Disclaimer

Safe harbor statement under the US Private Securities Litigation Reform Act of 1995.

This document contains statements that YPF believes constitute forward-looking statements within the meaning of the US Private Securities Litigation Reform Act of 1995.

These forward-looking statements may include statements regarding the intent, belief, plans, current expectations or objectives of YPF, including statements with respect to YPF's future financial condition, financial, operating, reserve replacement and other ratios, business strategy, geographic concentration, business concentration, production and marketed volumes and reserves, as well as YPF's plans with respect to future capital expenditures, investments, expansion and other projects, exploration activities, ownership interests, dividend payout policies. These forward-looking statements may also include assumptions regarding future economic and other conditions, crude oil and other prices, refining and marketing margins and exchange rates. These statements are not guarantees of future performance and are subject to material risks, uncertainties, changes and other factors which may be beyond YPF's control and difficult to predict.

YPF's actual future financial condition, financial, operating, reserve replacement and other ratios, results of operations, business strategy, geographic concentration, business concentration, production and marketed volumes, reserves, capital expenditures, investments, expansion and other projects, exploration activities, ownership interests, divestments, cost savings and dividend payout policies, as well as actual future economic conditions, crude oil and other prices, refining margins and exchange rates, could differ materially from those expressed or implied in these forward-looking statements. Important factors that could cause such differences include, but are not limited to, oil, gas and other price fluctuations.

currency fluctuations, exploration, drilling and production results, changes in reserves estimates, success in partnering with third parties, industry competition, environmental risks, physical risks, the risks of doing business in developing countries, legislative, tax, labor, economic and financial market conditions in various countries and regions, political risks, wars and acts of terrorism, natural disasters, technological advancements and lack of approvals, as well as those factors described in the filings made by YPF and its affiliates with the Securities and Exchange Commission, in particular, those described in Item 3. Key Information Risk Factors and Item 5. Operating and Financial Review of the Annual Report on Form 20-F for the fiscal year ended December 31, 2011 filed with the US Securities and Exchange Commission. The forward-looking statements included in this document may not occur.

YPF does not undertake to publicly update or revise these forward-looking statements even if experience or future changes make them obsolete. YPF's performance, conditions or events expressed or implied therein will not be realized.

These materials do not constitute an offer for sale of YPF S.A. bonds, shares or ADRs in the United States or otherwise.

stages per

well

First Vaca Muerta reservoir simulation model (lead by YPF team together with top North America shale experts)

Increased initial productions due to improved fracking methodology and by managing the draw down imposed to the hydraulic fractures

Renegotiated completion contracts generating savings as efficiency and economies of scale increase

Decreased well cost by 10% during 2012 and completion by more than 20%

Efficiency improvements, moved from

1 up to 3 stage fracks per day

Initiated multi-pad drilling

Started pilot development targeting 130 wells in 2013
