BJ S RESTAURANTS, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: BJs RESTAURANTS INC - Form 10-Q

California
(State or other jurisdiction of
incorporation or organization)

33-0485615
(I.R.S. Employer

Identification Number)

7755 Center Avenue

Suite 300

Huntington Beach, California 92647

(714) 500-2400

(Address, including zip code, and telephone number, including
area code, of registrant's principal executive offices)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every interactive data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (do not check if smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No .

As of July 30, 2010, there were 27,086,055 shares of Common Stock of the Registrant outstanding.

BJ'S RESTAURANTS, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements include the accounts of BJ's Restaurants, Inc. (referred to herein as the Company or in the first person notations we, us and our) and our wholly owned subsidiaries. The financial statements presented herein include all material adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair statement of the financial condition, results of operations and cash flows for the period. Our consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information, and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires us to make certain estimates and assumptions for the reporting periods covered by the financial statements. These estimates and assumptions affect the reported amounts of assets, liabilities, revenues and expenses. Actual amounts could differ from these estimates.

Certain information and footnote disclosures normally included in consolidated financial statements in accordance with U.S. generally accepted accounting principles (GAAP) have been omitted pursuant to requirements of the Securities and Exchange Commission (SEC). A description of our accounting policies and other financial information is included in our audited consolidated financial statements as filed with the SEC on Form 10-K for the year ended December 29, 2009. We believe that the disclosures included in our accompanying interim financial statements and footnotes are adequate to make the information not misleading, but should be read in conjunction with our consolidated financial statements and notes thereto included in the Annual Report on Form 10-K. The accompanying consolidated balance sheet as of December 29, 2009, has been derived from our audited consolidated financial statements.

Reclassifications

Certain reclassifications have been made to prior year's balances to conform to the current year's presentation.

Recent Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board (FASB) approved the FASB Accounting Standards Codification (the Codification) as the single source of authoritative nongovernmental GAAP. All existing accounting standard literature, promulgated by the FASB, American Institute of Certified Public Accountants, Emerging Issues Task Force and other authoritative sources, excluding guidance from the SEC, will be superseded by the Codification. All non-grandfathered, non-SEC accounting literature not included in the Codification will become non-authoritative. The Codification does not change GAAP, but instead introduces a new structure that will combine all authoritative standards into a comprehensive, topically organized online database. The Codification was effective for interim or annual periods ending after September 15, 2009, and impacted our consolidated financial statement disclosures beginning with the quarter ending September 29, 2009. There were no changes to the content of our consolidated financial statements or disclosures as a result of implementing the Codification.

In May 2009, the FASB issued a statement on subsequent events (Codification Topic No. 855, *Subsequent Events*), which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date, but before the financial statements are issued or available to be issued (subsequent events). This statement requires disclosure of the date through which the entity has evaluated subsequent events and the basis for that date. For public entities, this is the date the financial statements are issued. This statement does not apply to subsequent events or transactions that are within the scope of other GAAP and will not result in significant changes in the subsequent events reported by us. This statement was effective for interim or annual periods ending after June 15, 2009. We implemented the provisions of this statement commencing the quarter ended June 30, 2009. We evaluated for subsequent events through the issuance date of these unaudited consolidated financial statements. No recognized or non-recognized subsequent events were noted.

Table of Contents**2. INVESTMENTS**

Our investment policy restricts the investment of our excess cash balances to investment-grade marketable securities, such as U.S. Treasury and direct agency obligations, municipal and bank securities, investment-grade corporate debt securities, and money market funds. Investments and marketable securities, which we have the intent and ability to hold until maturity, are classified as held-to-maturity securities. All investments held as of June 29, 2010, are currently classified as held-to-maturity and are reported at amortized cost. Realized gains or losses are determined on the specific identification cost method and recorded on the Consolidated Statements of Income, when realized.

Investments consist of the following (in thousands):

	Amortized Cost	Average Maturity
Short-term investments:		
U.S. Treasury and direct agency obligations	\$ 7,522	6 months
Corporate bonds	2,793	8 months
June 29, 2010	\$ 10,315	
Non-current investments:		
Domestic corporate obligations	\$ 6,185	17 months
June 29, 2010	\$ 6,185	

The domestic corporate obligations included as non-current investments were issued under the Temporary Loan Guaranty Program of the U.S. Government and are fully insured by the Federal Deposit Insurance Corporation.

3. FAIR VALUE MEASUREMENT

For assets that are measured using quoted market prices in active markets, fair value is the published market price per unit multiplied by the number of units held without consideration of transaction costs. At June 29, 2010, we held investments in marketable securities totaling approximately \$16.5 million, which are currently classified as held-to-maturity and reported at amortized cost. Additionally, the majority of our investments are AAA-rated securities. Therefore, we believe that we are not exposed to significant credit risks on these investments.

The carrying value of cash and cash equivalents approximates fair value due to the short-term maturities of those securities. At June 29, 2010 and December 29, 2009, we held approximately \$22.4 million and \$44.9 million, respectively, of cash and cash equivalents. Our cash and cash equivalents are primarily comprised of U.S. Treasury, direct agency obligations and money market funds with various investment broker-dealers. The U.S. Treasury and direct agency obligations are guaranteed by the U.S. Government. Our money market fund investments consist of only first-tier, high-quality securities, and we have not experienced any losses to date in these investments.

4. LONG-TERM DEBT**Line of Credit**

We have a \$45 million unsecured revolving line of credit with a major financial institution (the Line of Credit). The Line of Credit expires on September 30, 2012, and may be used for working capital and other general corporate purposes. We expect to utilize the Line of Credit principally for letters of credit that are required to support certain of our self insurance programs and for working capital and construction requirements as needed. As of June 29, 2010, there were no borrowings outstanding under the Line of Credit and there were outstanding letters of credit totaling approximately \$3.6 million. Any borrowings under the Line of Credit will bear interest at the financial institution's prime rate or at LIBOR plus a percentage not to exceed 1.375% based on a Lease Adjusted Leverage Ratio as defined in the Line of Credit agreement. The Line of Credit agreement also requires compliance with a Fixed Charge Coverage Ratio, a Lease Adjusted Leverage Ratio and certain non-financial covenants. At June 29, 2010, we were in compliance with these covenants. Any interest on the Line of Credit will be payable quarterly and all related borrowings must be repaid on or before September 30, 2012. At June 29, 2010, interest paid on the funded borrowings under the Line of Credit was approximately \$22,000, of which \$14,000 related to the twenty-six weeks ended June 29, 2010. The weighted

average interest rate was approximately 1.1%.

Table of Contents**5. NET INCOME PER SHARE**

Basic net income per share is computed by dividing the net income attributable to common shareholders by the weighted average number of common shares outstanding during the period. Diluted net income per share reflects the potential dilution that could occur if stock options and restricted stock units issued by the Company to sell common stock at set prices were exercised. The consolidated financial statements present basic and diluted net income per share. Common share equivalents included in the diluted computation represent shares to be issued upon assumed exercises of outstanding stock options and restricted stock units using the treasury stock method.

The following table presents a reconciliation of basic and diluted net income per share computations and the number of dilutive securities (stock options and restricted stock units) that were included in the dilutive net income per share computation (in thousands).

	For The Thirteen Weeks Ended		For The Twenty-Six Weeks Ended	
	June 29, 2010	June 30, 2009	June 29, 2010	June 30, 2009
Numerator:				
Net income for basic and diluted net income per share	\$ 6,334	\$ 4,389	\$ 10,684	\$ 8,148
Denominator:				
Weighted average shares outstanding basic	27,041	26,739	26,957	26,736
Effect of dilutive common stock equivalents	922	389	895	281
Weighted average shares outstanding diluted	27,963	27,128	27,852	27,017

For the thirteen weeks ended June 29, 2010 and June 30, 2009, there were approximately 40,000 and 517,000 stock options outstanding, respectively, whereby the exercise price exceeded the average common stock market value. For the twenty-six weeks ended June 29, 2010 and June 30, 2009, there were approximately 100,000 and 850,000 stock options outstanding, respectively, whereby the exercise price exceeded the average common stock market value. The effects of the shares which would be issued upon the exercise of these options have been excluded from the calculation of diluted net income per share because they are anti-dilutive.

6. RELATED PARTY

As of June 29, 2010, we believe that Jacmar Companies and their affiliates (collectively referred to herein as Jacmar) owned approximately 14.1% of our outstanding common stock. Jacmar, through its specialty wholesale food distributorship, is currently our largest supplier of food, beverage and paper products servicing our restaurants in California and Nevada, while other system distributors service our restaurants in all other states. We also believe that Jacmar is the controlling shareholder of the Shakey's pizza parlor chain. We believe that Jacmar sells products to us at prices comparable to those offered by unrelated third parties based on our extensive competitive bidding process that resulted in three-year agreements in July 2006 and July 2009. Jacmar supplied us with approximately \$29.2 million and \$25.1 million of food, beverage, paper products and supplies for the twenty-six weeks ended June 29, 2010 and June 30, 2009, respectively. These costs represent 25.2% and 25.9% of our total cost of sales and operating and occupancy costs for the twenty-six weeks ended June 29, 2010 and June 30, 2009, respectively. We had trade payables related to these products of approximately \$1.8 million and \$3.5 million at June 29, 2010 and June 30, 2009, respectively. Jacmar does not provide us with any produce, liquor, wine or beer products, all of which are provided by other vendors and included in total cost of sales.

