of the results that might be expected for the full year. Due to the seasonal nature of Huttig's business, operating profitability is usually lower in the Company's first and fourth quarters than in the second and third quarters.

Certain prior year amounts have been reclassified to conform to the current year presentation.

2. STOCK-BASED EMPLOYEE COMPENSATION

The Company recognized approximately \$1.3 million and \$1.4 million in non-cash stock-based compensation in the nine months ended September 30, 2007 and 2006, respectively. During the first nine months of 2007, the Company granted approximately 241,750 shares of restricted stock and 19,845 restricted stock units, at a combined weighted average fair market value of \$6.39, under its 2005 Executive Incentive Compensation Plan and 2005 Non-Employee Director's Restricted Stock Plan, respectively. The restricted shares vest in three equal installments on the first, second and third anniversaries of the grant date and the restricted stock units vest on the first anniversary of the grant date. The unearned compensation expense is being amortized into expense on a straight-line basis over the requisite service period for the entire award. As of September 30, 2007, the total compensation expense not yet recognized related to all outstanding restricted stock/unit awards and non-vested options was approximately \$1.9 million and \$0.2 million, respectively.

3. DEBT

Debt consisted of the following at September 30, 2007, December 31, 2006 and September 30, 2006 (in millions):

	September 30, 2007	December 31, 2006	September 30, 2006
Revolving credit facility	\$ 45.0	\$ 41.8	\$ 48.3
Term loan			21.4
Capital lease and other obligations	1.6	3.9	3.7
Total debt	46.6	45.7	73.4
Less current portion	0.9	2.9	7.1
Long-term debt	\$ 45.7	\$ 42.8	\$ 66.3

Credit Agreement On October 20, 2006, the Company entered into a five-year \$160.0 million asset based senior secured revolving credit facility (credit facility). Borrowing availability under the credit facility is based on eligible accounts receivable and inventory. The Company has the right to add a real estate component to increase borrowing availability, but not in excess of the \$160.0 million commitment. Additionally, the credit facility includes an option to request an increase in the size of the facility by up to an additional \$40.0 million, subject to certain conditions and approvals. The Company must also pay a fee in the range of 0.25% to 0.32% per annum on the average daily-unused amount of the revolving credit commitment. The entire unpaid balance under the credit facility is due and payable on October 20, 2011, the maturity date of

Edgar Filing: HUTTIG BUILDING PRODUCTS INC - Form 10-Q

the credit agreement.

At September 30, 2007, under the credit facility the Company had revolving credit borrowings of \$45.0 million outstanding at a weighted average interest rate of 6.61%, letters of credit outstanding totaling \$5.2 million, primarily for health and workers compensation insurance, and \$70.7 million of additional borrowing capacity. In addition, the Company had \$1.6 million of capital lease and other obligations outstanding at September 30, 2007.

Table of Contents

The borrowings under the credit facility are collateralized by substantially all of the Company's assets and are subject to certain operating limitations applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends and transactions with affiliates. The financial covenant in the credit facility is limited to a fixed charge coverage ratio to be tested only when excess borrowing availability is less than \$25.0 million, on a pro forma basis prior to consummation of certain significant business transactions outside the Company's ordinary course of business and prior to increasing the size of the facility.

4. CONTINGENCIES

The Company is involved in a number of legal proceedings incidental to the conduct of its business, relating to such matters as product liability, environmental liability and vehicular accidents. The Company carries insurance policies on insurable risks with coverage and other terms that it believes to be appropriate. The Company generally has self-insured retention limits and has obtained fully insured layers of coverage above such self-insured retention limits. Accruals for self-insurance losses are made based on claims experience. Liabilities for existing and unreported claims are accrued when it is probable that future costs will be incurred and can be reasonably estimated.

The Company is subject to federal, state and local environmental protection laws and regulations. The Company's management believes the Company is in compliance, or is taking action aimed at assuring compliance, with applicable environmental protection laws and regulations. However, there can be no assurance that future environmental liabilities will not have a material adverse effect on the Company's consolidated financial condition or results of operations.

