Dear Fellow Shareholders

Our upcoming annual meeting of shareholders is on May 29, 2013. I am writing to ask you to vote **FOR** Proposal 4 in our proxy statement. With Proposal 4, we are asking that you approve an amendment to our 2005 Stock and Incentive Plan to authorize an additional 5,000,000 shares and extend the term of the plan to June 28, 2016.

The ability to award equity is a fundamental component of our compensation philosophy and an essential element of our total rewards strategy. We strongly believe that this critical tool influences our ability to attract, motivate, and retain talented, key employees thereby influencing our ability to deliver superior shareholder value. We also believe equity is an essential tool to align employee and stockholder interests, link employee compensation with company performance, and maintain a culture based on employee stock ownership. Further, Illumina carefully considers the balance between achieving these objectives and minimizing shareholder dilution before issuing equity to employees.

Illumina's Board of Directors recommends voting for Proposal 4 to amend the 2005 Stock and Incentive Plan. The attached presentation outlines why we believe Proposal 4 is in the best interest of stockholders and Illumina. Thank you for your attention and consideration in supporting us on this important matter.

Sincerely,

Jay Flatley

Safe Harbor Statement

2

This communication may contain statements that are forward-looking. Forward-looking statements are subject to known and unknown risks and uncertainties and are based on potentially inaccurate assumptions that could cause actual results to differ materially from those expected or implied by the forward-looking statements. Among the important factors that could cause actual results to differ materially from those in any forward-looking statements are (i) our ability to develop and commercialize further our sequencing, array, PCR, diagnostics, and consumables technologies and to deploy new products and applications, and expand the markets, for our technology platforms, (ii) our ability to manufacture robust instrumentation and consumables, (iii) significant uncertainty concerning government and academic research funding worldwide as governments in the United States and Europe, in particular, focus on reducing fiscal deficits while at the same time confronting slowing economic growth, and (iv) other factors detailed in our filings with the U.S. Securities and Exchange Commission (SEC), including our most recent filings on Forms 10-K and 10-Q, or in information disclosed in public conference calls, the date and time of which are released beforehand. Illumina undertakes no obligation, and does not intend, to update these forward-looking statements.

Requests an amendment to our 2005 Stock and Incentive Plan:

Illumina's Board of Directors Recommends a Yes Vote on Proposal 4
Conclusion

15

We use equity compensation to align employee and shareholder interests

We have a disciplined annual share granting practice

We have a strong track record of performance stemming from our overall strategic plan, including equity compensation

We have a robust equity repurchase plan and intend to continue repurchases over the life of our 2005 Stock and Incentive Plan
