NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1: Summary of Significant Accounting Policies

Principles of Consolidation: The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) for interim financial reporting and with applicable quarterly reporting regulations of the Securities and Exchange Commission (the SEC). They do not include all of the information and notes required by U.S. GAAP for complete financial statements. Therefore, these consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the C&F Financial Corporation Annual Report on Form 10-K for the year ended December 31, 2009.

The unaudited consolidated financial statements include the accounts of C&F Financial Corporation (the Corporation) and its wholly-owned subsidiary, Citizens and Farmers Bank (the Bank or C&F Bank). All significant intercompany accounts and transactions have been eliminated in consolidation. In addition, C&F Financial Corporation owns C&F Financial Statutory Trust I and C&F Financial Statutory Trust II, which are unconsolidated subsidiaries. The subordinated debt owed to these trusts is reported as a liability of the Corporation.

Nature of Operations: The Corporation is a bank holding company incorporated under the laws of the Commonwealth of Virginia. The Corporation owns all of the stock of its subsidiary, C&F Bank, which is an independent commercial bank chartered under the laws of the Commonwealth of Virginia. The Bank and its subsidiaries offer a wide range of banking and related financial services to both individuals and businesses.

The Bank has five wholly-owned subsidiaries: C&F Mortgage Corporation and Subsidiaries (C&F Mortgage), C&F Finance Company (C&F Finance), C&F Title Agency, Inc., C&F Investment Services, Inc. and C&F Insurance Services, Inc., all incorporated under the laws of the Commonwealth of Virginia. C&F Mortgage, organized in September 1995, was formed to originate and sell residential mortgages and through its subsidiaries, Hometown Settlement Services LLC and Certified Appraisals LLC, provides ancillary mortgage loan production services, such as loan settlements, title searches and residential appraisals. C&F Finance, acquired on September 1, 2002, is a regional finance company providing automobile loans. C&F Title Agency, Inc., organized in October 1992, primarily sells title insurance to the mortgage loan customers of the Bank and C&F Mortgage. C&F Investment Services, Inc., organized in April 1995, is a full-service brokerage firm offering a comprehensive range of investment services. C&F Insurance Services, Inc., organized in July 1999, owns an equity interest in an insurance agency that sells insurance products to customers of the Bank, C&F Mortgage and other financial institutions that have an equity interest in the agency. Business segment data is presented in Note 6.

Basis of Presentation: The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, the allowance for indemnifications, impairment of loans, impairment of securities, the valuation of other real estate owned, the projected benefit obligation under the cash balance pension plan, the valuation of deferred taxes, the valuation of derivative financial instruments and goodwill impairment. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, which are necessary for a fair presentation of the results of operations in these financial statements, have been made. Certain reclassifications have been made to prior period amounts to conform to the current period presentation.

Share-Based Compensation: Compensation expense for the third quarter and first nine months of 2010 included \$71,000 (\$44,000 after tax) and \$265,000 (\$165,000 after tax), respectively, for restricted stock granted since 2006. As of September 30, 2010, there was \$877,000 of total unrecognized compensation expense related to unvested restricted stock that will be recognized over the remaining requisite service periods.

Stock option activity for the nine months ended September 30, 2010 and stock options outstanding as of September 30, 2010 are summarized below:

Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

Cancelled	(1,550)	\$ 31.40
Unvested, September 30, 2010	70,475	\$ 26.85

Derivative Financial Instruments: The Corporation recognizes derivative financial instruments at fair value as either an other asset or other liability in the consolidated balance sheet. The derivative financial instruments have been designated as and qualify as cash flow hedges. The effective portion of the gain or loss on cash flow hedges is reported as a component of other comprehensive income, net of deferred income taxes, and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings.

Recent Significant Accounting Pronouncements:

In June 2009, the Financial Accounting Standards Board (FASB) issued new guidance relating to the accounting for transfers of financial assets. The new guidance, which was issued as Statement of Financial Accounting Standard (SFAS) No. 166, Accounting for Transfers of Financial Assets, an amendment to SFAS No. 140, was adopted into Codification in December 2009 through the issuance of Accounting Standards Update (ASU) 2009-16 (ASU 2009-16). The new standard provides guidance to improve the relevance, representational faithfulness, and comparability of the information that an entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor s continuing involvement, if any, in transferred financial assets. ASU 2009-16 was effective January 1, 2010. The adoption of this guidance did not have a material effect on the Corporation s consolidated financial statements.

In June 2009, the FASB issued new guidance relating to the variable interest entities. The new guidance, which was issued as SFAS No. 167, *Amendments to FASB Interpretation No. 46(R)*, was adopted into Codification in December 2009 through the issuance of ASU 2009-17 and updates ASC Topic 810: *Consolidation* (ASC Topic 810). The objective of the guidance is to improve financial reporting by enterprises involved with variable interest entities and to provide more relevant and reliable information to users of financial statements. ASC Topic 810 was effective as of January 1, 2010. The adoption of this guidance did not have a material effect on the Corporation s consolidated financial statements.

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements* (ASU 2010-06). ASU 2010-06 amends Subtopic 820-10 to clarify existing disclosures, require new disclosures, and includes conforming amendments to guidance on employers disclosures about postretirement benefit plan assets. ASU 2010-06 is effective for interim and annual periods beginning after December 15, 2009, except for disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The adoption of ASU 2010-06 did not have a material effect on the Corporation s consolidated financial statements.

In July 2010, the FASB issued ASU No. 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses* (ASU 2010-20). The new disclosure guidance will significantly expand the existing disclosure requirements and is intended to lead to greater transparency into a company s exposure to credit losses from lending arrangements. The extensive new disclosures of information as of the end of a reporting period will become effective for both interim and annual reporting periods ending after December 15, 2010. Specific items regarding activity that occurred before the issuance of the ASU, such as the allowance rollforward and modification disclosures, will be required for periods beginning after December 15, 2010. The Corporation is currently assessing the impact that ASU 2010-20 will have on its consolidated financial statements.

	Amortized	Fair		
Available for Sale	Cost	Value		
Due in one year or less	\$ 21,738	\$ 21,904		
Due after one year through five years	34,859	35,820		
Due after five years through ten years	41,637	44,088		
Due after ten years	26,251	28,083		
Preferred stock	27	23		
	\$ 124.512	\$ 129.918		

Proceeds from the maturities, calls and sales of securities available for sale for the nine months ended September 30, 2010 were \$22.88 million, resulting in gross realized gains of \$83,000 and gross realized losses of \$18,000.

The Corporation pledges securities to secure public deposits, Federal Reserve Bank treasury, tax and loan deposits and repurchase agreements. Securities with an aggregate amortized cost of \$78.77 million and an aggregate fair value of \$82.73 million were pledged at September 30, 2010.

Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

Securities with an aggregate amortized cost of \$87.44 million and an aggregate fair value of \$88.90 million were pledged at December 31, 2009.

Securities in an unrealized loss position at September 30, 2010, by duration of the period of the unrealized loss, are shown below.

(Dollars in thousands)	Less Than	Less Than 12 Months		12 Months or More		Total		
	Fair Value		ealized Loss	Fair Value	Unrealized Loss	d Fair Value	_	ealized .oss
U.S. government agencies and corporations	\$ 1,021	\$	2	\$	\$	\$ 1,021	\$	2

Preferred stock	16		5	·		16		5
Total temporarily impaired securities	\$ 3,786	\$	17	\$ 1,220	\$ 48	\$ 5,006	\$	65

There are 15 debt securities with fair values totaling \$4.99 million considered temporarily impaired at September 30, 2010. The primary cause of the temporary impairments in the Corporation s investments in debt securities was fluctuations in interest rates. Because the Corporation intends to hold these investments in debt securities to maturity and it is more likely than not that the

8

Corporation will not be required to sell these investments before a recovery of unrealized losses, the Corporation does not consider these investments to be other-than-temporarily impaired at September 30, 2010 and no impairment has been recognized. There are two equity securities with a fair value of \$16,000 considered temporarily impaired at September 30, 2010. The Corporation has the intent and ability to hold these equity securities until a recovery of the unrealized loss and therefore does not consider these investments to be other-than-temporarily impaired at September 30, 2010.