Huttig has been identified as a potentially responsible party in connection with the clean up of contamination at a formerly owned property in Montana that was used for the manufacture of wood windows and at a currently-owned facility in Prineville, Oregon, in connection with the clean up of petroleum hydrocarbons and PCP discovered in soil and groundwater at the facility. As of September 30, 2007, the Company had accrued approximately \$0.8 million for future costs of remediating these sites. However, until a final remedy is selected by the respective state departments of environmental quality, management cannot estimate the top of the range of loss or cost to Huttig of the final remediation order.

In addition, some of the Company's current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which the Company, among others, could be held responsible. The Company currently believes that there are no material environmental liabilities at any of its distribution center locations.

The Company accrues expenses for contingencies when it is probable that an asset has been impaired or a liability has been incurred and management can reasonably estimate the expense. Contingencies for which the Company has recorded accruals include environmental, product liability and other legal matters. Based on management's assessment of the most recent information available, management currently does not expect any of these contingencies to have a material adverse effect on the Company's financial position or cash flow. It is possible, however, that future results of operations for any particular quarter or annual period and our financial condition could be materially affected by changes in assumptions or other circumstances related to these matters.

5. BASIC AND DILUTED SHARES

For the three and nine months ended September 30, 2007 and 2006, all outstanding stock options and all non-vested restricted shares/units were anti-dilutive. At September 30, 2007, the Company had 924,625 stock options and 401,473 shares of restricted stock and restricted stock units outstanding.

6. BRANCH CLOSURES AND OTHER SEVERANCE

In 2007, the Company closed its Hauppauge, New York, Dothan, Alabama, and Spokane, Washington branches and sold certain assets of its Green Bay, Wisconsin branch. The Company recorded \$2.7 million in net operating charges from branch closures and from severance associated with other reductions in force in the caption "Operating expenses" on its consolidated statement of operations for the nine months ended September 30, 2007. The Company also recorded \$1.0 million in net inventory losses related to branch closures in the caption "Cost of sales" on its consolidated statement of operations for the nine months ended September 30, 2007. At September 30, 2007, the Company has recorded \$1.3 million related to accrued severance and remaining building lease rentals (net of anticipated sublease rentals) on closed facilities that will be paid out over the terms of the various leases through 2010 primarily in "Other accrued liabilities" on the balance sheet.

Table of Contents

Branch Closure Reserve and Other Accrued Severance: (in millions)

	Inventory	Operating Expenses	Total
Balance at December 31, 2006	\$	\$ 1.2	\$ 1.2
Branch closures and other severance	1.0	2.7	3.7
Amount paid/utilized	(1.0)	(2.6)	(3.6)
Balance at September 30, 2007	\$	\$ 1.3	\$ 1.3

7. INCOME TAXES

Huttig adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48), on January 1, 2007. As a result of the implementation, the Company recognized a \$0.4 million decrease to liabilities for uncertain tax positions. This decrease was accounted for as an increase to the beginning balance of retained earnings on the balance sheet. Including the cumulative-effect decrease to liabilities for uncertain tax positions, at the beginning of 2007, Huttig had approximately \$0.4 million of unrecognized tax benefits, all of which, if recognized, would affect the effective income tax rate in future periods.

In connection with the adoption of FIN 48, the Company will include interest and penalties related to uncertain tax positions in income tax expense. Currently, the Company has \$0.4 million of unrecognized tax benefits and \$0.2 million of accrued interest related to uncertain tax positions included in Other non-current liabilities on the balance sheet.

Huttig and its subsidiaries are subject to U.S. federal income tax as well as income tax of multiple state jurisdictions. The Company has substantially concluded all U.S. federal income tax matters for years through 2004, and is currently under examination by the Internal Revenue Service for 2005. Open tax years related to state jurisdictions remain subject to examination but are not considered material.

As of September 30, 2007, there have been no material changes to the liabilities for uncertain tax positions. The Company does not expect any significant increases or decreases to its unrecognized tax benefits within 12 months of this reporting date.

8. DISCONTINUED OPERATIONS

The Company recorded a net \$0.2 million after tax loss from discontinued operations primarily for environmental and litigation expenses associated with previously reported discontinued operations in the nine months ended September 30, 2007.

Table of Contents**ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Overview**

Huttig is a distributor of building materials used principally in new residential construction and in home improvement, remodeling, and repair work. We distribute our products through 38 distribution centers serving 44 states and sell primarily to building materials dealers, national buying groups, home centers and industrial users, including makers of manufactured homes.

