The information in this prospectus is not complete and may be changed. Neither we nor the selling stockholders may sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities, and neither we nor the selling stockholders are soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

Subject to completion, dated _____, 2014

Prospectus

shares

Class A common stock

This is an initial public offering of shares of Class A common stock by GoPro, Inc. We are selling _____ shares of Class A common stock, and the selling stockholders are selling _____ shares of Class A common stock. We will not receive any proceeds from the sale of shares by the selling stockholders. The estimated initial public offering price is expected to be between \$ _____ and \$ _____ per share.

We have two classes of outstanding common stock, Class A common stock and Class B common stock. Each share of Class B common stock is entitled to 10 votes and is convertible at any time into one share of Class A common stock. The holders of our outstanding Class B common stock will hold approximately _____ % of the voting power of our outstanding capital stock following this offering, with our executive officers and directors and their affiliates holding approximately _____ % and Nicholas Woodman, our Chief Executive Officer, holding approximately _____ %.

Prior to this offering there has been no public market for our common stock. We have applied to list our Class A common stock on the NASDAQ Global Select Market under the symbol GPRO.

We are an **emerging growth company** as defined under the federal securities laws. Investing in our Class A common stock involves a high degree of risk. See **Risk factors** beginning on page 17.

	Per share	Total
Initial public offering price	\$	\$
Underwriting discounts and commissions(1)	\$	\$
Proceeds to GoPro, Inc., before expenses	\$	\$
Proceeds to selling stockholders	\$	\$

(1) See Underwriting for a description of the compensation payable to the underwriters.

We and the selling stockholders have granted the underwriters an option for a period of 30 days to purchase from us and them up to additional shares of Class A common stock.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed on the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the shares of Class A common stock to purchasers on _____, 2014.

Prospectus summary

This summary highlights selected information contained elsewhere in this prospectus. This summary does not contain all the information you should consider before investing in our Class A common stock. You should read the entire prospectus carefully, including Risk factors, Management's discussion and analysis of financial condition and results of operations and our consolidated financial statements and related notes included elsewhere in this prospectus, before making an investment decision.

Company overview

GoPro is transforming the way consumers capture, manage, share and enjoy meaningful life experiences. We do this by enabling people to capture compelling, immersive photo and video content of themselves participating in their favorite activities. Our customers include some of the world's most active and passionate people. The volume and quality of their shared GoPro content, coupled with their enthusiasm for our brand, are virally driving awareness and demand for our products. To date, we have generated substantially all of our revenue from the sale of our cameras and accessories and we believe that the growing adoption of our capture devices and the engaging content they enable, position GoPro to become an exciting new media company.

What began as an idea to help athletes document themselves engaged in their sport has become a widely adopted solution for people to document themselves engaged in their interests, whatever they may be. From extreme to mainstream, professional to consumer, GoPro has enabled the world to capture and share its passions, and the world, in turn, is enabling GoPro to become one of the most exciting and aspirational companies of our time.

In 2011, 2012, 2013 and the three months ended March 31, 2014, we generated revenue of \$234.2 million, \$526.0 million, \$985.7 million and \$235.7 million and reported net income of \$24.6 million, \$32.3 million, \$60.6 million and \$11.0 million, respectively.

Table of Contents

Our business focus

Enabling engaging content is at the core of our business. We develop hardware and software solutions to alleviate consumer pain points associated with capturing, managing, sharing and enjoying engaging content.

Capture

Our mountable and wearable cameras and accessories, which we refer to as capture devices, enable professional-quality capture and exceptional versatility at affordable prices. Our products' small, lightweight, yet durable designs make them easy to use even in highly challenging situations. In addition, our remote control solutions and our seamless integration with mobile devices via the GoPro App, our mobile application, enable engaging self-capture during virtually any activity.

Since launching our first high-definition, or HD, capture device in July 2009, we have sold more than 8.5 million HD cameras, including more than 3.8 million in 2013. We sell our products in over 100 countries and through more than 25,000 retail stores. According to The NPD Group's Retail Tracking Service, GoPro was the #1 selling camcorder (by dollars and units) and a top six selling camera accessory company (by dollars and units) in the United States in 2013. Also according to The NPD Group, our HERO cameras represented a 45% share of the U.S. camcorder market (by dollars) in 2013, up from an 11% share during December 2011 and our camera accessories represented a 4% share of the U.S. camera accessory market (by dollars) in 2013.

Manage

We seek to eliminate the pain point of managing content by making it easy for our customers to transfer footage from their cameras to a system that efficiently organizes their content and facilitates convenient editing and sharing. GoPro Studio, our desktop application, and the GoPro App, reflect the early stages of our content management platform strategy.

GoPro Studio enables our customers to quickly edit simple or complex videos and create videos from time-lapse photo sequences. As of March 31, 2014, there had been more than 4.3 million downloads of GoPro Studio. During the first quarter of 2014, our customers in the aggregate exported, on average, 20,000 videos per day using GoPro Studio.

In addition to facilitating full camera control from a mobile device, the GoPro App enables a customer to easily and wirelessly copy footage from a GoPro camera to a mobile device for storage and sharing without a computer.

Share

By facilitating the capture, management and editing of engaging photos and videos, we are ultimately helping our customers share more compelling personal content. GoPro Studio and the GoPro App facilitate the posting of photos and videos directly to leading social networks and content platforms, including Facebook, Instagram, Twitter, Vimeo and YouTube. Thousands of GoPro customer photos and videos are shared daily, driving awareness and enthusiasm for our customers' content, as well as for GoPro's own brand and products. In 2013, our customers uploaded to YouTube approximately 2.8 years worth of video featuring GoPro in the title. Also on YouTube, in the first quarter of 2014, there was an average of 6,000 daily uploads and more than 1.0 billion views representing over 50.0 million watched hours of videos with GoPro in the title, filename, tags or description.

Table of Contents

Enjoy

GoPro enables the production of entertaining and inspiring content, both in the form of our customers' user-generated content, or UGC, as well as GoPro originally produced content, that we collectively refer to as GoPro programming. This often features professional athletes, celebrities and entertainers, as well as everyday people engaged in their favorite activities. Having recognized the role GoPro content plays in attracting and exciting consumers, we are expanding the distribution of GoPro programming to engage and build relationships with even those consumers who do not own a GoPro capture device.

We distribute GoPro programming through what we refer to as the GoPro Network, a collection of GoPro Channels hosted on a variety of platforms, including the following:

Facebook: over 7.2 million likes;

Instagram: over 2.0 million followers;

Twitter: over 950,000 followers; and

YouTube: over 450 million video views, over 1.8 million subscribers and ranked #1 on the Brand Channel Leaderboard for January through March 2014.

As of December 31, 2013, we had not derived revenue from the distribution of, or social engagement with, our content on the GoPro Network. However, we plan to pursue new revenue opportunities from the distribution of engaging GoPro content in the near term. For example, in the first quarter of 2014, we entered into an agreement with Microsoft to develop and launch the GoPro Channel on Xbox Live, a leading delivery system for IP video streams on connected televisions, that will provide us with access to advertising revenue, fees from third-party sponsorship of the GoPro Channel and the ability to sell our capture devices directly to consumers as they watch GoPro programming. We expect to begin earning revenue from GoPro Channel advertising and sponsorship opportunities on Xbox Live and GoPro Channel advertising on YouTube and Virgin America in the second quarter of 2014. We do not expect the revenue earned from these GoPro Channels to be material to us in 2014.

The virtuous cycle

We believe our business focus results in a virtuous cycle and a self-reinforcing consumer acquisition model that fuels our growth. Our products in the hands of our customers enable compelling, authentic content that organically increases awareness for GoPro and drives demand for our products.

The GoPro opportunity

We believe the following create an attractive market opportunity for GoPro.

Consumers want an easy way to self-capture engaging content

Before GoPro, if people wanted compelling, high-quality footage of themselves engaged in activities, they needed a skilled third-party camera operator and often required expensive, fragile and cumbersome camera equipment.

Table of Contents

GoPro has enabled a new era of convenient self-documentation. Our products' high-performance features, ease of use and versatility, made available at affordable price points, provide a premium-quality self-capture solution that appeals to both consumers and professionals.

Consumers want a quick, easy way to manage, edit and share their content

Managing, editing and sharing engaging, high-quality content often requires substantial time, resources and skill. GoPro Studio and the GoPro App begin to address these pain points by offering intuitive, easy-to-use tools for managing, editing and sharing professional-grade footage. As social media and content sharing outlets like Facebook, Instagram, Twitter, Vimeo and YouTube proliferate, we see an opportunity to further develop our currently separate software solutions into an integrated and enhanced GoPro content management platform.

Consumers continue to replace traditional cameras with mobile devices

As mobile devices continue to displace traditional cameras and camcorders, we believe consumers will seek capture devices that offer differentiated capabilities like GoPro products. Moreover, we believe mobile devices complement our products. With the GoPro App, mobile devices can be used to remotely control GoPro cameras, thereby optimizing customers' ability to self-capture high-quality content of themselves and their activities. The GoPro App also enables customers to manage and share their captured content without the need for a computer. Furthermore, smartphones and tablets expand consumers' ability to access and enjoy GoPro content online.

Consumers want compelling content on demand

We believe consumer demand for compelling content combined with GoPro's self-capture technology and the explosive popularity of social media create a significant media opportunity for GoPro. GoPro programming has developed a dedicated and growing audience. We believe GoPro is well-positioned to become the first media company whose content is captured exclusively using its own hardware. We will continue to expand our distribution of GoPro programming and the reach of the GoPro Network to new platforms such as Xbox Live.

What makes GoPro unique

Category-defining self-capture devices

Our capture devices offer our customers, both consumers and professionals, exceptional capabilities that have earned us multiple awards, including a 2013 technical Emmy Award. Our cameras' small, lightweight, yet durable designs make them easy to use even in highly challenging situations, and along with their affordable prices, encourage adoption and experimentation that often leads to interesting content. In addition, our broad portfolio of mountable and wearable accessories enables multiple use cases and facilitates a differentiated self-capture experience than that of traditional cameras and smartphones. Our products have been embraced by media professionals and are used in production by The Discovery Channel, ESPN and other networks.

Passionate consumer- and content-supported business model

Our business model is supported by some of the world's most active and influential consumers who use GoPro to capture and share their life experiences and interests. Their shared content

Table of Contents

excites and inspires others around the world to do the same, which we believe, leads to higher camera and accessory sales and, in turn, a massive volume of UGC.

Best-in-class marketing relationships

GoPro has established marketing relationships with more than 120 athletes, celebrities and entertainers, and sponsors more than 90 sporting events annually, including the X Games, Supercross and ASP world surfing championship events. We partner with athletes such as Olympic gold medal winning snowboarder Shaun White and 11-time world champion surfer Kelly Slater, as well as entertainers, such as Foo Fighters, Jane's Addiction, Guy Fieri and Alton Brown, and producers of popular television shows. We also have promotional agreements with recreational destination resorts, such as all Vail Company resorts and the Whistler Blackcomb resort. Validating the quality of our products and our growing role as a media brand, we are approached by professionals and organizations seeking to leverage GoPro as a media platform to distribute their own branded content captured with our products.

Differentiated sales strategy with specialty retailers

Since our first sale in 2004, our distribution strategy has focused on specialty retailers, including surf, ski and motorsports outlets, where we believe GoPro is often the only capture device sold in-store. Our early, first-mover relationships with these retailers and their customers helped us establish an authenticity that remains a cornerstone of our business. This focus on the specialty retail channel has also enabled us to develop a high-touch, differentiated sales network of more than 25,000 stores globally that we believe is difficult to replicate.

Strong, global brand

Over the past 10 years, we have built a powerful brand that is emblematic of the pursuit and celebration of human passion. Our trademarks, GoPro and Be a Hero, are relevant and aspirational to consumers, as reflected in the variety of our customers' shared content, which spans from our roots in action sports to now include family, travel, music, science and other areas of human interest. The strength of our brand is further evidenced by our customers' frequent tagging, titling and describing of their footage as GoPro content.

A company culture built around our vision

GoPro was founded by dedicated sports enthusiasts who wanted a better way to document and share their personal passions. As we have grown, we have remained focused on hiring employees who share this same ethos, whatever their personal interests may be. We have built a team focused on developing innovative solutions to the problems we encounter during our own self-capture pursuits, and we believe our employees' shared passion, experience and vision represent an increasingly important competitive advantage.

Table of Contents

Our strategy

We intend to expand our existing capture business with content management, editing and sharing solutions to provide increased value to our customers, introduce new revenue streams and further differentiate us from competitors. Key components of our strategy include the following:

Continue to introduce innovative capture devices

We relentlessly pursue our goal of developing the world's most versatile capture devices and enabling self-capture during any activity. To stay at the forefront of our industry, we are focused on continued product innovation and leadership. Areas of innovation include custom sensor and digital signal processing technologies as well as custom lens, audio, battery and accessory design.

Develop seamless content management, editing and sharing solutions

We are developing an integrated content management platform to simplify the organizing, editing and sharing of engaging content. Our October 2013 acquisition of General Things Inc., a web development firm, has provided us with additional software competencies to accelerate this process. In addition, we may seek to leverage our content management platform as a new revenue stream.

Scale as a media brand

We are investing to scale GoPro as a media entity and develop new revenue opportunities by increasing production of GoPro originally produced content while simultaneously increasing the aggregation and redistribution of our customers' best of UGC. Additionally, we are investing to develop, distribute and promote GoPro programming on additional partner platforms such as Virgin America and Xbox Live.

Expand into new vertical markets

Leveraging the product development and sales and marketing strategies that have enabled us to be a leader in vertical markets such as skiing, surfing and motorsports, we are targeting new vertical markets where we believe GoPro can authentically deliver meaningful solutions to consumers.

Grow internationally

We believe that international markets represent a significant growth opportunity for us. We plan to capitalize on the strength of our brand to increase our presence worldwide through additional retailers and strategic distribution partnerships.

Expand in-store brand and sales footprint

We invest heavily to produce GoPro-branded, video-enabled point of purchase, or POP, merchandising displays that we make available to nearly all of the retail outlets through which our products are sold. Having recognized our sales success in these stores, coupled with our expanding product portfolio, we are working with our retailers to further expand the footprint of our POP displays.

Table of Contents

Extend strategic marketing relationships

We form relationships with marketing partners that use our products and services to promote their own brands and properties. As a result, GoPro benefits not only from the expanded brand awareness that traditionally comes with such marketing partnerships, but also from being recognized as our partners' technology enabler. We will continue developing and leveraging strategic marketing relationships to increase GoPro brand awareness.

Expand brand awareness through increased advertising

Notwithstanding the visibility we have gained in the consumer markets where we have historically focused, we believe consumers in many other markets are not familiar with our brand and products. We believe this underscores a significant opportunity for GoPro to expand awareness through increased advertising on television, in print, online, and on billboards and other out of home advertising, while continuing to scale our promotional marketing efforts and trade show presence.

Risk factors

Investing in our Class A common stock involves a high degree of risk. You should carefully consider the risks highlighted in the section titled Risk factors following this prospectus summary before making an investment decision. These risks include:

We operate in a highly competitive market and the size and resources of some of our competitors may allow them to compete more effectively than we can, which could result in a loss of our market share and a decrease in our revenue and profitability.

We depend on sales of our capture devices for substantially all of our revenue, and any decrease in the sales of these products would harm our business.

We rely on third-party suppliers, some of which are sole-source suppliers, to provide components for our products.

We do not expect to continue to grow in the future at the same rate as we have in the past and profitability in recent periods might not be indicative of future performance.

If our sales during the holiday season fall below our forecasts, our overall financial condition and results of operations could be adversely affected.

We may have difficulty in accurately predicting our future customer demand, which could adversely affect our operating results.

Our success depends on our ability to maintain the value and reputation of our brand.

To remain competitive and stimulate customer demand, we must successfully manage frequent product introductions and transitions.

We are subject to international business uncertainties.

We are highly dependent on our Chief Executive Officer.

Table of Contents

If we do not effectively maintain and further develop our sales channels, including developing and supporting our retail sales channel and distributors, our business could be harmed.

Any material disruption of our information systems could adversely affect our operating results.

Corporate information

We were incorporated as Woodman Labs, Inc. in California and began doing business as GoPro in February 2004. We reincorporated in Delaware in December 2011 and in February 2014 we changed our name to GoPro, Inc. Our principal executive offices are located at 3000 Clearview Way, San Mateo, California 94402, and our telephone number is (650) 332-7600. Our website address is www.gopro.com. The information contained on, or that can be accessed through, our website is not a part of this prospectus. Investors should not rely on any such information in deciding whether to purchase our Class A common stock. We have included our website address in this prospectus solely as an inactive textual reference.

Unless the context indicates otherwise, as used in this prospectus, the terms GoPro, we, us, our and the Company refer to GoPro, Inc., a Delaware corporation, and its subsidiaries taken as a whole, unless otherwise noted.

We have registered a number of trademarks including GOPRO, HERO, BACPAC and CINEFORM and have filed with the U.S. Patent and Trademark Office to register the GoPro logo and GoPro Be a Hero logo. This prospectus also includes references to trademarks and service marks of other entities, and those trademarks and service marks are the property of their respective owners.

Table of Contents**The offering**

Class A common stock offered by us	shares
Class A common stock offered by the selling stockholders	shares
Option to purchase additional shares of Class A common stock	shares (with _____ shares of Class A common stock being offered by us and _____ shares of Class A common stock being offered by the selling stockholders)
Class A common stock to be outstanding after this offering	shares (_____ shares if the option to purchase additional shares is exercised in full)
Class B common stock to be outstanding after this offering	shares
Total common stock to be outstanding after this offering	shares (_____ shares if the option to purchase additional shares is exercised in full)
Use of proceeds	We expect to use the net proceeds from this offering for general corporate purposes, including working capital, and to fully repay our term loan under our credit facility, which had an outstanding balance of \$111.0 million as of March 31, 2014. We may also use a portion of the net proceeds to acquire or invest in complementary businesses, technologies or assets. We will not receive any of the proceeds from the sale of shares by the selling stockholders.
Conflicts of interest	We expect to use at least 5% of the net proceeds from this offering to fully repay our term loan under our credit facility, owed by us to our lenders, including affiliates of J.P. Morgan Securities LLC, Citigroup Global Markets Inc. and Barclays Capital Inc. See Use of proceeds and Management's discussion and analysis of financial condition and results of operations Liquidity and capital resources for additional information regarding our credit facility. Accordingly, this offering is being made in compliance with the requirements of Rule 5121 of FINRA's conduct rules. This rule generally provides that if at least 5% of the net proceeds from the sale of securities, not including underwriting compensation, is used to reduce or retire the balance of a loan or credit facility extended by the underwriters or their affiliates, a qualified independent

Table of Contents

underwriter meeting certain standards set forth by FINRA must participate in the preparation of this prospectus and exercise the usual standards of due diligence with respect thereto. Piper Jaffray & Co. is assuming the responsibilities of acting as the qualified independent underwriter in connection with this offering and in conducting due diligence. None of J.P. Morgan Securities LLC, Citigroup Global Markets Inc. or Barclays Capital Inc. will confirm sales of the securities to any account over which they exercise discretionary authority without the prior written approval of the customer. See Conflicts of interest.

Voting rights

We have two classes of authorized common stock: Class A common stock and Class B common stock. The rights of the holders of our Class A and Class B common stock are identical, except with respect to voting and conversion. The holders of our Class B common stock are entitled to 10 votes per share, and the holders of our Class A common stock are entitled to one vote per share. The holders of our Class A common stock and Class B common stock will vote together as a single class on all matters submitted to a vote of our stockholders, unless otherwise required by law. Following the completion of this offering, each share of our Class B common stock will be convertible into one share of our Class A common stock at any time and will convert automatically upon certain transfers or the date that the total number of shares of Class B common stock outstanding represents less than 10% of the total number of shares of Class A and Class B common stock outstanding. The holders of our outstanding Class B common stock will hold approximately % of the voting power of our outstanding capital stock following this offering, with our executive officers and directors and their affiliates holding approximately %, and Mr. Woodman, our Chief Executive Officer, holding approximately %. These holders will have the ability to control the outcome of matters submitted to our stockholders for approval, including the election of our directors and the approval of any change in control transaction. See Principal and selling stockholders and Description of capital stock.

Table of Contents

Directed share program

At our request, the underwriters have reserved for sale, at the initial public offering price, up to 3.5% of the Class A common stock offered hereby for sale to certain business associates of ours. None of our directors or executive officers will participate in the directed share program. We will offer these shares to the extent permitted under applicable regulations in the United States through a directed share program. The number of shares of our Class A common stock available for sale to the general public will be reduced by the number of directed shares purchased by participants in the program. Any directed shares not purchased will be offered by the underwriters to the general public on the same terms as the other shares of our Class A common stock offered hereby. We have agreed to indemnify the underwriters against certain liabilities and expenses, including liabilities under the Securities Act of 1933, as amended, in connection with the sale of shares through a directed share program. See Underwriting.

LOYAL3 Platform

At our request, the underwriters have reserved up to 1.5% of the Class A common stock offered hereby to be offered through the LOYAL3 platform at the initial public offering price. See Underwriting.

Proposed NASDAQ symbol

GPRO

The number of shares of our Class A and Class B common stock to be outstanding after this offering is based on 112,422,478 shares of common stock outstanding as of March 31, 2014 and excludes:

27,798,919 shares of Class B common stock issuable upon the exercise of stock options outstanding as of March 31, 2014 with a weighted average exercise price of \$3.24 per share and 570,000 shares of Class B common stock issuable pursuant to outstanding restricted stock units, or RSUs, under our 2010 Equity Incentive Plan, or 2010 Plan;

The effect of the contribution back to us of a number of shares of Class B common stock equal to the number of shares we issue upon exercise of an outstanding option for the purchase of 6,584,427 shares of Class B common stock; see Certain relationships and related person transactions Equity grants and contribution agreements;

shares of Class B common stock issuable upon the exercise of options with an exercise price of \$ per share and shares of Class B common stock issuable upon settlement of RSUs granted after March 31, 2014;

398,121 shares of Class B common stock subject to a right of repurchase by us outstanding as of March 31, 2014;

shares of Class B common stock subject to a right of repurchase by us issued after March 31, 2014;

Table of Contents

shares of Class A common stock to be reserved for future issuance under our 2014 Equity Incentive Plan, or 2014 Plan, which will become effective on the date immediately prior to the date of this prospectus. Upon completion of this offering, any remaining shares available for issuance under our 2010 Plan will be added to the shares reserved under our 2014 Plan and we will cease granting awards under our 2010 Plan; and

shares of Class A common stock to be reserved for future issuance under our 2014 Employee Stock Purchase Plan, or ESPP, which will become effective on the date of this prospectus. Our 2014 Plan and ESPP also provide for automatic annual increases in the number of shares reserved under the plans each year, as more fully described in Executive compensation Employee benefit plans.

Unless otherwise noted, all information in this prospectus assumes:

the amendment of our certificate of incorporation to redesignate our currently outstanding common stock as Class B common stock and to create a new class of Class A common stock to be offered and sold in this offering;

no exercise of the underwriters' option to purchase up to _____ additional shares of Class A common stock from us and the selling stockholders in this offering;

the conversion of all outstanding shares of our redeemable convertible preferred stock into an aggregate of 30,523,036 shares of our Class B common stock and the conversion by the selling stockholders of shares of our Class B common stock into the same number of shares of our Class A common stock, in each case in connection with the closing of this offering;

the filing of our restated certificate of incorporation and the effectiveness of our amended and restated bylaws, which will occur in connection with the closing of this offering; and

no exercise of options, warrants or similar rights outstanding as of the date of this prospectus.

Summary consolidated financial data

The following tables summarize our consolidated financial data and should be read together with Selected consolidated financial data, Management's discussion and analysis of financial condition and results of operations and our consolidated financial statements, related notes and other financial information included elsewhere in this prospectus.

We derived the consolidated statements of operations data for the years ended December 31, 2011, 2012 and 2013 and the balance sheet data as of December 31, 2013 from our audited consolidated financial statements included elsewhere in this prospectus. The consolidated statements of operations data for the three months ended March 31, 2013 and 2014 and the consolidated balance sheet data as of March 31, 2014 have been derived from our unaudited consolidated financial statements included elsewhere in this prospectus. We have prepared the unaudited consolidated financial statements on the same basis as the audited consolidated financial statements and have included all adjustments, consisting only of normal recurring adjustments that, in our opinion, are necessary to state fairly the financial information set forth in those statements. Our historical results are not necessarily indicative of the results we expect in the future, and our interim results should not necessarily be considered indicative of results we expect for the full year or any other period.

Table of Contents**Consolidated statements of operations data:**

(in thousands, except per share amounts)	Year ended December 31,			Three months ended	
	2011	2012	2013	2013	March 31, 2014

(2) See Note 8 of our consolidated financial statements included elsewhere in this prospectus for an explanation of the calculations of our historical basic and diluted net income per share attributable to common stockholders and our pro forma and supplemental pro forma unaudited basic and diluted net income per share.

Adjusted EBITDA

We use adjusted EBITDA as a key measure to understand and evaluate our core operating performance and trends, to prepare and approve our annual budget and to develop short- and long-term operational plans. In particular, the exclusion of certain expenses in calculating adjusted EBITDA can provide a useful measure for period-to-period comparisons of our business. Accordingly, we believe that adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors.

Adjusted EBITDA is not prepared in accordance with U.S. Generally Accepted Accounting Principles, or GAAP, and should not be considered in isolation of, or as an alternative to, measures prepared in accordance with GAAP. In addition, adjusted EBITDA is not based on any comprehensive set of accounting rules or principles. As a non-GAAP measure, adjusted EBITDA has limitations in that it does not reflect all of the amounts associated with our results of operations as determined in accordance with GAAP. Some of these limitations are:

adjusted EBITDA does not reflect interest expense, or the cash requirements necessary to service interest or principal payments on our debt;

adjusted EBITDA does not reflect the amounts we paid in taxes or other components of our tax expense;

adjusted EBITDA does not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;

adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;

adjusted EBITDA does not reflect the non-cash component of employee compensation;

although depreciation and amortization are non-cash charges, the assets being depreciated and amortized often will have to be replaced in the future, including POP displays, and adjusted EBITDA does not reflect any cash requirements for such replacements; and

other companies may calculate adjusted EBITDA differently than we do, limiting its usefulness as a comparative measure.

Table of Contents

Because of these limitations, you should consider adjusted EBITDA alongside other financial performance measures, including our financial results presented in accordance with GAAP.

The following table presents a reconciliation of net income to adjusted EBITDA:

(in thousands)	Year ended December 31,			Three months ended	
	2011	2012	2013	2013	March 31, 2014
Net income	\$ 24,612	\$ 32,262	\$ 60,578	\$ 23,035	\$ 11,049
Income tax expense	14,179	20,948	30,751	10,027	3,882
Interest (income) and expense, net	(12)	346	6,018	1,332	1,335
Depreciation and amortization	1,517	3,975	12,034	2,209	3,811
POP display amortization	3,602	8,601	13,458	2,225	4,513
Stock-based compensation	8,975	9,156	10,887	2,095	4,037
Adjusted EBITDA	\$ 52,873	\$ 75,288	\$ 133,726	\$ 40,923	\$ 28,627

Consolidated balance sheet data as of March 31, 2014 are presented below:

on an actual basis;

on a pro forma basis to reflect the conversion of all outstanding shares of our redeemable convertible preferred stock into 30,523,036 shares of our Class B common stock in connection with the closing of this offering; and

on a pro forma as adjusted basis to give further effect to (i) the application of a portion of the proceeds of this offering to repay in full the outstanding balance of our term loan, which was \$111.0 million as of March 31, 2014, (ii) the conversion by the selling stockholders of _____ shares of our Class B common stock into the same number of shares of our Class A common stock in connection with the closing of this offering, (iii) the sale by us of _____ shares of Class A common stock in this offering at an assumed initial public offering price of \$ _____ per share, the midpoint of the price range set forth on the cover page of this prospectus, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us and (iv) the filing and effectiveness of our restated certificate of incorporation in connection with the closing of this offering.

(in thousands)	As of March 31, 2014		
	Actual	Pro forma	Pro forma as adjusted(1)
Consolidated balance sheet data:			
Cash	\$ 111,215	\$ 111,215	
Working capital	66,999	66,999	
Total assets	355,200	355,200	
Long-term debt, including current portion	110,666	110,666	
Redeemable convertible preferred stock	77,213		
Total stockholders' equity	10,391	87,604	

Edgar Filing: GoPro, Inc. - Form S-1

- (1) Each \$1.00 increase or decrease in the assumed initial public offering price of \$ _____ per share, the midpoint of the price range set forth on the cover page of this prospectus, would increase or decrease, respectively, our cash, working capital, total assets and total stockholders' equity by \$ _____ million, assuming the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting estimated underwriting discounts and commissions.

Table of Contents

Risk factors

You should carefully consider the risks described below and all other information contained in this prospectus before making an investment decision. Our business, financial condition and results of operations could be materially and adversely affected if any of the following risks, or other risks and uncertainties that are not yet identified or that we currently think are immaterial, actually occur. In that event, the trading price of our shares may decline, and you may lose part or all of your investment.

Risks related to our business and industry

We operate in a highly competitive market and the size and resources of some of our competitors may allow them to compete more effectively than we can, which could result in a loss of our market share and a decrease in our revenue and profitability.

The market for capture devices, including cameras and camcorders, is highly competitive. Further, we expect competition to intensify in the future as existing competitors introduce new and more competitive offerings alongside their existing products, and as new market entrants introduce new products into our markets. We compete against established, well-known camera manufacturers such as Canon Inc., Nikon Corporation, Olympus Corporation, Polaroid Holding Corporation and Vivitar Corporation, large, diversified electronics companies such as JVC Kenwood Corporation, Panasonic Corporation, Samsung Electronics Co., Sony Corporation and Toshiba Corporation, and specialty companies such as Garmin Ltd. Many of our current competitors have substantial market share, diversified product lines, well-established supply and distribution systems, strong worldwide brand recognition and greater financial, marketing, research and development and other resources than we do. In addition, many of our existing and potential competitors enjoy substantial competitive advantages, such as:

longer operating histories;

the capacity to leverage their sales efforts and marketing expenditures across a broader portfolio of products;

broader distribution and established relationships with channel partners;

access to larger established customer bases;

greater resources to make acquisitions;

larger intellectual property portfolios; and

the ability to bundle competitive offerings with other products and services.

Moreover, smartphones and tablets with photo and video functionality have significantly displaced traditional camera sales. It is possible that, in the future, the manufacturers of these devices, such as Apple Inc. and Samsung, may design them for use in a range of conditions, including challenging physical environments, or develop products similar to ours. In addition to competition or potential competition from large, established companies, new companies may emerge and offer competitive products. Further, we are aware that certain companies have developed cameras designed and labeled to appear similar to our products, which may confuse consumers or distract consumers from purchasing GoPro products.

Table of Contents

Increased competition may result in pricing pressures and reduced profit margins and may impede our ability to continue to increase the sales of our products or cause us to lose market share, any of which could substantially harm our business and results of operations.

We depend on sales of our capture devices for substantially all of our revenue, and any decrease in the sales of these products would harm our business.

To date, substantially all of our revenue has been derived from sales of our capture devices, and we expect to continue to derive the substantial majority of our revenue from sales of cameras and accessories for the foreseeable future. A decline in the price of these products, whether due to macroeconomic conditions, competition or otherwise, or our inability to increase sales of these products, would harm our business and operating results more seriously than it would if we derived significant revenue from a variety of product lines and services. Any decrease in the sales of our capture devices would harm our business. While we are evaluating other products and services to add to our offerings, we may not be successful in identifying or executing on such opportunities, and we expect sales of capture devices to represent a substantial portion of our revenue for the foreseeable future. As a result, our future growth and financial performance will depend heavily on our ability to develop and sell enhanced versions of our capture devices. If we fail to deliver product enhancements, new releases or new products that our customers want, our business and results of operations would be harmed.

We rely on third-party suppliers, some of which are sole-source suppliers, to provide components for our products.

All of the components that go into the manufacture of our cameras and accessories are sourced from third-party suppliers, and some of these components are provided by a single supplier or by a supplier that could potentially become a competitor. If we lose access to components from a particular supplier, or experience a significant disruption in the supply of products and components from a current supplier, we may be unable to locate alternative suppliers of comparable quality at an acceptable price, or at all, and our business could be materially and adversely affected. In addition, if we experience a significant increase in demand for our products, our suppliers might not have the capacity or elect to meet our needs as they allocate components to other customers. Identifying a suitable supplier is an involved process that requires us to become satisfied with the supplier's quality control, responsiveness and service, financial stability and labor and other ethical practices, and if we seek to source materials from new suppliers there can be no assurance that we could do so in a manner that does not disrupt the manufacture and sale of our products. Our reliance on single source, or a limited number of, suppliers involves a number of additional risks, including risks related to:

supplier capacity constraints;

price increases;

timely delivery;

component quality;

failure of a key supplier to remain in business and adjust to market conditions;

delays in, or the inability to execute on, a supplier roadmap for components and technologies; and

natural disasters, fire, acts of terrorism or other catastrophic events.

Table of Contents

In particular, we incorporate video compression and image processing semiconductors from one provider, Ambarella, Inc., into all of our cameras, and we do not have an alternative supplier for these key components. If Ambarella stopped supplying components on acceptable terms, or at all, or we experienced delays in receipt of components from Ambarella, we would experience a significant disruption in our ability to produce our products, and our business would be materially and adversely affected.

We do not expect to continue to grow in the future at the same rate as we have in the past and profitability in recent periods might not be indicative of future performance.

Although our revenue and profitability have grown rapidly from 2009 through 2013, you should not consider our recent revenue growth as indicative of our future performance. In future periods, our revenue could decline or grow more slowly than we expect. We also may incur significant losses in the future for a number of reasons, including other risks described in this prospectus, and we may encounter unforeseen expenses, difficulties, complications, delays and other unknown factors.

If our sales during the holiday season fall below our forecasts, our overall financial condition and results of operations could be adversely affected.

Seasonal consumer shopping patterns significantly affect our business. Specifically, our revenue is traditionally strongest in the fourth quarter of each year due to increased consumer purchases during holiday periods, and fourth quarter revenue comprised 44% and 37% of our 2012 and 2013 revenue, respectively. Given the strong seasonal nature of our sales, appropriate forecasting is critical to our operations. We anticipate that this seasonal impact on our net sales is likely to continue and any shortfall in expected fourth quarter net sales, due to macroeconomic conditions, a decline in the effectiveness of our promotional activities or supply chain disruptions, or for any other reason, would cause our annual results of operations to suffer significantly.

In contrast, a substantial portion of our expenses are personnel related and include salaries, stock-based compensation, benefits and incentive-based compensation plan expenses, which are not seasonal in nature. Accordingly, in the event of revenue shortfalls, we are generally unable to mitigate the negative impact on margins in the short term. If this were to occur, our operating results would be harmed.

We may have difficulty in accurately predicting our future customer demand which could adversely affect our operating results.

To ensure adequate inventory supply and meet the demands of our retailers and distributors, we must forecast inventory needs and place orders with our contract manufacturers and component suppliers based on our estimates of future demand for particular products. We have relatively recently begun producing our products in substantial volumes, and we have experienced rapid growth. We may be unable to meet customer, retailer or distributor demand for our products or may be required to incur higher costs to secure the necessary production capacity and components. We could also overestimate future sales of our products and risk carrying excess product and component inventory. Further, our ability to accurately forecast demand for our products could be affected by other factors, including product introductions by competitors, unanticipated changes in general market demand, macroeconomic conditions or consumer confidence. If we fail to continue to develop the infrastructure that enables us to accurately forecast customer demand for our products, our business and operating results could be adversely affected.

Table of Contents

Our success depends on our ability to maintain the value and reputation of our brand.