Securities in an unrealized loss position at December 31, 2009, by duration of the period of the unrealized loss, are shown below.

(Dollars in thousands)	Less Than 12 Months		12 Months or More		re	Total

Total temporarily impaired securities	\$ 22,571	\$	330	\$ 3,261	\$ 1	91 \$ 25,8	32	\$	521

The Corporation s investment in Federal Home Loan Bank (FHLB) stock totaled \$3.89 million at September 30, 2010 and December 31, 2009. FHLB stock is generally viewed as a long-term investment and as a restricted investment security, which is carried at cost, because there is no market for the stock, other than the FHLBs or member institutions. Therefore, when evaluating FHLB stock for impairment, its value is based on the ultimate recoverability of the par value rather than by recognizing temporary declines in value. The Corporation does not consider this investment to be other-than-temporarily impaired at September 30, 2010 and no impairment has been recognized. FHLB stock is shown as a separate line item on the balance sheet and is not a part of the available for sale securities portfolio.

NOTE 3: Other Comprehensive Income and Earnings Per Common Share

Other Comprehensive Income

The following table presents the cumulative balances of the components of other comprehensive income, net of deferred tax assets of \$1.61 million and \$958,000 as of September 30, 2010 and 2009, respectively.

(Dollars in thousands)	Septem	ber 30,
	2010	2009
Net unrealized gains on securities	\$ 3,514	\$ 2,506
Net unrecognized loss on cash flow hedge	(264)	
Net unrecognized losses on cash balance pension plan	(211)	(912)
Total accumulated other comprehensive income	\$ 3,039	\$ 1,594

The Corporation reclassified net gains of \$43,000 and \$5,000 from other comprehensive income to earnings for the nine months ended September 30, 2010 and 2009, respectively.

Earnings Per Common Share

The components of the Corporation s earnings per common share calculations are as follows:

(Dollars in thousands)		ee Months En	•	ember 30, 2009
Net income	\$	2,586	\$	1,658

Potential common shares that may be issued by the Corporation for its stock option awards and the warrant to purchase common shares issued on January 9, 2009 in connection with the Corporation s participation in the Capital Purchase Program (CPP) established by the U.S. Department of the Treasury (Treasury) under the Emergency Economic Stabilization Act of 2008 (the Warrant) are determined using the treasury stock method. Options and the Warrant on approximately 380,000 and 559,000 shares for the three months ended September 30, 2010 and 2009, respectively, and 363,000 and 599,000 for the nine months ended September 30, 2010 and 2009, respectively were not included in computing diluted earnings per common share because they were anti-dilutive.

NOTE 4: Employee Benefit Plans

The Bank has a non-contributory cash balance pension plan for which the components of net periodic benefit cost are as follows:

Three Months Ended September 30,

(Dollars in thousands)

Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

	2010	2009
Service cost	\$ 133	\$ 126

Net periodic benefit cost	\$ 306	\$ 381

The Bank made a \$400,000 contribution to this plan in the first quarter of 2010.

NOTE 5: Fair Value of Assets and Liabilities

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP requires that valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs. U.S. GAAP also establishes a fair value hierarchy which prioritizes the valuation inputs into three broad levels. Based on the underlying inputs, each fair value measurement in its entirety is reported in one of the three levels. These levels are:

Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets. Level 1 assets and liabilities include debt and equity securities traded in an active exchange market, as well as U.S. Treasury securities.

Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations of other real estate owned are also based upon appraisals by independent, licensed appraisers, general market conditions and recent sales of like properties.

Level 3 Valuation is determined using model-based techniques with significant assumptions not observable in the market. U.S. GAAP allows an entity the irrevocable option to elect fair value (the fair value option) for the initial and subsequent measurement for certain financial assets and liabilities on a contract-by-contract basis. The Corporation has not made any fair value option elections as of September 30, 2010.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table presents the balances of financial assets and liabilities measured at fair value on a recurring basis. There were no liabilities measured at fair value on a recurring basis at December 31, 2009.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The Corporation is also required to measure and recognize certain other financial assets at fair value on a nonrecurring basis in the consolidated balance sheets. For assets measured at fair value on a nonrecurring basis and still held on the consolidated balance sheets, the following table provides the fair value measures by level of valuation assumptions used. Fair value adjustments for other real estate owned (OREO) are recorded in other noninterest expense and fair value adjustments for loans held for investment are recorded in the provision for loan losses, in the consolidated statements of income. There were no liabilities measured at fair value on a nonrecurring basis at September 30, 2010 or December 31, 2009.

Derivative payable	425	425		
Accrued interest payable	1,280	1,280	1,569	1,569

The following describes the valuation techniques used by the Corporation to measure financial assets and financial liabilities at fair value as of September 30, 2010 and December 31, 2009.

Cash and short-term investments. The nature of these instruments and their relatively short maturities provide for the reporting of fair value equal to the historical cost.

Securities available for sale. Securities available for sale are recorded at fair value on a recurring basis.

Loans, net. The estimated fair value of the loan portfolio is based on present values using discount rates equal to the market rates currently charged on similar products.

Certain loans are accounted for under ASC Topic 310 *Receivables*, including impaired loans measured at an observable market price (if available), or at the fair value of the loan s collateral (if the loan is collateral dependent). Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. A significant portion of the collateral securing the Corporation s impaired loans is real estate. The fair value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser outside of the Corporation using observable market data, which in some cases may be adjusted to reflect current trends, including sales prices, expenses, absorption periods and other current relevant factors (Level 2). The value of business equipment is based upon an outside appraisal if deemed significant, or the net book value on the applicable business s financial statements, if not considered significant, using observable market data (Level 2). At September 30, 2010 and December 31, 2009, the Corporation s impaired loans were valued at \$6.98 million and \$6.72 million, respectively.

Loans held for sale, net. Loans held for sale are required to be measured at the lower of cost or fair value. These loans currently consist of residential loans originated for sale in the secondary market. Fair value is based on the price secondary markets are currently offering for similar loans using observable market data, which is generally not materially different than cost due to the short duration between origination and sale (Level 2). As such, the Corporation records any fair value adjustments on a nonrecurring basis. No nonrecurring fair value adjustments were recorded on loans held for sale during the three or nine months ended September 30, 2010.

Accrued interest receivable. The carrying amount of accrued interest receivable approximates fair value.

Deposits. The fair value of all demand deposit accounts is the amount payable at the report date. For all other deposits, the fair value is determined using the discounted cash flow method. The discount rate was equal to the rate currently offered on similar products.

Borrowings. The fair value of borrowings is determined using the discounted cash flow method. The discount rate was equal to the rate currently offered on similar products.

Derivative payable. The fair value of derivatives is determined using the discounted cash flow method.

Accrued interest payable. The carrying amount of accrued interest payable approximates fair value.

Letters of credit. The estimated fair value of letters of credit is based on estimated fees the Corporation would pay to have another entity assume its obligation under the outstanding arrangements. These fees are not considered material.

Unused portions of lines of credit. The estimated fair value of unused portions of lines of credit is based on estimated fees the Corporation would pay to have another entity assume its obligation under the outstanding arrangements. These fees are not considered material.