7. STOCK-BASED COMPENSATION

We have two stock-based compensation plans—the 2005 Equity Incentive Plan and the 1996 Stock Option Plan—under which we may issue shares of our common stock to employees, officers, directors and consultants. Upon effectiveness of the 2005 Equity Incentive Plan, the 1996 Stock Option Plan was closed for purposes of new grants and the remaining available shares for grant, including those shares related to option awards forfeited or terminated without exercise under the 1996 Stock Option Plan, accrue to the 2005 Equity Incentive Plan. Both of these plans have been approved by our shareholders. Under the 2005 Equity Incentive Plan, we have granted incentive stock options, non-qualified stock options, and restricted stock units.

Table of Contents

On June 8, 2010, at our annual shareholder meeting, our shareholders approved an amended 2005 Equity Incentive Plan which, among other things, (i) increased the number of shares available for issuance by 1,200,000 shares, (ii) changed the fungible ratio on restricted stock awards from 2:1 to 1.5:1, (iii) extended the termination date of the 2005 Equity Incentive Plan to ten years following the date of approval by the shareholders, and (iv) made certain other administrative changes.

Substantially all of our restaurant general managers, executive kitchen managers, regional kitchen operations managers, directors of operations, area vice presidents and certain brewery operations positions are eligible to participate in our equity-based incentive program called the BJ's Gold Standard Stock Ownership Program (the GSSOP) under our 2005 Equity Incentive Plan. The GSSOP is a longer-term equity incentive program that utilizes Company restricted stock units (RSUs). The GSSOP is dependent on each participant's extended service with us in their respective positions and their achievement of certain agreed-upon performance objectives during that service period (i.e., five years).

Since 2008, we have issued RSUs as a component of the annual equity grant award to officers and other employees. Under our 2005 Equity Incentive Plan we have issued approximately 636,000 RSUs as of June 29, 2010, for both the GSSOP program and as part of the annual equity grant awards. The fair value of the RSUs is the quoted market value of our common stock on the date of grant. The fair value of each RSU is expensed over the period during which its related restrictions are expected to lapse (i.e., generally five years). Stock options generally vest at 20% per year or cliff vest, either ratably in years three through five or 100% in year five and expire ten years from date of grant. RSUs generally vest at 20% per year for other RSU grantees and generally cliff vest at 100% after five years for GSSOP participants.

We account for equity grants under these plans in accordance with the fair value recognition provisions required by generally accepted accounting principles using the modified-prospective-transition method. Compensation expense recognized in the twenty-six weeks ended June 29, 2010 and June 30, 2009, include (a) compensation expense for all share-based payments granted prior to, but not yet vested as of January 4, 2006, based on the grant date fair value estimated in accordance with the original provisions and (b) compensation expense for all share-based payments granted subsequent to January 4, 2006, based on their grant date fair value-estimates in accordance with the revised provisions under generally accepted accounting principles.

The following table presents information related to stock-based compensation (in thousands):

	For The Thirteen Weeks Ended		For The Twenty-Six Weeks Ended	
	June 29, 2010	June 30, 2009	June 29, 2010	June 30, 2009
Labor and benefits stock-based compensation	\$ 205	\$ 228	\$ 431	\$ 501
General and administrative stock-based compensation	\$ 739	\$ 601	\$ 1,517	\$ 1,207
Capitalized stock-based compensation (1)	\$ 44	\$ 39	\$ 90	\$ 96

(1) Capitalized stock-based compensation is included in Property and equipment, net on the Consolidated Balance Sheets.
Stock Options

The exercise price of the stock options under the Company's stock-based compensation plans shall be equal to or exceed 100% of the fair market value of the shares at the date of option grant. Stock options generally vest at 20% per year or cliff vest, either ratably in years three through five or 100% in year five and expire ten years from date of grant. Stock option activity during the twenty-six weeks ended June 29, 2010, was as follows:

Table of Contents

	Options Outstanding		Options Exercisable	
	Shares (in thousands)	Weighted Average Exercise Price	Shares (in thousands)	Weighted Average Exercise Price
Outstanding options at December 29, 2009	2,267	\$15.21	1,497	\$15.32
Granted	500	\$19.11		
Exercised	(275)	\$11.35		
Forfeited	(39)	\$15.99		
Expired	(170)	\$19.38		
Outstanding options at June 29, 2010	2,283	\$16.21	1,260	\$15.69

The fair value of each stock option grant issued is estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

	For the Twenty-Six Weeks Ended	
	June 29, 2010	June 30, 2009
Expected volatility	34.2%	81.4%
Risk free interest rate	2.6%	1.6%
Expected option life	5 years	5 years
Dividend yield	0%	0%
Fair value of options granted	\$6.58	\$7.03

Generally accepted accounting principles require us to make certain assumptions and judgments regarding the grant date fair value. These judgments include expected volatility, risk free interest rate, expected option life, dividend yield and vesting percentage. These estimations and judgments are determined by us using many different variables that, in many cases, are outside of our control. The changes in these variables or trends, including stock price volatility and risk free interest rate, may significantly impact the grant date fair value resulting in a significant impact to our financial results. As of June 29, 2010, total unrecognized stock based compensation expense related to non-vested stock options was \$5.0 million, which is expected to be generally recognized over the remaining five years.

Restricted Stock Units

Restricted stock unit activity during the twenty-six weeks ended June 29, 2010, was as follows:

	Shares	Weighted
	(in thousands)	Average Fair Value
Outstanding RSUs at December 29, 2009	650	\$14.77
Granted	59	\$23.12
Vested or released	(36)	\$12.88
Forfeited	(37)	\$14.69
Outstanding RSUs at June 29, 2010	636	\$15.64

The fair value of the RSUs is the quoted market value of the Company's common stock on the date of grant. The fair value of each RSU is expensed over the period during which the restrictions are expected to lapse (i.e., five years). The Company recorded stock-based compensation expense related to RSUs of approximately \$742,000 during the twenty-six weeks ended June 29, 2010. In addition, total unrecognized stock-based compensation expense related to non-vested RSUs was \$5.1 million, which is expected to be generally recognized over the remaining five years.

Table of Contents

8. INCOME TAXES

We utilize the liability method of accounting for income taxes. Deferred income taxes are recognized based on the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year-end based on enacted tax laws and statutory tax rates applicable to the periods in which differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized. The provision for income taxes represents the tax payable for the period and the change during the period in deferred tax assets and liabilities.

We recognize the impact of a tax position in our consolidated financial statements if that position is more likely than not of being sustained on audit, based on the technical merits of the position. Interest and penalties related to uncertain tax positions are included in income tax expense.

As of June 29, 2010, a partial valuation allowance of approximately \$0.2 million, net of taxes, was established as a result of the capital loss realized on the sale of our auction rate securities investments, since we would only be able to use this deferred tax asset to offset future capital gains. Although we did realize a short-term capital gain of approximately \$0.7 million, net of taxes, related to the sale-leaseback of a property for construction of a new restaurant during the thirteen weeks ended June 29, 2010, this had no impact on the valuation allowance previously established. In addition, we did not have any capital gains within the three year carryback window, nor do we currently expect to have capital gains sufficient to remove the valuation allowance in its entirety.

9. DIVIDEND POLICY AND STOCK REPURCHASES

We have not paid any cash dividends since our inception and have currently not allocated any funds for the payment of dividends. Rather, it is our current policy to retain earnings, if any, for expansion of our restaurant and brewing operations, remodeling of existing restaurants and other general corporate purposes. We have no plans to pay any cash dividends in the foreseeable future. Should we decide to pay cash dividends in the future, such payments would be at the discretion of the Board of Directors. We did not have any stock repurchases during the twenty-six weeks ended June 29, 2010.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

STATEMENT REGARDING FORWARD-LOOKING DISCLOSURE

Certain information included in this Form 10-Q and other materials filed or to be filed by us with the Securities and Exchange Commission (as well as information included in oral or written statements made by us or on our behalf), may contain forward-looking statements about our current and expected performance trends, growth plans, business goals and other matters. These statements may be contained in our filings with the Securities and Exchange Commission, in our press releases, in other written communications, and in oral statements made by or with the approval of one of our authorized officers. Words or phrases such as believe, plan, will likely result, expect, intend, will continue, is an estimate, project, may, could, would, should, and similar expressions are intended to identify forward-looking statements. These statements and any other statements that are not historical facts, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, as codified in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended from time to time (the Act). The cautionary statements made in this Form 10-Q should be read as being applicable to all related forward-looking statements wherever they appear in this Form 10-Q.

The following discussion and analysis should be read in conjunction with our consolidated financial statements and notes thereto included elsewhere in this Form 10-Q. Except for the historical information contained herein, the discussion in this Form 10-Q contains certain forward-looking statements that involve known and unknown risks and uncertainties, such as statements of our plans, objectives, expectations and intentions. The risks described in this Form 10-Q, as well as the risks identified in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 29, 2009, are not the only risks we face. New risks and uncertainties arise from time to time and we cannot predict those events or how they may affect us. There may be other risks and uncertainties that are not currently known, or that are currently deemed by us to be immaterial, that may ultimately adversely affect our

Table of Contents

business, financial condition and/or operating results. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, our actual results may vary materially from forward-looking statements described in this document. These forward-looking statements include, among others, statements concerning:

our restaurant concept, its competitive advantages and our strategies for its continued evolution and expansion;

the rate and scope of our planned future restaurant development;

anticipated dates on which we will commence or complete development of new restaurants;

expectations as to the timing and success of the planned expansion of our contract brewing strategy;

expectations for consumer spending on casual dining restaurant occasions in general;

expectations as to the availability and costs of key commodities used in our restaurants and brewing operations;

expectations as to our menu price increases and their effect, if any, on revenue and results of operations;

expectations as to the effectiveness of our planned operational, menu and marketing initiatives;

expectations as to our capital requirements and actual or available borrowings on our line of credit;

expectations as to our future revenues, operating costs and expenses; and,

other statements of expectations, beliefs, future plans and strategies, anticipated developments and other matters that are not historical facts.

