Our Company

Founded in 1983, Altera Corporation is a global semiconductor company, serving over 12,500 customers within the Telecom and Wireless, Industrial Automation, Military and Automotive, Networking, Computer and Storage, and Other vertical markets. The Other vertical market includes the sub-markets of broadcast, consumer, medical and test.

Altera designs, manufactures, and markets a variety of products:

Programmable logic devices (PLDs), which consist of field-programmable gate arrays (FPGAs), including those that incorporate embedded processors, and complex programmable logic devices (CPLDs), are standard semiconductor integrated circuits, or chips, that our customers program to perform desired logic functions in their electronic systems.

HardCopy[®] application-specific integrated circuits (ASICs) transition customer designs from high-density FPGAs to low-cost non-programmable implementations for volume production. HardCopy ASICs deliver performance that can be an alternative to traditional ASICs, but with reduced development costs and shorter production lead times.

*Pre-defined design building blocks, known as *intellectual property (IP) cores*, can be licensed by customers to add standard functions to their PLD designs.*

*Proprietary *development software*, which operates on personal computers and engineering workstations, is used by customers to develop, compile, and verify their designs, and then program their designs into our PLDs.*

We were one of the first suppliers of complementary metal oxide semiconductor (CMOS) PLDs and are currently a global leader in this market. Our broad range of PLDs offers unique features as well as differing densities and performance specifications, and serves a wide range of customers.

Altera was incorporated in 1983, and reincorporated in the State of Delaware in 1997. Our principal executive offices are located at 101 Innovation Drive, San Jose, California 95134. Our telephone number is (408) 544-7000 and our website is www.altera.com. Information contained in or accessible through our website is not part of or incorporated by reference into this prospectus supplement or the accompanying prospectus.