Our success depends on the value and reputation of our brand, including our primary trademarks GoPro and Be a Hero. The GoPro name and premium brand image are integral to the growth of our business and expansion into new vertical markets. Maintaining, promoting and positioning our brand will largely depend on the success of our marketing and merchandising efforts and our ability to provide consistent, high quality products. If we fail to achieve these objectives or if our public image or reputation were to be tarnished by negative publicity, our brand, business and operating results could be adversely affected. Negative publicity regarding the athletes we sponsor and celebrities we are associated with, our products, our customers UGC and the labor policies of any of our suppliers or manufacturers could create corresponding negative publicity for us, harm our brand image and, as a result, adversely impact our sales and results of operations. Maintaining and enhancing our brand may require us to make substantial investments and these investments may not achieve the desired goals. If we fail to successfully promote and maintain our brand or if we incur excessive expenses in this effort, our business and operating results could be adversely affected.

To remain competitive and stimulate customer demand, we must successfully manage frequent product introductions and transitions.

We believe that we must continually develop and introduce new products, enhance our existing products and effectively stimulate customer demand for new and upgraded products. Our research and development efforts are complex and require us to incur substantial research and development expense. Our research and development expense was \$8.6 million, \$36.1 million, \$73.7 million and \$28.7 million for 2011, 2012, 2013 and the three months ended March 31, 2014, respectively, and we anticipate that research and development expense will increase in the future. We may not be able to achieve an acceptable return, if any, on our research and development efforts. Further, any failure to complete product transitions effectively could harm our brand.

The success of new product introductions depends on a number of factors including, but not limited to, timely and successful research and development, market and customer acceptance, the effective forecasting and management of product demand, purchase commitments and inventory levels, the management of manufacturing and supply costs, and the risk that new products may have quality or other defects in the early stages of introduction. For example, in order to launch our HERO3 line of capture devices in time for the 2012 holiday shopping season, we implemented a compressed design and manufacturing cycle. As a result, our initial production run of HERO3 Black edition capture devices suffered from a number of design issues, part shortages and manufacturing problems, which reduced the number of units we were able to ship for the 2012 holiday season. Moreover, because of the compressed development schedule, our HERO3 capture devices required a subsequent firmware update to address certain issues, which resulted in negative publicity for us. In the future, if we do not successfully manage product transitions, especially during the holiday shopping season, our revenue and business may be harmed.

The introduction of new products or product enhancements may shorten the life cycle of our existing products, or replace sales of some of our current products, thereby offsetting the benefit of even a successful product introduction, and may cause customers to defer purchasing our existing products in anticipation of the new products and potentially lead to challenges in managing inventory of existing products. We also provide price protection to some of our retailers as a result of our new product introductions. If we fail to effectively manage new product introductions, our revenue and profitability may be harmed.

Table of Contents

Any material disruption of our information systems could adversely affect our operating results.

We are increasingly dependent on information systems to operate our ecommerce website, process transactions, respond to customer inquiries, manage our supply chain and inventory, ship goods on a timely basis and maintain cost-efficient operations. Any material disruption or slowdown of our systems, including a disruption or slowdown caused by our failure to successfully upgrade our systems, system failures, viruses, computer hackers or other causes, could cause delays in our supply chain or cause information, including data related to customer orders, to be lost or delayed which could result in delays in the delivery of merchandise to our stores and customers or lost sales, especially if the disruption or slowdown occurred during the holiday season. Any of these events could reduce demand for our products, impair our ability to complete sales through our ecommerce channels and cause our revenue to decline. If changes in technology cause our information systems to become obsolete, or if our information systems are inadequate to handle our growth, we could lose customers or our business and operating results could be adversely affected.

In particular, we are heavily reliant on our software-as-a-service, or SaaS, enterprise resource planning systems to conduct our order and inventory management and financial processes. As we expand our operations, we expect to utilize additional systems and service providers that may also be essential to managing our business. Although the systems and services that we require are typically available from a number of providers, it is time consuming and costly to qualify and implement these relationships. Therefore, our ability to manage our business would suffer if one or more of our providers suffer an interruption in their business, or experience delays, disruptions or quality control problems in their operations, or we have to change or add systems and services. We may not be able to control the quality of the systems and services we receive from third-party service providers, which could impair our ability to implement appropriate internal controls over financial reporting and may impact our business, operating results and financial condition.

We are highly dependent on our Chief Executive Officer.

Our future success depends in significant part on the continued service of our Chief Executive Officer, Nicholas Woodman. Mr. Woodman is critical to the strategic direction and overall management of our company as well as our research and development process. Mr. Woodman is an at-will employee and there are no vesting restrictions on any of the Class B common stock that he owns. The loss of Mr. Woodman could adversely affect our business, financial condition and operating results.

We depend on key personnel to operate our business, and many members of our current management team are new. If we are unable to retain, attract and integrate qualified personnel, our ability to develop and successfully grow our business could be harmed.

In addition to the continued services of Mr. Woodman, we believe that our future success is highly dependent on the contributions of our executive officers, as well as our ability to attract and retain highly skilled and experienced sales, research and development and other personnel in the United States and abroad. Some of our executive management team, including our Chief Financial Officer, General Counsel, and Vice President of Communications, joined us very recently and these changes in our management team may be disruptive to our business.

All of our employees, including our executive officers, are free to terminate their employment relationship with us at any time, and their knowledge of our business and industry may be

Table of Contents

difficult to replace. If one or more of our executive officers or key employees leaves, we may not be able to fully integrate new personnel or replicate the prior working relationships, and our operations could suffer. Qualified individuals are in high demand, and we may incur significant costs to attract them. Many of the companies with which we compete for experienced personnel also have greater resources than we do. Competition for qualified personnel is particularly intense in the San Francisco Bay Area, where our headquarters are located. If we are unable to attract and retain highly skilled personnel, we may not be able to achieve our strategic objectives, and our business, financial condition and operating results could be adversely affected.

If we do not effectively maintain and further develop our sales channels, including developing and supporting our retail sales channel and distributors, our business could be harmed.

As a consumer-facing company, we depend upon effective sales channels to reach the consumers who are the ultimate purchasers of our capture devices. In the United States, we primarily sell our products directly through a mix of retail channels, including big box, mid-market and specialty retailers, and we reach certain U.S. markets through distributors. In international markets, we primarily sell through distributors who in turn sell to local retailers. We depend on retailers to provide adequate and attractive space for our products and POP displays in their stores. We further depend on our retailers to employ, educate and motivate their sales personnel to effectively sell our products. If our retailers do not adequately display our products, choose to promote competitors' products over ours or do not effectively explain to customers the advantages of our products, our sales could decrease and our business could be harmed. Similarly, our business could be adversely affected if any of our large retail customers were to experience financial difficulties, or change the focus of their businesses in a way that deemphasized the sale of our products. We are also investing heavily in providing new retailers with POP displays and expanding the footprint of our POP displays in existing stores, and there can be no assurance that this investment will lead to increased sales.

We depend on our distributors to reach certain market segments in the United States and to reach our international retailers. Our distributors generally offer products from several different manufacturers. Accordingly, we are at risk that these distributors may give higher priority to selling other companies' products. If we were to lose the services of a distributor, we might need to find another distributor in that area, and there can be no assurance of our ability to do so in a timely manner or on favorable terms. Further, our distributors build inventories in anticipation of future sales, and if such sales do not occur as rapidly as they anticipate, our distributors will decrease the size of their future product orders. We are also subject to the risks of our distributors encountering financial difficulties, which could impede their effectiveness and also expose us to financial risk if they are unable to pay for the products they purchase from us. Any reduction in sales by our current distributors, loss of key distributors or decrease in revenue from our distributors could adversely affect our revenue, operating results and financial condition.

A small number of retailers and distributors account for a substantial portion of our revenue, and if our relationships with any of these retailers or distributors were to be terminated or the level of business with them significantly reduced, our business could be harmed.

Our ten largest customers, measured by the revenue we derive from them, accounted for 44%, 42%, 51% and 51% of our revenue for 2011, 2012, 2013 and the three months ended March 31, 2014, respectively. One retailer accounted for 15%, 15%, 17% and 13% of our revenue for 2011, 2012, 2013 and the three months ended March 31, 2014, respectively. One distributor accounted for 10% of our revenue for the three months ended March 31, 2014. The loss of a small number

Table of Contents

of our large customers, or the reduction in business with one or more of these customers, could have a significant adverse impact on our operating results. While we have agreements with these large customers, these agreements do not require them to purchase any meaningful amount of our products.

If we encounter problems with our distribution system, our ability to deliver our products to the market and to meet customer expectations could be harmed.

We rely on a select number of third-party distribution facilities for substantially all of our product distribution. Our distribution facilities include computer controlled and automated equipment, which means their operations may be vulnerable to computer viruses or other security risks, the proper operation of software and hardware, electronic or power interruptions or other system failures. Further, because substantially all of our products are distributed from only a few locations, our operations could be interrupted by labor difficulties, extreme or severe weather conditions, or floods, fires or other natural disasters near our distribution centers. If we encounter problems with our distribution system, our ability to meet customer expectations, manage inventory, complete sales and achieve our objectives for operating efficiencies could be harmed.

We are subject to international business uncertainties.

Revenue from outside the United States comprised 35%, 47%, 49% and 53% of our revenue in 2011, 2012, 2013 and the three months ended March 31, 2014, respectively, and we expect this portion to increase in the future. Further, our supply chain partners have operations in countries including China, Singapore and the Netherlands. We intend to expand our relationships in these countries and may establish additional relationships in other countries to grow our operations. Operating in foreign countries requires significant resources and management attention, and we have limited experience entering new geographic markets. We cannot be assured that our international efforts will be successful. International sales and operations may be subject to risks such as:

difficulties in staffing and managing foreign operations;

burdens of complying with a wide variety of laws and regulations;

adverse tax effects and foreign exchange controls making it difficult to repatriate earnings and cash;

political and economic instability;

terrorist activities and natural disasters;

trade restrictions;

differing employment practices and laws and labor disruptions;

the imposition of government controls;

lesser degrees of intellectual property protection;

tariffs and customs duties and the classifications of our goods by applicable governmental bodies;

a legal system subject to undue influence or corruption; and

a business culture in which illegal sales practices may be prevalent.

The occurrence of any of these risks could negatively affect our international business and consequently our business, operating results and financial condition.

Table of Contents

We may be subject to product liability or warranty claims that could result in significant direct or indirect costs, or we could experience greater returns from retailers than expected, which could harm our business and operating results.

We generally provide a 12-month warranty on all of our products, except in the European Union, or EU, where we provide a two-year warranty on all of our products. The occurrence of any material defects in our products could make us liable for damages and warranty claims in excess of our current reserves. In addition, we could incur significant costs to correct any defects, warranty claims or other problems, including costs related to product recalls. Any negative publicity related to the perceived quality of our products could affect our brand image, decrease retailer, distributor and customer demand, and adversely affect our operating results and financial condition. Also, while our warranty is limited to repairs and returns, warranty claims may result in litigation, the occurrence of which could adversely affect our business and operating results.

Our intellectual property rights and proprietary rights may not adequately protect our products.

Our commercial success will depend substantially on our ability to obtain patents and other intellectual property rights and maintain adequate legal protection for our products in the United States and other countries. We will be able to protect our intellectual property from unauthorized use by third parties only to the extent that these assets are covered by valid and enforceable patents, trademarks, copyrights or other intellectual property rights, or are effectively maintained as trade secrets. As of the date of this filing, we have 42 issued patents and 68 patent applications pending in the United States and 15 corresponding issued patents and 12 patent applications pending in foreign jurisdictions. Our issued U.S. patents will expire between 2024 and 2032 and our issued foreign patents will expire between 2022 and 2038. We apply for patents covering our products, services, technologies and designs, as we deem appropriate. We may fail to apply for patents on important products, services, technologies or designs in a timely fashion, or at all. We do not know whether any of our patent applications will result in the issuance of any patents. Even if patents are issued, they may not be sufficient to protect our products, services, technologies, or designs. Our existing and future patents may not be sufficiently broad to prevent others from developing competing products, services technologies, or designs. No consistent policy regarding the breadth of patent claims has emerged to date in the United States and we expect the landscape for patent protection for our products, services technologies, and designs to continue to be uncertain. Intellectual property protection and patent rights outside of the United States are even less predictable. As a result, the validity and enforceability of patents cannot be predicted with certainty. Moreover, we cannot be certain whether:

we were the first to conceive of or invent the inventions covered by each of our issued patents and pending patent applications;

we were the first to reduce to practice inventions covered by each of our issued patents and pending patent applications;

we were the first to file patent applications for these inventions;

others will independently develop similar or alternative products, technologies, services or designs or duplicate any of our products, technologies, services or designs;

any patents issued to us will provide us with any competitive advantages, or will be challenged by third parties;

Table of Contents

we will develop additional proprietary products, services, technologies or designs that are patentable; or

the patents of others will have an adverse effect on our business.

The patents we own or license and those that may be issued to us in the future may be challenged, invalidated, rendered unenforceable or circumvented, and the rights granted under

any issued patents may not provide us with proprietary protection or competitive advantages. Moreover, third parties could practice our inventions in territories where we do not have patent protection or in territories where they could obtain a compulsory license to our technology where patented. Such third parties may then try to import products made using our inventions into the United States or other territories. Additional uncertainty may result from potential passage of patent legislation by the U.S. Congress, legal precedent by the U.S. Federal Circuit Courts and Supreme Court as they determine legal issues concerning the scope and construction of patent claims and inconsistent interpretation of patent laws by the lower courts. Accordingly, we cannot ensure that any of our pending patent applications will result in issued patents, or even if issued, predict the breadth, validity and enforceability of the claims upheld in our and other companies' patents.

We have registered and applied to register certain of our trademarks in several jurisdictions worldwide. In some jurisdictions where we have applied to register our trademarks, other applications or registrations exist for the same, similar or otherwise related products or services. If we are not successful in arguing that there is no likelihood of confusion between our marks and the marks that are the subject of the other applications or registrations owned by third parties, our applications may be denied, preventing us from obtaining trademark registrations and adequate protection for our marks in the relevant jurisdictions, which could impact our ability to build our brand identity and market our products and services in those jurisdictions. Whether or not our application is denied, third parties may claim that our trademarks infringe their rights. As a result, we could be forced to pay significant settlement costs or cease the use of these trademarks and associated elements of our brand in the United States or other jurisdictions.

Even in those jurisdictions where we are able to register our trademarks, competitors may adopt or apply to register similar trademarks to ours, may register domain names that mimic ours or incorporate our trademarks, or may purchase keywords that are identical or confusingly similar to our brand names as terms in Internet search engine advertising programs, which could impede our ability to build our brand identity and lead to confusion among potential customers of our products and services. We believe that other companies have copied some of our trademarks for use in the marketplace. We have sent demand letters in a number of these instances, but there can be no assurance that we are aware of all such instances or that we will prevail should such letters be ineffective. If we are not successful in proving that we have prior rights in our marks and arguing that there is a likelihood of confusion between our marks and the marks of these third parties, our inability to prevent these third parties from continuing to use our marks or confusingly similar marks may negatively impact the strength, value and effectiveness of our brand names and our ability to market our products and prevent consumer confusion.

The laws of certain countries do not protect intellectual property and proprietary rights to the same extent as the laws of the United States and, therefore, in certain jurisdictions, we may be unable to protect our products, services, technologies and designs adequately against unauthorized third-party copying, infringement or use, which could adversely affect our competitive position. For instance, we are aware of cameras that have been designed and labeled

Table of Contents

to appear similar to our products, and are available for sale in countries within Asia, Europe and, to a lesser extent, the United States. To protect or enforce our intellectual property rights, we may initiate proceedings or litigation against third parties. Such proceedings or litigation may be necessary to protect our trade secrets or know-how, products, technologies, designs, brands, reputation, likeness, authorship works or other intellectual property rights. Such proceedings or litigation also may be necessary to determine the enforceability, scope and validity of the proprietary rights of others. Any proceedings or lawsuits that we initiate could be expensive, take significant time and divert management's attention from other business concerns. Additionally, we may provoke third parties to assert claims against us. These claims could invalidate or narrow the scope of our own intellectual property rights. We may not prevail in any proceedings or lawsuits that we initiate and the damages or other remedies awarded, if any, may be commercially valuable. The occurrence of any of these events may adversely affect our business, financial condition and operating results.

Our business may suffer if it is alleged or determined that our technology or another aspect of our business infringes the intellectual property rights of others.

The markets in which we compete are characterized by the existence of a large number of patents and trade secrets and also by litigation based on allegations of infringement or other violations of intellectual property rights. Moreover, in recent years, individuals and groups have purchased patents and other intellectual property assets for the purpose of making claims of infringement to extract settlements from companies like ours. From time to time, third parties have claimed that we are infringing upon their intellectual property rights or have offered licenses to us in respect of technology they own that may be infringed upon by our products, and we expect to continue to receive such claims or offers in the future. We are currently in receipt of letters of this nature in respect of which we have reached no resolution with the third-party sender. Also, third parties may make infringement claims against us that relate to technology developed and owned by one of our suppliers for which our suppliers may or may not indemnify us. Even if we are indemnified against such costs, the indemnifying party may be unable to uphold its contractual obligations and determining the scope of these obligations could require additional litigation. Claims of intellectual property infringement against us or our suppliers might require us to redesign our products, rebrand our services, enter into costly settlement or license agreements, pay costly damage awards or face a temporary or permanent injunction prohibiting us from marketing or selling our products or services. If we cannot or do not license the infringed intellectual property on reasonable terms or at all, or substitute similar intellectual property from another source, our revenue and operating results could be adversely impacted. Additionally, our customers, distributors and retailers may not purchase our offerings if they are concerned that they may infringe third-party intellectual property rights. Responding to such claims, regardless of their merit, can be time consuming, costly to defend in litigation, divert management's attention and resources, damage our reputation and brand and cause us to incur significant expenses. The occurrence of any of these events may have an adverse effect on our business, financial condition and operating results.

If we are unable to anticipate consumer preferences and successfully develop attractive products, we might not be able to maintain or increase our revenue and profitability.

Our success depends on our ability to identify and originate product trends as well as to anticipate and react to changing consumer demands in a timely manner. If we are unable to introduce new products or novel technologies in a timely manner or our new products or technologies are not accepted by consumers, our competitors may introduce more attractive

Table of Contents

products, which could hurt our competitive position. Our new products might not receive consumer acceptance if consumer preferences shift to other products, and our future success depends in part on our ability to anticipate and respond to these changes. Failure to anticipate and respond in a timely manner to changing consumer preferences could lead to, among other things, lower revenue and excess inventory levels.

As we continually seek to enhance our products, we may incur additional costs to incorporate new or revised features. We might not be able to, or determine that it is not in our interests to, raise prices to compensate for these additional costs. For example, our gross profit declined as a percentage of revenue in 2012 and 2013 compared to the prior year periods due, in part, to the additional costs of incorporating new functionality into our newest generation of products.

If we encounter issues with our manufacturers, our business, brand and results of operations could be harmed and we could lose sales.

We do not have internal manufacturing capabilities and rely primarily on two contract manufacturers, Chicony Electronics Co. Ltd. and Sky Light Digital Limited/Sky Light Industrial Limited, to manufacture our products. We cannot be certain that we will not experience operational difficulties with our manufacturers, including reductions in the availability of production capacity, errors in complying with product specifications, insufficient quality control, failures to meet production deadlines, increases in manufacturing costs and increased lead times. Additionally, our manufacturers may experience disruptions in their manufacturing operations due to equipment breakdowns, labor strikes or shortages, component or material shortages, cost increases or other similar problems. Further, in order to minimize their inventory risk, our manufacturers might not order components from third-party suppliers with adequate lead time, thereby impacting our ability to meet our demand forecast. Therefore, if we fail to manage our relationship with our manufacturers effectively, or if they experience operational difficulties, our ability to ship products to our retailers and distributors could be impaired and our competitive position and reputation could be harmed.

In the event that we receive shipments of products that fail to comply with our technical specifications or that fail to conform to our quality control standards, and we are not able to obtain replacement products in a timely manner, we risk revenue losses from the inability to sell those products, increased administrative and shipping costs, and lower profitability. Additionally, if defects are not discovered until after customers purchase our products, our customers could lose confidence in the technical attributes of our products and our business could be harmed.

We do not control our contract manufacturers or suppliers, or require them to comply with a formal code of conduct, and actions that they might take could harm our reputation and sales.

We do not control our contract manufacturers or suppliers, including their labor, environmental or other practices, or require them to comply with a formal code of conduct. Though we conduct periodic audits of our contract manufacturers and suppliers compliance with applicable laws and good industry practices, these audits may not be frequent or thorough enough to detect non-compliance. A violation of labor, environmental or other laws by our contract manufacturers or suppliers, or a failure of these parties to follow ethical business practices, could lead to negative publicity and harm our reputation. In addition, we may choose to seek alternative manufacturers or suppliers if these violations or failures were to occur. Identifying and qualifying new manufacturers or suppliers can be time consuming and we might not be able to substitute suitable alternatives in a timely manner or at an acceptable cost. Other consumer products companies have faced significant criticism for the actions of their manufacturers and suppliers,

Table of Contents

and we could face such criticism ourselves. Any of these events could adversely affect our brand, harm our reputation, reduce demand for our products and harm our ability to meet demand if we need to identify alternative manufacturers or suppliers.

Our growth depends in part on our penetrating additional consumer markets, and we may not be successful in doing so.

Our initial growth has largely been fueled by the adoption of our products by people looking to self-capture images of themselves participating in exciting physical activities. We believe that our future growth depends not only on continuing to reach this core demographic, but also broaden our customer base to include a more diverse group of consumers seeking to capture themselves, family members and things around them in their daily lives. While we are investing in sales and marketing activities to reach this expanded market, we cannot be assured that we will be successful in doing so. If we are not successful in penetrating additional consumer markets, we might not be able to grow our market share and revenue.

We plan to continue to invest in the further development of a content management platform and the acquisition and distribution of content, and we might not be successful in doing so.

We believe that enabling consumers to easily manage, share and enjoy their GoPro content will increase consumer interest in our products, and we intend to continue to invest in improving our software offerings and the further development of our content management platform to assist consumers with these tasks. The development of these software offerings and other tools needed for these purposes requires different skills from our historical core focus of developing capture devices.

We are investing to scale GoPro as a media entity and develop new revenue opportunities by increasing production of GoPro originally produced content while simultaneously increasing the aggregation and redistribution of our customers' best of UGC. Additionally, we are investing to develop and distribute the GoPro Channel on more partner platforms such as Xbox Live and Virgin America. The execution of this business strategy requires different skills from our historical core focus of developing capture devices.

To achieve our goals, we have recently hired personnel with what we believe are requisite skills and experience to execute on these plans, and we continue to seek additional personnel with these skills. We cannot be assured of our ability to organize, manage and execute these relatively new functions within our business. If we are not successful, we may not achieve our goals of facilitating greater consumer use of their content and scaling GoPro as a media entity, and we might not recover the investments we make in these efforts, which could adversely affect our business and operating results.

We may acquire other businesses or receive offers to be acquired, which could require significant management attention, disrupt our business, dilute stockholder value and adversely affect our operating results.

As part of our business strategy, we may selectively make investments in or acquire other companies, products or technologies. We may not be able to find suitable acquisition candidates and we may not be able to complete acquisitions on favorable terms, if at all. If we do complete acquisitions, we may not ultimately strengthen our competitive position or achieve our goals, and any acquisitions we complete could be viewed negatively by users or investors. In addition, if we fail to integrate successfully such acquisitions, or the technologies associated with such acquisitions, into our company, the revenue and operating results of the combined company

Table of Contents

could be adversely affected. Acquisitions may disrupt our ongoing operations, divert management from their primary responsibilities, subject us to additional liabilities, increase our expenses and adversely impact our business, financial condition, operating results and cash flows. We may not successfully evaluate or utilize the acquired technology and accurately forecast the financial impact of an acquisition transaction, including accounting charges. We may have to pay cash, incur debt or issue equity securities to pay for any such acquisition, each of which could affect our financial condition or the value of our capital stock. The sale of equity or issuance of debt to finance any such acquisitions could result in dilution to our stockholders. If we incur more debt it would result in increased fixed obligations and could also subject us to covenants or other restrictions that would impede our ability to manage our operations. In addition, our future operating results may be impacted by performance earnouts or contingent bonuses. Furthermore, acquisitions may require large one-time charges and can result in increased debt or contingent liabilities, adverse tax consequences, additional stock-based compensation expense and the recording and subsequent amortization or impairments of amounts related to certain purchased intangible assets, any of which could negatively impact our future results of operations. We may also record goodwill in connection with an acquisition and incur goodwill impairment charges in the future. In the future, if our acquisitions do not yield expected revenue, we may be required to take charges to our operating results based on this impairment assessment process, which could adversely affect our results of operations.

Failure to obtain new, and maintain existing, high-quality event, athlete and celebrity sponsorships could harm our business.

Establishing relationships with high profile sporting events, athletes and celebrity personalities to evaluate, promote and establish product credibility with consumers, including entering into sponsorship and licensing agreements, has and will continue to be a key element of our marketing strategy. However, as competition in the camera and video recorder markets has increased, the costs of obtaining and retaining event, athlete and celebrity sponsorships and licensing agreements have increased. If we are unable to maintain our current associations with our event, athlete and celebrity partners, or to do so at a reasonable cost, we could lose the benefits of these relationships, and we may be required to modify and substantially increase our marketing investments. In addition, actions taken by endorsers of our products that harm their reputations could also harm our brand image with consumers. The failure to correctly identify high impact events, promising athletes or other appealing personalities to use and endorse our products, or poor performance by our endorsers, could adversely affect our brand and result in decreased sales of our products.

If we are unable to maintain or acquire rights to include intellectual property owned by others in the content distributed by us, our marketing, sales or future business strategy could be affected or we could be subject to lawsuits relating to our use of this content.

The distribution of GoPro content helps to market our brand and our products. If we cannot continue to acquire rights to distribute UGC or acquire rights to use and distribute music, athlete and celebrity names and likenesses or other content for our original productions or for our GoPro Studio Edit Templates, our marketing efforts could be diminished, our sales could be harmed and our future content strategy could be adversely affected. In addition, third-party content providers may allege that we have violated their intellectual property rights. If we are unable to obtain sufficient rights, successfully defend our use of or otherwise alter our business practices on a timely basis in response to claims of infringement, misappropriation, misuse or other violation of third-party intellectual property rights, our business may be adversely affected. As a

Table of Contents

distributor of content, we face potential liability for negligence, copyright, or trademark infringement or other claims based on the nature and content of materials that we distribute. If we are found to be liable for infringement, then our business may suffer.

If our customers are not satisfied with our technical support or software updates, they may choose not to purchase our products, either of which would adversely impact our business and operating results.

Our business relies, in part, on our customers' satisfaction with the technical support and software updates we provide to support our products. If we fail to provide technical support services that are responsive, satisfy our customers' expectations and resolve issues that they encounter with our products, customers may choose not to purchase additional products and we may face brand and reputational harm, which could adversely affect our operating results.

We could be adversely affected by violations of the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act or similar anti-bribery laws in other jurisdictions in which we operate.

The global nature of our business and the significance of our international revenue create various domestic and local regulatory challenges and subject us to risks associated with our international operations. The U.S. Foreign Corrupt Practices Act, or the FCPA, the U.K. Bribery Act 2010, or the U.K. Bribery Act, and similar anti-bribery and anticorruption laws in other jurisdictions generally prohibit U.S.-based companies and their intermediaries from making improper payments to non-U.S. officials for the purpose of obtaining or retaining business, directing business to another, or securing an advantage. In addition, U.S. public companies are required to maintain records that accurately and fairly represent their transactions and have an adequate system of internal accounting controls. Under the FCPA, U.S. companies may be held liable for the corrupt actions taken by directors, officers, employees, agents, or other strategic or local partners or representatives. As such, if we or our intermediaries fail to comply with the requirements of the FCPA or similar legislation, governmental authorities in the United States and elsewhere could seek to impose substantial civil and/or criminal fines and penalties which could have a material adverse effect on our business, reputation, operating results and financial condition.

We operate in areas of the world that experience corruption by government officials to some degree and, in certain circumstances, compliance with anti-bribery and anticorruption laws may conflict with local customs and practices. Our global operations require us to import and export to and from several countries, which geographically expands our compliance obligations. In addition, changes in such laws could result in increased regulatory requirements and compliance costs which could adversely affect our business, financial condition and results of operations. We cannot be assured that our employees or other agents will not engage in prohibited conduct and render us responsible under the FCPA or the U.K. Bribery Act. If we are found to be in violation of the FCPA, the U.K. Bribery Act or other anti-bribery or anticorruption laws (either due to acts or inadvertence of our employees, or due to the acts or inadvertence of others), we could suffer criminal or civil penalties or other sanctions, which could have a material adverse effect on our business.

We are subject to governmental export and import controls and economic sanctions laws that could subject us to liability and impair our ability to compete in international markets.

The U.S. and various foreign governments have imposed controls, export license requirements and restrictions on the import or export of some technologies. Our products are subject to U.S. export controls, including the Commerce Department's Export Administration Regulations and various economic and trade sanctions regulations established by the Treasury Department's

Table of Contents

Office of Foreign Assets Controls, and exports of our products must be made in compliance with these laws. Furthermore, U.S. export control laws and economic sanctions prohibit the provision of products and services to countries, governments, and persons targeted by U.S. sanctions. Even though we take precautions to prevent our products from being provided to targets of U.S. sanctions, our products, including our firmware updates, could be provided to those targets or provided by our customers despite such precautions. Any such provision could have negative consequences, including government investigations, penalties and reputational harm. Our failure to obtain required import or export approval for our products could harm our international and domestic sales and adversely affect our revenue.

In 2014, we determined that we may have shipped some products to international customers that, prior to shipment, may have required either a one-time product review or application for an encryption registration number in lieu of such product review. We have since acquired the appropriate encryption registration number. We also recently determined that we provided controlled technology to our offshore manufacturing partners without the required export licenses and have submitted an export license application for the export of controlled technology to our offshore manufacturing partners. We have made an initial voluntary submission to the Commerce Department's Bureau of Industry and Security to report these potential violations and are in the process of preparing a supplemental disclosure.

We also discovered in 2014 potential sanctions violations involving transactions with sanctioned parties, the provision of support services to persons in an embargoed country, and firmware updates to persons in several embargoed countries. Upon learning of these transactions and associated export control requirements, we promptly initiated an internal investigation and are taking remedial measures to prevent similar export control violations from occurring in the future. We have made an initial voluntary submission to the U.S. Department of Treasury's Office of Foreign Assets Control to report these potential violations and are preparing a supplemental or update disclosure.

While we do not expect the subject matters of our voluntary submissions to have a material effect on our business or operating results, they could result in penalties, costs, and restrictions on export privileges.

Our effective tax rate and the intended tax benefits of our corporate structure and intercompany arrangements depend on the application of the tax laws of various jurisdictions and on how we operate our business.

The application of the tax laws of various jurisdictions, including the United States, to our international business activities is subject to interpretation and depends on operating our business in a manner consistent with our corporate structure and intercompany arrangements. The taxing authorities of the jurisdictions in which we operate may challenge our methods for valuing technology, intercompany arrangements, including our transfer pricing, or our current or historical tax positions, including with respect to research and development tax credits and our prior status as an S corporation. Any such challenge could be costly and time consuming to defend and may increase our worldwide effective tax rate, and consequently adversely affect our financial position and results of operations. In order to effectively structure and execute our international operations we will need to continue to hire, train and manage qualified personnel. If our new hires underperform, or if we are unsuccessful in hiring, training, managing and integrating these new employees, our business may be adversely affected.

Table of Contents

Our corporate structure includes legal entities located in jurisdictions with income tax rates lower than the U.S. statutory tax rate. Our intercompany arrangements result in income earned by such entities in accordance with arm's-length principles and commensurate with functions performed, risks assumed and ownership of valuable corporate assets. We believe that income taxed in certain foreign jurisdictions at a lower rate relative to the U.S. statutory rate will have a beneficial impact on our worldwide effective tax rate.

Significant judgment is required in evaluating our tax positions and determining our provision for income taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. For example, our effective tax rates could be adversely affected by earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated in countries where we have higher statutory rates, by changes in foreign currency exchange rates or by changes in the relevant tax, accounting and other laws, regulations, principles and interpretations. As we operate in numerous taxing jurisdictions, the application of tax laws can be subject to diverging and sometimes conflicting interpretations by tax authorities of these jurisdictions. It is not uncommon for taxing authorities in different countries to have conflicting views, for instance, with respect to, among other things, the manner in which the arm's-length standard is applied for transfer pricing purposes, or with respect to the valuation of intellectual property. In addition, tax laws are dynamic and subject to change as new laws are passed and new interpretations of the law are issued or applied. In particular, there is uncertainty in relation to the U.S. tax legislation in terms of the future corporate tax rate but also in terms of the U.S. tax consequences of income derived from intellectual property held in foreign jurisdictions.

Our existing corporate structure and intercompany arrangements have been implemented in a manner that we believe complies with current tax laws. However, our tax liabilities may be adversely affected if such structure and arrangements are challenged by a taxing authority or we are unable to appropriately adapt the manner in which we operate our business or if tax laws change.

An economic downturn or economic uncertainty in our key markets may adversely affect consumer discretionary spending and demand for our products.

Our products are discretionary items for consumers. Factors affecting the level of consumer spending for such discretionary items include general market conditions, macroeconomic conditions and other factors such as consumer confidence, the availability and cost of consumer credit, levels of unemployment and tax rates. As global economic conditions continue to be volatile or economic uncertainty remains, trends in consumer discretionary spending also remain unpredictable and subject to reductions due to credit constraints and uncertainties about the future. Unfavorable economic conditions may lead consumers to delay or reduce purchases of our products. Consumer demand for our products may not reach our sales targets, or may decline, when there is an economic downturn or economic uncertainty. Our sensitivity to economic cycles and any related fluctuation in consumer demand could adversely affect our business, financial condition and operating results.

We have previously identified a material weakness in our internal control over financial reporting, and if we are unable to maintain effective internal controls, we may not be able to produce timely and accurate financial statements, and we or our independent registered public accounting firm may conclude that our internal control over financial reporting is not effective, which could adversely impact our investors confidence and our stock price.

Prior to this offering, we were a private company and were not required to test our internal controls on a systematic basis. Our independent registered public accounting firm will not be

Table of Contents

required to formally attest to the effectiveness of our internal control over financial reporting until the later of (1) the year following our first annual report required to be filed with the SEC, or (2) the date we are no longer an Emerging Growth Company as defined in the recently enacted Jumpstart our Business Startups Act of 2012, or JOBS Act, if we take advantage of the exemptions contained in the JOBS Act. We anticipate that after the completion of this offering and upon the expiration of available exemptions, pursuant to Sections 302 and 404 of the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, we will be required to evaluate and determine the effectiveness, provide a management report and be subject to attestation of our internal control over financial reporting, beginning with our annual report for the fiscal year ending December 31, 2015.

In connection with the preparation of our financial statements for the years ended December 31, 2011 and 2012, we, in conjunction with our independent registered public accounting firm, identified a material weakness in the design and operating effectiveness of our internal control over financial reporting. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis. The material weakness primarily comprised deficiencies related to a lack of technical accounting skills, monitoring activities and a lack of adequate review processes and controls within our accounting and finance organization. During 2013, we took certain actions that remediated the material weakness, which included hiring management level personnel with technical accounting expertise, designing adequate review and monitoring procedures in our accounting and finance organization, and identifying and implementing improved processes and controls.

Further, we are in the process of designing and implementing the system of internal control over financial reporting required to comply with our future obligations and to strengthen our overall control environment. This initiative will be time consuming, costly, and might place significant demands on our financial and operational resources, as well as our IT systems.

