For the first quarter of 2009, despite facing the challenges from the intense market competition and the impact on the economic conditions brought by the global financial crisis, the Group deepened strategic transformation with continuous rapid growth in various transformation services, which effectively mitigated and offset the decline in the traditional wireline voice services and enabled the Group to maintain robust fundamentals.

Facing the intense market competition, the local wireline access lines in service continued to record negative growth in the first quarter. The Group emphasized the principle of profitable development of its wireline voice business, concentrated its sales resources and tilted the resource allocation towards the key customer groups of government and enterprise as well as mid-to-high-end household while strictly controlling sales initiatives for the low-end customers. Businesses like Internet and data services, value-added and integrated information application services continued its robust growth momentum. The wireline broadband subscribers reached 46.77 million, representing a net increase of 2.50 million. Overall the wireline services continued to develop steadily.

With the dedicated efforts in the past half year, the mobile service has shown favourable growth momentum with a net increase of 4.93 million customers in the first quarter of 2009, a turnaround from the decline in subscribers after the acquisition of the CDMA business in the fourth quarter of last year. As at the end of March 2009, the total number of mobile subscribers reached 32.84 million. The average mobile service revenue per user per month (ARPU) primarily remained stable as compared to that in the fourth quarter of last year.

Excluding the amortisation of upfront connection fees of RMB296 million, the operating revenues of the Group were RMB50,886 million for the first quarter of 2009, representing an increase of 14.9% over the corresponding period of last year. Profit attributable to equity holders of the Company was RMB4,699 million, representing a decrease of 27.4% over the corresponding period of last year. EBITDA was RMB22,199 million, a decrease of 3.8% over the corresponding period of last year. The Board believes that although the implementation by the Group of its strategy of effective scale development of its mobile service will lead to short term pressure on the Group's overall profitability, it would significantly enhance the Group's long term sustainable development and value creation.

The Group continues to leverage the synergies of the wireline and mobile networks to bundle our core services such as wireline, Internet and information content and application with mobile services so as to fully utilize the strengths of CDMA technology. Through business integration and innovation as well as products integration in accordance with the needs of customers, the Group established competitive edge through differentiated offerings to enhance its enterprise value, customer value and shareholder value altogether.

The Board wishes to remind investors that the above financial and business data are based on the Group's unaudited management accounts. Investors are cautioned not to unduly rely on such data.

In the meantime, investors are advised to exercise caution in dealing in the securities of the Company.

By Order of the Board