The Corporation assumes interest rate risk (the risk that general interest rate levels will change) as a result of its normal operations. As a result, the fair values of the Corporation s financial instruments will change when interest rate levels change and that change may be either favorable or unfavorable to the Corporation. Management attempts to match maturities of assets and liabilities to the extent believed necessary to balance minimizing interest rate risk and increasing net interest income in current market conditions. However, borrowers with fixed rate obligations are less likely to prepay in a rising rate environment and more likely to prepay in a falling rate environment. Conversely, depositors who are receiving fixed rates are more likely to withdraw funds before maturity in a rising rate environment and less likely to do so in a falling rate environment. Management monitors interest rates, maturities and repricing dates of assets and liabilities and attempts to manage interest rate risk by adjusting terms of new loans, deposits and borrowings and by investing in securities with terms that mitigate the Corporation s overall interest

rate risk.

13

NOTE 6: Business Segments

The Corporation operates in a decentralized fashion in three principal business segments: Retail Banking, Mortgage Banking and Consumer Finance. Revenues from Retail Banking operations consist primarily of interest earned on loans and investment securities and service charges on deposit accounts. Mortgage Banking operating revenues consist principally of gains on sales of loans in the secondary market, loan origination fee income and interest earned on mortgage loans held for sale. Revenues from Consumer Finance consist primarily of interest earned on automobile retail installment sales contracts.

The Corporation s other segments include an investment company that derives revenues from brokerage services, an insurance company that derives revenues from insurance services, and a title company that derives revenues from title insurance services. The results of these other segments are not significant to the Corporation as a whole and have been included in Other. Revenue and expenses of the Corporation s holding company are also included in Other, and consist primarily of dividends received on the Corporation s investment in equity securities, interest expense associated with the Corporation s trust preferred capital notes and other general corporate expenses.

Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

The Retail Banking segment extends a warehouse line of credit to the Mortgage Banking segment, providing a portion of the funds needed to originate mortgage loans. The Retail Banking segment charges the Mortgage Banking segment interest at the daily FHLB advance rate plus 50 basis points. The Retail Banking segment also provides the Consumer Finance segment with a portion of the funds needed to originate loans by means of variable rate borrowings that carry interest at one-month LIBOR plus 175 basis points and fixed rate loans that carry interest rates ranging from 5.4 percent to 8.0 percent. The Retail Banking segment acquires certain residential real estate loans from the Mortgage Banking segment at prices similar to those paid by third-party investors. These transactions are eliminated to reach consolidated totals. Certain corporate overhead costs incurred by the Retail Banking segment are not allocated to the Mortgage Banking, Consumer Finance and Other segments.

15

NOTE 7: Derivatives

The Corporation uses derivatives to manage exposure to interest rate risk through the use of interest rate swaps. Interest rate swaps involve the exchange of fixed and variable rate interest payments between two parties, based on a common notional principal amount and maturity date with no exchange of underlying principal amounts. The Corporation s interest rate swaps qualify as cash flow hedges. The Corporation s cash flow hedges effectively modify a portion of the Corporation s exposure to interest rate risk by converting variable rates of interest on \$10.0 million of the Corporation s trust preferred capital notes to fixed rates of interest, with maturities in 2015.

The cash flow hedges total notional amount is \$10.0 million. At September 30, 2010, the cash flow hedges had a fair value of (\$425,000) which is recorded in other liabilities. The cash flow hedges were fully effective at September 30, 2010 and therefore the loss on the cash flow hedges was recognized as a component of other comprehensive income, net of deferred income taxes.

NOTE 8: Other Noninterest Expenses

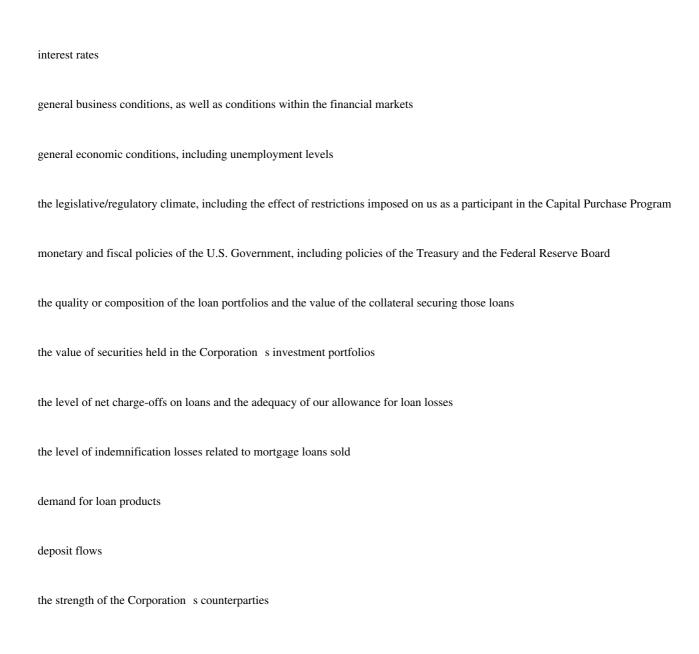

The following table presents the significant components in the consolidated statements of income line Noninterest expenses Other expenses.

		Three Months Ended September 30,		ths Ended iber 30,
(Dollars in thousands)	2010	2009	2010	2009

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This report contains statements concerning the Corporation s expectations, plans, objectives, future financial performance and other statements that are not historical facts. These statements may constitute forward-looking statements as defined by federal securities laws. These statements may address issues that involve estimates and assumptions made by management and risks and uncertainties. Forward-looking statements in this report include, without limitation, statements regarding asset quality, adequacy of reserves for loan losses and indemnification losses and the conditions that could require higher reserves for these losses, expected future indemnification obligations, future capital strategies and the duration of the Corporation s participation in the Capital Purchase Program and the economic and employment environment. Actual results could differ materially from historical results or those anticipated by any forward-looking statements. Factors that could have a material adverse effect on the operations and future prospects of the Corporation include, but are not limited to, changes in:

Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

competition from both banks and non-banks
demand for financial services in the Corporation s market area
technology
reliance on third parties for key services
the commercial and residential real estate markets
demand in the secondary residential mortgage loan markets
the Corporation s expansion and technology initiatives

accounting principles, policies and guidelines

These risks are exacerbated by the turbulence experienced during 2008, 2009 and portions of 2010 in the global and United States financial markets. Continued weakness in the global and United States financial markets, as is forecast for the remainder of 2010 and into 2011, could further affect the Corporation s performance, both directly by affecting the Corporation s revenues and the value of its assets and liabilities, and indirectly by affecting the Corporation s customers, counterparties and the economy in general. While there are signs of improvement, the capital and credit markets have experienced extended volatility and disruption during this period of turbulence, and unemployment has risen to, and currently remains at, high levels. There can be no assurance that these unprecedented developments will not continue to materially and adversely affect our business, financial condition and results of operations, as well as our ability to raise capital for liquidity and business purposes.

Although the Corporation had, and continues to have, diverse sources of liquidity and its capital ratios exceeded, and continue to exceed, the minimum levels required for well-capitalized status, the Corporation issued and sold its Series A Preferred Stock and Warrant for a \$20.0 million investment from Treasury under the Capital Purchase Program on January 9, 2009. The Bank is participating in the FDIC Transaction Account Guarantee Program, under which all noninterest-bearing transaction accounts (as defined within the program) are fully guaranteed by the FDIC for the entire amount in the account through December 31, 2010.

17

Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships, and we routinely execute transactions with counterparties in the financial industry, including brokers and dealers, commercial banks, and other institutions. As a result, defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry generally, could create another market-wide liquidity crisis similar to that experienced in late 2008 and early 2009 and could lead to losses or defaults by us or by other institutions. There is no assurance that any such losses would not materially adversely affect the Corporation s results of operations.