Our current efforts to design and implement an effective control environment may not be sufficient to remediate or prevent future material weaknesses or significant deficiencies from occurring. A control system, no matter how well designed and operated, can provide only reasonable assurance that the control system's objectives will be met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and all instances of fraud will be detected. If we identify future material weaknesses in our internal controls over financial reporting, if we are unable to comply with the requirements of Section 404 of the Sarbanes-Oxley Act in a timely manner, if we are unable to assert that our internal control over financial reporting are effective, or if our independent registered public accounting firm is unable to express an opinion as to the effectiveness of our internal control over financial reporting, if and when required, investors may lose confidence in the accuracy and completeness of our financial reports and the market price of our Class A common stock could be negatively affected, and we could become subject to investigations by the stock exchange on which our securities are listed, the SEC or other regulatory authorities.

We have experienced rapid growth in recent periods. If we fail to manage our growth effectively, our financial performance may suffer.

We have experienced rapid growth over the last several years, which has placed a strain on our managerial, operational, research and development, sales and marketing, administrative and

Table of Contents

financial infrastructure. For example, we increased our total number of full-time employees from 49 as of December 31, 2010 to 718 as of March 31, 2014. We have also established operations in other countries. Our expansion has placed, and our expected future growth will continue to place, a significant strain on our managerial, operational, research and development, sales and marketing, administrative, financial and other resources.

Our success will depend in part upon our ability to manage our growth effectively. To do so, we must continue to increase the productivity of our existing employees and to hire, train and manage new employees as needed. To manage domestic and international growth of our operations and personnel, we will need to continue to improve our operational, financial and management controls and our reporting processes and procedures, and implement more extensive and integrated financial and business information systems. These additional investments will increase our operating costs, which will make it more difficult for us to offset any future revenue shortfalls by reducing expenses in the short term. Moreover, if we fail to scale our operations or manage our growth successfully, our business, financial condition and operating results could be adversely affected.

Consumers may be injured while engaging in activities that they self-capture with our products, and we may be exposed to claims, or regulations could be imposed, which could adversely affect our brand, operating results and financial condition.

Consumers use our cameras and accessories to self-capture their participation in a wide variety of physical activities, including extreme sports, which in many cases carry the risk of significant injury. We may be subject to claims if consumers are injured while using our products. Although we maintain insurance to help protect us from the risk of any such claims, such insurance may not be sufficient or may not apply to all situations. Similarly, proprietors of establishments at which consumers engage in challenging physical activities could seek to ban the use of our products in their facilities to limit their own liability. In addition, if lawmakers or governmental agencies were to determine that the use of our products increased the risk of injury to all or a subset of our customers, they may pass laws or adopt regulations that limit the use of our products or increase our liability associated with the use of our products. Any of these events could adversely affect our brand, operating results or financial condition.

If our estimates or judgments relating to our critical accounting policies prove to be incorrect, our operating results could be adversely affected.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, as provided in the section titled Management's discussion and analysis of financial condition and results of operations. The results of these estimates form the basis for making judgments about the carrying values of assets, liabilities and equity, and the amount of revenue and expenses that are not readily apparent from other sources. Our operating results may be adversely affected if our assumptions change or if actual circumstances differ from those in our assumptions, which could cause our operating results to fall below the expectations of securities analysts and investors, resulting in a decline in our stock price. Significant assumptions and estimates used in preparing our consolidated financial statements include those related to revenue recognition, sales incentives, stock-based compensation expense, POP displays, excess and obsolete inventory write-downs, warranty reserves, long-lived assets and accounting for income taxes including deferred tax assets and liabilities.

Table of Contents

Our credit facility provides our lenders with a first-priority lien against substantially all of our assets and contains financial covenants and other restrictions on our actions that may limit our operational flexibility or otherwise adversely affect our financial condition.

In December 2012, we entered into a senior secured credit agreement, including a \$120.0 million term loan that we expect to repay with the proceeds of this offering and a \$50.0 million revolving credit facility that we expect to retain. Our credit agreement contains a number of restrictive covenants, and the terms of our credit facility may restrict our current and future operations, particularly our ability to respond to certain changes or to take future actions.

A failure by us to comply with the covenants or payment requirements specified in our credit agreement could result in an event of default under the agreement, which would give the lenders the right to terminate their commitments to provide additional loans under our revolving credit facility and to declare all borrowings outstanding, together with accrued and unpaid interest and fees, to be immediately due and payable. In addition, the lenders would have the right to proceed against the collateral we granted to them, which consists of substantially all our assets. If the debt under our credit facility were to be accelerated, we may not have sufficient cash or be able to sell sufficient collateral to repay this debt, which would have an immediate material adverse affect on our business, results of operations and financial condition.

We are exposed to increased regulatory oversight and incur increased costs as a result of being a public company.

As a public company, we are required to satisfy the listing requirements and rules of the NASDAQ Stock Market and incur significant legal, accounting and other expenses that we did not incur as a private company. Currently, our audit committee is comprised of two independent directors. The listing requirements and rules of the NASDAQ Stock Market require that the audit committee be composed of at least three independent members within one year of the issuer's listing date. If we fail to find and elect an additional independent board member to serve on the audit committee, we would not be in compliance with the listing requirements and rules of the NASDAQ Stock Market. We will also incur costs associated with our public company reporting requirements and corporate governance requirements, including additional directors and officers liability insurance and requirements under the Sarbanes-Oxley Act, as well as rules implemented by the SEC and the NASDAQ Stock Market. These rules and regulations have increased, and will continue to increase, our legal and financial compliance costs and have made, and will continue to make, certain activities more time consuming and costly. Further, we have incurred costs in connection with hiring additional accounting, financial and compliance staff with appropriate public company experience and technical accounting knowledge. Any of these expenses could harm our business, operating results and financial condition.

We use open source software in our platform that may subject our technology to general release or require us to re-engineer our solutions, which may cause harm to our business.

We use open source software in connection with our services. From time to time, companies that incorporate open source software into their products have faced claims challenging the ownership of open source software and/or compliance with open source license terms. Therefore, we could be subject to suits by parties claiming ownership of what we believe to be open source software or noncompliance with open source licensing terms. Some open source software licenses require users who distribute or make available open source software as part of their software to publicly disclose all or part of the source code to such software and/or make available any

derivative works of the open source code on unfavorable terms or at no cost. While we monitor

Table of Contents

our use of open source software and try to ensure that none is used in a manner that would require us to disclose the source code or that would otherwise breach the terms of an open source agreement, such use could nevertheless occur and we may be required to release our proprietary source code, pay damages for breach of contract, re-engineer our applications, discontinue sales in the event re-engineering cannot be accomplished on a timely basis or take other remedial action that may divert resources away from our development efforts, any of which could adversely affect our business, financial condition or operating results.

Any significant disruption to our ecommerce business could result in lost sales.

Our sales through our ecommerce channel have been growing. Sales through GoPro.com generally have higher profit margins and provide us useful insight on the sales impact of certain of our marketing campaigns. Online sales are subject to a number of risks. System interruptions or delays could cause potential customers to fail to purchase our products and could harm our brand. The operation of our direct to consumer ecommerce business through GoPro.com depends on the ability to maintain the efficient and uninterrupted operation of online order-taking and fulfillment operations. Our ecommerce operations subject us to certain risks that could have an adverse effect on our operating results, including risks related to the computer systems that operate our website and related support systems, such as system failures, viruses, computer hackers and similar disruptions. If we are unable to continually add software and hardware, effectively upgrade our systems and network infrastructure and take other steps to improve the efficiency of our systems, system interruptions or delays could occur that adversely affect our operating results.

We utilize third party vendors for our customer-facing ecommerce technology, order management system and fulfillment in the United States and internationally. We depend on our technology vendors to manage up-time of the front-end ecommerce store, manage the intake of our orders, and export orders for fulfillment. In the future, we could begin to run all or a greater portion of our ecommerce components ourselves rather than use third party vendors. Any failure on the part of our third party ecommerce vendors or in our ability to transition third party services effectively could result in lost sales and harm our business.

Failure to adequately protect customer data could harm our brand and our reputation in the marketplace.

Changing regulations and laws governing the Internet, data privacy, data protection and ecommerce transactions (including taxation, pricing and electronic communications) could impede the growth of our ecommerce business, increase our cost of doing business and limit our ability to collect and use information collected from our customers. Further, new regulations limiting our ability to collect, use and disclose customer data, or imposing additional requirements with respect to the retention and security of customer data, could limit our marketing activities and could adversely affect our business and financial condition.

In our ecommerce services, we process, store and transmit customer data. We also collect customer data through certain marketing activities. Failure to prevent or mitigate data loss or other security breaches, including breaches of our vendors' technology and systems, could expose us or our customers to a risk of loss or misuse of such information, adversely affect our operating results, result in litigation or potential liability for us and otherwise harm our business. Further, we are subject to general business regulations and laws, as well as regulations and laws specifically governing the Internet, ecommerce and electronic devices. Existing and future laws and regulations, or new interpretations of these laws, may adversely affect our ability to conduct our ecommerce business.

Table of Contents

If we fail to comply with environmental requirements, our business, financial condition, operating results and reputation could be adversely affected.

We are subject to various environmental laws and regulations including laws governing the hazardous material content of our products and laws relating to the collection of and recycling of electrical and electronic equipment. Examples of these laws and regulations include the EU Restrictions of Hazardous Substances Directive, or the RoHS Directive, and the EU Waste Electrical and Electronic Equipment Directive, or the WEEE Directive, as well as the implementing legislation of the EU member states. Similar laws and regulations have been passed or are pending in China, South Korea, Norway and Japan and may be enacted in other regions, including in the United States, and we are, or may in the future be, subject to these laws and regulations.

The RoHS Directive and the similar laws of other jurisdictions ban the use of certain hazardous materials such as lead, mercury and cadmium in the manufacture of electrical equipment, including our products. Although we have policies and procedures in place requiring our contract manufacturers and major component suppliers to comply with the RoHS Directive requirements, we cannot assure you that our manufacturers and suppliers consistently comply with these requirements. In addition, if there are changes to these or other laws (or their interpretation) or if new similar laws are passed in other jurisdictions, we may be required to re-engineer our products to use components compatible with these regulations. This re-engineering and component substitution could result in additional costs to us or disrupt our operations or logistics.

The WEEE Directive requires electronic goods producers to be responsible for the collection, recycling and treatment of such products. Changes in interpretation of the directive may cause us to incur costs or have additional regulatory requirements to meet in the future in order to comply with this directive, or with any similar laws adopted in other jurisdictions. Our failure to comply with past, present and future similar laws could result in reduced sales of our products, substantial product inventory write-offs, reputational damage, penalties and other sanctions, which could harm our business and financial condition. We also expect that our products will be affected by new environmental laws and regulations on an ongoing basis. To date, our expenditures for environmental compliance have not had a material impact on our results of operations or cash flows and, although we cannot predict the future impact of such laws or regulations, they will likely result in additional costs and may increase penalties associated with violations or require us to change the content of our products or how they are manufactured, which could have a material adverse effect on our business and financial condition.

New regulations related to conflict minerals may cause us to incur additional expenses and could limit the supply and increase the costs of certain metals used in the manufacturing of our products.

As a public company, we will be subject to new requirements under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, or the Dodd-Frank Act, that will require us to diligence, disclose and report whether or not our products contain conflict minerals. The implementation of these new requirements could adversely affect the sourcing, availability and pricing of the materials used in the manufacture of components used in our products. In addition, we will incur additional costs to comply with the disclosure requirements, including costs related to conducting diligence procedures to determine the sources of conflict minerals that may be used or necessary to the production of our products and, if applicable, potential changes to products, processes or sources of supply as a consequence of such verification

Table of Contents

activities. It is also possible that we may face reputational harm if we determine that certain of our products contain minerals not determined to be conflict free or if we are unable to alter our products, processes or sources of supply to avoid such materials.

As an emerging growth company under the JOBS Act, we are permitted to, and intend to, rely on exemptions from certain disclosure requirements.

As an emerging growth company under the JOBS Act, we are permitted to, and intend to, rely on exemptions from certain disclosure requirements. In particular, we have not included all of the executive compensation related information that would be required in this prospectus if we were not an emerging growth company. In addition, for so long as we are an emerging growth company, which can last, at most, until the first fiscal year following the fifth anniversary of this offering, we will not be required to:

have an auditor report on our internal control over financial reporting pursuant to Section 404(b) of the Sarbanes-Oxley Act;

comply with any requirement that may be adopted by the Public Company Accounting Oversight Board regarding mandatory audit firm rotation or a supplement to the auditor's report providing additional information about the audit and the financial statements (auditor discussion and analysis); and

submit certain executive compensation matters to shareholder advisory votes, such as say on pay and say on frequency. Although we intend to rely on certain exemptions provided in the JOBS Act, the exact implications of the JOBS Act for us are still subject to interpretations and guidance by the SEC and other regulatory agencies. Also, as our business grows, we may no longer satisfy the condition of an emerging growth company. We will remain an emerging growth company until the first fiscal year following the fifth anniversary of this offering, although if the market value of our Class A and Class B common stock that is held by non-affiliates exceeds \$700.0 million as of June 30th of any year before the end of that five-year period, we would cease to be an emerging growth company as of the following December 31st. If we have more than \$1.0 billion in annual revenue in a fiscal year, we would cease to be an emerging growth company as of the end of that fiscal year, and if we issue more than \$1.0 billion in non-convertible debt over a three-year period, we would also cease to be an emerging growth company immediately. We are currently evaluating and monitoring developments with respect to these new rules and we cannot assure you that we will be able to enjoy part or all of the benefits from the JOBS Act. We have irrevocably elected not to avail ourselves of the JOBS Act accommodation allowing for delayed adoption of new or revised accounting standards, and, therefore, we will be subject to the same new or revised accounting standards as other public companies that are not emerging growth companies.

We may not be able to secure additional financing on favorable terms, or at all, to meet our future capital needs.

In the future, we may require additional capital to respond to business opportunities, challenges, acquisitions or unforeseen circumstances and may determine to engage in equity or debt financings or enter into credit facilities for other reasons. We may not be able to timely secure additional debt or equity financing on favorable terms, or at all. If we raise additional funds through the issuance of equity or convertible debt or other equity-linked securities, our existing stockholders could suffer significant dilution. Any debt financing obtained by us in the future

Table of Contents

could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. If we are unable to obtain adequate financing or financing on terms satisfactory to us, when we require it, our ability to continue to grow or support our business and to respond to business challenges could be significantly limited.

Catastrophic events or political instability could disrupt and cause harm to our business.

Our headquarters is located in the San Francisco Bay Area of California, an area susceptible to earthquakes. A major earthquake or other natural disaster, fire, act of terrorism or other catastrophic event in California or elsewhere that results in the destruction or disruption of any of our critical business operations or information technology systems could severely affect our ability to conduct normal business operations and, as a result, our future operating results could be harmed.

Our key manufacturing, supply and distribution partners have global operations including in China, Singapore and the Netherlands as well as the United States. Political instability or catastrophic events in any of those countries could adversely affect our business in the future, our financial condition and operating results.

Risks related to this offering

There has been no prior market for our Class A common stock, our stock price may be volatile or may decline regardless of our operating performance, an active public trading market may not develop or be sustained following this offering, and you may not be able to resell your shares at or above the initial public offering price.

There has been no public market for our Class A common stock prior to this offering. The initial public offering price for our Class A common stock will be determined through negotiations between the underwriters and us and may vary from the market price of our Class A common stock following this offering. If you purchase shares of our Class A common stock in this offering, you may not be able to resell those shares at or above the initial public offering price. An active market for our Class A common stock may not develop upon the closing of this offering or, if it does develop, it may not be sustainable. The trading prices of the securities of newly public companies have historically been highly volatile. The market price of our Class A common stock may fluctuate significantly in response to numerous factors, many of which are beyond our control, including:

actual or anticipated fluctuations in our revenue and other operating results;

the financial projections we may provide to the public, any changes in these projections or our failure to meet these projections;

failure of securities analysts to initiate or maintain coverage of us, changes in financial estimates by any securities analysts who follow our company, or our failure to meet these estimates or the expectations of investors;

announcements by us or our competitors of significant technical innovations, acquisitions, strategic partnerships, joint ventures or capital commitments;

changes in operating performance and stock market valuations of online marketing or other technology companies, or those in our industry in particular;

lawsuits threatened or filed against us; and

Table of Contents

other events or factors, including those resulting from war, incidents of terrorism or responses to these events. In addition, the stock markets have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. Stock prices of many companies have fluctuated in a manner unrelated or disproportionate to the operating performance of those companies. In the past, stockholders have instituted securities class action litigation following periods of market volatility. If we were to become involved in securities litigation, it could subject us to substantial costs, divert resources and the attention of management from our business and adversely affect our business.

Sales of substantial amounts of our Class A common stock in the public markets, or the perception that they might occur, could reduce the price that our Class A common stock might otherwise attain and may dilute your voting power and your ownership interest in us.

After the completion of the offering, we will have _____ outstanding shares of our Class A and Class B common stock (_____ shares of Class A and Class B common stock if the underwriters exercise in full their option to purchase additional shares). This number includes all the shares of our Class A common stock that we are selling in this offering, which may be resold immediately in the public market.

Subject to certain exceptions, we, all of our directors and officers and substantially all of our stockholders and option holders have agreed not to offer, sell or agree to sell, directly or indirectly, any shares of Class A or Class B common stock without the permission of the underwriters for a period of 180 days from the date of this prospectus, subject to extension in some circumstances. See **Shares eligible for future sale** **Lock-up agreements** for additional information. After the lock-up agreements pertaining to this offering expire, we and our locked-up security holders will be able to sell our shares in the public market, subject to volume limitations under Rule 144 under the Securities Act and various vesting agreements. Sales of a substantial number of such shares upon expiration, or early release, of the lock-up (or the perception that such sales may occur) could cause our share price to fall.

The market price of the shares of our Class A common stock could decline as a result of sales of a substantial number of our shares in the public market or the perception in the market that the holders of a large number of shares intend to sell their shares.

The dual class structure of our common stock will have the effect of concentrating voting control with our Chief Executive Officer and other directors and their affiliates; this will limit or preclude your ability to influence corporate matters.

Our Class B common stock has 10 votes per share, and our Class A common stock, which is the stock we are offering in this offering, has one vote per share. Stockholders who hold shares of Class B common stock will hold approximately _____ % of the voting power of our outstanding capital stock following this offering. Our executive officers and directors and their affiliates will hold approximately _____ % of the outstanding voting power, with Mr. Woodman, our Chief Executive Officer, holding approximately _____ %, and, therefore, assuming no material sales of such shares, they will be able to control all matters submitted to our stockholders, including the election of directors, amendments of our organizational documents and any merger, consolidation, sale of all or substantially all of our assets or other major corporate transaction. This concentrated control will limit or preclude your ability to influence corporate matters for the foreseeable future. In addition,

Table of Contents

this may prevent or discourage unsolicited acquisition proposals or offers for our capital stock that you may feel are in your best interest as one of our stockholders.

We have broad discretion in the use of the net proceeds from this offering and may not use them effectively.

Our management will have broad discretion in the application of the net proceeds that we receive from this offering, including applications for working capital, possible acquisitions and other general corporate purposes, and the repayment of our term loan under our syndicated secured credit facility, which had an outstanding balance of \$111.0 million as of March 31, 2014, and we may spend or invest these proceeds in a way with which our stockholders disagree. The failure by our management to apply these funds effectively could harm our business and financial condition. Pending their use, we may invest the net proceeds from this offering in a manner that does not produce income or that loses value. These investments may not yield a favorable return to our investors.

If securities analysts do not publish research or publish inaccurate or unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our Class A common stock will depend in part on the research and reports that securities or industry analysts publish about us or our business. We currently do not have and may never obtain research coverage by securities analysts. If no securities analysts commence coverage of our company, the trading price for our stock would be negatively impacted. In the event we obtain securities analyst coverage, if one or more of the analysts who cover us downgrade our stock or publish inaccurate or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, demand for our stock could decrease, which might cause our stock price and trading volume to decline.

We do not intend to pay dividends for the foreseeable future.

We currently intend to retain any future earnings to finance the operation and expansion of our business, and we do not expect to declare or pay any dividends in the foreseeable future. As a result, you may only receive a return on your investment in our Class A common stock if the market price of our Class A common stock increases. Our credit agreement contains a prohibition on the payment of cash dividends on our capital stock.

If you purchase shares of our Class A common stock in this offering, you will experience substantial and immediate dilution.

If you purchase shares of our Class A common stock in this offering, you will experience substantial and immediate dilution in the net tangible book value per share after giving effect to this offering of \$ _____ as of _____, 2014, based on an assumed initial public offering price of \$ _____ per share, which is the midpoint of the range set forth on the cover page of this prospectus, because the price that you pay will be substantially greater than the net tangible book value per share of the Class A common stock that you acquire. This dilution is due in large part to the fact that our earlier stockholders paid substantially less than the initial public offering price when they purchased their shares of our capital stock. You will experience additional dilution upon exercise of options to purchase Class A or Class B common stock under our equity incentive plans or under equity awards granted outside our equity incentive plan, if we issue Class A or Class B common stock to our employees under our equity incentive plans or if we otherwise issue additional shares of our capital stock. See **Dilution** for further information.

Table of Contents

Delaware law and provisions in our restated certificate of incorporation and amended and restated bylaws that will be in effect at the closing of this offering could make a merger, tender offer or proxy contest difficult, thereby depressing the trading price of our Class A common stock.

Following the closing of this offering, our status as a Delaware corporation and the anti-takeover provisions of the Delaware General Corporation Law may discourage, delay or prevent a change in control by prohibiting us from engaging in a business combination with an interested stockholder for a period of three years after the person becomes an interested stockholder, even if a change of control would be beneficial to our existing stockholders. In addition, our restated certificate of incorporation and amended and restated bylaws that will be in effect at the closing of this offering will contain provisions that may make the acquisition of our company more difficult without the approval of our board of directors, or otherwise adversely affect the rights of the holders of our Class A and Class B common stock, including the following:

initially our board of directors will not be classified, but at such time as all shares of our Class B common stock have been converted into shares of our Class A common stock, our board of directors will be classified into three classes of directors with staggered three-year terms;

so long as any shares of our Class B common stock are outstanding, special meetings of our stockholders may be called by the holders of 10% of the outstanding voting power of all then outstanding shares of stock, a majority of our board of directors, the chairman of our board of directors, our chief executive officer or our president, and thereafter only the chairman of our board of directors, our chief executive officer, our president or a majority of our board of directors will be authorized to call a special meeting of stockholders;

our stockholders will only be able to take action at a meeting of stockholders and not by written consent;

vacancies on our board of directors will be able to be filled only by our board of directors and not by stockholders;

directors may be removed from office with or without cause so long as our board of directors is not classified, and thereafter directors may be removed from office only for cause;

our restated certificate of incorporation provides for a dual class common stock structure in which holders of our Class B common stock will have the ability to control the outcome of matters requiring stockholder approval, even if they own significantly less than a majority of the outstanding shares of our Class A and Class B common stock, including the election of directors and significant corporate transactions, such as a merger or other sale of our company or its assets;

our restated certificate of incorporation will authorize undesignated preferred stock, the terms of which may be established, and shares of which may be issued, by our board of directors without stockholder approval and which may contain voting, liquidation, dividend and other rights superior to those of our Class A and Class B common stock; and

advance notice procedures will apply for stockholders to nominate candidates for election as directors or to bring matters before an annual meeting of stockholders.

For information regarding these and other provisions, see Description of capital stock.

Table of Contents

Special note regarding forward-looking statements and industry data

This prospectus contains forward looking statements that are based on our beliefs and assumptions regarding future events and circumstances, including statements regarding our strategies, our opportunities, developments in the markets in which we are active, our relationships with our customers, contract manufacturers, component suppliers and distributors and other matters. These statements are principally contained in the sections titled Prospectus summary, Risk factors, Use of proceeds, Management's discussion and analysis of financial condition and results of operations, Business, and Shares eligible for future sale. Forward looking statements include statements that are not historical facts and can be identified by words such as project, believe, anticipate, plan, expect, estimate, intend, continue, should, would, could, po other similar words and phrases.

Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated by these forward-looking statements. These risks, uncertainties and factors include those we discuss in this prospectus in the section titled Risk factors. You should read these risk factors and the other cautionary statements made in this prospectus as being applicable to all related forward-looking statements wherever they appear in this prospectus. It is not possible for us to predict all risks that could affect us, nor can we assess the impact of all factors on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those contained in any forward-looking statements we may make. Moreover, new risks emerge from time to time.

The forward-looking statements made in this prospectus relate only to events as of the date on which the statements are made. We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

You should read this prospectus and the documents we reference in this prospectus, and have filed with the SEC as exhibits to the registration statement of which this prospectus is a part, with the understanding that our actual future results, levels of activity, performance and events and circumstances may be materially different from what we expect.

In this prospectus, we refer to metrics related to our presence on third-party social media services, such as the number of likes on our Facebook page and the number of users who have shared videos on YouTube with GoPro in the title. These social media services generally have policies in place to discourage duplicative user accounts or artificial activity designed to inflate such metrics. We are unable to independently verify the metrics provided by these social media services. We are also unable to determine whether these figures include individuals with multiple accounts on one service, deactivated or inactive accounts, or multiple views, likes or similar actions by the same user. We have relied on the calculations and analysis conducted by these services to present metrics that, as closely as possible, reflect genuine users and legitimate user activity on their social media services.

This prospectus also contains estimates and other statistical data that we obtained from industry publications, surveys, forecasts and reports. These industry publications generally indicate that they have obtained their information from sources believed to be reliable, but do not guarantee the accuracy and completeness of their information. This information involves a number of

Table of Contents

assumptions and limitations, and you are cautioned not to give undue weight to these estimates. Although we have not independently verified the accuracy or completeness of the data contained in these industry publications and reports, based on our industry experience we believe that the publications are reliable and the conclusions contained in the publications and reports are reasonable.

Table of Contents

Use of proceeds

We estimate that we will receive net proceeds from the sale of the _____ shares of Class A common stock that we are selling in this offering of approximately \$ _____ million, based on an assumed initial public offering price of \$ _____ per share, the midpoint of the price range set forth on the cover page of this prospectus, after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. If the underwriters exercise their option to purchase additional shares in full, we estimate that our net proceeds will be approximately \$ _____ million, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us. We will not receive any proceeds from the sale of shares of our Class A common stock by the selling stockholders.

Each \$1.00 increase or decrease in the assumed initial public offering price would increase or decrease, as applicable, the net proceeds to us by \$ _____ million, assuming the number of shares Class A common stock offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting estimated underwriting discounts and commissions.

The principal purposes of this offering are for general corporate purposes, including working capital, and to repay our term loan under our credit facility, to create a public market for our Class A common stock and to facilitate our future access to the public equity markets. At March 31, 2014, the outstanding balance of the term loan was \$111.0 million and bore interest at the rate of 2.75% per annum. The term loan has scheduled quarterly principal repayments with the remaining balance due on December 21, 2015. See Management's discussion and analysis of financial condition and results of operations Liquidity and capital resources Credit facility for additional information regarding our term loan.

We may also use a portion of the net proceeds to acquire or invest in complementary businesses, technologies or assets. However, we have no present commitments or agreements to enter into any acquisitions or make any investments.

Our management will have significant flexibility in applying the net proceeds from this offering, and investors will be relying on the judgment of our management regarding the application of these net proceeds. Pending the uses described above, we intend to invest the net proceeds from this offering in short-term, interest-bearing obligations, investment-grade instruments, certificates of deposit or direct or guaranteed obligations of the U.S. government. The goal with respect to the investment of these net proceeds will be capital preservation and liquidity so that these funds are readily available to fund our operations.

Dividend policy

On December 19, 2012, we declared a cash dividend pursuant to which each holder of our common stock and redeemable convertible preferred stock as of December 21, 2012 received \$1.050965 for every share of our common stock then held by such stockholder (with each stockholder of redeemable convertible preferred stock being treated as holding the number of shares of common stock then issuable upon conversion of all shares of redeemable convertible preferred stock held by such stockholder). We do not currently intend to pay any cash dividends on our Class A common stock or Class B common stock for the foreseeable future. We expect to retain future earnings, if any, to fund the development and growth of our business. Any future determination to pay dividends on our Class A common stock or Class B common stock will be at the discretion of our board of directors and will depend upon, among other factors, our financial condition, operating results, current and anticipated cash needs, plans for expansion and other factors that our board of directors may deem relevant. In addition, our credit agreement restricts our ability to pay dividends.

Table of Contents

Capitalization

The following table sets forth our capitalization as of March 31, 2014:

on an actual basis;

on a pro forma basis to reflect the conversion of all outstanding shares of our redeemable convertible preferred stock into 30,523,036 shares of our Class B common stock in connection with the closing of this offering;

on a pro forma as adjusted basis to further reflect (i) the application of a portion of the proceeds of this offering to repay in full the outstanding balance of our term loan, which was \$111.0 million at March 31, 2014, (ii) the conversion by the selling stockholders of shares of our Class B common stock into the same number of shares of our Class A common stock in connection with the closing of this offering, (iii) the sale by us of shares of Class A common stock in this offering at an assumed initial public offering price of \$ per share, the midpoint of the price range set forth on the cover page of this prospectus, after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us and (iv) the filing and effectiveness of our restated certificate of incorporation in connection with the closing of this offering.

The unaudited pro forma and pro forma as adjusted information below is illustrative only, and total stockholders' equity and total capitalization following the completion of this offering will be adjusted based on the actual offering price and other terms of our offering determined at pricing. You should read this table together with the section titled "Management's discussion and analysis of financial condition and results of operations" and our financial statements, related notes and other financial information appearing elsewhere in this prospectus.

Class B common stock, \$0.0001 par value, 150,000,000 shares authorized, no shares issued and outstanding, actual; no shares issued and outstanding, pro forma, shares issued and outstanding, pro forma as adjusted			
Additional paid-in capital	19,218	96,428	
Accumulated deficit	(8,835)	(8,835)	
Total stockholders' equity (deficit)	10,391	87,604	
Total capitalization	\$ 198,270	\$ 198,270	\$

- (1) Each \$1.00 increase or decrease in the assumed initial public offering price of \$ _____ per share, the midpoint of the price range set forth on the cover page of this prospectus, would increase or decrease, respectively, our cash, working capital, total assets and total stockholders' equity by \$ _____ million, assuming the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting estimated underwriting discounts and commissions. If the underwriters exercise in full their option to purchase additional shares, the amount of pro forma as adjusted additional paid-in capital, total stockholders' equity and total capitalization would increase by approximately \$ _____ million and we would have _____ shares of Class A common stock issued and outstanding.

The number of shares of our Class A and Class B common stock to be outstanding after this offering is based on 112,422,478 shares of common stock outstanding as of March 31, 2014 and excludes:

27,798,919 shares of Class B common stock issuable upon the exercise of stock options outstanding as of March 31, 2014 with a weighted average exercise price of \$3.24 per share and 570,000 shares of Class B common stock issuable pursuant to outstanding RSUs under our 2010 Plan;

The effect of the contribution back to us of a number of shares of Class B common stock equal to the number of shares we issue upon exercise of an outstanding option for the purchase of 6,584,427 shares of Class B common stock; see Certain relationships and related person transactions - Equity grants and contribution agreement;

Table of Contents

shares of Class B common stock issuable upon the exercise of options with an exercise price of \$ per share and
shares of Class B common stock issuable upon settlement of RSUs granted after March 31, 2014;

398,121 shares of Class B common stock subject to a right of repurchase by us outstanding as of March 31, 2014;

shares of Class B common stock subject to a right of repurchase by us issued after March 31, 2014;

shares to be reserved for future issuance under our 2014 Plan, which will become effective on the date immediately prior to the date of this prospectus. Upon completion of this offering, any remaining shares available for issuance under our 2010 Plan will be added to the shares reserved under of 2014 Plan and we will cease granting awards under our 2010 Plan; and

shares to be reserved for future issuance under our ESPP, which will become effective on the date of this prospectus. Our 2014 Plan and ESPP also provide for automatic annual increases in the number of shares reserved under the plans each year, as more fully described in Executive compensation Employee benefit plans.

Table of Contents**Dilution**

If you invest in our Class A common stock in this offering, your interest will be diluted to the extent of the difference between the initial public offering price per share of our Class A common stock and the net tangible book value of our Class A and Class B common stock per share immediately after this offering. As of March 31, 2014, our pro forma net tangible book value was \$67.5 million, or \$0.60 per share. Pro forma net tangible book value per share represents the amount of our total tangible assets less our total liabilities, divided by the number of our outstanding shares of Class A and Class B common stock, after giving effect to the conversion of all outstanding shares of our redeemable convertible preferred stock into shares of our Class B common stock in connection with the closing of this offering.

After giving further effect to (i) the application of a portion of the proceeds of this offering to repay in full the outstanding balance of our term loan, which was \$111.0 million as of March 31, 2014, (ii) the conversion by the selling stockholders of _____ shares of our Class B common stock into the same number of shares of our Class A common stock immediately prior to the completion of this offering, (iii) the sale by us of _____ shares of Class A common stock in this offering at an assumed initial public offering price of \$ _____ per share, the midpoint of the price range set forth on the cover page of this prospectus, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us and (iv) the filing and effectiveness of our restated certificate of incorporation in connection with the closing of this offering, our pro forma as adjusted net tangible book value as of March 31, 2014 would have been \$ _____ million or \$ _____ per share. This represents an immediate increase in pro forma net tangible book value of \$ _____ per share to existing stockholders and an immediate dilution of \$ _____ per share to new investors purchasing shares of Class A common stock at the initial public offering price. The following table illustrates this per share dilution:

Assumed initial public offering price per share of our Class A common stock	\$
Pro forma net tangible book value per share as of March 31, 2014	\$
Increase in pro forma net tangible book value per share attributable to new investors	

Pro forma as adjusted net tangible book value per share after this offering

Dilution per share to new investors	\$
-------------------------------------	----

A \$1.00 increase or decrease in the assumed initial public offering price of \$ _____ per share, the midpoint of the price range set forth on the cover page of this prospectus, would increase or decrease our pro forma as adjusted net tangible book value per share after this offering by \$ _____ per share and the dilution to new investors by \$ _____ per share, assuming the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. If the underwriters exercise in full their option to purchase _____ additional shares of Class A common stock from us, the pro forma as adjusted net tangible book value per share after giving effect to this offering would be \$ _____ per share, representing an immediate increase to existing stockholders of \$ _____, and immediate dilution to new investors in this offering of \$ _____ per share.

Table of Contents

The following table summarizes, as of March 31, 2014, on the pro forma as adjusted basis described above, the difference between our existing stockholders and the purchasers of shares of Class A common stock in this offering with respect to the number of shares of Class A common stock purchased from us, the total consideration paid to us and the average price paid per share paid to us, based on an assumed initial public offering price of \$ per share, the midpoint of the price range set forth on the cover page of this prospectus, before deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us:

	Shares purchased		Total consideration		Average price
	Number	Percent	Amount	Percent	per share
Existing stockholders		%	\$	%	\$
New investors					
Total		100.0%	\$	100.0%	\$

A \$1.00 increase or decrease in the assumed initial public offering price of \$ per share would increase or decrease, total consideration paid by new investors by \$ million and increase or decrease the percent of total consideration paid to us by new investors by %, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same.

The sale of shares of Class A common stock to be sold by the selling stockholders in this offering will reduce the number of shares held by existing stockholders to shares, or % of the total shares outstanding, and will increase the number of shares held by investors participating in this offering to shares, or % of the total shares outstanding.

