Consolidated Financial Results

April 1, 2010 September 30, 2010

November 2, 2010

In preparing its consolidated financial information, ORIX Corporation and its subsidiaries have complied with accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.

U.S. Dollar amounts have been calculated at Yen 83.82 to \$1.00, the approximate exchange rate prevailing at September 30, 2010.

These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under Risk Factors in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission.

The Company believes that it will be considered a passive foreign investment company for United States Federal income tax purpose in the year to which these consolidated financial results relate and for the foreseeable future by reason of the composition of its assets and the nature of its income. A U.S. holder of the shares or ADSs of the Company is therefore subject to special rules generally intended to eliminate any benefits from the deferral of U.S. Federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

Economic Environment

The global economy is in the process of a moderate recovery. However, recovery is occurring at different speeds in different countries. Developing economies continue to expand steadily and stock prices are rising. Conversely, proactive monetary easing continues in advanced economies, but economic improvement is lackluster.

Although concerns over a double dip in the U.S. economy have eased, the economy is showing signs of a gradual slowdown. Unemployment rates continue to increase, housing investment remains low and consumer sentiment is weak.

Emerging economies in the Asian region continue to experience stable growth. Particularly in China, the economy is expanding centered on domestic demand, yet there is opposition toward Europe and U.S. policies concerning the renminbi and exports, the impact of which requires attention.

In Japan, the government has downgraded its overall assessment of the economy stating that it is at a standstill in its October monthly economic report. Corporate earnings are improving and capital expenditure is increasing, but the rapid appreciation of the yen and lingering concerns of a global economic slowdown have resulted in a cautious future outlook.

Overview of Business Performance (April 1, 2010 to September 30, 2010)

Revenues for the six-month period ended September 30, 2010 (hereinafter the second consolidated period) increased 4% to ¥481,874 million compared to ¥461,741 million during the same period of the previous fiscal year. Due to the application of new accounting standards starting in this fiscal year relating to the consolidation of variable interest entities (VIEs) (see page 7), VIEs that have become subject to consolidation have increased, and as a result, interest on loans and investment securities increased compared to the same period of the previous fiscal year. In addition, life insurance premiums and related investment income increased compared to the same period of the previous fiscal year due to strong sales of medical insurance to retail customers and increased investment income.

Expenses were flat year on year at ¥435,241 million. In line with the application of the above-mentioned new accounting standards, interest expense increased compared to the same period of the previous fiscal year. However, compared to the same period of the previous fiscal year, provision for doubtful receivables and probable loan losses decreased significantly and selling, general and administrative expenses decreased as a result of the deconsolidation of ORIX Credit Corporation and ORIX Securities Corporation.

Equity in net income (loss) of affiliates was a gain of ¥5,988 million for the second consolidated period mainly due to contributions from equity method affiliates in the Asian region, compared to the same period of the previous fiscal year when a loss of ¥4,538 million was recorded as a result of an affiliate filing for protection under the Corporate Rehabilitation Law. In addition, gains (losses) on sales of subsidiaries and affiliates and liquidation losses, net decreased due to the absence of a gain on the sale of ORIX Credit Corporation that was recorded in the same period of

Edgar Filing: ORIX CORP - Form 6-K

the previous fiscal year.

As a result of the foregoing, income before income taxes and discontinued operations increased 132% to ¥52,960 million compared to ¥22,832 million during the same period of the previous fiscal year, and net income attributable to ORIX Corporation rose 69% to ¥34,053 million from ¥20,150 million during the same period of the previous fiscal year.

- 1 -

Table of Contents

Segment Information

All segments maintained profitability during the second consolidated period.

Beginning this fiscal year, the Company changed the way it measures its segment assets and segment revenues related to certain VIEs which are consolidated in accordance with the above-mentioned new accounting standards as a result of the Company's management changing its internal performance assessment measures to manage its segments.

In addition, in line with a change of management classification, Internet Research Institute, Inc. and ORIX's Information and Communication Technology Department, which were previously included in the Corporate Financial Services segment, have been included in the Investment Banking segment and Maintenance Leasing segment, respectively.

Due to these changes, the reclassified figures are shown for the second consolidated period and the fiscal year ended March 31, 2010 (See page 12, Segment Information).