These forward-looking statements are subject to risks and uncertainties, including financial, regulatory, consumer behavior, demographic, industry growth and trend projections, that could cause actual events or results to differ materially from those expressed or implied by the statements. Significant factors that could prevent us from achieving our stated goals include, but are not limited to:

Deterioration in general economic conditions may affect consumer spending and may adversely affect our revenues, operating results and liquidity.

If we do not successfully expand our restaurant operations, our growth rate and results of operations would be adversely affected.

Edgar Filing: BJs RESTAURANTS INC - Form 10-Q

Our ability to open new restaurants on schedule in accordance with our projected growth rate may be adversely affected by delays or problems associated with securing suitable restaurant locations and leases and by other factors, some of which are beyond our control and the timing of which is difficult to forecast accurately.

Access to sources of capital and our ability to raise capital in the future may be limited, which could adversely affect our business and our expansion plans.

Deterioration in general economic conditions could have a material adverse impact on our landlords or on businesses neighboring our locations, which could adversely affect our revenues and results of operations.

Any failure of our existing or new restaurants to achieve expected results could have a negative impact on our consolidated sales and financial results, including a potential impairment of the long-lived assets of certain restaurants.

Table of Contents

Our growth may strain our infrastructure and resources, which could slow our development of new restaurants and adversely affect our ability to manage our existing restaurants.

Our decision to either reduce or accelerate the pace of openings may positively or adversely affect our comparative financial performance.

Our future operating results may fluctuate significantly due to our relatively small number of existing restaurants and the expenses required to open new restaurants.

A significant number of our restaurants are concentrated in California and other Western states, which make us particularly sensitive to economic, regulatory, weather and other risk factors and conditions that are more prevalent in those states.

Our operations are susceptible to changes in our food and supply costs, which could adversely affect our profitability.

Our increasing dependence on contract brewers could have an adverse effect on our operations if they cease to supply us with our proprietary beer.

Government laws and regulations affecting the operation of our restaurants, particularly those that apply to the acquisition and maintenance of our brewing and retail liquor licenses, could increase our operating costs and restrict our growth.

For a more detailed description of these risk factors and other considerations, see Part II, Item 1A Risk Factors of this Form 10-Q and the risk factors identified in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 29, 2009.

GENERAL

On July 30, 2010, we owned and operated 97 restaurants located in California, Texas, Arizona, Colorado, Oregon, Nevada, Florida, Ohio, Oklahoma, Kentucky, Indiana, Louisiana and Washington. Each of our restaurants is operated either as a BJ's Restaurant & Brewery® which includes a brewery within the restaurant, a BJ's Restaurant & Brewhouse® which receives the BJ's beer it sells from one of our breweries or an approved third-party craft brewer of our proprietary recipe beers (contract brewer), or a BJ's Pizza & Grill® which is a smaller format, full service restaurant. Our menu features our BJ's® award-winning, signature deep-dish pizza, our proprietary hand-crafted beers as well as a wide selection of appetizers, entrees, pastas, sandwiches, specialty salads and desserts, including our Pizookie® dessert. Four of our BJ's Restaurant & Brewery restaurants feature in-house brewing facilities where BJ's proprietary handcrafted beers are produced for many of our restaurants.

Our revenues are comprised of food and beverage sales at our restaurants. Revenues from restaurant sales are recognized when payment is tendered at the point of sale. Revenues from our gift cards are recognized upon redemption in our restaurants. Gift card breakage is recognized as other income on our Consolidated Statements of Income. Gift card breakage is recorded when the likelihood of the redemption of the gift cards becomes remote, which is typically after 24 months from original gift card issuance.

Cost of sales is comprised of food and beverage supplies. The components of cost of sales are variable and typically fluctuate directly with sales volumes. Labor and benefit costs include direct hourly and management wages, bonuses and payroll taxes and fringe benefits for restaurant employees.

Occupancy and operating expenses include restaurant supplies, credit card fees, marketing costs, fixed rent, percentage rent, common area maintenance charges, utilities, real estate taxes, repairs and maintenance and other related restaurant costs.

General and administrative costs include all corporate, field supervision and administrative functions that support existing operations and provide infrastructure to facilitate our future growth. Components of this category include corporate management, field supervision and corporate hourly staff salaries and related employee benefits (including

Table of Contents

stock-based compensation expense), travel and relocation costs, information systems, the cost to recruit and train new restaurant management employees, corporate rent and professional and consulting fees.

Depreciation and amortization principally include depreciation on capital expenditures for restaurants. Restaurant opening expenses, which are expensed as incurred, consist of the costs of hiring and training the initial hourly work force for each new restaurant, travel, the cost of food and supplies used in training, grand opening promotional costs, the cost of the initial stocking of operating supplies and other direct costs related to the opening of a restaurant, including rent during the construction and in-restaurant training period.

We currently have one small-format BJs Pizza and Grill restaurant lease that is scheduled to expire during the next six months, and we are currently evaluating the desirability of renewing that lease. While we currently expect to pursue the renewal of substantially all of our expiring restaurant leases, no guarantee can be given that such leases will be renewed or, if renewed, that rents will not increase substantially.

In calculating comparable company-owned restaurant sales, we include a restaurant in the comparable base once it has been open for 18 months. Guest traffic for our restaurants is estimated based on values assigned to certain menu items or individual guest tickets.

RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, our unaudited Consolidated Statements of Income expressed as percentages of total revenues. The results of operations for the twenty-six weeks ended June 29, 2010 and June 30, 2009, are not necessarily indicative of the results to be expected for the full fiscal year.

	For The Thirteen Weeks Ended		For The Twenty-Six Weeks Ended	
	June 29, 2010	June 30, 2009	June 29, 2010	June 30, 2009
Revenues	100.0%	100.0%	100.0%	100.0%
Costs and expenses:				
Cost of sales	24.3	24.9	24.5	24.9
Labor and benefits	34.6	34.7	35.1	35.1
Occupancy and operating	21.3	21.4	21.4	21.3
General and administrative	6.9	7.1	6.9	7.0
Depreciation and amortization	5.4	5.5	5.5	5.5
Restaurant opening	1.0	0.6	1.0	0.8
Loss on disposal of fixed assets	0.0	0.0	0.1	0.0
Total costs and expenses	93.5	94.2	94.5	94.6
Income from operations	6.5	5.8	5.5	5.4
Other income:				
Interest income	0.0	0.1	0.0	0.1
Interest expense	0.0	0.0	0.0	0.0
Other income, net	0.1	0.0	0.1	0.1
Total other income	0.1	0.1	0.1	0.2
Income before income taxes	6.6	5.9	5.6	5.6
Income tax expense	1.8	1.8	1.6	1.7
Net income	4.8%	4.1%	4.0%	3.9%

Thirteen Weeks Ended June 29, 2010, Compared to Thirteen Weeks Ended June 30, 2009.

Edgar Filing: BJs RESTAURANTS INC - Form 10-Q

Revenues. Total revenues increased by \$22.8 million, or 21.1%, to \$130.5 million during the thirteen weeks ended June 29, 2010, from \$107.7 million during the comparable thirteen week period of 2009. The \$22.8 million increase in revenues consisted of an increase of approximately \$17.4 million in restaurant sales from new restaurants not in our comparable restaurant sales base for the prior year, combined with an approximate \$5.4 million or 5.3% increase

Table of Contents

in comparable restaurant sales. The increase in comparable restaurant sales resulted from a slight increase in guest traffic, an estimated effective menu price increase factor of approximately 2.2% and a favorable menu mix shift.

Our restaurants, like most in casual dining, are impacted by inflationary pressures for the costs of certain commodities, labor and other operating expenses. We attempt to offset the impact of inflation on our cost structure with purchasing economies of scale, productivity and efficiency improvements, and menu price increases. However, if our guests do not accept our menu price increases, either by reducing their visits to our restaurants or by changing their purchasing patterns at our restaurants, the expected benefit of the menu price increase could be negated and our operating margins could be impacted. We currently expect our incremental menu price increases for fiscal 2010 to be in the range of 1.5% to 2.5% excluding the carryover impact of menu price increases taken during fiscal 2009. Additionally, to help protect guest traffic and to respond to the actions of our competitors, we may consider the promotion of selective menu offerings or introduce new menu offerings at reduced or lower price points which could have the effect of further reducing any benefit from menu price increases. As a relatively small casual dining restaurant chain, we do not have the financial resources to match the marketing and advertising spending levels of our larger casual dining competitors. Accordingly, increased marketing and advertising spending by our larger competitors may also adversely impact general levels of guest traffic in our restaurants. Furthermore, we believe that our guest traffic levels, among other items, will also be dependent upon consumer confidence, discretionary consumer spending and overall employment.

All potential menu price increases must be carefully considered in light of their ultimate acceptability by our restaurant guests. Additionally, other factors outside of our control, such as inclement weather, shifts in the holiday calendar, competitive restaurant intrusions into our trade areas, general economic and competitive conditions and other factors, as described in the Risk Factors section in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 29, 2009, can impact comparable sales comparisons. Accordingly, there can be no assurance that increases in comparable sales will be achieved as a result of increased menu prices or other factors.