The following table sets forth our sales from continuing operations, by product classification as a percentage of total sales:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2007	2006	2007	2006
Millwork ⁽¹⁾	48%	52%	49%	53%
General Building Products ⁽²⁾	39%	34%	37%	32%
Wood Products ⁽³⁾	13%	14%	14%	15%
Total Net Product Sales	100%	100%	100%	100%

(1) Millwork includes exterior and interior doors, pre-hung door units, windows, patio doors, mouldings, frames, stair parts and columns.

(2) General building products include composite decking, connectors, fasteners, housewrap, roofing products, insulation and other miscellaneous building products.

(3) Wood products include engineered wood products, and other wood products, such as lumber and panels.

Industry Conditions

Various factors historically have caused our results of operations to fluctuate from period to period. These factors include levels of construction, home improvement and remodeling activity, weather, prices of commodity wood, steel and petroleum-based products, fuel costs, interest rates, competitive pressures, availability of credit and other local, regional and national economic conditions. Many of these factors are cyclical or seasonal in nature. We anticipate that fluctuations from period to period will continue in the future. Our first quarter and fourth quarter are generally adversely affected by winter weather patterns in the Midwest and Northeast, which typically result in seasonal decreases in levels of construction activity in these areas. Because much of our overhead and expenses remain relatively fixed throughout the year, our operating profits tend to be lower during the first and fourth quarters. We continue to anticipate decreased housing starts for the balance of 2007 and well into 2008 based on the current level of housing activity and industry forecasts. As a result, we are continuing to examine our cost structure, looking for opportunities to reduce expenses and increase efficiencies.

We believe we have the product offerings, warehouse and support facilities, personnel, systems infrastructure and financial and competitive resources necessary for continued business success. Our future revenues, costs and profitability, however, are all likely to be influenced by a number of risks and uncertainties, including those discussed under "Cautionary Statement" below.

Critical Accounting Policies

We prepare our consolidated financial statements in accordance with U.S. generally accepted accounting principles, which require management to make estimates and assumptions. Management bases these estimates and assumptions on historical results and known trends as well as management forecasts. Actual results could differ from these estimates and assumptions. See our Annual Report on Form 10-K for the year ended December 31, 2006 in Part II, Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Policies."

Table of Contents

Results of Operations

Three Months Ended September 30, 2007 Compared to the Three Months Ended September 30, 2006

Net sales from continuing operations were \$233.0 million, which were \$61.2 million, or approximately 21%, lower than 2006. Third quarter 2007 results reflect a 24% drop in housing starts to an average annualized rate of approximately 1.3 million compared to approximately 1.7 million in the third quarter of 2006. We continue to anticipate decreased housing starts for the balance of 2007 and well into 2008 based on the current level of housing activity and industry forecasts. As a result, we are continuing to examine our cost structure, looking for opportunities to reduce expenses and increase efficiencies.

By product, sales decreased in all product categories. Millwork sales decreased 27% to \$112.2 million. General building products sales decreased 8% to \$90.4 million. Other wood products, mostly commodity products, decreased 26% to \$21.4 million and engineered wood sales were down 26% to \$9.0 million.

Gross margin decreased 13% to \$43.3 million, or 18.6% of sales, as compared to \$49.9 million or 17.0% of sales in the prior year period. Third quarter 2006 results reflect the liquidation and write down of inventory at closed branches (\$0.6 million) and charges related to the liquidation and write down of discontinued product inventory in connection with the exit of a wood decking product line (\$3.3 million) and the conversion of six branches to a new exterior door vendor (\$1.0 million). These items negatively impacted 2006 gross margin percentage by approximately 1.6%. In addition, third quarter 2007 benefited from a more favorable mix of higher margin non-direct sales offset by lower vendor rebates and a less favorable product mix of millwork sales.

