Table of Contents

HARVARD BIOSCIENCE, INC. AND SUBSIDIARIES

Notes to Unaudited Consolidated Financial Statements

1. Basis of Presentation and Summary of Significant Accounting Policies

Basis of Presentation

The unaudited consolidated financial statements of Harvard Bioscience, Inc. and its wholly-owned subsidiaries (collectively, Harvard Bioscience, the Company, our or we) as of June 30, 2012 and for the three and six months ended June 30, 2012 and 2011 have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) have been condensed or omitted pursuant to such rules and regulations. The December 31, 2011 consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by U.S. GAAP. However, the Company believes that the disclosures are adequate to make the information presented not misleading. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in the Company s Annual Report on Form 10-K for the fiscal year ended December 31, 2011, which was filed with the SEC on March 15, 2012.

In the opinion of management, all adjustments, which include normal recurring adjustments necessary to present a fair statement of financial position as of June 30, 2012, results of operations for the three and six months ended June 30, 2012 and 2011 and cash flows for the six months ended June 30, 2012 and 2011, as applicable, have been made. The results of operations for the three and six months ended June 30, 2012 are not necessarily indicative of the operating results for the full fiscal year or any future periods.

Summary of Significant Accounting Policies

The accounting policies underlying the accompanying unaudited consolidated financial statements are those set forth in Note 2 to the consolidated financial statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2011, which was filed with the SEC on March 15, 2012.

2. Recently Issued Accounting Pronouncements

In July 2012, the FASB issued Accounting Standards Update No. 2012-02, *Intangibles- Goodwill and Other- Testing Indefinite-Lived Intangible Assets for Impairment (ASU 2012-02)*. Under the amendments in this update, the Company has the option first to assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events or circumstances, the Company concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the Company is not required to take further action. However, if the Company concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount in accordance with subtopic 350-30. Under the amendments in this update, the Company has the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. The Company may resume performing the qualitative assessment in any subsequent period. The provisions of this update will be effective for the Company in fiscal years beginning after September 15, 2012, and for the interim periods within fiscal years with early adoption permitted. The Company believes the adoption of this new guidance will not have a material impact on its consolidated results of operations or financial position.

Table of Contents**3. Goodwill and Other Intangible Assets**

Intangible assets consist of the following:

	June 30, 2012		December 31, 2011		Weighted Average Life (a)
	(in thousands)				
	Gross	Accumulated Amortization	Gross	Accumulated Amortization	
Amortizable intangible assets:					
Existing technology	\$ 13,170	\$ (9,553)	\$ 12,405	\$ (9,101)	5.5 Years
Tradename	6,213	(1,543)	5,840	(1,339)	12.2 Years
Distribution agreement/customer relationships	21,327	(7,137)	20,997	(6,438)	11.6 Years
Patents	9	(7)	9	(6)	3.8 Years
Total amortizable intangible assets	40,719	\$ (18,240)	39,251	\$ (16,884)	
Unamortizable intangible assets:					
Goodwill	35,369		34,209

Total goodwill and other indefinite lived intangible assets	36,630		35,478		
Total intangible assets	\$ 77,349		\$ 74,729		

(a) Weighted average life is as of June 30, 2012

The change in the carrying amount of goodwill for the six months ended June 30, 2012 was as follows:

Goodwill rollforward

	(in thousands)
Balance at December 31, 2011	\$ 34,209
Goodwill arising from business combinations	1,232
Effect of change in foreign currencies	(72)
Balance at June 30, 2012	\$ 35,369

The balance of goodwill and intangible assets at June 30, 2012 and December 31, 2011 were related to the Life Science Research Tools (LSRT) segment.

Intangible asset amortization expense was \$0.7 million for the three months ended June 30, 2012 and 2011. Intangible asset amortization expense was \$1.4 million and \$1.3 million for the six months ended June 30, 2012 and 2011, respectively. Amortization expense of existing amortizable intangible assets is currently estimated to be \$2.8 million for the year ending December 31, 2012, \$2.6 million for the year ending December 31, 2013, \$2.4 million for the year ending December 31, 2014, \$2.1 million for the year ending December 31, 2015 and \$2.0 million for the year ending December 31, 2016.

4. Inventories

Inventories consist of the following:

	June 30, 2012	December 31, 2011
	(in thousands)	
Finished goods	\$ 8,198	\$ 8,372
Work in process	805	626
Raw materials	8,743	9,162
Total	\$ 17,746	\$ 18,160

5. Restructuring and Other Exit Costs

2012 Restructuring Plans

During the quarter ended March 31, 2012, the management of Harvard Bioscience initiated a plan to reduce operating expenses at Panlab s.l., its Harvard Apparatus Spain subsidiary. The Company recorded restructuring charges of approximately \$0.2 million representing severance payments. No charges were incurred beyond the first quarter of 2012 on this matter.

Table of Contents

Activity and liability balances related to these charges were as follows:

	Severance and Related Costs	Total
Restructuring charges	\$ 150	\$ 150
Cash payments	(150)	(150)
Restructuring balance at June 30, 2012	\$	\$

2011 Restructuring Plan

During the quarter ended September 30, 2011, the management of Harvard Bioscience initiated a plan to relocate its Hoefer subsidiary's San Francisco, California facility as part of a business improvement initiative. The Company recorded restructuring charges of approximately \$0.5 million, which included \$0.3 million in fixed asset write offs, \$0.1 million in severance payments and \$0.1 million in other expenses.

Activity and liability balances related to these charges were as follows:

	Severance and Related Costs	Fixed Asset Write offs	Other	Total
		(in thousands)		
Restructuring charges	\$ 78	\$ 307	\$ 110	\$ 495
Cash payments	(33)		(180)	(213)
Non-cash charges		(307)	70	(237)
Restructuring balance at December 31, 2011	45			45
Cash payments	(45)			(45)
Restructuring balance at June 30, 2012	\$	\$	\$	\$

Aggregate restructuring charges for the 2012 Restructuring Plan and the 2011 Restructuring Plan were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(in thousands)		(in thousands)	
Restructuring charges (credits)	\$ (13)	\$ (28)	\$ 137	\$ (28)

6. Acquisitions**AHN Biotechnologie GmbH**

On February 3, 2012, the Company acquired all issued and outstanding shares of AHN Biotechnologie GmbH (AHN) for approximately \$2.0 million. The Company funded the acquisition from its existing cash balances.

AHN is a manufacturer of plastic laboratory consumables which include pipettes, pipette tips, PCR tubes and spin columns. AHN is located in Nordhausen, Germany. This acquisition is complementary to the Company's molecular biology product line.