Further, there can be no assurance that the actions taken by the federal government and regulatory agencies will stabilize the United States financial system or alleviate the industry or economic factors that may adversely affect the Corporation s business and financial performance. It also is not clear what effects the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the Dodd-Frank Act), the regulations promulgated thereunder or other future regulatory reforms may have on financial markets, the financial services industry and depositary institutions, and consequently on the Corporation s business and financial performance.

These risks and uncertainties should be considered in evaluating the forward-looking statements contained herein. We caution readers not to place undue reliance on those statements, which speak only as of the date of this report.

The following discussion supplements and provides information about the major components of the results of operations, financial condition, liquidity, and capital resources of the Corporation. This discussion and analysis should be read in conjunction with the accompanying unaudited consolidated financial statements.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements requires us to make estimates and assumptions. Those accounting policies with the greatest uncertainty and that require our most difficult, subjective or complex judgments affecting the application of these policies, and the likelihood that materially different amounts would be reported under different conditions, or using different assumptions, are described below.

Allowance for Loan Losses: We establish the allowance for loan losses through charges to earnings in the form of a provision for loan losses. Loan losses are charged against the allowance when we believe that the collection of the principal is unlikely. Subsequent recoveries of losses previously charged against the allowance are credited to the allowance. The allowance represents an amount that, in our judgment, will be adequate to absorb any losses on existing loans that may become uncollectible. Our judgment in determining the level of the allowance is based on evaluations of the collectibility of loans while taking into consideration such factors as trends in delinquencies and charge-offs, changes in the nature and volume of the loan portfolio, current economic conditions that may affect a borrower s ability to repay and the value of collateral, overall portfolio quality and review of specific potential losses. This evaluation is inherently subjective because it requires estimates that are susceptible to significant revision as more information becomes available.

Allowance for Indemnifications: The allowance for indemnifications is established through charges to earnings in the form of a provision for indemnifications, which is included in other noninterest expenses. A loss is charged against the allowance for indemnifications under certain conditions when a purchaser of a loan (an investor) sold by C&F Mortgage incurs a loss due to borrower misrepresentation, fraud, early default, or underwriting errors. The allowance represents an amount that, in management s judgment, will be adequate to absorb any losses arising from indemnification requests. Management s judgment in determining the level of the allowance is based on the volume of loans sold, current economic conditions and information provided and indemnification requests made by investors. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available.

Impairment of Loans: We consider a loan impaired when it is probable that the Corporation will be unable to collect all interest and principal payments as scheduled in the loan agreement. We do not consider a loan impaired during a period of delay in payment if we expect the ultimate collection of all amounts due. We generally measure impairment on a loan-by-loan basis for commercial, construction and residential loans in excess of \$500,000 by either the present value of expected future cash flows discounted at the loan s effective interest rate, the loan s obtainable market price, or the fair value of the collateral if the loan is collateral dependent. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. We maintain a valuation allowance based on the estimated fair value of the collateral relative to the recorded investment in the impaired loan, as well as other relevant factors.

Impairment of Securities: Impairment of securities occurs when the fair value of a security is less than its amortized cost. For debt securities, impairment is considered other-than-temporary and recognized in its entirety in net income if either (i) we intend to sell the security or (ii) it is more-likely-than-not that we will be required to sell the security before recovery of its amortized cost basis. If, however, we do not intend to sell

Edgar Filing: C & F FINANCIAL CORP - Form 10-Q

the security and it is not more-likely-than-not that we will be required to sell the security before recovery, we must determine what portion of the impairment is attributable to a credit loss, which occurs when the amortized cost basis of the security exceeds the present value of the cash flows expected to be collected from the security. If there is no credit loss,

18

there is no other-than-temporary impairment. If there is a credit loss, other-than-temporary impairment exists, and the credit loss must be recognized in net income and the remaining portion of impairment must be recognized in other comprehensive income. For equity securities, impairment is considered to be other-than-temporary based on our ability and intent to hold the investment until a recovery of fair value. Other-than-temporary impairment of an equity security results in a write-down that must be included in net income. We regularly review each investment security for other-than-temporary impairment based on criteria that includes the extent to which cost exceeds market price, the duration of that market decline, the financial health of and specific prospects for the issuer, our best estimate of the present value of cash flows expected to be collected from debt securities, our intention with regard to holding the security to maturity and the likelihood that we would be required to sell the security before recovery.

Other Real Estate Owned: Assets acquired through, or in lieu of, loan foreclosure are held for sale and are recorded at the estimated fair value less costs to sell at the date of foreclosure. Subsequent to foreclosure, management periodically performs valuations of the foreclosed assets based on updated appraisals, general market conditions, recent sales of like properties, length of time the properties have been held, and our ability and intention with regard to continued ownership of the properties. The Corporation may incur additional write-downs of foreclosed assets to fair value less costs to sell if valuations indicate a further other-than-temporary deterioration in market conditions. Revenues and expenses from operations and changes in the property valuations are included in other noninterest expenses.

Goodwill: Goodwill is no longer subject to amortization over its estimated useful life, but is subject to at least an annual assessment for impairment by applying a fair value based test. In assessing the recoverability of the Corporation's goodwill, all of which was recognized in connection with the Bank's acquisition of C&F Finance in September 2002, we must make assumptions in order to determine the fair value of the respective assets. Major assumptions used in determining impairment are increases in future income, sales multiples in determining terminal value and the discount rate applied to future cash flows. As part of the impairment test, we perform a sensitivity analysis by increasing the discount rate, lowering sales multiples and reducing increases in future income. We completed the annual test for impairment during the fourth quarter of 2009 and determined there was no impairment to be recognized in 2009. If the underlying estimates and related assumptions change in the future, we may be required to record impairment charges.

Retirement Plan: The Bank maintains a non-contributory, cash balance pension plan for eligible full-time employees as specified by the plan. Plan assets, which consist primarily of marketable equity securities and corporate and government fixed income securities, are valued using market quotations. The Bank s actuary determines plan obligations and annual pension expense using a number of key assumptions. Key assumptions may include the discount rate, the interest crediting rate, the estimated future return on plan assets and the anticipated rate of future salary increases. Changes in these assumptions in the future, if any, or in the method under which benefits are calculated may affect pension assets, liabilities or noninterest expense.

Derivative Financial Instruments: The Corporation recognizes derivative financial instruments at fair value as either an other asset or other liability in the consolidated balance sheet. The derivative financial instruments have been designated as and qualify as cash flow hedges. The effective portion of the gain or loss on the cash flow hedges is reported as a component of other comprehensive income, net of deferred income taxes, and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings.

Accounting for Income Taxes: Determining the Corporation s effective tax rate requires judgment. In the ordinary course of business, there are transactions and calculations for which the ultimate tax outcomes are uncertain. In addition, the Corporation s tax returns are subject to audit by various tax authorities. Although we believe that the estimates are reasonable, no assurance can be given that the final tax outcome will not be materially different than that which is reflected in the income tax provision, assets and accruals.

For further information concerning accounting policies, refer to Item 8 Financial Statements and Supplementary Data under the heading Note 1: Summary of Significant Accounting Policies in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2009.

OVERVIEW

Our primary financial goals are to maximize the Corporation s earnings and to deploy capital in profitable growth initiatives that will enhance long-term shareholder value. We track three primary financial performance measures in order to assess the level of success in achieving these goals: (i) return on average assets (ROA), (ii) return on average common equity (ROE), and (iii) growth in earnings. In addition to these financial performance measures, we track the performance of the Corporation s three principal business activities: retail banking, mortgage banking, and consumer finance. We also actively manage our capital through growth and dividends, while considering the need to maintain a strong regulatory capital position.