Operating expenses decreased 33% to \$42.3 million, or 18.2% of sales, in the 2007 third quarter, compared to \$63.0 million, or 21.4% of sales, in the 2006 third quarter. Third quarter 2006 results include \$12.3 in charges, including \$10.9 million in asset impairment charges related to the decision to discontinue the implementation of and write-off capitalized costs associated with a new enterprise resource planning system, \$1.3 million of expenses, primarily severance and lease termination, associated with the shut down and consolidation of three branches during the 2006 third quarter, and \$0.1 million related to severance costs associated with a separate, company-wide workforce reduction of approximately 50 employees in the 2006 third quarter. Excluding these 2006 third quarter charges, operating expenses in the 2007 third quarter also reflect decreased personnel costs of \$3.9 million compared to the 2006 third quarter primarily due to lower employee headcount partially offset by increased medical benefit costs. In addition, excluding these 2006 charges, non-personnel expenses decreased \$4.5 million in the third quarter of 2007 as compared to the third quarter of 2006, due primarily to lower infrastructure levels following our restructuring actions.

Net interest expense decreased to \$1.1 million in the third quarter from \$1.6 million in the prior year third quarter primarily due to decreased borrowing levels and lower interest rates.

As a result of the foregoing factors, operating profit from continuing operations was \$1.0 million in the 2007 third quarter as compared to an operating loss of (\$13.1) million from continuing operations in 2006 third quarter. Net loss from continuing operations was (\$0.1) million, or (\$0.00) per diluted share, in the 2007 third quarter, as compared to net loss from continuing operations of (\$9.1) million, or (\$0.45) per diluted share, in the 2006 third quarter.

Nine Months Ended September 30, 2007 Compared to the Nine Months Ended September 30, 2006

Net sales from continuing operations were \$694.9 million, which were \$176.7 million, or approximately 20%, lower than 2006. The results for the nine months ended September 30, 2007 reflect a 26% drop in housing starts to an average annualized rate of approximately 1.4 million compared to approximately 1.9 million in the first nine months of 2006.

By product, sales decreased in all product categories. Millwork sales decreased 25% to \$344.8 million. General building products sales decreased 9% to \$256.2 million. Other wood products, mostly commodity products, decreased 28% to \$65.7 million and engineered wood sales were down 24% to \$28.2 million.

Gross margin decreased 19% to \$130.9 million, or 18.8% of sales, as compared to \$161.0 million or 18.5% of sales in the prior year period. The nine months ended September 30, 2007 results reflect the liquidation and write-down of inventory at closed branches of \$1.0 million. These items negatively impacted gross margin percentage by approximately 0.2%. The nine months ended September 30, 2006 results reflect the liquidation and write down of inventory at closed branches (\$0.6 million) and charges related to the liquidation and write down of discontinued product inventory in connection with the exit of a wood decking product line (\$3.3 million) and the conversion of six branches to a new exterior door vendor (\$1.0 million). These items negatively impacted the 2006 gross margin percentage by approximately 0.6%. Also as compared to the prior year, gross margin as a percentage of sales benefited from a more favorable mix of higher margin non-direct sales, which was partially

offset by a decrease in vendor rebates earned and a less favorable product mix of millwork sales.

Table of Contents

Operating expenses decreased 19% to \$132.3 million, or 19.0% of sales, in the nine months ended September 30, 2007, compared to \$162.5 million, or 18.6% of sales, in the first nine months of 2006. Operating expenses in the 2007 period include \$2.7 million of expenses, primarily severance, lease termination and asset impairment, associated with the shut down and consolidation of three branches during 2007. Operating expenses in the 2006 period include \$10.9 million in asset impairment charges related to the decision to discontinue the implementation of and write-off capitalized costs associated with a new enterprise resource planning system, \$1.3 million of expenses, primarily severance and lease termination, associated with the shut down and consolidation of three branches during the third quarter, and \$0.1 million related to severance cost associated with a separate, company-wide workforce reduction of approximately 50 employees in the 2006 third quarter. Excluding the foregoing charges and expenses in both 2007 and 2006, operating expenses in the first nine months of 2007 reflect decreased personnel costs of \$11.8 million compared to the 2006 period, primarily due to lower employee headcount partially offset by higher medical benefit costs. In addition, excluding the above charges and expenses, non-personnel expenses decreased \$8.8 million in the first nine months of 2007, as compared to the 2006 first nine months, due primarily to lower infrastructure levels following our restructuring actions.

In the nine months ended September 30, 2007, we recognized gains of \$0.5 million on the sale of our Grand Rapids, MI facility and \$1.0 million on the sale of our Spokane, WA facility.

Net interest expense decreased to \$3.4 million in the nine months ended September 30, 2007 from \$3.9 million in the nine months ended September 30, 2006 primarily from reduced borrowing levels.

