Matthews Asian Growth and Income Fund

SUMMARY PROSPECTUS INSTITUTIONAL CLASS

April 30, 2015

TICKER: MICSX

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus and other information about the Fund online at matthewsasia.com/prospectus. You may also obtain this information at no additional cost by calling 800.789.ASIA (2742) or by sending an e-mail request to prospectus@matthewsasia.com. The Fund's Prospectus and Statement of Additional Information, both dated April 30, 2015, are incorporated by reference into this Summary Prospectus.

Investment Objective

Long-term capital appreciation. The Fund also seeks to provide some current income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of this Fund.

SHAREHOLDER FEES

(fees paid directly from your investment)

Maximum Account Fee on Redemptions (for wire redemptions only)	\$9
--	-----

ANNUAL OPERATING EXPENSES

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.66%
Distribution (12b-1) Fees	
Other Expenses	0.26%
Administration and Shareholder Servicing Fees	0.14%
Total Annual Fund Operating Expenses	0.92%

EXAMPLE OF FUND EXPENSES

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One year: \$94

Three years: \$293

Five years: \$509

Ten years: \$1,131

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example of fund expenses, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 17% of the average value of its portfolio.

Principal Investment Strategy

Under normal market conditions, the Matthews Asian Growth and Income Fund seeks to achieve its investment objective by investing at least 80% of its net assets, which include borrowings for investment purposes, in dividend-paying common stock, preferred stock and other equity securities, and convertible securities as well as fixed-income securities, of any duration or quality, including high yield securities (also known as junk bonds), of companies located in Asia, which consists of all countries and markets in Asia, including developed, emerging, and frontier countries and markets in the Asian region. A company is considered to be located in a country or a region if it has substantial ties to that country or region, and currently, Matthews makes that determination primarily based on one or more of the following five criteria: if the

PS-MICSX-0415

company (i) is organized under the laws of that country or any country in that region; (ii) derives at least 50% of its revenues or profits from goods produced or sold, investments made, or services performed, or has at least 50% of its assets located, within that country or region; (iii) has the primary trading markets for its securities in that country or region; (iv) has its principal place of business in or is otherwise headquartered in that country or region; or (v) is a governmental entity or an agency, instrumentality or a political subdivision of that country or any country in that region. The Fund may also invest in depositary receipts, including American, European, and Global Depositary Receipts.

The Fund attempts to offer investors a relatively stable means of participating in a portion of the Asian region's growth prospects, while providing some downside protection, in comparison to a portfolio that invests purely in common stocks. The strategy of owning convertible bonds and dividend-paying equities is designed to help the Fund to meet its investment objective while helping to reduce the volatility of its portfolio. Matthews expects that the companies in which the Fund invests typically will be of medium or large size, but the Fund may invest in companies of any size. Matthews measures a company's size with respect to fundamental criteria such as, but not limited to, market capitalization, book value, revenues, profits, cash flow, dividends paid and number of employees.

Principal Risks of Investment

There is no guarantee that your investment in the Fund will increase in value. The value of your investment in the Fund could go down, meaning you could lose money. The principal risks of investing in the Fund are:

Political, Social and Economic Risks: The value of the Fund's assets may be adversely affected by political, economic, social and religious instability; inadequate investor protection; changes in laws or regulations of countries within the Asian region (including countries in which the Fund invests, as well as the broader region); international relations with other nations; natural disasters; corruption and military activity. The Asian region, and particularly China, Japan and South Korea, may be adversely affected by political, military, economic and other factors related to North Korea. In addition, China's long-running conflict over Taiwan, border disputes with many of its neighbors and historically strained relations with Japan could adversely impact economies in the region. The economies of many Asian countries differ from the economies of more developed countries in many respects, such as rate of growth, inflation, capital reinvestment, resource self-sufficiency, financial system stability, the national balance of payments position and sensitivity to changes in global trade. Certain Asian countries are highly dependent upon and may be affected by developments in the United States, Europe and other Asian economies.

Currency Risks: When the Fund conducts securities transactions in a foreign currency, there is the risk of the value of the foreign currency increasing or decreasing against the value of the U.S. dollar. The value of an investment denominated in a foreign currency will decline in dollar terms if that currency weakens against the dollar. While the Fund is permitted to hedge currency risks, Matthews does not anticipate doing so at this time. Additionally, Asian countries may utilize formal or informal currency-exchange controls or capital controls. Capital controls may impose restrictions on the Fund's ability to repatriate investments or income. Such controls may also affect the value of the Fund's holdings.

Risks Associated with Emerging and Frontier Markets: Many Asian countries are considered emerging or frontier markets. Such markets are often less stable politically and

economically than developed markets such as the United States, and investing in these markets involves different and greater risks. There may be less publicly available information about companies in many Asian countries, and the stock exchanges and brokerage industries in many Asian countries typically do not have the level of government oversight as do those in the United States. Securities markets of many Asian countries are also substantially smaller, less liquid and more volatile than securities markets in the United States.