Financial Performance Measures

Net income for the Corporation was \$2.6 million for the third quarter ended September 30, 2010, compared with \$1.7 million for the third quarter of 2009. Net income for the Corporation was \$5.7 million for the first nine months of 2010, compared with \$4.9 million for the first nine months of 2009. Net income available to common shareholders was \$2.3 million, or \$0.74 per common share

assuming dilution for the third quarter of 2010, compared with \$1.4 million, or \$0.45 per common share assuming dilution for the third quarter of 2009. Net income available to common shareholders was \$4.9 million, or \$1.57 per common share assuming dilution for the first nine months of 2010, compared to \$4.1 million, or \$1.34 per common share assuming dilution for the first nine months of 2009. The difference between reported net income available to common shareholders is a result of the Series A Preferred Stock dividends and amortization of the Warrant related to the Corporation s participation in the Capital Purchase Program (CPP). The financial results for the third quarter and first nine months of 2010 were affected by continued loan growth and lower net charge-offs in the Consumer Finance segment; higher net interest margin, higher provisions for loan and foreclosed properties losses, and general operating expenses associated with problem assets in the Retail Banking segment; and lower loan production and higher provision for indemnification losses in the Mortgage Banking segment.

The Corporation s ROE and ROA were 12.65 percent and 1.02 percent, respectively, on an annualized basis, for the third quarter of 2010, compared to 8.14 percent and 0.63 percent for the third quarter of 2009. For the first nine months of 2010, on an annualized basis, the Corporation s ROE and ROA were 9.19 percent and 0.73 percent, respectively, compared to 8.21 percent and 0.62 percent, respectively, for the first nine months of 2009. The increase in these ratios during 2010 was primarily due to the performance of the Consumer Finance segment, which more than offset the results of the Retail Banking and Mortgage Banking segments that continue to be negatively affected by the challenging economic environment and issues facing the financial services industry in general.

Principal Business Activities. An overview of the financial results for each of the Corporation s principal segments is presented below. A more detailed discussion is included in Results of Operations.

Retail Banking: During the third quarter of 2010, the Bank recorded a net loss of \$333,000 compared to a net loss of \$347,000 in the third quarter of 2009. During the first nine months of 2010, the Bank recorded a net loss of \$646,000 compared to a net loss of \$655,000 in the first nine months of 2009. The results for 2010 included the effects of (1) improved net interest margins attributable to higher interest income, as a result of the establishment of interest rate floors on new loans and loans at renewal, and lower interest expense, as a result of lower rates paid on deposits, (2) a higher provision for loan losses due to continued weakness in the economy and increases in nonaccrual loans, (3) a higher provision for losses on foreclosed properties and general operating expenses associated with problem assets as property values continued to be depressed and (4) higher personnel costs, including health care costs, due to slight increases in staffing levels.

The Bank's nonperforming assets were \$17.9 million at September 30, 2010, compared to \$17.2 million at December 31, 2009. Nonperforming assets at September 30, 2010 included \$6.8 million in nonaccrual loans and \$11.1 million in foreclosed properties. Nonaccrual loans primarily consisted of four relationships totaling \$4.9 million secured by residential properties and commercial loans secured by non-residential properties. Specific reserves of \$1.0 million have been established for these loans. Management believes it has provided adequate loan loss reserves for these loans based on the estimated fair values of the collateral. Foreclosed properties at September 30, 2010 primarily consisted of residential and non-residential properties associated with commercial relationships. These properties have been written down to their estimated fair values less selling costs.

The Bank s credit management team directed significant effort throughout 2009 and throughout the first nine months of 2010 to real estate loan workouts and restructurings and, when necessary, foreclosures. We are continually evaluating the credit quality of the Bank s loan portfolio and the carrying values of real estate acquired through foreclosure, and we have charged off loans, written down foreclosed properties and increased reserves as we considered necessary.

Mortgage Banking: During the third quarter of 2010, C&F Mortgage Corporation recorded net income of \$656,000 compared to net income of \$755,000 for the quarter ended September 30, 2009, and recognized a net loss of \$124,000 for the first nine months of 2010 compared to net income of \$2.8 million for the first nine months of 2009. The net loss for the nine months ended September 30, 2010 primarily resulted from a decline in gains on sales of loans to \$13.3 million for the nine months ended September 30, 2010 from \$19.4 million for the first nine months of 2009 and an increase in the provision for indemnification losses of \$1.8 million to \$3.5 million, from \$1.7 million for the nine months ended September 30, 2009. Loan origination volumes have remained lower during 2010, declining to \$201.8 million for the third quarter of 2010 from \$214.6 million for 2009 and declining to \$545.2 million for the first nine months of 2010 from \$867.0 million in 2009. For the third quarter of 2010, the amount of loan originations for refinancings and home purchases were \$92.8 million and \$109.0 million, respectively, compared to \$51.5 million and \$163.1 million, respectively, for the third quarter of 2009. For the first nine months of 2010, the amount of loan originations for refinancings and home purchases were \$163.6 million and \$381.6 million, respectively, compared to \$442.9 million and \$424.0 million, respectively, for the first nine months of 2009. The decrease in originations is a result of the challenging economic conditions, the expiration of the homebuyer tax credits during the first half of 2010 and loan officer turnover.

Foreclosures and payment defaults have continued to remain elevated in the marketplace, resulting in increased demands for loan repurchases and indemnification requests. An indemnification obligation arises when a purchaser of a loan (an investor) sold by the Mortgage Banking segment incurs a loss due to demonstrated borrower misrepresentation, fraud, early default or underwriting errors. The increase in the provision for indemnification losses for the nine months ended September 30, 2010 was primarily due to an agreement reached during the second quarter

of 2010 with one of the largest investors that resolved all known and unknown

20

Table of Contents

indemnification obligations for loans sold to this investor prior to 2010. With this agreement in place, we expect a reduction in future indemnification obligations as the majority of our indemnification issues at the time were with the types of loans originated for and sold to this investor.

The decline in revenue from gains on sales of loans and changes in the provision for indemnification losses were partially offset by (1) a decrease for the nine months ended September 30, 2010 in commission-based and profitability-based personnel costs and (2) a decrease for the third quarter of 2010 and for the nine months ended September 30, 2010 in the provision for loan losses resulting from a decrease in loans held for investment, decreases in loan origination volume and lower net charge-offs, compared to the same periods in 2009.

Consumer Finance: Third quarter net income for C&F Finance Company was \$2.4 million in 2010, compared to \$1.4 million in 2009. Net income for the first nine months of 2010 was \$6.9 million, compared to \$3.2 million for the first nine months of 2009. The Consumer Finance segment continues to benefit from loan growth, lower net charge-offs and the current low interest rate environment. Loan production has remained strong because of a higher volume of auto sales in the markets we serve, coupled with long-standing productive dealer relationships in existing markets and expansion into new markets over the past 18 months, resulting in an increase in average loans of 15.9 percent and 14.2 percent for the three and nine months ended September 30, 2010. The current low interest rate environment has decreased borrowing costs as part of the funding costs for the segment is through a variable-rate line of credit indexed to LIBOR. The annualized net charge-off ratio has declined over the last two years as a result of prudent underwriting guidelines, enhanced collection efforts and higher values received when repossessed vehicles are sold as a result of stronger demand for used vehicles. Lower delinquencies and the lower net charge-off ratio contributed to a \$650,000 decrease for the third quarter of 2010 and a \$2.7 million decrease for the first nine months of 2010 in the provision for loan losses compared to the same periods in 2009. The allowance for loan losses as a percentage of loans remained approximately the same, 7.90 percent at September 30, 2010 compared to 7.89 percent at December 31, 2009. Management believes that the current allowance for loan losses is adequate to absorb probable losses in the loan portfolio.

