Our amended and restated certificate of incorporation to be in effect upon the completion of this offering provides for indemnification of our directors and executive officers to the maximum extent permitted by the Delaware General Corporation Law, and our amended and restated bylaws to be in effect upon the completion of this offering provide for indemnification of our directors and executive officers to the maximum extent permitted by the Delaware General Corporation Law.

Item 15. Recent Sales of Unregistered Securities.

Since January 1, 2009, the Registrant made sales of the following unregistered securities:

Sales of Preferred Stock and Related Common Stock and Warrant Issuances

In seven closings from April 2010 to November 2010, the Registrant sold an aggregate of 1,821,600 shares of its Series B preferred stock to approximately 88 accredited investors at a purchase price of \$5.00 per share, for aggregate gross proceeds of approximately \$9.1 million. In addition, the Registrant issued 5,000 shares of its common stock and warrants to purchase an aggregate of 131,160 shares of its common stock at an exercise price of \$10.00 per share to approximately 32 service providers and placement agents in connection with its Series B preferred stock offering. These warrants were issued on its medium form warrant, which is described in the section entitled "Description of Capital Stock Warrants".

Common Stock Issuances

On November 14, 2011, the Registrant issued 50,000 shares of common stock, subject to certain forfeiture restrictions, to the Mayo Foundation for Medical Education and Research in connection with the execution of the affiliation agreement between the Registrant and Mayo.

Convertible Promissory Notes and Related Warrant Issuances

Pursuant to the terms of the Credit Agreement dated as of December 21, 2011, the Registrant issued to Mr. Pappajohn, a member of the board of directors, a convertible promissory note in the amount of \$4.0 million and to NNJCA Capital, a limited liability company of which one of our directors, Dr. Pecora is a member, a promissory note in the amount of \$1.5 million and to Pecora and Company, a promissory note in the amount of \$500,000. At Mr. Pappajohn's option, his \$4.0 million loan is convertible into shares of common stock at a conversion price equal to the lower of \$17.00 per share or a 20% discount to the initial public offering price per share. In May 2012, Mr. Pappajohn agreed to convert \$2.0 million of the outstanding principal due to him to common stock at the initial public offering price per share upon consummation of this offering, to eliminate the conversion feature of the remaining \$2.0 million in debt effective upon consummation of this offering and to extend the maturity date to August 15, 2013 for the \$2.0 million principal amount which was not converted. In connection with the issuance of the notes, the Registrant issued five year warrants to purchase shares of our common stock at the lower of \$17.00 per share and a 20% discount to the initial public offering price per share if the initial public offering price is less than \$21.25 per share as follows: 141,176 warrants to Mr. Pappajohn, 52,941 warrants to NNJCA Capital and 17,647 warrants to Pecora and Company. The lenders received an aggregate of 70,588 additional warrants on the same terms, with the warrants being issued proportionately to Mr. Pappajohn, Dr. Pecora and NNJCA, because we did not consummate our initial public offering within 181 days of funding. Subsequently, the warrants to purchase an aggregate of 94,117 shares of our common stock issued to Dr. Pecora and NNJCA in connection with this financing were cancelled and the promissory notes issued to Dr. Pecora and NNJCA were amended to increase the pre-payment penalties.

Subsequently, the warrants issued to Mr. Pappajohn were amended to provide that the exercise price shall equal the lesser of \$17.00 per share or our initial public offering price per share and to extend the \$2.0 million dollars in non-convertible debt, which is held by his spouse, to April 1, 2014. In connection with this agreement, we issued to Mr. Pappajohn additional warrants to purchase an aggregate of 75,202 shares of our common stock on the Modified Bridge Form. The warrant exercise price on the Modified Bridge Form is subject to standard anti-dilution protection in the event of stock splits, stock dividends, stock combinations, reclassifications and the like and to full ratchet anti-dilution protection in the event of issuances of more than \$5 million of securities at prices below the exercise price prior to the completion of our initial public offering. The warrants are also subject to anti-dilution adjustment if the initial public offering price per share price is less than

\$17.00 per share, so that the initial grant would be for an aggregate of 182,633 shares if the initial public offering price per share is \$7.00, the midpoint of the range on the cover of this prospectus, and 213,072 shares and 159,804 shares in the event the initial public offering price per share is \$6.00 or \$8.00, respectively.

2012 Convertible Debt Financing Transaction

We entered into a restated Credit Agreement dated as of October 19, 2012 with John Pappajohn and Mark Oman for a \$3.0 million convertible term loan. Mr. Pappajohn provided approximately \$1.8 million of financing and Mr. Oman provided approximately \$1.3 million of financing under the Credit Agreement. The loan bears an annual interest rate equal to the prime rate plus 6.25% (9.50% at September 30, 2012) and matures on February 26, 2014. The outstanding principal amount of the loan automatically converts to common stock upon completion of our initial public offering. The conversion price is equal to the lesser of \$17.00 per share or our initial public offering price per share. The conversion price is subject to standard anti-dilution protection in the event of stock splits, stock dividends, stock combinations, reclassifications and the like. We may prepay the loan in whole or in part only with the prior consent of the lenders.