Table of Contents

The aggregate purchase price for this acquisition was preliminarily allocated to tangible and intangible assets acquired as follows:

	(in thousands)
Tangible assets	\$ 1,647
Liabilities assumed	(1,580)
Net assets assumed	67
Goodwill and intangible assets:	
Goodwill	1,087
Technology	132
Customer relationships	412
Trade name	310
Total goodwill and intangible assets	1,941
 Acquisition purchase price	 \$ 2,008

The results of operations for AHN have been included in the LSRT segment in the Company's consolidated financial statements from the date of acquisition. The financial results of this acquisition are considered immaterial for the purposes of proforma financial statement disclosures. Goodwill recorded as a result of the acquisition of AHN is not deductible for tax purposes.

Modular SFC, Inc.

On May 31, 2012, the Company, through its Harvard Apparatus U.S. division, acquired substantially all of the assets of Modular SFC, Inc. (Modular) for approximately \$0.5 million. The Company funded the acquisition from its existing cash balances.

Consideration for the acquisition comprised of the following :

	(in thousands)
Cash	\$ 500
Contingent consideration	20
Total	\$ 520

The aggregate purchase price for this acquisition was allocated to tangible and intangible assets acquired as follows:

	(in thousands)
Tangible assets	\$ 30
 Net assets assumed	 30
Goodwill and intangible assets:	
Goodwill	145
Technology	200
Customer relationships	50
Trade name	95
 Total goodwill and intangible assets	 490

Acquisition purchase price	\$ 520
----------------------------	--------

The results of operations for Modular have been included in the LSRT segment in the Company's consolidated financial statements from the date of acquisition. The financial results of this acquisition are considered immaterial for the purposes of proforma financial statement disclosures. Goodwill recorded as a result of the acquisition of Modular is deductible for tax purposes.

Direct acquisition costs recorded in other, net in our consolidated statements of operations, were \$0.1 million and \$0.3 million respectively, for the three and six months ended June 30, 2012 for the above acquisitions.

7. Warranties

Warranties are estimated and accrued at the time sales are recorded. A rollforward of product warranties is as follows:

	Beginning Balance	Payments	Additions	Ending Balance
	(in thousands)			
Year ended December 31, 2011	\$ 158	\$ (58)	\$ 44	\$ 144
Six months ended June 30, 2012	\$ 144	\$ (57)	\$ 86	\$ 173

Table of Contents**8. Employee Benefit Plans**

Certain of the Company's United Kingdom subsidiaries, Harvard Apparatus Limited and Biochrom Limited, maintain contributory, defined benefit or defined contribution pension plans for substantially all of their employees. The components of the Company's defined benefit pension expense were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(in thousands)			
Components of net periodic benefit cost:				
Service cost	\$ 73	\$ 56	\$ 158	\$ 112
Interest cost	188	211	386	424
Expected return on plan assets	(131)	(157)	(267)	(315)
Net amortization loss	49	36	100	72
Net periodic benefit cost	\$ 179	\$ 146	\$ 377	\$ 293

In each of the three month periods ended June 30, 2012 and 2011, the Company contributed \$0.2 million to its defined benefit plans. In each of the six month periods ended June 30, 2012 and 2011, the Company contributed \$0.4 million to its defined benefit plans. The Company expects to contribute approximately \$0.4 million to its defined benefit plans during the remainder of 2012.

9. Leases

The Company has noncancelable operating leases for office and warehouse space expiring at various dates through 2017.

Rent expense, which is recorded on a straight-line basis, is estimated to be \$1.2 million for the year ending December 31, 2012. Rent expense was \$0.6 million and \$0.8 million for the six months ended June 30, 2012 and 2011, respectively. Future minimum lease payments for operating leases, with initial or remaining terms in excess of one year at June 30, 2012, are as follows:

	Operating Leases (in thousands)
2013	\$ 1,047
2014	1,005
2015	890
2016	679
2017	418
Thereafter	130
Net minimum lease payments	\$ 4,169

10. Capital Stock*Employee Stock Purchase Plan (ESPP)*

In 2000, the Company approved the ESPP. Under the ESPP, participating employees can authorize the Company to withhold a portion of their base pay during consecutive six-month payment periods for the purchase of shares of the Company's common stock. At the conclusion of the period, participating employees can purchase shares of the Company's common stock at 85% of the lower of the fair market value of the Company's common stock at the beginning or end of the period. Shares are issued under the plan for the six-month periods ending June 30 and December 31. Under this plan, 500,000 shares of common stock are authorized for issuance, of which 435,972 shares were issued as of June 30, 2012. During the three and six months ended June 30, 2012, the Company issued 25,597 shares of the Company's common stock under the

Edgar Filing: HARVARD BIOSCIENCE INC - Form 10-Q

ESPP. During the three and six months ended June 30, 2011, the Company issued 22,587 shares of the Company's common stock under the ESPP.

Table of Contents*Stock Option Plans*

The Company accounts for share-based payment awards in accordance with the provisions of FASB ASC 718 *Compensation- Stock Compensation*, which requires the Company to recognize compensation expense for all share-based payment awards made to employees and directors including employee stock options, restricted stock units (RSUs) and employee stock purchases related to the ESPP.

On May 24, 2012, the Board of Directors approved the grant, as of June 1, 2012, of 349,295 RSUs and 1,210,934 stock options under the Third Amended and Restated 2000 Stock Option and Incentive Plan (2000 Plan). The RSUs were valued at the closing stock price on the date of grant. The Company utilized the Black-Scholes valuation model for estimating the fair value of the stock-based compensation.

Stock option and RSU activity under the Stock Option Plans for the six months ended June 30, 2012 was as follows:

	Available for Grant	Stock Options		Restricted Stock Units	
		Stock Options Outstanding	Weighted Average Exercise Price	Restricted Stock Units Outstanding	Grant Date Fair Value
Balance at December 31, 2011	2,700,645	8,519,575	\$ 4.52	539,450	\$ 4.32
Granted	(1,560,229)	1,210,934	3.59	349,295	3.57
Fungible share adjustment for RSU s granted	(275,943)				
Exercised		(97,500)	4.09		
Vested (RSU s)				(164,090)	
Shares withheld for taxes	45,912				
Cancelled / forfeited	959,962	(912,500)	6.58	(47,462)	4.21
Fungible share adjustment for RSU s cancelled	11,109				
Balance at June 30, 2012	1,881,456	8,720,509	\$ 4.19	677,193	\$ 3.97

The following assumptions were used to estimate the fair value of stock options and RSU s granted during the three and six month periods ended June 30, 2012 and 2011:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Volatility	55.07 %	54.24 %	55.09 %	54.24 %
Risk-free interest rate	0.78 %	2.01 %	0.80 %	2.01 %
Expected holding period (in years)	5.98	5.94	5.98	5.94
Dividend Yield	0%	0%	0%	0%

The weighted average fair values of the options granted under the 2000 Plan during the six months ended June 30, 2012 was \$1.84, using the Black Scholes option-pricing model.

The Company used historical volatility to estimate the expected stock price volatility assumption. Historical volatility was determined by calculating the mean reversion of the daily-adjusted closing stock price. The risk-free interest rate assumption is based upon observed U.S. Treasury bill interest rates (risk free) appropriate for the term of the Company s employee stock options. The expected holding period of employee stock options represents the period of time options are expected to be outstanding and is based on historical experience. The vesting period is generally 4 years and the contractual life is 10 years.

Stock-based compensation expense for the three and six months ended June 30, 2012 and 2011 consisted of stock-based compensation expense related to employee stock options, RSUs and the ESPP.

Table of Contents

Stock-based compensation expense for the three and six months ended June 30, 2012 and 2011, respectively, was allocated as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(in thousands)			
Cost of product revenues	\$ 22	\$ 20	\$ 38	\$ 34
Sales and marketing	29	26	90	64
General and administrative	661	609	1,275	1,109
Research and development	6	3	12	3
Total stock-based compensation	\$ 718	\$ 658	\$ 1,415	\$ 1,210

The Company did not capitalize any stock-based compensation.

Weighted Average Common Shares Outstanding

Basic income per share is based upon net income divided by the number of weighted average common shares outstanding during the period. The calculation of diluted net income per share assumes conversion of stock options into common stock using the treasury method. The weighted average number of shares used to compute basic and diluted earnings per share consists of the following:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Basic	28,767,786	28,428,019	28,738,772	28,408,437
Effect of assumed conversion of employee and director stock options and restricted stock units	827,463	1,759,223	895,016	1,435,509
Diluted	29,595,249	30,187,242	29,633,788	29,843,946

Excluded from the shares used in calculating the diluted earnings per common share in the above table are options to purchase approximately 4,466,845 and 2,332,780 shares of common stock for the three months ended June 30, 2012 and 2011, respectively, as the impact of these shares would be anti-dilutive. Excluded from the shares used in calculating the diluted earnings per common share in the above table are options to purchase approximately 4,399,239 and 2,964,255 shares of common stock for the six months ended June 30, 2012 and 2011, respectively, as the impact of these shares would be anti-dilutive.

11. Revolving Credit Facility

On August 7, 2009, the Company entered into an amended and restated \$20.0 million revolving credit loan agreement with Bank of America, as agent, and Bank of America and Brown Brothers Harriman & Co as lenders. On September 30, 2011, the Company entered into the First Amendment to the Amended and Restated Revolving Credit Loan Agreement (the Amendment) with Bank of America as agent, and Bank of America and Brown Brothers Harriman & Co as lenders. The Amendment extends the maturity date of our credit facility to August 7, 2013 and reduces our interest rate to the London Interbank Offered Rate (LIBOR) plus 3.0%. At June 30, 2012, the interest rate for the facility was 3.25%. The amended and restated facility includes covenants relating to income, debt coverage and cash flow, as well as minimum working capital requirements. The credit facility also contains limitations on our ability to incur additional indebtedness and requires lender approval for acquisitions funded with cash, promissory notes and/or other consideration in excess of \$6.0 million and for acquisitions funded solely with equity in excess of \$10.0 million.

As of June 30, 2012 and December 31, 2011, the Company had \$16.1 million and \$16.3 million, respectively, outstanding under its credit facility. The borrowings under the credit facility were primarily related to the acquisitions, and stock repurchases. As of June 30, 2012, the Company was in compliance with all financial covenants contained in the credit facility; the Company was not subject to any borrowing restrictions under the financial covenants and had available borrowing capacity under our revolving credit facility of \$3.9 million.

Table of Contents**12. Income Tax**

The effective income tax rate was 27.9% and 32.1% for the three and six months ended June 30, 2012, respectively. The rates for both periods included benefits related to foreign tax rate differential and research and development tax credits, and also included in the first quarter of 2012 were offsetting discrete expense items related to acquisition costs and stock compensation expense. As described in Note 13 in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011, the Company had recorded an uncertain tax liability of \$0.7 million at the end of 2010. In January 2011, the statute of limitations expired for the return that included \$0.5 million of these uncertain tax positions with no change from the tax authorities. Accordingly, the uncertain tax liability of \$0.5 million and the associated accrued interest was reversed in the first quarter of 2011 as a discrete item and was included as a benefit in the *Income tax expense* line item in the Consolidated Statements of Income and Comprehensive Income.

13. Segment Reporting

The Company has two reportable segments namely the LSRT segment and Regenerative Medicine Device (RMD) segment. The Company has two operating segments aggregated under the LSRT segment. These operating segments have similar products and services, customer channels, distribution methods and historical margins. The LSRT segment is engaged in the development, manufacture and marketing of specialized products, primarily apparatus and scientific instruments, used to advance life science research at pharmaceutical and biotechnology companies, universities and government laboratories worldwide.

The RMD segment is engaged in the development, manufacturing and marketing of devices used by clinicians and researchers in the field of regenerative medicine.

Non operating expenses that are not allocated to operating divisions are under the caption Unallocated Expenses . Unallocated expenses also include certain corporate related expenses that are not allocable to the operating segments.

Summarized financial information on the Company's reportable segments for the three and six months ended June 30, 2012 and 2011 are shown in the following table (in thousands). There were no inter segment revenues.

	LSRT	RMD	Unallocated	Total
Three months ended June 30, 2012				
Total revenues	\$ 28,496	\$	\$	\$ 28,496
Operating income (loss)	4,140	(1,602)	(1,239)	1,299
Income (loss) before income taxes	3,870	(1,602)	(1,195)	1,073
Total assets	129,000	154	377	129,531
Three months ended June 30, 2011				
Total revenues	27,143			27,143
Operating income (loss)	4,133	(580)	(1,034)	2,519
Income (loss) before income taxes	3,910	(580)	(1,330)	2,000
Total assets	128,629	20	361	129,010
Six months ended June 30, 2012				
Total revenues	56,818			56,818
Operating income (loss)	7,774	(2,786)	(2,462)	2,526
Income (loss) before income taxes	7,124	(2,786)	(2,424)	1,914
Total assets	129,000	154	377	129,531
Six months ended June 30, 2011				
Total revenues	53,456			53,456
Operating income (loss)	7,568	(1,035)	(2,065)	4,468
Income (loss) before income taxes	7,106	(1,035)	(2,397)	3,674
Total assets	\$ 128,629	\$ 20	\$ 361	\$ 129,010

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.
Forward Looking Statements

This Quarterly Report on Form 10-Q contains statements that are not statements of historical fact and are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The forward-looking statements are principally, but not exclusively, contained in Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Forward-looking statements include, but are not limited to, statements about management's confidence or expectations, and our plans, objectives, expectations and intentions that are not historical facts. In some cases, you can identify forward-looking statements by terms such as may, will, should, could, would, expects, plans, anticipates, believes, goals, sees, estimates, projects, predicts, intends, think, potential, objectives, optimistic, strategy, and similar expressions intended to identify forward-looking statements. These statements reflect our current views with respect to future events and are based on assumptions and subject to risks and uncertainties. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Factors that may cause the Company's actual results to differ materially from those in the forward-looking statements include the Company's failure to identify potential acquisition candidates, successfully integrate acquired businesses or technologies, successfully negotiate favorable pricing and other terms with acquisition candidates to enable potential acquisitions to close, complete consolidations of business functions, expand our distribution channels, expand our product offerings, introduce new products or commercialize new technologies on a timely basis, including in the field of regenerative medicine, unanticipated costs relating to acquisitions, unanticipated costs arising in connection with the Company's consolidation of business functions and any restructuring initiative, lack of demand or decreased demand for the Company's products due to changes in our customers' needs, success of our efforts with our distributor to promote sales of our microvolume spectrophotometer product and success of our strategies to increase the sales of other products, our ability to obtain regulatory approvals, including FDA approval, for our products including any products in the field of regenerative medicine, the current size or anticipated size of the regenerative medicine market, the existence and size of opportunities in the regenerative medicine market, our financial position, general economic outlook, or other circumstances, overall economic trends, the seasonal nature of purchasing in Europe, economic, political and other risks associated with international revenues and operations, the impact of the current economic and financial crisis, additional costs of complying with recent changes in regulatory rules applicable to public companies, our ability to manage our growth, our ability to retain key personnel, competition from our competitors, technological changes resulting in our products becoming obsolete, future changes to the operations or the activities of our subsidiaries due to manufacturing consolidations, our ability to meet the financial covenants contained in our credit facility, our ability to protect our intellectual property and operate without infringing on others' intellectual property, potential costs of any lawsuits to protect or enforce our intellectual property, economic and political conditions generally and those affecting pharmaceutical and biotechnology industries, research funding levels from endowments at our university customers, impact of any impairment of our goodwill or intangible assets, our acquisition of Genomic Solutions failing to qualify as a tax-free reorganization for federal tax purposes, our ability to utilize deferred tax assets after the release of our valuation allowances, the amount of earn-out consideration that the Company receives in connection with the disposition of the Company's Capital Equipment Business segment and factors that may impact the receipt of this consideration, such as the revenues of the businesses disposed of, plus factors described under the heading Item 1A. Risk Factors in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011, filed with the SEC on March 15, 2012. Our results may also be affected by factors of which we are not currently aware. Also, these forward-looking statements represent our estimates and assumptions only as of the date of this report. We may not update these forward-looking statements, even though our situation may change in the future.

Edgar Filing: HARVARD BIOSCIENCE INC - Form 10-Q

unless we have obligations under the federal securities laws to update and disclose material developments related to previously disclosed information.

General

Harvard Bioscience consists of a Life Science Research Tools (LSRT) business and a Regenerative Medicine Device (RMD) business.

Table of Contents

Our LSRT strategy is to have a broad range of highly specialized but relatively inexpensive products that have strong positions in niche markets in life science research. We believe that:

having a broad product offering reduces the risk of being dependent on a single technology;

having relatively inexpensive products reduces the volatility associated with expensive capital equipment; and

focusing on niche markets reduces head-to-head competition with the major instrument companies.

We seek to grow this range of products through a combination of organic growth driven by internal development of new products, direct marketing, distribution channel expansion and the acquisition of closely related products. We use acquisitions to expand our product offerings because we believe we can use our well-established brands and distribution channels to accelerate the growth of these acquired products. We also believe that our expertise in operational management frequently allows us to improve profitability at acquired companies.

In addition to driving growth in our core research markets, we have been investing to create new products to address what we believe is a long term growth opportunity in the emerging field of regenerative medicine. Regenerative medicine is using stem cells to repair damaged organs and to grow organs outside the body for transplant. The U.S. Department of Health and Human Services has projected that the U.S. market for regenerative medicine may be \$100 billion in the coming years. The government's estimate appears to include the value of all regenerative medicine protocols and therapies, including potential cost savings versus current methodologies. Our strategy is not to become a therapeutics company, but instead, to provide tools to researchers and clinicians in the field of regenerative medicine. These new tools currently fall into two main categories: bioreactors for growing tissue and organs outside the body; and injectors for stem cell therapy. These new tools we are creating are being built on our existing technologies such as our market leading Harvard Apparatus precision syringe pumps and market leading Hugo-Sachs isolated organ systems.

Our strategy in our RMD business is to (i) create devices in collaboration with leading surgeons, (ii) build these devices using our existing technologies and brands in an effort to reduce the investment needed to get the devices to market, and (iii) develop devices with significant disposable components to improve clinical safety and allow us to participate on a per-procedure basis following the sale of an instrument.

Our first regenerative medicine tool, the InBreath hollow organ bioreactor, was used to perform the world's first human transplant of a regenerated bronchus. Dr. Paolo Macchiarini of the Karolinska University Hospital and Karolinska Institutet, in collaboration with his colleagues, reported this success in *The Lancet*, a leading general medicine journal, in November 2008. We have licensed the InBreath hollow organ bioreactor from Dr. Macchiarini's team, and worked to make it a commercial device. We believe that it is the world's first commercially available bioreactor that has been used to perform a human transplant of a regenerated organ. We believe it marks an important milestone in the development of the regenerative medicine field as the tools evolve from concepts to commercial quality products.

During the first half of 2010, one of our collaborators, Dr. Harald Ott at Massachusetts General Hospital (MGH) succeeded in regenerating a lung and subsequently transplanting it into a rat. In collaboration with Dr. Ott and MGH, we designed and developed a novel bioreactor, LB-2 Solid organ bioreactor, that was used to grow the lung. The work was published online in *Nature Medicine* in July 2010. The bioreactor used by Dr. Ott was a modified version of one of our market leading Hugo-Sachs isolated organ systems.

In June 2011, the InBreath bioreactor was used for the world's first successful transplantation of a synthetic tissue engineered windpipe. For the first time in history, a patient was given a new trachea made from a synthetic scaffold seeded with his own stem cells in a bioreactor. The cells were grown on the scaffold inside the bioreactor for two days before transplantation into the patient. Because the cells used to regenerate the trachea were the patient's own, there has been no rejection of the transplant, and the patient is not taking immunosuppressive drugs. The patient had been suffering from late stage tracheal cancer, which before this surgery would have been inoperable, and is now alive and well one year after the surgery. The operation was performed at the Karolinska University Hospital in Huddinge, Stockholm, by Dr. Paolo Macchiarini and colleagues. Dr. Macchiarini led an international team of medical professionals and other individuals who designed and built the nanocomposite tracheal scaffold, and we produced a specifically designed bioreactor used to seed the scaffold with the patient's own stem cells. The success of this transplant surgery was noted in *The Lancet* on November 24, 2011.

In November 2011, a second patient was given a new trachea made from a synthetic scaffold seeded with his own stem cells in a bioreactor. The patient had been suffering from late stage tracheal cancer. The patient was discharged from the hospital in January 2012. On March 5, 2012, this patient died. The official cause of death recorded on the death certificate was pneumonia secondary to tracheal cancer. We know of no evidence

Edgar Filing: HARVARD BIOSCIENCE INC - Form 10-Q

that either the scaffold or the bioreactor played any part in the patient's death.

In June 2012, the InBreath bioreactors were used for the world's first and second successful laryngotracheal implants, using synthetic laryngotracheal scaffolds seeded with cells taken from the patients' bone marrow. The surgeries took place at Krasnodar Regional Hospital in Krasnodar, Russia on June 19th and June 21st. Each bioreactor was loaded with a synthetic scaffold in the shape of the patient's original organ. The scaffolds were then seeded with the patient's own stem cells. Over the course of about two days, the bioreactor promoted proper cell seeding and development. Because the patients' own stem cells were used, their bodies have accepted the transplants without the use of immunosuppressive drugs. The recipients of the implants are recovering well.

Table of Contents

In addition to the bioreactors described above, we have also made progress on our clinical version of one of our market leading Harvard Apparatus research syringe pumps. The research version of this pump is called the PHD Ultra Nanomite stem cell therapy injection system. We anticipate that this pump will be used to inject cells into damaged tissue in cell therapy. We expect to submit this pump to the regulatory agencies in 2012 for approval.

We are also actively evaluating strategic alternatives to fund the RMD business going forward.

While we expect the initiatives discussed above to positively impact our business, the success of these initiatives is subject to a number of factors, including fluctuations in foreign exchange rates, the current economic and financial condition and their impact on our customers and our ability to obtain credit on terms favorable to us, the competitiveness of our new products, the strength of our intellectual property underlying these products, the success of our marketing efforts and those of our distributors and the other factors described under the heading Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, which was filed with the SEC on March 15, 2012.

Financing

On August 7, 2009, we entered into an amended and restated \$20.0 million revolving credit loan agreement with Bank of America, as agent, and Bank of America and Brown Brothers Harriman & Co. as lenders. On September 30, 2011, we entered into the First Amendment to the Amended and Restated Revolving Credit Loan Agreement (the Amendment) with Bank of America as agent, and Bank of America and Brown Brothers Harriman & Co. as lenders. The Amendment extends the maturity date of our credit facility to August 7, 2013 and reduces our interest rate to the London Interbank Offered Rate (LIBOR) plus 3.0%. At June 30, 2012, the interest rate for the facility was 3.25%. The amended and restated facility includes covenants relating to income, debt coverage and cash flow, as well as minimum working capital requirements. The credit facility also contains limitations on our ability to incur additional indebtedness and requires lender approval for acquisitions funded with cash, promissory notes and/or other consideration in excess of \$6.0 million and for acquisitions funded solely with equity in excess of \$10.0 million.

At June 30, 2012, we had borrowings of \$16.1 million outstanding under our credit facility with Bank of America and Brown Brothers Harriman & Co.

Historically, we have funded acquisitions with debt, capital raised by issuing equity and cash flow from operations. In order to continue the acquisition portion of our growth strategy beyond what our current cash balances and cash flow from operations can support, we will need to raise more capital, either by incurring additional debt, issuing equity or a combination thereof.

Components of Operating Income

Revenues. We generate revenues by selling apparatus, instruments, devices and consumables through our catalogs, our distributors, our direct sales force and our website. For products primarily priced under \$10,000, we typically distribute a new, comprehensive catalog every one to three years, initially in a series of bulk mailings, first to our existing customers, followed by mailings to targeted markets of potential customers. Over the life of the catalog, distribution will also be made periodically to potential and existing customers through direct mail and trade shows and in response to e-mail and telephone inquiries. From time to time, we also distribute catalog supplements that promote selected areas of our catalog or new products to targeted subsets of our customer base. Future editions of our comprehensive catalog and our catalog supplements will be timed at least in part with the incidence of new product introductions. Our end user customers are research scientists at pharmaceutical and biotechnology companies, universities and government laboratories. Revenue from catalog sales in any period is influenced by the amount of time elapsed since the last mailing of the catalog, the number of catalogs mailed and the number of new items included in the catalog. We launched our latest comprehensive catalog in March 2010, with approximately 850 pages, 11,000 products and approximately 65,000 copies printed. Revenues from direct sales to end users represented approximately 57% and 58%, respectively, of our revenues for the six months ended June 30, 2012 and for the year ended December 31, 2011.

Products sold under brand names of distributors, including GE Healthcare, are typically priced in the range of \$5,000-\$15,000. They are mainly scientific instruments like spectrophotometers and plate readers that analyze light to detect and quantify a very wide range of molecular and cellular processes or apparatus like gel electrophoresis units. We also use distributors for both our catalog products and our higher priced products, for sales in locations where we do not have subsidiaries or where we have distributors in place for acquired businesses. For the six months ended June 30, 2012 and for the year ended December 31, 2011, approximately 43% and 42%, respectively, of our revenues were derived from sales to distributors.

For the six months ended June 30, 2012, approximately 65% of our revenues were derived from products we manufacture; approximately 23% were derived from distributed products sold under our brand names and approximately 12% were derived from complementary products we

Edgar Filing: HARVARD BIOSCIENCE INC - Form 10-Q

distribute in order to provide the researcher with a single source for all equipment needed to conduct a particular experiment. For the year ended December 31, 2011, approximately 62% of our revenues were derived from products we manufacture; approximately 25% were derived from distributed products sold under our brand names and approximately 13% were derived from complementary products we distribute in order to provide the researcher with a single source for all equipment needed to conduct a particular experiment.

Table of Contents

For the six months ended June 30, 2012 and for the year ended December 31, 2011, approximately 41% of our revenues were derived from sales made by our non-U.S. operations. A portion of our international sales during these periods consisted of sales to GE Healthcare, the distributor for our spectrophotometers and plate readers. GE Healthcare distributes these products to customers around the world, including to many customers in the United States, from its distribution center in Upsalla, Sweden. As a result, we believe our international sales would have been a lower percentage of our revenues if we had shipped our products directly to our end-users. Changes in the relative proportion of our revenue sources between catalog sales, direct sales and distribution sales are primarily the result of a different sales proportion of acquired companies.

Cost of product revenues. Cost of product revenues includes material, labor and manufacturing overhead costs, obsolescence charges, packaging costs, warranty costs, shipping costs and royalties. Our cost of product revenues may vary over time based on the mix of products sold. We sell products that we manufacture and products that we purchase from third parties. The products that we purchase from third parties have a higher cost of product revenues as a percent of revenue because the profit is effectively shared with the original manufacturer. We anticipate that our manufactured products will continue to have a lower cost of product revenues as a percentage of revenues as compared with the cost of non-manufactured products for the foreseeable future. Additionally, our cost of product revenues as a percent of product revenues will vary based on mix of direct to end user sales and distributor sales, mix by product line and mix by geography.

Sales and marketing expenses. Sales and marketing expense consists primarily of salaries and related expenses for personnel in sales, marketing and customer support functions. We also incur costs for travel, trade shows, demonstration equipment, public relations and marketing materials, consisting primarily of the printing and distribution of our catalogs, supplements and the maintenance of our websites. We may from time to time expand our marketing efforts by employing additional technical marketing specialists in an effort to increase sales of selected categories of products in our catalog. We may also from time to time expand our direct sales organizations in an effort to concentrate on key accounts or promote certain product lines.

General and administrative expenses. General and administrative expense consists primarily of salaries and other related costs for personnel in executive, finance, accounting, information technology and human relations functions. Other costs include professional fees for legal and accounting services, facility costs, investor relations, insurance and provision for doubtful accounts.

Research and development expenses. Research and development expense consists primarily of salaries and related expenses for personnel and spending to develop and enhance our products. Other research and development expense includes fees for consultants and outside service providers, and material costs for prototype and test units. We expense research and development costs as incurred. We believe that investment in product development is a competitive necessity and plan to continue to make these investments in order to realize the potential of new technologies that we develop, license or acquire for existing markets. Additionally, we are working to develop new products aimed at long term opportunities in the emerging field of regenerative medicine.

Stock-based compensation expenses. Stock-based compensation expense recognized under FASB ASC 718, *Compensation Stock Compensation*, was related to employee stock options, RSUs and the employee stock purchase plan and was recorded as a component of cost of product revenues, sales and marketing expenses, general and administrative expenses and research and development expenses.

Income Taxes. The effective income tax rate was 27.9% and 32.1% for the three and six months ended June 30, 2012, respectively. The rates for both periods included benefits related to foreign tax rate differential and research and development tax credits and also included in the first quarter of 2012 were offsetting discrete expense items related to acquisition costs and stock compensation expense. As described in Note 13 in the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2011, we had recorded an uncertain tax liability of \$0.7 million at the end of 2010. In January 2011, the statute of limitations expired for the return that included \$0.5 million of these uncertain tax positions with no change from the tax authorities. Accordingly, the uncertain tax liability of \$0.5 million and the associated accrued interest was reversed in the first quarter of 2011 as a discrete item and was included as a benefit in the *Income tax expense* line item in the Consolidated Statements of Income and Comprehensive Income.

Table of Contents*Selected Results of Operations**Three months ended June 30, 2012 compared to three months ended June 30, 2011:*

	Three Months Ended June 30,		Dollar Change	% Change
	2012	2011 (in thousands, unaudited)		
Revenues	\$ 28,496	\$ 27,143	\$ 1,353	5.0%
Cost of product revenues	14,881	14,358	523	3.6%
Gross margin percentage	47.8%	47.1%		1.4%
Sales and marketing expenses	4,743	4,271	472	11.1%
General and administrative expenses	4,902	4,206	696	16.5%
Research and development expenses	1,972	1,128	844	74.8%

Revenues.

Revenues increased \$1.4 million, or 5.0%, to \$28.5 million for the three months ended June 30, 2012 compared to \$27.1 million for the same period in 2011. Our acquisitions of CMA Microdialysis AB (CMA) in July 2011, AHN Biotechnologie GmbH (AHN) in February 2012 and Modular SFC, Inc. (Modular) in May 2012 contributed approximately \$1.3 million, or 4.9% to second quarter 2012 revenues. The effect of a stronger U.S. dollar decreased our second quarter revenues by \$0.6 million, or 2.1%, compared with the same period in 2011. Adjusting for the effect of foreign currency fluctuation and acquisitions, revenues were up \$0.7 million, or 2.2%, year-to-year and reflected organic growth across our Biochrom, Denville and Hoefler businesses.

Cost of product revenues.

Cost of product revenues increased \$0.5 million, or 3.6%, to \$14.9 million for the three months ended June 30, 2012 compared with \$14.4 million for the three months ended June 30, 2011. The increase in cost of product revenues included \$0.9 million, or 6.3%, attributable to our acquisitions of CMA, AHN and Modular. A stronger U.S. dollar caused a \$0.3 million, or 2.1%, favorable currency effect on the cost of product revenues for the three months ended June 30, 2012. Gross profit as a percentage of revenues increased to 47.8% for the three months ended June 30, 2012 compared with 47.1% for the same period in 2011. The increase in gross profit as a percentage of revenues was primarily due to a more favorable sales mix in the second quarter of 2012 compared with the second quarter of 2011.

Sales and marketing expense.

Sales and marketing expenses increased \$0.5 million, or 11.1%, to \$4.7 million for the three months ended June 30, 2012 compared with \$4.3 million for the three months ended June 30, 2011. In LSRT, sales and marketing expenses increased \$0.4 million, or 8.5%, to \$4.5 million, compared to \$4.2 million for the three months ended June 30, 2011 primarily due to \$0.2 million, or 3.7%, of expenses related to our acquisitions of CMA, AHN and Modular, and \$0.2 million, or 4.7%, mainly due to increased selling activities at our Denville business. In RMD, sales and marketing expenses increased \$0.1 million compared with the second quarter of 2011 primarily due to an increase in business development efforts.

General and administrative expense.

General and administrative expenses increased \$0.7 million, or 16.5% to \$4.9 million for the three months ended June 30, 2012 compared with \$4.2 million for the three months ended June 30, 2011. In LSRT, general and administrative expenses increased \$0.3 million, or 8.3%, to \$4.4 million, compared to \$4.1 million for the three months ended June 30, 2011 primarily due to our acquisitions of CMA and AHN. In RMD, general and administrative expenses increased \$0.4 million due to increased activity in our regenerative medicine device initiative.

Research and development expense.

Research and development expenses increased \$0.8 million, or 74.8% to \$2.0 million for the three months ended June 30, 2012 compared with \$1.1 million for the three months ended June 30, 2011. In LSRT, research and development expenses increased \$0.3 million, or 37.8%, to \$1.1 million, compared to \$0.8 million for the three months ended June 30, 2011 due to greater new product development activities at our Biochrom

Edgar Filing: HARVARD BIOSCIENCE INC - Form 10-Q

U.K. and Harvard Apparatus U.S. subsidiaries. In RMD, research and development expenses increased \$0.5 million, primarily due to increased activity in our stem cell therapy injector and bioreactor development.

Amortization of intangible assets.

Amortization of intangible assets expenses remained flat at \$0.7 million for the three months ended June 30, 2012 and 2011 and included amortization expenses of intangible assets related to our historical acquisitions.

Edgar Filing: HARVARD BIOSCIENCE INC - Form 10-Q

compared to \$8.2 million for the six months ended June 30, 2011 primarily due to \$0.3 million, or 3.2%, of expenses related to our acquisitions of CMA, AHN and Modular, and \$0.6 million, or 7.7%, mainly due to increased selling activities at our Denville business. In RMD, sales and marketing expenses increased \$0.2 million primarily due to an increase in business development efforts.

Table of Contents

General and administrative expense.

General and administrative expenses increased \$1.2 million, or 14.0% to \$9.8 million for the six months ended June 30, 2012 compared with \$8.6 million for the six months ended June 30, 2011. In LSRT, general and administrative expenses increased \$0.6 million, or 7.0%, to \$8.9 million, compared to \$8.3 million for the six months ended June 30, 2011 primarily due to our acquisitions of CMA and AHN. In RMD, general and administrative expenses increased \$0.6 million due to increased activity in our regenerative medicine device initiative.

Research and development expense.

Research and development expenses increased \$1.3 million, or 54.0% to \$3.7 million for the six months ended June 30, 2012 compared with \$2.4 million for the six months ended June 30, 2011. In LSRT, the research and development expenses increased \$0.3 million, or 17.8%, to \$2.1 million for the six months ended June 30, 2012, compared to \$1.8 million for the six months ended June 30, 2011 due to greater new product development initiatives at our Harvard Apparatus U.S. subsidiary. In RMD, research and development expenses increased \$1.0 million, primarily due to increased activity in our stem cell therapy injector and bioreactor development.

Amortization of intangible assets.

Amortization of intangible asset expenses increased \$0.1 million, or 6.2%, to \$1.4 million for the six months ended June 30, 2012 compared with \$1.3 million for the same period in 2011. The year-to-year increase in the amortization expense was primarily due to our acquisitions of CMA, AHN and Modular.

Other (expense) income, net.

Other expense and income, net, was \$0.6 million expense and \$0.8 million expense for the six months ended June 30, 2012 and 2011, respectively. Net interest expense was \$0.3 million for the six months ended June 30, 2012 compared to net interest expense of \$0.4 million for the six months ended June 30, 2011. The decrease in net interest expense was primarily due to lower average borrowings in the first half of 2012 compared to the first half of 2011. Other expense and income, net, for the six months ended June 30, 2012 and 2011, also included \$0.3 million and \$0.4 million, respectively, of primarily acquisition related expenses.

Income Taxes.

Income tax expense from continuing operations was approximately \$0.6 million for the six months ended June 30, 2012 and 2011. The effective income tax rate for continuing operations was 32.1% for the six months ended June 30, 2012, compared with 17.1% for the same period of 2011. The difference between our effective tax rate and the U.S. statutory tax rate for the six months ended June 30, 2012 was principally attributable to foreign tax rate differential and increased research and development tax credits partially offset by discrete expense items related to acquisition costs and stock compensation expense. The difference between our effective tax rate and the U.S. statutory tax rate for the six months ended June 30, 2011 was principally attributable to the reversal of uncertain tax liability of \$0.5 million and the associated accrued interest in the first quarter of 2011, foreign tax rate differential and increased research and development tax credits.

Liquidity and Capital Resources

Historically, we have financed our business through cash provided by operating activities, the issuance of common stock and preferred stock, and bank borrowings. Our liquidity requirements have arisen primarily from investing activities, including funding of acquisitions, and capital expenditures.

We ended the second quarter of 2012 with cash and cash equivalents of \$18.7 million compared to \$17.9 million at December 31, 2011. As of June 30, 2012 and December 31, 2011, we had \$16.1 million and \$16.3 million, respectively, of borrowings outstanding under our credit facility. Total cash and cash equivalents, net of debt was \$2.6 million and \$1.6 million at June 30, 2012 and December 31, 2011, respectively.

As of June 30, 2012 and December 31, 2011, cash and cash equivalents held by our foreign subsidiaries was \$16.9 million and \$15.9 million, respectively. These funds are not available for domestic operations unless the funds are repatriated. If we planned to or did repatriate these funds then U.S. federal and state income taxes would have to be recorded on such amounts. We currently have no plans and do not intend to repatriate any of our undistributed foreign earnings. These balances are considered permanently reinvested and will be used for foreign items including foreign acquisitions, capital investments and operations. It is impracticable to estimate the

Table of Contents

total tax liability, if any, which would be created by the future distribution of these earnings. In February 2012, we acquired all issued and outstanding shares of AHN, a German manufacturer, and utilized approximately \$2.0 million of our foreign cash on hand. During 2012, we plan to use approximately \$2.0 million additional foreign cash on hand for capital improvements at this new subsidiary.

Overview of Cash Flows

(in thousands, unaudited)

	Six Months Ended June 30,	
	2012	2011
Cash flows from operations:		
Net income	\$ 1,299	\$ 3,045
Other adjustments to operating cash flows	3,236	3,552
Changes in assets and liabilities	(382)	(3,802)
Net cash provided by operating activities	4,153	2,795
Investing activities:		
Acquisition, net of cash acquired	(2,863)	
Other investing activities	(607)	(988)
Net cash used in investing activities	(3,470)	(988)
Financing activities:		
Repayment of debt, net	(201)	(900)
Other financing activities	402	327
Net cash provided by (used in) financing activities	201	(573)
Effect of exchange rate changes on cash	(145)	809
Increase in cash and cash equivalents	\$ 739	\$ 2,043

Our operating activities generated cash of \$4.2 million for the six months ended June 30, 2012 compared to \$2.8 million for the six months ended June 30, 2011. The increase in cash flows from operations was primarily due to favorable changes to working capital year to year, partially offset by a lower net income due to increased spending in our RMD business.

Our investing activities used cash of \$3.5 million during the six months ended June 30, 2012 compared to \$1.0 million during the six months ended June 30, 2011. Investing activities during 2012 included acquisitions of businesses and purchases and sales of property, plant and equipment. Investing activities during 2011 included purchases and sales of property, plant and equipment and expenditures for our catalogs. In January 2012, we acquired intellectual property from Actimetrics for approximately \$0.4 million. In February 2012, we acquired AHN for approximately \$2.0 million. In May 2012, we acquired Modular for approximately \$0.5 million. These were funded from our existing cash balances. All of these payments were included in Acquisitions, net of cash acquired under investing activities. We spent \$0.1 million during the six months ended June 30, 2011 on catalog costs. We spent \$0.6 million and \$0.9 million in the six months ended June 30, 2012 and 2011, respectively, on capital expenditures. We currently expect to make approximately \$1.4 million of capital expenditures during the remainder of 2012.

Our financing activities have historically consisted of borrowings and repayments under a revolving credit facility, long-term debt, the issuance of preferred stock and common stock, including the common stock issued in our initial public offering, and repurchases of our common stock under our stock repurchase program. During the six months ended June 30, 2012, financing activities generated cash of \$0.2 million, compared to using cash of \$0.6 million during the six months ended June 30, 2011. During the six months ended June 30, 2012 and 2011 we repaid, net \$0.2 million and \$0.9 million, respectively, of debt under our credit facility. Other financing activities for the six months ended June 30, 2012 and 2011 included the net proceeds from the issuance of common stock of \$0.4 million and \$0.3 million, respectively.

Edgar Filing: HARVARD BIOSCIENCE INC - Form 10-Q

On August 7, 2009, we entered into an amended and restated \$20.0 million revolving credit loan agreement with Bank of America, as agent, and Bank of America and Brown Brothers Harriman & Co. as lenders. On September 30, 2011, we entered into the Amendment with Bank of America as agent, and Bank of America and Brown Brothers Harriman & Co. as lenders. The Amendment extends the maturity date of our credit facility to August 7, 2013 and reduces our interest rate to the London Interbank Offered Rate (LIBOR) plus 3.0%. The facility includes covenants relating to income, debt coverage and cash flow, as well as minimum working capital requirements. The credit facility also contains limitations on our ability to incur additional indebtedness and requires lender approval for acquisitions funded with cash, promissory notes and/or other consideration in excess of \$6.0 million and for acquisitions funded solely with equity in excess of \$10.0 million.

Table of Contents

Our forecast of the period of time through which our financial resources will be adequate to support our operations is a forward-looking statement that involves risks and uncertainties, and actual results could vary as a result of a number of factors. Based on our current operations and current operating plans, we expect that our available cash, cash generated from current operations and debt capacity will be sufficient to finance current operations and capital expenditures for 12 months and beyond. We are also currently exploring strategic alternatives to fund our RMD business going forward. This may involve incurring additional debt or raising equity capital for this business. Additional capital raising activities will dilute the ownership interests of existing stockholders to the extent we raise capital by issuing equity securities and we cannot assure you that we will be successful in raising additional capital on favorable terms or at all.

Impact of Foreign Currencies

We sell our products in many countries and a substantial portion of our sales, costs and expenses are denominated in foreign currencies, especially the British pound sterling, Euro and Swedish krona.

Changes in foreign currency exchange rates resulted in decreases in revenues of \$0.8 million and expenses of \$0.7 million during the six months ended June 30, 2012, compared to increases in revenues of \$1.2 million and expenses of \$0.9 million during the six months ended June 30, 2011.

The loss associated with the translation of foreign subsidiaries equity into U.S. dollars included as a component of comprehensive income, was approximately \$0.5 million during the six months ended June 30, 2012 compared to a gain of \$2.2 million during the six months ended June 30, 2011. In addition, currency exchange rate fluctuations included as a component of net income resulted in approximately \$0.1 million and \$33,000 in foreign currency losses during the six months ended June 30, 2012 and 2011, respectively.

As of June 30, 2012 and December 31, 2011, we had \$16.1 million and \$16.3 million, respectively, outstanding under our credit facility. The borrowings under our credit facility were primarily related to our acquisitions, and repurchases of our common stock under our stock repurchase program.

Critical Accounting Policies

The critical accounting policies underlying the accompanying unaudited consolidated financial statements are those set forth in Part II, Item 7 included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011 which was filed with the SEC on March 15, 2012.

Recent Accounting Pronouncements

In July 2012, the FASB issued Accounting Standards Update No. 2012-02, *Intangibles- Goodwill and Other- Testing Indefinite-Lived Intangible Assets for Impairment (ASU 2012-02)*. Under the amendments in this update, we have the option first to assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events or circumstances, we conclude that it is not more likely than not that the indefinite-lived intangible asset is impaired, then we are not required to take further action. However, if we conclude otherwise, then we are required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount in accordance with subtopic 350-30. Under the amendments in this update, we have the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. We may resume performing the qualitative assessment in any subsequent period. The provisions of this update will be effective for us in fiscal years beginning after September 15, 2012, and for the interim periods within fiscal years with early adoption permitted. We believe adoption of this new guidance will not have a material impact on our consolidated results of operations or financial position.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The majority of our manufacturing and testing of products occurs in research centers in the United States, the United Kingdom, Germany, Sweden and Spain. We sell our products globally through our direct catalog sales, direct sales force and indirect distributor channels. As a result, our financial results are affected by factors such as changes in foreign currency exchange rates and weak economic conditions in foreign markets.

We collect amounts representing a substantial portion of our revenues and pay amounts representing a substantial portion of our operating expenses in foreign currencies. As a result, changes in currency exchange rates from time to time may affect our operating results.

Table of Contents

We are exposed to market risk from changes in interest rates primarily through our financing activities. As of June 30, 2012, we had \$16.1 million outstanding under our revolving credit facility. On September 30, 2011, we entered into the Amendment with Bank of America as agent, and Bank of America and Brown Brothers Harriman & Co. as lenders. The Amendment extends the maturity date of our credit facility to August 7, 2013 and reduces our interest rate to the London Interbank Offered Rate (LIBOR) plus 3.0%. At June 30, 2012, the interest rate on this debt was 3.25%. Assuming no other changes which would affect the margin of the interest rate under our revolving credit facility, the effect of interest rate fluctuations on outstanding borrowings under our revolving credit facility as of June 30, 2012 over the next twelve months is quantified and summarized as follows:

	Interest expense increase (in thousands)
If compared to the rate as of June 30, 2012	
Interest rates increase by 1%	\$ 161
Interest rates increase by 2%	\$ 322

Item 4. Controls and Procedures.

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosures.

As required by Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, our management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of June 30, 2012. Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and our management necessarily was required to apply its judgment in evaluating and implementing our disclosure controls and procedures. Based upon the evaluation described above, our Chief Executive Officer and Chief Financial Officer have concluded that they believe that our disclosure controls and procedures were effective, as of the end of the period covered by this report, in providing reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures, and is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

We continue to review our internal controls over financial reporting, and may from time to time make changes aimed at enhancing their effectiveness and to ensure that our systems evolve with our business. These efforts have led to various changes in our internal controls over financial reporting. There were no changes in our internal controls over financial reporting that occurred during the second quarter ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1A. Risk Factors**

To our knowledge and except to the extent additional factual information disclosed in this Quarterly Report on Form 10-Q relates to such risk factors, there have been no material changes in the risk factors described in Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2011, which was filed with the SEC on March 15, 2012.
