(Mark One)

☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2014

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number: 1-12378

NVR, Inc.

(Exact name of registrant as specified in its charter)

Virginia
(State or other jurisdiction of
incorporation or organization)
11700 Plaza America Drive, Suite 500

54-1394360
(I.R.S. Employer
Identification No.)

Reston, Virginia 20190

(703) 956-4000

(Address, including zip code, and telephone number, including
area code, of registrant's principal executive offices)

(Not Applicable)

(Former name, former address, and former fiscal year if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐

Non-accelerated filer ☐ (Do not check if smaller reporting company) Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of July 28, 2014 there were 4,194,709 total shares of common stock outstanding.

NVR, Inc.

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

1. Basis of Presentation

The accompanying unaudited, condensed consolidated financial statements include the accounts of NVR, Inc. and its subsidiaries (collectively, NVR or the Company) and certain other entities in which the Company is deemed to be the primary beneficiary (see Notes 2 and 3 to the accompanying condensed consolidated financial statements).

Intercompany accounts and transactions have been eliminated in consolidation. The statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. Because the accompanying condensed consolidated financial statements do not include all of the information and footnotes required by GAAP, they should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. In the opinion of management, all adjustments (consisting only of normal recurring accruals except as otherwise noted herein) considered necessary for a fair presentation have been included. Operating results for the three and six month periods ended June 30, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. Certain prior year amounts in the condensed consolidated financial statements have been reclassified to conform to the 2014 presentation.

For the three and six month periods ended June 30, 2014 and 2013, comprehensive income equaled net income; therefore, a separate statement of comprehensive income is not included in the accompanying condensed consolidated financial statements.

2. Variable Interest Entities

Fixed Price Purchase Agreements

NVR generally does not engage in the land development business. Instead, the Company typically acquires finished building lots at market prices from various development entities under fixed price purchase agreements. The purchase agreements require deposits that may be forfeited if NVR fails to perform under the agreement. The deposits required under the purchase agreements are in the form of cash or letters of credit in varying amounts, and typically range up to 10% of the aggregate purchase price of the finished lots.

NVR believes this lot acquisition strategy reduces the financial requirements and risks associated with direct land ownership and land development. NVR may, at its option, choose for any reason and at any time not to perform under these purchase agreements by delivering notice of its intent not to acquire the finished lots under contract. NVR's sole

legal obligation and economic loss for failure to perform under these purchase agreements is limited to the amount of the deposit pursuant to the liquidated damage provisions contained within the purchase agreements. In other words, if NVR does not perform under a purchase agreement, NVR loses only its deposit. None of the creditors of any of the development entities with which NVR enters fixed price purchase agreements have recourse to the general credit of NVR. NVR generally does not have any specific performance obligations to purchase a certain number or any of the lots, nor does NVR guarantee completion of the development by the developer or guarantee any of the developers financial or other liabilities.

Table of Contents

NVR, Inc.

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

NVR is not involved in the design or creation of any of the development entities from which the Company purchases lots under fixed price purchase agreements. The developer's equity holders have the power to direct 100% of the operating activities of the development entity. NVR has no voting rights in any of the development entities. The sole purpose of the development entity's activities is to generate positive cash flow returns to its equity holders. Further, NVR does not share in any of the profit or loss generated by the project's development. The profits and losses are passed directly to the developer's equity holders.

The deposit placed by NVR pursuant to the fixed price purchase agreement is deemed to be a variable interest in the respective development entities. Those development entities are deemed to be variable interest entities (VIEs). Therefore, the development entities with which NVR enters fixed price purchase agreements, including the joint venture limited liability corporations, as discussed below, are evaluated for possible consolidation by NVR. An enterprise must consolidate a VIE when that enterprise has a controlling financial interest in the VIE. An enterprise is deemed to have a controlling financial interest if it has i) the power to direct the activities of a VIE that most significantly impact the entity's economic performance, and ii) the obligation to absorb losses of the VIE that could be significant to the VIE or the rights to receive benefits from the VIE that could be significant to the VIE.

NVR believes the activities that most significantly impact a development entity's economic performance are the operating activities of the entity. Unless and until a development entity completes finished building lots through the development process, with respect to which the development entities' equity investors bear the full risk, the entity does not earn any revenues. The operating development activities are managed solely by the development entity's equity investors.

The development entities with which NVR contracts to buy finished lots typically select the respective projects, obtain the necessary zoning approvals, obtain the financing required with no support or guarantees from NVR, select who will purchase the finished lots and at what price, and manage the completion of the infrastructure improvements, all for the purpose of generating a cash flow return to the development entity's equity holders and all independent of NVR. The Company possesses no more than limited protective legal rights through the purchase agreement in the specific finished lots that it is purchasing, and NVR possesses no participative rights in the development entities. Accordingly, NVR does not have the power to direct the activities of a developer that most significantly impact the developer's economic performance. For this reason, NVR has concluded that it is not the primary beneficiary of the development entities with which the Company enters fixed price purchase agreements, and therefore, NVR does not consolidate any of these VIEs.

As of June 30, 2014, NVR controlled approximately 60,900 lots with deposits in cash and letters of credit totaling approximately \$306,200 and \$2,400, respectively. As noted above, NVR's sole legal obligation and economic loss for failure to perform under these purchase agreements is limited to the amount of the deposit pursuant to the liquidated damage provisions contained within the purchase agreements and in very limited circumstances, specific performance obligations. In addition, NVR has certain properties under contract with land owners that are expected to yield

approximately 4,900 lots, which are not included in the number of total lots controlled. Some of these properties may require rezoning or other approvals to achieve the expected yield. These properties are controlled with deposits and letters of credit totaling approximately \$3,500 and \$4,000, respectively as of June 30, 2014, of which approximately \$7,300 is refundable if NVR does not perform under the contract. NVR generally expects to assign the raw land contracts to a land developer and simultaneously enter into a lot purchase agreement with the assignee if the project is determined to be feasible. NVR's total risk of loss related to contract land deposits as of June 30, 2014 and December 31, 2013, was as follows:

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

	June 30, 2014	December 31, 2013
Contract land deposits	\$ 309,677	\$ 296,646
Loss reserve on contract land deposits	(55,869)	(59,761)
Contract land deposits, net	253,808	236,885
Contingent obligations in the form of letters of credit	6,427	2,459
Contingent specific performance obligations (1)	1,505	1,707
Total risk of loss	\$ 261,740	\$ 241,051

- (1) At June 30, 2014 and December 31, 2013, the Company was committed to purchase 10 and 13 finished lots, respectively, under specific performance obligations.

3. Joint Ventures

On a limited basis, NVR also obtains finished lots using joint venture limited liability corporations (JVs). All JVs are typically structured such that NVR is a non-controlling member and is at risk only for the amount the Company has invested, in addition to any deposits placed under fixed price purchase agreements with the JV. NVR is not a borrower, guarantor or obligor on any debt of the JVs, as applicable. The Company enters into a standard fixed price purchase agreement to purchase lots from these JVs, and as a result has a variable interest in these JVs.

At June 30, 2014, the Company had an aggregate investment totaling approximately \$85,500 in four JVs that are expected to produce approximately 9,000 finished lots, of which approximately 3,400 were not under contract with NVR. The Company has determined that it is not the primary beneficiary of three of the JVs because NVR and the other JV partner either share power or the other JV partner has the controlling financial interest. The aggregate investment in these three JVs was approximately \$82,200 and is reported in the Other assets line item on the accompanying condensed consolidated balance sheets. For the remaining JV, NVR has concluded that it is the primary beneficiary because the Company has the controlling financial interest in the JV. Accordingly, NVR consolidates this JV. The condensed balance sheets at June 30, 2014 and December 31, 2013, of the consolidated JV were as follows:

	June 30, 2014	December 31, 2013
Cash	\$ 1,846	\$ 668
Restricted cash	185	248

Edgar Filing: NVR INC - Form 10-Q

Other assets	400	542
Land under development	4,371	5,810
Total assets	\$ 6,802	\$ 7,268
Debt	\$ 1,258	\$ 3,365
Accrued expenses	1,475	862
Equity	4,069	3,041
Total liabilities and equity	\$ 6,802	\$ 7,268

4. Land Under Development

On a limited basis, NVR directly acquires raw parcels of land already zoned for its intended use to develop into finished lots. Land under development includes the land acquisition costs, direct improvement costs, capitalized interest, where applicable, and real estate taxes. During the second

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

quarter of 2014, the Company acquired a raw land parcel for approximately \$12,000 which is expected to produce approximately 440 lots. In July the Company entered into an agreement to sell this raw land parcel to a third party developer at NVR's carrying value, and simultaneously entered into a lot purchase agreement to purchase finished lots from the developer. As of June 30, 2014, NVR directly owned six separate raw parcels of land with a carrying value of \$63,789 that when developed will yield approximately 1,150 finished lots for use in its homebuilding operations. Of the total finished lots, 125 lots are under contract to be sold to an unrelated party under lot purchase agreements. None of the raw parcels had any indicators of impairment as of June 30, 2014. Based on current market conditions, NVR may on a limited basis continue to directly acquire additional raw parcels to develop into finished lots.

5. Capitalized Interest

The Company capitalizes interest costs to land under development during the active development of finished lots. In addition, the Company capitalizes interest costs to its joint venture investments while the investments are considered qualified assets pursuant to ASC 835-20, *Interest*. Capitalized interest is transferred to sold or unsold inventory as the development of finished lots is completed, then charged to cost of sales upon the Company's settlement of homes and the respective lots. Interest incurred in excess of the interest capitalizable based on the level of qualified assets is expensed in the period incurred. NVR's interest costs incurred, capitalized, expensed and charged to cost of sales during the three and six months ended June 30, 2014 and 2013 was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Interest capitalized, beginning of period	\$ 3,618	\$ 1,577	\$ 3,294	\$ 893
Interest incurred	6,200	6,264	12,423	12,514
Interest charged to interest expense	(5,723)	(5,374)	(11,517)	(10,940)
Interest charged to cost of sales	(285)	(13)	(390)	(13)
Interest capitalized, end of period	\$ 3,810	\$ 2,454	\$ 3,810	\$ 2,454

6. Equity-Based Compensation Expense

The Company's shareholders approved the NVR, Inc. 2014 Equity Incentive Plan (the 2014 Plan) at the Company's Annual Meeting of Shareholders held on May 7, 2014. The 2014 Plan authorizes the Company to issue non-qualified stock options (Options) to key management employees, including executive officers and Board members, to acquire up to an aggregate 950,000 shares of the Company's common stock.

During the second quarter of 2014, the Company issued 623,350 Options under the 2014 Plan. The Options were granted at an exercise price equal to the closing price of the Company's common stock on the day prior to the date of grant. Each of the Options granted will vest over four years in 25% increments on December 31, 2016, 2017, 2018 and 2019. The vesting for 331,675 of the Options granted is contingent both upon continued employment or continued service as a Director and the Company's return on capital performance during 2014 through 2016. The vesting for the other 291,675 Options granted is contingent solely upon continued employment or continued service as a Director. The Options expire ten years from the date of grant.

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

The Company also issued 47,100 Options under the NVR, Inc. 2010 Equity Incentive Plan (the 2010 Plan) during the six months ended June 30, 2014. The Options granted will vest in 25% increments on December 31, 2016, 2017, 2018 and 2019, based solely on continued employment. The Options expire ten years from the date of grant. The Company also issued 16,283 restricted share units (RSUs) from the 2010 Plan during the six months ended June 30, 2014. The RSUs vest in 33% increments beginning on December 31, 2016, based solely on continued employment. The weighted average fair value per share of the RSUs granted was \$1,153.41.

To estimate the grant-date fair value of its Options, the Company uses the Black-Scholes option-pricing model (the Pricing Model). The Pricing Model estimates the per share fair value of an option on its date of grant based on the following factors: the option s exercise price; the price of the underlying stock on the date of grant; the estimated dividend yield; a risk-free interest rate; the estimated option term; and the expected volatility. For the risk-free interest rate, the Company uses U.S. Treasury Strips which mature at approximately the same time as the option s expected holding term. For expected volatility, NVR has concluded that its historical volatility over the option s expected holding term provides the most reasonable basis for this estimate. The fair value of the Options granted during 2014 was estimated on the grant date using the Pricing Model, based on the following assumptions:

Estimated average holding period (years)	5.16
Risk free interest rate (range)	1.064% - 2.489%
Expected volatility (range)	18.585% - 30.571%
Expected dividend rate	0.00%
Grant-date fair value per share of options granted	\$267.71

In accordance with ASC 718, *Compensation - Stock Compensation*, the fair value of the non-vested equity shares is measured as if they were vested and issued on the grant date. Additionally, under ASC 718, service only restrictions on vesting of non-vested equity shares are not reflected in the fair value calculation at the grant date.

Compensation cost for Options is recognized on a straight-line basis over the requisite service period for the entire award (from the date of grant through the period of the last separately vesting portion of the grant). For the recognition of equity-based compensation expense, the Options which are subject to a performance condition are treated as a separate award from the service-only Options, and compensation expense for Options subject to a performance condition is recognized when it becomes probable that the stated performance target will be achieved. The Company currently believes that it is probable that the performance condition will be satisfied at the target level and is recognizing compensation expense related to such Options accordingly. Compensation cost is recognized within the income statement in the same expense line as the cash compensation paid to the respective employees. ASC 718 also requires the Company to estimate forfeitures in calculating the expense related to stock-based compensation, and requires the compensation costs of stock-based awards to be recognized net of estimated forfeitures. Total equity-based compensation expense, net of forfeitures, recognized during the three months ended June 30, 2014 and

2013 was \$15,938 and \$10,589, respectively, and for the six months ended June 30, 2014 and 2013 was \$26,641 and \$18,652, respectively.

As of June 30, 2014, the total unrecognized compensation cost for all outstanding Options and RSUs was approximately \$229,300, net of estimated forfeitures. The unrecognized compensation cost will be recognized over each grant's applicable vesting period, with the latest vesting date being December 31, 2019. Unrecognized compensation costs may change depending upon the satisfaction of the performance-based metric, discussed above. The weighted-average period over which the unrecognized compensation will be recorded is equal to approximately 2.8 years.

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

	Options	Weighted Avg. Exercise Price
Outstanding at December 31, 2013	667,036	\$ 740.18
Granted	670,450	1,094.24
Exercised	(92,303)	656.45
Forfeited	(16,387)	830.02
Outstanding at June 30, 2014	1,228,796	\$ 938.45
Exercisable at June 30, 2014	183,983	\$ 629.72

The table above does not include 55,990 outstanding RSUs, which were issued at a \$0 exercise price. None of the outstanding RSUs were exercisable as of June 30, 2014.

7. Earnings per Share

The following weighted average shares and share equivalents were used to calculate basic and diluted earnings per share for the three and six months ended June 30, 2014 and 2013:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Weighted average number of shares outstanding used to calculate basic EPS	4,349,000	4,889,000	4,408,000	4,934,000
<i>Dilutive Securities:</i>				
Stock options and restricted share units	146,000	124,000	149,000	133,000
Weighted average number of shares and share equivalents outstanding used to calculate diluted EPS	4,495,000	5,013,000	4,557,000	5,067,000

Options issued under equity incentive plans to purchase 752,924 shares of common stock were outstanding during both the three and six month periods ended June 30, 2014, and 136,962 shares of common stock were outstanding during both the three and six month periods ended June 30, 2013, respectively, but were not included in the

computation of diluted earnings per share because the effect would have been anti-dilutive in the respective periods.

8. Excess Reorganization Value, Goodwill and Other Intangibles

Reorganization value in excess of identifiable assets (excess reorganization value) is an indefinite-lived intangible asset that was created upon NVR's emergence from bankruptcy on September 30, 1993. Based on the allocation of the reorganization value, the portion of the reorganization value which was not attributed to specific tangible or intangible assets has been reported as excess reorganization value, which is treated similarly to goodwill. Excess reorganization value is not subject to amortization. Rather, excess reorganization value is subject to an impairment assessment on an annual basis or more frequently if changes in events or circumstances indicate that impairment may have occurred. Because excess reorganization value was based on the reorganization value of NVR's entire enterprise upon emergence from bankruptcy, the impairment assessment is conducted on an enterprise basis based on NVR's total equity compared to the market value of NVR's outstanding publicly-traded common stock.

Table of Contents**NVR, Inc.****Notes to Condensed Consolidated Financial Statements**

(dollars in thousands, except per share data)

(unaudited)

As of June 30, 2014, goodwill and net finite-lived intangible assets totaled \$441 and \$5,614, respectively. The remaining finite-lived intangible assets are amortized on a straight-line basis over a weighted average life of 5 years. Amortization expense related to the finite-lived intangible assets was \$346 and \$691 for the three and six months ended June 30, 2014, and \$525 and \$925 for the three and six months ended June 30, 2013, respectively.

The Company completed the annual impairment assessment of the excess reorganization value and goodwill during the first quarter of 2014 and determined that there was no impairment.

9. Income Taxes

During the first quarter of 2014, the Company recognized additional income tax expense of approximately \$6,900 due to the reversal of certain previously recognized tax deductions.

10. Shareholders' Equity

A summary of changes in shareholders' equity is presented below:

	Common Stock	Additional Paid-In Capital	Retained Earnings	Treasury Stock	Deferred Compensation Trust	Deferred Compensation Liability	Total
Balance, December 31, 2013	\$ 206	\$ 1,212,050	\$ 4,605,557	\$ (4,556,461)	\$ (17,741)	\$ 17,741	\$ 1,261,352
Net income			92,027				92,027
Purchase of common stock for treasury				(347,448)			(347,448)
Equity-based compensation		26,641					26,641
Tax benefit from equity benefit plan activity		6,050					6,050
Proceeds from stock options exercised		60,593					60,593
Treasury stock issued upon option exercise		(27,579)		27,579			

and restricted share
vesting

Balance, June 30, 2014	\$ 206	\$ 1,277,755	\$ 4,697,584	\$ (4,876,330)	\$ (17,741)	\$ 17,741	\$ 1,099,215
---------------------------	--------	--------------	--------------	----------------	-------------	-----------	--------------

The Company repurchased 317,739 shares of its common stock during the six months ended June 30, 2014. The Company settles option exercises and vesting of restricted share units by issuing shares of treasury stock. Approximately 97,000 shares were issued from the treasury account during the six months ended June 30, 2014 in settlement of option exercises and vesting of restricted share units. Shares are relieved from the treasury account based on the weighted average cost basis of treasury shares acquired.

11. Product Warranties

The Company establishes warranty and product liability reserves (warranty reserve) to provide for estimated future expenses as a result of construction and product defects, product recalls and litigation incidental to NVR s homebuilding business. Liability estimates are determined based on management s judgment, considering such factors as historical experience, the likely current cost of corrective action, manufacturers and subcontractors participation in sharing the cost of corrective action, consultations with third party experts such as engineers, and discussions with the Company s general counsel and outside counsel retained to handle specific product liability cases. The following table reflects the changes in the Company s warranty reserve during the three and six months ended June 30, 2014 and 2013:

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

	Three Months Ended June 30, Six Months Ended June 30,			
	2014	2013	2014	2013
Warranty reserve, beginning of period	\$ 98,765	\$ 63,057	\$ 101,507	\$ 62,742
Provision	13,193	25,612	23,453	33,903
Payments	(14,768)	(11,328)	(27,770)	(19,304)
Warranty reserve, end of period	\$ 97,190	\$ 77,341	\$ 97,190	\$ 77,341

The warranty reserve provision for the three and six months ended June 30, 2013 included a charge of approximately \$15,600 to establish an accrual related to remediation of primarily water infiltration issues in a single completed community. The water infiltration issues were the result of a design issue with several products developed for and built exclusively in that one specific community. The warranty reserve provision for the three and six months ended June 30, 2014 included additional charges related to this issue totaling \$3,000 and \$3,975, respectively.

12. Segment Disclosures

The following disclosure includes four homebuilding reportable segments that aggregate geographically the Company's homebuilding operating segments, and the mortgage banking operations presented as a single reportable segment. The homebuilding reportable segments are comprised of operating divisions in the following geographic areas:

Mid Atlantic: Maryland, Virginia, West Virginia, Delaware and Washington, D.C.

North East: New Jersey and eastern Pennsylvania

Mid East: New York, Ohio, western Pennsylvania, Indiana and Illinois

South East: North Carolina, South Carolina, Tennessee and Florida

Homebuilding profit before tax includes all revenues and income generated from the sale of homes, less the cost of homes sold, selling, general and administrative expenses and a corporate capital allocation charge. The corporate capital allocation charge is eliminated in consolidation, is based on the segment's average net assets employed and is charged using a consistent methodology in the periods presented. The corporate capital allocation charged to the operating segment allows the Chief Operating Decision Maker (CODM) to determine whether the operating segment's results are providing the desired rate of return after covering the Company's cost of capital. In addition, certain assets, including goodwill and intangible assets and consolidation adjustments as discussed further below, are not allocated to the operating segments as those assets are neither included in the operating segment's corporate capital allocation

charge, nor in the CODM's evaluation of the operating segment's performance. The Company records charges on contract land deposits when it is determined that it is probable that recovery of the deposit is impaired. For segment reporting purposes, impairments on contract land deposits are charged to the operating segment upon the determination to terminate a finished lot purchase agreement with the developer, or to restructure a lot purchase agreement resulting in the forfeiture of the deposit. Mortgage banking profit before tax consists of revenues generated from mortgage financing, title insurance and closing services, less the costs of such services and general and administrative costs. Mortgage banking operations are not charged a corporate capital allocation charge.

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

In addition to the corporate capital allocation and contract land deposit impairments discussed above, the other reconciling items between segment profit and consolidated profit before tax include unallocated corporate overhead (including all management incentive compensation), equity-based compensation expense, consolidation adjustments and external corporate interest expense. NVR's overhead functions, such as accounting, treasury, human resources, etc., are centrally performed and the costs are not allocated to the Company's operating segments. Consolidation adjustments consist of such items necessary to convert the reportable segments' results, which are predominantly maintained on a cash basis, to a full accrual basis for external financial statement presentation purposes, and are not allocated to the Company's operating segments. Likewise, equity-based compensation expense is not charged to the operating segments. External corporate interest expense is primarily comprised of interest charges on the Company's 3.95% Senior Notes due 2022 (the Senior Notes) and is not charged to the operating segments because the charges are included in the corporate capital allocation discussed above.

Following are tables presenting segment revenues, profit and assets, with reconciliations to the amounts reported for the consolidated enterprise, where applicable:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Revenues:				
Homebuilding Mid Atlantic	\$ 657,825	\$ 594,902	\$ 1,122,855	\$ 1,026,770

(unaudited)

	June 30, 2014	December 31, 2013
Assets:		
Homebuilding Mid Atlantic	\$ 944,257	\$ 810,270
Homebuilding North East	95,993	84,958
Homebuilding Mid East	223,559	172,167
Homebuilding South East	146,000	106,389
Mortgage Banking	204,518	253,421
Total segment assets	1,614,327	1,427,205
Consolidated variable interest entity	6,802	7,268
Cash and cash equivalents	538,940	844,274
Deferred taxes	166,695	162,378
Intangible assets and goodwill	54,982	55,674
Contract land deposit reserve	(55,869)	(59,761)
Consolidation adjustments and other	56,186	49,110
Reconciling items sub-total	767,736	1,058,943
Consolidated assets	\$ 2,382,063	\$ 2,486,148

- (1) This item represents changes to the contract land deposit impairment reserve, which are not allocated to the reportable segments.
- (2) The increase in equity-based compensation expense in the three month period ended June 30, 2014 was attributable to the issuance of Options under the 2014 Plan during the second quarter of 2014. The increase in equity-based compensation expense in the six month period ended June 30, 2014 is primarily attributable to the second quarter 2014 Options granted and RSUs granted in the second quarter of 2013. See Note 6 for additional discussion of equity-based compensation.
- (3) This item represents the elimination of the corporate capital allocation charge included in the respective homebuilding reportable segments. The corporate capital allocation charge is based on the segment's monthly average asset balance, and was as follows for the periods presented:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Homebuilding Mid Atlantic	\$ 21,742	\$ 18,609	\$ 39,898	\$ 34,716

Edgar Filing: NVR INC - Form 10-Q

Homebuilding North East	2,733	2,353	5,182	4,347
Homebuilding Mid East	6,180	5,716	11,478	10,731
Homebuilding South East	3,856	2,995	6,919	5,497
Total	\$ 34,511	\$ 29,673	\$ 63,477	\$ 55,291

13. Fair Value

Financial Instruments

The estimated fair value of NVR's Senior Notes as of June 30, 2014 was approximately \$600,900. The estimated fair value is based on recent market prices of similar transactions, which is classified as Level 2 within the fair value hierarchy. The carrying value of the Senior Notes was \$599,120 at June 30, 2014. Except as otherwise noted below, NVR believes that insignificant differences exist between the carrying value and the fair value of its financial instruments, which consists of cash equivalents, due to their short term nature.

Table of Contents

NVR, Inc.

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

Derivative Instruments and Mortgage Loans Held for Sale

In the normal course of business, NVR's mortgage banking segment enters into contractual commitments to extend credit to buyers of single-family homes with fixed expiration dates. The commitments become effective when the borrowers "lock-in" a specified interest rate within time frames established by NVR. All mortgagors are evaluated for credit worthiness prior to the extension of the commitment. Market risk arises if interest rates move adversely between the time of the "lock-in" of rates by the borrower and the sale date of the loan to a broker/dealer. To mitigate the effect of the interest rate risk inherent in providing rate lock commitments to borrowers, the Company enters into optional or mandatory delivery forward sale contracts to sell whole loans and mortgage-backed securities to broker/dealers. The forward sale contracts lock in an interest rate and price for the sale of loans similar to the specific rate lock commitments. NVR does not engage in speculative or trading derivative activities. Both the rate lock commitments to borrowers and the forward sale contracts to broker/dealers are undesignated derivatives and, accordingly, are marked to fair value through earnings. At June 30, 2014, there were contractual commitments to extend credit to borrowers aggregating \$413,089 and open forward delivery contracts aggregating \$504,091.

GAAP assigns a fair value hierarchy to the inputs used to measure fair value. Level 1 inputs are quoted prices in active markets for identical assets and liabilities. Level 2 inputs are inputs other than quoted market prices that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs. The fair value of the Company's rate lock commitments to borrowers and the related input levels include, as applicable:

- i) the assumed gain/loss of the expected resultant loan sale (Level 2);
- ii) the effects of interest rate movements between the date of the rate lock and the balance sheet date (Level 2);
and
- iii) the value of the servicing rights associated with the loan (Level 2).

The assumed gain/loss considers the amount, if any, that the Company has discounted the price to the borrower from par for competitive reasons and the excess servicing to be received or buydown fees to be paid upon securitization of the loan. The excess servicing and buydown fees are calculated pursuant to contractual terms with investors. To calculate the effects of interest rate movements, the Company utilizes applicable published mortgage-backed security prices, and multiplies the price movement between the rate lock date and the balance sheet date by the notional loan commitment amount. The Company sells all of its loans on a servicing released basis, and receives a servicing released premium upon sale. Thus, the value of the servicing rights, which averaged 111 basis points of the loan amount as of June 30, 2014, is included in the fair value measurement and is based upon contractual terms with

investors and varies depending on the loan type. The Company assumes an approximate 11% fallout rate when measuring the fair value of rate lock commitments. Fallout is defined as locked loan commitments for which the Company does not close a mortgage loan and is based on historical experience.

The fair value of the Company's forward sales contracts to broker/dealers solely considers the market price movement of the same type of security between the trade date and the balance sheet date (Level 2). The market price changes are multiplied by the notional amount of the forward sales contracts to measure the fair value.

Mortgage loans held for sale are recorded at fair value when closed, and thereafter are carried at the lower of cost or fair value, net of deferred origination costs, until sold. Fair value is measured using Level 2 inputs. The fair value of loans held for sale of \$170,470 included on the accompanying condensed consolidated balance sheet has been increased by \$2,083 from the aggregate principal balance of \$168,387.

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

The undesignated derivative instruments are included on the accompanying condensed consolidated balance sheet, as of June 30, 2014, as follows:

	Balance Sheet Location	Fair Value
Derivative Assets:		
Rate lock commitments	NVRM - Other assets	\$ 4,446
Derivative Liabilities:		
Forward sales contracts	NVRM - Accounts payable and other liabilities	\$ 1,950

The fair value measurement as of June 30, 2014 was as follows:

	Notional or Principal Amount	Assumed Gain/(Loss) From Loan Sale	Interest Rate Movement Effect	Servicing Rights Value	Security Price Change	Total Fair Value Measurement Gain/(Loss)
Rate lock commitments	\$ 413,089	\$ (1,088)	\$ 1,413	\$ 4,121	\$	\$ 4,446
Forward sales contracts	\$ 504,091				(1,950)	(1,950)
Mortgages held for sale	\$ 168,387	(456)	738	1,801		2,083
Total Fair Value Measurement		\$ (1,544)	\$ 2,151	\$ 5,922	\$ (1,950)	\$ 4,579

For the six months ended June 30, 2014 and 2013, NVR Mortgage Finance, Inc. (NVRM) recorded a fair value adjustment to income of \$4,059 and \$2,481, respectively. Unrealized gains/losses from the change in the fair value measurements are included in earnings as a component of mortgage banking fees in the accompanying condensed consolidated statements of income. The fair value measurement will be impacted in the future by the change in the value of the servicing rights, interest rate movements, security price fluctuations, and the volume and product mix of the Company's closed loans and locked loan commitments.

14. Debt

As of June 30, 2014, the Company had Senior Notes outstanding with a principal balance of \$600,000. The Senior Notes were issued at a discount to yield 3.97% and have been reflected net of the unamortized discount in the accompanying condensed consolidated balance sheet. The Senior Notes mature on September 15, 2022 and bear interest at 3.95%, payable semi-annually in arrears on March 15 and September 15.

NVRM provides for its mortgage origination and other operating activities using cash generated from operations, borrowings from its parent company, NVR, as well as a revolving mortgage repurchase agreement (the Repurchase Agreement), which is non-recourse to NVR. The Repurchase Agreement provides for loan purchases up to \$25,000, subject to certain sub-limits. At June 30, 2014, there was no outstanding debt under the Repurchase Agreement. Amounts outstanding under the Repurchase

Table of Contents

NVR, Inc.

Notes to Condensed Consolidated Financial Statements

(dollars in thousands, except per share data)

(unaudited)

Agreement are collateralized by the Company's mortgage loans held for sale. As of June 30, 2014, there were no borrowing base limitations reducing the amount available for borrowings under the Repurchase Agreement. The Repurchase Agreement was renewed with materially consistent terms and conditions and expires on July 29, 2015.

15. Commitments and Contingencies

In October 2004, Patrick Tracy, whom NVR had employed as a Sales and Marketing Representative (SMR), filed a lawsuit against the Company in the U.S. District Court for the Western District of New York alleging that NVR had misclassified him and other SMRs as outside sales personnel exempt from certain state and federal wage laws, including overtime pay requirements. Mr. Tracy's attorneys subsequently filed several other lawsuits in various courts asserting substantially similar claims on behalf of various classes or groups of SMRs. None of those courts have held that the claims are appropriate for class, collective, or other group treatment, and the Western District of New York ruled in April 2013 that the claims in Mr. Tracy's case could not proceed on such a basis. The Western District of New York reached the same conclusion in July 2014 regarding a separate case that Mr. Tracy's attorneys brought on behalf of other SMRs.

In October 2013, Mr. Tracy's individual claims were tried by a jury, which returned a unanimous verdict in NVR's favor and found that the Company had properly classified Mr. Tracy as an exempt outside sales person. The plaintiff filed a notice of appeal on February 27, 2014, but he has not yet identified any issues as to which he may seek appellate review. The remainder of the cases noted above are in various stages of pre-trial proceedings, many of them stayed or administratively closed pending a final disposition of the *Tracy* action.

The Company believes that its compensation practices in regard to SMRs are entirely lawful and has vigorously defended all claims challenging those practices. In light of the points noted above, the Company has not recorded any associated liabilities on the accompanying condensed consolidated balance sheets in conjunction with any of those claims.

In June 2010, the Company received a Request for Information from the United States Environmental Protection Agency (EPA) pursuant to Section 308 of the Clean Water Act. The request sought information about storm water discharge practices in connection with homebuilding projects completed or underway by the Company in New York and New Jersey. The Company cooperated with this request, and provided information to the EPA. The Company was subsequently informed by the United States Department of Justice (DOJ) that the EPA forwarded the information on the matter to the DOJ, and the DOJ requested that the Company meet with the government to discuss the status of the case. Meetings took place in January 2012 and August 2012 with representatives from both the EPA and DOJ. It is as yet unclear what next steps the DOJ will take in the matter. The Company intends to continue cooperating with any future EPA and/or DOJ inquiries. At this time, the Company cannot predict the outcome of this inquiry, nor can it reasonably estimate the potential costs that may be associated with its eventual resolution.

The Company and its subsidiaries are also involved in various other litigation arising in the ordinary course of business. In the opinion of management, and based on advice of legal counsel, this litigation is not expected to have a material adverse effect on the financial position, results of operations or cash flows of the Company. Legal costs incurred in connection with outstanding litigation are expensed as incurred.

16. Recent Accounting Pronouncements

On May 28, 2014, the Financial Accounting Standards Board issued Accounting Standards Update 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The standard will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The standard is effective for the Company on January 1, 2017. Early adoption is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company has not yet selected a transition method and is currently evaluating the effect that the standard will have on its consolidated financial statements and related disclosures.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**
(dollars in thousands)**Forward-Looking Statements**

Some of the statements in this Quarterly Report on Form 10-Q, as well as statements made by us in periodic press releases or other public communications, constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Certain, but not necessarily all, of such forward-looking statements can be identified by the use of forward-looking terminology, such as believes, expects, may, will, should, or anticipates or the negative thereof or other comparable terminology. All statements other than of historical facts are forward-looking statements. Forward-looking statements contained in this document may include those regarding market trends, NVR's financial position, business strategy, the outcome of pending litigation, investigations or similar contingencies, projected plans and objectives of management for future operations. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance of NVR to be materially different from future results, performance or achievements expressed or implied by the forward-looking statements. Such risk factors include, but are not limited to the following: general economic and business conditions (on both a national and regional level); interest rate changes; access to suitable financing by NVR and NVR's customers; increased regulation in the mortgage banking industry; the ability of our mortgage banking subsidiary to sell loans it originates into the secondary market; competition; the availability and cost of land and other raw materials used by NVR in its homebuilding operations; shortages of labor; weather related slow-downs; building moratoriums; governmental regulation; fluctuation and volatility of stock and other financial markets; mortgage financing availability; and other factors over which NVR has little or no control. NVR undertakes no obligation to update such forward-looking statements except as required by law. For additional information regarding risk factors, see Part II, Item 1A of this Quarterly Report on Form 10-Q and Part I, Item 1A of NVR's Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Unless the context otherwise requires, references to NVR, we, us, or our include NVR and its consolidated subsidiaries.

Results of Operations for the Three and Six Months Ended June 30, 2014 and 2013***Overview*****Business**

Our primary business is the construction and sale of single-family detached homes, townhomes and condominium buildings, all of which are primarily constructed on a pre-sold basis. To fully serve customers of our homebuilding operations, we also operate a mortgage banking and title services business. We primarily conduct our operations in mature markets. Additionally, we generally grow our business through market share gains in our existing markets and by expanding into markets contiguous to our current active markets. Our four homebuilding reportable segments consist of the following regions:

Mid Atlantic: Maryland, Virginia, West Virginia, Delaware and Washington, D.C.

North East: New Jersey and eastern Pennsylvania

Mid East: New York, Ohio, western Pennsylvania, Indiana and Illinois

South East: North Carolina, South Carolina, Florida and Tennessee

Our lot acquisition strategy is predicated upon avoiding the financial requirements and risks associated with direct land ownership and development. Historically, we generally have not engaged in land development

Table of Contents

to obtain finished lots for use in our homebuilding operations. Instead, we typically have acquired finished lots at market prices from various third party land developers pursuant to fixed price purchase agreements. These purchase agreements require deposits, typically ranging up to 10% of the aggregate purchase price of the finished lots, in the form of cash or letters of credit that may be forfeited if we fail to perform under the purchase agreement. This strategy has allowed us to maximize inventory turnover, which we believe enables us to minimize market risk and to operate with less capital, thereby enhancing rates of return on equity and total capital.

Our continued success is contingent upon our ability to control an adequate supply of finished lots on which to build, and on our developers' ability to timely deliver finished lots to meet the sales demands of our customers. However, during the past several years, the impact of economic conditions on the homebuilding industry negatively impacted our developers' ability to obtain acquisition and development financing or to raise equity investments to finance land development activity. As a result, in certain specific strategic circumstances we deviated from our historical lot acquisition strategy and engaged in joint venture arrangements with land developers or directly acquired raw ground already zoned for its intended use for development. Once we acquire control of any raw ground, we determine whether to sell the raw parcel to a developer and enter into a fixed price purchase agreement with the developer to purchase the finished lots, or whether we will hire a developer to develop the land on our behalf. While joint venture arrangements and direct land development activity are not our preferred method of acquiring finished building lots, we may enter into additional transactions in the future on a limited basis where there exists a compelling strategic or prudent financial reason to do so. We expect, however, to continue to acquire substantially all our finished lot inventory using fixed price purchase agreements with forfeitable deposits.

As of June 30, 2014, we controlled approximately 60,900 lots under purchase agreements with deposits in cash and letters of credit totaling approximately \$306,200 and \$2,400, respectively. Included in the number of controlled lots are approximately 8,000 lots for which we have recorded a contract land deposit impairment reserve of approximately \$55,900 as of June 30, 2014. We also controlled approximately 5,600 lots through four joint venture limited liability corporations (JVs) with an aggregate investment of approximately \$85,500. Further, as of June 30, 2014, we directly owned six separate raw parcels of land, zoned for their intended use, with a current cost basis, including development costs, of approximately \$63,800 that once fully developed will result in approximately 1,150 lots. Of the total finished lots expected to be developed, 125 lots are under contract to be sold to an unrelated party under lot purchase agreements (see Notes 2, 3 and 4 to the condensed consolidated financial statements included herein for additional information regarding fixed price purchase agreements, JVs and land under development, respectively). In addition, NVR has certain properties under contract with land owners that are expected to yield approximately 4,900 lots, which are not included in our number of total lots controlled. Some of these properties may require rezoning or other approvals to achieve the expected yield. These properties are controlled with deposits and letters of credit totaling approximately \$3,500 and \$4,000, respectively as of June 30, 2014, of which approximately \$7,300 is refundable if NVR does not perform under the contract. NVR generally expects to assign the raw land contracts to a land developer and simultaneously enter into a lot purchase agreement with the assignee if the project is determined to be feasible.

In addition to constructing homes primarily on a pre-sold basis and utilizing what we believe is a conservative lot acquisition strategy, we focus on obtaining and maintaining a leading market position in each market we serve. This strategy allows us to gain valuable efficiencies and competitive advantages in our markets, which we believe contributes to minimizing the adverse effects of regional economic cycles and provides growth opportunities within these markets.

Current Business Environment and Key Financial Results

Through the first six months of 2014, the housing markets we serve have generally seen a flattening in the number of home sales and prices. Slow economic growth coupled with reduced affordability have been the primary drivers of the

slowdown in the housing recovery. We have experienced a decline in traffic per community in the first six months of 2014 compared to the same period in 2013. In addition, new home

Table of Contents

competitors have been increasing the number of communities open for sale, which has resulted in a decline in sales per community. The housing market also continues to face challenges from tight mortgage underwriting standards.

Our consolidated revenues for the second quarter of 2014 totaled \$1,102,100, a 9% increase from the second quarter of 2013. Our net income and diluted earnings per share in the current quarter were \$68,178 and \$15.17, respectively, increases of 34% and 50%, respectively, compared to the second quarter of 2013. Diluted earnings per share was favorably impacted by our ongoing share repurchase program, under which we repurchased 317,739 shares of our stock at an aggregate purchase price of \$347,448 during the first six months of 2014. Our gross profit margin within our homebuilding business increased to 18.6% in the second quarter of 2014 compared to 15.9% in the second quarter of 2013. Gross profit margin in the second quarter of 2013 was negatively impacted by a previously disclosed service related accrual of approximately \$15,600 which reduced gross profit margin by 157 basis points of revenue. Our new orders, net of cancellations (New Orders) and the average sales price for New Orders increased 4% and 2%, respectively, compared to the second quarter of 2013.

While our gross profit margin improved from year ago levels, we continue to face gross margin pressure due to increasing land and construction costs. In addition, increased competition in the mortgage banking industry has resulted in reduced loan profitability. We believe that continued improvement in the housing market is dependent upon a sustained overall economic recovery, driven by continued improvement in job growth and consumer confidence levels as well as improvement in wage growth and household formation. Due to the strength of our balance sheet, we believe that we are well positioned to take advantage of opportunities that may arise from future economic and homebuilding market volatility.

Homebuilding Operations

The following table summarizes the results of operations and other data for the consolidated homebuilding operations:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Revenues	\$ 1,084,080	\$ 992,210	\$ 1,883,267	\$ 1,743,078
Cost of sales	\$ 882,778	\$ 834,288	\$ 1,537,930	\$ 1,458,373
Gross profit margin percentage	18.6%	15.9%	18.3%	16.3%
Selling, general and administrative expenses	\$ 93,583	\$ 82,120	\$ 184,215	\$ 160,533
Settlements (units)	2,943	2,878	5,154	5,150
Average settlement price	\$ 368.2	\$ 344.7	\$ 365.3	\$ 338.4
New orders (units)	3,415	3,278	6,740	6,788
Average new order price	\$ 368.0	\$ 361.1	\$ 368.0	\$ 351.8
Backlog (units)			6,531	6,617
Average backlog price			\$ 374.1	\$ 358.6
New order cancellation rate	13.2%	13.8%	12.4%	13.5%

Consolidated Homebuilding - Three Months Ended June 30, 2014 and 2013

Homebuilding revenue increased 9% in the second quarter of 2014 compared to the same period in 2013 primarily as a result of a 7% increase in the average settlement price and a 2% increase in the number of units settled quarter over quarter. The increase in the average settlement price was primarily attributable to the average price of homes in

backlog being approximately 7% higher entering the second quarter of 2014

Table of Contents

compared to the same period in 2013. The higher average price of homes in backlog entering the second quarter of 2014 was attributable to the improved market conditions experienced in 2013 which led to increasing prices in 2013 and into the first quarter of 2014. In addition, beginning backlog was also favorably impacted by a shift in backlog units to our Mid Atlantic segment which is our highest priced segment.

Gross profit margin in the second quarter of 2014 increased 265 basis points to 18.6% compared to 15.9% the second quarter of 2013. Gross profit margin in the second quarter of 2013 was negatively impacted by the aforementioned service related accrual which reduced gross profit margin by 157 basis points. Additionally, second quarter 2014 gross profit margin was favorably impacted by our average settlement price increasing at a higher rate than material and lot costs quarter over quarter.

Selling, general and administrative (SG&A) expense in the second quarter of 2014 increased approximately \$11,500, or 14%, compared to the second quarter of 2013, and increased as a percentage of revenue to 8.6% from 8.3% quarter over quarter. SG&A expense increased primarily due to an increase in sales and marketing expenses and equity-based compensation expense. Sales and marketing costs increased approximately \$5,300 quarter over quarter due to the 9% increase in the average number of active communities. Equity-based compensation expense increased approximately \$4,900 due primarily to the granting of non-qualified stock options under the 2014 Equity Incentive Plan (the 2014 Plan), which was approved by our shareholders at the May 2014 Annual Meeting (see Note 6 in the accompanying condensed consolidated financial statements for additional discussion of equity-based compensation and the 2014 Plan).

The number of New Orders and the average sales price of New Orders increased 4% and 2%, respectively, in second quarter of 2014 when compared to the second quarter of 2013. The increase in New Orders was driven by a 9% increase in the average number of active communities, offset partially by lower absorption rates quarter over quarter. Although the average sales price of New Orders increased slightly quarter over quarter, we have seen a leveling off of sales prices from the first quarter of 2014 through the second quarter.

Consolidated Homebuilding - Six Months Ended June 30, 2014 and 2013

Homebuilding revenue increased 8% for the six months ended June 30, 2014 compared to the same period in 2013 as a result of an 8% increase in the average settlement price. The increase in the average settlement price was primarily attributable to an 8% higher average price of homes in backlog entering 2014 compared to 2013. The higher average price of homes in backlog entering 2014 was attributable to the improved market conditions experienced in 2013.

Gross profit margin in the first six months of 2014 increased to 18.3% compared to 16.3% in the first six months of 2013. As noted previously, gross profit margin in the second quarter of 2013 was negatively impacted by a service related accrual which reduced the 2013 gross profit margin by 89 basis points. Additionally, 2014 gross profit margin was favorably impacted by our average settlement prices increasing at a higher rate than material and lot costs year over year.

SG&A expense in the first six months of 2014 increased approximately \$23,700 compared to the first six months of 2013 and increased as a percentage of revenue to 9.8% from 9.2% year over year. The increase in SG&A expense was attributable to an approximate \$9,100 increase in sales and marketing costs due to the increase in the average number of active communities, an approximate \$7,700 increase in personnel costs due to an increase in headcount year over year, and an approximate \$7,200 increase in equity-based compensation expense in 2014. Equity-based compensation expense increased due to the aforementioned non-qualified stock option grants in the second quarter of 2014 under the 2014 Plan and restricted share unit grants in the second quarter of 2013.

The number of New Orders was 1% lower for the first six months of 2014 compared to the first six months of 2013, while the average sales price of New Orders increased 5% year over year. New Orders were

Table of Contents

down despite a 10% increase in the average number of active communities year over year as sales absorption rates were lower in each of our market segments. Average sales prices were higher in each of our market segments year over year as a result of favorable market conditions in 2013, which led to increasing prices entering 2014. The average sales price of New Orders in the current year was also favorably impacted by a shift in New Orders to our Mid Atlantic and North East market segments, which have higher average sales prices.

Backlog units and dollars were 6,531 units and \$2,443,238, respectively, as of June 30, 2014 compared to 6,617 units and \$2,372,757, respectively, as of June 30, 2013. Backlog units were lower primarily due to our backlog units being approximately 1% lower entering 2014 compared to the same period in 2013. Backlog dollars were favorably impacted by a 5% higher average price of New Orders for the six month period ended June 30, 2014 compared to the six month period ended June 30, 2013.

Backlog, which represents homes sold but not yet settled with the customer, may be impacted by customer cancellations for various reasons that are beyond our control, such as failure to obtain mortgage financing, inability to sell an existing home, job loss, or a variety of other reasons. In any period, a portion of the cancellations that we experience are related to new sales that occurred during the same period, and a portion are related to sales that occurred in prior periods and therefore appeared in the beginning backlog for the current period. Expressed as the total of all cancellations during the period as a percentage of gross sales during the period, our cancellation rate was approximately 12.4% and 13.5% in the first six months of 2014 and 2013, respectively. During the most recent four quarters, approximately 6% of a reporting quarter's beginning backlog cancelled during the fiscal quarter. We can provide no assurance that our historical cancellation rates are indicative of the actual cancellation rates that may occur during the remainder of 2014 or future years.

The backlog turnover rate is impacted by various factors, including, but not limited to, changes in New Order activity, internal production capacity, external subcontractor capacity and other external factors over which we do not exercise control.

Reportable Segments

Homebuilding profit before tax includes all revenues and income generated from the sale of homes, less the cost of homes sold, SG&A expenses, and a corporate capital allocation charge determined at the corporate headquarters. The corporate capital allocation charge eliminates in consolidation, is based on the segment's average net assets employed, and is charged using a consistent methodology in the periods presented. The corporate capital allocation charged to the operating segment allows the Chief Operating Decision Maker to determine whether the operating segment's results are providing the desired rate of return after covering our cost of capital. We record charges on contract land deposits when we determine that it is probable that recovery of the deposit is impaired. For segment reporting purposes, impairments on contract land deposits are generally charged to the operating segment upon the determination to terminate a finished lot purchase agreement with the developer or to restructure a lot purchase agreement resulting in the forfeiture of the deposit. We evaluate our entire net contract land deposit portfolio for impairment each quarter. For additional information regarding our contract land deposit impairment analysis, see the *Critical Accounting Policies* section within this Management Discussion and Analysis. For presentation purposes below, the contract land deposit reserve at June 30, 2014 and 2013 has been allocated to each reportable segment for the respective years to show contract land deposits on a net basis. The net contract land deposit balances below also include approximately \$6,400 and \$2,400 at June 30, 2014 and 2013, respectively, of letters of credit issued as deposits in lieu of cash. The following tables summarize certain homebuilding operating activity by reportable segment for the three months ended June 30, 2014 and 2013:

Table of Contents**Selected Segment Financial Data:**

Table of Contents**Mid Atlantic*****Three Months Ended June 30, 2014 and 2013***

The Mid Atlantic segment had an approximate \$18,600, or 38%, increase in segment profit in the second quarter of 2014 compared to the second quarter of 2013. Segment revenue increased approximately \$62,900, or 11%, quarter over quarter due primarily to a 7% increase in the average settlement price and a 4% increase in the number of units settled. The increase in the average settlement price was favorably impacted by a 7% higher average price of homes in backlog entering the second quarter of 2014 compared to the same period in 2013. The higher average price of homes in backlog entering 2014 was attributable to the improved market conditions experienced in 2013, which led to increasing prices in 2013 and into the first quarter of 2014. The increase in units settled was attributable to a higher backlog turnover rate quarter over quarter. The Mid Atlantic segment's gross profit margin increased 277 basis points to 18.7% from 15.9% quarter over quarter. Gross profit margin in the second quarter of 2013 was negatively impacted by the previously discussed service related accrual, which reduced 2013 gross profit margin by 262 basis points of revenue.

Segment New Orders and the average sales price of New Orders increased 5% and 2%, respectively, in the second quarter of 2014 compared to the second quarter of 2013. The increase in New Orders quarter over quarter was driven by a 13% increase in the average number of active communities, offset partially by lower absorption rates. In addition, New Orders in the current quarter were negatively impacted by an increase in the cancellation rate to 13.6% from 12.2% in the prior year quarter.

Six Months Ended June 30, 2014 and 2013

The Mid Atlantic segment had an approximate \$23,100, or 27%, increase in segment profit in the first six months of 2014 compared to the same period in 2013. Segment revenue increased approximately \$96,100, or 9%, year over year due primarily to an 8% increase in the average settlement price in 2014 compared to 2013. The increase in the average settlement price was favorably impacted by a 7% higher average price of homes in backlog entering 2014 compared to the same period in 2013. The Mid Atlantic segment's gross profit margin increased to 18.9% in 2014 from 16.8% in 2013. As noted above, gross profit margin in the second quarter of 2013 was negatively impacted by a service related accrual which reduced 2013 gross profit margin by 152 basis points of revenue. In addition, 2014 gross profit margin was favorably impacted as a result of our average settlement price increasing at a higher rate than material and lot costs year over year.

Segment New Orders and the average sales price for New Orders in the first six months of 2014 increased 1% and 4%, respectively compared to the same period in 2013. New Orders were relatively flat despite a 15% increase in the average number of active communities in 2014 compared to 2013 due to lower absorption rates attributable to lower traffic levels year over year. The increase in the average sales price of New Orders is attributable to the favorable market conditions in 2013, which led to higher average sales prices entering 2014.

North East***Three Months Ended June 30, 2014 and 2013***

The North East segment had an approximate \$2,000, or 31%, increase in segment profit in the second quarter of 2014 compared to the second quarter of 2013. Segment revenue increased approximately \$10,200, or 12%, quarter over quarter due to a 5% increase in the number of units settled, coupled with a 7% increase in the average settlement price. The increase in units settled was attributable to a 5% higher backlog unit balance entering the second quarter of 2014

compared to the backlog unit balance entering the second quarter of 2013. The increase in the average settlement price was favorably impacted by a 7% higher average price of homes in backlog entering the second quarter of 2014 compared to the same period in 2013. The North East segment's gross profit margin increased to 19.1% in 2014 from 17.2% in 2013. Segment profit and gross profit margin were favorably impacted by a shift in settlements to higher priced markets with higher gross margins.

Table of Contents

Segment New Orders increased approximately 5%, while the average sales price of New Orders was flat in the second quarter of 2014 compared to the same period in 2013. The increase in New Orders was driven by a 17% increase in the average number of active communities, offset partially by a decrease in community absorption rates attributable to reduced traffic levels quarter over quarter. New Orders were also favorably impacted by a decrease in the cancellation rate to 13.5% in the second quarter of 2014 from 17.7% in the same period in 2013.

Six Months Ended June 30, 2014 and 2013

The North East segment had an approximate \$4,600, or 46%, increase in segment profit in the first six months of 2014 compared to the same period of 2013. The increase in segment profit was primarily driven by an increase of approximately \$26,400, or 18%, in revenue year over year due to a 12% increase in the number of units settled, coupled with a 6% increase in the average settlement price. The increase in units settled was attributable to a 14% higher backlog unit balance entering 2014 compared to the backlog unit balance entering 2013. The increase in the average settlement price was favorably impacted by a 5% higher average price of homes in backlog entering 2014 compared to the same period in 2013. The North East segment's gross profit margin increased to 18.7% in 2014 from 17.0% in 2013. Gross profit margin was favorably impacted by the increase in the average settlement price and by increased settlement volume, allowing us to better leverage certain operating costs in 2014.

Segment New Orders and the average sales price of New Orders increased approximately 3% and 4%, respectively, during the first six months of 2014 from the same period in 2013. The increase in New Orders was driven by a 17% increase in the average number of active communities, offset partially by a decrease in community absorption rates attributable to reduced traffic levels year over year. The increase in the average sales price of New Orders is attributable to the favorable market conditions in 2013, which led to higher average sales prices entering 2014.

Mid East***Three Months Ended June 30, 2014 and 2013***

The Mid East segment had an approximate \$1,700, or 18%, increase in segment profit in the second quarter of 2014 compared to the second quarter of 2013. Segment revenue was higher by approximately \$7,600, or 4%, quarter over quarter. Revenue increased primarily due to a 6% increase in the average settlement price, offset partially by a 2% decrease in the number of units settled quarter over quarter. The average settlement price was favorably impacted by a 4% higher average price of homes in backlog entering the second quarter of 2014 compared to the same period in 2013. The decrease in units settled was attributable to a 4% lower backlog unit balance entering the second quarter of 2014 compared to the same period in 2013. The Mid East's gross profit margin increased to 15.7% in the second quarter of 2014 from 14.6% in the same period of 2013, due primarily to our average settlement price increasing at a higher rate than lot and certain material costs quarter over quarter.

Segment New Orders decreased 1% in the second quarter of 2014 compared to the same period in 2013, while the average sales price increased 3% quarter over quarter. New Orders were negatively impacted by a 1% decrease in the average number of active communities quarter over quarter. The increase in the average sales price of New Orders was attributable to a shift in mix to higher priced communities in certain markets.

Table of Contents***Six Months Ended June 30, 2014 and 2013***

The Mid East segment had an approximate \$400, or 3%, decrease in segment profit in the first six months of 2014 compared to the same period of 2013. The decrease in segment profit was driven by a decrease in revenue of approximately \$12,500 or 3%, year over year due primarily to a 10% decrease in the number of units settled, offset partially by a 7% increase in the average settlement price year over year. The decrease in settlements was primarily attributable to a 10% lower backlog unit balance entering 2014 compared to the same period in 2013. The average settlement price was favorably impacted by an 8% higher average price of homes in backlog entering 2014 compared to the same period in 2013. The segment's gross profit margin increased to 15.0% in 2014 from 13.6% in 2013, due primarily to our average settlement price increasing at a higher rate than lot and certain material costs year over year.

Segment New Orders decreased 4%, while the average sales price of New Orders increased 3% in the first six months of 2014 compared to the same period in 2013. New Orders were negatively impacted by a 2% decrease in the average number of active communities year over year. The increase in the average price of New Orders was attributable to a shift in mix to higher priced communities in certain markets.

South East***Three Months Ended June 30, 2014 and 2013***

The South East segment had an approximate \$2,800, or 55%, increase in segment profit in the second quarter of 2014 compared to the second quarter of 2013. Segment revenue increased approximately \$11,100, or 11%, quarter over quarter primarily due to a 3% increase in the number of units settled and a 7% increase in the average settlement price. The increase in settlements was driven primarily by a higher backlog turnover rate in the second quarter of 2014 compared to the same period in 2013. The increase in the average settlement price was attributable primarily to a 6% higher average sales price of homes in backlog entering the second quarter of 2014 compared to the same period in 2013. The South East segment's gross profit margin increased to 18.1% in the second quarter of 2014 from 15.4% in the second quarter of 2013 due primarily to our average settlement prices increasing at a higher rate than lot and certain material costs quarter over quarter.

Segment New Orders and the average sales price of New Orders increased approximately 10% and 3%, respectively, during the second quarter of 2014 compared to the same period in 2013. New Orders were favorably impacted by a 13% increase in the average number of active communities, offset partially by lower absorption rates attributable to reduced traffic levels quarter over quarter. In addition, New Orders were favorably impacted by a decrease in the cancellation rate to 13.1% in the second quarter of 2014 from 16.0% in the same period of 2013. The increase in the average sales price for New Orders was primarily attributable to the initial sales of our NVHomes product line in the Raleigh market in 2014, which sells at a higher price point.

Six Months Ended June 30, 2014 and 2013

The South East segment had an approximate \$7,200, or 82%, increase in segment profit in the first six months of 2014 compared to the same period of 2013. Segment revenue increased approximately \$30,200, or 16%, year over year due to a 5% increase in the number of units settled and a 10% increase in the average settlement price. The increase in settlements was driven primarily by a higher backlog turnover rate in 2014 compared to 2013. The average settlement price in 2014 was favorably impacted by a 9% higher average price of homes in backlog entering 2014 compared to the same period in 2013. The South East segment's gross profit margin increased to 18.1% in 2014 from 15.3% in 2013, due primarily to our average settlement prices increasing at a higher rate than lot and certain material costs year over year.

Segment New Orders decreased 4%, while the average sales price increased 5% in the first six months of 2014 compared to the same period in 2013. New Orders were lower despite an 11% increase in the average

Table of Contents

number of active communities in 2014 compared to 2013 due to lower absorption levels attributable to lower traffic levels year over year. The increase in the average sales price for New Orders in 2014 was attributable to the introduction of our NVHomes product line in the Raleigh market in 2014, which sells at a higher price point and to a shift in mix in New Orders to higher priced markets.

Homebuilding Segment Reconciliations to Consolidated Homebuilding Operations

In addition to the corporate capital allocation and contract land deposit impairments discussed above, the other reconciling items between homebuilding segment profit and homebuilding consolidated profit before tax include unallocated corporate overhead (which includes all management incentive compensation), equity-based compensation expense, consolidation adjustments and external corporate interest expense. Our overhead functions, such as accounting, treasury, human resources, etc., are centrally performed and the costs are not allocated to our operating segments. Consolidation adjustments consist of such items to convert the reportable segments' results, which are predominantly maintained on a cash basis, to a full accrual basis for external financial statement presentation purposes, and are not allocated to our operating segments. Likewise, equity-based compensation expense is not charged to the operating segments. External corporate interest expense is primarily comprised of interest charges on our 3.95% Senior Notes due 2022, and is not charged to the operating segments because the charges are included in the corporate capital allocation discussed above.

	Three Months Ended June 30,		Six Months Ended June 30,

Mortgage Banking Segment***Three and Six Months Ended June 30, 2014 and 2013***

We conduct our mortgage banking activity through NVR Mortgage Finance, Inc. (NVRM), a wholly owned subsidiary. NVRM focuses almost exclusively on serving homebuilding's customer base. Following is a table of financial and statistical data for the three and six months ended June 30, 2014 and 2013:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
<i>Loan closing volume:</i>				
Total principal	\$ 675,624	\$ 646,450	\$ 1,148,557	\$ 1,120,216
<i>Loan volume mix:</i>				
Adjustable rate mortgages	17%	4%	15%	3%
Fixed rate mortgages	83%	96%	85%	97%
<i>Operating profit:</i>				
Segment profit	\$ 7,427	\$ 9,316	\$ 9,267	\$ 21,118
Stock option expense	(1,181)	(798)	(2,030)	(1,439)
Mortgage banking income before tax	\$ 6,246	\$ 8,518	\$ 7,237	\$ 19,679
<i>Capture rate:</i>				
	82%	85%	80%	84%
<i>Mortgage Banking fees:</i>				
Net gain on sale of loans	\$ 12,510	\$ 12,586	\$ 20,505	\$ 28,159
Title services	5,349	4,980	9,378	8,723
Servicing fees	115	116	214	188

\$ 17,974	\$ 17,682	\$ 30,097	\$ 37,070
-----------	-----------	-----------	-----------

Loan closing volume for the three and six months ended June 30, 2014 increased 5% and 3%, respectively, over the same period for 2013. The 2014 increases were primarily attributable to a 6% increase in the average loan amount for both the three and six month periods, which is consistent with the average settlement price increases for the homebuilding operations. The increase in the average loan amount was partially offset by a decrease in the number of loans closed by NVRM for our homebuyers who obtain a

Table of Contents

mortgage to purchase the home (the Capture Rate), which for the three and six months ended June 30, 2014 decreased to 82% and 80%, respectively, compared to 85% and 84%, respectively, for the same periods in 2013. The decrease in Capture Rate is primarily due to a more competitive market for mortgage loans as other lenders refinancing activity has slowed.

Segment profit for the three and six months ended June 30, 2014 decreased by approximately \$1,900 and \$11,900, respectively, from the same periods for 2013. For the three month period, the decrease was primarily attributable to an approximate \$2,000 increase in general and administrative expenses. The increase in general and administrative expenses was primarily attributable to increased staffing in response to increased mortgage regulations and expected higher loan volume. For the six month period, the decrease was primarily attributable to an approximately \$4,900 increase in general and administrative expenses and a decrease of approximately \$7,000 in mortgage banking fees. The increase in general and administrative expenses was a result of the aforementioned increase in staffing. The decrease in mortgage banking fees is primarily attributable to a more competitive mortgage market for mortgage loans as other lenders refinancing activity has slowed, resulting in reduced loan profitability.

Mortgage Banking Other

We sell all of the loans we originate into the secondary mortgage market. Insofar as we underwrite our originated loans to the standards and specifications of the ultimate investor, we have no further financial obligations from the issuance of loans, except in certain limited instances where early payment default occurs. Those underwriting standards are typically equal to or more stringent than the underwriting standards required by Fannie Mae (FNMA), the Department of Veterans Affairs (VA) and the Federal Housing Administration (FHA). Because we sell all of our loans and do not service them, there is often a substantial delay between the time that a loan goes into default and the time that the investor requests us to reimburse them for losses incurred because of the default. We believe that all of the loans that we originate are underwritten to the standards and specifications of the ultimate investor to whom we sell our originated loans. We employ a quality control department to ensure that our underwriting controls are effective, and further assess the underwriting function as part of our assessment of internal controls over financial reporting.

NVRM has always maintained an allowance for losses on mortgage loans originated that reflects our judgment of the present loss exposure from the loans that we have originated and sold. The allowance is calculated based on an analysis of historical experience and exposure. At June 30, 2014, we had an allowance for loan losses of approximately \$8,950. Although we consider the allowance for loan losses reflected on the June 30, 2014 balance sheet to be adequate, there can be no assurance that this allowance will prove to be adequate to cover losses on loans previously originated.

NVRM is dependent on our homebuilding operations customers for business. If New Orders and sales prices of the homebuilding operations decline, NVRM's operations will also be adversely affected. In addition, the mortgage segment's operating results may be adversely affected in future periods due to the continued tightening and volatility of the credit markets, changes in investor funding times, increased regulation of mortgage lending practices and increased competition in the mortgage market.

Liquidity and Capital Resources***Lines of Credit and Notes Payable***

Our homebuilding business segment funds its operations from cash flows provided by operating activities and the public debt and equity markets. On September 5, 2012, we filed a Shelf Registration Statement (the Shelf) with the

Securities and Exchange Commission to register for future offer and sale an unlimited amount of debt securities, common shares, preferred shares, depositary shares representing preferred shares and warrants. On September 10, 2012, we issued \$600,000 aggregate principal amount of 3.95% Senior Notes due 2022 (the Senior Notes) under the Shelf. The Senior Notes mature on September 15, 2022 and

Table of Contents

bear interest at 3.95%, payable semi-annually in arrears on March 15 and September 15. The Senior Notes are senior unsecured obligations and rank equally in right of payment with any of NVR's existing and future unsecured senior indebtedness, will rank senior in right of payment to any of NVR's future indebtedness that is by its terms expressly subordinated to the Senior Notes and will be effectively subordinated to any of NVR's existing and future secured indebtedness to the extent of the value of the collateral securing such indebtedness. The indenture governing the Senior Notes does not contain any financial covenants, however, it does contain, among other items, and subject to certain exceptions, covenants that restrict our ability to create, incur, assume or guarantee secured debt, enter into sale and leaseback transactions and conditions related to mergers and/or the sale of assets.

Our mortgage banking subsidiary, NVRM, provides for its mortgage origination and other operating activities using cash generated from operations, borrowings from its parent company, NVR, as well as a revolving mortgage repurchase facility, which is non-recourse to NVR. Our revolving mortgage repurchase agreement with U.S. Bank National Association provides for loan purchases up to \$25,000, subject to certain sub-limits (the Repurchase Agreement). The purpose of the Repurchase Agreement is to finance the origination of mortgage loans by NVRM. The Repurchase Agreement expires on July 29, 2015. Advances under the Repurchase Agreement carry a Pricing Rate based on the Libor Rate plus the Libor Margin, or the Default Pricing Rate, as determined under the Repurchase Agreement, provided that the Pricing Rate shall not be less than 3.00%. There are several restrictions on purchased loans, including that they cannot be sold to others, they cannot be pledged to anyone other than the agent, and they cannot support any other borrowing or repurchase agreement. The Repurchase Agreement contains various affirmative and negative covenants. The negative covenants include among others, certain limitations on transactions involving acquisitions, mergers, the incurrence of debt, sale of assets and creation of liens upon any of its mortgage notes. Additional covenants include (i) a tangible net worth requirement, (ii) a minimum liquidity requirement, (iii) a minimum net income requirement, and (iv) a maximum leverage ratio requirement. The Company was in compliance with all covenants under the Repurchase Agreement at June 30, 2014. At June 30, 2014 there was no debt outstanding under the Repurchase Agreement and there were no borrowing base limitations.

Cash Flows

For the six months ended June 30, 2014, cash and cash equivalents decreased by \$312,548. Cash used in our operating activities was \$17,080. Cash was used to fund the increase in homebuilding inventory of \$212,502, as a result of an increase in units under construction at June 30, 2014 compared to December 31, 2013. Cash was provided by net proceeds of \$62,648 from mortgage loan activity and a \$27,298 increase in customer deposits. Cash from operating activities was also favorably impacted by a \$49,946 increase in accounts payable due to the increase in inventory.

Net cash used in investing activities was \$12,160. Cash was used for additions to property, plant and equipment of \$20,805. Cash was provided by the receipt of capital distributions from our unconsolidated JVs totaling \$8,282.

Net cash used in financing activities was \$283,308. Cash was used to repurchase 317,739 shares of our common stock at an aggregate purchase price of \$347,448 under our ongoing common stock repurchase program. Stock option exercise activity provided \$60,593 in exercise proceeds, and we realized \$6,050 in excess income tax benefits from equity-based compensation plan activity.

Equity Repurchases

In addition to funding growth in our homebuilding and mortgage banking operations, we historically have used a substantial portion of our excess liquidity to repurchase outstanding shares of our common stock in open market and privately negotiated transactions. This ongoing repurchase activity is conducted pursuant to publicly announced Board authorizations, and is typically executed in accordance with the safe-harbor provisions of Rule 10b-18 promulgated

under the Exchange Act. In addition, the Board resolutions

Table of Contents

authorizing us to repurchase shares of our common stock specifically prohibit us from purchasing shares from our officers, directors, Profit Sharing/401(k) Plan Trust or Employee Stock Ownership Plan Trust. The repurchase program assists us in accomplishing our primary objective of increasing shareholder value. See Part II, Item 2 of this Quarterly Report on Form 10-Q for further discussion of repurchase activity during the second quarter of 2014.

Critical Accounting Policies

General

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. We continually evaluate the estimates we use to prepare the consolidated financial statements and update those estimates as necessary. In general, our estimates are based on historical experience, on information from third party professionals, and other various assumptions that are believed to be reasonable under the facts and circumstances. Actual results could differ materially from those estimates made by management.

Homebuilding Inventory

The carrying value of inventory is stated at the lower of cost or market value. The cost of lots and completed and uncompleted housing units represent the accumulated actual cost of the units. Field construction supervisors' salaries and related direct overhead expenses are included in inventory costs. Interest costs are not capitalized into inventory, with the exception of land under development. Upon settlement, the cost of the unit is expensed on a specific identification basis. The cost of building materials is determined on a first-in, first-out basis.

Sold inventory is evaluated for impairment based on the contractual sales price compared to the total estimated cost to construct. Unsold inventory is evaluated for impairment by analyzing recent comparable sales prices within the applicable community compared to the costs incurred to date plus the expected costs to complete. Any calculated impairments are recorded immediately.

Land Under Development and Contract Land Deposits

Land Under Development

On a very limited basis, we directly acquire raw parcels of land already zoned for its intended use to develop into finished lots. Land under development includes the land acquisition costs, direct improvement costs, capitalized interest, where applicable, and real estate taxes.

Land under development, including the land under development held by our unconsolidated joint ventures and the related joint venture investments, is reviewed for potential write-downs when impairment indicators are present. In addition to considering market and economic conditions, we assess land under development impairments on a community-by-community basis, analyzing, as applicable, current sales absorption levels, recent sales' gross profit, and the dollar differential between the projected fully-developed cost of the lots and the current market price for lots. If indicators of impairment are present for a community, we perform an analysis to determine if the undiscounted cash flows estimated to be generated by those assets are less than their carrying amounts, and if they are, impairment charges are required to be recorded in an amount by which the carrying amount of the assets exceeds the fair value of the assets. Our determination of fair value is primarily based on discounting the estimated future cash flows at a rate

commensurate with the inherent risks associated with the assets and related estimated cash flow streams.

Table of Contents

At June 30, 2014, we had approximately \$63,800 in land under development in six separate communities. In addition, at June 30, 2014, we had an aggregate investment totaling approximately \$85,500 in four separate JVs that controlled land under development. None of the communities classified as land under development nor any of the undeveloped land held by the JVs had any indicators of impairment at June 30, 2014. As such, we do not believe that any of the land under development is impaired at this time. However, there can be no assurance that we will not incur impairment charges in the future due to unanticipated adverse changes in the economy or other events adversely affecting specific markets or the homebuilding industry.

Contract Land Deposits

We purchase finished lots under fixed price purchase agreements that require deposits that may be forfeited if we fail to perform under the contract. The deposits are in the form of cash or letters of credit in varying amounts and represent a percentage of the aggregate purchase price of the finished lots.

We maintain an allowance for losses on contract land deposits that reflects our judgment of the present loss exposure in the existing contract land deposit portfolio at the end of the reporting period. To analyze contract land deposit impairments, we utilize a loss contingency analysis that is conducted each quarter. In addition to considering market and economic conditions, we assess contract land deposit impairments on a community-by-community basis pursuant to the purchase contract terms, analyzing, as applicable, current sales absorption levels, recent sales gross profit, the dollar differential between the contractual purchase price and the current market price for lots, a developer's financial stability, a developer's financial ability or willingness to reduce lot prices to current market prices, and the contract's default status by either us or the developer along with an analysis of the expected outcome of any such default.

Our analysis is focused on whether we can sell houses profitably in a particular community in the current market with which we are faced. Because we do not own the finished lots on which we had placed a contract land deposit, if the above analysis leads to a determination that we cannot sell homes profitably at the current contractual lot price, we then determine whether we will elect to default under the contract, forfeit our deposit and terminate the contract, or whether we will attempt to restructure the lot purchase contract, which may require us to forfeit the deposit to obtain contract concessions from a developer. We also assess whether an impairment is present due to collectability issues resulting from a developer's non-performance because of financial or other conditions.

Although we consider the allowance for losses on contract land deposits reflected on the June 30, 2014 condensed consolidated balance sheet to be adequate (see Note 2 to the accompanying condensed consolidated financial statements), there can be no assurance that this allowance will prove to be adequate over time to cover losses due to unanticipated adverse changes in the economy or other events adversely affecting specific markets or the homebuilding industry.

Excess Reorganization Value

Reorganization value in excess of identifiable assets (*excess reorganization value*) is an indefinite-lived intangible asset that was created upon our emergence from bankruptcy on September 30, 1993. Based on the allocation of our reorganization value, the portion of our reorganization value which was not attributed to specific tangible or intangible assets has been reported as excess reorganization value, which is treated similarly to goodwill. Excess reorganization value is not subject to amortization. Rather, excess reorganization value is subject to an impairment assessment on an annual basis or more frequently if changes in events or circumstances indicate that impairment may have occurred. Because excess reorganization value was based on the reorganization value of our entire enterprise upon emergence from bankruptcy, the impairment assessment is conducted on an enterprise basis based on our total equity compared to the market value of our outstanding publicly-traded common stock. We do not believe that excess reorganization

value is impaired at this time. However, changes in strategy or continued adverse changes in market conditions could impact this judgment and require an impairment loss to be recognized if our book value, including excess reorganization value, exceeds the fair value.

Table of Contents***Warranty/Product Liability Accruals***

Warranty and product liability accruals are established to provide for estimated future costs as a result of construction and product defects, product recalls and litigation incidental to our business. Liability estimates are determined based on our judgment considering such factors as historical experience, the likely current cost of corrective action, manufacturers and subcontractors participation in sharing the cost of corrective action, consultations with third party experts such as engineers, and evaluations by our General Counsel and outside counsel retained to handle specific product liability cases. Although we consider the warranty and product liability accrual reflected on the June 30, 2014 condensed consolidated balance sheet to be adequate (see Note 11 to the accompanying condensed consolidated financial statements), there can be no assurance that this accrual will prove to be adequate over time to cover losses due to increased costs for material and labor, the inability or refusal of manufacturers or subcontractors to financially participate in corrective action, unanticipated adverse legal settlements, or other unanticipated changes to the assumptions used to estimate the warranty and product liability accrual.

Equity-Based Compensation Expense

Compensation costs related to our equity-based compensation plans are recognized within our income statement. The costs recognized are based on the grant date fair value. Compensation cost for equity-based grants is recognized on a straight-line basis over the requisite service period for the entire award (from the date of grant through the period of the last separately vesting portion of the grant). For the recognition of equity-based compensation expense, the Options which are subject to a performance condition are treated as a separate award from the service-only Options, and compensation expense for Options subject to a performance condition is recognized when it becomes probable that the stated performance target will be achieved.

We calculate the fair value of our non-publicly traded, employee stock options using the Black-Scholes option-pricing model. While the Black-Scholes model is a widely accepted method to calculate the fair value of options, its results are dependent on input variables, two of which, expected term and expected volatility, are significantly dependent on management's judgment. We have concluded that our historical exercise experience is the best estimate of future exercise patterns to determine an option's expected term. To estimate expected volatility, we analyze the historical volatility of our common stock over a period equal to the option's expected term. Changes in management's judgment of the expected term and the expected volatility could have a material effect on the grant-date fair value calculated and expensed within the income statement. In addition, we are required to estimate future grant forfeitures when considering the amount of stock-based compensation costs to record. We have concluded that our historical forfeiture rate is the best measure to base our estimate of future forfeitures of equity-based compensation grants. However, there can be no assurance that our future forfeiture rate will not be materially higher or lower than our historical forfeiture rate, which would affect the aggregate cumulative compensation expense recognized.

In addition, when recognizing stock based compensation cost related to performance condition option grants, we are required to make a determination as to whether the performance conditions will be met prior to the completion of the actual performance period. The performance metric is based on our return on capital performance during 2014 through 2016. While we currently believe that this performance condition will be satisfied at the target level and are recognizing compensation expense related to such Options accordingly, our future expected activity levels could cause us to make a different determination, resulting in a change to the compensation expense to be recognized related to performance condition option grants that would otherwise have been recognized to date. Although we believe that the compensation costs recognized during the three and six month periods ended June 30, 2014 are representative of the cumulative ratable amortization of the grant-date fair value of unvested options outstanding and expected to be exercised, changes to the estimated input values such as expected term and expected volatility and changes to the determination of whether performance condition grants will vest, could produce widely different fair values.

Table of Contents***Mortgage Loan Loss Allowance***

We originate several different loan products to our customers to finance the purchase of their home. We sell all of the loans we originate into the secondary mortgage market generally within 30 days from origination. All of the loans that we originate are underwritten to the standards and specifications of the ultimate investor. Insofar as we underwrite our originated loans to those standards, we bear no increased concentration of credit risk from the issuance of loans, except in certain limited instances where early payment default occurs. Those underwriting standards are typically equal to or more stringent than the underwriting standards required by FNMA, VA and FHA. We employ a quality control department to ensure that our underwriting controls are effectively operating, and further assess the underwriting function as part of our assessment of internal controls over financial reporting. We maintain an allowance for losses on mortgage loans originated that reflects our judgment of the present loss exposure in the loans that we have originated and sold. The allowance is calculated based on an analysis of historical experience and exposure. Although we consider the allowance for loan losses reflected on the June 30, 2014 condensed consolidated balance sheet to be adequate, there can be no assurance that this allowance will prove to be adequate over time to cover losses due to unanticipated changes to the assumptions used to estimate the mortgage loan loss allowance.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

There have been no material changes in our market risks during the six months ended June 30, 2014. For additional information regarding market risk, see our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Exchange Act Rule 13a-15. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective. There have been no changes in our internal control over financial reporting in the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

In October 2004, Patrick Tracy, whom NVR had employed as a Sales and Marketing Representative (SMR), filed a lawsuit against the Company in the U.S. District Court for the Western District of New York alleging that NVR had misclassified him and other SMRs as outside sales personnel exempt from certain state and federal wage laws, including overtime pay requirements. Mr. Tracy's attorneys subsequently filed several other lawsuits in various courts asserting substantially similar claims on behalf of various classes or groups of SMRs. None of those courts have held that the claims are appropriate for class, collective, or other group treatment, and the Western District of New York ruled in April 2013 that the claims in Mr. Tracy's case could not proceed on such a basis. The Western District of New York reached the same conclusion in July 2014 regarding a separate case that Mr. Tracy's attorneys brought on behalf of other SMRs.

In October 2013, Mr. Tracy's individual claims were tried by a jury, which returned a unanimous verdict in NVR's favor and found that we had properly classified Mr. Tracy as an exempt outside sales person.

Table of Contents

The plaintiff filed a notice of appeal on February 27, 2014, but he has not yet identified any issues as to which he may seek appellate review. The remainder of the cases noted above are in various stages of pre-trial proceedings, many of them stayed or administratively closed pending a final disposition of the *Tracy* action.

We believe that our compensation practices in regard to SMRs are entirely lawful and have vigorously defended all claims challenging those practices. In light of the points noted above, we have not recorded any associated liabilities on the accompanying condensed consolidated balance sheets in conjunction with any of those claims.

In June 2010, we received a Request for Information from the United States Environmental Protection Agency (EPA) pursuant to Section 308 of the Clean Water Act. The request sought information about storm water discharge practices in connection with homebuilding projects completed or underway by us in New York and New Jersey. We cooperated with this request, and provided information to the EPA. We were subsequently informed by the United States Department of Justice (DOJ) that the EPA forwarded the information on the matter to the DOJ, and the DOJ requested that we meet with the government to discuss the status of the case. Meetings took place in January 2012 and August 2012 with representatives from both the EPA and DOJ. It is not yet known what next steps, if any, the DOJ will take in the matter. We intend to continue cooperating with any future EPA and/or DOJ inquiries. At this time, we cannot predict the outcome of this inquiry, nor can we reasonably estimate the potential costs that may be associated with its eventual resolution.

We are also involved in various other litigation arising in the ordinary course of business. In the opinion of management, and based on advice of legal counsel, this litigation is not expected to have a material adverse effect on our financial position, results of operations or cash flows. Legal costs incurred in connection with outstanding litigation are expensed as incurred.

Item 1A. Risk Factors

There have been no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013 in response to Item 1A. Part 1 of such Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(Dollars in thousands, except per share data)

We had two repurchase authorizations outstanding during the quarter ended June 30, 2014. On July 30, 2013 and December 17, 2013, we publicly announced the Board of Directors' approval for us to repurchase up to an aggregate of \$300,000 per authorization, of our common stock in one or more open market and/or privately negotiated transactions. The repurchase authorizations do not have expiration dates. We repurchased the following shares of our common stock during the second quarter of 2014:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number (or Approximate Dollar Value) of
--------	--	---------------------------------	--	---

			or Programs	Shares that May Yet Be Purchased Under the Plans or Programs
April 1 - 30, 2014	85,684	\$ 1,109.34	85,684	\$ 310,496
May 1 - 31, 2014 (1)	124,279	\$ 1,087.66	124,279	\$ 175,322
June 1 - 30, 2014	75,399	\$ 1,122.61	75,399	\$ 90,678
Total	285,362	\$ 1,103.40	285,362	

(1) 9,733 shares were purchased under the July 30, 2013 Authorization, which fully utilized the July 30, 2013 Authorization. The remaining 114,546 shares were purchased under the December 17, 2013 Authorization.

Table of Contents

On July 31, 2014, the Board of Directors approved a repurchase authorization providing us authorization to repurchase up to an aggregate of \$300,000 of our common stock in one or more open market and/or privately negotiated transactions.

Item 6. Exhibits

(a) Exhibits:

31.1	Certification of NVR's Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002. Filed herewith.
31.2	Certification of NVR's Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002. Filed herewith.
32	Certification of NVR's Chief Executive Officer and Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. Filed herewith.