Cost of Sales. Cost of sales increased by \$4.9 million, or 18.2%, to \$31.7 million during the thirteen weeks ended June 29, 2010, from \$26.8 million during the comparable thirteen week period of 2009. As a percentage of revenues, cost of sales decreased to 24.3% for the current thirteen week period from 24.9% for the prior year comparable thirteen week period. This decrease is primarily due to increased revenues from our estimated effective menu price increases, coupled with lower commodity costs principally for poultry.

We do anticipate that cost of sales in our new restaurants will typically be higher during the first several months of operations versus our mature restaurants, as our restaurant management teams require some time to become accustomed to optimally predicting, managing and servicing sales volumes at our new restaurants. Accordingly, a comparatively large number of new restaurant openings in any single quarter may significantly impact total cost of sales comparisons for our entire business. Additionally, restaurants opened in new markets may initially experience higher commodity costs than our established restaurants, where we have greater market penetration that generally results in improved purchasing and distribution economies of scale.

We provide our customers a large variety of menu items and therefore we are not overly dependent on a single group of commodities. While we do not currently expect the cost of our total commodity basket to increase significantly during fiscal 2010, there is always the risk that the overall cost environment for food commodities in general could become volatile during the remainder of 2010, primarily due to domestic and worldwide agricultural, supply/demand and other macroeconomic factors that are outside of our control. While we continue to work with our suppliers to control food costs and we have taken steps to enter into agreements for some of the commodities used in our restaurant operations, there can be no assurance that future supplies and costs for such commodities will not fluctuate due to weather and other market conditions outside of our control. Additionally, there are some commodities that we are unable to contract for long periods of time, such as fluid dairy items or certain commodity items where we have currently chosen not to contract for long period of time.

The cost to produce and distribute our proprietary beer is included in our cost of sales. We currently have qualified as many as four contract brewers to produce our high-quality, handcrafted beer and are currently using two of these contract brewers in fiscal 2010. We currently estimate our total proprietary beer requirement to be approximately 52,000 to 53,000 barrels for fiscal 2010, with over 60% of that requirement expected to be produced by contract brewers. Our longer-term objective is to have large contract brewers produce substantially all of our larger-volume beers. We currently expect to continue to create and brew our smaller-volume seasonal and specialty beers; however, we may eventually decide to also move the majority of this production to contract brewers as we continue

Table of Contents

to grow our restaurant base and therefore increase our demand for our proprietary beer. We believe the larger-scale contract brewers have greater economies of scale, stronger quality control systems and more effective, leverageable supply chain relationships than we have as a relatively small restaurant company. As a result, over the next several years, we expect that the production cost of our larger-volume proprietary beers can be gradually reduced, while simultaneously providing an improvement in the overall consistency of our beer. However, freight costs from our contract brewing locations will likely absorb a large portion of those production cost savings for a period of time until we can further increase the number of restaurants we operate and negotiate more favorable terms with our transportation vendors.

Labor and Benefits. Labor and benefit costs for our restaurants increased by \$7.7 million, or 20.5%, to \$45.1 million during the thirteen weeks ended June 29, 2010, from \$37.4 million during the comparable thirteen week period of 2009. This increase was primarily due to the opening of 11 new restaurants since the thirteen weeks ended June 29, 2009. As a percentage of revenues, labor and benefit costs decreased slightly to 34.6% for the current thirteen week period from 34.7% for the prior year comparable thirteen week period. This percentage decrease is primarily due to lower hourly labor as a percent of sales resulting from improved productivity and efficiency from increased comparable sales volumes, offset by higher management labor primarily due to improved management staffing levels, higher incentive compensation for our managers due to better than anticipated performance, and higher workers compensation costs. Included in labor and benefits for the thirteen weeks ended June 29, 2010 and June 30, 2009, is approximately \$205,000 and \$228,000, or 0.2% of revenues, respectively, of stock-based compensation expense related to restricted stock units granted in accordance with our Gold Standard Stock Ownership Program. See Note 7, Stock-Based Compensation, in this Form 10-Q.

Our restaurants can be affected by increases in federal and state minimum wages. Additionally, some states have annual minimum wage increases correlated with either state or federal increases in the consumer price index. In the past, we have been able to react to changes in our key operating costs, including minimum wage increases by gradually increasing our menu prices and improving our productivity in our restaurants. However, we cannot guarantee that all or any future cost increases can be offset by increased menu prices or that increased menu prices will be accepted by our restaurant guests without any resulting changes in their visit frequencies or purchasing patterns.

For new restaurants, labor expenses will typically be higher than normal during the first several months of operations until our restaurant management team at each new restaurant becomes more accustomed to optimally predicting, managing and servicing the sales volumes expected at our new restaurants. Accordingly, a comparatively large number of new restaurant openings in any single quarter may significantly impact labor cost comparisons for the entire Company.

Occupancy and Operating. Occupancy and operating expenses increased by \$4.7 million, or 20.5%, to \$27.9 million during the thirteen weeks ended June 29, 2010, from \$23.1 million during the comparable thirteen week period of 2009. The increase reflects additional operating and occupancy expenses related to 11 new restaurants opened since the thirteen weeks ended June 30, 2009. As a percentage of revenues, occupancy and operating expenses decreased slightly to 21.3% for the current thirteen week period from 21.4% for the prior year comparable thirteen week period. This percentage decrease is due to our ability to leverage the fixed component of these expenses as a result of higher comparable sales, partially offset by higher general liability insurance costs.

General and Administrative. General and administrative expenses increased by \$1.4 million, or 17.9%, to \$9.0 million during the thirteen weeks ended June 29, 2010, from \$7.6 million during the comparable thirteen week period of 2009. Included in general and administrative costs for the thirteen weeks ended June 29, 2010 and June 30, 2009, is \$739,000 and \$601,000, respectively, of stock-based compensation expense. The increase in general and administrative costs is primarily due to higher levels of recruiting and training costs related to our managers in training program and higher legal and consulting expenses. The increase in our manager in training program is directly related to the timing of new restaurant openings. In fiscal 2009, we opened one new restaurant on the last day of the second quarter, as compared to fiscal 2010, where we opened two new restaurants in the second quarter. As a percentage of revenues, general and administrative expenses decreased to 6.9% for the current thirteen week period from 7.1% for the prior year comparable thirteen week period. This percentage decrease is due to our ability to leverage the fixed component of these expenses as a result of higher comparable sales.

Depreciation and Amortization. Depreciation and amortization increased by \$1.1 million, or 19.3%, to \$7.0 million during the thirteen weeks ended June 29, 2010, from \$5.9 million during the comparable thirteen week period of

Table of Contents

2009. As a percentage of revenues, depreciation and amortization slightly decreased to 5.4% for the thirteen week period from 5.5% for the prior year comparable thirteen week period. This slight percentage decrease is primarily due to our ability to leverage the fixed nature of these costs as a result of higher comparable sales.

Restaurant Opening. Restaurant opening expense increased by \$0.6 million, or 87.5%, to \$1.3 million during the thirteen weeks ended June 29, 2010, from \$0.7 million during the comparable thirteen week period of 2009. Our opening costs will fluctuate from period to period, depending upon, but not limited to, the number of restaurant openings, the size and concept of the restaurants being opened, the location of the restaurants and the complexity of the staff hiring and training process. The increase in restaurant opening expenses is due to the fact that we opened two new restaurants in the second quarter of 2010, both in San Antonio, Texas, compared to one new restaurant opening on the last day of the comparable thirteen week period of 2009. Restaurant opening expenses may represent expenses associated with restaurants opened during the quarter as well as expenses related to restaurants opened towards the end of the prior quarter and restaurants opening in subsequent quarters. As of July 30, 2010, we have opened one additional restaurant to date and expect to open as many as three more restaurants during the third quarter of fiscal 2010 and as many as two new restaurants during the fourth quarter. The actual timing of restaurant openings is inherently difficult to precisely predict and is subject to weather conditions and other factors outside of our control, including factors that are under the control of the Company's landlords, municipalities and contractors.

Loss on Disposal of Assets. We did not have any significant fixed asset disposals during the second quarter of fiscal 2010 or fiscal 2009.

Interest Income. Interest income decreased to \$31,000 during the thirteen weeks ended June 29, 2010, from \$86,000 during the comparable thirteen week period of 2009. This decrease is primarily due to the lower interest rates and investment balances compared to the same thirteen week period of 2009.

Interest Expense. Interest expense increased to \$22,000 during the thirteen weeks ended June 29, 2010, from \$19,000 during the comparable thirteen week period of 2009. This slight increase is primarily due to additional interest paid on our letters of credit as compared to the prior year.

Other Income, Net. Net other income increased to \$108,000 during the thirteen weeks ended June 29, 2010, from \$47,000 during the comparable thirteen week period of 2009, an increase of \$61,000. This increase is due to increased income recognized from gift card breakage. Based on an analysis of our gift card program since its inception, we determined that 24 months after issuance date, the likelihood of gift card redemption is remote.

Income Tax Expense. Our effective income tax rate for the thirteen weeks ended June 29, 2010, was 27.0% compared to 30.5% for the comparable thirteen week period of 2009. The effective income tax rate for the thirteen weeks ended June 29, 2010, differs from the statutory income tax rate primarily due to FICA tip credits and the non-deductibility of incentive stock options that were granted prior to fiscal year 2005. We currently estimate our effective tax rate to be approximately 27.0% to 28.0% for fiscal 2010. However, the actual effective tax rate for fiscal 2010 may be different than our current estimate due to actual revenues, pre-tax income and tax credits achieved during the year.

Twenty-Six Weeks Ended June 29, 2010, Compared to Twenty-Six Weeks Ended June 30, 2009.