Income taxes as a percentage of pre-tax loss for the nine months ended September 30, 2007 and 2006 were approximately 33% and 37%, respectively.

As a result of the foregoing factors, the operating income from continuing operations was \$0.1 million in the first nine months of 2007 as compared to an operating loss of (\$1.5) million from continuing operations in first nine months of 2006. Net loss from continuing operations was (\$2.2) million, or (\$0.11) per diluted share, in the first nine months of 2007, as compared to net loss from continuing operations of (\$3.4) million, or (\$0.17) per diluted share, in the first nine months of 2006.

Discontinued Operations

We recorded a net \$0.2 million after-tax loss from discontinued operations primarily for environmental and litigation expenses associated with previously reported discontinued operations in the nine months ended September 30, 2007.

Liquidity and Capital Resources

We depend on cash flow from operations and funds available under our revolving credit facility to finance seasonal working capital needs, capital expenditures and any acquisitions that we may undertake. Our working capital requirements are generally greatest in the second and third quarters, which reflect the seasonal nature of our business. The second and third quarters are also typically our strongest operating quarters, largely due to increased construction activities from more favorable weather throughout many of our markets compared to the first and fourth quarters. We typically generate cash from working capital reductions in the fourth quarter of the year and build working capital during the first quarter in preparation for our second and third quarters. We also maintain significant inventories to meet rapid delivery requirements of our customers and to enable us to obtain favorable pricing, delivery and service terms with our suppliers. At September 30, 2007, December 31, 2006 and September 30, 2006, inventories constituted approximately 39%, 39% and 40% of our total assets, respectively. We also closely monitor operating expenses and inventory levels during seasonally affected periods and, to the extent possible, manage variable operating costs to minimize seasonal effects on our profitability.

Operations. Cash provided by operating activities increased \$30.9 million to \$3.6 million for the nine months ended September 30, 2007 from cash used in operating activities of (\$27.3) million for the first nine months of 2006. Accounts receivable increased by \$9.9 million in the first nine months of 2007 compared to an increase of \$19.9 million in the first nine months of 2006. Days sales outstanding decreased to 32.9 days at September 30, 2007 compared to 34.3 days at September 30, 2006 based on annualized sales for the respective immediately preceding quarter. Inventory increased by \$0.8 million in the 2007 first nine months compared to an increase of \$25.4 million in the 2006 first nine months. Annualized inventory turns, calculated as the ratio of annualized cost of goods sold for each three-month period ended September 30 divided by the average of the beginning and ending inventory balances for each such three-month period, were 7.6 turns at September 30, 2007 compared to 7.5 at September 30, 2006. Accounts payable increased by \$8.5 million and \$6.3 million in the nine-month periods ended September 30, 2007 and 2006, respectively.

Table of Contents

Investing. In the nine-month period ended September 30, 2007, net cash provided by investing activities was \$0.4 million, as compared to \$7.8 million of net cash used in investing activities in the nine-month period ended September 30, 2006. The Company received proceeds of \$2.9 million as a result of our sales of the Spokane, WA and Grand Rapids, MI facilities in 2007. In addition, the nine months ended September 30, 2007 reflect cash used in investing activities of \$2.6 million related to capital expenditures primarily to purchase computer software necessary to upgrade our enterprise resource planning system and to purchase machinery and equipment at multiple branch locations compared to \$8.0 million in capital expenditures in the first nine months of 2006.

Financing. Cash provided by financing activities for the first nine months of 2007 primarily reflects \$1.0 million received from the exercise of employee stock options and a \$0.9 million increase in net borrowings. Cash provided from financing activities for the first nine months of 2006 primarily reflects a \$39.4 million increase in net borrowings and \$1.1 million received from the exercise of employee stock options.

Credit Agreement On October 20, 2006, we entered into a five-year \$160.0 million asset based senior secured revolving credit facility (credit facility). Borrowing availability under the credit facility is based on eligible accounts receivable and inventory. We have the right to add a real estate component to increase borrowing availability, but not in excess of the \$160.0 million commitment. Additionally, the credit facility includes an option to request an increase in the size of the facility by up to an additional \$40.0 million, subject to certain conditions and approvals. We must also pay a fee in the range of 0.25% to 0.32% per annum on the average daily-unused amount of the revolving credit commitment. The entire unpaid balance under the credit facility is due and payable on October 20, 2011, the maturity date of the credit agreement.