If the underwriters exercise in full their option to purchase additional shares of Class A common stock from us, the following will occur:

the percentage of shares of Class A and Class B common stock held by existing stockholders after the completion of this offering, and after giving effect to the sale by the selling stockholders of shares of Class A common stock in this offering, will be approximately % of the total number of shares of our Class A and Class B common stock outstanding after this offering;

the number of shares of Class A common stock held by new investors after the closing of this offering will be , or approximately % of the total number of shares of our Class A and Class B common stock outstanding after this offering.

The number of shares of our Class A and Class B common stock to be outstanding after this offering are based on 112,422,478 shares of common stock outstanding as of March 31, 2014 and excludes:

27,798,919 shares of Class B common stock issuable upon the exercise of stock options outstanding as of March 31, 2014 with a weighted average exercise price of \$3.24 per share and 570,000 shares of Class B common stock issuable pursuant to outstanding RSUs, under our 2010 Plan;

the effect of the contribution back to us of a number of shares of Class B common stock equal to the number of shares we issue upon exercise of an outstanding option for the purchase of 6,584,427 shares of Class B common stock; see Certain relationships and related person transactions Equity grants and contribution agreement;

Table of Contents

shares of Class B common stock issuable upon the exercise of options with an exercise price of \$ per share and shares of Class B common stock issuable upon settlement of RSUs granted after March 31, 2014;

398,121 shares of Class B common stock subject to a right of repurchase by us outstanding as of March 31, 2014;

shares of Class B common stock subject to a right of repurchase by us issued after March 31, 2014;

shares of Class A common stock to be reserved for future issuance under our 2014 Plan, which will become effective on the date immediately prior to the date of this prospectus. Upon completion of this offering, any remaining shares available for issuance under our 2010 Plan will be added to the shares reserved under of 2014 Plan and we will cease granting awards under our 2010 Plan; and

shares of Class A common stock to be reserved for future issuance under our ESPP, which will become effective on the date of this prospectus. Our 2014 Plan and ESPP also provide for automatic annual increases in the number of shares reserved under the plans each year, as more fully described in Executive compensation Employee benefit plans.

The above discussion and tables assume no exercise of our stock options or settlement of RSUs outstanding as of March 31, 2014. If all of these options were exercised and RSUs settled, then investors would experience further dilution.

Selected consolidated financial data

You should read the selected consolidated financial data below in conjunction with Management's discussion and analysis of financial condition and results of operations and the consolidated financial statements, related notes and other financial information included elsewhere in this prospectus. The selected consolidated financial data in this section are not intended to replace the consolidated financial statements and are qualified in their entirety by the consolidated financial statements and related notes included elsewhere in this prospectus.

The following table presents selected consolidated financial data. We derived the consolidated statements of operations data for 2011, 2012 and 2013 and the balance sheet data as of December 31, 2012 and 2013 from our audited consolidated financial statements included elsewhere in this prospectus. We derived the consolidated statements of operations data for 2010 from our audited consolidated financial statements that are not included in this prospectus, and have reclassified certain operating expenses for 2010 and have now included \$0.7 million (unaudited) in sales and marketing expenses that was previously classified in general and administrative expenses, to conform with current presentation. The consolidated statements of operations data for the three months ended March 31, 2013 and 2014 and the consolidated balance sheet data as of March 31, 2014 have been derived from our unaudited consolidated financial statements included elsewhere in this prospectus. We have prepared the unaudited consolidated financial statements on the same basis as the audited consolidated financial statements and have included, in our opinion, all adjustments, consisting only of normal recurring adjustments that we consider necessary to state fairly the financial information set forth in those financial statements. Our historical results are not necessarily indicative of the results to be expected in the future, and our interim results should not necessarily be considered indicative of results we expect for the full year.

Management's discussion and analysis of financial condition and results of operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements, related notes and other financial information appearing elsewhere in this prospectus. In addition to historical consolidated financial information, the following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements as a result of a variety of factors, including but not limited to, those discussed in "Risk factors" and elsewhere in this prospectus.

Overview

GoPro is transforming the way consumers capture, manage, share and enjoy meaningful life experiences. We do this by enabling people to capture compelling, immersive photo and video content of themselves participating in their favorite activities.

We were founded in 2004 to address the limitations of traditional cameras. In 2004, we shipped our first product, a wrist-mounted, waterproof, film-based capture device, and in 2006 we shipped our first digital capture device, the Digital HERO. We introduced our first HD capture device in 2009, the HD HERO, and we introduced our current HERO3+ family of capture devices in late 2013. We also sell mountable and wearable accessories that enable professional quality capture at affordable prices.

We have continued to enhance our product offering by providing software solutions that address the pain points of managing, editing and sharing content. GoPro Studio enables our customers to easily edit and share simple or complex videos. The GoPro App enables customers to easily and wirelessly manage and share content from our HERO capture devices.

Since we launched our first HD camera in 2009, we have experienced rapid growth. In 2011, 2012, 2013 and the three months ended March 31, 2014, we generated revenue of \$234.2 million, \$526.0 million, \$985.7 million and \$235.7 million and reported net income of \$24.6 million, \$32.3 million, \$60.6 million and \$11.0 million, respectively. Substantially all of our revenue has been generated from the sale of cameras and accessories.

Our sales strategy initially targeted independent specialty retailers focused on action sports markets, which we believe helped to establish the authenticity of our brand. We now sell our products both directly and through distribution. Our direct channel includes big box, mid-market and independent specialty retailers, as well as our website. We use our distribution channel to sell internationally and into certain specialty markets. As of March 31, 2014, our products were sold to customers in more than 100 countries and through more than 25,000 retail outlets. Sales outside of the United States represented 35%, 47%, 49% and 53% of our revenue for 2011, 2012, 2013 and the three months ended March 31, 2014, respectively.

We believe consumer demand for compelling content, combined with our self-capture technology and the popularity of social media, create a significant media opportunity for GoPro. GoPro programming, a combination of GoPro originally produced content and best of UGC, has developed a growing audience. To scale this, we have built a team of production professionals who regularly produce content based on inspiring stories from around the world, captured exclusively with our capture devices. In addition, we actively curate and redistribute,

Table of Contents

with permission, UGC as GoPro-branded content through the GoPro Network, which includes the GoPro Channels on Facebook, Instagram, Twitter, Virgin America, Xbox Live and YouTube.

We face potential challenges that could limit our ability to take advantage of these opportunities, including the risk that we may not be able to continue to develop and introduce new products and attract new customers. We do not expect to sustain or increase our revenue growth rates. In addition, we rely on a small number of retailer and distributor customers for a significant portion of our revenue. For 2011, 2012, 2013 and the three months ended March 31, 2014, one retailer accounted for 15%, 15%, 17% and 13% of our revenue, respectively.

We rely on contract manufacturers for the production of our cameras and accessories. All of the components that go into the manufacture of our cameras and accessories are sourced from third-party suppliers, and some of these suppliers are the sole source for important components. We utilize third-party logistics providers for product fulfillment.

Key business metrics

In addition to the measures presented in our consolidated financial statements, we use the following key metrics to evaluate our business, measure our performance, develop financial forecasts and make strategic decisions.

(in thousands)	Year ended December 31,			Three months ended	
	2011	2012	2013	2013	March 31, 2014
Key business metrics:					
Units shipped	1,145	2,316	3,849	954	852
Adjusted EBITDA	\$ 52,873	\$ 75,288	\$ 133,726	\$ 40,923	\$ 28,627

Units shipped. Units shipped represents the number of individual packaged camera units that are shipped during a reporting period, net of any returns. Packaged camera units include a waterproof housing, a battery, selected mounts and other accessories which vary by model. We monitor units shipped on a daily basis as it is a key indicator of revenue trends for a reporting period. We use units shipped to help optimize our fulfillment operations and shipment allocations in order to better maintain operating efficiencies and improve customer satisfaction.

Adjusted EBITDA. Adjusted EBITDA is a non-GAAP financial measure that we calculate as net income (loss), adjusted after excluding the impact of: provision (benefit) for income taxes, interest income, interest expense, depreciation and amortization, POP display amortization and stock-based compensation. We use adjusted EBITDA as a key measure to understand and evaluate our core operating performance and trends, to prepare and approve our annual budget and to develop short- and long-term operational plans. In particular, the exclusion of certain expenses in calculating adjusted EBITDA can provide a useful measure for period-to-period comparisons of our business. Accordingly, we believe that adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors. See Prospectus summary Summary consolidated financial data Adjusted EBITDA for additional information and a reconciliation of net income to adjusted EBITDA.

Table of Contents

Factors affecting performance

We believe that our future success will be dependent on many factors, including those further discussed below. While these areas represent opportunities for us, they also represent challenges and risks that we must successfully address in order to continue the growth of our business and improve our results of operations.

Investing in research and development. We believe that our performance is significantly dependent on the investments we make in research and development and that we must continually develop and introduce innovative new products, enhance existing products and effectively stimulate customer demand for existing and future products. If we fail to innovate and enhance our product offerings, our brand, market position and revenue may be adversely affected. Further if our research and development efforts are not successful, we will not recover the investments that we make in this aspect of our business.

Investing in sales and marketing. We intend to continue to invest significant resources in our marketing, advertising and brand management efforts. Sales and marketing investments will often occur in advance of any sales benefits from these activities, and it may be difficult for us to determine if we are efficiently allocating our resources in this area.

Leveraging media content. We expect to increase our investment in the development of the GoPro Network and its related content. We believe we have significant opportunities to establish new revenue streams from these investments. However, we do not have significant experience deriving revenue from the distribution of GoPro content, and we cannot be assured that these investments will result in increased revenue or profitability.

Expanding into new vertical markets and growing internationally. Our long-term growth will depend in part on our continued ability to expand our customer base and increase revenue from international markets. We intend to expand into new vertical markets and to increase our presence globally through the active promotion of our brand, the formation of strategic partnerships, the introduction of new products and the growth of our international sales channel.

Seasonality. Historically, we have experienced the highest levels of revenue in the fourth quarter of the year, coinciding with the holiday shopping season in the United States and Europe. Accordingly, we have historically introduced our newest generation of product offerings just prior to this peak season. Given the significant seasonality of our sales, timely and effective product introductions and forecasting for this season are critical to our operations.

Components of our results of operations and financial condition

Revenue

Our revenue is comprised of product revenue, net of returns and sales incentives:

Product revenue. Product revenue is derived from the sale of our HERO line of cameras and accessories directly to retailers and through GoPro.com, as well as through our network of domestic and international distributors.

Returns and sales incentives. Our standard terms and conditions of sale do not allow for product returns and we generally do not allow product returns other than under warranty. However, we have entered into contracts with certain large retailers and distributors with terms and conditions that allow for limited product returns rights. Upon shipment of our

Table of Contents

product to customers with such rights, we reduce revenue equal to the estimated future returns related to the current period product revenue. Additionally, we offer price protection discounts to certain customers when new capture devices are released. We record price protection discounts, as a reduction in revenue, based on shipments subject to price protection. Discounts recorded are based on an evaluation of inventory held by the customer at the time the price protection offer is extended. See Critical accounting policies for a more detailed discussion of our revenue recognition policy.

Cost of revenue

Our cost of revenue is comprised of the following:

manufacturing costs of our products payable to third-party contract manufacturers;

third-party logistics costs;

costs to procure components directly from our suppliers;

inbound and outbound freight costs and duties;

costs associated with the repair of products under warranty;

write-downs of inventory carrying value to adjust for excess and obsolete inventory and periodic physical inventory counts; and

certain allocated costs related to manufacturing management, facilities, information technology support and other expenses associated with internal logistics support, including stock-based compensation.

We outsource our manufacturing, warehouse operations and order fulfillment activities to third parties. Our product costs will vary directly with volume and based on the costs of underlying product components as well as the prices we are able to negotiate with our contract manufacturers. Shipping costs will fluctuate with volume as well as with the method of shipping chosen in order to meet customer demand. As a global company with suppliers centered in Asia and customers located worldwide, we have used, and may in the future use, air shipping to deliver our products directly to retail stores and distribution centers. Air shipping is more costly than sea or ground shipping or other delivery options. We primarily use air shipping to meet the demand of our products during peak shopping seasons and new product launches.

Gross profit and gross profit margin

Our gross profit and gross profit margin have been, and may in the future be, influenced by several factors including: product, channel and geographical revenue mix; changes in product costs related to the release of different camera models; component, contract manufacturing and supplier pricing; and foreign currency exchange. Although we primarily procure and sell our products in U.S. dollars, our suppliers incur many costs, including labor costs, in other currencies. To the extent that exchange rates move unfavorably for our suppliers, they may seek to pass these additional costs on to us, which could have a material impact on our future average selling prices and unit costs. Gross profit and gross profit margin may fluctuate over time based on the factors described above.

Table of Contents

Operating expenses

We classify our operating expenses into three categories: research and development, sales and marketing and general and administrative.

Research and development. Research and development expense consists primarily of personnel related costs, which include salaries and stock-based compensation, in addition to costs attributable to product design, test, patent, facilities and information technology. Over time, we expect our research and development expense to increase in absolute dollars as we continue to make significant investments in developing new products, applications, functionality and other offerings. Research and development expense may fluctuate as a percentage of revenue, notably in the fourth quarter of our fiscal year when we have historically experienced our highest levels of revenue.

Sales and marketing. Sales and marketing expense consists primarily of advertising and marketing promotions of our products, including POP display amortization, personnel related costs, which include salaries and stock-based compensation, commissions, trade show and event costs, sponsorship costs, professional services, facilities, information technology and travel. Over time, we expect our sales and marketing expense to increase in absolute dollars as we continue to actively promote our products. Sales and marketing expense may fluctuate as a percentage of revenue, notably in the fourth quarter of our fiscal year when we have historically experienced our highest levels of revenue.

General and administrative. General and administrative expense consists of personnel related costs, which include salaries and stock-based compensation, as well as the costs of professional services, facilities, information technology and other administrative expenses. We expect our general and administrative expense to increase in absolute dollars following the completion of this offering due to the anticipated growth of our business and related infrastructure as well as accounting, insurance, investor relations and other costs associated with becoming a public company. General and administrative expense may fluctuate as a percentage of revenue, notably in the fourth quarter of our fiscal year when we have historically experienced our highest levels of revenue.

Other income (expense), net

Other income (expense), net consists of interest expense associated with our debt financing arrangements and sales of accounts receivable, amortization of debt issuance costs, interest income earned on our cash balances, foreign currency exchange gains (losses) related to the remeasurement of certain assets and liabilities of our foreign subsidiaries that are denominated in currencies other than the functional currency of the subsidiary and foreign exchange transactions gains and losses. We do not utilize derivatives to hedge our foreign exchange risk as we believe the risk to be immaterial to our results of operations.

Income tax expense

We are subject to income taxes in the United States and foreign jurisdictions in which we do business. These foreign jurisdictions have statutory tax rates different from those in the United States. Additionally, certain of our international earnings are also taxable in the United States. Accordingly, our effective tax rates will vary depending on the relative proportion of foreign to U.S. income, the absorption of foreign tax credits, changes in the valuation of our deferred tax assets and liabilities and changes in tax laws. We regularly assess the likelihood of

Table of Contents

adverse outcomes resulting from the examination of our tax returns by the U.S. Internal Revenue Service, or IRS, and other tax authorities to determine the adequacy of our income tax reserves and expense. Should actual events or results differ from our current expectations, charges or credits to our income tax expense may become necessary. Any such adjustments could have a significant impact on our results of operations.

Statements of operations

The following table sets forth the components of our consolidated statements of operations for each of the periods presented:

(in thousands)	Year ended December 31,			Three months ended	
	2011	2012	2013	2013	March 31, 2014
Revenue	\$ 234,238	\$ 526,016	\$ 985,737	\$ 255,057	\$ 235,716

Comparison of the three months ended March 31, 2013 and 2014**Revenue**

(dollars in thousands)	Three months ended		Change
	2013	March 31, 2014	
Revenue	\$ 255,057	\$ 235,716	\$(19,341) (8)%

Revenue for the three months ended March 31, 2014 decreased 8% to \$235.7 million from \$255.1 million for the three months ended March 31, 2013. Units shipped in the three months ended March 31, 2014 decreased 11% to 0.9 million from 1.0 million in 2013. Revenue and units shipped for the three months ended March 31, 2013 were impacted by production delays of our HERO3 Black edition capture device in the fourth quarter of 2012. These production delays correspondingly delayed shipments until the first quarter of 2013, which resulted in revenues in the first quarter of 2013 that did not reflect the traditional seasonality in our business. The three months ended March 31, 2014 were not similarly affected. Partially offsetting the decrease in revenue due to the decrease in units shipped in the three months ended March 31, 2014 was a 3% increase in the average selling price of units shipped. Our revenue decreased in each of our primary geographical regions of the Americas, Asia Pacific and EMEA (Europe, the Middle East and Africa) in the three months ended March 31, 2014 compared to the three months ended March 31, 2013.

Cost of revenue, gross profit and gross profit margin

(dollars in thousands)	Three months ended		\$	Change %
	2013	March, 2014		
Cost of revenue	\$ 165,628	\$ 139,202	\$ (26,426)	(16)%
Gross profit	\$ 89,429	\$ 96,514	\$ 7,085	8%
Gross profit margin	35%	41%		

Table of Contents

Gross profit margin increased to 41% in the three months ended March 31, 2014 from 35% in the three months ended March 31, 2013 primarily due to lower product costs for our HERO3+ capture devices introduced in the fourth quarter of 2013 compared to our previous generation HERO3 capture devices, coupled with a 3% increase in average selling prices of units shipped. HERO3+ product costs were approximately 10% less than those of the HERO3 in the three months ended March 31, 2013. This was partially offset by an increase in other costs of revenue, which contributed to a 1% reduction in margin primarily due to higher freight, duty and rework costs. We expect gross profit margin to fluctuate over time based on product mix, changes in product costs related to the release of different capture device models and changes in average selling price.

Operating expenses

(dollars in thousands)	Three months ended March 31,		\$	Change %
	2013	2014		
Research and development	\$ 12,012	\$ 28,739	\$ 16,727	139%
Sales and marketing	35,673	41,341	5,668	16%
General and administrative	6,988	9,878	2,890	41%
Total operating expenses	\$ 54,673	\$ 79,958	\$ 25,285	46%

Research and development expense increased \$16.7 million, or 139%, for the three months ended March 31, 2014 compared to the three months ended March 31, 2013, due primarily to a \$8.3 million increase in personnel related costs associated with an increase in headcount of 139 employees to support our broadened product portfolio, a \$5.1 million increase in consulting and outside professional service costs, a \$1.5 million increase in facility and information technology support costs to support our overall growth and a \$1.1 million increase in equipment costs.

Sales and marketing expense increased \$5.7 million, or 16%, for the three months ended March 31, 2014 compared to the three months ended March 31, 2013, due primarily to a \$3.8 million increase in personnel related costs associated with an increase in headcount of 99 employees and a \$1.6 million increase in advertising and promotional activity costs.

General and administrative expense increased \$2.9 million, or 41%, for the three months ended March 31, 2014 compared to the three months ended March 31, 2013, due primarily to a \$2.7 million increase in personnel related costs associated with an increase in headcount of 58 employees.

Other income (expense), net

(dollars in thousands)	Three months ended March 31,		\$	Change %
	2013	2014		
Interest expense	\$ (1,333)	\$ (1,348)	\$ (15)	1%
Interest income	1	12	11	1,100%
Other expense	(276)	(262)	14	(5)%
Realized foreign exchange loss, net	(86)	(27)	59	(69)%
Total other income (expense), net	\$ (1,694)	\$ (1,625)	\$ 69	(4)%

Interest expense for the three months ended March 31, 2014 remained relatively flat compared to the three months ended March 31, 2013.

Table of Contents*Income tax expense*

(dollars in thousands)	Three months ended		\$	Change %
	2013	March 31, 2014		
Income tax expense	\$ 10,027	\$ 3,882	\$(6,145)	(61)%
Effective tax rate	30.3%	26.0%		

Income tax expense for the three months ended March 31, 2014 was \$3.9 million compared to \$10.0 million for the three months ended March 31, 2013. Our effective tax rate for the three months ended March 31, 2014 was lower than for the three months ended March 31, 2013 and the federal statutory rate of 35%, primarily due to the expansion of our operations into international jurisdictions that have lower overall statutory tax rates.

*Comparison of the years ended December 31, 2011, 2012 and 2013**Revenue*

(dollars in thousands)	Year ended December 31,			Change 2012 vs. 2011		Change 2013 vs. 2012	
	2011	2012	2013	\$	%	\$	%
Revenue	\$ 234,238	\$ 526,016	\$ 985,737	\$ 291,778	125%	\$ 459,721	87%

2013 compared to 2012

Revenue for 2013 increased 87% to \$985.7 million from \$526.0 million for 2012. Units shipped in 2013 increased 66% to 3.8 million from 2.3 million in 2012, primarily due to an increase in demand for our HERO3 products released in the fourth quarter of 2012 and our HERO3+ products released in the fourth quarter of 2013. Further contributing to the increase in revenue in 2013 was a 19% increase in the average selling price of units shipped. The increase in average selling price from 2012 to 2013 was primarily driven by a shift in product mix to the HERO3 and HERO3+ Black edition capture devices, which have higher price points compared to our HERO2 capture devices. Our 2013 revenue also increased compared to 2012 as a result of an increase in accessories we shipped outside of units shipped. Our revenue grew in each of our primary geographical regions of the Americas, Asia Pacific and EMEA in 2013.

2012 compared to 2011

Revenue for 2012 increased 125% to \$526.0 million from \$234.2 million for 2011. Units shipped in 2012 increased 102% to 2.3 million units from 1.1 million in 2011 primarily due to an increase in demand for our HERO2 capture devices released in the fourth quarter of 2011 and our HERO3 capture devices released in the fourth quarter of 2012. Revenue for 2012 also increased compared to 2011 due to an increase in accessories we shipped outside of units shipped. Further contributing to the increase in revenue in 2012 was a 14% increase in our average selling price of units shipped for 2012 compared to 2011 due to higher average selling price for our HERO3 Black edition capture devices. Our revenue grew in each of our primary geographic regions in 2012.

Table of Contents**Cost of revenue, gross profit and gross profit margin**

(dollars in thousands)	Year ended December 31,			Change 2012 vs. 2011		Change 2013 vs. 2012	
	2011	2012	2013	\$	%	\$	%
Cost of revenue	\$ 111,683	\$ 298,530	\$ 623,953	\$ 186,847	167%	\$ 325,423	109%
Gross profit	\$ 122,555	\$ 227,486	\$ 361,784	\$ 104,931	86%	\$ 134,298	59%
Gross profit margin	52%	43%	37%				

2013 compared to 2012

Gross profit margin decreased to 37% in 2013 from 43% in 2012 due primarily to higher product costs for our HERO3 capture devices introduced in the fourth quarter of 2012 compared to our previous generation HERO2 capture devices. HERO3 product costs were approximately 67% greater than those of the HERO2, while average selling prices of units shipped increased approximately 19%. This increase in product costs was due primarily to the inclusion of additional features and functionality in our HERO3 capture devices. Our HERO3+ capture devices, introduced in October 2013, included lower product costs and partially offset the HERO3 cost increase in the fourth quarter of 2013 as customers transitioned to our new product line. The average cost for the HERO3+ capture device decreased approximately 3% compared to the HERO3 capture device.

2012 compared to 2011

Gross profit margin decreased to 43% in 2012 from 52% in 2011, primarily due to higher product costs associated with additional features and functionality included in our HERO3 capture devices introduced in the fourth quarter of 2012. The average product costs of our HERO3 capture device, introduced in the fourth quarter of 2012, represented more than a 60% increase in the average cost of the HERO and HERO2 capture devices sold in 2011. This increase in product costs was partially offset by the 14% increase in the average selling price of units shipped for 2012 compared to 2011.

Operating expenses

(dollars in thousands)	Year ended December 31,			Change 2012 vs. 2011		Change 2013 vs. 2012	
	2011	2012	2013	\$	%	\$	%
Research and development	\$ 8,644	\$ 36,115	\$ 73,737	\$ 27,471	318%	\$ 37,622	104%
Sales and marketing	64,375	116,855	157,771	52,480	82%	40,916	35%
General and administrative	10,757	20,899	31,573	10,142	94%	10,674	51%
Total operating expenses	\$ 83,776	\$ 173,869	\$ 263,081	\$ 90,093	108%	\$ 89,212	51%

2013 compared to 2012

Research and development expense increased \$37.6 million, or 104%, for 2013 compared to 2012, due primarily to a \$20.3 million increase in personnel related costs associated with an increase in headcount of 127 employees, a \$9.7 million increase in facility and information technology support costs associated with an expansion of our corporate offices and a \$6.1 million increase in consulting and outside professional service costs.

Table of Contents

Sales and marketing expense increased \$40.9 million, or 35%, for 2013 compared to 2012, due primarily to a \$21.3 million increase in advertising and promotional activities, a \$6.8 million increase in personnel related costs associated with an increase in headcount of 95 employees, a \$5.0 million increase in facility and information technology support costs associated with an expansion of our corporate offices, a \$3.9 million increase in consulting and outside professional services costs and a \$1.0 million increase in sales commissions.

General and administrative expense increased \$10.7 million, or 51%, for 2013 compared to 2012, due primarily to a \$5.2 million increase in personnel related costs associated with an increase in headcount of 62 employees, a \$2.6 million increase in professional, consulting and temporary services to support our overall growth and a \$2.3 million increase in facility and information technology support costs associated with an expansion of our corporate offices.

2012 compared to 2011

Research and development expense increased \$27.5 million, or 318%, for 2012 compared to 2011, primarily due to a \$11.7 million increase in personnel related costs associated with an increase in headcount of 87 employees, an \$8.2 million increase in consulting and outside professional services, a \$5.4 million increase in facility and information technology support costs associated with an expansion of our corporate offices and a \$1.8 million increase in prototype material costs.

Sales and marketing expense increased \$52.5 million, or 82%, for 2012 compared to 2011, primarily due to a \$33.4 million increase in advertising and promotional activities to increase brand awareness, a \$13.6 million increase in personnel related costs associated with an increase in headcount of 61 employees and a \$6.9 million increase in consulting and outside professional service costs, largely in connection with marketing and customer support activities. We also increased our facility and information technology support costs associated with an expansion of our corporate offices by \$6.5 million. Selling expense, which principally consists of internal and external sales commissions, increased \$4.1 million from 2011. Partially offsetting these increases in 2012 was a \$13.0 million charge included in sales and marketing expense for 2011 related to an agreement between our Chief Executive Officer and an employee, to share proceeds from a sale of equity securities. See [Certain relationships and related person transactions](#) [Share of proceeds from sale of equity securities](#) for further description of this transaction.

General and administrative expense increased \$10.1 million, or 94%, for 2012 compared to 2011, due primarily to a \$3.1 million increase in personnel related costs associated with an increase in headcount of 29 employees, a \$3.1 million increase in facility and information technology support costs associated with an expansion of our corporate offices and a \$3.0 million increase in consulting and outside professional service costs to support our growth.

Other income (expense), net

(dollars in thousands)	Year ended December 31,			Change 2012 vs. 2011		Change 2013 vs. 2012	
	2011	2012	2013	\$	%	\$	%
Interest expense	\$ (32)	\$ (392)	\$ (6,020)	\$ (360)	1,125%	\$ (5,628)	1,436%

Realized foreign exchange loss, net		(61)	(322)	(61)	100%	(261)	428%
Other income (expense), net			(1,034)			(1,034)	100%
Total other income (expense), net	\$ 12	\$ (407)	\$ (7,374)	\$ (419)	(3,492)%	\$ (6,967)	1,712%

Table of Contents*2013 compared to 2012*

Interest expense for 2013 was \$6.0 million compared to \$0.4 million for 2012, primarily due to increased debt balances under our credit facility. Other expense in 2013 consisted primarily of banking and commission fees related to our standby letter of credit. See Liquidity and capital resources Credit facility.

2012 compared to 2011

Other income (expense), net, was (\$0.4 million) for 2012 compared to \$12,000 in 2011. The increase in net expense was primarily due to interest expense associated with our credit facility entered into in December 2012.

Income tax expense

(dollars in thousands)	Year ended December 31,			Change 2012 vs. 2011		Change 2013 vs. 2012	
	2011	2012	2013	\$	%	\$	%
Income tax expense	\$ 14,179	\$ 20,948	\$ 30,751	\$ 6,769	48%	\$ 9,803	47%
Effective tax rate	36.6%	39.4%	33.7%				

2013 compared to 2012

Income tax expense for 2013 was \$30.8 million compared to \$20.9 million for 2012. Our effective income tax rate was 33.7% for 2013 compared to 39.4% for 2012. Our effective tax rate for 2013 was lower than for 2012 and the federal statutory rate of 35% primarily due to the expansion of our operations into international jurisdictions that have lower overall statutory tax rates and the extension of our 2012 federal research credit in 2013 of \$0.7 million.

2012 compared to 2011

Our income tax expense was \$20.9 million for 2012 compared to \$14.2 million for 2011. Our effective income tax rate was 39.4% for 2012 compared to 36.6% for 2011. Our effective tax rate increased in 2012 compared to 2011 primarily due to tax benefits related to our S corporation status during the first two months of 2011.

Backlog

We do not believe that our backlog is meaningful as of any particular date or indicative of future sales, as our customers can change or cancel orders with limited or no penalty and limited advance notice prior to shipment.

Table of Contents**Unaudited quarterly results of operations**

The following table sets forth our unaudited quarterly consolidated results of operations for each of the nine quarterly periods ended March 31, 2014. These unaudited quarterly results of operations have been prepared on the same basis as our audited consolidated financial statements and, in our opinion, reflect all normal recurring adjustments necessary for the fair statement of the results of operations for these periods. You should read the following tables in conjunction with our consolidated financial statements and the related notes included elsewhere in this prospectus. The results of operations for any quarter are not necessarily indicative of the results of operations for a full year or any future periods.

(in thousands)	March 31,	June 30,	Sept. 30,	Dec. 31,	March 31,	June 30,	Sept. 30,	Three months ended	March 31,

Net income (loss)	9%	12%	(3)%	5%	9%	(3)%	(1)%	12%	5%

Quarterly trends

Our overall operating results fluctuate from quarter to quarter as a result of a variety of factors, including seasonal factors and economic cycles that influence consumer retail product purchase trends.

Generally, we have experienced the highest levels of revenue in the fourth quarter of the year, which coincides with the winter holiday shopping season in the United States and Europe and the period in which we have historically introduced the newest generation of our product offerings. Revenue in the first quarter of 2013 was greater than the fourth quarter of 2012 due to the delay in the introduction of our HERO3 Black edition capture device in the fourth quarter of 2012.

Gross profit margin decreased from the third quarter of 2012 through the second quarter of 2013 primarily due to higher product costs of our HERO3 capture devices compared to our HERO2 capture devices. Gross profit margin was higher in the fourth quarter of 2013 and the first quarter of 2014 primarily due to a decrease in the product costs of our HERO3+ capture devices compared to our HERO3 capture devices and, to a lesser extent, an increase in the average selling price of units shipped compared to prior periods.

Operating expense increased for the quarterly periods presented due primarily to increased personnel related expenses, advertising and promotional expenses and corporate infrastructure costs to support the growth of the company. For the three months ended December 31, 2012, sales and marketing expense reflected advertising and promotional activities to increase awareness of the GoPro brand and our product offerings associated with the launch of our HERO3 capture devices. For the three months ended March 31, 2014, research and development expense increased due primarily to an increase in personnel related costs associated with an increase in headcount and to an increase in consulting and outside professional service costs.

Our business is both positively and negatively affected by the behavior of consumers, economic conditions, competitive pressures and our operational decisions and related timelines, which

Table of Contents

includes the release of new products and accessories, as well as newer generations of our product offerings. Consequently, the results of any prior quarterly or annual periods should not be relied upon as indications of our future operating performance.

The following table sets forth the key business metrics for each of the periods presented:

(in thousands)	March 31, 2012	June 30, 2012	Sept. 30, 2012	Dec. 31, 2012	March 31, 2013	June 30, 2013	Sept. 30, 2013	Three months ended Dec. 31,	
								2013	March 31, 2014

Liquidity and capital resources

(in thousands)	December 31, 2012	December 31, 2013	March 31, 2014
Cash	\$ 36,485	\$ 101,410	\$ 111,215

As of March 31, 2014, our principal sources of liquidity were our cash balances totaling \$111.2 million and \$30.0 million available under our credit facility term loan and revolving credit facility, respectively. Our operations have been financed primarily through cash flow from operating activities, the private sale of equity securities, and short- and long-term borrowings. Since inception, we have raised \$20.0 million in equity capital and at March 31, 2014 had \$111.0 million of principal amount of indebtedness outstanding.

We believe our existing cash balances, cash flow from operations and liquidity available from our credit facility will be sufficient to meet our working capital and capital expenditure needs for at least the next 12 months and the foreseeable future. Our future capital requirements may vary materially from those currently planned and will depend on many factors, including our rate of revenue growth, the timing and extent of spending on research and development efforts and other business initiatives, the expansion of sales and marketing activities, the timing of new product introductions, market acceptance of our products and overall economic conditions. To the extent that current and anticipated future

sources of liquidity are insufficient to fund our future business activities and requirements, we may be required to seek additional equity or debt financing. In the event additional financing is required from outside sources, we may not be able to raise it on terms acceptable to us or at all.

Table of Contents***Credit facility***

On December 21, 2012, in order to effect a dividend to our stockholders, we entered into a \$170.0 million credit facility consisting of a \$120.0 million three-year term loan facility, or term loan, and a \$50.0 million four-year revolving credit facility, or our revolving credit facility. At the closing of our credit facility, the entire amount of the term loan and \$10.0 million of our revolving credit facility were drawn down, and \$20.0 million was committed to a standby letter of credit. We received net proceeds of \$127.6 million, net of \$2.4 million of debt issuance and lender costs. The debt issuance and lender costs allocated to the term loan are being amortized to interest expense over the contractual term of our term loan using the effective interest method. Costs allocated to our revolving credit facility are deferred and amortized using the straight-line method over the four-year contractual term of our revolving credit facility. Borrowings under our credit facility are collateralized by substantially all of our assets and are subject to customary representations, warranties and covenants. Proceeds from this offering will be utilized to fully pay off outstanding balances under our term loan.

Our \$120.0 million term loan has scheduled quarterly principal repayments, due on the last day of each quarter, of \$1.5 million per quarter in 2013, \$3.0 million per quarter in 2014 and \$6.0 million per quarter for the first three quarters of 2015, with the remaining balance due on December 21, 2015. Our excess cash flow, as defined in the credit facility, for 2013 triggered a contractual principal prepayment obligation of \$48.5 million, which amount has been classified as a current liability as of December 31, 2013 and March 31, 2014. In April 2014, we amended the credit facility agreement to extend the due date for this contractual principal prepayment from April 2014 to December 2014. Our \$50.0 million revolving credit facility matures on December 21, 2016, and we can repay and re-borrow principal amounts under and during the term of our revolving credit facility. Of the \$50.0 million available under our revolving credit facility, as of December 31, 2013 and March 31, 2014, \$20.0 million is committed to a standby letter of credit, and there was no balance outstanding. In April 2014, the \$20.0 million standby letter of credit was terminated.

Borrowings under the credit facility bear interest at a rate per annum equal to an applicable margin plus, at our option, either: (i) a base rate determined by reference to the highest of: (a) a rate of interest publicly announced by JPMorgan Chase Bank, N.A. as its prime rate; (b) 0.5% per annum above the federal funds effective rate; and (c) the LIBOR rate for an interest period of one month plus 1.00%; or (ii) a LIBOR rate determined by reference to the costs of funds for Eurodollar deposits for the interest period relevant to such borrowing adjusted for certain reserve requirements. The applicable margin for borrowings ranges from 3.00% to 3.75% with respect to base rate loans and from 2.00% to 2.75% with respect to LIBOR rate loans, in each case, based on our consolidated leverage ratio. As of March 31, 2014, the interest rate on our term loan was 2.75%.