Depository Receipts: Although depository receipts have risks similar to the securities that they represent, they may also involve higher expenses and may trade at a discount (or premium) to the underlying security. In addition, depository receipts may not pass through voting and other shareholder rights, and may be less liquid than the underlying securities listed on an exchange.

Volatility: The smaller size and lower levels of liquidity in emerging markets, as well as other factors, may result in changes in the prices of Asian securities that are more volatile than those of companies in more developed regions. This volatility can cause the price of the Fund's shares (NAV) to go up or down dramatically. Because of this volatility, it is recommended that you invest in the Fund only for the long term (at least five years).

Convertible Securities: The Fund may invest in convertible preferred stocks, and convertible bonds and debentures. The risks of convertible bonds and debentures include repayment risk and interest rate risk. Many Asian convertible securities are not rated by rating agencies like Moody's, S&P or Fitch, or, if they are rated, they may be rated below investment grade (these are referred to as junk bonds, which are primarily speculative securities, and include unrated securities, regardless of quality), which may have a greater risk of default. Investments in convertible securities may also subject the Fund to currency risk and risks associated with foreign exchange rate. Convertible securities may trade less frequently and in lower volumes, making it difficult for the Fund to value those securities.

Dividend-Paying Securities: The Fund may invest in dividend-paying equity or fixed-income securities. There can be no guarantee that companies that have historically paid dividends will continue to pay them or pay them at the current rates in the future. The prices of dividend-paying equity securities (and particularly of those issued by Asian companies) can be highly volatile. In addition, dividend-paying equity securities, in particular those whose market price is closely related to their yield, may exhibit greater sensitivity to interest rate changes. The Fund's investment in such securities may also limit its potential for appreciation during a broad market advance.

Interest Rate Risk: Fixed-income securities may decline in value because of changes in interest rates. Bond prices generally rise when interest rates decline and generally decline when interest rates rise.

High Yield Securities Risk: High yield securities or unrated securities of similar credit quality (commonly known as junk bonds) are more likely to default than higher rated securities. These securities typically entail greater potential price volatility and are considered predominantly speculative. They may also be more susceptible to adverse economic and competitive industry conditions than higher-rated securities.

Risks Associated with Medium-Size Companies: Medium-size companies may be subject to a number of risks not associated with larger, more established companies, potentially making their stock prices more volatile and increasing the risk of loss.

Past Performance

The bar chart below shows the Fund's performance for each full calendar year since its inception and how it has varied from year to year, reflective of the Fund's volatility and some indication of risk. Also shown are the best and worst quarters for this time period. The table below shows the Fund's performance over certain periods of time, along with performance of its benchmark index. The index performance does not take into consideration fees, expenses or taxes. The information presented below is past performance, before and after taxes, and is not a prediction of future results. Both the bar chart and performance table assume reinvestment of all dividends and distributions. For the Fund's most recent month-end performance, please visit matthewsasiasia.com or call 800.789.ASIA (2742).

ANNUAL RETURNS FOR YEARS ENDED 12/31

AVERAGE ANNUAL TOTAL RETURNS FOR PERIODS ENDED DECEMBER 31, 2014

		Since Inception
	1 year	(10/29/10)
Matthews Asian Growth and Income Fund		
Return before taxes	-0.48%	4.84%
Return after taxes on distributions ¹	-1.52%	3.80%
Return after taxes on distributions and sale of Fund shares ¹	0.57%	3.79%
MSCI All Country Asia Ex Japan Index		
(reflects no deduction for fees, expenses or taxes)	5.11%	3.39%

- ¹ After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Investment Advisor

Matthews International Capital Management, LLC (Matthews)

Portfolio Managers

Lead Manager: Robert Horrocks, PhD, is Chief Investment Officer at Matthews and has been a Portfolio Manager of the Asian Growth and Income Fund since 2009.

Lead Manager: Kenneth Lowe, CFA, has been a Portfolio Manager of the Asian Growth and Income Fund since 2011.

Purchase and Sale of Fund Shares

You may purchase and sell Fund shares directly through the Fund's transfer agent by calling 800.789.ASIA (2742) or online at matthewsasia.com. Fund shares may also be purchased and sold through various securities brokers and benefit plan administrators or their sub-agents. You may purchase and redeem Fund shares by electronic bank transfer, check, or wire. The minimum initial and subsequent investment amounts for various types of accounts offered by the Fund are shown below.

Minimum Initial Investment	Subsequent Investments
\$3,000,000	\$100

Minimum amount may be lower for purchases through certain financial intermediaries and different minimums may apply for retirement plans and other arrangements subject to criteria set by Matthews.

Tax Information

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Tax-deferred arrangements may be taxed later upon withdrawal from those accounts.

Payments to Broker-Dealers

and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), Matthews may pay the intermediary for the sale of Fund shares and related services. Shareholders who purchase or hold Fund shares through an intermediary may inquire about such payments from that intermediary. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
