**CNH Parts & Service Unveils Plans for New Distribution Facility**

**RACINE, Wis. (July 23, 2009)** CNH Parts & Service, the product support business of agricultural and construction equipment maker CNH Global N.V. (NYSE: CNH), today unveiled plans to occupy a newly developed 250,000-square-foot distribution center in Portland, Ore. Company officials expect the state-of-the-art parts distribution facility to be fully operational in the first quarter of 2010.

The facility will serve more than 130 New Holland, Case IH and Case Construction equipment dealerships in the Pacific Northwest, and is expected to bring 35 to 40 new jobs to the Portland area, according to Anu Goel, Vice President, North American Parts Operations for CNH Parts & Service. CNH is investing more than \$15 million in the new distribution center, which also allows for future expansion.

CNH's choice of Portland for significant investment and new job creation is very welcome news, said Bruce Warner, Executive Director of the Portland Development Commission. We look forward to partnering with the company to support the development of this new facility. CNH has been working closely with ProLogis, a leading global provider of distribution facilities, to establish the new parts distribution center at Prologis Park PDX, which is located about 2 1/2 miles from the Portland International Airport.

This particular site was chosen for its proximity to the Portland International Airport and port facilities, as well as its access to the major interstate highways in the region, according to Goel. Once it is operational, we anticipate that the new Portland distribution facility will be a key logistics and transportation hub within our network and our new gateway to the Pacific Northwest market.

The new parts distribution facility will extend the company's next-day distribution capabilities to equipment dealerships in nearly all regions of North America, and marks the completion of the company's transition of its distribution operations from third-party logistics providers in North America to distribution sites that are managed and staffed by CNH.

(more)

The Portland project also continues the company's previously-announced plans to improve dealer and customer service, improve efficiency, and reduce overall logistics costs of its parts distribution network. In February of 2007, CNH opened a 500,000-square-foot parts distribution center in Cameron, Mo.; in September, 2003, the company opened a master depot in Lebanon, Ind. Once the Portland center is up and running, the company's parts distribution operations will be handled by 11 facilities in North America.

*About CNH Parts & Service*

*CNH Parts & Service, the product support business of CNH Global N.V. (NYSE: CNH), a majority-owned subsidiary of Fiat Group (FIA:MI), provides aftersales parts and service solutions for the Case and New Holland brand families, including CNH Original Parts, Case and New Holland branded parts, and a wide range of global support services for the Case and New Holland dealer network. More information about CNH and CNH Parts & Service can be found online at: [www.cnh.com](http://www.cnh.com).*

**CNH Parts & Service and Fiat Powertrain Technologies**

**Partner to Expand FPT North American Dealer Network**

**RACINE, Wis.** (July 23, 2009) CNH Global N.V. (NYSE: CNH) and Fiat Powertrain Technologies (FPT), both companies of the Fiat Group (FIA:MI), announce a joint agreement to expand the FPT North America (NA) dealer network. FPT NA and CNH Parts & Service will cooperate in the areas of after sales service and parts.

FPT NA will select and designate approximately 300 independently owned dealers from the CNH family of brands, to operate as authorized FPT service dealers. Ted Bregar, General Manager and Chief Operating Officer of FPT North America, said: The dealer principals have expressed a high level of interest, capability and commitment for expanding their participation in the North American engine business. Case, New Holland and Kobelco Construction and Case IH and New Holland Agriculture dealers are attracted to the unique opportunity to become a part of the FPT brand in North America because of its international reputation, and the attractive features and benefits which FPT engines offer to the North American customer base.

Teaming with FPT provides our dealer network with an opportunity to increase their parts and service sales, while also expanding their product offering, says Eric Bippus, Vice President of Sales and Marketing for CNH Parts & Service North America. Because a large proportion of Case, New Holland and Kobelco Construction and Case IH and New Holland Agriculture equipment features FPT engines and components, our dealers are already prepared to support FPT engines and their industry-leading technology.

The move leverages FPT technology and expertise and provides FPT with a comprehensive, established dealer network of experts to service and support their OEM engine business in the industrial and power generation market segments.

The new FPT dealers will be strategically located to serve current and future customers; the network will be further expanded as the customer base increases.

The FPT NA dealer network is expected to provide a larger, efficient and highly competent service network for FPT customers.