Segment information for the second consolidated period is as follows:

Corporate Financial Services Segment

This segment is involved in lending, leasing, commission business for the sale of financial products, and environment-related businesses.

Segment revenues were flat at ¥50,435 million compared to ¥50,111 million during the same period of the previous fiscal year. This is due to a decrease in installment loan revenues in line with a decrease in the average balance of installment loans as a result of restrictions of new loan executions from the previous fiscal year offsetting second consolidated period increases in investment in direct financing leases from the purchase of Sun Telephone Co., Ltd.'s leasing receivables and the purchase of Tsukuba Lease Co., Ltd., as well as increased revenues from the environment-related business.

Segment expenses decreased compared to the same period of the previous fiscal year, resulting from a decrease in provisions for doubtful receivables and probable loan losses.

As a result, segment profits were ¥4,933 million compared to a loss of ¥9,413 million in the same period of the previous fiscal year.

Segment assets decreased 8% to ¥1,088,198 million compared to March 31, 2010, due to a decline in the balance of installment loans offsetting an increase in investment in direct financing leases from the purchase of leasing receivables and new, small-sized leasing transactions.

Maintenance Leasing Segment

This segment consists of automobile and rental operations. The automobile operations are comprised of automobile leasing, rentals and car sharing. The rental operations are comprised of leasing and rental of precision measuring equipment and IT-related equipment.

Despite the absence of signs of a full-fledged recovery of domestic capital expenditure and the otherwise bleak business environment outlook, the Maintenance Leasing segment revenues have remained stable through the provision of high value-added services responding to such demands as corporations' needs to reduce costs.

Segment revenues remained robust at ¥112,511 million compared to ¥114,221 million during the same period of the previous fiscal year due to solid revenues from the sales of used automobiles and automobile maintenance despite decreases in the average balance of investment in direct finance and operating leases.

Segment expenses decreased compared to the same period of the previous fiscal year, due to a decrease in depreciation expense as a result of a year on year decrease in the average balance of operating lease assets and a decrease in interest expense.

As a result, segment profits increased 21% to ¥14,041 million compared to ¥11,616 million during the same period of the previous fiscal year.

Edgar Filing: ORIX CORP - Form 6-K

Segment assets increased 3% to ¥531,905 million compared to March 31, 2010 due to an increase in direct finance and operating lease assets.

- 2 -

Table of Contents

Real Estate Segment

This segment consists of development and rental of commercial real estate and office buildings, condominium development and sales, hotel, golf course, and training facility operation, senior housing development and management, REIT asset management, and real estate investment and advisory services.

The condominium market is in the process of a moderate recovery with the monthly number of units supplied in both the Tokyo metropolitan and Kinki areas exceeding that of the same months of the previous fiscal year and the contract completion rate has surpassed the key benchmark level of 70%. The number of condominiums delivered by the Company decreased to 412 units during the second consolidated period from 726 units during the same period of the previous fiscal year due to previous limitations on new developments. However, the number of units delivered increased by 309 units from the first consolidated fiscal period.

In the office building market, there are signs of a slight decline in urban area vacancy rates and the decline in rental rates is slowing to a halt. However, it still cannot be said that the market is at the bottom as the market recognizes the future supply of large-scale buildings. Although sales of real estate under operating leases are below pre-crisis levels, they are on an increasing trend. In this environment, the real estate investment business is pursuing a policy of making appropriate assets sales based on real demand.

Operating asset revenues were stable despite seasonal factors such as increased demand at hotels and Japanese inns and a decrease in golf course patronage due to the exceptionally hot summer.

Segment revenues decreased 14% to ¥82,770 million compared to ¥95,940 million during the same period of the previous fiscal year due to a decrease in the number of condominiums delivered and the absence of a gain on the sale of a large building under operating lease that was recorded during the same period of the previous fiscal year. Although segment expenses similarly declined, segment profits decreased 65% to ¥3,799 million compared to ¥10,728 million during the same period of the previous fiscal year.

Segment assets remained flat at ¥1,071,433 million compared to March 31, 2010.

Investment Banking Segment

This segment consists of real estate finance, commercial real estate asset securitization, loan servicing (asset recovery), principal investment, M&A advisory, venture capital, and securities brokerage.