Other and Eliminations: The net loss for the third quarter 2010 for this combined segment, together with the effects of intercompany eliminations, was \$145,000, compared to a net loss of \$150,000 for the third quarter of 2009. The net loss for the first nine months of 2010 was \$395,000, compared to a net loss of \$378,000 for the first nine months of 2009. Revenue and expense of this combined segment include the results of operations of our investment, insurance and title subsidiaries, dividends received on the Corporation s investment in equity securities, interest expense associated with the Corporation s trust preferred capital notes, other general corporate expenses and the effects of intercompany eliminations.

Capital Management. Total shareholders equity increased \$5.1 million to \$94.0 million at September 30, 2010, compared to \$88.9 million at December 31, 2009. Earnings during the first nine months of 2010 and unrealized gains on securities principally contributed to this growth.

We have continued to manage our capital through asset growth and dividends on common shares outstanding. The capital and liquidity positions of the Corporation remain strong. The Corporation continues to participate in the CPP, which was seen as an opportunity to inexpensively increase capital and to insure against unforeseen events given the turmoil in the financial markets. Even though capital has continued to increase, and to exceed current regulatory capital standards for being well-capitalized, the Corporation has not yet repurchased these securities. It is our belief that the Corporation should keep the funds in place until the financial markets, economy and regulatory environment have stabilized.

Another means by which we manage our capital is through dividends. The Corporation s board of directors continued its policy of paying dividends in 2010. The dividend payout ratio for the third quarter of 2010 was 33.8 percent based on net income available to common shareholders. The board of directors continues to evaluate our dividend payout in light of changes in economic conditions, our capital levels and our expected future levels of earnings. However, in connection with the Corporation s participation in the CPP there are limitations on the Corporation s ability to pay quarterly cash dividends in excess of \$0.31 per share or to repurchase its common stock prior to the earlier of January 9, 2012 or the date on which Treasury no longer holds any of the Series A Preferred Stock.

21

RESULTS OF OPERATIONS

The following table presents the average balance sheets, the amounts of interest earned on earning assets, with related yields, and interest expense on interest-bearing liabilities, with related rates, for the three months and nine months ended September 30, 2010 and 2009. Loans include loans held for sale. Loans placed on nonaccrual status are included in the balances and are included in the computation of yields, but had no material effect. Interest on tax-exempt loans and securities is presented on a taxable-equivalent basis (which converts the income on loans and investments for which no income taxes are paid to the equivalent yield as if income taxes were paid using the federal corporate income tax rate of 35 percent).

23

Interest income and expense are affected by fluctuations in interest rates, by changes in the volume of earning assets and interest-bearing liabilities, and by the interaction of rate and volume factors. The following table presents the direct causes of the period-to-period changes in the components of net interest income on a taxable-equivalent basis. We calculated the rate and volume variances using a formula prescribed by the SEC. Rate/volume variances, the third element in the calculation, are not shown separately in the table, but are allocated to the rate and volume variances in proportion to the relationship of the absolute dollar amounts of the change in each. Loans include both nonaccrual loans and loans held for sale.

Net interest income, on a taxable-equivalent basis, for the third quarter of 2010 was \$15.0 million, compared to \$13.3 million for the third quarter of 2009. Net interest income, on a taxable-equivalent basis, for the first nine months of 2010 was \$43.4 million, compared to \$37.9 million for the first nine months of 2009. The higher net interest income resulted from a 62 basis point increase in net interest margin coupled with a 3.0 percent increase in average earning assets for the third quarter of 2010 compared to the third quarter of 2009 and an 89 basis point increase in net interest margin while average earning assets remained approximately the same for the nine months ended September 30, 2010 compared to the nine months ended September 30, 2010. The increase for both the three and nine months ended September 30, 2010 in net interest margin was principally a result of an increase in the yield on loans and a decrease in the rates paid on time and savings deposits offset by an increase in the rates paid on borrowings. The increase in the yield on loans was primarily a result of the changing mix of loans resulting from a decrease in lower yielding average loans at the Retail Banking and Mortgage Banking segments and an increase in the higher yielding loans at the Consumer Finance segment. In addition, an increase in the yields on loans at the Retail Banking segment resulted from the repricing of loans and implementation of interest rate floors on loans at renewal. The decrease in rates paid on borrowings was a result of the change in the mix of borrowings resulting from a decrease in average lower cost short-term borrowings.

Average loans include both loans held for investment and loans held for sale. Average loans held for investment decreased \$5.5 million and \$6.8 million during the third quarter and the first nine months of 2010, respectively, compared to the same periods in 2009. The Retail Banking segment s average loans held for investment portfolio decreased \$34.3 million during the third quarter of 2010 and decreased \$31.0 million in the first nine months of 2010, compared to the same periods in 2009, primarily as current economic conditions reduced loan demand and resulted in an increase in loans charged-off or foreclosed upon. Despite the reduction in average loans, the Retail Banking segment was able to increase its yield for the third quarter of 2010 and first nine months of 2010, compared to the same periods in 2009, through increases in interest rates and the implementation of interest rate floors on new or renewing adjustable rate loans in the latter half of 2009 and first nine months of 2010. The Consumer Finance segment s average loans held for investment portfolio increased \$28.8 million during the third quarter of 2010 compared to the third quarter of 2009 and increased \$25.0 million for the first nine months of 2010 compared to the first nine months of 2009 as result of overall growth at existing and new locations. The Consumer Finance segment s loans are typically higher yielding than other loans in our portfolio due to higher risks. Average loans held for sale at the Mortgage Banking segment increased \$11.3 million during the third quarter of 2010 compared to the third quarter of 2009 and decreased \$16.3 million for the first nine months of 2010 compared to the first nine months of 2009 as loan origination volumes overall have declined since 2009, though volumes declined less dramatically during the third quarter of 2010 compared to the third quarter of 2009. The increase in average loans held for sale at the Mortgage Banking segment for the third quarter of 2010 compared to the third quarter of 2009 was a result of having a larger number of loans to fund as origination volume began to increase. The yield on the Mortgage Banking segment s loans has decreased for the third quarter of 2010 compared to the third quarter of 2009, while increasing for the first nine months of 2010 compared to the same period in 2009 as interest rates on average had risen since 2009 prior to declining during the third quarter of 2010. The overall yield on loans increased 71 basis points to 9.61 percent and 98 basis points to 9.45 percent for the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009, principally as a result of the shift in the mix of the portfolio from lower yielding loans held in our Retail Banking and Mortgage Banking segments to higher yielding loans in our Consumer Finance segment.

Average securities available for sale increased \$8.9 million during the third quarter of 2010, and \$11.8 million in the first nine months of 2010, compared to the same periods in 2009. The increase in securities available for sale occurred predominantly in the Retail Banking segment s municipal bond portfolio in conjunction with the strategy to increase the investment portfolio as a percentage of total assets. The funding of this strategy has come from the growth in deposits and from reduced loan demand in the Retail Banking segment. This strategy is based on the role of the investment portfolio to manage interest rate sensitivity, provide liquidity and serve as an additional source of interest income. The lower yields in the third quarter and first nine months of 2010, in relation to the same periods in 2009, resulted from the current interest rate environment in which securities purchases were made at yields less than the yields on those securities being called, matured or sold.

Average interest-bearing deposits in other banks increased \$9.6 million during the third quarter of 2010 and \$13.0 million in the first nine months of 2010, compared to the same periods in 2009. The increase resulted from reduced loan demand, coupled with deposit growth.

Average interest-bearing time and savings deposits increased \$35.7 million during the third quarter of 2010 and \$31.9 million in the first nine months of 2010, compared to the same periods in 2009. The mix in interest-bearing time and savings deposits has been shifting from shorter-term, lower yielding money market deposits to longer-term, higher yielding certificates of deposits. The average cost of deposits declined 48 basis points during the third quarter of 2010 and 57 basis points in the first nine months of 2010 in relation to the same periods in 2009. The third quarter and first nine months of 2010 have benefited from the lower rates on time deposits that matured and repriced throughout 2009 and into 2010.