Revenues. Total revenues increased by \$42.0 million, or 20.0%, to \$252.2 million during the twenty-six weeks ended June 29, 2010, from \$210.2 million during the comparable twenty-six week period of 2009. The \$42.0 million increase in revenues consisted of an increase of approximately \$32.5 million in restaurant sales from new restaurants not in our comparable restaurant sales base for the prior year, combined with an approximate \$9.5 million or 4.9% increase in comparable restaurant sales. The increase in comparable restaurant sales resulted from increased guest traffic, an estimated effective menu price increase factor of approximately 1.8% and a favorable menu mix shift.

Cost of Sales. Cost of sales increased by \$9.5 million, or 18.2%, to \$61.8 million during the twenty-six weeks ended June 29, 2010, from \$52.3 million during the comparable twenty-six week period of 2009. As a percentage of revenues, cost of sales decreased to 24.5% for the current twenty-six week period from 24.9% for the prior year comparable twenty-six week period. This percentage decrease is primarily due to increased revenues from our estimated effective menu price increases and lower costs for poultry and certain soups, sauces and dressings.

Table of Contents

Labor and Benefits. Labor and benefit costs for our restaurants increased by \$14.8 million, or 20.1%, to \$88.5 million during the twenty-six weeks ended June 29, 2010, from \$73.7 million during the comparable twenty-six week period of 2009. This increase was primarily due to the opening of 11 new restaurants since the twenty-six weeks ended June 30, 2009. As a percentage of revenues, labor and benefit costs remained comparable at 35.1% for the current twenty-six week period and the prior year comparable twenty-six week period. Included in labor and benefits is approximately \$431,000 and \$501,000 related to our stock-based compensation plans for both the twenty-six weeks ended June 29, 2010 and June 30, 2009, respectively. See Note 7, "Stock-Based Compensation," in this Form 10-Q.

Occupancy and Operating. Occupancy and operating expenses increased by \$9.0 million, or 20.2%, to \$53.9 million during the twenty-six weeks ended June 29, 2010, from \$44.8 million during the comparable twenty-six week period of 2009. The increase reflects additional operating and occupancy expenses related to 11 new restaurants opened since the twenty-six weeks ended June 30, 2009. As a percentage of revenues, occupancy and operating expenses increased slightly to 21.4% for the twenty-six week period from 21.3% for the prior year comparable twenty-six week period. This slight percentage increase is principally a result of increased marketing costs related to our planned menu changes introduced during the first quarter, partially offset by our ability to leverage the fixed component of these expenses as a result of higher comparable sales.

General and Administrative. General and administrative expenses increased by \$2.7 million, or 18.3%, to \$17.4 million during the twenty-six weeks ended June 29, 2010, from \$14.7 million during the comparable twenty-six week period of 2009. Included in general and administrative costs for the twenty-six weeks ended June 29, 2010 and June 30, 2009, is \$1.5 million and \$1.2 million, respectively, of stock-based compensation expense. The increase in general and administrative costs is primarily due to higher levels of recruiting and training costs related to our managers in training program, coupled with higher legal and consulting expenses. As a percentage of revenues, general and administrative expenses decreased slightly to 6.9% for the current twenty-six week period from 7.0% for the prior year comparable twenty-six week period. This percentage decrease is due to our ability to leverage the fixed component of these expenses as a result of higher comparable sales.

Depreciation and Amortization. Depreciation and amortization increased by \$2.2 million, or 18.6%, to \$13.8 million during the twenty-six weeks ended June 29, 2010, from \$11.6 million during the comparable twenty-six week period of 2009. As a percentage of revenues, depreciation and amortization remained at 5.5% for the current twenty-six week period and the prior year comparable twenty-six week period. Depreciation and amortization increased as a result of our construction costs for new restaurants and depreciation on our new operating toolsets, restaurant remodels and initiatives.

Restaurant Opening. Restaurant opening expense increased by \$0.7 million, or 44.7%, to \$2.4 million during the twenty-six weeks ended June 29, 2010, from \$1.7 million during the comparable twenty-six week period of 2009. This increase is primarily due to opening costs related to four restaurant openings and six restaurants in-progress during the twenty-six weeks ended June 29, 2010, as compared to three restaurant openings and seven restaurants in-progress during the twenty-six weeks ended June 30, 2009. Restaurant opening expenses may represent expenses associated with restaurants opened during the quarter as well as expenses related to restaurants opened towards the end of the prior quarter and restaurants opening in subsequent quarters. Additionally, we also closed our BJ's Pizza & Grill restaurant, located in Huntington Beach, California, for an extensive remodel in late January and re-opened this restaurant in early February with our full menu offerings and a new bar operation. As a result, we incurred opening costs related to this remodel in order to properly train our team members on the new menu and beverage offerings.

Loss on Disposal of Assets. The loss on disposal of assets of approximately \$140,000 or 0.1% of revenues during the twenty-six weeks ended June 29, 2010, primarily relates to the expansion and remodeling of our BJ's Pizza & Grill restaurant in Huntington Beach, California. We did not have any significant fixed asset disposals during the twenty-six weeks ended June 30, 2009.

Interest Income. Interest income decreased by approximately \$135,000 or 69.2%, to \$60,000 during the twenty-six weeks ended June 29, 2010, from \$195,000 during the comparable twenty-six week period of 2009. This decrease is primarily due to lower interest rates and investment balances compared to the same period as last year.

Table of Contents

Interest Expense. Interest expense decreased to \$43,000 during the twenty-six weeks ended June 29, 2010, from \$52,000 during the comparable twenty-six week period of 2009. This decrease is primarily due to lower funded borrowings outstanding under our Line of Credit as compared to the same twenty-six week period of 2009.

Other Income, Net. Net other income increased to \$344,000 during the comparable twenty-six weeks ended June 29, 2010, from \$196,000 during the comparable twenty-six week period of 2009, an increase of \$148,000. This increase is primarily due to increased income recognized from gift card breakage. Based on an analysis of our gift card program since its inception, we determined that 24 months after issuance date, the likelihood of gift card redemption is remote.

Income Tax Expense. Our effective income tax rate for the twenty-six weeks ended June 29, 2010, was 27.0% compared to 30.3% for the comparable twenty-six week period of 2009. The effective income tax rate for the twenty-six weeks ended June 29, 2010, differs from the statutory income tax rate primarily due to anticipated FICA tip credits and the non-deductibility of incentive stock option compensation until the time of a disqualifying disposition.

LIQUIDITY AND CAPITAL RESOURCES

The following tables set forth, for the periods indicated, a summary of our key liquidity measurements (dollar amounts in thousands):

	June 29, 2010	December 29, 2009
Cash and short-term investments	\$32,707	\$44,906
Net working (deficit) capital	\$(2,789)	\$7,557
Current ratio	0.9:1.0	1.1:1.0
Non-current investments	\$6,185	\$

	For The Twenty-Six Weeks Ended	
	June 29, 2010	June 30, 2009
Cash provided by operating activities	\$27,391	\$26,234
Capital expenditures	\$32,097	\$21,687

Our fundamental corporate finance philosophy is to maintain a conservative balance sheet in order to support our long-term restaurant expansion plan with sufficient financial flexibility; to provide the financial resources necessary to protect and enhance the competitiveness of our restaurant and brewing operations; and, to provide a prudent level of financial capacity to manage the risks and uncertainties of conducting our business operations on a larger scale. In the past, we have obtained capital resources from our ongoing operations, public securities offerings, employee stock option exercises and tenant improvement allowances from our landlords. As an additional source of liquidity, we also have a \$45 million credit facility in place, of which no funded amounts were outstanding as of June 29, 2010.

Our capital requirements are principally related to our restaurant expansion plans. While our ability to achieve our growth plans is dependent on a variety of factors, some of which are outside of our control, our primary growth objective is to achieve an approximate 13% increase in total restaurant operating weeks during fiscal 2010 from the development and opening of new restaurants, coupled with the carryover impact of partial-year 2009 openings. Our base of established restaurant operations is not yet large enough to sufficiently generate enough cash flow from operations to totally fund our planned expansion at the rate that it is currently contemplated over the longer run. Accordingly, we will continue to actively monitor overall conditions in the capital markets with respect to the potential sources and timing of additional financing for our planned future expansion. However, there can be no assurance that such financing will be available when required or available on terms acceptable to us. If we are unable to secure additional capital resources, we may be required to reduce our longer-term planned rate of expansion.

Similar to many restaurant chains, we typically utilize operating lease arrangements (principally ground leases) for the majority of our restaurant locations. We believe our operating lease arrangements continue to provide

Table of Contents

appropriate leverage for our capital structure in a financially efficient manner. However, we are not limited to the use of lease arrangements as our only method of opening new restaurants. While our operating lease obligations are not currently required to be reflected as indebtedness on our Consolidated Balance Sheets, the minimum rents and other related lease obligations, such as common area expenses, under our lease agreements must be satisfied by cash flows from our ongoing operations. Accordingly, our lease arrangements reduce, to some extent, our capacity to utilize funded indebtedness in our capital structure. We also require capital resources to maintain our existing base of restaurants and brewery operations and to further expand and strengthen the capabilities of our corporate and information technology infrastructures. Our requirement for working capital is not significant since our restaurant guests pay for their food and beverage purchases in cash or credit cards at the time of the sale. Thus, we are able to sell many of our inventory items before we have to pay our suppliers for such items.