The lenders received ten-year warrants to purchase an aggregate of 286,275 shares of our common stock (which were issued in proportion to their respective funding amounts), in each case at the lower of (i) \$17.00 per share and (ii) the initial public offering price per share if the initial public offering price per share is less than \$17.00 per share. On November 27, 2012, the lenders received additional warrants to purchase an aggregate of 17,648 shares of our common stock (issued in proportion to their funding amount) on the same terms because we did not consummate our initial public offering prior to November 27, 2012. The lenders will receive additional ten year warrants to purchase an aggregate of 17,648 shares of our common stock (to be issued in proportion to their respective funding amounts) on the same terms in the event we do not consummate our initial public offering by February 22, 2013. The warrant exercise price is subject to standard anti-dilution protection in the event of stock splits, stock dividends, stock combinations, reclassifications and the like and to full ratchet anti-dilution protection in the event of issuances of more than \$5 million of securities at prices below the exercise price prior to the completion of our initial public offering. The warrants are also subject to anti-dilution adjustment if the initial public offering price per share price is less than \$17.00 per share, so that the initial grant would be for an aggregate of 695,237 shares if the initial public offering price per share is \$7.00, the midpoint of the range on the cover of this prospectus, and 811,110 shares and 608,333 shares in the event the initial public offering price per share is \$6.00 or \$8.00, respectively.

On December 7, 2012, Mr. Pappajohn provided an additional \$1.0 million of financing on the same terms as the restated credit agreement. The loan bears an annual interest rate equal to the prime rate plus 6.25% (9.50% at September 30, 2012) and matures on June 4, 2014. The outstanding principal amount of the loan automatically converts to common stock upon completion of our initial public offering. The conversion price is equal to the lesser of \$17.00 per share or our initial public offering price per share. The conversion price is subject to standard anti-dilution protection in the event of stock splits, stock dividends, stock combinations, reclassifications and the like. We may prepay the loan in whole or in part only with the prior consent of the lenders.

Mr. Pappajohn received ten-year warrants to purchase an aggregate of 58,824 shares of our common at the lesser of (i) \$17.00 per share and (ii) the initial public offering price per share if the initial public offering price per share is less than \$17.00 per share. He will receive additional ten-year warrants to purchase an aggregate of 5,883 shares of our common stock on the same terms in the event we do not consummate our initial public offering by each the following dates: March 4, 2013 and June 4, 2013. The warrant exercise price is subject to standard anti-dilution protection in the event of stock splits, stock dividends, stock combinations, reclassifications and the like and to full ratchet anti-dilution protection in the event of issuances of more than \$5 million of securities at prices below the exercise price prior to the completion of our initial public offering. The warrants are also subject to anti-dilution adjustment if the initial public offering price per share is less than \$17.00 per share, so that the initial grant would be for an aggregate of 142,857 shares if the initial public offering price per share is \$7.00, the midpoint of the range on the cover of this prospectus, and 166,667 shares and 125,000 shares in the event the initial public offering price per share is \$6.00 or \$8.00, respectively.

Shares that the lenders receive are subject to a lock-up agreement for 180 days after the consummation of our IPO on the same terms as other lock-up agreements in favor of the underwriters of this offering, but otherwise have registration rights pursuant to a registration rights agreement entered into simultaneously with the Credit Agreement.

The offers, sales and issuances of the securities described above under Sales of Preferred Stock and Related Common Stock and Warrant Issuances, Common Stock Issuances and Convertible Promissory Note and Related Warrant Issuances were exempt from registration under the Securities Act in reliance on Section 4(2) of the Securities Act or Regulation D promulgated thereunder as transactions by an issuer not involving a public offering. The purchasers or recipients of securities in each of these transactions acquired the securities for investment only and not with a view to or for sale in connection with any distribution thereof. The purchasers of securities or recipients in each of these transactions represented to the Registrant in connection with their purchase that they were accredited investors. The sales of these securities were made without any general solicitation or advertising. Appropriate legends were affixed to securities issued in these transactions.

Since January 1, 2009, the Registrant granted to a total of approximately 63 employees, officers, directors, consultants and other service providers options to purchase an aggregate of 1,265,687 shares of common stock, at exercise prices ranging from \$1.60 to \$13.52 per share, under its 2008 Stock Option Plan. The offers, sales and issuances of the securities described above were exempt from registration under the Securities Act pursuant to Rule 701 as offers and sales of securities pursuant to certain compensatory benefit plans or contracts relating to compensation or Regulation D promulgated under Section 4(2) of the Securities Act. The recipients of such securities were employees, directors, consultants or other service providers of the Registrant. The securities were issued under our 2008 Stock Option Plan or pursuant to individual consulting agreements. Appropriate legends were affixed to the securities issued in these transactions. Each of the recipients of securities in these transactions represented their intention to acquire the securities for investment only and not with a view to or for sale in connection with any distribution thereof. The sales of these securities were made without any general solicitation or advertising. Each of the recipients of securities in these transactions had adequate access, through their employment or business relationships, to information about the Registrant.

The warrants are also subject to anti-dilution adjustment if the IPO price is less than \$17.00 per share, so that the initial grant would be for an aggregate of 233,096 shares if the initial public offering price per share is \$7.00, the

midpoint of the range on the cover of this prospectus, and 271,945 shares and 203,959 shares in the event the initial public offering price per share is \$6.00 or \$8.00, respectively.

On March 9, 2012, in connection with the extension and amendment of this line of credit, the Registrant issued to DAM warrants to purchase 37,500 shares of its common stock, which warrants were subsequently cancelled in connection with an amendment to the note to increase interest payable thereunder. Item 17. Undertakings

The undersigned Registrant hereby undertakes to provide to the underwriters at the closing specified in the underwriting agreement certificates in such denominations and registered in such names as required by the underwriters to permit prompt delivery to each purchaser.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers and controlling persons pursuant to the foregoing provisions, or otherwise, we have been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by us of expenses incurred or paid by one of our directors, officers or controlling persons in the successful defense of any action, suit, or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, we will, unless in the opinion of counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by us is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

The undersigned Registrant hereby undertakes that:

- (i) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the Registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective;
- (ii) For purposes of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof; and
- (iii) For purposes of determining any liability under the Securities Act, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A (§ 230.430A of this chapter), shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness. *Provided, however,* that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.