Average borrowings decreased \$13.3 million during the third quarter of 2010 and \$28.0 million in the first nine months of 2010, compared to the same periods in 2009. This decrease was attributable to reduced funding needs as the growth in average earning assets

has primarily been met through the growth in average deposits. The average cost of borrowings increased 34 basis points during the third quarter of 2010 and 32 basis points in the first nine months of 2010, in relation to the same periods in 2009, as a result of a change in the composition of borrowings, which resulted from the repayment of lower-cost short-term variable-rate borrowings due to increased liquidity provided by lower loan demand and deposit growth.

Other service charges and fees	1,247	2,593	6		3,846
Gains (losses) on calls and sales of available for sale securities	33			(25)	8
Other income	544	317	362	849	2,072
Total noninterest income	\$ 4,276	\$ 22,291	\$ 368	\$ 824	\$ 27,759

Total noninterest income decreased \$736,000, or 8.6 percent, to \$7.8 million during the third quarter of 2010 and \$6.9 million, or 24.7 percent, to \$20.9 million in the first nine months of 2010, compared to the same periods in 2009. The decreases primarily resulted from (1) decreased gains on sales of loans and ancillary fees associated with lower loan originations in the Mortgage Banking segment and (2) a one-time fee received in 2009, recorded in other income, in connection with a change in the debit card processor in the Retail Banking segment. These decreases were partially offset by increases in (1) services charges on deposit accounts as higher overdraft protection and returned check charges were incurred by customers and (2) other service charges primarily due to higher bank card interchange fees in the Retail Banking segment.

Total noninterest expense increased \$83,000, or 0.6 percent, to \$14.8 million during the third quarter of 2010 and \$90,000 to \$44.6 million in the first nine months of 2010, compared to the same periods in 2009. The Mortgage Banking segment reported slightly higher salaries and employee benefits expense for the three months ended September 30, 2010 compared to 2009 as loan originations and profitability for the third quarter 2010 were similar to that in 2009. Salaries and employee benefits expense for the Mortgage Banking segment for the nine months ended September 30, 2010 compared to 2009 was significantly lower as a result of a decline in loan originations and profitability. In addition, the nine months ended September 30, 2010 included an increase in the provision for indemnification losses of \$1.8 million to \$3.5 million due primarily to an agreement entered into the second quarter of 2010 with one of the Mortgage Banking segment s largest purchasers of loans. Salaries and employee benefits expense in the Retail Banking segment increased for the three and nine months of 2010 compared to 2009 as a result of

increased staffing levels and health care costs. Other expenses in the Retail Banking segment include increases in costs associated with foreclosed properties for the nine months ended September 30, 2010, offset by the 2009 FDIC special assessment and higher bank card processing expenses in 2009. An increase in salaries and employee benefits expense for the three and nine months ended September 30, 2010 at the Consumer Finance segment was a result of staff additions to support loan growth.

Income Taxes

Income tax expense for the third quarter of 2010 totaled \$1.1 million, resulting in an effective tax rate of 30.2 percent, compared to \$716,000, or 30.2 percent, for the third quarter of 2009. Income tax expense for the first nine months of 2010 totaled \$2.0 million, resulting in an effective tax rate of 25.9 percent, compared to \$1.8 million, or 26.3 percent, for the first nine months of 2009. The decrease in the effective tax rate through the first nine months of 2010 was a result of lower earnings at C&F Mortgage, which is subject to state income taxes, and higher earnings on the Bank s municipal bond portfolio, which generates tax-exempt interest income.

ASSET QUALITY

Allowance for Loan Losses

The allowance for loan losses represents an amount that, in our judgment, will be adequate to absorb any losses on existing loans that may become uncollectible. The provision for loan losses increases the allowance, and loans charged off, net of recoveries, reduce the allowance. The following tables summarize the allowance activity for the periods indicated:

TABLE 5: Allowance for Loan Losses

Consumer Finance

(Dollars in thousands)	Sep	otember 30, 2010	Dec	cember 31, 2009
Nonaccrual loans	\$	340	\$	387
Accruing loans past due for 90 days or more	\$		\$	
Total loans	\$	214,265	\$	189,439
Allowance for loan losses	\$	16,923	\$	14,951
Nonaccrual consumer finance loans to total consumer finance loans		0.16%		0.20%
Allowance for loan losses to total consumer finance loans		7.90%		7.89%

The allowance for loan losses at the combined Retail Banking and Mortgage Banking segments increased \$736,000 since December 31, 2009 to \$9.8 million at September 30, 2010. The change in the balance of the allowance for loan losses in the combined segments resulted from an increase in criticized loans and higher reserves associated with non-accrual loans. The allowance for loan losses to total loans increased to 2.34 percent at September 30, 2010 compared to 2.03 percent at December 31, 2009. Net charge-offs for these combined segments for the first nine months of 2010 included write downs of collateral-dependent commercial loans based on impairment analyses, which indicated that the carrying values of these loans exceeded the fair market value of the underlying real estate collateral. The provision for loan losses at these combined segments remained approximately the same for both the three and nine months ended September 30, 2010 compared to 2009, at \$1.5 million and \$4.1 million, respectively.

Nonperforming assets at the Retail Banking segment increased slightly to \$17.9 million at September 30, 2010 from \$17.2 million at December 31, 2009. Nonperforming assets at September 30, 2010 included \$6.8 million in nonaccrual loans and \$11.1 million in foreclosed properties. Nonaccrual loans primarily consisted of four relationships totaling \$4.9 million of loans secured by residential properties and commercial loans secured by non-residential properties. Specific reserves of \$1.0 million have been established for these loans. Management

believes it has provided adequate loan loss reserves for these loans based on the collateral and estimated fair values. Foreclosed properties at September 30, 2010 primarily consisted of residential and non-residential properties associated with commercial relationships. These properties have been written down to their estimated fair values less cost to sell. Foreclosed properties of the Mortgage Banking segment totaled \$414,000 at September 30, 2010, and resulted primarily from loans that were repurchased from investors because of documentation issues. Accruing loans past due for 90 days or more at the combined Retail and Mortgage Banking segments increased \$106,000 to \$557,000 at September 30, 2010. We believe that the current level of the allowance for loan losses is adequate to absorb any losses on existing loans that may become uncollectible. Depending on the effects of future economic conditions, or changes in our loan portfolio, a higher provision for loan losses may become necessary.

30

The Consumer Finance segment s allowance for loan losses increased \$2.0 million to \$16.9 million since December 31, 2009. The increase in the allowance for loan losses was driven by an increase in the Consumer Finance segment s loans outstanding. The Consumer Finance segment s provision for loan losses decreased \$650,000 and \$2.7 million in the third quarter of 2010 and first nine months of 2010, respectively, compared to the same periods in 2009. The decrease in the provision for loan losses was primarily attributable to lower delinquencies and net charge-offs in both the third quarter and first nine months of 2010. The decreases in delinquencies and net charge-offs are a result of prudent underwriting practices, enhanced collection efforts and a stronger used vehicle market which resulted in higher resale values for repossessed vehicles.

C&F Finance s loan portfolio can be immediately adversely affected by the ongoing effects of the recent economic recession and less than robust recovery. We believe that the current level of the allowance for loan losses at C&F Finance is adequate to absorb any losses on existing loans that may become uncollectible. However, if unemployment levels remain elevated or increase in the future and, or if consumer demand for automobiles falls and results in declining values of automobiles securing outstanding loans, a higher provision for loan losses may become necessary.