We typically seek to lease our restaurant locations for primary periods of 15 to 20 years under operating lease arrangements. Our rent structures vary from lease to lease, but generally provide for the payment of both minimum and contingent (percentage) rent based on sales, as well as other expenses related to the leases (for example, our pro-rata share of common area maintenance, property tax and insurance expenses). In addition, many of our lease arrangements include the opportunity to secure tenant improvement allowances to partially offset the cost of developing and opening the related restaurants. Generally, landlords recover the cost of such allowances from increased minimum rents. We currently expect to secure approximately \$6 million of committed tenant improvement allowances for our planned 2010 new restaurant openings. However, in light of current conditions in the credit and real estate development markets, there can be no assurance that such allowances will continue to be available to us or will be available for every location that we desire to develop into a restaurant. From time to time, we may also decide to purchase the underlying land for a new restaurant if that is the only way to secure a highly desirable site. Currently, we own the land that underlies four of our restaurants, and we may determine at some future point to monetize those assets through a sale-leaseback or other financial transaction. We disburse cash for certain site-related work, buildings, leasehold improvements, furnishings, fixtures and equipment to build out our leased and owned premises. We own substantially all of the equipment, furniture and trade fixtures in our restaurants and currently plan to do so in the future.

Our cash flows from operating activities, as detailed in the Consolidated Statements of Cash Flows, provided \$27.4 million of net cash during the twenty-six weeks ended June 29, 2010, representing a \$1.2 million increase from the \$26.2 million provided by during the comparable twenty-six week period of 2009. The increase in cash from operating activities for the twenty-six weeks ended June 29, 2010, in comparison to twenty-six weeks ended June 30, 2009, is primarily due to the increase in net income and higher depreciation expense as a result of more restaurants, coupled with increased accounts and other receivables and tenant improvement allowance collections, offset by increased accrued expense and other liability payments.

For the twenty-six weeks ended June 29, 2010, total capital expenditures were approximately \$32.1 million, of which expenditures for the acquisition of restaurant and brewery equipment and leasehold improvements to construct new restaurants were \$20.8 million. These expenditures were primarily related to the construction of our new restaurants in Fort Worth, Texas, Escondido, California and two restaurants in San Antonio, Texas, which opened during the twenty-six weeks ended June 29, 2010, as well as expenditures related to additional restaurants expected to open in the third and fourth quarters of 2010. In addition, total capital expenditures related to the enhancement and maintenance of existing restaurants and expenditures for restaurant and corporate systems were \$11.1 million and \$0.2 million, respectively.

We filed a shelf registration statement on Form S-3 with the U.S. Securities and Exchange Commission (SEC) on January 7, 2010. The statement was declared effective by the SEC on January 28, 2010, and permits us to raise capital from time to time through the offer and sale of various types of securities not to exceed an aggregate value of \$75 million. We do not have any immediate intentions or commitments to sell securities. The terms of any future offering of securities would be established at the time of such offering subject to market conditions. Any offering of securities covered by the shelf registration statement will be made only by means of a written prospectus and prospectus supplement. In addition, the Form S-3 also included the registration of 3,801,730 shares of common stock previously acquired by certain shareholders from the Company in various transactions several years ago. We have registered those shares to fulfill our contractual obligations under a registration rights agreement with those shareholders.

We have a \$45 million unsecured revolving line of credit with a major financial institution (the Line of Credit). The Line of Credit expires on September 30, 2012, and may be used for working capital and other general corporate purposes. We expect to utilize the Line of Credit principally for letters of credit that are required to support certain

Table of Contents

of our self insurance programs and for working capital and construction requirements as needed. As of June 29, 2010, there were no borrowings outstanding under the Line of Credit and there were outstanding letters of credit totaling approximately \$3.6 million. Any borrowings under the Line of Credit will bear interest at the financial institution's prime rate or at LIBOR plus a percentage not to exceed 1.375% based on a Lease Adjusted Leverage Ratio as defined in the Line of Credit agreement. The Line of Credit agreement also requires compliance with a Fixed Charge Coverage Ratio, a Lease Adjusted Leverage Ratio and certain non-financial covenants. At June 29, 2010, we were in compliance with these covenants. Any interest on the Line of Credit will be payable quarterly and all related borrowings must be repaid on or before September 30, 2012. While we have the Line of Credit in place and it can be currently drawn upon, it is possible that creditors could place limitations or restrictions on the ability of borrowers in general to draw on existing credit facilities. At this time, however, we have no indication that any such limitations or restrictions are likely to occur.

Our capital expenditures during 2010 will continue to be significant as we currently plan to open as many as 10 new restaurants during fiscal 2010, in addition to expending funds for our necessary maintenance and key initiatives. As of July 30, 2010, we have entered into ten signed leases or purchase agreements for potential new restaurants, and we expect to enter into additional leases for new restaurant locations. We currently anticipate our capital expenditures for fiscal 2010, excluding any construction contributions we may receive from landlords, to be approximately \$60 million to \$65 million related to the construction of new restaurants, the reinvestment in some of our existing restaurants, as well as normal maintenance capital expenditures, and the investment in toolsets and support infrastructure. We expect to fund our expected capital expenditures for fiscal 2010 with current cash and investment balances, cash flow from operations and landlord contributions. During fiscal 2010, we are currently expecting to obtain approximately \$6 million of landlord construction contributions. Our future cash requirements will depend on many factors, including the pace of expansion, real estate markets, construction costs, the specific sites selected for new restaurants, and the nature of the lease and associated financing arrangements negotiated with landlords.

On April 16, 2009, General Growth Properties, Inc. (GGP) announced that it was voluntarily seeking relief to reduce and restructure its debts under Chapter 11 of the United States Bankruptcy Code (Chapter 11 filing). Included in its bankruptcy filing are approximately 158 regional shopping centers owned by GGP and certain other GGP subsidiaries. GGP stated that it intends to work with its constituencies to emerge from bankruptcy as quickly as possible and that the day-to-day operations and business of all of our shopping centers and other properties will continue as usual. We currently operate six restaurants in GGP properties that were included in their Chapter 11 filing. We currently do not have any outstanding landlord allowances from GGP. However, as of June 29, 2010, we have one outstanding tenant improvement allowances from a different landlord in the amount of \$1.2 million for one of our restaurants. Our restaurant lease allows us to offset or reduce our rent payable in the event that our tenant improvement allowances cannot be collected, as agreed upon in our leases. We do not believe that this matter will have a material impact on our overall liquidity. We may also pursue other legal remedies in this respect.

During December 2009, we reached a confidential settlement agreement for the full liquidation of our auction rate securities (ARS) investment portfolio with our former broker-dealer for the portfolio. Under the terms of the settlement, we received approximately \$27.4 million in cash (including accrued interest) in exchange for the entire remaining ARS investment portfolio and recorded a pre-tax loss on investment settlement of approximately \$1.7 million. In addition, the settlement provides us with the potential for additional recoveries, depending upon the performance of the ARS market during the next three years. The cash received in conjunction with the settlement was invested in various institutional money market funds as of fiscal year end December 29, 2009. As of June 29, 2010, our cash and cash equivalents and investments included money market funds, treasury bills, agency bonds and domestic corporate obligations totaling approximately \$38.9 million, of which \$22.4 million was considered cash and cash equivalents and included with current assets on our Consolidated Balance Sheet as of June 29, 2010.

We currently believe that our projected cash flow from operations, cash and investment balances, agreed-upon tenant improvement allowances and our \$45 million credit facility, should be sufficient, in the aggregate, to finance our planned capital expenditures and other operating activities through the next 12 months. Our base of established restaurant operations is not yet large enough to sufficiently generate enough cash flow from operations to totally fund our planned expansion at the rate that it is currently contemplated over the long run. Accordingly, we will continue to actively monitor overall conditions in the capital markets with respect to the potential sources and timing of additional financing for our planned future expansion. However, there can be no assurance that such financing will be available when required or available on terms acceptable to us. If we are unable to secure additional capital resources, we may be required to reduce our longer-term planned rate of expansion.

Table of Contents

OFF-BALANCE SHEET ARRANGEMENTS

We do not participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or variable interest entities (VIEs), which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow limited purposes. As of June 29, 2010, we are not involved in any off-balance sheet arrangements.

IMPACT OF INFLATION

Our profitability is dependent, among other things, on our ability to anticipate and react to changes in the costs of key operating resources, including food and other raw materials, labor, energy and other supplies and services. Substantial increases in costs and expenses could impact our operating results to the extent that such increases cannot be passed along to our restaurant guests. While we have taken steps to enter into agreements for some of the commodities used in our restaurant operations, there can be no assurance that future supplies and costs for such commodities will not fluctuate due to weather and other market conditions outside of our control. We are currently unable to contract for many of our fresh commodities such as produce and fluid dairy items for long periods of time. Consequently, such commodities can be subject to unforeseen supply and cost fluctuations. The impact of inflation on food, labor, energy and occupancy costs can significantly affect the profitability of our restaurant operations.

Many of our restaurant employees are paid hourly rates related to the federal minimum wage. In fiscal 2007, Congress enacted an increase in the federal minimum wage implemented in three phases, beginning in fiscal 2007 and concluding in fiscal 2009. Furthermore, some states have annual minimum wage increases correlated with either state or federal increases in the consumer price index. Additionally, a general shortage in the availability of qualified restaurant management and hourly workers in certain geographical areas in which we operate has caused related increases in the costs of recruiting and compensating such employees. Certain operating costs, such as taxes, insurance and other outside services continue to increase with the general level of inflation or higher and may also be subject to other cost and supply fluctuations outside of our control.