(more)

*CNH to Provide FPT Service Support / Page 2 of 2*

The main services provided to FPT customers will be:

Parts sales from a network of 10 North American parts distribution centers and approximately 300 new dealer locations

Parts technical support

Service support at each of the approximately 300 dealer locations

Technical service support through help desk and automated query systems

Training using state of the art classrooms and training devices

FPT offers a wide range of industrial diesel engines with displacements from 3.0 liters to 20 liters, serving the industrial, power generation and marine market segments.

This plan confirms our commitment to customers' satisfaction. Thanks to a comprehensive dealer network, FPT's presence in North America is dramatically strengthened. The new FPT Dealer network will contribute heavily to the development of the FPT brand in North America, says Bregar.

*About Fiat Powertrain Technologies*

*Fiat Powertrain Technologies is the Fiat Group company specialized in and dedicated to research, development, production and sale of engines and transmissions. With its annual output of approximately 2.9 million engines and 2.4 million transmissions and axles, 20,000 employees, 17 plants and 11 research centers in 9 countries, FPT is one of the most significant players in the powertrain sector on a worldwide basis. More information about FPT can be found online at: [www.fptpowertrain.com](http://www.fptpowertrain.com).*

*About CNH Parts & Service*

*CNH Parts & Service, the product support business of CNH Global N.V. (NYSE: CNH), a majority-owned subsidiary of Fiat S.p.A. (FIA:MI), provides aftersales parts and service solutions for the CNH family of brands, and a wide range of global support services for the Case and New Holland dealer network. **CNH Parts & Service and SRC Agree**

**To Form CNH Reman Joint Venture**

**RACINE, WI** (July 23, 2009) CNH Global N.V. (NYSE: CNH) has agreed to develop a full-scale remanufacturing operation and services company as a joint venture with Springfield Remanufacturing Corp. (SRC) to be called **CNH Reman**. The partnership brings together CNH Parts & Service product expertise, access to equipment and dedicated dealer networks with SRC's remanufacturing operations, capabilities and expertise.

Case IH, Case Construction Equipment, New Holland Agriculture, New Holland Construction, Kobelco and Fiat Powertrain Technologies (FPT) dealers will be able to more readily provide customers with a much larger line of remanufactured products that can lower Total Cost of Ownership (TCO).

We see remanufacturing continuing to grow in importance in North America, so CNH is expanding its long-term relationship and partnership with SRC, says Eric Bippus, Vice President of Sales and Marketing, CNH Parts & Service, North America. Together with SRC, we are positioned to reach aggressive growth targets designed to serve our dealer and customer needs and meet investor expectations.

Dealers and customers will realize several advantages with an expanded selection of reman products:

Remanufacturing gives customers the opportunity to purchase replacement assemblies and components that are just like new, sometimes better than new due to engineering enhancements, at a reduced price and with a competitive warranty.

Reman assemblies mean increased efficiencies and productivity due to reduced repair times. This is something that both customers and dealers appreciate, especially during peak seasons when downtime is especially costly.

Reman is an important way to support sustainable development, which aligns with CNH's commitment to environmental responsibility.

Through this agreement, we will be able to better focus on reman and offer customers more breadth and depth across all our product families, says Bippus.

(more)

SRC has a long history with CNH. The corporation began in 1983, after employees purchased an International Harvester remanufacturing plant. Over time, SRC has continued its relationship with CNH. CNH will expand its current partnership with SRC in developing this full-scale remanufacturing and services company.

For us, this is like coming home again, says Jack Stack, President and CEO of SRC. The creation of CNH Reman takes us back to our origins, and we're excited to partner with CNH to provide a more robust line of reman products.

The opening, earlier this year, of the new CNH Reman Technical Center that delivers personalized phone support to dealers who offer CNH Original remanufactured parts was the first step. Now it's time to further expand and cement our relationship with CNH, adds Stack.

The agreement signifies CNH's commitment to remanufacturing and positions the company for continued growth through more cost-efficient manufacturing and capturing sales through the growing trend of product remanufacturing.

CNH plans to improve and increase product coverage across five product lines so that dealers can better serve their customers:

Engines and components

Drivetrain and components

Rotating electrics

Electronics

Hydraulics