Our short term liquidity could be impacted in part by our ability to maintain compliance with covenants in the credit agreement. The agreement contains an acceleration clause for certain events related to our creditworthiness, including, among other things, our failure to maintain a financial leverage ratio below certain thresholds specified in the agreement and maintain a consolidated interest coverage ratio. As of December 31, 2012 and 2013 and March 31, 2014, we were in compliance with all financial covenants.

Table of Contents

The following table sets forth the major components of our consolidated statements of cash flows data for the periods presented:

(in thousands)	Year ended December 31,			Three months ended	
	2011	2012	2013	2013	March 31, 2014
Net cash provided by operating activities	\$ 15,229	\$ 8,366	\$ 102,477	\$ 31,125	\$ 17,714
Net cash used for investing activities	(9,909)	(17,795)	(21,237)	(5,844)	(4,701)
Net cash provided by (used for) financing activities	20,343	16,816	(16,315)	(11,516)	(3,208)
Net increase in cash	\$ 25,663	\$ 7,387	\$ 64,925	\$ 13,765	\$ 9,805

Cash flows from operating activities

Cash flows from operating activities consist of net income adjusted for certain non-cash items, including depreciation and amortization, deferred income taxes, stock-based compensation expense and excess tax benefits from stock-based compensation, as well as the effect of changes in working capital and other activities.

Cash provided by operating activities of \$17.7 million in the three months ended March 31, 2014 decreased from \$31.1 million in the three months ended March 31, 2013, due primarily to a \$12.0 million decrease in net income and a \$2.7 million decrease in cash related to changes in operating assets and liabilities, partially offset by a \$1.3 million increase in non-cash expense items, primarily consisting of depreciation and amortization and stock-based compensation expense. Changes in cash flows related to operating assets and liabilities primarily consisted of a \$11.6 million decrease in cash due to the timing of payments associated with our accounts payable and accrued liabilities, partially offset by a \$54.0 million increase in cash due to timing of accounts receivable collections and the factoring of certain receivables in the three months ended 2014 and a \$48.6 million increase in cash due to utilization of inventory in the three months ended March 31, 2014 compared to an increase in inventory in the three months ended March 31, 2013.

Cash provided by operating activities of \$102.5 million in 2013 increased from \$8.4 million cash provided by operating activities in 2012, due to a \$54.9 million increase in cash related to changes in operating assets and liabilities, a \$28.3 million increase in net income and a \$10.9 million increase in non-cash expense items, primarily consisting of depreciation and amortization, stock-based compensation expense, excess tax benefits from stock-based compensation and inventory-related write-offs. Changes in cash flows related to operating assets and liabilities primarily consisted of a \$67.4 million increase in cash due to the timing of payments associated with our accounts payable and accrued liabilities, as well as a \$10.4 million increase in cash due to timing of accounts receivable collections and the factoring of certain receivables in 2013. This was partially offset by a \$11.9 million decrease in cash due to increased inventory purchases in preparation of the launch of our HERO3+ capture devices and a \$6.8 million decrease in cash due to increased expenditures for other assets.

Cash provided by operating activities of \$8.4 million for 2012 decreased from \$15.2 million in 2011. The decrease in cash provided by operating activities resulted from a \$19.5 million decrease in cash related to changes in operating assets and liabilities partially offset by increases in net income of \$7.7 million and non-cash expense items of \$5.0 million, primarily consisting of depreciation and amortization, stock-based compensation expense, inventory-related write-offs and deferred taxes. Changes in cash flows related to operating assets and liabilities primarily

Table of Contents

consisted of a \$33.9 million decrease in cash due to timing of accounts receivable collections and a \$31.0 million decrease in cash due to increased inventory purchases to meet the growing demand for our products. These were partially offset by a \$42.9 million increase in cash due to the timing of payments associated with our accounts payable and accrued expenses related to inventory purchases and a \$2.7 million increase in deferred revenue.

Cash flows from investing activities

Cash used in investing activities of \$4.7 million in the three months ended March 31, 2014 decreased from cash used for investing activities of \$5.8 million in the three months ended March 31, 2013 due to \$1.1 million of reduced expenditures on property and equipment.

Cash used in investing activities of \$21.2 million in 2013 increased \$4.0 million from cash used for investing activities of \$17.8 million in 2012. The increase was primarily due to purchases of property and equipment of \$18.3 million and cash used in the acquisition of General Things, Inc. net of cash acquired of \$2.9 million.

Cash used in investing activities of \$17.8 million in 2012 increased \$7.9 million from cash used for investing activities of \$9.9 million in 2011. This increase was comprised of increases in purchases of property and equipment of \$15.8 million offset by a reduction in acquisition spending of \$8.0 million.

Cash flows from financing activities

Our financing activities used cash of \$3.2 million in the three months ended March 31, 2014. Cash flow used in financing activities in the three months ended March 31, 2014 consisted primarily of repayments of long-term debt of \$3.0 million.

Our financing activities used cash of \$16.3 million in 2013. Cash flow used in financing activities in 2013 consisted primarily of repayments of long-term debt and repayments of our revolving credit facility of \$46.0 million, partially offset by borrowings under the revolving credit facility of \$30.0 million.

Our financing activities provided cash of \$16.8 million during 2012. Cash flow provided by financing activities consisted primarily of the issuance of an aggregate of \$137.6 million of long-term and revolving credit facility (net of issuance costs), a tax benefit of \$4.2 million upon exercise of non-qualified stock options and proceeds from the issuance of common stock upon exercise of stock options of \$2.8 million. These were partially offset by a cash dividend of \$117.4 million and repayment of \$10.4 million of indebtedness under our revolving credit facility and notes payable.

Our financing activities provided net cash of \$20.3 million during 2011. Cash flow provided by financing activities consisted primarily of issuance of preferred stock of \$19.7 million and a stockholder cash contribution of \$6.1 million, partially offset by cash distributions of \$5.1 million to stockholders to cover income taxes arising from S corporation earnings.

Table of Contents**Contractual obligations**

The following table summarizes our contractual obligations as of December 31, 2013.

(in thousands)	Total	1 year (fiscal 2014)	2-3 years (fiscal 2015 and 2016)	4-5 years (fiscal 2017 and 2018)	More than 5 years (beyond fiscal 2018)
Term loan principal and interest(1)	\$ 118,606	\$ 63,652	\$ 54,954	\$	\$
Operating leases(2)	32,243	7,681	13,368	10,614	580
Sponsorship commitments(3)	34,423	18,526	15,596	301	
License financing arrangement(4)	3,600	3,600			
Other contractual commitments(5)	4,365	1,896	2,469		
Capital equipment purchase commitments(6)	3,607	3,607			
Total contractual cash obligations	\$ 196,844	\$ 98,962	\$ 86,387	\$ 10,915	\$ 580

- (1) Interest payments were calculated using the applicable rate as of December 31, 2013. See Note 9 of our consolidated financial statements included elsewhere in this prospectus.
- (2) We lease our facilities under long-term operating leases, which expire at various dates through May 2019. The lease agreements frequently include leasehold improvement incentives, escalating lease payments, renewal provisions and other provisions which require us to pay taxes, insurance, maintenance costs or defined rent increases.
- (3) We sponsor sporting events and athletes as part of our marketing efforts. In many cases, we enter into multi-year agreements with event organizers and athletes.
- (4) In August 2013, we entered into a license agreement with the Santa Clara Stadium Authority which gave us rights during the agreement term to season tickets for a National Football League team. The cost of the license was \$4.0 million, of which \$3.6 million remains to be paid as of December 31, 2013 and was recorded as a short-term liability.
- (5) In 2013, we purchased software licenses and engaged outside consultants to assist with upgrading or implementing our financial and IT systems, which require payments over multiple years.
- (6) We enter into contracts to acquire equipment for tooling and molds as part of our manufacturing operations. In addition, we incur purchase commitments related to the manufacturing of our POP displays by third parties. We have revised the previously disclosed amount for capital equipment purchase commitments as of December 31, 2013 to correct this amount.

As of March 31, 2014, our sponsorship commitments decreased to \$22.1 million, as we amended a sponsorship agreement that would have expired in 2015, to expire in 2014. Our capital equipment purchase commitments increased to \$8.3 million as of March 31, 2014. In addition, as of March 31, 2014, we fully repaid the license financing arrangement with the Santa Clara Stadium Authority.

We subcontract with other companies to manufacture our products. During the normal course of business, we and our contract manufacturers procure components based upon a forecasted production plan. If we cancel all or part of the orders, we may be liable to our suppliers and contract manufacturers for the cost of the unutilized component orders or components purchased by our contract manufacturers. Our consolidated financial position and results of operations could be negatively impacted if we are required to compensate our suppliers or contract

manufacturers for any liabilities incurred due to these purchase contract commitments.

The table above excludes the liability for uncertain tax positions of \$8.6 million as of December 31, 2013, due to the uncertainty of when the related tax settlements will become due. As of March 31, 2014, the liability for uncertain tax positions was \$9.1 million.

Sale of receivables

During 2013 and the three months ended March 31, 2014, we sold accounts receivable, without recourse, of \$71.1 million and \$31.3 million, respectively, from a retail customer to a third-party

Table of Contents

banking institution. Factoring fees of \$0.6 million and \$0.3 million in 2013 and the three months ended March 31, 2014, respectively, related to this sale were included in interest expense.

Off-balance sheet arrangements

During the periods presented, we did not have any relationships with unconsolidated organizations or financial partnerships, such as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Critical accounting policies

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires us to make estimates, assumptions and judgments that can significantly impact the amounts we report as assets, liabilities, revenue, costs and expenses and the related disclosures. We base our estimates on historical experience and other assumptions that we believe are reasonable under the circumstances. Our actual results could differ significantly from these estimates under different assumptions and conditions. We believe that the accounting policies discussed below are critical to understanding our historical and future performance as these policies involve a greater degree of judgment and complexity.

Revenue recognition

Revenue is derived from the sale of our capture devices, as well as the related implied post contract support, or PCS. We recognize revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectability is reasonably assured. Evidence of an arrangement consists of an order from our retailers, online customers or distributors. We consider delivery to have occurred once title and risk of loss has been transferred. Customer deposits are included in accrued liabilities on the Consolidated balance sheets and are recognized as revenue when all the criteria for recognition of revenue are met.

Our standard terms and conditions of sale do not allow for product returns other than under warranty. However, we grant limited rights to return product for certain large retailers and distributors. Estimates of expected future product returns are recognized at the time of sale based on analyses of historical return trends by customer class. Upon recognition, we reduce revenue and cost of sales for the estimated returns. Return trends are influenced by product life cycle status, new product introductions, market acceptance of products, sales levels, product sell-through, the type of customer, seasonality, product quality issues, operational policies and procedures and other factors. Return rates can fluctuate over time, but are sufficiently predictable to allow us to estimate expected future product returns. Actual returns in any future period could differ from our estimates, which could impact the revenue that we report.

For customers who purchase products directly from our website, transfer of risk of loss is determined to be upon delivery to the customer's address. We defer those sales made to customers who purchase products from our website in the last four days of the reporting period for which we estimate delivery to occur in the following period. We use estimates to determine when shipments are delivered based on third-party metrics for average transit time. Additionally, we provide a 30-day money back guarantee for web-based sales for which we reduce revenue by an estimate of potential future product returns related to the web-based sales, based on analyses of historical return trends and seasonality. Estimates for web-based sale returns and estimates to derive web sale shipment delivery dates may differ from actual results.

Table of Contents

Our products include multiple elements. We have determined our multiple element arrangements generally include two separate units of accounting: the first element is the hardware component (camera and accessories) and the embedded firmware essential to the functionality of the camera delivered at the time of sale. The second element is the implied right for the customer to receive PCS included with the purchase of our products. PCS includes the right to receive, on a when and if available basis, future unspecified firmware upgrades and features as well as bug fixes, email and telephone support.

We account for each element separately and allocate fees from the arrangement based on the relative selling price of each element. Revenue allocated to an undelivered element is recognized over an estimated service period. We recognize revenue for delivered elements only when all contractual obligations have been completed.

We use best estimate of the selling price, or BESP, to determine allocation of revenue. BESP reflects our best estimates of what the selling prices of elements would be if they were sold regularly on a stand-alone basis. We believe that BESP is the most appropriate methodology for determining the allocation of revenue for multiple element arrangements.

We have allocated revenue between our multiple elements using the relative selling price method which is based on the BESP for all deliverables. Revenue allocated to the delivered hardware and the related essential software is recognized at the time of sale provided the conditions for recognition of revenue have been met. Revenue allocated to PCS is deferred and recognized on a straight-line basis over the estimated term of the support period, which is estimated to be one year based on historical experience. As of December 31, 2012 and 2013 and March 31, 2014, deferred implied PCS revenue was \$3.8 million, \$6.4 million and \$7.4 million, respectively.

Sales incentives

We offer sales incentives through various programs, consisting primarily of cooperative advertising and marketing development fund programs. We record cooperative advertising and marketing development fund programs with customers as a reduction to revenue unless we receive an identifiable benefit in exchange for credits claimed by the customer and can reasonably estimate the fair value of the identifiable benefit received, in which case we will record it as a marketing expense. In addition, we offer price protection discounts to certain customers when new capture device models are released and the customer has remaining inventory of the older models. We estimate price protection discounts, which are recorded as a reduction of revenue, by evaluating inventory held by the customer subject to price protection. We record reductions to revenue for sales incentives when the related revenue is recognized.

Inventories

Inventories consist of finished goods and component parts, which are purchased from contract manufacturers. Inventories are stated at the lower of average cost or market on a first-in, first-out basis. Our assessment of market value requires the use of estimates regarding the net realizable value of our inventory balances, including an assessment of excess or obsolete inventories. We determine excess and obsolete inventories based on an estimate of the future demand for our products within a specified time horizon, generally 12 months. The estimates used for future demand are also used for near-term capacity planning and inventory purchases and are consistent with revenue forecast assumptions. If our demand forecast is greater than actual demand, we may be required to record an excess inventory charge, which would decrease

Table of Contents

gross profit. Any write-downs taken establish a new cost basis for the underlying inventory. For all periods presented, inventories were predominantly comprised of finished goods.

POP displays

We sponsor a program to provide retailers with POP displays in order to facilitate the marketing of our products within retail stores. The POP displays contain a video display that broadcast video images taken by GoPro cameras with product placement available on the POP display for our cameras and accessories. We generally provide these POP displays to customers free of charge. The costs of the POP displays, less any fees charged to customers, are capitalized as a long-term asset, and the net cost is recognized over the expected period of the benefit provided by these assets, which is generally 24 months. POP display amortization included in sales and marketing expense were \$3.6 million, \$8.6 million, \$13.5 million and \$4.5 million for 2011, 2012, 2013 and the three months ended March 31, 2014, respectively.

Warranty

We generally provide 12-month warranty coverage on all of our products except in the EU where we provide a two-year warranty. Our warranty provides for repair or replacement of the associated products during the warranty period. We establish a liability for estimated product warranty costs at the time product revenue is recognized. The warranty obligation is affected by product failure rates and the related use of materials, labor costs and freight incurred in correcting any product failure. Should actual product failure rates, use of materials or other costs differ from our estimates, additional warranty liabilities could be required, which would reduce our gross profit.

Income taxes

We utilize the asset and liability method of accounting for income taxes, which requires the recognition of deferred tax assets and liabilities for expected future consequences of temporary differences between the financial reporting and income tax bases of assets and liabilities using enacted tax rates. We make estimates, assumptions and judgments to determine our provision for income taxes and also for deferred tax assets and liabilities and any valuation allowances recorded against our deferred tax assets. We assess the likelihood that our deferred tax assets will be recovered from future taxable income and, to the extent we believe that recovery is not likely, we establish a valuation allowance.

The calculation of our current provision for income taxes involves the use of estimates, assumptions and judgments while taking into account current tax laws, our interpretation of current tax laws and possible outcomes of future tax audits. We have established reserves to address potential exposures related to tax positions that could be challenged by tax authorities. Although we believe our estimates, assumptions and judgments to be reasonable, any changes in tax law or our interpretation of tax laws and the resolutions of potential tax audits could significantly impact the amounts provided for income taxes in our consolidated financial statements.

The calculation of our deferred tax asset balance involves the use of estimates, assumptions and judgments while taking into account estimates of the amounts and type of future taxable income. Actual future operating results and the underlying amount and type of income could differ materially from our estimates, assumptions and judgments thereby impacting our financial position and results of operations.

Table of Contents

We include interest and penalties related to unrecognized tax benefits within income tax expense. We have not incurred any interest or penalties related to unrecognized tax benefits in any of the periods presented.

We have adopted ASC 740-10 *Accounting for Uncertainty in Income Taxes* that prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of uncertain tax positions taken or expected to be taken in our income tax return, and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

Goodwill, acquired intangible assets and other long-lived assets

Goodwill represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired in a business combination. Goodwill is not amortized but we perform an annual qualitative assessment of our goodwill during the fourth quarter of each calendar year to determine if any events or circumstances exist, such as an adverse change in business climate or a decline in the overall industry demand, that would indicate that it would more likely than not reduce the fair value of a reporting unit below its carrying amount, including goodwill. If events or circumstances do not indicate that the fair value of a reporting unit is below its carrying amount, then goodwill is not considered to be impaired and no further testing is required. If further testing is required, we perform a two-step process. The first step involves comparing the fair value of our reporting unit to its carrying value, including goodwill. If the carrying value of the reporting unit exceeds its fair value, the second step of the test is performed by comparing the carrying value of the goodwill in the reporting unit to its implied fair value. An impairment charge is recognized for the excess of the carrying value of goodwill over its implied fair value. For the purpose of impairment testing, we have determined that we have one reporting unit. There has been no impairment of goodwill for any periods presented.

Our long-lived assets consist of property and equipment and acquired intangible assets. Acquired intangible assets with definite lives are amortized on a straight-line basis over the remaining estimated economic life of the underlying products and technologies. We review our definite lived long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of a long-lived asset may not be recoverable. Recoverability of an asset group is measured by comparing its carrying amount to the expected future undiscounted cash flows that the asset group is expected to generate. If it is determined that an asset group is not recoverable, an impairment loss is recorded in the amount by which the carrying amount of the asset group exceeds its fair value. There has been no impairment of long-lived assets for any periods presented.

Stock-based compensation

We account for stock-based compensation activity using the fair value method, which requires the measurement and recognition of compensation expense for all share-based payment awards based on estimated fair values. This method requires companies to estimate the fair value of stock-based compensation on the date of grant using an option pricing model. We use the Black-Scholes option pricing model to measure stock-based compensation. The Black-Scholes model determines the fair value of share-based payment awards based on the fair value of the underlying common stock on the date of grant and is affected by assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, the fair value of the underlying common stock, expected volatility over the term of the awards and actual and projected employee stock option exercise behaviors. In addition, we are

Table of Contents

required to estimate the expected forfeiture rate and only recognize expense for those shares expected to vest. The assumptions used in calculating the fair value of the stock-based awards represent management judgment. As a result, if factors change and different assumption are used, the stock-based compensation expense could be materially different in the future. Compensation expense relating to employee stock awards is recorded on a straight-line basis.

Stock awards issued to non-employees are accounted for at fair value. We believe that the fair value of the awards is more reliably measured than the fair value of services received. We record compensation expense based on the then-current fair values of the stock awards at each financial reporting date. Compensation recorded during the service period is adjusted in subsequent periods for changes in the stock award's fair value until the earlier of the date at which the non-employee's performance is complete or a performance commitment is reached, which is generally when the stock option award vests. Compensation expense relating to non-employee stock awards is recorded on a straight-line basis.

Determining the fair value of stock-based awards on the grant date requires the use of estimates and assumptions, including the fair value of our common stock, exercise price of the stock option, expected volatility, expected life, risk-free interest rate and dividend rate. We estimate the expected volatility of our stock options by taking the average historical volatility of a group of comparable publicly traded companies over a period equal to the expected life of the options. Since we have undergone significant operational and structural changes, the historical exercise data do not provide a reasonable basis upon which to estimate expected life. As a result, we used the simplified method, as provided under SAB Topic 14.D, Share-Based Payment, to calculate the expected term estimate based on the options vesting term and contractual terms. The risk-free interest rate is the estimated average interest rate based on U.S. Treasury zero-coupon notes with terms consistent with the expected life of the awards. The expected dividend yield is zero as we do not anticipate paying any recurring cash dividends in the foreseeable future and the prior dividend event is viewed as a one-time capital event. We estimate the forfeiture rate of our stock-based awards based on an analysis of our actual forfeitures, analysis of employee turnover and other factors. The impact from a forfeiture rate adjustment would be recognized in full in the period in which the forfeiture rate changes and, if the actual number of future forfeitures differs from our prior estimates, we may be required to record adjustments to stock-based compensation expense in future periods.

As of March 31, 2014, the aggregate intrinsic value of vested options, unvested options and restricted stock outstanding was million, million and million, respectively, based on an assumed initial public offering price of per share, which is the midpoint of the estimated offering price range set forth on the cover page of this prospectus. The amount of unearned stock-based compensation related to unvested share-based payment awards at December 31, 2013 and March 31, 2014 was \$22.8 million and \$32.6 million, respectively. As of each of December 31, 2013 and March 31, 2014, the weighted-average period over which the unearned stock-based compensation is expected to be recognized was 1.0 year.

	2011		Years ended December 31,				Three months ended

Table of Contents

We have granted options to purchase shares of common stock as follows:

Grant date	Number of options granted	Option exercise price	Fair value of common stock per share(1)	Fair value of common stock options per share(2)	Grant date fair value
					(in thousands)
February 2012	171,450	\$ 1.90	\$ 3.16	\$ 2.08	\$ 357
June 2012	608,550	2.96	8.30	6.27	3,817
October 2012	531,700	8.30	8.30	4.44	2,361
November 2012	76,650	8.30	12.13	7.57	580
February 2013	782,950	13.72	13.72	7.22	5,653
March 2013	126,000	13.72	15.40	8.51	1,072
April 2013	162,650	15.40	15.40	8.36	1,359
June 2013	499,200	15.40	15.59	8.31	4,310
July 2013	143,300	15.59	15.59	8.71	1,248
September 2013	338,300	15.59	16.19	9.28	3,139
October 2013	499,200	16.19	16.19	9.01	4,498
December 2013	354,800	16.19	16.22	9.10	3,228
January 2014	1,148,650	16.22	16.22	8.84	10,151
March 2014	422,209	16.39	16.39	8.68	3,666

(1) The fair value of common stock per share utilized for financial reporting purposes.

(2) The weighted average grant date fair value of the options granted determined by utilizing the Black-Scholes option pricing model used to record stock-based compensation expense.

Common stock valuations

Given the absence of a public trading market of our common stock, and in accordance with the American Institute of Certified Public Accountants Practice Guide, Valuation of Privately Held Company Equity Securities Issued as Compensation, our board of directors exercised reasonable judgment and considered numerous and subjective factors to determine the best estimate of fair value of our common stock, including the following:

Company specific factors

actual and forecasted operating and financial performance based on management's estimate;

the status of research and development;

independent third-party valuations;

market adoption and success of our products;

the development of customer relationships;

consumer and industry recognition;

the hiring of key personnel;

the amount and pricing of preferred stock financings with outside investors in arms-length transactions;

the rights and preferences of preferred stock relative to common stock;

the amount and pricing of common stock transactions with outside investors in arms-length transactions;

Table of Contents

the historical lack of a public market of our common and preferred stock; and

the likelihood of achieving a liquidity event, such as an initial public offering or a sale of our company given the prevailing market conditions and the nature and history of our business.

General economic factors

industry trends and competitive environment;

trends in consumer spending, including consumer confidence;

overall economic indicators, including gross domestic product, employment, inflation and interest rates; and

the general economic outlook.

Our common stock valuations utilize a market approach which bases the valuation of our common stock on multiples of revenue or EBITDA for a group of publicly traded companies that we believe are similar to us in terms of size, product market, liquidity, financial leverage, revenue, profitability, growth and other factors. Multiples of revenue or EBITDA from the select group of publicly traded companies are calculated and applied to our business metrics, typically one year forward looking revenue or EBITDA. Prior sales of the company shares are included in the market approach and involve examining any historical transactions related to the sale of our redeemable convertible preferred stock. The market value approach has been applied consistently over the valuation periods noted below.

Once a total equity value is computed, we allocate value to each class of stock using either the Option Pricing Model, or OPM, or the Probability Weighted Expected Return Method, or PWERM. The OPM treats common stock and convertible preferred stock as call options on an enterprise value, with exercise prices based on the liquidation preference of the preferred stock. The common stock is modeled as a call option with a claim on the enterprise at an exercise price equal to the remaining value immediately after the preferred stock is liquidated. The OPM is appropriate to use when the range of possible future outcomes is difficult to predict and thus creates highly speculative forecasts. PWERM involves a forward-looking analysis of the possible future outcomes of the enterprise. This method is particularly useful when discrete future outcomes can be predicted at a relatively high confidence level with a probability distribution. Discrete future outcomes considered under the PWERM include an initial public offering, or IPO, as well as non-IPO market based outcomes. Determining the fair value of the enterprise using the PWERM requires us to develop assumptions and estimates for both the probability of an IPO liquidity event and non-IPO outcomes, as well as the values we expect those outcomes could yield. We apply significant judgment in developing these assumptions and estimates, primarily based upon the enterprise value we determined using the market approach, our knowledge of the business and our reasonable expectations of discrete outcomes occurring.

Over time, as certainty developed regarding possible discrete events, including an IPO, we transitioned the methodology we used to allocate our enterprise value from an OPM to a PWERM. We used an OPM through the valuations as of March 31, 2012, and a PWERM since the valuation as of June 30, 2012.

A brief narrative of the specific factors considered by our board of directors in determining the fair value of our common stock as of the date of grant, is set forth below.

Table of Contents

February 2012. Our board of directors granted stock options in February 2012 with an exercise price of \$1.90 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$1.90 per share based on a number of factors, including market acceptance of the HERO2 and our continued profitability and revenue growth. Our board of directors also considered a contemporaneous third-party valuation as of December 31, 2011. The valuation utilized a market approach of comparable companies in our industry. It applied the market factors to our forward-looking revenue and adjusted EBITDA and allocated enterprise value between each class of stock based on an OPM. The aggregate enterprise value was allocated to each class of stock utilizing an OPM with the following assumptions: a time to a liquidity event of two years, a volatility of 57% and a risk-free interest rate of 0.25%. The time to a liquidity event was determined based upon the expected time frame for us to achieve our business strategy, the volatility was based on the historical volatility of a group of comparable publicly traded companies over a two-year period and the risk-free interest rate was based on the yield of a U.S. Treasury bond at the time of grant over a two-year period. A 25% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event happening in two years.

Subsequent to June 2012, we utilized internal valuation models to calculate the fair value of these options for financial reporting purposes. We evaluated and adjusted the market factors applied to our forward-looking revenue and adjusted EBITDA. As a result of our evaluation, we determined the fair value of our common stock for financial reporting purposes to be \$3.16.

June 2012. Our board of directors granted stock options in June 2012 with an exercise price of \$2.96 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$2.96 per share based on a number of factors, including improvements in the U.S. economy, and our research and development efforts. Our board of directors also considered a contemporaneous third-party valuation as of March 31, 2012. The valuation utilized a market approach of comparable companies in our industry. It applied market factors to our forward-looking revenue and adjusted EBITDA and allocated enterprise value between each class of stock based on an OPM. The aggregate enterprise value was allocated to each class of stock utilizing an OPM with the following assumptions: a time to a liquidity event of two years, a volatility of 59% and risk-free interest rate of 0.33%. The time to a liquidity event remained consistent with the December 31, 2011 valuation based on information known as of March 31, 2012, volatility was based on the historical volatility of a group of comparable publicly traded companies over a two-year period and the risk-free interest rate was based on the yield of a U.S. Treasury bond at the time of grant over a two year period. A 25% discount for lack of marketability was applied to the resulting value of our common stock, which was consistent with the valuation as of December 31, 2011.

For financial reporting purposes, the fair value of the common stock for purposes of calculating the related stock-based compensation expense was based on a number of factors, including the contemporaneous third-party valuation as of June 30, 2012 and other factors that existed at the date of grant. Due to the proximity of the June 2012 grants to the valuation as of June 30, 2012, the fair value of the underlying common stock used to calculate the fair value of these options on the grant date for financial statement purposes was determined to be \$8.30 per share.

October and November 2012. Our board of directors granted stock options in October and November 2012 with an exercise price of \$8.30 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$8.30 per share based on a number of factors, including continued growth in the U.S. economy

Table of Contents

and an improved financial outlook due to record revenue in the second quarter of 2012 and our continued progress on development of our next generation of capture devices. Our board of directors also considered a contemporaneous third-party valuation as of June 30, 2012. The valuation used a market approach and changed our group of comparable companies from those in our industry to technology and retail companies with similar revenue and earnings growth that had recently completed an initial public offering of stock to the public, which we refer to as our group of comparable companies. It applied the new comparable group market factors to our forward looking revenue and EBITDA to determine our enterprise value. As a result, the set of comparable companies utilized in the valuation had a slightly higher revenue multiple. During this time, as certainty developed regarding possible discrete events, including an IPO, the method of allocating enterprise value between each class of stock was changed to a PWERM from an OPM. The PWERM estimates common equity value based on current estimates of an IPO or merger or sale scenario. The expected equity values for the different scenarios in the PWERM model were weighted as follows: 30% probability of IPO in the second quarter of 2013, 60% probability of IPO in the fourth quarter of 2013 and a 10% probability of merger or sale in late 2013. A 20% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event happening in 1.4 years.

For financial reporting purposes, the fair value of the common stock for purposes of calculating the related stock-based compensation expense was based on a number of factors, including the contemporaneous third-party valuation as of November 30, 2012 and other factors that existed at the date of grant. Due to the proximity of the November 2012 grants to the valuation as of November 30, 2012, the fair value of the underlying common stock used to calculate the fair value of these options on the grant date for financial statement purposes was determined to be \$12.13 per share. The valuation as of November 30, 2012 was determined using the market approach of comparable high tech companies with similar revenue and earnings growth that had recently had an initial public offering of stock to the public. It applied the comparable group market factors to our forward looking revenue and allocated the enterprise value to each class of stock using the PWERM method. The expected equity values for the different scenarios in the PWERM model were weighted as follows: 30% probability of IPO in the second quarter of 2013, 60% probability of IPO in the fourth quarter of 2013 and a 10% probability of merger or sale in late 2013. A 15% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event happening in 0.9 years.

February and March 2013. Our board of directors granted stock options in February and March 2013 with an exercise price of \$13.72 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$13.72 per share based on a number of factors, including market acceptance of the HERO3, acquisition of a credit facility and issuance of a cash dividend in December 2012, a sale of stock by stockholders to a third-party investor in an arms-length transaction for approximately \$200.0 million in December 2012, as well as high revenue growth in the fourth quarter of 2012. Our board of directors also considered a contemporaneous third-party valuation as of December 31, 2012. The valuation used a market approach of our group of comparable companies. It applied the comparable group market factors to our forward looking revenue and allocated enterprise value between each class of stock using the PWERM method. The expected equity values for the different scenarios in the PWERM model were weighted as follows: 30% probability of IPO in the second quarter of 2013, 60% probability of IPO in the fourth quarter of 2013 and a 10% probability of merger or sale in late 2013. A 15% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event happening in 0.8 years.

Table of Contents

For financial reporting purposes, the fair value of the common stock for purposes of calculating the related stock-based compensation expense was based on a number of factors, including the contemporaneous third-party valuation as of March 31, 2013 and other factors that existed at the date of grant. Due to the proximity of the March 2013 grants to the valuation as of March 31, 2013, the fair value of the underlying common stock used to calculate the fair value of these options on the grant date for financial statement purposes was determined to be \$15.40 per share.

April and June 2013. Our board of directors granted stock options in April and June 2013 with an exercise price of \$15.40 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$15.40 per share based on a number of factors, including our research and development efforts. Our board of directors also considered a contemporaneous third-party valuation as of March 31, 2013. The valuation used a market approach of our group of comparable companies. It applied the comparable group market factors to our forward looking revenue and allocated enterprise value between each class of stock using the PWERM method. The expected equity values for the different scenarios in the PWERM model were weighted as follows: 90% probability of IPO in the fourth quarter of 2013 and a 10% probability of merger or sale in late 2013. A 12% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event occurring in 0.8 years.

For financial reporting purposes, the fair value of the common stock for purposes of calculating the related stock-based compensation expense for the June 2013 grants was based on a number of factors, including the contemporaneous third party valuation as of June 30, 2013 and other factors that existed at the date of grant. Due to the proximity of the June 2013 grants to the valuation as of June 30, 2013, the fair value of the underlying common stock used to calculate the fair value of these options on the grant date for financial statement purposes was determined to be \$15.59 per share.

July and September 2013. Our board of directors granted stock options in July and September 2013 with an exercise price of \$15.59 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$15.59 per share based on a number of factors, including our research and development efforts and our updated assessment of timing to liquidity. Our board of directors also considered a contemporaneous third-party valuation as of June 30, 2013. The valuation used a market approach of our group of comparable companies. It applied the comparable group market factors to our forward looking revenue and allocated enterprise value between each class of stock using the PWERM method. The expected equity values for the different scenarios in the PWERM model were weighted as follows: 45% probability of IPO in the fourth quarter of 2013, 50% probability of IPO in the first quarter of 2014 and a 5% probability of merger or sale in late 2013. A 5% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event happening in 0.6 years.

For financial reporting purposes, the fair value of the common stock for purposes of calculating the related stock-based compensation expense for September 2013 grants was based on a number of factors, including the contemporaneous third party valuation as of September 30, 2013 and other factors that existed at the date of grant. Due to the proximity of the September 2013 grants to the valuation as of September 30, 2013, the fair value of the underlying common stock used to calculate the fair value of these options on the grant date for financial statement purposes was determined to be \$16.19 per share.

Table of Contents

The valuation as of September 30, 2013 was determined using the market approach of our group of comparable companies. It applied the comparable group market factors to our forward looking revenue and allocated the enterprise value to each class of stock using the PWERM method. The expected equity values for the different scenarios in the PWERM model were weighted as follows: 55% probability of IPO in the first quarter of 2014, 30% probability of IPO in the second quarter of 2014, and a 15% probability of merger or sale in early 2014. A 5% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event happening in 0.6 years.

October and December 2013. Our board of directors granted stock options in October and December 2013 with an exercise price of \$16.19 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$16.19 per share based on a number of factors, including our research and development efforts and our updated assessment of timing to liquidity. Our board of directors also considered a contemporaneous third-party valuation as of September 30, 2013.

For financial reporting purposes, the fair value of the common stock for purposes of calculating the related stock-based compensation expense for the December 2013 grants was based on a number of factors, including the contemporaneous third-party valuation as of December 31, 2013 and other factors that existed at the date of grant. Due to the proximity of the December 2013 grants to the valuation as of December 31, 2013, the fair value of the underlying common stock used to calculate the fair value of these options on the grant date for financial statement purposes was determined to be \$16.22 per share. The valuation as of December 31, 2013 was determined using the market approach of our group of comparable companies. It applied the comparable group market factors to our forward looking revenue and allocated the enterprise value to each class of stock using the PWERM method. The expected equity values for the different scenarios in the PWERM model were weighted as follows: 25% probability of IPO in the second quarter of 2014, 55% probability of IPO in the third quarter of 2014, and a 20% probability of merger or sale in early 2014. A 5% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event happening in 0.7 years.

January 2014. Our board of directors granted stock options in January 2014 with an exercise price of \$16.22 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$16.22 per share based on a number of factors, including our recent performance, research and development efforts and our updated assessment of timing to liquidity. Our board of directors also considered a contemporaneous third-party valuation as of December 31, 2013.