While we have been able to partially offset inflation and other changes in the costs of key operating resources by gradually increasing prices for our menu items, coupled with more efficient purchasing practices, productivity improvements and greater economies of scale, there can be no assurance that we will be able to continue to do so in the future. From time to time, competitive conditions could limit our menu pricing flexibility. In addition, macroeconomic conditions that impact consumer discretionary spending for food away from home could make additional menu price increases imprudent. There can be no assurance that all of our future cost increases can be offset by higher menu prices, or that higher menu prices will be accepted by our restaurant guests without any resulting changes in their visit frequencies or purchasing patterns. Many of the leases for our restaurants provide for contingent rent obligations based on a percentage of sales. As a result, rent expense will absorb a proportionate share of any menu price increases in our restaurants. There can be no assurance that we will continue to generate increases in comparable restaurant sales in amounts sufficient to offset inflationary or other cost pressures.

SEASONALITY AND ADVERSE WEATHER

Our business is subject to seasonal fluctuations. Our results of operations have historically been impacted by seasonality, which directly impacts tourism at our coastal California locations. The summer months (June through August) have traditionally been higher volume periods than other periods of the year. Additionally, since 2007, we have opened new restaurants beyond the West Coast and Texas to other Midwest and Eastern states. Accordingly, these restaurants will be impacted by weather and other seasonal factors that typically impact other restaurant operations in those regions. Holidays (and shifts in the holiday calendar), severe winter weather, hurricanes, thunderstorms and similar conditions may impact restaurant sales volumes seasonally in some of the markets where we operate. Many of our restaurants are located in or near shopping centers and malls that typically experience seasonal fluctuations in sales. Quarterly results have been and will continue to be significantly impacted by the timing of new restaurant openings and their associated restaurant opening expenses. As a result of these and other factors, our financial results for any given quarter may not be indicative of the results that may be achieved for a full fiscal year.

CRITICAL ACCOUNTING POLICIES

Critical accounting policies require the greatest amount of subjective or complex judgments by management and are important to portraying our financial condition and results of operations. Judgments or uncertainties regarding the

Table of Contents

application of these policies may result in materially different amounts being reported under different conditions or using different assumptions. We consider the following policies to be the most critical in understanding the judgments that are involved in preparing our consolidated financial statements.

Fair Value of Investments and Cash Equivalents

We measure the fair value of our investments using quoted market prices in active markets. All of our investments are currently classified as held-to-maturity, included as short-term and non-current investments in the Consolidated Balance Sheets and reported at amortized cost with related gains and losses reflected in earnings in accordance with generally accepted accounting principles.

We believe the carrying value of cash equivalents approximates fair value because of the short-term nature of those instruments.

Property and Equipment

We record all property and equipment at cost. Property and equipment accounting requires estimates of the useful lives for the assets for depreciation purposes and selection of depreciation methods. We believe the useful lives reflect the actual economic life of the underlying assets. We have elected to use the straight-line method of depreciation over the estimated useful life of an asset or the primary lease term of the respective lease, whichever is shorter. Renewals and betterments that materially extend the useful life of an asset are capitalized while maintenance and repair costs are charged to operations as incurred. Judgment is often required in the decision to distinguish between an asset which qualifies for capitalization versus an expenditure which is for maintenance and repairs. When property and equipment are sold or otherwise disposed of, the asset account and related accumulated depreciation and amortization accounts are relieved, and any gain or loss is included in earnings. Additionally, interest capitalized for new restaurant construction is included in Property and equipment, net on the Consolidated Balance Sheets.

Impairment of Long-Lived Assets

We assess potential impairments of our long-lived assets whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. Factors considered include, but are not limited to, significant underperformance relative to expected historical or projected future operating results; significant changes in the manner of use of the acquired assets or the strategy for the overall business; and, significant negative industry or economic trends. The recoverability is assessed in most cases by comparing the carrying value of the asset to the undiscounted cash flows expected to be generated by the asset. This assessment process requires the use of estimates and assumptions regarding future cash flows and estimated useful lives, which are subject to a significant degree of judgment. If these assumptions change in the future, we may be required to record impairment charges for these assets. As of June 29, 2010, no other than temporary impairment indicators have been identified.

Self Insurance Liability

We are self-insured for a portion of our employee workers' compensation program and general liability insurance. We maintain coverage with a third party insurer to limit our total exposure for these programs. The accrued liability associated with these programs are based on our estimate of the ultimate costs to settle known claims as well as claims incurred but not yet reported to us (IBNR claims) as of the balance sheet date. Our estimated liability is based on information provided by a third party actuarial firm combined with our judgments regarding a number of assumptions and factors, including the frequency and severity of claims, our claims development history, case jurisdiction, related legislation, and our claims settlement practice. Significant judgment is required to estimate IBNR claims as parties have yet to assert such claims. If actual claims trends, including the severity or frequency of claims, differ from our estimates, our financial results could be significantly impacted.

Income Taxes

We provide for income taxes based on our estimate of federal and state tax liabilities. Our estimates include, but are not limited to, effective state and local income tax rates, allowable tax credits for items such as FICA taxes paid on reported tip income and estimates related to depreciation expense allowable for tax purposes. We usually file our income tax returns several months after our fiscal year-end. We file our tax returns with the advice and consultation

Table of Contents

of tax consultants. All tax returns are subject to audit by federal and state governments, usually years after the returns are filed, and could be subject to differing interpretation of the tax laws.

Deferred tax accounting requires that we evaluate net deferred tax assets to determine if these assets will more likely than not be realized in the foreseeable future. This test requires projection of our taxable income into future years to determine if there will be taxable income sufficient to realize the tax assets (future tax deductions and FICA tax credit carryforwards). The preparation of the projections requires considerable judgment and is subject to change to reflect future events and changes in the tax laws.

The accounting for uncertainty in tax positions requires that we recognize the impact of a tax position in our consolidated financial statements if that position is more likely than not of being sustained on audit, based on the technical merits of the position. We recognize interest and penalties related to uncertain tax positions in income tax expense. As of June 29, 2010, unrecognized tax benefits recorded was approximately \$144,000.

Leases

We lease the majority of our restaurant locations. We account for our leases in accordance with generally accepted accounting principles, which require that our leases be evaluated and classified as operating or capital leases for financial reporting purposes. The term used for this evaluation includes renewal option periods only in instances in which the exercise of the renewal option can be reasonably assured and failure to exercise such option would result in an economic penalty. All of our restaurant leases are classified as operating leases. We disburse cash for leasehold improvements, furniture and fixtures and equipment to build out and equip our leased premises. Tenant improvement allowance incentives may be available to partially offset the cost of developing and opening the related restaurants, pursuant to agreed-upon terms in our leases. Tenant improvement allowances can take the form of cash payments upon the opening of the related restaurants, full or partial credits against minimum or percentage rents otherwise payable by us or a combination thereof. All tenant improvement allowances received by us are recorded as a deferred rent obligation and amortized over the term of the lease. The related cash received from the landlord is reflected as Landlord contribution for tenant improvements, net within operating activities of our Consolidated Statements of Cash Flows.

The lease term used for straight-line rent expense is calculated from the date we obtain possession of the leased premises through the lease termination date. We expense rent from possession date through restaurant open date as preopening expense. Once a restaurant opens for business, we record straight-line rent over the lease term plus contingent rent to the extent it exceeded the minimum rent obligation per the lease agreement.

There is potential for variability in the rent holiday period, which begins on the possession date and ends on the restaurant open date, during which no cash rent payments are typically due under the terms of the lease. Factors that may affect the length of the rent holiday period generally relate to construction related delays. Extension of the rent holiday period due to delays in restaurant opening will result in greater preopening rent expense recognized during the rent holiday period and lesser occupancy expense during the rest of the lease term (post-opening).

For leases that contain rent escalations, we record the total rent payable during the lease term, as determined above, on the straight-line basis over the term of the lease (including the rent holiday period beginning upon our possession of the premises), and record the difference between the minimum rents paid and the straight-line rent as a lease obligation. Certain leases contain provisions that require additional rental payments based upon restaurant sales volume (contingent rentals). Contingent rentals are accrued each period as the liabilities are incurred, in addition to the straight-line rent expense noted above. This results in some variability in occupancy expense as a percentage of revenues over the term of the lease in restaurants where we pay contingent rent.

Management makes judgments regarding the probable term for each restaurant property lease, which can impact the classification and accounting for a lease as capital or operating, the rent holiday and/or escalations in payments that are taken into consideration when calculating straight-line rent and the term over which leasehold improvements for each restaurant are amortized. These judgments may produce materially different amounts of depreciation, amortization and rent expense than would be reported if different assumed lease terms were used.

Stock-based Compensation

Table of Contents

We have two stock-based compensation plans – the 2005 Equity Incentive Plan and the 1996 Stock Option Plan – under which we may issue shares of our common stock to employees, officers, directors and consultants. Upon effectiveness of the 2005 Equity Incentive Plan, the 1996 Stock Option Plan was closed for purposes of new grants. Both of these plans have been approved by our shareholders. Under the 2005 Equity Incentive Plan, we have granted incentive stock options, non-qualified stock options, and restricted stock units. Stock options generally vest at 20% per year or cliff vest, either ratably in years three through five or 100% in year five and expire ten years from date of grant.

Beginning in 2007, substantially all of our restaurant general managers, executive kitchen managers, regional kitchen operations managers, directors of operations, area vice presidents and certain brewery operations positions became eligible to participate in our equity-based incentive program called the BJ's Gold Standard Stock Ownership Program (the "GSSOP") under our 2005 Equity Incentive Plan. The GSSOP is a longer-term equity incentive program that utilizes Company restricted stock units ("RSUs"). The GSSOP is dependent on each participant's extended service with us in their respective positions (five years) and their achievement of certain agreed-upon performance objectives during that service period.