Segment revenues increased 13% to ¥52,313 million compared to ¥46,409 million during the same period of the previous fiscal year, due to increased installment loan revenues from collections from the loan servicing (asset recovery) business and increased revenues from operating leases from an increase in real estate under operating leases, despite a 13% year-on-year decline in the average balances of installment loans and investment in securities (including specified bonds).

Segment expenses were flat year-on-year due to decreases in selling, general and administrative expenses and provisions for doubtful receivables and probable loan losses, despite a year-on-year increase in write-downs of securities.

Equity in net income (loss) of affiliates recorded a profit during the second consolidated period, whereas a loss was recorded during the first consolidated period of the previous fiscal year due to an affiliate filing for protection under the Corporate Rehabilitation Law.

As a result, segment profits were ¥4,258 million compared to a loss of ¥14,394 million in the same period of the previous fiscal year.

Segment assets were down 5% to ¥1,019,565 million, compared to March 31, 2010 due to decreases in the balances of installment loans and investment in securities (including specified bonds).

Retail Segment

Edgar Filing: ORIX CORP - Form 6-K

This segment consists of the life insurance operations, the trust and banking business, and the card loan and the online securities brokerage businesses operated by affiliates.

In the life insurance business, insurance-related gains and insurance-related investment income improved due to an increase in contracts.

- 3 -

Table of Contents

Installment loans increased in the trust and banking business due to increased corporate lending, contributing to increased revenues and improved profits. Also, Internet-based deposits increased steadily, and assets have surpassed 1 trillion yen.

Segment revenues and expenses from the card loan and online securities brokerage business are recognized as segment profits under equity in net income (loss) of affiliates due to the share transfer and share exchange of the card loan and online securities brokerage businesses, respectively, during the previous consolidated fiscal year. Furthermore, a gain on the sale of a subsidiary was recognized for the card loan business during the second consolidated period of the previous fiscal year.

As a result, segment revenues decreased 8% to ¥75,237 million compared to ¥81,686 million during the same period of the previous fiscal year. However, segment profits increased 2% to ¥15,175 million compared to ¥14,820 million during the same period of the previous fiscal year due to decreased segment expenses, mainly lower selling, general and administrative expenses and decreased provisions for doubtful receivables and probable loan losses.

Segment assets increased 3% to ¥1,627,935 million compared to March 31, 2010 as a result of an increase in investment securities and an increase in installment loans in the trust and banking business.

Overseas Business Segment

This segment consists of leasing, lending, investment in bonds, investment banking, real estate-related operations, and ship- and aircraft-related operations in the U.S., Asia, Oceania and Europe.

The U.S. is experiencing a slowdown of economic recovery despite a decreasing trend in financial institutions' cost of credit, as the housing market remains stagnant and unemployment continues to hover at a high rate. Conversely, strong growth in the Asian region is expected to continue.

Segment revenues decreased 5% to ¥83,897 million compared to ¥88,039 million during the same period of the previous fiscal year. In the U.S., fee income from investment banking operations has remained stable, and gains were recorded for the sales of municipal bonds and RED CAPITAL GROUP loans. However, revenues decreased as gains on investment securities decreased and the average balance of investment in operating and direct financing leases decreased compared to the same period of the previous fiscal year.

Segment expenses decreased due to decreases in the cost of operating leases, interest expense and provisions for doubtful receivables and probable loan losses and write-downs of securities in the U.S., despite an increase in selling, general and administrative expense from corporate acquisitions in the U.S. As a result, segment profits increased 5% to ¥22,478 million compared to ¥21,489 million during the same period of the previous fiscal year.

Segment assets decreased 8% to ¥788,856 million compared to March 31, 2010, mainly due to the effects of an appreciated yen and the sale of municipal bonds.