For financial reporting purposes, the fair value of the common stock for purposes of calculating the related stock-based compensation expense for the January 2014 grants was based on a number of factors, including the contemporaneous third-party valuation as of December 31, 2013 and other factors that existed at the date of grant. Due to the proximity of the January 2014 grants to the valuation as of December 31, 2013, the fair value of the underlying common stock used to calculate the fair value of these options on the grant date for financial statement purposes was determined to be \$16.22 per share.

March 2014. Our board of directors granted stock options in March 2014 with an exercise price of \$16.39 per share. For these stock option grants, our board of directors determined the fair value of our common stock on the date of grant to be \$16.39 per share based on a number of factors, including our research and development efforts and our updated assessment of timing to

Table of Contents

liquidity. Our board of directors also considered a contemporaneous third-party valuation as of February 28, 2014. The valuation used a market approach of our group of comparable companies. It applied the comparable group market factors to our forward looking revenue and allocated enterprise value between each class of stock using the PWERM method. The expected equity values for the different scenarios in the PWERM model were weighted as follows: 60% probability of IPO in the second quarter of 2014, 30% probability of IPO in the third quarter of 2014 and a 10% probability of merger or sale in late 2014. A 5% discount for lack of marketability was applied to the resulting value of our common stock, which was based on a liquidity event happening in 0.6 years.

For financial reporting purposes, the fair value of the common stock for purposes of calculating the related stock-based compensation expense for the March 2014 grants was based on a number of factors, including the contemporaneous third-party valuation as of February 28, 2014 and other factors that existed at the date of grant. Due to the proximity of the March 2014 grants to the valuation as of February 28, 2014, the fair value of the underlying common stock used to calculate the fair value of these options on the grant date for financial statement purposes was determined to be \$16.39 per share.

Upon completion of this offering, our common stock will be publicly traded and will therefore be subject to potentially significant fluctuations in the market price. Such fluctuations, if they occur, could impact the volatility used in the fair value calculations which could also impact our future stock-based compensation, as increased volatility would increase the fair value of the related awards granted in the future periods. In addition, increases and decreases in market price of our common stock will also increase and decrease the fair value of our stock-based awards granted in future periods.

Recent accounting pronouncements

In July 2013, the Financial Accounting Standards Board issued a new accounting standard update on the financial statement presentation of unrecognized tax benefits. The new guidance provides that a liability related to an unrecognized tax benefit would be presented as a reduction of a deferred tax asset for a net operating loss carryforward, a similar tax loss or a tax credit carryforward if such settlement is required or expected in the event the uncertain tax position is disallowed. The new guidance becomes effective for us on January 1, 2014 and it should be applied prospectively to unrecognized tax benefits that exist at the effective date with retrospective application permitted. We adopted the guidance on January 1, 2014. The guidance had no material impact to our financial position or results of operations in the first quarter of 2014.

We are an emerging growth company, and, for as long as we continue to be an emerging growth company, we may choose to take advantage of exemptions from various reporting requirements applicable to other public companies but not to emerging growth companies, including, but not limited to, not being required to have our independent registered public accounting firm audit our internal control over financial reporting under Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. Under the JOBS Act, emerging growth companies can also delay adopting new or revised accounting standards until such time as those standards apply to private companies. We have irrevocably elected not to avail ourselves of this accommodation allowing for delayed adoption of new or revised accounting standards, and,

Table of Contents

therefore, we will be subject to the same new or revised accounting standards as other public companies that are not emerging growth companies.

Quantitative and qualitative disclosures about market risk

We are exposed to market risks in the ordinary course of our business. These risks primarily include foreign currency and interest rate risks as follows:

Foreign currency risk

To date, all of our product sales and inventory purchases have been denominated in U.S. dollars. We therefore have not had any foreign currency risk associated with these two activities. The functional currency of all of our entities is the U.S. dollar. Our operations outside of the United States incur a portion of their operating expenses in foreign currencies, principally the Hong Kong Dollar. Our results of operations and cash flows are, therefore, subject to fluctuations due to changes in foreign currency exchange rates. However, we believe that the exposure to foreign currency fluctuation from operating expenses is immaterial at this time as the related costs do not constitute a significant portion of our total expenses. As we grow our operations, our exposure to foreign currency risk could become more significant. To date, we have not entered into any foreign currency exchange contracts and currently do not expect to enter into foreign currency exchange contracts for trading or speculative purposes.

Interest rate risk

We had cash totaling \$36.5 million, \$101.4 million and \$111.2 million at December 31, 2012 and 2013 and March 31, 2014, respectively. Our cash consists of cash in bank accounts. The primary objectives of our investment activities are to preserve principal and provide liquidity without significantly increasing risk. Our cash is held for working capital purposes. We do not enter into investments for trading or speculative purposes.

We had outstanding term debt of \$120.0 million, \$114.0 million and \$111.0 million at December 31, 2012 and 2013 and March 31, 2014, respectively. The interest rate is based on the six-month adjusted LIBOR plus 2.5%. The initial contractual interest rate is 3.06% and adjusts every six months. The term loan had scheduled quarterly principal repayments due on the last day of each quarter of \$1.5 million per quarter in 2013, and provides for payments of \$3.0 million per quarter in 2014 and \$6.0 million for the first three quarters of 2015, with the remaining balance due on December 21, 2015. Our excess cash flows for 2013 triggered a contractual principal prepayment obligation of \$48.5 million, which amount has been classified as a current liability as of December 31, 2013 and March 31, 2014. In April 2014, we amended our credit facility to extend the due date for this contractual principal prepayment from April 2014 to December 2014. A hypothetical 50 basis point increase in the LIBOR rate as of March 31, 2014, applied to our outstanding debt balance as of March 31, 2014, would have resulted in an approximately \$0.4 million increase in our interest expense and a decline of 4% in our net income for the three months ended March 31, 2014.

Table of Contents

Business

Company overview

GoPro is transforming the way consumers capture, manage, share and enjoy meaningful life experiences. We do this by enabling people to capture compelling, immersive photo and video content of themselves participating in their favorite activities. Our customers include some of the world's most active and passionate people. The volume and quality of their shared GoPro content, coupled with their enthusiasm for our brand, are virally driving awareness and demand for our products. To date, we have generated substantially all of our revenue from the sale of our cameras and accessories and we believe that the growing adoption of our capture devices and the engaging content they enable, position GoPro to become an exciting new media company.

What began as an idea to help athletes document themselves engaged in their sport has become a widely adopted solution for people to document themselves engaged in their interests, whatever they may be. From extreme to mainstream, professional to consumer, GoPro has enabled the world to capture and share its passions, and the world, in turn, is enabling GoPro to become one of the most exciting and aspirational companies of our time.

Our business focus

Enabling engaging content is at the core of our business. We develop hardware and software solutions to alleviate consumer pain points associated with capturing, managing, sharing and enjoying engaging content.

Capture

Our capture devices enable professional quality capture and exceptional versatility at affordable prices. Our products' small, lightweight, yet durable designs make them easy to use even in highly challenging situations. In addition, our remote control solutions and our seamless integration with mobile devices via the GoPro App, enable engaging self-capture during virtually any activity. As of March 31, 2014, there have been approximately 6.5 million downloads of the GoPro App.

Since launching our first HD capture device in July 2009, we have sold more than 8.5 million HD cameras, including more than 3.8 million in 2013. We sell our products in over 100 countries and through more than 25,000 retail stores. According to The NPD Group's Retail Tracking Service,

Table of Contents

GoPro was the #1 selling camcorder (by dollars and units) and a top six selling camera accessory company (by dollars and units) in the United States in 2013. Also according to The NPD Group, our HERO cameras represented a 45% share of the U.S. camcorder market (by dollars) in 2013, up from an 11% share during December 2011 and our camera accessories represented a 4% share of the U.S. camera accessory market (by dollars) in 2013.

Manage

We seek to eliminate the pain point of managing content by making it easy for our customers to transfer footage from their cameras to a system that efficiently organizes their content and facilitates convenient editing and sharing. GoPro Studio and the GoPro App reflect the early stages of our content management platform strategy.

GoPro Studio enables our customers to quickly edit simple or complex videos and create videos from time-lapse photo sequences. In 2013, we introduced GoPro Edit Templates, which are based on GoPro's own original video productions, to enable our customers to quickly produce engaging, professional-quality videos using their own footage. As of March 31, 2014, there had been more than 4.3 million downloads of GoPro Studio. During the first quarter of 2014, our customers in the aggregate exported, on average, more than 20,000 videos per day using GoPro Studio.

In addition to facilitating full camera control from a mobile device, the GoPro App enables a customer to easily and wirelessly copy footage from a GoPro camera to a mobile device for storage and sharing without a computer.

Share

By facilitating the capture, management and editing of engaging photos and videos, we are ultimately helping our customers share more compelling personal content. GoPro Studio and the GoPro App facilitate the posting of photos and videos directly to leading social networks and content platforms, including Facebook, Instagram, Twitter, Vimeo and YouTube. Thousands of GoPro customer photos and videos are shared daily, driving awareness and enthusiasm for our customers' content, as well as for GoPro's own brand and products. In 2013, our customers uploaded to YouTube approximately 2.8 years worth of video featuring GoPro in the title. Also on YouTube, in the first quarter of 2014, there was an average of 6,000 daily uploads and more than 1.0 billion views representing over 50.0 million watched hours of videos with GoPro in the title, filename, tags or description.

Enjoy

GoPro enables the production of entertaining and inspiring content, both in the form of our customers' UGC, as well as GoPro originally produced content, that we collectively refer to as GoPro programming. This often features professional athletes, celebrities and entertainers, as well as everyday people engaged in their favorite activities.

Table of Contents

We believe that increasing our customers' enjoyment of their content enhances the value proposition of capturing and sharing their lives with our products. Also, having recognized the role GoPro content plays in attracting and exciting consumers, we are expanding the distribution of GoPro programming to engage and build relationships with even those consumers who do not own a GoPro capture device.

We distribute GoPro programming through what we refer to as the GoPro Network, a collection of GoPro Channels hosted on a variety of platforms, including the following:

Facebook: over 7.2 million likes;

Instagram: over 2.0 million followers;

Twitter: over 950,000 followers; and

YouTube: over 450 million video views, over 1.8 million subscribers and ranked #1 on the Brand Channel Leaderboard for January through March 2014.

As of December 31, 2013, we had not derived revenue from the distribution of, or social engagement with, our content on the GoPro Network. However, we plan to pursue new revenue opportunities from the distribution of engaging GoPro content in the near term. For example, in the first quarter of 2014, we entered into an agreement with Microsoft to develop and launch the GoPro Channel on Xbox Live, a leading delivery system for IP video streams on connected televisions, that will provide us with access to advertising revenue, fees from third-party sponsorship of the GoPro Channel and the ability to sell our capture devices directly to consumers as they watch GoPro programming. We expect to begin earning revenue from GoPro Channel advertising and sponsorship opportunities on Xbox Live and GoPro Channel advertising on YouTube and Virgin America in the second quarter of 2014. We do not expect the revenue earned from these GoPro Channels to be material to us in 2014.

Table of Contents

The virtuous cycle

We believe our business focus results in a virtuous cycle and a self-reinforcing consumer acquisition model that fuels our growth. Our products in the hands of our customers enable compelling, authentic content that organically increases awareness for GoPro and drives demand for our products.

As a result, we have achieved significant growth in recent periods. In 2011, 2012, 2013 and the three months ended March 31, 2014, we generated revenue of \$234.2 million, \$526.0 million, \$985.7 million and \$235.7 million and reported net income of \$24.6 million, \$32.3 million, \$60.6 million and \$11.0 million, respectively. To date, substantially all of our revenue has been generated from the sale of our capture devices.

The GoPro opportunity

We believe the following create an attractive market opportunity for GoPro.

Consumers want an easy way to self-capture engaging content

Before GoPro, if people wanted footage of themselves engaged in activities, they needed another person to hold and operate a camera. Furthermore, the camera operator needed to be skilled in order to obtain compelling content. Additionally, capturing high-quality content often required expensive, fragile and cumbersome camera equipment that was not accessible to everyone. Accordingly, it was not practical for people to document their experiences during their lives' most enjoyable moments.

By eliminating the need for a third-party camera operator, GoPro has enabled a new era of convenient self-documentation. Our products' high-performance features, ease of use and versatility, made available at affordable price points, provide a premium-quality self-capture solution that appeals to both consumers and professionals.

Consumers want a quick, easy way to manage, edit and share their content

The proliferation of social media and content sharing outlets like Facebook, Instagram, Twitter, Vimeo and YouTube reflects a growing consumer interest in sharing personal experiences. According to a Pew Research survey from October 2013, the percentage of American adult Internet users who upload or post videos online more than doubled from 14% in 2009 to 31% in 2013, and 71% of adults who post videos online do so on social networking sites. However,

Table of Contents

managing, editing and sharing engaging, high-quality content often requires substantial time, resources and skill. GoPro Studio and the GoPro App begin to address these pain points by offering intuitive, easy-to-use tools for managing, editing and sharing professional-grade footage. We see an opportunity to further develop these currently separate software solutions into an integrated and enhanced GoPro content management platform.

Consumers continue to replace traditional cameras with mobile devices

The rapid adoption of smartphones and tablets with photo and video capabilities has changed the camera landscape and negatively impacted the sales of traditional cameras and digital video camcorders. According to IDC, global shipments of digital cameras fell from 142.7 million units in 2011 to 76.2 million units in 2013, a decline of 47%, and global shipments of digital camcorders fell from 21.1 million units in 2011 to 14.1 million units in 2013, a decline of 33%.

We believe that the emergence of photo- and video-enabled mobile devices is creating further opportunities for GoPro. As mobile devices continue to displace traditional cameras and camcorders, we believe consumers will seek capture devices that offer differentiated capabilities, like GoPro products.

Moreover, we believe mobile devices complement our products. With the GoPro App, mobile devices can be used to remotely control GoPro cameras, thereby optimizing customers' ability to self-capture high-quality content of themselves and their activities. The GoPro App also enables customers to manage and share their captured content without the need for a computer. Furthermore, smartphones and tablets expand consumers' ability to access and enjoy GoPro content online.

Consumers want compelling content on demand

According to comScore (US, December 2012), there are over 38.5 billion videos streamed per month and, according to IDC's 1H '13 research, by 2017, over 2.2 billion users worldwide will be watching streaming video over the Internet.

We believe consumer demand for compelling content combined with GoPro's self-capture technology and the explosive popularity of social media create a significant media opportunity for GoPro. GoPro programming has developed a dedicated and growing audience. To continue to scale this audience, we have built a team of production professionals who regularly produce content based on inspiring stories from around the world, captured exclusively with our products. In addition, we actively curate and redistribute, with permission, our customers' most compelling content as GoPro-branded content. We believe GoPro is well-positioned to become the first media company whose content is captured exclusively using its own hardware.

To date, the GoPro Channels on YouTube, exclusive of our customers' own shared content on their personal YouTube channels, have generated over 450 million cumulative video views.

We will continue to expand our distribution of GoPro programming and the reach of the GoPro Network to new platforms such as Xbox Live. Our agreement with Microsoft provides us with access to advertising revenue streams and the ability to sell our capture devices directly to consumers as they are watching GoPro programming and, in exchange, Microsoft is entitled to receive a share of the revenues we generate from these activities. In addition, under the agreement, Microsoft will provide funds towards our development of the application through which Xbox Live will stream the GoPro Channel.

Table of Contents

Further, in 2014, we began providing Virgin America with content for a dedicated GoPro Channel available to passengers on Virgin America flights. We provide this content without charge.

What makes GoPro unique

By enabling the world to capture and share its passions, the world, in turn, has enabled GoPro to become one of the most exciting and aspirational companies of our time.

Category-defining self-capture devices

Our capture devices offer our customers, both consumers and professionals, exceptional capabilities that have earned us multiple awards, including a 2013 technical Emmy Award. Our cameras' small, lightweight, yet durable designs make them easy to use even in highly challenging situations, and along with their affordable prices encourage adoption and experimentation that often leads to interesting content. In addition, our broad portfolio of mountable and wearable accessories enables multiple use cases and facilitates a differentiated self-capture experience than that of traditional cameras and smartphones.

Our products have been embraced by media professionals and are used in production by The Discovery Channel, ESPN and other networks. We believe this visible professional use of our capture devices further validates the quality of our products and appeal of our brand to consumers. We further believe we are increasingly lowering the barriers that separate professional from amateur capture.

Many of our customers purchase multiple units of our products. Unlike traditional cameras or smartphones, owning multiple GoPro capture devices enables our customers to capture their experiences from multiple perspectives simultaneously and create more interesting and professional-quality content.

Table of Contents

Professional media production team enhances product development

In addition to our core product development team, we leverage input from our in-house media production team to refine existing products and influence future product design. Our internal media production team regularly travels the world capturing GoPro originally produced content exclusively using our capture devices. We believe consistent use of our products and developmental feedback gives us a competitive advantage.

Passionate consumer- and content-supported business model

Our business model is supported by some of the world's most active and influential consumers who use GoPro to capture and share their life experiences and interests. Their shared content excites and inspires others around the world to do the same, which we believe, leads to higher camera and accessory sales and, in turn, a massive volume of UGC. We believe this virtuous cycle, in which our customers' content increases awareness of GoPro and demand for our products, is a meaningful differentiator for us.

Best-in-class marketing relationships

GoPro has established marketing relationships with more than 120 athletes, celebrities and entertainers, and sponsors more than 90 sporting events annually, including the X Games, Supercross and ASP world surfing championship events. We partner with athletes such as Olympic gold medal winning snowboarder Shaun White and 11-time world champion surfer Kelly Slater, as well as entertainers, such as Foo Fighters, Jane's Addiction, Guy Fieri and Alton Brown, and producers of popular television shows. An increasing number of professionals are recognizing that GoPro allows them to capture performances in unique and compelling ways that engage and entertain their fans. This further validates our brand to consumers.

We also have promotional agreements with recreational destination resorts, such as all Vail Company resorts and the Whistler Blackcomb resort.

Validating the quality of our products and our growing role as a media brand, we are approached by professionals and organizations seeking to leverage GoPro as a media platform to distribute their own branded content captured with our products. For example, we regularly collaborate with Red Bull to capture content at Red Bull-sponsored events, which we then distribute across the GoPro Network to promote both Red Bull and its use of our products. Another example includes a production company wishing to promote an upcoming feature-length film by distributing trailers showcasing its film's use of GoPro capture devices in production.

Differentiated sales strategy with specialty retailers

Since our first sale in 2004, our distribution strategy has focused on specialty retailers, including surf, ski and motorsports outlets, where we believe GoPro is often the only capture device sold. Our early, first-mover relationships with these retailers and their customers helped us establish a brand authenticity that remains a cornerstone of our business. This focus on the specialty retail channel has also enabled us to develop a high-touch, differentiated sales network of more than 25,000 stores globally that we believe is difficult to replicate.

Strong, global brand

Over the past 10 years, we have built a powerful brand that is emblematic of the pursuit and celebration of human passion. We believe consumers recognize GoPro as much for the experiential content sharing we enable as for the products we make.

Table of Contents

In defining the category of self-capture, GoPro has become a global standard. Our trademarks, GoPro and Be a Hero, are relevant and aspirational to consumers, as reflected in the variety of our customers' shared content which spans from our roots in action sports to now include family, travel, music, science and other areas of human interest. The strength of our brand is further evidenced by our customers' frequent tagging, titling and describing of their footage as GoPro content.

A company culture built around our vision

GoPro was founded by dedicated sports enthusiasts who wanted a better way to document and share their personal passions. As we have grown, we have remained focused on hiring employees who share this same ethos, whatever their personal interests may be. We have built a team focused on developing innovative solutions to the problems we encounter during our own self-capture pursuits, and we believe our employees' shared passion, experience and vision represent an increasingly important competitive advantage.

Our strategy

We intend to expand our existing capture business and broaden our portfolio with content management, editing and sharing solutions to provide increased value to our customers, introduce new revenue streams and further differentiate us from competitors. Key components of our strategy include the following.

Continue to introduce innovative capture devices

We relentlessly pursue our goal of developing the world's most versatile capture devices and enabling self-capture during any activity. To stay at the forefront of our industry, we are focused on continued product innovation and leadership. For example, we are developing custom sensor and digital signal processing technologies with our suppliers. Other areas of innovation include custom lens, audio, battery and accessory design. We may also leverage our brand strength and product expertise to opportunistically enter new device categories.

Develop seamless content management, editing and sharing solutions

We believe it is important to simplify the organizing, editing and sharing of engaging content and, to that end, we are developing an integrated content management platform. Our October 2013 acquisition of General Things, a web development firm, has provided us with additional software competencies to accelerate this process. Further, we may consider additional acquisitions of complementary technologies or businesses in the future. In addition, we may seek to leverage our content management platform as a new revenue stream.

Scale as a media brand

GoPro programming is a potent marketing tool which we believe, on its own, has significant value as a growing media asset. We are investing to scale GoPro as a media entity and develop new revenue opportunities by increasing production of GoPro originally produced content while simultaneously increasing the aggregation and redistribution of our customers' best of UGC. Additionally, we are investing to develop, distribute and promote GoPro programming on additional partner platforms such as Virgin America and Xbox Live.

Table of Contents

Expand into new vertical markets

Leveraging the product development and sales and marketing strategies that have enabled us to be a leader in vertical markets such as skiing, surfing and motorsports, we are targeting new vertical markets including music and hunting and fishing. We continue to explore additional markets where we believe GoPro can authentically deliver meaningful solutions to consumers.

Grow internationally

We believe that international markets represent a significant growth opportunity for us. As of December 31, 2013, our products were sold in over 100 countries through more than 25,000 retail outlets. We plan to capitalize on the strength of our brand to increase our presence worldwide through additional retailers and strategic distribution partnerships.

Expand in-store brand and sales footprint

We invest heavily to produce GoPro-branded, video-enabled POP merchandising displays that we make available to nearly all of the retail outlets through which our products are sold. These displays showcase engaging GoPro content and attractively present our cameras and accessories. Having recognized our success in these stores, coupled with our expanding product portfolio, we are working with our retailers to further expand the footprint of our POP displays.

Extend strategic marketing relationships

We form relationships with marketing partners that use our products and services to promote their own brands and properties. For example, certain ASP world surfing championship events have used GoPro products to capture surfing competition from perspectives such as the surfer's board and body, which enabled the ASP to provide its fans a more immersive and engaging viewing experience. Supercross similarly mounts GoPro capture devices to professional dirt bike racers' helmets and uses the first-person perspectives to enhance its television broadcasts. As a result, GoPro benefits not only from the expanded brand awareness that traditionally comes with such marketing partnerships, but also being recognized as our partners' technology enabler. We will continue developing and leveraging strategic marketing relationships to increase GoPro brand awareness.

Expand brand awareness through increased advertising

Notwithstanding the visibility we have garnered in the consumer markets where we have historically focused, we believe consumers in many other markets are not familiar with our brand and products. We believe this underscores a significant opportunity for GoPro to expand awareness through increased advertising on television, in print, online, and on billboards and other out of home advertising while continuing to scale our promotional marketing efforts and trade show presence.

Products

Cameras

Our core capture product is the HERO line of cameras, the first HD version of which we introduced in 2009. Since then, we have focused on continued innovation and development of our products and subsequently launched the HERO2 camera in 2011, the HERO3 camera in 2012 and the HERO3+ camera in 2013. Our HERO3+ cameras capture video and photos in a small,

Table of Contents

easy-to-use form factor. They come bundled with a protective waterproof housing and select mounting accessories and have built-in Wi-Fi, providing connectivity with a smartphone or tablet to enable remote control and content viewing and sharing functionality. We offer the HERO3 and HERO3+ cameras in White, Silver and Black editions that we position as a good, better, best product line with increasingly better image quality, enhanced capture features and accessory bundles from model to model at different price points. The following table shows the key features and specifications of our HERO3 and HERO3+ cameras:

We also sell accessories, both bundled and separately, that enhance the functionality and versatility of our cameras and enable our customers to self-capture their experiences during a variety of activities and from different viewpoints. In addition to our standard packages, we offer the HERO3+ Black edition camera in music- and surf-specific bundles, which each come packaged with accessories tailored for their respective markets.

Premium accessories

Our premium accessories include the Battery BacPac, Wi-Fi Remote and LCD Touch BacPac, which expand the features, versatility and convenience of our cameras.

Table of Contents

Mounts

We offer a large selection of mounts designed to enable consumers to capture content while engaged in a wide range of activities. This includes equipment-based mounts, such as the helmet, handlebar, roll bar and tripod mounts, as well as mounts that enable customers to wear the mount on their bodies, such as the wrist housing, chest harness and head strap. Most of our mounts are backward-compatible with our HERO, HERO2 and HERO3 cameras.

Other accessories

Other accessories include spare batteries, charging accessories, cables to connect our GoPro cameras to televisions and monitors, video transmitters, external microphones, flotation devices, dive filters, anti-fogging solutions and accessories for the Wi-Fi Remote.

The following table highlights select products in our accessories portfolio:

Table of Contents

We believe that providing software tools that help our customers manage, edit and share their GoPro content improves our value proposition and increases sales of our capture devices. We currently provide to consumers the following software applications at no charge:

GoPro Studio

GoPro Studio is a powerful video editing tool that allows our customers to create professional quality videos from their GoPro content. GoPro Studio includes GoPro Edit Templates, which are based on our own original video productions and enable our customers to quickly produce engaging, professional quality videos using their own footage. Additional features include easy playback and trimming of video clips, frame rate and image quality adjustments, conversion of time lapse photos into videos and the ability to export videos for convenient web sharing.

Table of Contents

GoPro App

The GoPro App allows customers to control their GoPro cameras remotely using a smartphone or tablet. Features include full control of all camera settings, content preview and playback directly from the camera on a smartphone or tablet, and access to GoPro's Photo of the Day, Video of the Day and content feeds. The GoPro App enables customers to easily and wirelessly copy footage from their cameras to mobile devices for storage and sharing without a computer.

Research and development

We are passionate about developing new and innovative products that inspire our consumers and enhance our brand. We are constantly innovating to deliver better performance, expanded functionality and increased convenience to enhance the appeal of our products. Our capture devices have earned us multiple awards, including a 2013 technical Emmy Award. We also have teams focused on software application development to facilitate convenient content management, editing and sharing. We strive to remain a market leader by consistently introducing innovative products that offer superior performance at affordable price points.

We have a user experience-driven approach to product development and our Chief Executive Officer leads product design. By engaging with customers and opinion leaders in our core markets around the world, our development team strives to introduce meaningful and empowering new features that expand the versatility and performance of our products.

In addition to our core product development team, we benefit from input received from our in-house media production team that regularly travels the world capturing GoPro originally produced content exclusively using our capture devices. We believe leveraging this content team to help refine existing products and influence future products gives us a competitive advantage.

Our engineering team, which supports the development of our capture devices, firmware and software, has grown from two to 176 engineers from 2010 to 2013. Our engineering team is divided into two main groups. The architecture group is responsible for developing technologies

Table of Contents

to support the concepts proposed by our product team. These core technologies include new Image Silicon Processors, or ISPs, new image sensors and lenses, as well as the core algorithms that enable the systems to operate and provide the performance and features. The implementation group integrates these innovations from the architecture group into our products.

Part of our development strategy involves co-developing the most significant components of our cameras with a technology partner. To further these efforts, some of our partners have dedicated employees to support our research and development initiatives.

With our acquisition of CineForm, Inc. in 2011, we began to build capabilities in software applications. In October of 2013, we acquired General Things, a digital design and software studio based in San Francisco, California. Prior to the acquisition, General Things had been our strategic partner since 2010, and was instrumental in helping us advance our business back-end and consumer-facing web development. With the combination of these acquisitions and organic growth, the GoPro software team has grown to more than 72 employees developing desktop, mobile and web-based applications.

Our research and development expense was \$8.6 million, \$36.1 million, \$73.7 million and \$28.7 million for 2011, 2012, 2013 and the three months ended March 31, 2014, respectively.

Manufacturing, logistics and fulfillment

While our products are designed in California, we currently outsource manufacturing to two manufacturers, Chicony and Sky Light. Both manufacturers are located in Shenzhen, China. Our operations team includes managers based in San Mateo, California, Shenzhen, China, and Hong Kong who coordinate with our manufacturers' engineering, manufacturing and quality control personnel to develop the requisite test and manufacturing processes and oversee manufacturing activities. We believe that using outsourced manufacturing enables greater scale and flexibility than establishing our own manufacturing facilities. We periodically evaluate the need and advisability of adding manufacturers to support our operations.

Our relationships with our manufacturers have evolved over time from an original design manufacturer, or ODM, arrangement, in which the manufacturer provided the firmware and design support, to an arrangement in which we design the products and develop the strategic test processes and firmware ourselves. We believe this transition has allowed us more control over the performance and quality of our products.

To date, we have derived most of our revenue through products manufactured by Chicony, though we regularly assess our manufacturing options and engage new contract manufacturers where appropriate. Under our agreement with Chicony, we own all tooling and equipment that we fund, product designs and other deliverables that are produced in accordance with the agreement. The Chicony agreement has an initial three-year term that ends in August 2014, and automatically renews annually unless either party provides 90 days prior notice. Additionally, the agreement may be terminated by either party in the event of breach, Chicony is entitled to terminate if we fail to submit a purchase order during any three-month period and we are permitted to terminate for convenience upon providing 180 days prior written notice.

We have established a strategic commodity team that manages the pricing and supply of the key components of our capture devices, including sensors, digital signal processors and lenses. A few key strategic parts are purchased from the supplier by us and then consigned to our manufacturers,

Table of Contents

while the vast majority of parts are procured directly by our contract manufacturers. We seek to use our commodity team to achieve competitive pricing on the largest value-add components, and leverage our contract manufacturers' volume purchases for best pricing on common parts.

We have third-party fulfillment centers in Riverside and Fremont, California, Singapore, Hong Kong and Venray, Netherlands. These facilities are either full service postponement centers (both light assembly and warehouse/fulfillment) or warehouse/fulfillment only centers. Cameras are typically air freighted while accessories and packaging are typically shipped via ocean freighter from our manufacturers in China to these fulfillment centers, where the products are packaged for retail sale. This postponement strategy allows us to reduce shipping costs, reduce custom levies, customize products for local languages and improve inventory flexibility.

Sales channels and customers

We sell our products through more than 25,000 retailers in over 100 countries directly and through distributors. We are focused on building close relationships with our retailers and distributors, educating our partners' sales forces about our products, working with them to merchandise our products in a compelling manner in-store, as well as providing consumers with informative and convenient ecommerce experiences at retail partner websites.

Direct sales

We sell directly to large and small retailers in the United States, and directly to consumers around the world through our retail and ecommerce channels, as follows. In 2013 and the three months ended March 31, 2014, our direct sales channel accounted for 52% and 47% of our revenue, respectively.

Independent specialty retailers We use a network of location-based independent manufacturer representatives to sell our products to independent specialty retailers focused on action sports markets. Our representatives provide highly personalized service to these retailers, including assisting with product mix planning, channel marketing and in-store merchandising, taking orders and providing clinics to educate retail sales personnel about GoPro products. We also have an internal, regionally focused sales team that provides a secondary level of service to both the manufacturer representatives and the independent specialty retailers. Independent specialty retailers generally carry our higher end products, targeting their core customers who we believe tend to be early adopters of new technologies. Our sales efforts began in the specialty retail channel and we believe we continue to often be the only capture device sold in these types of stores. Independent specialty retailers outside of the United States represent a similarly important sales channel for us, and we reach these customers indirectly through our network of international distributors.

Big box retailers We sell to large retailers with a national presence, including Amazon.com, Inc., Best Buy, Target Corporation and Wal-Mart, Inc. We support these retailers with a dedicated and experienced sales management team. We believe this enables us to build close relationships with these retailers and to reduce channel conflict. These retailers generally carry a varied subset of our products targeting their particular end-user customers. This helps us maintain in-store product differentiation between sales channels and protects our brand image in our core specialty retail markets. One retailer, Best Buy, accounted for 15%, 15%, 17% and 13% of our revenue in 2011, 2012, 2013 and the three months ended March 31, 2014, respectively.

Table of Contents

Mid-market retailers We sell to retailers with a large regional or national presence, often focused on specific verticals such as consumer electronics, sporting goods, military, hunting and fishing and motor sports. We refer to these retailers as our mid-market channel, which includes Apple, Army & Air Force Exchange Service, B&H Foto & Electronics Corp., Cabela's Inc., InMotion Entertainment, Recreation Equipment Inc. and The Sports Authority Inc. We sell directly to these retailers through our experienced sales teams assigned to particular accounts and regions. Mid-market retailers generally carry a smaller subset of our products targeted toward their end-user customers.

Ecommerce channel We sell our full line of products directly to consumers around the world through our online store at GoPro.com. We drive consumers to our website through online and offline advertising, as well as marketing promotions carried out at tradeshow and sponsored events. Customers may also order over the phone.

We manage our diverse channels by differentiating our products among the various retail channels. For example, certain big box retailers such as Target and Walmart only carry White and Silver edition capture devices while specialty retailers focus on Silver and Black editions.

Additionally, we leverage club retailers such as Costco Wholesale Corporation to sell through legacy products in key selling seasons (spring and holiday), while expanding our sales reach to entry-level customers.

Distributors

We sell to over 50 distributors who resell our products to retailers in international markets and to certain specific verticals in the United States. All of our sales outside of the United States are generated through distributors who sell GoPro products to independent specialty retailers, mid-market retailers and big box retailers. In 2013 and the three months ended March 31, 2014, our distributors accounted for 48% and 53% of our revenue, respectively. In the three months ended March 31, 2014, one distributor, X-treme Video accounted for 10% of our revenue.

In the United States, our distributors sell into powersports, telecommunications, college bookstores and premium incentive markets. Our contracts with distributors generally have a term of one or two years and prohibit the distributors from selling competing products.

We have dedicated sales personnel focused on providing a high level of service to these distributors, including assisting with product mix planning, channel marketing and in-store merchandising, development of marketing materials, order assistance and educating the distributors sales personnel about GoPro products.

In-store merchandising

Our in-store merchandising strategy focuses on our POP displays that continuously show GoPro content and present our products in an attractive manner. We provide our POP display in sizes ranging from two to four feet wide by five feet tall to retailers at no cost. In larger stores we are test marketing POP displays that are 12 feet wide by seven feet tall. Our capture devices are attractively arranged on the displays and the breadth of our offerings, combined with the associated content, communicate the wide range of uses for our products. As of December 31, 2013, we had over 25,000 POP displays in retail outlets.

Table of Contents

Marketing and advertising

Our marketing and advertising programs are focused on engaging consumers by exposing them to compelling GoPro content. We believe this approach enhances our brand while demonstrating the performance, durability and versatility of our products. Our marketing and advertising efforts span a wide range of consumer interests and leverage both traditional consumer marketing and lifestyle marketing strategies.

Consumer marketing

Social media plays an important role in our consumer marketing strategy. Our customers capture and share personal GoPro content on social media and content sharing platforms like Facebook, Instagram, Twitter, Vimeo and YouTube.

We promote our customers' best of UGC on the GoPro Network, such as through our Video of the Day and Photo of the Day. We also leverage our internal media production team to produce aspirational GoPro-branded content that we distribute through the GoPro Network.

We also integrate UGC and GoPro originally produced content into advertising campaigns across various platforms including television commercials, print, online, billboards and other out of home advertising, and at consumer and trade facing events. This content also supports our in-store channel marketing efforts, appearing on our POP displays and other in-store marketing materials.

Lifestyle marketing

Our lifestyle marketing programs focus on expanding GoPro brand awareness by engaging consumers through relationships with key influencers, event promotions and other customer outreach efforts. We cultivate strong relationships with influential athletes, celebrities, entertainers and brands, all of which use our products to create and share engaging content with their own fans and consumers. We also work directly with these partners to create compelling content that we leverage to our mutual benefit across the GoPro Network.

We believe it is important to establish ongoing, authentic relationships within the various markets that we address. We employ a team of lifestyle marketing managers who foster

Table of Contents

relationships within each of our markets and create marketing opportunities for our brand and deliver market feedback to our product development teams in order to refine existing products and influence future product design.

Consumer-facing events are another important aspect of our lifestyle marketing program. We regularly host product demonstrations in a GoPro-branded environment that we call the GoPro Experience. We host the GoPro Experience at over 90 consumer events such as the X Games, Supercross and film festivals, as well as at recreation destination resorts such as Vail Company resorts and the Whistler Blackcomb resort. The GoPro Experience increases brand awareness and builds personal relationships with consumers and key influencers. We distribute special coupons and promotions at many of these events, which drive consumers to our website and also help us measure the efficacy of our event marketing efforts. Below is a photo of the GoPro trade show booth.

Competition

The market for cameras and camcorders is highly competitive. We compete against established, well-known camera manufacturers such as Canon, Nikon, Olympus, Polaroid and Vivitar, large, diversified electronics companies such as JVC, Panasonic, Samsung, Sony and Toshiba, and specialty companies such as Garmin. Many of these companies have substantial market share, diversified product lines, well-established supply and distribution systems, strong worldwide brand recognition and significant financial, marketing, research and development and other resources.

We believe we compete favorably with these companies' products. Our durable and versatile product design facilitates increased functionality and wearability. In addition, by offering a variety of mounts and other accessories, we enable a wide range of consumer use cases that are difficult for other competing products to address. Further, we offer many professional-grade

Table of Contents

features at attractive consumer price points, including our SuperView mode, which allows a user to capture an immersive wide-angle perspective, and super high resolution video capability. Moreover, we believe we have achieved significant brand recognition in our target vertical markets. We also believe our years of experience working with active and influential consumers contributes to our ability to develop attractive products and establishes the authenticity of our brand, thereby differentiating us from current and potential competitors.

Smartphones and tablets with photo and video functionality have significantly displaced traditional camera sales. We believe that our capture devices enable differentiated use cases from mobile devices. In particular, we allow consumers to self-capture their experiences in even the most challenging of environments, such as on and in water and in other environments where mobile devices would be damaged, and to do so with their hands free to focus on the activity and not the capture device. However, it is possible that in the future the manufacturers of these devices may design them for use in a range of scenarios and conditions. In addition new companies may emerge and offer competitive products directly in our category.

Intellectual property

Intellectual property is an important aspect of our business, and our practice is to seek protection for our intellectual property as appropriate.

Our trademarks, including GoPro and Be a Hero, are a critical component of the value of our business. In addition, we hold many issued and pending utility and design patents for various aspects of our capture devices and the software that helps our customers manage, share and enjoy their content. Our patents cover areas that include physical structures, image processing, operational firmware and software, post-processing software, distribution software, mount and accessory structures, as well as the ornamental aspects of our capture devices. As of the date of this filing, we had 42 issued patents and 68 patent applications pending in the United States, and 15 corresponding issued patents and 12 patent applications pending in foreign countries. We cannot be certain that our patent applications will be issued or that any issued patents will provide us with any competitive advantage or will not be challenged by third parties. Our issued U.S. patents will expire between 2024 and 2032 and our issued foreign patents will expire between 2022 and 2038. We continually review our developments efforts to assess the existence and patentability of new intellectual property.

In addition to the foregoing protections, we generally control access to and use of our proprietary and other confidential information through the use of internal and external controls, including contractual protections with employees, contract manufacturers, distributors and others. Despite these protections, we may be unable to prevent third parties from using our intellectual property without our authorization, breaching any nondisclosure agreements with us, or independently developing products that are similar to ours, particularly in those countries where the laws do not protect our proprietary and intellectual property rights as fully as in the United States.

Employees

As of December 31, 2011, 2012 and 2013 and March 31, 2014, we had 147, 347, 646 and 718 employees, respectively. In the United States, as of March 31, 2014, we had 661 employees, including 283 in research and development, 232 in sales and marketing, 31 in manufacturing/logistics/fulfillment and 115 in general and administrative. Additionally as of March 31, 2014, we had 44 employees supporting finance, product development and manufacturing from Shenzhen,

Table of Contents

China and Hong Kong. We opened our first European office in Munich, Germany in late 2013, and as of March 31, 2014 we had 13 employees based in that office. None of our employees is currently covered by a collective bargaining agreement, and we have experienced no work stoppages. We consider our relationship with our employees to be good.

Facilities

Our executive and administrative offices are located in San Mateo, California, where we lease approximately 200,000 square feet of space pursuant to several leases that expire at various schedules through February 2019. We also have other offices in California, Shenzhen, China, Hong Kong and Munich, Germany.

Legal proceedings

On December 5, 2012, e.Digital Corporation filed a lawsuit against us in the United States District Court for the Southern District of California which alleges infringement of United States Patent No. 5,742,737, or the 737 patent, entitled Method for recording voice messages on flash memory in a hand held recorder, by certain of our cameras. We answered the complaint on February 4, 2013, denying infringement and validity, and asserting counterclaims for declaratory judgment of non-infringement and invalidity. e.Digital filed an amended complaint on June 4, 2013, adding allegations that we infringe U.S. Patent No. 5,491,774, or the 774 patent, entitled Handheld Record and Playback Device with Flash Memory. We answered the amended complaint on June 18, 2013, again denying infringement and validity, and asserting counterclaims for declaratory judgment of non-infringement and invalidity. e.Digital also sued a number of additional parties unrelated to us and our products asserting claims regarding the patents asserted against us and in some cases, two other patents.

We, along with a number of other defendants sued by e.Digital, moved to limit the scope of the 774 patent based on collateral estoppel resulting from an unfavorable claim construction ruling e.Digital received in an earlier action. On August 22, 2013, the court granted defendants motion and held that e.Digital was collaterally estopped from re-litigating the claim construction of the 774 patent. In light of that ruling, e.Digital agreed to stipulate to non-infringement of the 774 patent. The parties entered into a partial stipulated judgment of non-infringement as to the 774 patent, which was subsequently amended as a Federal Rule of Civil Procedure 54(b) judgment to allow an immediate appeal to the U.S. Court of Appeals for the Federal Circuit as to the Court's collateral estoppel ruling. The remainder of the case has been stayed pending the appeal. Under the stay, the case against us will not proceed until the appeal is completed. If the district court's collateral estoppel ruling is reversed on appeal, the case against us will proceed only as to the 737 patent. e.Digital filed its appeal on January 15, 2014. On March 10, 2014, the U.S. Court of Appeals for the Federal Circuit consolidated the appeal with several other pending appeals involving other defendants. e.Digital filed its opening brief on April 9, 2014. Our responsive brief is due May 22, 2014.

We are currently and in the future may continue to be subject to litigation, claims and assertions incidental to our business, including patent infringement litigation and product liability claims, as well as other litigation of a non-material nature in the ordinary course of business. We believe that the outcome of any existing litigation, either individually or in the aggregate, will not have a material impact on our business, financial condition, results of operations or cash flows.

Table of Contents**Management****Executive officers, other executive management and directors**

The following table provides information regarding our executive officers, other executive management and directors as of March 31, 2014:

Name	Age	Position(s)
<i>Executive Officers</i>		
Nicholas Woodman	38	Chief Executive Officer, President and Chairman
Jack Lazar	48	Chief Financial Officer
Nina Richardson	55	Chief Operating Officer
Paul Crandell	45	Vice President of Marketing
Sharon Zezima	49	General Counsel and Secretary
<i>Other Executive Management</i>		
Fabrice Barbier	48	Senior Vice President of Product Development
Stephen Baumer	41	Senior Vice President, Technology Fellow for Special Projects
George Jeff Brown	55	Vice President of Communications
Jonathan Harris	49	Senior Vice President of Sales
Ronald LaValley	48	Senior Vice President of Operations
<i>Non-Employee Directors</i>		
John Ball	51	Director
Edward Gilhuly(1)(2)(3)	54	Director
Kenneth Goldman(3)	64	Director
Michael Marks(1)(2)	63	Director

Lead independent director.

(1) Member of the governance and nominating committee.

(2) Member of the compensation committee.

(3) Member of the audit committee.

Executive officers

Nicholas Woodman founded our company and has served as our Chief Executive Officer, President and a member of the board of directors since inception and as Chairman since January 2014. Mr. Woodman holds a B.A. in Visual Arts from the University of California, San Diego. We believe Mr. Woodman's experience as the founder of GoPro and his knowledge of our products and customers give him the experience and

leadership capabilities that qualify him to serve as member of our board of directors.

Jack Lazar has served as our Chief Financial Officer since January 2014. From January 2013 to January 2014, he was an independent business and financial consultant. Mr. Lazar previously served as Senior Vice President, Corporate Development and General Manager of Qualcomm

Table of Contents

Atheros, Inc., a wireless technology company, from May 2011 to January 2013. From September 2003 until its acquisition by Qualcomm Incorporated, a digital wireless communications products and services, in May 2011, Mr. Lazar served as Chief Financial Officer and Secretary of Atheros Communications, Inc., a provider of communications semiconductor solutions, as well as other executive roles. From August 1999 to May 2002, Mr. Lazar served in a variety of positions at NetRatings, Inc., an Internet audience measurement and analysis company, most recently as Executive Vice President of Corporate Development, Chief Financial Officer and Secretary. He currently serves as a member of the board of directors at Silicon Laboratories Inc. Mr. Lazar is a Certified Public Accountant and holds a B.S. in Commerce with an emphasis in Accounting from Santa Clara University.

Nina Richardson has served as our Chief Operating Officer since February 2013. From March 2006 to January 2013, Ms. Richardson provided operations consulting and interim operations management services for a variety of companies as a self-employed independent consultant. From October 2008 to July 2009, Ms. Richardson was the Chief Administrative Officer of Riverwood Solutions, a supply chain solutions provider. From October 1999 to March 2005, Ms. Richardson held various executive positions at Flextronics International, Ltd., a manufacturing services company, including Vice President of Worldwide Design for Imaging and Printing, Vice President and Global Account Manager of the Hewlett Packard Account and Vice President and General Manager of Flextronics Cisco Business Unit. In November 2003, Ms. Richardson co-founded Three Rivers Energy, Inc., an energy services company, where she continues to serve as a managing director. Ms. Richardson holds a B.S. in Industrial Engineering from Purdue University and an Executive M.B.A. from Pepperdine University.

Paul Crandell has served as our Vice President of Marketing since August 2011. From January 2009 to August 2011, Mr. Crandell was the Co-founder of Q Sport Architects, a marketing consulting firm. From November 2007 to November 2008, Mr. Crandell was the Vice President of Marketing at ICON Aircraft, an aircraft design and production company. From November 1998 to October 2007, Mr. Crandell served in various positions at Red Bull North America, a beverage manufacturer, including as the Director of Sports Marketing from December 2005 to October 2007. Mr. Crandell holds a B.A. in Law and Society from the University of California, Santa Barbara.

Sharon Zezima has served as our General Counsel since September 2013 and as our Corporate Secretary since October 2013. From February 2012 to September 2013, Ms. Zezima was the Vice President and General Counsel at Marketo, Inc., a cloud-based marketing software company. Prior to joining Marketo, Ms. Zezima served in various positions at Electronic Arts Inc., a developer and distributor of interactive entertainment content and services, from September 2000 to February 2012, most recently as Vice President and Deputy General Counsel. Ms. Zezima holds a J.D. from the University of Chicago and an A.B. in American Studies from Smith College.

Other executive management

Fabrice Barbier has served as our Senior Vice President of Product Development since May 2013, and served as our Vice President of Engineering from February 2011 to February 2013. From February 2009 to February 2011, Mr. Barbier was the Senior Director of Technology Touch and Display at Flextronics and from July 2007 to January 2009, he was its Senior Director of Product Management. Since 2006, Mr. Barbier has been a director of Barbier Ebelmann, a precision mechanics company. Mr. Barbier holds a B.S. in Mechanical Engineering and a Masters in Mechanical Engineering from Ecole Nationale Supérieure de Mécanique et des Microtechniques.

Stephen Baumer has served as our Senior Vice President, Technology Fellow for Special Projects since May 2014, and served as our Chief Technology Officer since January 2009. From November

Table of Contents

2007 to January 2009, Mr. Baumer was the Head of Business Development in Europe for OpSource, Inc., an infrastructure provider for software-as-a-service companies. From October 2005 to October 2007, he was the Vice President of Marketing at PanTerra Networks, a developer of cloud-based unified communications solutions. From 2001 to 2004, Mr. Baumer was the Director of Technology at Intermix Media, Inc., an Internet-based marketing company that owned and developed MySpace until the company's acquisition by News Corp. in 2005. From 1999 until 2001 he was the Chief Technology Officer and co-founder of funBug.com, Inc., an online gaming, rewards and loyalty service. Mr. Baumer holds a B.S. in Linguistics from Georgetown University.

George Jeff Brown has served as our Vice President of Communications since January 2014. From April 2010 to October 2013, Mr. Brown was the Senior Vice President of Communications and Public Affairs for Electronic Arts, where he was also the Vice President of Communications and Public Affairs from December 1999 to April 2010. Mr. Brown also served in a variety of roles at PepsiCo Inc., a food and beverage company, most recently as Director of Public Relations in December of 1999. Mr. Brown holds a B.A. in Journalism from the University of Minnesota.

Jonathan Harris has served as our Senior Vice President of Sales since January 2014, and served as our Vice President of Sales from June 2010 to January 2014. From February 2009 to June 2010, Mr. Harris was the Vice President of Business Development at SugarSync, Inc., a cloud-based document storage company. From January 2007 to February 2009, Mr. Harris was the Vice President of Sales at Aliph, Inc., a provider of wearable technology and audio devices. From October 2005 to May 2007, Mr. Harris was the Director of Sales at Check Point Software Technologies Ltd., an Internet security services provider. Mr. Harris holds a B.A. in Marketing from the Southern Methodist University.

Ronald LaValley has served as our Senior Vice President of Operations since December 2011. From 2000 to December 2011, Mr. LaValley served in various positions at Flextronics, including the Vice President of Logistics and Vice President of Supply Chain Solutions, and most recently as the Vice President and General Manager of the Milpitas Operations. Mr. LaValley holds a B.S. in Mechanical Engineering and Aeronautical Engineering from the University of California, Davis and an M.B.A. from Santa Clara University.

Board of directors

John Ball has served on our board of directors since December 2011. Mr. Ball is the Founder and has served as Managing Partner of Steamboat Ventures, a venture capital firm. Mr. Ball was a senior executive in the Corporate Development group for The Walt Disney Company, a family entertainment and media company, from June 1996 to September 2000 and served as Director of Mergers & Acquisitions at Dames & Moore, a global engineering services company, from September 1992 to June 1996. Mr. Ball holds a B.A. in Biological Sciences from Tufts University and an M.B.A. from Harvard Business School. We believe Mr. Ball is qualified to serve as a member of our board of directors based on his experience on the boards of directors of numerous companies and based on his extensive corporate management experience.

Edward Gilhuly has served on our board of directors since March 2011. Mr. Gilhuly is the Founder and has served as Managing Partner at Sageview Capital, a private investment firm since May 2006. Prior to forming Sageview Capital, Mr. Gilhuly worked for 19 years at Kohlberg Kravis Roberts & Co., a private equity firm, where he was a Partner from 1994 to 2005 and a member of the firm's investment committee from its formation in 2000 until his departure in 2005. Mr. Gilhuly currently serves on the board of directors of Envivio, Inc. and two private companies

Table of Contents

as well as the board of trustees of Duke University. Mr. Gilhuly holds a B.A. in Economics and History from Duke University and an M.B.A. from Stanford University. We believe Mr. Gilhuly is qualified to serve as a member of our board of directors based on his experience on the boards of directors of numerous companies, his extensive corporate management experience and his significant experience in private equity and finance.

Kenneth Goldman has served on our board of directors since December 2013. Since October 2012, Mr. Goldman has served as the Chief Financial Officer of Yahoo! Inc., an Internet commerce website. From September 2007 to October 2012, he was Chief Financial Officer of Fortinet Inc., a provider of threat management technologies. From November 2006 to August 2007, Mr. Goldman served as Executive Vice President and Chief Financial Officer of Dexterra, Inc., a mobile enterprise software company. From August 2000 until March 2006, Mr. Goldman served as Senior Vice President of Finance and Administration and Chief Financial Officer of Siebel Systems, Inc., a supplier of customer software solutions and services. Mr. Goldman currently serves on the board of directors of NXP Semiconductor N.V., Gigamon Inc. and Yahoo! Japan, as well as the Trustee Emeritus of Cornell University. Mr. Goldman holds a B.A. in Electrical Engineering from Cornell University and an M.B.A. from Harvard Business School. We believe Mr. Goldman is qualified to serve as a member of our board of directors based on his experience on the boards of directors of numerous companies, his extensive executive experience and his service as a member of the Financial Accounting Standards Board Advisory Council. He provides a high level of expertise and significant leadership experience in the areas of finance, accounting and audit oversight.

Michael Marks has served on our board of directors since February 2011. Mr. Marks has been a Founding Partner of Riverwood Capital, LLC, a private equity firm, since March 2007. From August 2007 to November 2007, Mr. Marks was interim Chief Executive Officer of Tesla Motors, Inc., an electric vehicle designer and manufacturer. Mr. Marks was a senior adviser from January 2007 to January 2008 and a member from January 2006 to January 2007 at Kohlberg Kravis Roberts & Co., a private equity firm. From January 1994 to January 2006, Mr. Marks was Chief Executive Officer of Flextronics. Mr. Marks currently serves as a member of the board of directors of Schlumberger Limited and SanDisk Corporation, where he is currently Chairman. Mr. Marks holds a B.A. and an M.A. in Psychology from Oberlin College and an M.B.A. from Harvard Business School. We believe Mr. Marks is qualified to serve as a member of our board of directors based on his significant experience as the chief executive officer and member of the boards of directors of various companies, his expertise in financial and accounting matters and his expertise in private equity matters.

Board of directors

Pursuant to a voting agreement dated February 25, 2011, as amended, Messrs. Ball, Gilhuly, Goldman, Marks and Woodman were designated to serve as members of our board of directors. Messrs. Marks and Gilhuly were elected as the representatives of the Series A preferred stock, Messrs. Woodman and Goldman were elected by the holders of a majority of the shares of our common stock and Mr. Ball was elected by the holders of a majority of the shares of our preferred stock and common stock, voting together as a single class. The voting agreement will terminate upon the closing of this offering and none of our stockholders will have any special rights regarding the election or designation of members of our board of directors. Each of the current members of our board of directors, other than Mr. Ball, will continue to serve on our board of directors following the closing of the offering until the earlier of his or her resignation or his or her successor is duly elected or appointed. Mr. Ball has advised us of his intention to resign as a director upon the closing of this offering.

Table of Contents

In connection with the closing of this offering, we will file our restated certificate of incorporation. Although initially our board of directors will not be classified, our restated certificate of incorporation will provide that at such time as all shares of our Class B common stock have been converted into shares of Class A common stock, our board of directors will be divided into three classes, with staggered three-year terms. Only one class of directors will be elected at each annual meeting of our stockholders, with the other classes of directors continuing for the remainder of their respective three-year terms.

In addition, our amended and restated bylaws and restated certificate of incorporation will provide that only the board of directors may fill vacancies on the board of directors until the next annual meeting of stockholders. After our board of directors is classified, any additional directorships resulting from an increase in the number of directors will be distributed among the three classes so that, as nearly as possible, each class will consist of one-third of the total number of directors.

This classification of the board of directors and the provisions described above may have the effect of delaying or preventing changes in our control or management. See Description of capital stock Anti-takeover provisions Restated certificate of incorporation and amended and restated bylaw provisions.

Board leadership structure and risk oversight

Our board of directors does not have a policy on whether the role of the chairman and chief executive officer should be separate and believes that it should maintain flexibility to select a chairman and board leadership structure from time to time. Currently, the board of directors believes that it is in the best interest of the company and its stockholders for Mr. Woodman to serve in both roles given his knowledge of our company and industry. Because Mr. Woodman is our Chief Executive Officer and Chairman, our board of directors appointed Mr. Marks to serve as our lead independent director. As lead independent director, Mr. Marks will, among other responsibilities, preside over regularly scheduled meetings at which only our independent directors are present, serve as a liaison between the chairperson and the independent directors, and perform such additional duties as our board of directors may otherwise determine and delegate.

Our board of directors is primarily responsible for overseeing our risk management processes. Our board of directors, as a whole, determines the appropriate level of risk for our company, assesses the specific risks that we face and reviews management's strategies for adequately mitigating and managing the identified risks. Although our board of directors administers this risk management oversight function, our audit committee, governance and nominating committee and compensation committee support our board of directors in discharging its oversight duties and address risks inherent in their respective areas. We believe this division of responsibilities is an effective approach for addressing the risks we face and that our board leadership structure supports this approach.

Director independence

Our board of directors has undertaken a review of the independence of each director and considered whether each director has a material relationship with us that could compromise his or her ability to exercise independent judgment in carrying out his or her responsibilities. As a result of this review, our board of directors determined that Messrs. Ball, Gilhuly, Goldman and Marks, representing four of our five directors, are independent directors as defined under the

Table of Contents

applicable rules and regulations of the SEC and the listing requirements and rules of the NASDAQ Stock Market. In making these determinations, our board of directors reviewed and discussed information provided by the directors and us with regard to each director's business and personal activities and relationships as they may relate to us and our management, including the beneficial ownership of our capital stock by each non-employee director and the transactions involving them described in the section titled "Certain relationships and related party transactions."

Committees of the board of directors

Our board of directors has established an audit committee, a compensation committee and a nominating and governance committee. The composition and responsibilities of each committee are described below. Immediately prior to the closing of this offering, copies of the charters for each committee will be available on the investor relations portion of our website at www.gopro.com. Members serve on these committees until their resignations or removal.

Audit committee

Our audit committee is comprised of Mr. Goldman, who serves as the chairman, and Mr. Gilhuly, each of whom, our board of directors has determined, meets the requirements for independence under the current rules of the SEC and the NASDAQ Stock Market. Each member of our audit committee is financially literate. In addition, our board of directors has determined that Mr. Goldman is an audit committee financial expert within the meaning of Item 407(d) of Regulation S-K of the Securities Act. We intend to appoint a third independent director to our audit committee within one year from the date of this prospectus pursuant to the transition provisions of the rules of the NASDAQ Stock Market.

All audit services to be provided to us and all permissible non-audit services, other than de minimis non-audit services, to be provided to us by our independent registered public accounting firm will be approved in advance by our audit committee. Our audit committee, among other things:

selects a firm to serve as independent registered public accounting firm to audit our financial statements;

helps to ensure the independence of the independent registered public accounting firm;

discusses the scope and results of the audit with the independent registered public accounting firm, and reviews, with management and the independent accountants, our interim and year-end operating results;

develops procedures for employees to anonymously submit concerns about questionable accounting or audit matters;

considers the adequacy of our internal accounting controls and audit procedures; and

approves all audit and non-audit services to be performed by the independent registered public accounting firm.

Compensation committee

Our compensation committee is comprised of Mr. Marks, who serves as the chairman, and Mr. Gilhuly. Our board of directors has determined that each member of our compensation

Table of Contents

committee meets the requirements for independence under the current rules of the NASDAQ Stock Market. The purpose of our compensation committee is to discharge the responsibilities of our board of directors relating to compensation of our executive officers. Our compensation committee, among other things:

reviews and determines the compensation of our executive officers;

administers our stock and equity incentive plans;

reviews and makes recommendations to our board with respect to incentive compensation and equity plans; and

establishes and reviews general policies relating to compensation and benefits of our employees.

Nominating and governance committee

The nominating and governance committee is comprised of Mr. Gilhuly, who serves as the chairman, and Mr. Marks. Our board of directors has determined that immediately prior to the effectiveness of this offering, the composition of our nominating and governance committee will meet the requirements for independence under the current rules of the NASDAQ Stock Market. Our nominating and governance committee, among other things:

identifies, evaluates and recommends nominees to our board of directors and committees of our board of directors;

conducts searches for appropriate directors;

evaluates the performance of our board of directors and of individual directors;

considers and makes recommendations to the board of directors regarding the composition of the board and its committees and related compensation;

reviews related party transactions and proposed waivers of the code of conduct;

reviews developments in corporate governance practices;

evaluates the adequacy of our corporate governance practices and reporting; and

makes recommendations to our board of directors concerning corporate governance matters.

Code of business conduct and ethics

In connection with this offering, we will adopt a code of business conduct and ethics that applies to all of our employees, officers and directors. Immediately prior to the effectiveness of this offering, the full text of our code of business conduct and ethics will be posted on the investor

relations section of our website at www.gopro.com.

Compensation committee interlocks and insider participation

None of the members of our compensation committee has at any time been one of our officers or employees. None of our executive officers currently serves, or in the past has served, as a member of the board of directors or compensation committee (or other board committee

Table of Contents

performing equivalent functions) of any entity that has one or more of its executive officers serving on our board of directors or our compensation committee.

Director compensation

We have no formal policy relating to the granting of equity awards to our directors, however, the non-employee members of our board of directors who are not affiliated with our institutional investors generally receive stock option awards upon commencement of their service as directors. The following table presents the total compensation earned in the year ended December 31, 2013 for each non-employee member of our board of directors. Other than described below, we did not pay any fees to, reimburse any expenses of, make any equity awards or non-equity awards to, or pay any other compensation to the non-employee members of our board of directors. Nicholas Woodman, our Chief Executive Officer, received no compensation for his service as a director.

The following table provides information regarding compensation of our non-employee directors for 2013.

Name and principal position	Fees earned or paid in cash (\$)	Option awards (\$)(1)(2)	All other compensation (\$)	Total (\$)
Kenneth Goldman	\$	\$ 911,427	\$	\$ 911,427
John Ball				
Edward Gilhuly				
Michael Marks				
Jill Woodman(3)				

(1) The amounts reported in this column represent the aggregate grant date value of option awards made to directors in 2013 computed in accordance with FASB ASC Topic 718.

(2) The option vests as to 1/4th of the shares of Class B common stock underlying the option on the first anniversary of the vesting commencement date and as to 1/48th of the shares underlying the option each month thereafter. In addition, in the event of a qualified acquisition, the option shall vest as to an additional 1/4th of the total shares underlying the option.

(3) Jill Woodman resigned as a member of our board of directors effective as of [].

We have not yet determined our director compensation arrangements to be in effect following the closing of this offering. However, in the near future we intend to develop a policy to provide customary compensation to our non-employee directors for their services in that capacity following the completion of this offering.

Table of Contents**Executive compensation****2013 summary compensation table**

The following table provides information regarding compensation received by our named executive officers for 2013.

Name and Principal Position	Salary		Option awards (\$)(3)	All other compensation (\$)	Total (\$)
	(\$)(1)	Bonus (\$)(2)			
Nicholas Woodman Chief Executive Officer	\$ 800,000	\$ 1,003,200	\$	\$ 49,591(4)	\$ 1,852,791
Nina Richardson Chief Operations Officer	287,986	120,649	3,253,337		\$ 3,661,972
Paul Crandell Vice President, Marketing	267,981	116,909	542,628		\$ 927,518

- (1) The amounts in this column include any salary contributed by the named executive officer to our 401(k) plan.
- (2) The amounts reported in this column represent the named executive officer's bonus awards, which we awarded on a discretionary basis based on the compensation committee's determination of individual and overall company performance.
- (3) The amounts reported in this column represent the aggregate grant date value of option awards made to the named executive officer in 2013 computed in accordance with FASB ASC Topic 718 and excluding the effect of estimated forfeitures.
- (4) The amount reported in this column represents the cost of Mr. Woodman's personal use of cars provided by us, including depreciation attributed to his personal use of the cars, maintenance and repair costs, insurance premiums and registration fees.

Outstanding equity awards at December 31, 2013

The following table provides information regarding each unexercised stock option held by each of our named executive officers as of December 31, 2013.

Name	Number of securities underlying unexercised options(1)		Option exercise price(2)	Option expiration date
	Exercisable	Unexercisable		
Nicholas Woodman				
Nina Richardson	0	450,000(3)	\$ 13.7200	02/18/2023
Paul Crandell	171,700	125,000	\$ 1.5167	10/25/2021
Paul Crandell	0	75,000	\$ 13.7200	02/18/2023

Edgar Filing: GoPro, Inc. - Form S-1

- (1) Except as otherwise described in these footnotes, all options vest as to 1/4th of the shares of Class B common stock underlying the options on the first anniversary of the vesting commencement date and as to 1/48th of the shares underlying the option each month thereafter. The vesting commencement date for Ms. Richardson's option grant is February 12, 2013 and the vesting commencement date for Mr. Crandell's option grants are August 15, 2011 and February 19, 2013, respectively. Any options exercised prior to their vesting date would be subject to forfeiture as specified in the 2010 Plan. In addition, if the executive is subject to a qualified termination in connection with a change in control, then the shares underlying any unvested equity award shall vest immediately prior to the termination of the executive, pursuant to the severance and change in control policy adopted in January 2014 (described below).
- (2) Represents the fair market value of a share of our Class B common stock, as determined by our board of directors, on the grant date. See the section titled Management's discussion and analysis of financial condition and results of operations Critical accounting policies and estimates Stock-based compensation for a discussion of the valuation of our Class B common stock.
- (3) In addition to the time-based vesting indicated in footnote (1), if we achieve the goals approved by our board of directors under our 2014 Operating Plan, then an additional 25,000 of the shares will become vested and exercisable on February 12, 2015.

Pension benefits

None of our named executive officers is a participant in any defined benefit plans.

Table of Contents

Nonqualified deferred compensation

We do not offer any nonqualified deferred compensation plans.

Employment, severance and change in control agreements

Nina Richardson

In February 2013, we entered into an offer letter with Nina Richardson for her services as our Chief Operating Officer. The offer letter provided that Ms. Richardson's option to purchase 450,000 shares of Class B common stock would vest 25% on the 12 month anniversary of her commencement of employment and in equal monthly installments over the 36 months thereafter subject to her continuous service. In addition, the offer letter provides that 25,000 option shares would vest on the two-year anniversary of her commencement of employment in the event that we achieve our 2014 Operating Plan as approved and certified by our board of directors subject to her continuous service. In addition, the offer letter provides that in the event of a qualified termination within 12 months following a change of control, Ms. Richardson's stock option would receive 12 months of accelerated vesting. Subsequent to the execution of the offer letter, we entered into a Change in Control Severance Agreement with Ms. Richardson. The terms of the Change in Control Severance Agreement are described in detail below and it provides that in the event of a qualified termination following a change of control, Ms. Richardson shall be entitled to acceleration in full of all of her unvested option shares.

Paul Crandell

In July 2011, we entered into an offer letter with Paul Crandell for his services as Vice President, Brand Marketing. The offer letter provided that Mr. Crandell's option to purchase 300,000 shares of Class B common stock would be subject to the terms and conditions applicable to options granted under the 2010 Plan, as described in the 2010 Plan, and the applicable stock option agreement made available to Mr. Crandell at the time of his grant. Subsequent to the execution of the offer letter, we entered into a Change in Control Severance Agreement with Mr. Crandell. The terms of the Change in Control Severance Agreement are described in detail below and it provides that in the event of a qualified termination following a change of control, Mr. Crandell shall be entitled to acceleration in full of all of his outstanding unvested option shares.

Potential payments upon termination or change in control

In January 2014, we adopted a severance and change in control policy applicable to our executive officers and certain other employees pursuant to which each executive officer entered into a severance agreement. The severance agreement with each of our named executive officers has a term ending December 31, 2016 with automatic three-year renewals unless we give at least three months notice of non-renewal and requires us to pay certain benefits upon a qualifying termination, which occurs when the employee's employment is terminated by us without cause, or he or she resigns with good reason, within three months preceding or 12 months following a change in control. Under his agreement, Mr. Woodman would be eligible for severance benefits of 18 months of his then-current base pay, 150% of the greater of his target bonus or his most recent annual bonus, and \$3,000 per month for 18 months in lieu of employee benefits upon a qualifying termination. Under her or his respective agreement, each of Ms. Richardson and Mr. Crandell would be eligible for severance benefits of 12 months of then-current base pay, 100% of her or his target bonus or, if greater, her or his most recent annual bonus, and \$3,000 per month for 12 months in lieu of employee benefits upon a qualifying termination.

Table of Contents

In addition, upon a qualifying termination of Ms. Richardson or Mr. Crandell, the shares underlying all unvested equity awards held by such officer will become vested and exercisable in full immediately prior to such termination. The severance payments under the change of control severance agreements with each of our executive officers are contingent upon such executive officer's execution, delivery and non-revocation of a release and waiver of claims satisfactory to us within 45 days of such executive officer's separation from service.

Employee benefit plans

2010 equity incentive plan

Our board of directors approved, and our stockholders adopted, our 2010 Plan in August 2010. Our 2010 Plan provides for the grant of incentive stock options, within the meaning of Section 422 of the Code, to our employees or any parent or subsidiary's employees, and for the grant of nonstatutory stock options, stock appreciation rights, restricted stock and RSUs to our employees, directors and consultants and any parent or subsidiary's employees and consultants. Stock appreciation rights, restricted stock and RSUs may also be granted under the 2010 Plan. As of December 31, 2013, an aggregate of 32,420,000 shares of our Class B common stock are reserved for issuance under our 2010 Plan. Upon the signing of the underwriting agreement relating to this offering, no further equity grants will be made under our 2010 Plan. We intend to grant all future equity awards under the 2014 Plan and the ESPP. However, all stock options and RSUs granted under our 2010 Plan will continue to be governed by the terms of our 2010 Plan. The purposes of the 2010 Plan are to attract, retain and motivate eligible persons whose present and potential contributions are important to our growth by offering such eligible persons an opportunity to participate in our future performance through the grant of awards.

Administration. Subject to the terms of the 2010 Plan, our board of directors or an authorized committee, referred to as the compensation committee, has the discretion to make all decisions implementing the 2010 Plan including the power to determine recipients, dates of grant, the numbers and types of stock awards to be granted and the terms and conditions of the stock awards, including the period of their exercisability and vesting. Subject to the limitations set forth below, the compensation committee will also determine the exercise price of options granted, and the consideration (if any) to be paid for restricted stock awards.

Stock options. Incentive and nonstatutory stock options are granted pursuant to stock option agreements adopted by the compensation committee. Generally, the exercise price for an incentive stock option or a nonstatutory stock option cannot be less than 100% of the fair market value of the Class B common stock subject to the option on the date of grant. No incentive stock option may be granted to any person who, at the time of the grant, owns or is deemed to own stock comprising more than 10% of our total combined voting power or that of any of our affiliates unless (a) the option exercise price is at least 110% of the fair market value of the stock subject to the option on the date of grant and (b) the term of the incentive stock option does not exceed five years from the date of grant. Options granted under the 2010 Plan generally vest over a four-year period. A stock option agreement may provide for early exercise prior to vesting and rights of repurchase.

The term of stock options granted under the 2010 Plan may not exceed 10 years. Unless the terms of an optionholder's stock option agreement provides for earlier or later termination, if an optionholder's service relationship with us, or any affiliate of ours, ceases due to disability or death, the optionholder, or his or her beneficiary, may exercise any vested options up to the

Table of Contents

12 months after the date the service relationship ends. Unless the terms of an optionholders' stock option agreement provides for earlier or later termination, if an optionholder's service relationship with us, or any affiliate of ours, ceases without cause for any reason other than disability or death, the optionholder may exercise any vested options for up to three months. In no event may an option be exercised after its expiration date.

The forms of consideration for the purchase of our Class B common stock under the 2010 Plan that the compensation committee may approve include cash, check, full recourse promissory note, cancellation of indebtedness, waiver of accrued compensation, shares of stock already owned, consideration paid through a formal cashless exercise program or same day sale program, any other form of consideration approved by the compensation committee or any combination of such consideration.

Limitations. The aggregate fair market value, determined at the time of grant, of shares of our Class B common stock with respect to incentive stock options that are exercisable for the first time by an optionholder during any calendar year under all of our stock plans may not exceed \$100,000. The options or portions of options that exceed this limit are treated as nonstatutory stock options.

Stock appreciation rights. Our 2010 Plan also permits the issuance of stock appreciation rights that provide for a payment, or payments, in cash or shares of our Class B common stock, to the holder based upon the increase in the fair market value of our Class B common stock on the date of exercise from the stated exercise price (subject to any maximum number of shares as may be specified in the applicable award agreement). Stock appreciation rights expire under the same rules that apply to stock options.

Restricted stock. Our 2010 Plan also permits the issuance of restricted stock. Restricted stock represents the purchase of our Class B common stock that is subject to our right of repurchase in the event of a termination of the stockholder's service relationship with us.

Restricted stock units. Our 2010 Plan also permits the issuance of restricted stock units, or RSUs, to our service providers. RSUs granted under our 2010 Plan represent the right to receive shares of our Class B common stock or cash payment at a specified future date and may be subject to vesting requirements.

Transferability. Unless the compensation committee permits otherwise, stock may not be transferred, except by will or by the laws of descent or distribution. However, nonstatutory stock options may be transferred to immediate family members or certain trusts.

Changes to capitalization. In the event that there is a specified type of change in our capital structure not involving the receipt of consideration by us, such as a stock split, stock dividend or other recapitalization, the 2010 Plan provides for the proportional adjustment of the number of shares reserved under the 2010 Plan and the number of shares and exercise or purchase price, if applicable, of all outstanding stock awards.

Corporate transactions. Unless otherwise provided in the award agreement, in the event of certain corporate transactions, any or all outstanding stock awards under the 2010 Plan may be assumed or substituted for by any surviving entity. If the surviving entity elects not to assume or substitute for such awards, such stock awards will terminate without vesting acceleration. In the event of our dissolution or liquidation, all outstanding options and stock appreciation rights under the 2010 Plan will terminate immediately prior to such event without accelerating vesting.

Table of Contents

Additional provisions. Our board of directors has the authority to amend, alter, suspend or terminate the 2010 Plan. However, no amendment or termination of the plan may adversely affect any rights under awards already granted to a participant without the affected participant's consent. No equity awards will be made under the 2010 Plan after the effective date of this offering and our 2014 Plan.

2014 equity incentive plan

We expect our board of directors to adopt our 2014 Plan, subject to stockholder approval, to become effective the day before the effective date of this prospectus. The 2014 Plan will terminate in 2024, unless sooner terminated by our board of directors. The purpose of the 2014 Plan is to attract, retain and motivate selected employees, consultants and directors through the granting of stock-based compensation awards and cash-based performance bonus awards. The 2014 Plan is also designed to permit us to make cash-based awards and equity-based awards intended to qualify as performance-based compensation under Section 162(m) of the Code.

Stock awards. The 2014 Plan provides for the grant of incentive stock options, nonstatutory stock options, stock appreciation rights, restricted stock awards, RSUs, performance-based stock awards and other forms of equity compensation, or collectively, stock awards. In addition, the 2014 Plan provides for the grant of performance cash awards. Incentive stock options may be granted only to employees, subject to certain limitation described below. All other awards may be granted to employees, including officers, as well as directors and consultants.

The principal features of the 2014 Plan are summarized below. This summary is qualified in its entirety by reference to the text of the 2014 Plan, which is filed as an exhibit to the registration statement of which this prospectus is a part.

Share reserve. We reserved _____ shares of our Class A common stock to be issued under our 2014 Plan. The number of shares reserved for issuance under our 2014 Plan will increase automatically on January 1 of each of our fiscal years beginning January 1, 2015 through the termination of the plan by the number of shares equal to 3% of the total outstanding shares of our Class A common stock as of the immediately preceding December 31. However, our board of directors or compensation committee may reduce the amount of the increase in any particular year. In addition, shares reserved but not issued or subject to outstanding grants under our 2010 Plan on the date of this prospectus will be available for grant and issuance under our 2014 Plan as Class A common stock and the following shares will again be available for grant and issuance under our 2014 Plan as Class A common stock:

shares subject to options or stock appreciation rights granted under our 2014 Plan that cease to be subject to the option or stock appreciation right for any reason other than exercise of the option or stock appreciation right;

shares subject to awards granted under our 2014 Plan that are subsequently forfeited or repurchased by us at the original issue price;

shares subject to awards granted under our 2014 Plan that otherwise terminate without shares being issued;

shares surrendered, cancelled, or exchanged for cash or a different award (or combination thereof);

shares issuable upon the exercise of options or subject to other awards under our 2010 Plan prior to the date of this prospectus that cease to be subject to such options or other awards by forfeiture or otherwise after the date of this prospectus;

Table of Contents

shares issued under our 2010 Plan that are forfeited or repurchased by us after the date of this prospectus; and

shares subject to awards under our 2010 Plan that are used to pay the exercise price of an option or withheld to satisfy the tax withholding obligations related to any award.

As of the date hereof, no shares of our Class A common stock have been issued under the 2014 Plan. No person may be granted stock awards covering more than 500,000 shares of our Class A common stock under the 2014 Plan during any calendar year pursuant to stock options or stock appreciation rights other than a new employee of ours, who will be eligible to receive no more than 1,000,000 shares of our Class A common stock under the 2014 Plan in the calendar year in which the employee commences employment. Such limitations are designed to help assure that any deductions to which we would otherwise be entitled with respect to such stock awards will not be subject to the \$1,000,000 limitation on the income tax deductibility of compensation paid per covered executive officer imposed by Section 162(m) of the Code.

Administration. Our 2014 Plan will be administered by our compensation committee, all of the members of which are outside directors as defined under applicable federal tax laws, or by our board of directors acting in place of our compensation committee. The compensation committee will have the authority to construe and interpret our 2014 Plan, grant awards and make all other determinations necessary or advisable for the administration of the plan.

The compensation committee has the authority to reprice any outstanding stock award (by reducing the exercise price of any outstanding option, canceling an option in exchange for cash or another equity award or any other action that may be deemed a repricing under generally accepted accounting provisions) under the 2014 Plan without the approval of our stockholders.

Stock options. Incentive and nonstatutory stock options are granted pursuant to incentive and nonstatutory stock option agreements adopted by the compensation committee. The compensation committee determines the exercise price for a stock option, within the terms and conditions of the 2014 Plan, provided that the exercise price of a stock option cannot be less than 100% of the fair market value of our Class A common stock on the date of grant, except where a higher exercise price is required in the case of certain incentive stock options, as described below.

We anticipate that in general, options will vest over a four-year period. Options may vest based on time or achievement of performance conditions. Our compensation committee may provide for options to be exercised only as they vest or to be immediately exercisable with any shares issued on exercise being subject to our right of repurchase that lapses as the shares vest. The maximum term of options granted under our 2014 Plan is 10 years. The compensation committee determines the term of stock options granted under the 2014 Plan, up to a maximum of 10 years, except in the case of certain incentive stock options, as described below. Unless the terms of an optionholder's stock option agreement provide otherwise, if an optionholder's relationship with us, or any of our affiliates, ceases for any reason other than for cause, disability or death, the optionholder may exercise any vested options for a period of three months following the cessation of service. If an optionholder's service relationship with us is terminated for cause, then the option terminates immediately. If an optionholder's service relationship with us or any of our affiliates ceases due to disability or death, or an optionholder dies within the period (if any) specified in the award agreement following cessation of service, the optionholder or a beneficiary may exercise any vested options for a period of at least six months in the event of disability or death. The option term may be extended in the event that exercise of the option

Table of Contents

following termination of service is prohibited by applicable securities laws. In no event, however, may an option be exercised beyond the expiration of its maximum term.

Acceptable consideration for the purchase of Class A common stock issued upon the exercise of a stock option will be determined by the compensation committee and may include (a) cash, check, bank draft or money order, (b) a broker-assisted cashless exercise, (c) the tender of Class A common stock or Class B common stock previously owned by the optionholder, (d) cancellation of our indebtedness to the optionholder, (e) waiver of compensation due to the optionholder for services rendered and (f) other legal consideration approved by the compensation committee.

Unless the compensation committee provides otherwise, options generally are not transferable except by will, the laws of descent and distribution, or pursuant to a domestic relations order. An optionholder may, however, designate a beneficiary who may exercise the option following the optionholder's death.

Limitations on incentive stock options. Incentive stock options may be granted only to our employees. The aggregate fair market value, determined at the time of grant, of shares of our Class A common stock with respect to incentive stock options that are exercisable for the first time by an optionholder during any calendar year under all of our stock plans may not exceed \$100,000. No incentive stock option may be granted to any person who, at the time of the grant, owns or is deemed to own stock comprising more than 10% of our total combined voting power or that of any of our affiliates unless (a) the option exercise price is at least 110% of the fair market value of the stock subject to the option on the date of grant and (b) the term of the incentive stock option does not exceed five years from the date of grant.

Restricted stock awards. Restricted stock awards are granted pursuant to restricted stock award agreements adopted by our compensation committee. A restricted stock award is an offer by us to sell shares of our Class A common stock subject to restrictions. The price, if any, of a restricted stock award will be determined by our compensation committee. Restricted stock awards may be granted in consideration for (a) cash, check, bank draft or money order, (b) past or future services rendered to us or our affiliates, or (c) any other form of legal consideration determined by the compensation committee. Shares of Class A common stock acquired under a restricted stock award may, but need not, be subject to a share repurchase option or forfeiture restriction in our favor in accordance with a vesting schedule to be determined by the compensation committee. Rights to acquire shares under a restricted stock award may be transferred only upon such terms and conditions as set by the compensation committee. Except as otherwise provided in the applicable award agreement, restricted stock awards that have not vested will be forfeited or subject to repurchase upon the participant's cessation of continuous service for any reason.

Restricted stock unit awards. RSU awards are granted pursuant to restricted stock unit award agreements adopted by our compensation committee. RSUs represent the right to receive shares of our Class A common stock at a specified date in the future, subject to forfeiture of that right because of termination of the holder's services to us or the holder's failure to achieve certain performance conditions. If a RSU has not been forfeited, then on the date specified in the RSU agreement, we may deliver to the holder of the RSU whole shares of our Class A common stock, which may be subject to additional restrictions, cash or a combination of our Class A common stock and cash. Our compensation committee may also permit the holders of the RSUs to defer payment to a date or dates after the RSU is earned, provided that the terms of the RSU and any deferral satisfy the requirements of Section 409A of the Code.

Table of Contents

Stock appreciation rights. Stock appreciation rights are granted pursuant to stock appreciation rights agreements adopted by the compensation committee. Stock appreciation rights provide for a payment, or payments, in cash or shares of our Class A common stock, to the holder based upon the increase in the fair market value of our Class A common stock on the date of exercise from the stated exercise price (subject to any maximum number of shares as may be specified in the applicable award agreement). The payment may occur upon the exercise of a stock appreciation right or deferred with such interest or dividend equivalent, if any, as our compensation committee determines, provided that the terms of the stock appreciation right and any deferral satisfy the requirements of Section 409A of the Code. The compensation committee determines the exercise price for a stock appreciation right which generally cannot be less than 100% of the fair market value of our Class A common stock on the date of grant. Stock appreciation rights may vest based on time or achievement of performance conditions. Stock appreciation rights expire under the same rules that apply to stock options.

Performance awards. The 2014 Plan permits the grant of performance stock awards and performance cash awards that may qualify as performance-based compensation that is not subject to the \$1,000,000 limitation on the income tax deductibility of compensation paid per covered executive officer imposed by Section 162(m) of the Code. To assure that the compensation attributable to performance-based awards will so qualify, our committee can structure such awards so that stock will be issued or paid pursuant to such award only upon the achievement of certain pre-established performance goals during a designated performance period. The maximum benefit that may be granted to a participant in any calendar year may not exceed \$1,000,000.

Other stock awards. Our compensation committee may grant other awards based in whole or in part by reference to our Class A common stock. The compensation committee will set the number of shares under the award and all other terms and conditions of such awards.

Changes to capital structure. In the event that there is a specified type of change in our capital structure, such as a stock split, appropriate adjustments will be made to (a) the class and maximum number of shares reserved under the 2014 Plan, (b) the class and maximum number of shares subject to options, stock appreciation rights and performance stock awards that can be granted in a calendar year, (c) the class and maximum number of shares that may be issued upon exercise of incentive stock options, (d) the maximum number of shares that may be awarded to a member of our board of directors, and (e) the number of shares and exercise price, if applicable, of all outstanding stock awards.

Corporate transactions. The 2014 Plan provides that, in the event of a sale, lease or other disposition of all or substantially all of the assets of us or specified types of mergers or consolidations (each, a corporate transaction), outstanding awards under our 2014 Plan may be assumed or replaced by any surviving or acquiring corporation; the surviving or acquiring corporation may substitute similar awards for those outstanding under the 2014 Plan; outstanding awards may be settled for the full value of such outstanding award (whether or not then vested or exercisable) in cash or securities of the successor entity with payment deferred until the date or dates the award would have become exercisable or vested; or outstanding awards may be terminated for no consideration. Our board of directors has the discretion to provide that a stock award under the 2014 Plan will immediately vest as to all or any portion of the shares subject to the stock award at the time of a corporate transaction or in the event a participant's service with us or a successor entity is terminated actually or constructively within a designated period following the occurrence of the transaction. Stock awards held by participants

Table of Contents

under the 2014 Plan will not vest automatically on such an accelerated basis unless specifically provided in the participant's applicable award agreement.

Plan suspension or termination. Our board of directors has the authority to suspend or terminate the 2014 Plan at any time provided that such action does not impair the existing rights of any participant.

Securities laws and federal income taxes. The 2014 Plan is designed to comply with various securities and federal tax laws as follows:

Securities laws. The 2014 Plan is intended to conform to all provisions of the Securities Act of 1933, as amended, and the Exchange Act and any and all regulations and rules promulgated by the SEC thereunder, including, without limitation, Rule 16b-3. The 2014 Plan will be administered, and options will be granted and may be exercised, only in such a manner as to conform to such laws, rules and regulations.

Section 409A of the Code. Certain awards under the 2014 Plan may be considered nonqualified deferred compensation for purposes of Section 409A of the Code, which imposes certain additional requirements regarding the payment of deferred compensation. Generally, if at any time during a taxable year a nonqualified deferred compensation plan fails to meet the requirements of Section 409A, or is not operated in accordance with those requirements, all amounts deferred under the 2014 Plan and all other equity incentive plans for the taxable year and all preceding taxable years, by any participant with respect to whom the failure relates, are includible in gross income for the taxable year to the extent not subject to a substantial risk of forfeiture and not previously included in gross income. If a deferred amount is required to be included in income under Section 409A, the amount also is subject to interest and an additional income tax. The interest imposed is equal to the interest at the underpayment rate plus one percentage point, imposed on the underpayments that would have occurred had the compensation been includible in income for the taxable year when first deferred, or if later, when not subject to a substantial risk of forfeiture. The additional federal income tax is equal to 20% of the compensation required to be included in gross income. In addition, certain states, including California, have laws similar to Section 409A, which impose additional state penalty taxes on such compensation.

Section 162(m) of the Code. In general, under Section 162(m) of the Code, income tax deductions of publicly held corporations may be limited to the extent total compensation (including, but not limited to, base salary, annual bonus, and income attributable to stock option exercises and other non-qualified benefits) for certain executive officers exceeds \$1,000,000 (less the amount of any excess parachute payments as defined in Section 280G of the Code) in any taxable year of the corporation. However, under Section 162(m), the deduction limit does not apply to certain performance-based compensation established by an independent compensation committee that is adequately disclosed to, and approved by, stockholders. In particular, stock options and stock appreciation rights will satisfy the performance-based compensation exception if the awards are made by a qualifying compensation committee, the 2014 Plan sets the maximum number of shares that can be granted to any person within a specified period and the compensation is based solely on an increase in the stock price after the grant date. Specifically, the option exercise price must be equal to or greater than the fair market value of the stock subject to the award on the grant date.

We have attempted to structure the 2014 Plan in such a manner that the compensation attributable to stock options, stock appreciation rights and other performance-based awards which meet the

Table of Contents

other requirements of Section 162(m) will not be subject to the \$1,000,000 limitation. We have not, however, requested a ruling from the IRS or an opinion of counsel regarding this issue.

2014 employee stock purchase plan

We expect our board of directors to adopt our ESPP, subject to stockholder approval, to become effective upon the effectiveness of this offering. The purpose of the ESPP is to assist us in retaining the services of new employees and securing the services of new and existing employees while providing incentives for such individuals to exert maximum efforts toward our success.

Share reserve. Following this offering, the ESPP authorizes the issuance of _____ shares of our Class A common stock pursuant to purchase rights granted to our employees or to employees of our subsidiaries. The number of shares of our Class A common stock reserved for issuance will automatically increase on January 1 of each calendar year, from January 1, 2015 through January 1, 2024, by the lesser of 1% of the total number of shares of our Class A common stock outstanding on December 31 of the preceding calendar year or a number determined by our board of directors. The ESPP is intended to qualify as an employee stock purchase plan within the meaning of Section 423 of the Code. As of the date hereof, no shares of our Class A common stock have been purchased under the ESPP. No more than _____ shares of our Class A common stock may be issued under our ESPP, and no other shares may be added to this plan without the approval of our stockholders.

Administration. Our board of directors has delegated its authority to administer the ESPP to our compensation committee. The ESPP is implemented through a series of offerings of purchase rights to eligible employees. Under the ESPP, we may specify offerings with durations of not more than 27 months, and may specify shorter purchase periods within each offering. Each offering will have one or more purchase dates on which not more than 2,500 shares of our Class A common stock will be purchased for employees participating in the offering. An offering may be terminated under certain circumstances.

Payroll deductions. Generally, all regular employees, including executive officers, employed by us or by any of our designated affiliates, may participate in the ESPP and may contribute, normally through payroll deductions, up to 15% of their earnings for the purchase of our Class A common stock under the ESPP. Unless otherwise determined by our board of directors, Class A common stock will be purchased for accounts of employees participating in the ESPP at a price per share equal to the lower of (a) 85% of the fair market value of a share of our Class A common stock on the first date of an offering or (b) 85% of the fair market value of a share of our Class A common stock on the date of purchase.

Limitations. Employees may have to satisfy one or more of the following service requirements before participating in the ESPP, as determined by our board of directors: (a) customarily employed for more than 20 hours per week, (b) customarily employed for more than five months per calendar year or (c) continuous employment with us or one of our affiliates for a period of time not to exceed two years. No holder will have the right to purchase our shares at a rate which, when aggregated with purchase rights under all our employee stock purchase plans that are also outstanding in the same calendar year(s), have a fair market value of more than \$25,000, determined in accordance with Section 423 of the Code, for each calendar year in which that right is outstanding. Finally, no employee will be eligible for the grant of any purchase rights under the ESPP if immediately after such rights are granted, such employee has voting power over 5% or more of our outstanding capital stock measured by vote or value pursuant to Code Section 424(d).

Table of Contents

Changes to capital structure. In the event that there occurs a change in our capital structure through such actions as a stock split, merger, consolidation, reorganization, recapitalization, reincorporation, stock dividend, dividend in property other than cash, liquidating dividend, combination of shares, exchange of shares, change in corporate structure or similar transaction, the board of directors will make appropriate adjustments to (a) the number of shares reserved under the ESPP, (b) the maximum number of shares that may be issued under the ESPP and (c) the number of shares and purchase price of all outstanding purchase rights.

Corporate transactions. In the event of a change in control transaction, each outstanding right to purchase shares under our ESPP may be assumed or substituted by our successor. In the event that the successor refuses to assume or substitute the outstanding purchase rights, any offering periods that commenced prior to the closing of the proposed change in control transaction will be shortened and terminated on a new purchase date. The new purchase date will occur prior to the closing of the proposed change in control and our ESPP will then terminate on the closing of the proposed change in control.

Plan amendment or termination. Our board of directors has the authority to amend or terminate the ESPP at any time. If our board of directors determines that the amendment or termination of an offering is in our best interests and the best interests of our stockholders, then our board of directors may terminate any offering on any purchase date, establish a new purchase date with respect to any offering then in progress, terminate any offering and return any money contributed by participants that has not been used to purchase shares back to the participants. We will obtain stockholder approval of any amendment to the ESPP as required by applicable law.

401(k) plan

We maintain a defined contribution employee retirement plan for our U.S. employees. The plan is intended to qualify as a tax-qualified 401(k) plan so that contributions to the 401(k) plan, and income earned on such contributions, are not taxable to participants until withdrawn or distributed from the 401(k) plan. Participants may make pre-tax contributions to the 401(k) plan from their eligible earnings up to the statutorily prescribed annual limit on pre-tax contributions under the Code. The 401(k) plan provides that each participant may contribute up to 100% of eligible compensation on a pre-tax or, in the case of the Roth 401(k), after tax basis into their accounts. Participants who are at least 50 years old may also contribute additional amounts based on the statutory limits for catch-up contributions. Under the 401(k) plan, each employee is fully vested in his or her deferred salary contributions. Employee contributions are held and invested by the plan's trustee. Although the 401(k) plan provides for a discretionary employer profit sharing contribution and a discretionary employer matching contribution, we have not made any such contributions on behalf of participating employees to date.

Limitation of liability and indemnification of directors and officers

Our restated certificate of incorporation, which will become effective upon the closing of this offering, will contain provisions that limit the liability of our directors for monetary damages to the fullest extent permitted by Delaware law. Consequently, our directors will not be personally liable to us or our stockholders for monetary damages for any breach of fiduciary duties as directors, except liability for the following:

any breach of their duty of loyalty to our company or our stockholders;

Table of Contents

any act or omission not in good faith or that involves intentional misconduct or a knowing violation of law;

unlawful payments of dividends or unlawful stock repurchases or redemptions as provided in Section 174 of the Delaware General Corporation Law; or

any transaction from which they derived an improper personal benefit.

Our amended and restated bylaws, which will become effective upon the closing of this offering, will provide that we shall indemnify, to the fullest extent permitted by law, any person who is or was a party or is threatened to be made a party to any action, suit or proceeding, by reason of the fact that he or she is or was one of our directors or officers or is or was serving at our request as a director or officer of another corporation, partnership, joint venture, trust or other enterprise. Our amended and restated bylaws will provide that we may indemnify to the fullest extent permitted by law any person who is or was a party or is threatened to be made a party to any action, suit or proceeding, by reason of the fact that he or she is or was one of our employees or agents or is or was serving at our request as an employee or agent of another corporation, partnership, joint venture, trust or other enterprise. Our amended and restated bylaws will also provide that we must advance expenses incurred by or on behalf of a director or officer in advance of the final disposition of any action or proceeding, subject to very limited exceptions.

Prior to the closing of this offering, we intend to obtain insurance policies under which, subject to the limitations of the policies, coverage is provided to our directors and officers against loss arising from claims made by reason of breach of fiduciary duty or other wrongful acts as a director or officer, including claims relating to public securities matters, and to us with respect to payments that may be made by us to these officers and directors pursuant to our indemnification obligations or otherwise as a matter of law.

Prior to the closing of this offering, we intend to enter into indemnification agreements with each of our directors and executive officers that may be broader than the specific indemnification provisions contained in the Delaware General Corporation Law. These indemnification agreements may require us, among other things, to indemnify our directors and executive officers against liabilities that may arise by reason of their status or service. These indemnification agreements may also require us to advance all expenses incurred by the directors and executive officers in investigating or defending any such action, suit or proceeding. We believe that these agreements are necessary to attract and retain qualified individuals to serve as directors and executive officers.

At present, we are not aware of any pending litigation or proceeding for which indemnification is sought involving any person who is or was one of our directors, officers, employees or other agents or is or was serving at our request as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, and we are not aware of any threatened litigation that may result in claims for indemnification.

The underwriting agreement provides for indemnification by the underwriters of us and our officers, directors and employees for certain liabilities arising under the Securities Act, or otherwise.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or persons controlling our company pursuant to the foregoing provisions, we have been informed that, in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

Table of Contents

Certain relationships and related person transactions

Other than compensation arrangements, the following is a description of each transaction since January 1, 2011 and each currently proposed transaction in which:

we have been or are to be a participant;

the amount involved exceeds \$120,000; and

any of our directors, executive officers or holders of more than 5% of our capital stock, or any immediate family member of or person sharing the household with any of these individuals, had or will have a direct or indirect material interest.

Compensation arrangements for our directors and named executive officers are described elsewhere in this prospectus.

Series A preferred stock dividend and financing

In February 2011, we declared a stock dividend pursuant to which each holder of our common stock as of such date received 0.078946 shares of our Series A preferred stock for each share of our common stock then held. In March 2011, we declared a second stock dividend pursuant to which each holder of our common stock as of such date received 0.205689 shares of our Series A preferred stock for each share of our common stock then held. As of the record date of both stock dividends, Nicholas Woodman and Dean Woodman, Nicholas Woodman's father, were the only holders of our common stock. Nicholas Woodman has served as our Chief Executive Officer and as a director since February 2004 and each of Nicholas Woodman and Dean Woodman beneficially own more than 5% of our capital stock.

In February 2011, we issued and sold to accredited investors an aggregate of 7,894,632 shares of Series A preferred stock, at a purchase price of \$2.533367 per share, for aggregate consideration of \$20.0 million pursuant to the Series A Preferred Stock Purchase Agreement dated February 19, 2011. In connection with the Series A preferred stock financing, Nicholas Woodman and Dean Woodman sold 24,155,730 and 2,683,977 shares of Series A preferred stock, respectively, which constituted all of the shares of Series A preferred stock they received in connection with the stock dividend described above, at a purchase price of \$2.533367 per share, for aggregate consideration of \$61.2 million and \$6.8 million, respectively. Further, in connection with this Series A preferred stock financing, Nicholas Woodman and Dean Woodman contributed 24,155,730 and 2,683,977 shares of common stock, respectively, to us at no cost and as an inducement to investors to participate in this preferred stock financing.

In connection with the Series A preferred stock financing, (i) RW Camera Holdings LLC, or RW Camera acquired 7,894,632 shares of Series A preferred stock from us for aggregate consideration of \$20.0 million and 12,994,494 shares of Series A preferred stock from Nicholas Woodman and Dean Woodman for aggregate consideration of \$32.9 million, and (ii) Sageview Capital Master, L.P., or Sageview Master, acquired 7,894,635 shares of Series A preferred stock from Nicholas Woodman and Dean Woodman for aggregate consideration of \$20.0 million. RW Camera and Sageview Master each hold more than 5% of our capital stock. Michael Marks, one of our directors, is an affiliate of RW Camera. Edward Gilhuly, one of our directors, is an affiliate of Sageview Master.

Table of Contents**Investors rights agreement**

In connection with our Series A preferred stock financing, we entered into an investors rights agreement, dated February 25, 2011 and amended on March 10, 2011, with the holders of our redeemable convertible preferred stock, including entities affiliated with certain of our directors. Pursuant to such investors rights agreement, the holders of our redeemable convertible preferred stock are entitled to rights with respect to the registration of their shares following this offering under the Securities Act. For a more detailed description of these registration rights see the section titled Description of capital stock Registration rights.

Dividend

On December 19, 2012, we declared cash dividends of \$117.4 million pursuant to which each holder of our common stock as of December 21, 2012 received \$1.050965 for each share then held by such stockholder (on an as-converted to common stock basis). The following directors, executive officers and holders of more than 5% of our capital stock, or their affiliates, received the dividend payments listed below:

Directors, Executive Officers and 5% Stockholders (or Affiliates)	Total Dividend Received
Nicholas Woodman and Jill R. Woodman, as Co-Trustees of the Woodman Family Trust under Trust Agreement dated March 11, 2011(1)	\$ 57,114,689
RW Camera Holdings LLC(2)	19,291,998
Foxteq Holdings Inc.	12,306,093
Sageview Capital Master, L.P.(3)	7,291,032
Dean Woodman(4)	7,625,825
John Ball(5)	3,645,515
Andrea Moody	446,204
Pilar Woodman	446,204
Concepcion Federman	315,290
Irwin Federman	315,290

(1) Nicholas Woodman is our Chief Executive Officer and Chairman and Ms. Woodman is a former member of our board of directors.

(2) Mr. Marks, a member of our board of directors, is an affiliate of RW Camera Holdings LLC.

(3) Mr. Gilhuly, a member of our board of directors, is an affiliate of Sageview Capital Master, L.P.

(4) Includes dividend payments to Dean Woodman, a holder of 5% or more of our capital stock as his sole and separate property and as certain community property, and the Dean S. Woodman 2010 Irrevocable Trust dated December 3, 2010 of which family members of Mr. Woodman are beneficiaries.

(5) Steamboat Ventures Holdings V, L.P. is an affiliate of Mr. Ball.

Offer letters and change in control agreements

We have entered into offer letters and change in control severance agreements with our executive officers that, among other things, provide for severance and change in control benefits. See Executive compensation Employment, severance and change in control agreements for information about these agreements.

Share of proceeds from sale of equity securities

During our development stage, Mr. Woodman, our Chief Executive Officer, entered into a verbal agreement with Neil Dana, an employee since October 2004, pursuant to which Mr. Woodman

Table of Contents

agreed to share 10% of any proceeds he received from the sale of our equity securities held by Mr. Woodman. Pursuant to Mr. Woodman's agreement with Mr. Dana, in March 2011, we paid Mr. Dana a cash payment of \$6.1 million, and Mr. Woodman reimbursed us in the amount of \$6.1 million. We recorded the payment to Mr. Dana as compensation expense. In release of any claim Mr. Dana had to further payments under his agreement with Mr. Woodman, in June 2011 we issued Mr. Dana fully vested options to purchase 6,584,427 shares of Class B common stock under our 2010 Plan at an exercise price of \$0.763 per share, and in December 2011 issued to him 270,000 RSUs under our 2010 Plan that will be settled upon a qualified acquisition. We recorded compensation expense of \$6.8 million in connection with the issuance of these options. In connection with our equity awards to Mr. Dana, Mr. Woodman entered into a separate agreement with us in December 2011 pursuant to which he agreed to contribute back to us the same number of shares of Class B common stock as are issued pursuant to the exercise of Mr. Dana's options.

Mr. Dana has been employed by us since October 2004. During 2011, 2012 and 2013, Mr. Dana had total cash compensation, including base salary, bonus and other compensation, of \$6.3 million (inclusive of the \$6.1 million payment described above), \$245,499 and \$240,982, respectively.

Employment arrangements with and equity grants to immediate family members of our executive officers and directors

Andrea Moody, the sister of Nicholas Woodman, has been employed by us since March 2009. During 2011, 2012 and 2013, Ms. Moody had total cash compensation, including base salary, bonus and other compensation, of \$109,107, \$139,062 and \$102,638, respectively.

Pilar Woodman, the sister of Nicholas Woodman, has been employed by us since January 2011. During 2011, 2012 and 2013, Ms. Woodman had total cash compensation, including base salary, bonus and other compensation, of \$83,961, \$89,741 and \$86,100, respectively.

In connection with their exercise of stock options and their sale of shares of common stock to our Chief Executive Officer in 2012, each of Ms. Moody and Ms. Woodman had reportable income under the Code of \$1,970,844. Associated with this transaction we recorded aggregate compensation expense of \$806,400 as the cash proceeds received by Ms. Moody and Ms. Woodman were in excess of the fair value of the shares sold.

In June 2011, we granted to Concepcion Federman and Irwin Federman, the mother and stepfather of Nicholas Woodman, an aggregate of 600,000 shares of common stock at a purchase price of \$0.0033 per share for consulting services, all of which are fully vested.

Indemnification of directors

Prior to the closing of this offering we intend to enter into indemnification agreements with each of our directors and executive officers. These indemnification agreements and our restated certificate of incorporation and amended and restated bylaws will provide for indemnification of each of our directors and executive officers to the fullest extent permitted by Delaware law. For a more detailed description of our indemnification arrangements, see Management Limitation of liability and indemnification of directors and officers.

Table of Contents

Other transactions

Beginning in April 2013, we entered into agreements for certain contract manufacturing and engineering services with a company affiliated with Foxteq Holdings Inc., a beneficial owner of more than 5% of our capital stock. As of March 31, 2014, the aggregate amount invoiced to us under these agreements was \$14.1 million.

In July 2013, we loaned to Paul Crandell, one of our named executive officers, \$150,000, pursuant to a demand payment loan that did not bear interest, which was repaid in March 2014.

In August 2013, we entered into an agreement with Mooresville Motorplex, LLC, a company owned by the son of Michael Marks, one of our directors, to acquire certain naming rights to a sprint kart track. As consideration for these naming rights, we will pay a total of \$525,000 in installments beginning in October 2013 over the naming rights period. In addition to cash payment for the naming rights, we are also contractually obligated to provide Mooresville Motorplex with 300 capture devices at no cost over the life of the agreement.

In November 2013, we became a party to a settlement agreement between Nicholas Woodman and Dean Woodman related to an outstanding legal matter. Pursuant to the settlement agreement, we reimbursed Dean Woodman's legal expenses of \$175,000.

In December 2013, we entered into a separation agreement with Kurt Amundson, our former Chief Financial Officer, pursuant to which we paid him cash severance of \$290,306.

In fiscal year 2013 and the first quarter of fiscal year 2014, we incurred and expensed chartered aircraft fees for the use of Mr. Woodman's private plane, for which \$185,000 was accrued as of March 31, 2014.

Review, approval or ratification of transactions with related parties

Our policy and the charter of the governance and nominating committee require that any transaction with a related party that must be reported under applicable rules of the SEC (other than compensation-related matters) and must be reviewed and approved by the governance and nominating committee (other than transactions that are subject to review by our board of directors as a whole or any other committee of our board of directors), unless the related party is, or is associated with, a member of such committee, in which event such transaction must be reviewed and approved by the audit committee. These committees have not yet adopted policies or procedures for review of, or standards for approval of, such transactions.

Table of Contents

Principal and selling stockholders

The following table presents information as to the beneficial ownership of our Class B common stock as of March 31, 2014, as adjusted to reflect the sale of our Class A common stock in this offering, by:

each stockholder known by us to be the beneficial owner of more than 5% of our Class B common stock;

each of our directors;

each of our named executive officers;

all of our directors and executive officers as a group; and

each selling stockholder.

Beneficial ownership is determined in accordance with the rules of the SEC and thus represents voting or investment power with respect to our securities. Unless otherwise indicated below, to our knowledge, the persons and entities named in the table have sole voting and sole investment power with respect to all shares beneficially owned, subject to community property laws where applicable. Shares of our Class B common stock subject to options that are currently exercisable or exercisable within 60 days of March 31, 2014 are deemed to be outstanding and to be beneficially owned by the person holding the options for the purpose of computing the percentage ownership of that person but are not treated as outstanding for the purpose of computing the percentage ownership of any other person.

Percentage ownership of our Class B common stock before this offering is based on 112,820,599 shares of our Class B common stock outstanding on March 31, 2014, which includes 30,523,036 shares of Class B common stock resulting from the conversion of all outstanding shares of our redeemable convertible preferred stock in connection with the closing of this offering, as if this conversion had occurred as of March 31, 2014. No shares of our Class A common stock will be outstanding prior to the effective date of this prospectus. Percentage ownership of our Class A and Class B common stock after the offering also assumes our sale of shares of Class A common stock in this offering (assuming no exercise of the underwriters' option to purchase additional shares). Unless otherwise indicated, the address of each of the individuals and entities named below is c/o GoPro, Inc., 3000 Clearview Way, San Mateo, California 94402.

Table of Contents