At September 30, 2007, under the credit facility, we had revolving credit borrowings of \$45.0 million outstanding at a weighted average interest rate of 6.61%, letters of credit outstanding totaling \$5.2 million, primarily for health and workers compensation insurance, and \$70.7 million of additional borrowing capacity. In addition, we had \$1.6 million of capital lease and other obligations outstanding at September 30, 2007.

The borrowings under the credit facility are collateralized by substantially all of our assets and are subject to certain operating limitations applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends and transactions with affiliates. The financial covenant in the credit facility is limited to a fixed charge coverage ratio to be tested only when excess borrowing availability is less than \$25.0 million, on a pro forma basis prior to consummation of certain significant business transactions outside our ordinary course of business and prior to increasing the size of the facility.

We believe that cash generated from our operations and funds available under our credit facility will provide sufficient funds to meet our currently anticipated short-term and long-term liquidity and capital expenditure requirements.

Off-Balance Sheet Arrangements

In addition to funds available from operating cash flows and our credit facility as described above, we use operating leases as a principal off-balance sheet financing technique. Operating leases are employed as an alternative to purchasing certain property, plant and equipment. See our Annual Report on Form 10-K for the year ended December 31, 2006 in Part II, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations-Commitments and Contingencies.

Contingencies

We are involved in a number of legal proceedings incidental to the conduct of its business, relating to such matters as product liability, environmental liability and vehicular accidents. We carry insurance policies on insurable risks with coverage and other terms that we believe to be appropriate. We generally have self-insured retention limits and have obtained fully insured layers of coverage above such self-insured retention limits. Accruals for self-insurance losses are made based on claims experience. Liabilities for existing and unreported claims are accrued when it is probable that future costs will be incurred and can be reasonably estimated.

We are subject to federal, state and local environmental protection laws and regulations. Our management believes we are in compliance, or are taking action aimed at assuring compliance, with applicable environmental protection laws and regulations. However, there can be no assurance that future environmental liabilities will not have a material adverse effect on our consolidated financial condition or results of operations.

Table of Contents

We have been identified as a potentially responsible party in connection with the clean up of contamination at a formerly owned property in Montana that was used for the manufacture of wood windows and at a currently-owned facility in Prineville, Oregon, in connection with the clean up of petroleum hydrocarbons and PCP discovered in soil and groundwater at the facility. As of September 30, 2007, we have accrued approximately \$0.8 million for future costs of remediating these sites. However, until a final remedy is selected by the respective state departments of environmental quality, management cannot estimate the top of the range of loss or cost to us of the final remediation order.

In addition, some of our current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which we, among others, could be held responsible. We currently believe that there are no material environmental liabilities at any of our distribution center locations.

We accrue expenses for contingencies when it is probable that an asset has been impaired or a liability has been incurred and management can reasonably estimate the expense. Contingencies for which we have made accruals include environmental, product liability and other legal matters. Based on management's assessment of the most recent information available, management currently does not expect any of these contingencies to have a material adverse effect on our financial position or cash flow. It is possible, however, that future results of operations for any particular quarter or annual period and our financial condition could be materially affected by changes in assumptions or other circumstances related to these matters.

New Accounting Procurements

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment of FASB Statement No. 115*, which permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. We are currently evaluating whether we will elect the fair value option for any of our eligible financial instruments and other items.

Cautionary Statement

Certain statements in this Quarterly Report on Form 10-Q contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including but not limited to statements regarding:

our expectation that known contingencies, including risks relating to environmental, product liability and other legal matters, will not have a material adverse effect on our financial position or cash flow;

our belief that there are no material environmental liabilities at any of our distribution center locations;

our expectation that we will not have any significant increases or decreases to our unrecognized tax benefits within 12 months of this reporting date;

our anticipation of decreased housing starts for the balance of 2007 and well into 2008;

our belief that cash from operations and funds under our credit facility will be sufficient to meet our short-term and long-term liquidity and capital expenditure requirements;

our belief that we have the product offerings, warehouse and support facilities, personnel, systems infrastructure and financial and competitive resources necessary for continued business success;

our liquidity and exposure to market risk; and

cyclical and seasonal trends, including our statements that operating profits are usually lower in the first and fourth quarters than in the second and third quarters, that we typically generate cash from working capital reductions in the fourth quarter and build working capital in the first quarter, and that our working capital requirements are generally greatest in the second and third quarters.