Table of Contents**2. Qualitative Information Regarding Consolidated Financial Condition****Financial Condition**

		Fiscal Period Ended September 30, 2010	Fiscal Year Ended March 31, 2010	Change	Year on Year Change
Total Assets	(millions of yen)	8,643,758	7,739,800	903,958	12%
(Segment Assets)		6,127,892	6,284,275	(156,383)	(2%)
Total Liabilities	(millions of yen)	7,320,218	6,395,244	924,974	14%
(Long- and Short-term Debt)		5,283,804	4,409,835	873,969	20%
(Deposits)		920,765	853,269	67,496	8%
Shareholders' Equity	(millions of yen)	1,279,800	1,298,684	(18,884)	(1%)
Shareholders' Equity Per Share	(yen)	11,906.55	12,082.56	(176.01)	(1%)

* Note: Shareholders' Equity refers to ORIX Corporation Shareholders' Equity.

Total assets increased 12% to ¥8,643,758 million compared to ¥7,739,800 million on March 31, 2010. Installment loans and investment in direct financing leases increased due to the application of new accounting standards in this fiscal year relating to consolidation of VIEs (see page 7). Segment assets were down 2% to ¥6,127,892 million, compared to March 31, 2010.

Regarding liabilities, the application of the new accounting standards with respect to VIEs and the issuance of straight bonds (including U.S. dollar-denominated bonds) resulted in an increase in long-term debt compared to March 31, 2010. Furthermore, deposits have increased in accordance with business expansion into corporate lending in the trust and banking business.

Shareholders' equity decreased 1% to ¥1,279,800 million compared to March 31, 2010 due to a decrease in accumulated other comprehensive income (loss) such as net change of foreign currency translation adjustment.

Summary of Cash Flows

Cash and cash equivalents increased by ¥109,922 million to ¥749,009 million compared to March 31, 2010.

Cash flows from operating activities provided ¥109,214 million during the second consolidated period, having provided ¥100,973 million during the same period of the previous fiscal year, resulting from an increase in net income compared to the same period of the previous fiscal year, an increase in sales of trading securities, in addition to the adjustment of net income such as depreciation and amortization, provision for doubtful receivables and probable loan losses and equity in net income (loss) of affiliates (excluding interest on loans).

Cash flows from investing activities provided ¥134,527 million during the second consolidated period, having provided ¥352,351 million during the same period of the previous fiscal year, due to an increase in purchases of lease equipment and a decrease in sales of subsidiaries, net of cash disposed.

Cash flows from financing activities used ¥126,442 million during the second consolidated period, having used ¥319,130 million during the same period of the previous fiscal year, due to the amount of funding raised exceeding the repayment of borrowing, despite a decrease in the amount of funding raised due to the absence of a new stock issuance during the same period of the previous fiscal year.

Table of Contents

3. Qualitative Information Regarding Forecasts for Consolidated Financial Results

Financial Highlights for the Fiscal Year Ending March 31, 2011

The global economy is in the process of a gradual recovery. However, the impact of new and impending financial regulations in the U.S., the spread of fiscal uncertainty in Europe, the revaluation of China's renminbi and the sudden appreciation of the yen in Japan remain as risk factors. Based on the operating environment described above and measures described further below, ORIX's forecast for the fiscal year ending March 31, 2011 is as follows:

ORIX forecasts total revenues of ¥920,000 million (down 1.1% year on year) for the fiscal year ending March 31, 2011 due to the effects of the change in status of the card loan and online securities brokerage businesses to equity-method affiliates.

Net income attributable to ORIX Corporation of ¥57,000 million (up 51% year on year) is forecasted, aiming to achieve profitability in all segments. Segment profits forecasts are as follows:

The Corporate Financial Services segment is expected to return to profitability due to enhancing Finance + Services and an expanded corporate client base in addition to decreased provision for doubtful receivables and probable loan losses and selling, general and administrative expenses.

Maintenance Leasing segment profits are forecasted to increase year on year through an expanded service menu and enhanced group-wide cross functional collaboration, despite the severe operating environment with decreased demand for corporate capital expenditure.

Real Estate segment profits are forecasted to be flat year on year through improved rental property yield and improved profitability of the housing-related business.

The Investment Banking segment is expected to return to profitability through capitalizing on the servicer function and promoting investments and also due to the minimal risk of significant losses from major investments.

Retail segment profits are forecasted to decrease due to gains on sales of subsidiaries recognized during the fiscal year ended March 31, 2010. Excluding these gains, profits are forecasted to increase due to increased profits from the enhanced new product lineup of the life insurance business and expanded corporate loans by the trust and banking business. This segment is positioned as an important segment in a growth stage, aiming for further expansion.