FINANCIAL CONDITION

At September 30, 2010, the Corporation had total assets of \$911.8 million compared to \$888.4 million at December 31, 2009. The increase was principally a result of increases in loans held for sale and growth in the securities available for sale portfolio, offset by a decrease in loans held for investment and interest-bearing deposits in other banks.

Loan Portfolio

The following table sets forth the composition of the Corporation s loans held for investment in dollar amounts and as a percentage of the Corporation s total gross loans held for investment at the dates indicated.

TABLE 8: Loans Held for Investment

(Dollars in thousands)	September 30, 2010		December	,
	Amount	Percent	Amount	Percent
Real estate residential mortgage	\$ 146,200	23%	\$ 147,850	23%
Real estate construction	14,907	2	14,053	2
Commercial, financial and agricultural ¹	220,492	35	245,759	39
Equity lines	32,169	5	32,220	5
Consumer	4,845	1	7,710	1
Consumer finance	214,265	34	189,439	30
Total loans	632,878	100%	637,031	100%
Less allowance for loan losses	(26,735)		(24,027)	
Total loans, net	\$ 606,143		\$ 613,004	

Includes loans secured by real estate for builder lines, acquisition and development and commercial development, as well as commercial loans secured by personal property.

Loans held for investment have decreased slightly compared to December 31, 2009. Increases in loans held for investment in the consumer finance category were a result of increased demand for automobile loans, which was offset by decreases in commercial, financial and agricultural loans at the Retail Banking segment as a result of foreclosures, charge-offs and reduced demand due to the continued challenging economic environment.

Investment Securities

The investment portfolio plays a primary role in the management of the Corporation s interest rate sensitivity. In addition, the portfolio serves as a source of liquidity, is used as needed to meet collateral requirements and generates returns for the Corporation on the Corporation s excess liquidity. The investment portfolio consists of securities available for sale, which may be sold in response to changes in market interest rates, changes in prepayment risk, increased loan demand, general liquidity needs and other similar factors. These securities are carried at estimated fair value.

31

The following table sets forth the composition of the Corporation s securities available for sale at fair value and as a percentage of the Corporation s total securities available for sale at the dates indicated.

TABLE 9: Securities Available for Sale

(Dollars in thousands)	September	December 31, 200

Obligations of states and political subdivisions	112,775	87	104,867	88
Total debt securities	129,895	100	117,319	99
Preferred stock	23	*	1,251	1
Total available for sale securities	\$ 129,918	100%	\$ 118,570	100%

Deposits

The Corporation s predominant source of funds is depository accounts, which are comprised of demand deposits, savings and money market accounts, and time deposits. The Corporation s deposits are principally provided by individuals and businesses located within the communities served.

Deposits totaled \$621.5 million at September 30, 2010, compared to \$606.6 million at December 31, 2009. The Corporation had no brokered certificates of deposit outstanding at September 30, 2010 or December 31, 2009. The mix in deposits has been shifting from shorter-term, lower yielding money market deposits to longer-term, higher yielding certificates of deposits. The increase in total deposits occurred in deposits of commercial depositors, including municipalities in our market area, and retail depositors.

Borrowings

Borrowings totaled \$169.3 million at September 30, 2010, compared to \$170.8 million at December 31, 2009. The slight decrease in borrowings is primarily a result of funding needs being met by growth in deposits.

Off-Balance Sheet Arrangements

As of September 30, 2010, there have been no material changes to the off-balance sheet arrangements disclosed in Management s Discussion and Analysis in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2009.

Contractual Obligations

As of September 30, 2010, there have been no material changes outside the ordinary course of business to the contractual obligations disclosed in Management s Discussion and Analysis in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2009.

Liquidity

The objective of the Corporation s liquidity management is to ensure the continuous availability of funds to satisfy the credit needs of our customers and the demands of our depositors, creditors and investors. Stable core deposits and a strong capital position are the foundation for the Corporation s liquidity position. Additional sources of liquidity available to the Corporation include cash flows from operations, loan payments

^{*} Less than one percent.

and payoffs, deposit growth, sales of securities, the issuance of brokered certificates of deposit and the capacity to borrow additional funds.

Liquid assets, which include cash and due from banks, interest-bearing deposits in other banks and nonpledged securities available for sale, at September 30, 2010 totaled \$57.1 million, compared to \$67.7 million at December 31, 2009. The Corporation s funding sources, including the capacity, amount outstanding and amount available at September 30, 2010 are presented in Table 10.

32

TABLE 10: Funding Sources

(Dollars in thousands)

	Capacity	Outstanding	Available
Federal funds purchased	\$ 36,000	\$ 16,675	\$ 19,325
Repurchase agreements	5,000	5,000	
Borrowings from FHLB	106,041	52,500	53,541
Borrowings from Federal Reserve Bank	71,250		71,250
Revolving line of credit (1)	120,000	67,947	52,503

⁽¹⁾ The Corporation amended the revolving line of credit agreement effective July 1, 2010. Among other changes, the amendment extended the maturity date from July 31, 2012 to July 31, 2014 and increased the rate of interest from LIBOR plus a range of 175 basis points to 180 basis points to LIBOR plus a range of 200 basis points to 225 basis points, depending upon the average balance outstanding on the line.
We have no reason to believe these arrangements will not be renewed at maturity. Additional loans and securities are available that can be pledged as collateral for future borrowings from the Federal Reserve Bank above the current lendable collateral value.

As a result of the Corporation s management of liquid assets and the ability to generate liquidity through liability funding, management believes that the Corporation maintains overall liquidity sufficient to satisfy its operational requirements and contractual obligations.

Capital Resources

The Corporation s and the Bank s actual capital amounts and ratios are presented in the following table.

TABLE 11: Capital Ratios

Effects of Inflation						

The effect of changing prices on financial institutions is typically different from other industries as the Corporation s assets and liabilities are monetary in nature. Interest rates are significantly impacted by inflation, but neither the timing nor the magnitude of the changes is directly related to price level indices. The effects of inflation on interest rates, loan demand and deposits are reflected in the consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no significant changes from the quantitative and qualitative disclosures made in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2009.

ITEM 4. CONTROLS AND PROCEDURES

The Corporation s management, including the Corporation s Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of the Corporation s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Corporation s disclosure controls and procedures were effective as of September 30, 2010 to ensure that information required to be disclosed by the Corporation in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and that such information is accumulated and communicated to the Corporation s management, including the Corporation s Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that the Corporation s disclosure controls and procedures will detect or uncover every situation involving the failure of persons within the Corporation or its subsidiary to disclose material information required to be set forth in the Corporation s periodic reports.

Management of the Corporation is also responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). There were no changes in the Corporation s internal control over financial reporting during the Corporation s third quarter ended September 30, 2010 that have materially affected, or are reasonably likely to materially affect, the Corporation s internal control over financial reporting.

34

PART II OTHER INFORMATION

ITEM 1A. RISK FACTORS

There have been no material changes in the risk factors faced by the Corporation from those disclosed under Part I, Item 1A. Risk Factors in the Corporation s Annual Report on Form 10-K for the year ended December 31, 2009 or disclosed under Part II Other Information, Item 1A. Risk Factors in the Corporation s Quarterly Report on Form 10-Q for the quarter ended June 30, 2010.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There have been no purchases of the Corporation s Common Stock during 2010.

In connection with the Corporation s sale to the Treasury of its Series A Preferred Stock and Warrant under the Capital Purchase Program, there are limitations on the Corporation s ability to purchase Common Stock prior to the earlier of January 9, 2012 or the date on which Treasury no longer holds any of the Series A Preferred Stock. Prior to such time, the Corporation generally may not purchase any Common Stock without the consent of the Treasury.

ITEM 6. EXHIBITS

- 3.1 Articles of Incorporation of C&F Financial Corporation (incorporated by reference to Exhibit 3.1 to Form 10-KSB filed March 29, 1996)