In 2008, we also began issuing RSUs as a component of the annual equity grant award to officers and other employees. These grants are non-GSSOP grants. Under our 2005 Equity Incentive Plan we have issued approximately 636,000 RSUs as of June 29, 2010, including both GSSOP and non-GSSOP grants. The fair value of the RSUs is the quoted market value of our common stock on the date of grant. The fair value of each RSU is expensed over the period during which its related restrictions are expected to lapse (i.e., generally five years). RSUs generally vest at 20% per year for other RSU grantees and generally cliff vest at 100% after five years for GSSOP participants.

We account for these plans in accordance with generally accepted accounting principles under the fair value recognition provisions, using the modified-prospective-transition method. Compensation expense recognized in the twenty-six weeks ended June 29, 2010 and June 30, 2009, include: (a) compensation expense for all share-based payments granted prior to, but not yet vested as of January 4, 2006, based on the grant date fair value estimated in accordance with the original provisions and (b) compensation expense for all share-based payments granted subsequent to January 4, 2006, based on the grant date fair value estimated in accordance with the revised provisions under generally accepted accounting principles. We are required to make certain assumptions and judgments regarding the grant date fair value. These judgments include expected volatility, risk free interest rate, expected option life, dividend yield and vesting percentage. These estimations and judgments are determined by us using many different variables that, in many cases, are outside of our control. The changes in these variables or trends, including stock price volatility and risk free interest rate, may significantly impact the grant date fair value resulting in a significant impact to our financial results. The cash flow tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) are required to be classified as financing cash flows.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The following discussion of market risks contains forward-looking statements. Actual results may differ materially from the following discussion based on general conditions in the financial and commodity markets.

Our market risk exposures are related to cash and cash equivalents and investments. We invest our excess cash in highly liquid short-term investments with maturities of two years or less as of the date of purchase. These investments are not held for trading or other speculative purposes. Changes in interest rates affect the investment income we earn on our investments and, therefore, impact our cash flows and results of operations. For the twenty-six weeks ended June 29, 2010, the average interest rate earned on cash and cash equivalents and investments was approximately 0.3%. As of June 29, 2010, our cash and cash equivalents and investments consisted of money market funds, treasury bills, agency bonds and domestic corporate obligations with a cost or fair value of approximately \$38.9 million, of which \$22.4 million are considered cash equivalents. Cash may be in excess of FDIC insurance limits. The majority of our investments, both short-term and long-term, are AAA-rated and directly or indirectly guaranteed by the U.S. Government. We believe we are not exposed to significant risk on cash and cash equivalents and investments. The fair market value of our investments is subject to interest rate risk and would decline in value if market interest rates increased. If market interest rates were to increase immediately and uniformly by 10% from the levels existing as of June 29, 2010, the decline in the fair value of the portfolio would not be material to our financial position, results of operations and cash flows.

Table of Contents

We purchase food and other commodities for use in our operations based upon market prices established with our suppliers. Many of the commodities purchased by us can be subject to volatility due to market supply and demand factors outside of our control, whether contracted for or not. To manage this risk in part, we attempt to enter into fixed-price purchase commitments, with terms typically up to one year, for many of our commodity requirements. However, it may not be possible for us to enter into fixed-price contracts for certain commodities or we may choose not to enter into fixed-price contracts for certain commodities. Dairy costs can also fluctuate due to government regulation. We believe that substantially all of our food and supplies are available from several sources, which helps to diversify our overall commodity cost risk. We also believe that we have some flexibility and ability to increase certain menu prices, or vary certain menu items offered, in response to food commodity price increases. Some of our commodity purchase arrangements may contain contractual features that limit the price paid by establishing certain price floors or caps. We do not use financial instruments to hedge commodity prices, since our purchase arrangements with suppliers, to the extent that we can enter into such arrangements, help control the ultimate cost that we pay.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 promulgated under the Securities Exchange Act of 1934 as amended, as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting

There has not been any change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our second fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

We are subject to a number of private lawsuits, administrative proceedings and claims that arise in the ordinary course of our business. These claims typically involve claims from guests, employees and others related to operational issues common to the foodservice industry. A number of these claims may exist at any given time. We believe that most of our guest claims will be covered by our general liability insurance, subject to certain deductibles and coverage limits. Punitive damages awards and employee unfair practice claims, however, are not covered by our general liability insurance. To date, we have not paid punitive damages with respect to any claims, but there can be no assurance that punitive damages will not be awarded with respect to any future claims, employee unfair practice claims or any other actions. We could be affected by adverse publicity resulting from allegations in lawsuits, claims and proceedings, regardless of whether these allegations are valid or whether we are ultimately determined to be liable. We currently believe that the final disposition of these types of lawsuits, proceedings and claims will not have a material adverse effect on our financial position, results of operations or liquidity. It is possible, however, that our future results of operations for a particular quarter or fiscal year could be impacted by changes in circumstances relating to lawsuits, proceedings or claims.

The following paragraphs describe certain legal actions recently settled or pending:

Labor Related Matters

On February 5, 2004, a former employee of ours, on behalf of herself, and allegedly other employees, filed a class action complaint in Los Angeles County, California, Superior Court, and on March 16, 2004, filed an amended complaint, alleging causes of action for: (1) failure to pay reporting time minimum pay; (2) failure to allow meal breaks; (3) failure to allow rest breaks; (4) waiting time penalties; (5) civil penalties; (6) reimbursement for fraud and deceit; (7) punitive damages for fraud and deceit; and, (8) disgorgement of illicit profits. On June 28, 2004, the plaintiff stipulated to dismiss her second, third, fourth and fifth causes of action. During September 2004, the plaintiff stipulated to binding arbitration of the action. On March 2, 2008, and on March 19, 2008, one of Plaintiff's attorneys filed a notice with the California Labor and Workforce Development Agency, alleging failure to keep

Table of Contents

adequate pay records and to pay Plaintiff minimum wage. To our knowledge, the Agency has not responded to either of these notices. In November 2008, the parties agreed to settle this matter subject to final approval from the arbitrator and confirmation from the court. The approval hearing is currently scheduled for September 2010. The terms of this proposed settlement are not considered by us to be material to our consolidated financial position.

On April 6, 2009, an employee filed a class action complaint in Orange County, California, Superior Court on behalf of himself and allegedly other employees. The complaint alleges causes of action for failure to pay plaintiff and other alleged class members regular wages and overtime pay, failure to maintain the designated wage scale and secret payment of lower wages, the greater of actual damages or penalties for failure to provide accurate wage statements, and restitution of wages and injunction for violation of California Business and Professions Code. The complaint also seeks interest, attorneys' fees and costs. In February 2010, the parties agreed in principle to settle this case, subject to approval of the court. The terms of this proposed settlement are not considered by us to be material to our consolidated financial position.

On February 4, 2009, an employee, on behalf of himself and allegedly other employees filed a class action complaint in Fresno County, California, Superior Court, which complaint was served on us in the second quarter of 2009. The complaint alleges causes of action for failure to pay wages for on-call time, for violation of California Business and Professional Code and for penalties for unpaid wages. The complaint also seeks a constructive trust on money found unlawfully acquired, an injunction against failure to pay wages, restitution, interest, attorney's fees and costs. On August 14, 2009, a first amended complaint was filed, in which two other employees joined the action as plaintiffs. The parties are engaged in discovery, we have filed an answer to the amended complaint, and we intend to vigorously defend our position in this action.

On August 25, 2009, a former employee of ours filed a lawsuit in Los Angeles County, California, Superior Court, on behalf of himself and allegedly other employees, namely our California restaurant assistant managers, kitchen managers and managers. The complaint alleges our California restaurant assistant managers are not exempt for compensation purposes and alleges causes of action for failure to pay overtime wages, failure to provide meal breaks and rest periods, failure to pay wages timely, penalties for unpaid wages, failure to provide accurate wage statements, failure to keep accurate payroll records and for violation of California Business and Professions Code. The complaint also seeks unspecified damages, restitution, an injunction against unfair practices, interest, attorneys' fees and costs. In October 2009, plaintiff filed an amended complaint, alleging the class to be all California assistant kitchen managers, kitchen managers, and managers and adding to plaintiff's claims for penalties alleged to be due under the California Labor Code Private Attorneys General Act. On October 8, 2009, plaintiff's attorneys filed a notice with the California Labor and Workforce Development Agency, alleging failure by us to pay overtime wages, failure to provide meal breaks and rest periods, failure to pay wages due on plaintiff's and other employees' termination, failure to pay wages timely, failure to provide accurate wage statements and failure to keep accurate payroll records. On December 8, 2009, the Agency responded that it does not intend to investigate the allegations. Discovery has begun. In January 2010, on our motion, the Court ordered the venue of the case moved to Orange County. In May 2010, the plaintiff filed a second amended complaint, alleging, in addition to the previous allegations, failure to reimburse class members for business expenses and seeking penalties for the alleged failure. We have not yet responded to the second amended complaint but intend to vigorously defend our position in this action.

Item 1A. RISK FACTORS

A discussion of the significant risks associated with investments in our securities, as well as other matters, are set forth in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 29, 2009. There have been no material changes in the risks related to us from those disclosed in such Annual Report. These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the SEC. The risks described in this Form 10-Q are not the only risks we face. New risks and uncertainties arise from time to time and we cannot predict those events or how they may affect us. There may be other risks and uncertainties that are not currently known, or that are currently deemed by us to be immaterial, that may ultimately adversely affect our business, financial condition and/or operating results.
