NOTES TO SCHEDULES OF INVESTMENTS (Unaudited)

A. SECURITY VALUATION: The Funds equity securities are valued based on market quotations or at fair value as determined in good faith by or under the direction of the Board of Trustees (the Board) when no market quotations are available or when market quotations have become unreliable. The Board has delegated the responsibility of making fair value determinations to the Funds Valuation Committee (the Valuation Committee), subject to the Funds Pricing Policies. The Funds have retained third-party pricing services which may be utilized by the Valuation Committee under circumstances described in the Pricing Policies to provide fair value prices for certain securities held by the Funds. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV differ from quoted or published prices for the same securities for that day. All fair value determinations are made subject to the Board s oversight.

The books and records of the Funds are maintained in U.S. Dollars. Transactions denominated in foreign currencies are recorded at the current prevailing exchange rates. All assets and liabilities denominated in foreign currencies are translated into U.S. Dollars at the current exchange rate. Translation gains or losses resulting from changes in the exchange rate during the reporting period and realized gains and losses on the settlement of foreign currency transactions are reported in the results of operations for the current period. The Funds do not isolate that portion of gains and losses on investments in equity securities which is due to changes in the foreign exchange rate from that which is due to changes in market prices of equity securities. International dollar bonds are issued offshore, pay interest and principal in U.S. Dollars, and are denominated in U.S. Dollars

Market values for equity securities are determined based on the last sale price on the principal (or most advantageous) market on which the security is traded. If a reliable last sale price is not available, market values for equity securities are determined using the mean between the last available bid and asked price. Securities are valued through valuations obtained from a commercial pricing service or at the most recent mean of the bid and asked prices provided by investment dealers in accordance with procedures established by the Board.

Foreign securities are valued as of the close of trading on the primary (or most advantageous) market on which they trade. The value is then converted to U.S. dollars using current exchange rates and in accordance with the Pricing Policies. Foreign currency exchange rates are determined as of the close of trading on the New York Stock Exchange, Inc. (NYSE)

Events affecting the value of foreign investments occur between the time at which they are determined and the close of trading on the NYSE. Such events would not normally be reflected in a calculation of a Fund s NAV on that day. If events that materially affect the value of the Funds foreign investments occur during such period, and the impact of such events can be reasonably determined, the investments will be valued at their fair value as described above.

Foreign securities held by the Funds may be traded on days and at times when the NYSE is closed. Accordingly, the NAV of the Funds may be significantly affected on days when shareholders have no access to the Funds. For valuation purposes, quotations of foreign portfolio securities, other assets and liabilities, and forward contracts stated in foreign currency are translated into U.S. dollar equivalents at the prevailing market rates.

B. ADOPTION OF STATEMENT OF FINANCIAL ACCOUNTING STANDARDS NO. 157 FAIR VALUE MEASUREMENTS (**FAS 157**): In September 2006, the Financial Accounting Standards Board issued FAS 157 effective for fiscal years beginning after November 15, 2007. This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements. The Funds have adopted FAS 157 as of January 1, 2008. The three levels of the fair value hierarchy under FAS 157 are described below:

- Level 1: Quoted prices in active markets for identical securities
- Level 2: Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3: Significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The summary of inputs used to value the Fund s net assets as of September 30, 2008 is as follows:
