Forward Looking Statements

This presentation may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act concerning Eaton, Eaton Global Plc, the acquisition and other transactions contemplated by the Transaction Agreement, our ac financing, our long-term credit rating and our revenues and operating earnings. These statements or disclosures may discuss go

intentions and expectations as to future trends, plans, events, results of operations or financial condition, or state other information to Eaton or Eaton Global Plc, based on current beliefs of management as well as assumptions made by, and information current to, management. Forward-looking statements generally will be accompanied by words such as anticipate, believe, plan, estimate, expect, forecast, guidance, intend, may, possible, potential, predict, project or other similar expressions. These forward-looking statements are subject to various risks and uncertainties, many of which are outside of our control. Therefore, you should not place undue reliance on such statements. Factors that could cause actual results to differ materially from those in the forward-looking statements include adverse regulatory decisions; failure to satisfy other closing conditions with respect to the Acquisition; the risks that the new businesses will not be integrated successfully or that we will not realize estimated cost savings or synergies; our ability to refinance the bridge loan on favorable terms and maintain our current long-term credit rating; unanticipated changes in the markets for our business segments; unanticipated downturns in business relationships with customers or their purchases from Eaton; competitive pressures on our sales and pricing; increases in the cost of material, energy and other production costs; unexpected costs that cannot be recouped in product pricing; the introduction of competing technologies; unexpected technical or marketing difficulties; unexpected claims, charges, litigation or dispute resolutions; new laws and governmental regulations. This list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties that affect our business described in our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and other documents filed from time to time with the SEC. We do not assume any obligation to update these forward-looking statements. No statement in this presentation is intended to constitute a profit forecast for any period, nor should any statements be interpreted to mean that earnings or earnings per share will necessarily be greater or lesser than those for the relevant preceding financial periods for

Methodology for calculations used in the presentations

Return on equity = trailing 4 quarters net income / average trailing 5 quarters shareholder's equity

Return on invested capital = (EBIT - taxes) / average (total debt + equity)

Return on sales = net income / sales

Total return = stock price appreciation + dividend yield

Net debt to total capital = (total debt - cash & equivalents) / (total debt - cash & equivalents + equity)

Cash flow coverage ratio = (pre-tax income + depreciation + amortization + interest expense) / interest expense

Edgar Filing: EATON CORP - Form 425

Segment net working capital (including acquisitions) = accounts receivable + inventory - accounts payable. All amounts averaged

DSO = average of quarterly DSO; quarterly DSO = quarter end accounts receivable / quarter sales * 90 days

DOH = average of quarterly DOH; quarterly DOH = quarter end inventory / quarter COGS * 90 days

DPO = average of quarterly DPO; quarterly DPO = quarter end accounts payable / quarter COGS * 90days

Cash conversion cycle = DSO + DOH - DPO

Free cash flow = cash flow from operations - capital expenditures