The words or phrases will likely result, are expected to, will continue, is anticipated, estimate, project or similar expressions identify forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

These statements present management's expectations, beliefs, plans and objectives regarding our future business and financial performance. These forward-looking statements are based on current projections, estimates, assumptions and judgments, and involve known and unknown risks and uncertainties. There are a number of factors that could cause our actual results to differ materially from those expressed or implied in the forward-looking statements. These factors include, but are not limited to, the following:

the strength of the national and local new residential construction and home improvement and remodeling markets, which in turn depend on factors such as

Table of Contents

interest rates,

immigration patterns,

regional demographics,

employment levels,

availability of credit,

inventory levels of new and existing homes for sale,

prices of wood, steel and petroleum-based products,

fuel costs,

consumer confidence, and

weather conditions,

the level of competition in our industry,

our relationships with suppliers of the products we distribute,

our ability to comply with availability requirements and the financial covenant under our revolving credit facility,

fluctuation in prices of wood, steel and petroleum-based products,

costs of complying with environmental laws and regulations,

our exposure to product liability claims,

our ability to attract and retain key personnel, and

Edgar Filing: HUTTIG BUILDING PRODUCTS INC - Form 10-Q

risk of losses associated with accidents.

Additional information concerning these and other factors that could materially affect our results of operations and financial condition are included in our most recent Annual Report on Form 10-K and our filings made with the SEC subsequent to that Annual Report on Form 10-k. We disclaim any obligation to publicly update or revise any of these forward-looking statements.

Table of Contents

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have exposure to market risk as it relates to effects of changes in interest rates. We had debt outstanding at September 30, 2007 under our credit facility of \$45.0 million.

All of our debt under our revolving credit facility accrues interest at a floating rate basis. If market interest rates for LIBOR had been different by an average of 1% for the nine months ended September 30, 2007, our interest expense and income before taxes would have changed by \$0.5 million. These amounts are determined by considering the impact of the hypothetical interest rates on our borrowing cost. This analysis does not consider the effects of any change in the overall economic activity that could exist in such an environment. Further, in the event of a change of such magnitude, management may take actions to further mitigate its exposure to the change. However, due to the uncertainty of the specific actions that would be taken and their possible effects, the sensitivity analysis assumes no changes in our financial structure.

We are subject to periodic fluctuations in the price of wood, steel commodities, petrochemical-based products and fuel. Profitability is influenced by these changes as prices change between the time we buy and sell the wood, steel or petrochemical-based products. Profitability is influenced by changes in prices in fuel. In addition, to the extent changes in interest rates affect the housing and remodeling market, we would be affected by such changes.

ITEM 4 CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures The Company, under the supervision and with the participation of our Disclosure Committee and management, including our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934). Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective as of September 30, 2007 in all material respects in (a) causing information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 to be recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (b) causing such information to be accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control of Financial Reporting There have been no changes in our internal control over financial reporting that occurred during the quarter ended September 30, 2007, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1 LEGAL PROCEEDINGS

See Note 4 Contingencies of the Notes to Consolidated Financial Statements in Item 1 for information on legal proceedings in which the Company is involved. See also Part I, Item 3- Legal Proceedings in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

ITEM 5 OTHER INFORMATION

The Company and Darlene K. Schroeder entered into a separation agreement (the Agreement), which was fully executed on November 1, 2007, in connection with Ms. Schroeder's resignation as Vice President-Human Resources of the Company. Pursuant to the Agreement, the Company will pay Ms. Schroeder her base salary through October 4, 2008 or such earlier date as Ms. Schroeder obtains other full-time employment. In addition, until that date, Ms. Schroeder will have the right to continue to participate in certain of the Company's benefit programs and to receive certain perquisites. The Company will also pay up to \$5,000 for the cost of outplacement services. The Agreement contains mutual releases of liabilities between Ms. Schroeder and the Company.

The description of the Agreement set forth above is qualified in its entirety by reference to the actual terms of the Agreement, which is filed as Exhibit 10.1 to this Quarterly Report on Form 10-Q.