U.S. operations will expand Finance + Services utilizing sophisticated expertise and also expand business operations through measures such as M&A. Profit in the Asia and Oceania region is forecasted to increase by embracing economic growth in the Asian region. As a result, the Overseas Business segment is forecasted to maintain a high-level of profit as a whole.

Although forward-looking statements in this document such as forecasts are attributable to current information available to the Company as well as on assumptions deemed reasonable, actual financial results may differ materially due to various factors. Therefore, readers are urged not to place undue reliance on these figures.

Various factors causing these figures to differ materially are discussed, but not limited to, those described under Risk Factors in the Form 20-F submitted to the U.S. Securities and Exchange Commission.

(1) Changes in Significant Consolidated Subsidiaries

There is no corresponding item.

(2) Adoption of Simplified Accounting Method

There is no corresponding item.

(3) Changes in Accounting Principles, Procedures and Disclosures

Effective April 1, 2010, the Company and its subsidiaries adopted FASB Statement No. 166 (Accounting for Transfers of Financial Assets an amendment of FASB Statement No.140), which was codified by Accounting Standards Update 2009-16 (ASC860 (Transfers and Servicing)). This Update eliminates the concept of a qualifying special-purpose entity and therefore also eliminates the exception to ASC 810-10 (Consolidation-Variable Interest Entities) that formerly applied to variable interest entities deemed to be qualifying special-purpose entities. This Update also modifies the financial-components approach used in ASC 860 and limits the circumstances in which a transferor derecognizes a portion or component of a financial asset.

Effective April 1, 2010, the Company and its subsidiaries adopted FASB Statement No. 167 (Amendment of FASB Interpretation No.46(R)), which was codified by Accounting Standards Update 2009-17 (ASC810 (Consolidation)). This Update eliminates the exception to applying FIN 46(R) (ASC 810-10) with respect to variable interest entities deemed to be qualifying special-purpose entities and requires an enterprise to perform qualitative analysis to identify the primary beneficiary. An enterprise that has both of the following characteristics is considered to be primary beneficiary and must consolidate a variable interest entity:

The power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance; and
The obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity.

Additionally, this Update requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity.

The effect of the Updates on the Company and its subsidiaries' financial conditions at the initial adoption date is an increase of ¥1,147 billion in total assets, an increase of ¥1,169 billion in total liabilities and a decrease of ¥22 billion in retained earnings, net of tax, respectively, in the consolidated balance sheets.

Although our total assets and liabilities are expected to increase through the consolidation of the VIEs described above, the net cash flow and economic effects of our investments in these entities have not changed. In addition, the creditors of the liabilities of the consolidated VIEs have no recourse to other assets of the Company and its subsidiaries.

Consolidated Amounts	461,741	22,832	481,874	52,960	5,749	631	7,739,800	8,643,758	103,123

Note 1: The Company evaluates the performance of segments based on income before income taxes and discontinued operations, adjusted for results of discontinued operations and net income attributable to the noncontrolling interests before applicable tax effect. Tax expenses are not included in segment profits.

Note 2: From this fiscal year, the Company changed the measure of its segment assets and segment revenues related to certain variable interest entities (VIEs) which are consolidated in accordance with ASC 810-10 (Consolidations-Variable Interest Entities) since the Company's management changed its internal performance assessment measures to manage its segments. Among consolidated VIEs, for certain VIEs, such as those used for securitization, in which VIE's assets can be used only to settle related obligations and the creditors do not have recourse to other assets of the Company or its subsidiaries, segment assets are measured based on an amount of the Company and its subsidiaries' net investments in VIEs, which are different from the amount of total assets of the consolidated VIEs, and segment revenues are measured at a net amount of the VIEs' revenues corresponding to its investments in VIEs.

In addition, in line with a review of management classification, Internet Research Institute, Inc. and ORIX's Information and Communication Technology Department, which were previously included in the Corporate Financial Services segment, have been included in the Investment Banking segment and Maintenance Leasing segment, respectively.

Due to these changes, the reclassified figures are shown for the second consolidated period and the fiscal year ended March 31, 2010.
